UFOs and Intelligence: A Timeline

April 23, 2025

Aggregation by George M. Eberhart ©2025

After an effort of many years, I have prepared a comprehensive timeline of UFO history that will be useful to UFO researchers and historians. "UFOs and Intelligence" is an up-to-date retrospective of UFO history (from the airship of Clonmacnoise to the newly appointed US investigation agency All-domain Anomaly Resolution Office), intertwined with events in US and world history concerning military and civilian intelligence agencies and the cult of secrecy. It is now more than 1,200 pages and more than 1 million words (including a substantial "Sources and Further Reading" appendix). Readers will discover or rediscover many events, people, and UFO cases they may not be familiar with. Some will find it useful for current or planned research projects. Military cases, those involving commercial aircraft, close encounters involving physical traces and other evidence, reports involving occupants or entities, and events surrounding military and sensitive nuclear sites are emphasized, but this timeline covers the full spectrum of UFO history, from contactee experiences to misidentifications of mundane phenomena and notorious hoaxes. Links to online sources are given, and links to biographical information are provided when available. A timeline like this allows us to view events from a different perspective, letting us make connections we might not otherwise see. It forces us to view the big picture, amid the grand flow of UFO cases, military security decisions, a vast swathe of personalities, and world history. As of 2022, all references have proper bibliographical citations with **embedded links;** if you have a version with **raw URL links,** it is an earlier version**. Dead links** will be repaired as quickly as possible. A special note of thanks to Jeff Knox, a UFO researcher in Washington State who has been helping me improve this document with corrections, additions, and amplifications.

597

597 (or 593), June 9 — Around midnight. At the time of the death of Abbot Columba of Iona Abbey, Iona, Inner Hebrides, Scotland, several groups of people fishing in the River Finn, County Donegal, Ireland, see an "immense pillar of fire" in the eastern sky. As it ascends, it briefly illuminates the entire area "like the summer sun at noon." (Adomnan, *The Life of Saint Columba*, William Reeves, ed., Edmonston and Douglas, 1874, pp. 99–100; Dolan, USO1, 37–38)

743

743 (or 744 or 748) — Ships with men aboard are seen in the air over Ireland, according to entries in the *Annals of Ulster*, the *Annals of Tigernach*, the *Annals of Clonmacnoise*, the *Annals of the Four Masters*, and some manuscripts of *Lebar Gabála*. Later accounts through the Middle Ages progressively expand on this with picturesque details. First the ships are reduced to one ship over Teltown, County Meath, from which a crewman throws and then recovers a fishing-spear. Then the scene shifts to the abbey of Clonmacnoise in County Offaly, and later to Britain, and the fishing-spear is changed to an anchor that snags on some feature of a church. The sailor who climbs down to release it is also said to be in danger of drowning in the thicker air of this lower world. The event is variously interpreted as unusual cloud formations, an aurora borealis, an ocean mirage, or UFOs. (Wikipedia, "Airship of Clonmacnoise"; Felix Liebrecht, "De mari," in *Des Gervasius von Tilbury Otia Imperialia*, Hannover, 1856, pp. 2–3; Kuno Meyer, "The Irish Mirabilia in the Norse 'Speculum Regale,'" *Ériu* 4 (1910): 1–16; John Carey, "Aerial Ships and Underwater Monasteries: The Evolution of a Monastic Marvel," *Proceedings of the Harvard Celtic Colloquium* 12 (1992): 16–28; Michael McCaughan, "Voyagers in the Vault of Heaven: The Phenomenon of Ships in the Sky in Medieval Ireland and Beyond," *Material Culture Review*, vol. 48, no. 1 (Fall 1998): 170–180; Clark III 157; Clark IV 184)

776

776 — Two red shields are seen in the sky moving above the church in the hillfortress of Sigiburg [the site is now occupied by the ruins of the Hohensyburg castle] on the Syberg hill, Dortmund, Rhein-Westphalia, Germany, just

as the army of Charlemagne is assembling to retake the fort from the Saxons. (*Annales Regni Francorum*, Anno DCCLXXVI; Andreas Müller, "776 AD, Two Red Glowing Shields in the Sky: Charlemagne and UFOs," Society for UAP Studies, December 15, 2024)

812

812 — Agobard, the archbishop of Lyon, France, writes *De Grandine et Tonitruis* ("On Hail and Thunder"), in which he condemns pagan folk beliefs, such as the notion of a "certain region called Magonia, from which ships, navigating on clouds, set sail to transport back to this same region the fruits of the earth ruined by hail and destroyed by the storm." He cites an episode in which some foolish peasants capture "three men and one woman who they said had fallen from these ships." Brought out in front of an enraged mob, Agobard intervenes and prevents their lynching, persuading the crowd that the charges are false and absurd. Some ufologists, particularly Jacques Vallée in *Passport to Magonia*, interpret this as a visitation from an alternate reality or an abduction case, while Jean-Louis Brodu observes that in the 9th century the atmosphere was likened to an ocean in which aerial ships could navigate from point to point on the earth. Miceal Ross argues that Magonia is a corruption of *Magonianus*, relating to the city of Mahón, the port of the island of Menorca, Spain. (Wikipedia, "Magonia"; Agobard, *De la Grêle et du Tonnerre*, Lyon, 1841, pp. 8–11; Jean-Louis Brodu, "Magonia: A Re-Evaluation," *Fortean Studies* 2 (1995): 198–215; Miceal Ross, "Anchors in a Three-Decker World," *Folklore* 109 (1998): 63–75; Vallée, *Magonia*, pp. 23–24; Vallée and Aubeck, *Wonders in the Sky*, Tarcher, 2009, pp. 70–73; Pierre Chambert-Protat, "Florus de Lyon et les Extra-terrestres," Florus de Lyon, November 4, 2014; Pierre Lagrange, "Agobard, la Magonie et les ovnis," *Actualité*, no. 440 (October 2017): 28–29; Clark III 157, 1213–1214; Clark IV 184, 1389–1390)

949

949, July 1 — A fire is said to arise from the Bay of Biscay and set several towns in northern Spain ablaze, including part of Zamora, Carrión, Castrojeriz, Burgos, Birviesca, Calzada, Pancorbo, and Buradón. (Francisco de Berganza, *Antigüedades de España, propugnadas en las noticias de sus reyes, en la Coronica del Real Monasterio de San Pedro de Cardeña*, Francisco del Hierro, 1721, p. 588; George Moir, ed., *Table-Talk; or, Selections from the Ana, Containing Extracts from the Different Collections of Ana, French, English, Italian, and German*, Constable & Company, 1827, vol. 10, pp. 280–281; Dolan, USO1, 38)

1060

1060 (approximately) — A large luminous object (a "pearl") begins to appear near Yangzhou, China, for a period of 10 years. At first it is seen in a swamp, then it changes location to two different lakes. A friend of the author sees it one night when it opens a door so that light shoots out from the crack "like a golden ray." The door opens further, revealing a bright, silvery light inside, so much so that the trees are illuminated as if by a sunrise. Suddenly it takes off through the air and over the water, "shining like the sun." It appears so frequently that the location attracts regular tourists, but it stops appearing and people search for it in vain. (Wikipedia, "Dream Pool Essays"; Paul Dong, *The Four Major Mysteries of Mainland China*, Prentice-Hall, 1984, pp. 69–72; Shen Kuo, "Brush Talks from Dream Book," in *The Columbia Anthology of Traditional Chinese Literature*, Columbia University, 1994, p. 593; Clark IV 190, 1221, 1272; Dolan, USO1, 41–42)

1071

1071, December — The scholar-official Su Shi watches a large light emerge from the Yangtze River near Zhenjiang, China, scaring away some mountain birds. (Shi Bo, *La Chine et les extraterrestres*, Mercure de France, 1983, p. 26; Dolan, USO1, 42–43)

1252

1252 — A bright globe of light nearly as large as the moon is seen above Padua, Italy, for one hour before vanishing. It moves faster than the moon, just as fast as a falling star. (Rolandino of Padua, *Cronica in Factis circa Facta Marchiae Trivixane,* a cura di Antonio Bonardi, in *Raccolta degli Storici Italiani…ordinata da L. A. Muratori,* vol. 8, part 1, Castella, 1908, p. 100)

1290

1290, October 28 — The story of a large silver disk seen in the sky over Byland Abbey, in North Yorkshire, England, is a hoax perpetrated by two British teenagers in 1953. ([Letter], London *Times,* January 9, 1953; Desmond Leslie and George Adamski, *Flying Saucers Have Landed,* British Book Centre, 1953, pp. 22–23; Condon, pp. 493–495; Jason Colavito, "The Byland Abbey UFO Sighting: Anatomy of a Hoax," Jason Colavito blog, May 4, 2015)

1440

1440 — Nicholas of Cusa publishes *On Learned Ignorance,* in which he advocates not only the idea of a plurality of worlds but also the existence of life on the moon and sun. (Wikipedia, "*De Docta Ignorantia*")

1457

1457 — French theologian William Vorilong agrees that God could create another inhabited world, but adds that Jesus of Nazareth only redeemed this world. God would have to address the issue of sin in other worlds on an individual basis. (David Darling, "Encyclopedia")

1461

1461, November 1 — Night. A bright object like a long and thick iron bar is seen in the vicinity of Arras, France. It appears as bright as the full moon and remains visible for about 7 minutes, apparently moving in a spiral. (Frédéric de Reiffenberg, ed., *Mémoires de J. du Clercq,* vol. 3, chapter 37, Brussels, 1823, p. 189; Jason Colavito, "The UFO over Arras on November 1, 1461: Six Decades of Translation Issues," Jason Colavito blog, March 22, 2015)

1492

1492, October 11 — 10:00 p.m. Standing on the deck of the *Santa María,* Christopher Columbus sees a light in the distance "like a small wax candle that rose and lifted up." Another sailor also sees the faint light. Columbus considers it an indication of land, and he indeed makes landfall on San Salvador Island, or one of the other islands in the Bahamas, about four hours later. Historians attribute the light to canoes, fires onshore, or bioluminescence. ("The *Diario* of Christopher Columbus (October 11–15, 1492)," History Is a Weapon; Washington Irving, ed., *The Life and Voyages of Christopher Columbus,* G. & C. Carvill, 1828, vol. 1, p. 146; Laura Geggel, "A Mysterious Light Gleamed as Columbus Drew Near," *New York Times,* Green blog, October 8, 2012; Dolan, USO1, 44–46)

1532

1532 — Juan Maldonaldo, a Spanish cleric, writes *Somnium,* in which he travels to the Moon in a dream. There he is taken to a lunar city, whose houses around the square are identical and symmetrical. The building is exceptional, with fine materials which remind him of the New Jerusalem. The temple's central location and its wonderful

execution stand out. The inhabitants play, dance, and bathe in a lake in the center of the city. They are all equal and treat each other with respect. He finally comes back to the Earth, to a city in America, where he talks to locals who are Christians. ("Utopian Texts"; Daniel Garcia Valdes, "Somnium, de Juan Maldonaldo: ¿Primera novela de ciencia ficción de la historia?" La Soga: Revista Cultural, January 13, 2020)

1547

1547, December 15 — Mariners in the port of Hamburg, Germany, see a fireball moving to the south. Its rays are so hot that passengers cannot remain inside the ships. Thinking the vessels are about to burn, they hide and take cover. (Simon Goulart, *Thrésor d'histoires admirables et mémorables de nostre temps,* Geneva, 1600, vol. 1, p. 55)

1561

1561, April 14 — Dusk. A "frightening vision" is seen in the sky above Nuremberg, Germany, said to be observed by many. Printer Hans Glaser describes in his broadside many blood-red, blue, and black balls or discs near the Sun. "They were three alongside each other, sometimes four in a square, and several alone, and between these balls blood-colored crosses" are seen. Two "great pipes" (cannon) are also observed, and everything starts to "fight against each other." The battle lasts about one hour, then the burning balls fall to the earth and vanish on the ground. Although cited as a possible early UFO report, the narrative is simply about a battle in the sky by phantom armies told as an allegory of what awaits an unrepentant humanity on Judgment Day. A meteorological cause is also possible. ("Nürnberger Flugblatt von 1561," Wikipedia; Hans Glaser, *Himmelserscheinung über Nürnberg am 14. April 1561*, Holzschnitt, 1561; Carl Jung, *Flying Saucers: A Modern Myth of Things Seen in the Skies,* Mentor ed., 1969, pp. 103–104, between pp. 120–121; Frank Johnson, "Nuremberg 1561 UFO 'Battle' Debunked," Ancient Aliens Debunked, December 12, 2012; Ulrich Magin, "A UFO in the Year 1561," *Fortean Times* 283 (February 2012): 40–42; Ulrich Magin, "Ein UFO im Jahr 1561?"; "14th April 1561: The Nuremberg Celestial Phenomenon," HistoryPod YouTube channel, April 13, 2015)

1566

1566, July 27–28, August 7 — Sunrise. In Basel, Switzerland, numerous large black balls are said to have been seen passing around the sun, apparently engaged in a fight. Many turn red and are extinguished. Ulrich Magin suggests that the description is an apocryphal sky battle that is a warning sign from God. ("Basler Flugblatt von 1566," Wikipedia; Samuel Koch, *Seltzame gestalt so in diesem M.D.LXVI. Jar Gegen auffgang und nidergang, under dreyen malen am Himmel ist gesehen woorden, zu Basel auff den xxvij. Und xxviij. Höwmonat und volgends auf den vij Augsten,* Basel, Samuel Apiarius, 1558)

1584

1584 — Italian philosopher Giordano Bruno introduces in his *De l'infinito, universo e mondi* the idea of multiple worlds supporting the infinite possibilities of a pristine, indivisible One. His character Philotheo claims that "innumerable celestial bodies, stars, globes, suns, and earths may be sensibly perceived therein by us and an infinite number of them may be inferred by our own reason." (Wikipedia, "De l'infinito, universe e mondi"; Giordano Bruno, *De l'infinito universo e mondi*, Venice, 1584)

1608

1608 — German astronomer Johannes Kepler writes *Somnium* to describe what practicing astronomy would be like from the perspective of another planet and to show the feasibility of a non-geocentric system. The manuscript, which disappears after changing hands several times, describes a fantastic trip to the Moon; it is part allegory, part autobiography, and part treatise on interplanetary travel, and is sometimes described as the first work of science

fiction. It is published posthumously by his son, Ludwig Kepler. (Wikipedia, "*Somnium* (novel)"; Johannes Kepler, *Somnium, seu opus posthumum De astronomia lunari*, Frankfurt, 1634)

1627

1627 — English bishop Francis Godwin writes *The Man in the Moone*, describing a Spaniard named Gonsales who flies to the Moon (with the help of some swans) and visits people there who are Christians living in a utopian society. The Lunars speak a language consisting "not so much of words and letters as tunes and strange sounds," which Gonsales succeeds in gaining some fluency in after a couple of months. He discovers that their unruly children are swapped out for better-behaved kids on Earth. (Wikipedia, "*The Man in the Moone*")

1630

1630, January 25 — 7:00 p.m. German astronomer Wilhelm Schickard observes a bright-white oval or egg-shaped object in the northern sky above Tübingen, Germany. The object is later joined by two other white shapes, although in differing stages of intensity. One looks like an "overturned cauldron," while the other is similar to a "long whetstone ground down on both sides." The cloud-like objects do not flicker like stars but seem to fade in and out of visibility. Colored lights also appear around the original object over a period of three hours. (Wilhelm Schickard, *Beschreibung des Wunder-Zeichens, welches Montags den 25. Januar 1630 gegen Norden gesehen worden*, 1630; Andreas Müller, "Prof. Wilhelm Schickard (1592–1635): UFO-Zeuge und Deutschlands erster UFO-Forscher," grenzWissenschaft-aktuelle.de, August 19, 2023)

1632

1632 — Italian astronomer Galileo Galilei writes in *Dialogue Concerning the Two Chief World Systems* that if life exists on the Moon, it must be "extremely diverse and far beyond our imagining." (Wikipedia, "*Dialogue Concerning the Two Chief World Systems*")

1638

1638 — English clergyman and philosopher John Wilkins writes *The Discovery of a World in the Moone*, in which he highlights the similarities of the Earth and the Moon (seas, mountains, atmosphere) and concludes that the Moon is likely to be inhabited by living beings, whom the calls "Selenites." (John Wilkins, *The Discovery of a World in the Moone*, 1638; Maria Avxentevskaya, "How 17th Century Dreamers Planned to Reach the Moon," Real Clear Science, December 2, 2017)

1638 — Night. John Everett and two companions are crossing the Muddy River near Boston, Massachusetts, in a boat when a "great light" appears above them. It darts back and forth across the river, sometimes hovering and "flaming up," for about 2–3 hours. After they stop watching it, they discover that their boat has moved about one mile against the current to the place where they had embarked. (John Winthrop, *The History of New England from 1630 to 1649*, Little, Brown, 1853, vol. 1, pp. 349–350)

1644

1644, January 18 — 12:00 midnight. Three men in a boat near Boston, Massachusetts, watch two lights rise out of the water, move toward the town, and disappear after 15 minutes. One week later, two lights are again seen around 8:00 p.m., moving back and forth above Nottles Island in Boston harbor. (John Winthrop, *The History of New England from 1630 to 1649*, Little, Brown, 1853, vol. 2, p. 184; Daniel Tobias Hinchen, "'Great Sights upon the Water…': Unexplained Phenomena in Early Boston," The Beehive, January 23, 2019)

1647

1647, June 6 — French philosopher René Descartes in a letter opines that he sees no reason why God would not create intelligent creatures in the stars. (Letter to Pierre Chanut, in *Oeuvres des Descartes,* ed. Charles Adam and Paul Tannery, 1903, vol. 5, pp. 54–55)

1648

1648, June — Evening. People in New Haven, Connecticut, see the form of a ship's keel with three masts, complete with sails, in the air above the harbor. A man can be seen standing on the deck with a sword. Soon some smoke issues from the apparition, engulfing it, and it vanishes. (John Winthrop, *The History of New England from 1630 to 1649,* Little, Brown, 1853, vol. 2, pp. 399–400)

1657

1657 — The French dramatist Cyrano de Bergerac's novel, *L'Autre monde ou les états et empires de la Lune* is published, detailing his attempts to reach the Moon to prove there is a civilization that sees the Earth as its own moon. (Wikipedia, "*Comical History of the States and Empires of the Moon*")

1661

1661, October — Afternoon. More than a dozen people are walking along the southern shore of the River Severn near Bristol, England, when they supposedly see a kite-like object ascend from the water and take the form of a cloud. Within the cloud they see, at various times, a black man moving swiftly, a man on horseback, and a beautiful woman. Afterward, the cloud disperses. Most likely a political allegory related to the Restoration of Charles II. (*Mirabilis Annus Secundus, or The Second Year of Prodigies,* 1662, pp. 10–11; Dolan, USO1, 40–41)

1663

1663, August 15 — 12:00 noon. The faithful gathered in a church in a village near Lake Zarobozero, Vologda Oblast, Russia, hear a loud noise outside and see a large ball of fire descend from the north and then head south following the lake, low over its surface. The fireball seems to measure about 140 feet across and has blue smoke issuing from its sides. Two fiery rays extend from its front part. Less than an hour later, a similar fireball reappears over the same lake. Moving from south to west, the object again disappears. It reappears a third time a short while later, this time larger than before, and stays over the lake for an hour and a half. Peasants in a boat try to get close to it, but the heat is too intense. The water of the lake is illuminated to a depth of 30 feet, and fish are seen swimming away from the object, which then flies off to the west. (*Akty istoricheskie, sobranye i izdanye Arkheografischeskaia Kommissiia,* Vol. 4, Saint Petersburg, 1842, pp. 331–332; Hobana and Weverbergh 54–61; Paul Stonehill, *The Soviet UFO Files,* 1998, pp. 16–17; Jacques Vallée and Chris Aubeck, *Wonders in the Sky,* Tarcher, 2009, pp. 215–217; Thomas E. Bullard, "Defending UFOs," *IUR* 34, no. 2 (March 2012): 31; "Russian Fireball Weirdness, 1663," Beachcombing's Bizarre History Blog, March 8, 2014; Clark III 163–164; Stonehill and Mantle, *Russia's USO Secrets,* Flying Disk, 2020, pp. 157–161; Clark IV 190–191; Dolan, UDO1, 43–44)

1665

1665, April 8 — 6:00 p.m. Numerous wonders are seen in the sky over Stralsund, Germany, including ships, large flocks of birds, fire, and smoke, as well as a dark "round flat form like a plate and like a big man's hat" that hovers above St. Nicholas Church for one hour. Witnesses include several fishermen who later complain of tremors in their hands and feet. (*Eine abgebildete Beschreibung von dem wunderbarlichen Stralsundischen Lufft-Kriege und Schiff-streite,* Leipzig, 1665; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in*

History, Anomalist, 2015, pp. 23–38; Andreas Müller, "UFO 1665: Sonderausstellung in der Kunstbibliothek Berlin widmet sich historischen Darstellungen unidentifizierter Flugobjekte und Phänomene," grenzWissenschaft-aktuelle.de, May 3, 2023; Moritz Wullen, "A UFO in 1665: The Air Battle of Stralsund," Kunstbibliothek, Staatliche Museen zu Berlin, May 5, 2023)

1686

1686 — French philosopher Bernard Le Bovier de Fontenelle writes *Conversations on the Plurality of Worlds,* in which he expresses the idea that the stars are distant suns that might have their own planetary systems, including the possibility of extraterrestrial life. He imagines Venusians to be "little black people, scorched with the Sun, full of fire, very amorous." (Wikipedia, "*Conversations on the Plurality of Worlds*")

1698

1698 — Dutch astronomer Christiaan Huygens has a work posthumously published, *Cosmotheoros* (or, in its English title *Celestial Worlds Discover'd: Or, Conjectures Concerning the Inhabitants, Plants and Productions of the Worlds in the Planets)* that will within two decades be available in five languages beyond its original Latin version. He speculates that other planets also harbor plant and animal life. (Christiaan Huygens, *Celestial Worlds Discover'd,* 1722)

1717

1717, March 6 — 2:00 a.m. François Antoine Ricouart, captain of the French frigate *La Valeur,* is navigating southwest of Martinique in the Caribbean Sea, when he observes an object like a ship's mast pass alongside, standing up about 2 feet above the water. (Michel Bougard, *La chronique des OVNI,* Jean-Pierre Delarge, 1977, p. 104; Dolan, USO1, 51–52)

1737

1737, December 5 — 5:00 p.m. Physician Thomas Short witnesses a blood-red luminous display in the sky around Sheffield, England, which moves from west to north and then to the east. The cause seems to be one or more clouds in which are embedded brilliant lights as bright as the full moon that give off slow-moving streamers or rays. The display is accompanied by unseasonable heat and lasts until 10:30 p.m. Short hears that a similar phenomenon is seen at the same time in Venice, Italy, and Kilkenny, Ireland, where it appears as a bursting fireball. (Thomas Short, "An Account of Several Meteors," *Philosophical Transactions of the Royal Society* 41 (1741): 625–627)

1737, December 6 — Afternoon. A large, blood-red object is seen in the western sky at Bucharest, Wallachia [now Romania]. It lingers for two hours before splitting up then reuniting once again. The phenomenon is said to have occurred at night in the Banat region. (Hobana and Weverbergh 222; Romania 4)

1740

1740, February 23 — Night. A purple globe of fire is seen slowly rising above the harbor of Toulon, France. It plunges into the water, then rises up again and explodes with a loud blast like a bomb, breaking into several fireballs that fall either into the sea or nearby hills. The witnesses are interviewed by Jacques Nompar de Caumont, 7th Duke of La Force, who passes the information on to René Antoine Ferchault de Réaumur of the Académie des Sciences. ("Observations de phisique generale," *Histoire de l'Academie Royale des Sciences,* 1740, tome 1, pp. 3–4; Dolan, USO1, 52–53)

1741

1741, September 21 — Dawn. Parson-naturalist Gilbert White wakes up at his vicarage in Selborne, Hampshire, England, and finds the neighboring clover fields matted all over with a thick coat of cobwebs, laced with dew. The dogs are blinded by it when they attempt to hunt. At 9:00 a.m. more cobwebs fall from the sky and continue until dusk. They are "perfect flakes or rags; some near an inch broad, and five or six long, which fell with a degree of velocity that showed they were considerably heavier than the atmosphere." The fall extends to the neighboring villages of New Alresford and Bradley. (Gilbert White, *The Natural History and Antiquities of Selborne,* 1789, Letter XXIII; Clark III 123; Clark IV 151)

1742

1742, December 16? — 8:40 p.m. Physician Cromwell Mortimer, secretary of the Royal Society, is walking through St. James's Park in Westminster, London, England, when he sees a light ascend from behind the trees and houses in the southwest. When it reaches 20° against the sky, it takes a horizontal path with an undulating motion before disappearing in the northeast after a full 30 seconds. The front part is luminous with a frame-like structure behind it, and it has a faint trail. The date is questionable since Mortimer calls this a "Thursday" and December 16 was a Sunday. ([A Note by Cromwell Mortimer], *Philosophical Transactions of the Royal Society* 43 (1745): 524–525)

1745

1745, July 14 — Astronomer George Costard observes a meteoric stream of fire whose trail persists for at least one hour at Standlake Broad west of Oxford, England. ("Part of a Letter from the Reverend Mr. Geo. Costard to Mr. John Catlin, concerning a Fiery Meteor Seen in the Air on July 14, 1745," *Philosophical Transactions of the Royal Society* 43 (1745): 522–524)

1749

1749, November 4 — 11:50 a.m. The crew of the HMS *Montagu* watches a large blue fireball, apparently low on the water, head directly toward them from the northeast and explode some 150 feet away from the ship, causing some damage to the mast, before it continues on toward the southwest. The incident takes place in the North Atlantic Ocean some 240 miles west of Cape Finisterre, Spain. (Chalmers, "An Account of an Extraordinary Fireball Bursting at Sea," *Philosophical Transactions of the Royal Society* 46 (1752): 366–367; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History,* Anomalist, 2015, pp. 67–75; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 2, Anomalist, 2021, pp. 105–114)

1755

1755, March — German philosopher Immanuel Kant publishes *Universal Natural History and Theory of the Heavens,* in which he theorizes that distance from the Sun determines the intelligence level of a world's inhabitants; thus, the people who live on Mercury are the stupidest, and the Venusians are only dimly brighter—making any Jupiterians and Saturnians much smarter than earthlings. (Wikipedia, "*Universal Natural History and Theory of the Heavens*")

1756

1756 — Scottish astronomer James Ferguson writes *Astronomy Explained upon Sir Isaac Newton's Principles,* proclaiming the certainty of a plurality of inhabited worlds "peopled with myriads of intelligent beings, formed for endless progression in perfection and felicity." (James Ferguson, *Astronomy Explained upon Sir Isaac*

Newton's Principles, 8th ed., London, 1790, p. 6; Matthew Goodman, *The Sun and the Moon*, Basic Books, 2008, pp. 189–190)

1756, November 27 — A luminous object, as large as the full moon, passes from southwest to northeast above a town in Sweden. It brightens the landscape and leaves a trail of thick smoke. ("Historical Chronicle," *Gentleman's Magazine* 26 (1756): 38)

1758

1758 — Swedish theologian and mystic Emanuel Swedenborg writes in *The Earths in the Universe* that that he has conversed with spirits from Jupiter, Mars, Mercury, Saturn, Venus, and the Moon, as well as spirits from planets beyond the solar system. From these encounters, he concludes that the planets are all inhabited and that such an enormous undertaking as the universe cannot have been created for just one race on one planet. (Emanuel Swedenborg, *The Earths in the Universe*, London, 1875; Clark III 298; Richard Smoley, "Is There Really Life on Other Planets?" Swedenborg Foundation, February 15, 2019; Clark IV 203, 337–338)

1759

1759, April 27 — 4:00 p.m. Following a clap of thunder, a flat, pale object is seen "dancing" in the sky over Longdon, Somerset, England. It is joined by three similar objects, all of which move from west to east for 30 seconds and disappear in a cloud. (London *Universal Chronicle and Weekly Gazette*, May 5, 1759; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 83–96)

1762

1762, August 9 — 12:00 noon. An amateur astronomer named de Rostan is observing the Sun at Lausanne, Switzerland, when he notices a large, spindle-shaped body moving across the solar disc from east to west at a slower rate of speed than sunspots move. It is surrounded by a thin "nebulosity." An observer named Croste in Solothurn, Switzerland, also observes the object, but French astronomer Charles Messier, who is also taking solar measurements in Paris, France, does not see it. It remains visible until September 7, when it passes the Sun's western limb. ("Observation Astronomique," *Histoire de l'Académie Royale des Sciences*, 1766, pp. 106–107; "An Account of a Very Singular Phaenomenon Seen in the Disk of the Sun," *Annual Register*, 1766, pp. 120–122; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 2, Anomalist, 2021, pp. 33–45)

1767

1767, September 9 — A cloud "like a house on fire" that soon takes on a pyramidal form is seen traveling along the course of the River Isla near Coupar Angus, Perth, Scotland. It moves northeast to the confluence of the River Ericht and follows that stream to the west toward Blairgowrie where it disappears. It is accompanied by strong winds that destroy two houses. (*Annual Register*, 1767, pp. 127–128; "Scotland UFO Report from the Year 1767," Filer's Files, #34-2000, August 28, 2000; Dolan, USO1, 53–56)

1775

1775 — Louis-Guillaime de Lafolie writes *Le Philosophe sans prétention*, a work of proto-science fiction in which he follows a narrator, an Arab named Nadir who, in a vision, beholds the voyages of a Mercurian named Ormisais. In his description of life on Mercury, Ormisais relates the workings of an elite scientific-literary organization (like the British Royal Society) but much more restrictive, with only a dozen members. One of the applicants for the latest vacancy is a young inventor, Scintilla, the true hero of the tale. He shows the Academy members his flying machine, "an elaborate combination of wheels, globes of glass, springs, wires, glass-covered wooden uprights, a

plate rubbed with camphor and covered with gold leaf." After a short demonstration flight, Ormisais is chosen to take the trip to Earth, but he crashes and is stranded, a stranger in a strange land. He tells Nadir that it took him 500 hours to ascend or descend to Earth; the universe, he says, has neither height nor depth nor center nor frontiers. (Chris Aubeck, *Alien Artifacts, Volume 1: From Antiquity to 1880,* The Author, 2022, p. 35)

1777

1777, June 17 — 11:46 a.m. French astronomer Charles Messier views a large number of round, dark-brown globules passing in front of the disc of the sun for 5 minutes from west-southwest to east-northeast. He sees them through an achromatic refractor at the naval observatory located in the Hôtel de Cluny in Paris, France. His estimate of their size (one-600th the size of the solar disc) puts them near the limit of resolution for his telescope, but Messier claims the objects are far away and in focus. Martin Shough and Wim van Utrecht conclude, based on the telescope Messier used and his observational data, that the globules were "not grossly out-of-focus nearby particles" (in other words an optical artifact) and probably were objects at a distance of several miles or so away. What those objects were is impossible to determine today. (Charles Messier, "Observation singulaire d'une prodigieuse quantité de petits globules qui ont passé devant le disque du soleil, le 17 juin 1777," *Mémoires de l'Academie Royale des Sciences,* 1777, pp. 464–472; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 7–18)

1783

1783 — British astronomer William Herschel has been observing the lunar surface since the mid-1770s in Bath, England, and writes journal entries in which he details sightings of immense trees, forests, and pastures, comparing it to the English countryside. By 1778, he is seeing circular formations that he thinks are towns and villages. He also notes canals, roads, and patches of vegetation, but never writes about it publicly, since he knows that telescopic observations can be tricky. (George Basalla, *Civilized Life in the Universe,* Oxford University, 2006, pp. 51–52)

1783, August 18 — 9:15–9:30 p.m. An unusually bright bolide is observed in the British Isles on a clear, dry night. Analysis indicates that the meteor has entered the Earth's atmosphere over the North Sea, before passing over the east coast of Scotland, England, and the English Channel; it finally breaks up, after a passage within the atmosphere of around 1,000 miles, over southwestern France or northern Italy. Perhaps the most prominent witness is Tiberius Cavallo, an Italian natural philosopher who happens to be among a group of people on the terrace at Windsor Castle, Berkshire, England, at the time the meteor appears. (Wikipedia, "1783 Great Meteor"; Tiberius Cavallo, "Description of a Meteor, Observed Aug. 18, 1783," *Philosophical Transactions of the Royal Society* 74 (1784): 108–111; Charles Blagden, "An Account of Some Late Fiery Meteors," *Philosophical Transactions of the Royal Society* 74 (1784): 202–232; Martin Beech, "The Great Meteor of 18th August 1783," *Journal of the British Astronomical Association* 99 (1989): 130–134; Kaushik Patowary, "The Great Meteor of 1783," Amusing Planet, September 8, 2021)

1783, September 19 — The Montgolfier brothers, Joseph-Michel and Jacques-Étienne, publicly demonstrate their *Aérostat Réveillon* balloon at Versailles, France, for Louis XVI and Marie Antoinette. It is flown with the first living beings in a basket attached to the balloon: a sheep called Montauciel ("Climb-to-the-sky"), a duck, and a rooster. The sheep is believed to have a reasonable approximation of human physiology. The duck is expected to be unharmed by being lifted aloft. It is included as a control for effects created by the aircraft rather than the altitude. The rooster is included as a further control, as it is a bird that does not fly at high altitudes. The flight lasts approximately eight minutes, covers 2 miles, and reaches an altitude of about 1,500 feet. Some 100,000 people witness the event. The craft lands safely in the woods of Vaucresson, with the sheep unperturbed, the duck upset, and rooster killed with a broken neck. (Wikipedia, "Montgolfier brothers"; *The Romance of Ballooning: The Story of the Early Aeronauts,* Viking Press, 1971, pp. 18–19; C. C. Gillispie, *The Montgolfier Brothers and the Invention of Aviation, 1783–1784,* Princeton University, 1983, pp. 92–93)

1783, November 21 — 1:54 p.m. The first balloon to carry humans aloft in free flight is launched by the Montgolfier brothers in a public demonstration at the Château de la Muette in Paris. The aeronauts are Jean-François Pilâtre de Rozier and François Laurent d'Arlandes. They take off, observed by Louis XVI, various members of the court

and Academy, and Benjamin Franklin. The balloon travels slowly for 25 minutes and 5.5 miles to the southeast, attaining a height of 3,000 feet. Burning embers are scorching the balloon fabric and have to be daubed out with sponges and Pilâtre's coat, so even though they have fuel remaining, they return to the ground at Butte-aux-Cailles between two windmills. Upon landing, the pilots drink champagne. (Wikipedia, "Montgolfier brothers"; *The Romance of Ballooning: The Story of the Early Aeronauts,* Viking Press, 1971, pp. 20–21; C. C. Gillispie, *The Montgolfier Brothers and the Invention of Aviation, 1783–1784,* Princeton University, 1983; Richard Holmes, *The Age of Wonder,* Vintage, 2008; S. L. Kotar and J. E. Gessler, *Ballooning: A History, 1782–1900,* McFarland, 2011, pp. 9–17)

1790

1790, June 12 — 5:00 a.m. Several farmers in Alençon, Normandy, France, see a large globe surrounded by flames and making a whistling sound. The object slows, oscillates, and moves toward the top of a hill, unearthing some plants along the slope. The heat is so intense that grass and small trees start burning. In the evening the sphere is still warm. Witnesses include two mayors, a doctor, and three other authorities in addition to the dozens of peasants who are present. A kind of door opens and a person emerges. He is dressed in a tight-fitting suit and, seeing all the people, says some words that are not understood. He runs into the woods. The sphere explodes silently, throwing pieces everywhere, and these pieces burn until they are powder. The original source is allegedly from a June 17 report by a Police Inspector Liabeuf and forwarded to the French Academy of Sciences. However, the Academy reported in 2006 that it has no knowledge of such a report in its archives. Probable hoax. (Alberto Fenoglio, "Antichi Visitatori dal Cielo," *Clypeus* 3, n. 3 (1966): 13–14; Gordon Creighton, "A Landing in France in 1790," *Flying Saucer Review* 13, no. 5 (Sept./Oct. 1967): 10; Vallée, *Magonia,* pp. 60–61; "1790 UFO Crash or Time Traveller?" Cool Interesting Stuff, June 1, 2014; Clark IV 1258)

1794

1794, August 20 — 7:45 p.m. Witnesses in Balasore, Odisha, India, watch a meteor descending into the nearby hills, making short and frequent pauses. After falling below the hills, it rises and falls two more times. (*The Star* (London), March 14, 1795; Jacques Vallée and Chris Aubeck, *Wonders in the Sky,* Tarcher, 2009, p. 272)

1798

1798, September 10 — Before midnight. Schoolmaster Alexander Campbell and one other person observe a "remarkable comet, or meteor" at Alnwick, Northumberland, England. It rapidly increases in brightness, changing from a star-like object to a shape like "two half-moons, back to back, having a short luminous stream between the two backs" over the course of 5 minutes. (*Annual Register* 1798, p. 83)

1801

1**801** — British astronomer William Herschel writes that the Sun's cold interior is inhabited. (George Basalla, *Civilized Life in the Universe,* 2006, pp. 52–53)

1803

1803, February 22 (or March 24) — An attractive young woman aged 18–20 years old arrives on a beach aboard a "hollow ship" (*Utsuro-bune*) that looks like a rice cooking pot or incense burner in Hitachi province, Japan. Fishermen bring her inland to investigate further, but the woman is unable to communicate in Japanese. She is dressed in a foreign fashion made of unknown fabrics and is clutching an ornate box also marked with the unknown script. The vessel is covered in hieroglyphs that no one can decipher. The fishermen return her and her vessel to the sea, where it drifts away. Accounts of the tale appear in three texts: *Toen shōsetsu* (1825), *Hyōryū*

kishū (1835), and *Ume-no-chiri* (1844), but no official records mention it. (Wikipedia, "Utsuro-bune"; Kazuo Tanaka, "Did a Close Encounter of the Third Kind Occur on a Japanese Beach in 1803?" *Skeptical Inquirer* 24, no. 4 (July/August 2000): 37–60; Masaru Mori, "The Female Alien in a Hollow Vessel," *Fortean Times* 48 (Spring 1987): 48–50; Junji Numakawa, "On a UFO-Shaped Boat in 1803," *UFO Criticism* 1, no 1 (January 2001): 2–3; Shoichi Kamon [pseud. of Tanaka Kazuo], *The Mystery of Utsuro-bune: Ancient UFO Encounter in Japan?* Flying Disk Press, 2019; Tanaka Kazuo, "'Utsurobune': A UFO Legend from Nineteenth-Century Japan," nippon.com, June 26, 2020; "Japan's 200-Year-Old UFO Mystery: Close Encounter of the Third Kind?" Japanese Tales, September 17, 2020; "A UFO with a Female Alien Flew to Japan 220 Years Ago? Mysterious Record of the 'Utsuro-bune,'" Medium: Otakupapa, May 20, 2024; "UFO Landed in Japan 220 Years Ago? The Mystery of the Utsuro-Bune," Medium: Otakupapa, June 28, 2024)

1808

1808, May 16 — 4:00 p.m. Swedish lichenologist Erik Acharius watches a stream of dark-brown spherical objects moving slowly through the sky in a straight line over Biskopsberga, near Skänninge, Sweden. Some hover temporarily and speed up, while others fall to earth. The objects appear in the western sky and stream to the east for 2 hours. Some are apparently linked together in groups of three, six, or eight, and all of them have some kind of trail. A few of them fall in the vicinity of K. G. Wettermark, who has also been observing. They resemble soap bubbles and dissipate quickly, leaving a film like cobweb. (Erik Acharius, "Besynnerligt Meteor-Phenomén," *Konglige Svenska Vetenskapsakademiens Handligar*, ser. 2, vol. 29 (July/September 1808): 215–218; "Account of an Extraordinary Meteoric Phenomenon," *North American Review* 3 (1816): 320–322; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 18–29; Clark III 1101; Clark IV 1227)

1813

1813 — A 15-year-old German girl develops a mediumship in which she makes repeated trips to the moon, led by deceased relatives, and describes the scenery. (C. Römer, *Ausführliche historische Darstellung einer höchst merkwürdigen Somnambüle nebst dem Versuche einer philosophischen Würdigung des Magnetismus*, Metzler, 1821; Frank Podmore, *Mesmerism and Christian Science*, George W. Jacobs, 1909, p. 213; Clark IV 203)

1813, April 8 — Day. The US merchant ship *Niagara*, under Captain Merry, is sailing southwestward in the Atlantic Ocean about 40 miles south of Nova Scotia when the crew sees a "large hump" in the water 6–8 miles northwest of their position. As they draw closer, they realize it is moving. They estimate it is 200 feet long, 30 feet wide, and extending 17–18 feet above the surface. Near its head is a large hole or archway. ("Something Strange," *Plattsburgh (N.Y.) Republican*, May 14, 1813, p. 1; Jacques Vallée and Chris Aubeck, *Wonders in the Sky*, Jeremy P. Tarcher, 2009, pp. 292–293; USO1, 56–58)

1819

1819, August 13 — 8:00–9:00 p.m. A brilliant white fireball streaks across the sky at Amherst, Massachusetts. The next morning, Erastus Dewey finds a strange substance 20 feet from his front door and assumes it is residue from the meteorite. It is about 8 inches in diameter, resembles an upside-down salad dish, and consists of buff-colored pulpy substance with an overwhelmingly bad smell. It is covered with a nap that, when removed, causes the interior to liquefy and form a starchy substance. A couple days later, it largely dissipates. Geologist Edward Hitchcock thinks it is some kind of "gelatinous fungus" common to the area in the late summer. (Rufus Graves, "Account of a Gelatinous Meteor," *American Journal of Science* 2 (1820): 335–337; Edward Hitchcock, "On the Meteors of Nov. 13, 1833," *American Journal of Science* 25 (1834): 354, 362–363; Clark III 1101; Clark IV 1227–1228)

1820

1820, February 12 — 10:45 a.m. A German astronomer and cleric named Steinhübel watches a clearly defined dark orange-red spot traversing the disc of the Sun in about five hours. Canon Augustin Stark also observes the object at a slightly different time from Augsburg, Germany; it has an orange-gold tint. (Richard C. Carrington, "On Some Previous Observations of Supposed Planetary Bodies in Transit over the Sun," *Monthly Notices of the Royal Astronomical Society* 20 (1860): 192–194; Joseph Johann von Littrow, "Further Note on the Supposed Observation of an Intra-Mercurial Planet on the 12th of February, 1820," *Monthly Notices of the Royal Astronomical Society* 22 (1862): 276)

1824

1824 — Bavarian astronomer Franz von Gruithuisen of Munich, Germany, writes *Discovery of Many Distinct Traces of Lunar Inhabitants, Especially of One of their Colossal Buildings,* in which he announces his discovery of a city on the Moon in the rough terrain to the north of Schröter crater that he names the *Wallwerk*. This region contains a series of somewhat linear ridges that have a fishbone-like pattern, and, with the small refracting telescope he is using, can be perceived as resembling buildings complete with streets. His claims are readily refuted using more powerful instruments. Gruithuisen also thinks that the mysterious "ashen light" observed on Venus's dark side is due to a festival of fire in honor of the "ascension of a new emperor to the throne of the planet." Later, he speculates that the illumination is caused by burning jungles to create new farmland. (Franz von Paula Gruithuisen, *Entdeckung vieler deutlichen Spuren der Mondbewohner, besonders eines collossalen Kunstgebäudes*, München, 1824; "Gruithuisen's Lunar City," whatsupinthesky.com; David Dunér, "Venusians: The Planet Venus in the 18th-Century Extraterrestrial Life Debate," *Journal of Astronomical Data* 19, no. 1 (2013): 162; Andrew May, "The Lost Ruins of the Moon," *Fortean Times* 358 (October 2017): 56)

1825

1825, August 12 — 3:30 a.m. English naturalist Andrew Bloxam is aboard the HMS *Blonde* in the Pacific Ocean east of the Cook Islands. The men on watch suddenly find the sea lit up and they see a round, glowing-red object about the apparent size of the sun rising up 7° above the waves, then falling out of sight. It rises and falls once more, completely silent. It gives off such a great light that the ship's deck is illuminated. (Andrew Bloxam, *Diary of Andrew Bloxam, Naturalist of the "Blonde,"* Bernice P. Bishop Museum, Special Publication 10, 1925, p. 88; Dolan, USO1, 59–60)

1826

1826, April 1 — 4:00 p.m. Stone mason Johannes Becker hears a noise resembling thunder at Rastpfuhl, northwest of Saarbrücken, Germany, and sees a grayish object "like two pieces of tin" approaching the earth with lightning speed and expanding itself like a sheet before falling to earth, apparently not far away. After one minute there is another sound like thunder and a strong whirlwind, as if coming from an impact. Pastor Köllner collects testimony from other nearby witnesses and visits the supposed landing site but finds no burn marks or meteoritic stones. (Ernst Chladni, "Über eine merkwürdige meteorische Erscheinung, am 1 April 1826, nicht weit von Saarbrücken," *Annalen der Physik und Chemie* 7 (1826): 373–377; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 1, Anomalist, 2019, pp. 31–38; Andreas Müller, "Saarbrücken 1826: Deutschlands älteste UFO-Akte weiterhin verschollen," grenzWissenschaft-aktuell,de, May 28, 2020)

1829

1829, August 20 — 11:00 p.m. A man on the York Road east of Leeds, England, sees a moon-like object split into two halves, the upper half of which gives off an apparent shaft of light. He sees two human figures visible to the waist, one of which has a red cloth around its head. The object is visible for more than one hour and is seen by others, during which time a cloud passes in front of it. ("Celestial Phenomena," *York Herald,* August 22, 1829, p. 2;

Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 111–125)

1832

1832 — Philippine Demuth Bäurle, 16, of Weilheim an der Teck, Germany, begins slipping into hypnotic trances in which spirit guides take her on multiple psychic journeys to the moon, other planets, and even the sun, all of which have cities and inhabitants. (Philippine Demuth Bäurle, *Reisen in den Mond, in mehrere Sterne und in die Sonne*, Schäzler, 1834; *Journeys into the Moon, Several Planets, and the Sun*, Vollmer and Haggenmacher, 1837; Clark IV 203–204)

1835

1835, May 11 — At the Palermo Observatory in Italy, astronomer Niccolò Cacciatore detects a starlike object in the Southern sky between the constellations Virgo and Crater moving at a slow rate that might indicate a planet beyond Uranus. It is nowhere to be seen during his next observation on May 14. ("Supposed New Planet," *American Journal of Science* 31 (1837): 158–159)

1835, August 25–31 — The *New York Sun* publishes a series of six articles on the alleged discovery by English astronomer John Herschel of plants, animals, and winged people on the lunar surface. Using a huge and powerful telescope, Herschel supposedly sees herds of bison-like quadrupeds, a spherical amphibious creature, and a bipedal beaver that lives in huts. The humans are man-bats "covered, except on the face, with short and glossy copper-colored hair, and had wings composed of a thin membrane, without hair, lying snugly upon their backs." The article is an elaborate hoax. Herschel hasn't observed life on the moon at all, nor is Herschel even aware of the story until much later. The announcement causes enormous excitement throughout America and Europe. Authorship of the article is usually attributed to Richard Adams Locke, a reporter who is working for the *Sun* at the time. Locke publicly admits to being the author in 1840, in a letter to the weekly paper *New World*, although his intent is satire, not misinformation. (Wikipedia, "Great Moon Hoax"; Richard Adams Locke, *The Moon Hoax*, Gowans, 1859; István Kornél Vida, "The 'Great Moon Hoax' of 1835," *Hungarian Journal of English and American Studies* 18 (2012): 431–441; Doug Dunlop, "The Moon Hoax of 1835: Great Astronomical Discoveries," Unbound, August 28, 2013; Doug Dunlop, "Great Moon Hoax Continues: Lunarians Discovered," Unbound, August 29, 2013; Doug Dunlop, "The Great Moon Hoax or Was It: The Joke's On Who?" Unbound, September 4, 2013; Stephanie Hall, "Belief, Legend, and the Great Moon Hoax," Library of Congress Blogs: Folklife Today, August 26, 2014)

1836

1836, January 12 — 6:30 p.m. An unusual meteor is observed in Cherbourg, Manche, France. About two-thirds the size of the full moon, it has a dark spot or cavity in its center and seems to rotate on its axis. Its apparent altitude is 1,000 feet and moves at the rate of 1,800 mph. (Robert P. Greg, "A Catalogue of Meteorites and Fireballs from A.D. 2 to A.D. 1860," *Report of the British Association for the Advancement of Science* 30 (1860): 48, 76–77; Clark III 1158; Clark IV 1334)

1838

1838 — Scottish minister and science writer Thomas Dick publishes *Celestial Scenery: The Wonders of the Planetary System Displayed*, in which he suggests that every planet in the solar system is inhabited. At his home in Broughty Ferry, Dundee, he computes that the solar system contains 21.9 trillion inhabitants, 53.5 billion of them on Venus. This is done comparing the surface area of each planet and the population density of England. (Thomas Dick, *Celestial Scenery*, Harper, 1838)

1840

1840, May 13 — Before sunrise. Some Polynesians at Felalatai on the island of Upolu, Samoa, observe a bright red star, "closely encircled by a number of other stars of the ordinary appearance." ("A Strange Phenomenon," *Journal of the Polynesian Society* 7 (1898): 49)

1845

1845, June 18 — 10:30 p.m. The British brig *Victoria*, captained by George Henry Caithness, is becalmed in the Strait of Sicily about 30 miles southwest of Licata, Sicily, Italy, when a huge wind suddenly blows from the east for two hours. Then the wind suddenly stops, and the crew feels an overpowering heat and smells a sulfuric stench. At this moment three "luminous bodies" emerge from the sea about one-half mile away and remain visible for 10 minutes. Shortly thereafter the wind picks up again. (This could be a magma plume from an undersea volcanic vent.) Around 7:10 p.m., at Ainab, Lebanon, two objects five times as large as the moon, joined by "streamers or appendages," are observed in the west and remain visible for one hour, moving slowly on an easterly course. The objects are so bright they are painful to look at. A possible outgassing event from the Madrepore subsea vent. ("Atmospherical Phenomena," London *Morning Chronicle*, August 8, 1845, p. 5; *The Athenaeum*, August 19, 1848, p. 833; James Glaisher, et al., "Report on Observations of Luminous Meteors, 1860–61," *Report of the British Association for the Advancement of Science*, 1861, pp. 30–31; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 139–152; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 2, Anomalist, 2021, pp. 115–126; Dolan, USO1, 61–63)

1845, November — American clairvoyant Andrew Jackson Davis begins writing *The Principles of Nature* while in a hypnotic trance. He describes nine planets in the solar system, which are all inhabited except the three outer ones. (Andrew Jackson Davis, *The Principles of Nature*, Colby and Rich, 1847, pp. 165–209; Clark IV 204)

1846

1846, July 5 — 5:57 a.m. Brazilian Frigate Captain Augusto Leverger is in command of two gunboats on the Río Paraguay about 19 miles away from Asunción, Paraguay, when he observes a luminous globe moving quickly to the north-northwest. It leaves a luminous trail in which three objects can be seen that are as bright as the full moon. The bottom object is shaped like a fan with "broken rays" at its rear; the middle one is nearly circular; and the top object is an irregular quadrangle. Above them is a ribbon of faint light in a zigzag pattern. The three objects gradually change shape to flat ellipses and become misty, remaining in sight for 25 minutes before fading away. The display is also seen by the Brazilian ambassador to Paraguay, José Antônio Pimenta Bueno. (*Gazeta Official do Imperio do Brasil*, vol. 1, no. 74 (November 26, 1846), p. 295; "Diario do Reconhecimento do Rio Paraguay desde a cidade da Assumpçao, Até o Rio Paraná," *Revista Trimensal do Instituto Histórico, Geographico e Ethnographico do Brasil* 25 (1862): 183–186; Antonio Huneeus, "Brazil's Very First Official UFO Report in 1846," OpenMinds, October 6, 2010)

1847

1847, March 19 — 8:30 p.m. A woman and her companion are in Highbury East, London, England, when they notice what seems to be a fire balloon ascending slowly in the west, seemingly over Hampstead. It shoots out "several fiery coruscations" and turns into an intensely radiant cloud, which moves on further west. Its light shines down on the houses below. Suddenly another bright cloud appears above the first. After 2–3 minutes, a fiery ball drops from the upper cloud to the lower one, followed by two others. Soon after this, both clouds disappear. ("Meteoric Stones," *Littell's Living Age* 56 (1858): 503)

1850

1850, September 15 — 6:20 p.m. Senior medical officer Elisha Kent Kane and other crew members of the USS *Advance*, participating in the First Grinnell Expedition to the Arctic to determine the fate of the lost Franklin Northwest Passage expedition, watch a balloon-like object over the Wellington Channel between Cornwallis and Devon islands, Nunavut, Canada. It is floating slowly northward and appears to be 2 feet long by 18 inches wide. After a short time, a small object appears below it. (Elisha Kent Kane, *The U.S. Grinnell Expedition in Search of Sir John Franklin,* Harper and Brothers, 1854, p. 190; Dolan, USO1, 63–66)

1854

1854, March 21 — 9:30 p.m. People in Washington, D.C., see a brilliant light in the sky overhead "like a coal of fire glowing," red in color and stationary. It is visible for 20–30 minutes before it fades away. ("Atmospherical Phenomenon," *Gettysburg (Pa.) Adams Sentinel,* March 27, 1854, p. 1)

1855

1855, January 22 — 10:00 p.m. A witness walking in the public square in New Haven, Connecticut, sees a brilliant red fireball in the sky near the star Gamma Draconis. At first it is stationary, but after 15 seconds it moves slowly toward the east with a slight undulatory motion. It passes below the star Eta Ursae Majoris and disappears not far from Denebola in the constellation Leo. The object is visible for 10 minutes. ("Meteoric Phenomenon," *New York Times,* January 25, 1855, p. 1)

1857

1857, June 19 or 20 — Sunset. A large cloud moves in over Carbondale, Pennsylvania, from the northwest, accompanied by considerable wind. It emits a dark-looking substance that falls to the ground, where it becomes highly luminous. It moves toward a large barn and passes through its center, setting it on fire, and continues on in a straight course for the woods, burning up the underbrush. It makes a path about 16 feet wide for a distance of 3 miles, and it finally stops against an outcrop of anthracite coal 60 feet in thickness. It leaves a sulfurous mass behind. ("Extraordinary Meteoric Phenomenon," *Baltimore (Md.) Sun,* June 27, 1857, p. 1)

1860

1860, July 13 — Night. A pale blue illumination lights up the skies of Wilmington, Delaware, as a 200-foot-long object passes overhead in a straight line at a height of 200 feet. In front of it is a black cloud, and behind it at 100-foot intervals are three fireballs, which h are joined by a fourth as the main object, giving off sparkles, turns southeastward and over the Delaware River. Then object then turns east and is lost to view. It is visible for one minute. (*Wilmington (Del.) Tribune,* July 20, 1860; Clark III 1158; Clark IV 1332)

1860, July 20 — 9:40 p.m. A poem by Brooklyn, New York, poet Walt Whitman, "Year of Meteors (1859-60)," published in a later edition of *Leaves of Grass,* describes a "strange huge meteor-procession dazzling and clear shooting over our heads." For many years, no one could identify the event. Then in 2000, Texas State University–San Marcos physicist Donald W. Olson discovered a painting by Hudson River artist Frederic Edwin Church depicting two large meteors streaming across the sky and dated July 20, 1860. An examination of contemporary newspapers revealed that this was probably Whitman's meteor procession. Around 9:40 p.m., two meteors with trails, one behind another, are seen in New York, Philadelphia, Washington, D.C., Baltimore, Norfolk, and other locations in the East, proceeding slowly from northwest to southeast for nearly one minute. They are as bright as Venus. A rare event, and little understood until 1913, a meteor procession occurs when an earth-grazing meteor breaks apart and the fragments travel across the sky in the same horizontal path. Olson and his colleagues finally publish their discovery in the July 2010 issue of *Sky & Telescope.* ("The Wonders of the Heavens: The Meteor Train," *Brooklyn (N.Y.) Evening Star,* July 21, 1860, p. 2; "The Meteor of Friday Night," *New York Herald,* July 22, 1860, p. 1; "Texas State Astronomers Solve Walt Whitman Meteor Mystery," Office of Media Relations,

Texas State University, May 28, 2010; David Dickinson, "Remembering the Great Meteor Procession of 1860," Universe Today, July 20, 2013)

1860, August 2 — 11:00 p.m. Another seeming procession of two meteors is observed in Norfolk, Virginia, moving with an undulating motion in the western sky in a northerly direction. One of the lights is clear red and the other is greenish, and they both emit flashes of light, leaving a sparkling trail. The phenomenon is also seen in Pittsburgh, Pennsylvania. Some unnamed contemporary scientists compare it to the July 20 meteor procession. ("Another Splendid Meteor," *Baltimore (Md.) Sun*, August 6, 1860, p. 1)

1862

1862 — French astronomer Camille Flammarion publishes *La pluralité des mondes habités*, in which he proposes that many worlds in the universe are inhabited. It is a huge success, going through 33 editions in its first 20 years. Flammarion is one of the first to put forward the idea that extraterrestrial beings are genuinely alien and not simply variations of earthly creatures. (Camille Flammarion, *La pluralité des mondes habités*, Mallet-Bachelier, 1862)

1862, September — The Danish brig *Christine* is allegedly wrecked on a deserted island in the Indian Ocean. The survivors see an immense airship that crashes into a cliff. The sailors make their way to the airship, which contains strange implements, boxes covered with odd inscriptions, large tools, and the bodies of a dozen dark-bronze men, 12 feet tall and "dressed in garments of strange fashion." The sailors build a raft out of the wreck and make their way back to civilization. (John Leander, "Airship of the Past," *Houston (Tex.) Post*, May 2, 1897, p. 4; Clark III 313–314; Clark IV 387–388)

1862, November — Early morning. Magistrate Osman Edward Middleton hears a "peculiar rushing noise" at Morpeth, New South Wales, Australia, and looks up to see a dark object traveling rapidly toward the southeast. It appears to be revolving on its axis. ([Letter], *Sydney (N.S.W.) Morning Herald*, November 20, 1866, p. 5; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 167–173)

1864

1864, June 17 — The French newspaper *Le Pays* reports on the discovery of artifacts and a mummified body inside a meteorite found while digging for oil on James Peak, Colorado. The mummy is barely 3 feet long, hairless, wrinkled, and a trunk protrudes from its forehead. A small metal disk engraved with a rhinoceros, a palm tree, and the solar system (with Mars oddly oversized) accompanies the body, leading to speculation that the mummy had traveled from Mars in the meteorite. However, the story is fiction concocted by engineer and science writer Henri de Parville, who reveals the fabrication in a book the following year. The story resurfaces in various forms in 1877 and 1878. ("Un habitant de le planète Mars," *Le Pays*, June 17, 1864; "Un canard scientifique de haut vol: L'habitant de Mars," *L'année scientifique et industrielle* 9 (1865): 33–37; Henri de Parville, *Un habitant de la planète Mars*, J. Hetzel, 1865; Clark III 312; Chris Aubeck, *Alien Artifacts, Volume 1: From Antiquity to 1880*, The Author, 2022, pp. 182–187, 335–341; Clark IV 387, 1259–1260)

1864, July 16 — Night. A sailor named Timofeev is aboard the Russian Navy clipper *Vestnik* in the South China Sea near the Gulf of Thailand when he notices two large luminous wheels in the water consisting of 10–12 curved rays rotating in different directions. The wheels are making a full revolution every 6 seconds and they appear to be as large as 1,500 feet in diameter. (Vladimir G. Azhazha and Evgeny P. Litvinov, Подводные НЛО: Загадочные места мира [*Underwater UFOs*], 2015; Dolan, USO1, 66–67)

1865

1865 — French novelist Jules Verne publishes *From the Earth to the Moon.* It tells the story of the Baltimore Gun Club, a post–American Civil War society of weapons enthusiasts, and their attempts to build an enormous Columbiad

space gun and launch three people—the Gun Club's president, his Philadelphian armor-making rival, and a French poet—in a projectile with the goal of a lunar landing. (Wikipedia, "*From the Earth to the Moon*")

1865, December — The British Board of Trade asks Trinity House to investigate the "false lights" of the Durham, England, coast, mysterious revolving lights seen above a rocky headland at Whitburn by mariners negotiating a hazardous stretch of the northeast coast. Between 1860 and 1870, more than 150 ships are wrecked on the rocks near Whitburn after following a light or lights in the sky that they wrongly believe are from a lighthouse at the mouth of the Tyne. A commission led by Rear Admiral Richard Collinson meets in Sunderland on December 28 to interview witnesses and determine whether salvagers are responsible for the lights that are causing shipwrecks. Although the commission decides that the false lights are not deliberately lit, they are puzzled about the true cause. The lights and wrecks continue until January 1871 when the Souter Lighthouse is erected on Lizard Point. ("False Lights on the Durham Coast," *Newcastle Weekly Courant*, January 12, 1866, p. 5; David Clarke, "Britain's First X-File?" August 14, 2010; David Clarke, "The False Lights of Durham," *Fortean Times* 266 (October 2010): 40–42; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 77–79)

1866

1866, June 21 — The US Hydrographic Office is established by Congress. It is assigned to the Navy Bureau of Navigation and collects reports from ships' officers on observations of various marine phenomena, hazards, and other activities. Among the reports collected are meteors, ball lightning, and other celestial and meteorological phenomena. (Wikipedia, "United States Hydrographic Office")

1867

1867, November 4 — 3:00–4:00 p.m. James E. Beveridge is passing the mill by the Waterworks Reservoir in Chatham, England, when he and the miller see numerous black discs moving in the air to the west, some in groups, others scattered. They are visible for more than 20 minutes. In passing in front of the sun they appear like large cannon shot. Several groups pass over his head, disappearing suddenly, and leaving puffs of grayish brown smoke. ("Three Strange Stories," *Symons's Monthly Meteorological Magazine* 2 (1867): 130)

1868

1868, June 8 — 9:50 p.m. John Lucas Sr., an observer at Radcliffe Observatory, Oxford University, England, notices a comet-like object with a trail a bit west of the star Polaris. As he is pointing it out to some others, it begins moving west. It moves in a straight line at first, then moves south for a bit, then continues to the north. They watch it for 4 minutes until it disappears below the northwestern horizon. ("Remarkable Meteor," *English Mechanic* 7 (July 10, 1868): 351)

1868, July 25 — Engineer Frederick William Birmingham of Parramatta, New South Wales, watches a bizarre procession of the faces of two prominent Australians (Archbishop of Sydney Frederic Barker and New South Wales Premier James Martin) through the air as well as a vessel he calls an "ark." He hears a voice suggesting that "That's a machine to go through the air." The voice comes from a "spirit" whom he describes as "like a neutral tint shade and the shape of a man in his usual frock dress." After the ark maneuvers for a while in the air, the spirit says, "Have you a desire or do you wish to enter upon it?" He is then lifted up and carried through the air into the object about 60 feet away. The spirit guides him into the "pilot house" of the machine where he is given some papers with formulas on them that will help him construct a flying machine. He observes another UFO-like craft on March 9, 1873, and later attempts to build a mechanical replica of what he has seen. (Bill Chalker, "The Mystery of a Machine to Go through the Air: A UFO Vision?" 1998; Clark III 60–65; "Did Frederick William Birmingham Build a Flying Machine Based on His Bizarre 1868 UFO 'Vision' in Parramatta, NSW, Australia?" TheOzFiles, November 30, 2013; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 185–190; Michael Organ, "UFO Encounter, Parramatta Park, Australia 1868," Rambling Thoughts of an Overactive Mind, November 12, 2023; Bill Chalker, "The 1868 'UFO Vision' of

Frederick William Birmingham—Important New Evidence—'To London in Four Days!'" TheOzFiles, December 12, 2023; Bill Chalker, "The Birmingham 'UFO Vision' Manuscript via Herbert Rumsey Has Been Found and Viewed," TheOzFiles, August 19, 2024; Clark IV 84–89)

1869

1869 — French poet and inventor Charles Cros is convinced that pinpoints of light observed on Mars and Venus are the lights of large cities on those planets. He spends years petitioning the French government to build a giant mirror to communicate with the Martians and Venusians by burning giant lines on the deserts of those planets. (Alissa Walker, "A French Inventor Once Proposed a Giant Mirror to Burn a Message on Mars," Gizmodo, October 16, 2014)

1869, August 7 — 12:00 noon. Four or five witnesses watch a luminous object land in a vacant lot about 200 yards north of the village of Adamstown, Pennsylvania. It is originally square-shaped but shoots up into a column about 3–4 feet high and 2 feet thick. The object glitters like a "column of burnished silver." It gradually fades away and disappears after 10 minutes. No unusual traces are found on the lot. ("Singular Phenomenon," *Lancaster (Pa.) Daily Evening Express,* August 10, 1869, pp. 2–3)

1869, August 7 — About 4:45 p.m. During a total solar eclipse, four amateur observers in St. Paul Junction [now Le Mars], Iowa, both with and without instruments, independently notice a bright object below the lunar disc and just outside the solar corona. There are no visible stars in that position in the sky. ("Was It the Intra-Mercurial Planet?" *Astronomical Register* 7 (1869): 227–228; John Russell Hind, "Stellar Objects Seen during the Eclipse of 1869," *Nature* 18 (1878): 663–664)

1870

1870, March 22 — 6:30 p.m. Capt. Frederick William Banner, master of the barque *Lady of the Lake,* is sailing in the North Atlantic 400 miles north of the Equator and 860 miles from the coast of West Africa when he sees a "curious-shaped" light-gray cloud in the south-southeast. It is circular, with four rays or arms extending from the center to the edge, and a curved tail. It is visible for about 50 minutes until it is too dark to see. (Frederick William Banner, "Extract from Log of Barque 'Lady of the Lake,'" *Quarterly Journal of the Royal Meteorological Society* 1 (1873): 157; Clark III 1158; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 1, Anomalist, 2019, pp. 89–109; Clark IV 1332; Dolan, USO1, 67–68)

1870, September 26 — A luminous object with a tail is seen in the constellation Lyra by Reginald Brabazon, 12th Earl of Meath, second secretary of the British legation to the North German Confederation, in Berlin, Germany. Possibly a light pillar reflection caused by a bright arc-light source at a military installation on Eiswerder island. (Brabazon, "A Meteor," London *Times,* September 30, 1870, p. 9; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 1, Anomalist, 2019, pp. 111–116)

1871

1871 — English astronomer Richard A. Proctor writes *Other Worlds Than Ours,* in which he discusses the question of the plurality of worlds in the light of new facts. He suspects that Venus is likely the "abode of living creatures not unlike the inhabitants of earth." (Richard A. Proctor, *Other Worlds Than Ours*, Appleton, 1871)

1871, August 1 — 10:43 p.m. Astronomer Jérôme Eugène Coggia at Marseille Observatory, France, watches a slow, blood-red fireball move across the sky and change course twice before falling to the earth. He sees it for 20 minutes and 20 seconds. Possible earth-grazing meteor or a candle balloon. (Jérome Eugène Coggia, "Observation d'un bolide, faite à Observatoire de Marseille le 1er août," *Comptes rendus hebdomadaires des séances de l'Académie des Sciences* 73 (1871): 397–399; Clark III 1158; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 1, Anomalist, 2019, pp. 117–119; Clark IV 1332)

1871, August 29 — Around 12:00 noon. French astronomer Étienne Léopold Trouvelot is observing the Sun through a 4-inch telescope at the Meudon Observatory outside of Paris, France, when he sees several hundred black objects

passing across the solar disk. They move irregularly, some slowly, others faster. The bodies appear in tightly knit groups that mostly move east to west, though some are moving in different directions. Most of the objects are circular, though some are triangular and others are of indefinite shape. One of them seems to fall vertically, oscillating from side to side. ("Passage d'un essaim de corpuscles noirs devant le Soleil," *L'Année scientifique et industrielle* 29 (1886): 8–10)

1873

1873 — English-American geologist and psychometrist William Denton of Wellesley, Massachusetts, publishes volume 3 of *The Soul of Things*, in which he describes his astral visit to Mars along with his sister Anna Cridge, his wife Elizabeth, and his son Sherman. He finds it harbors a thriving civilization with a technology based on aluminum. He reports that they soar above traffic on their individual fly-cycles and seem particularly fond of air travel, with as many as 30 Martians occupying some of the large flying conveyances. Sherman says the Martians have blond hair and blue eyes like cats' eyes; Anna adds that they have long arms and large hands and feet, and there is another group of short, hairy, black people. (William Denton, *Soul of Things*, Wellesley, Mass.: Elizabeth M. F. Denton, 1873, vol. 3, pp. 171–267; Chris Aubeck, *Alien Artifacts, Volume 1: From Antiquity to 1880*, The author, 2022, pp. 238–248; Clark IV 205)

1873, Late March — Evening. Thomas Inman and his son are traveling home from the village of Taylorsville [now Philo], Ohio, and are possibly in Bristol Township when they see a bright light descending swiftly with a roaring noise. It lands a short distance in the road [probably Lawrence Road] ahead of them, flickers and flares, then fades. A man dressed in a suit of black carrying a lantern emerges from the object. He walks a few paces and steps into a buggy, which Inman has not noticed before. The buggy begins to move silently and quickly, even though there is no horse attached to it, until it reaches a deep gully, into which it plunges and disappears. Historian William Alexander Taylor, who supplies the story to the *New York Herald*, vouches for the witnesses. ("Very Like a Whale," *New York Herald*, April 8, 1873, p. 7; Clark III 1123–1124; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 175–191; Clark IV 1252–1253)

1874

1874 — Baroness Adelma Vay, a spirit medium in Hungary, publishes a book about her conversations with the spirit of Alexander von Humboldt, who has traveled to the moon, Mercury, and Mars, the latter populated by hairy dwarves with brains the size of a hazelnut. (Adelma Vay, *Studien über die Geisterwelt*, Mutze, 1874; Clark IV 205)

1874, April 24 — 3:30 p.m. Chemist and astronomer Vojtěch Šafařík of Prague [now in the Czech Republic] sees "an object of so peculiar a character that I do not know what to make of it." It is a dazzling white object slowly crossing the moon. He first sees it in front of the moon, then watches it against the "deep blue sky like Sirius or Vega in daylight." (Vojtěch Šafařík, "Telescopic Meteors," *Astronomical Register* 23 (1885): 205–211)

1874, August 13 —11:00 p.m. A large, "luminous electric cloud" flies over the western edge of Pascagoula, Mississippi, from the northwest to the southeast. It illuminates the ground and emits heat so intense that some witnesses think their houses are about to ignite. When last seen over the Gulf of Mexico, it renders the spars and rigging of a ship "distinctly visible." ("Singular Phenomenon," *Pascagoula (Miss.) Star*, August 22, 1874, p. 2; "Singular Phenomenon," *Vicksburg (Miss.) Herald*, August 26, 1874, p. 1; Clark III 1158; Clark IV 1332)

1875

1875, mid-February — Observers in Pwllheli, Wales, see eight lights moving over a distance of 8 miles along the coast. They move in different directions, horizontally, vertically, and in a zig-zag fashion. Sometimes they are light blue, at other times a bright white, then they disappear abruptly before reappearing dimly. (A. R., "Strange Lights in Wales," *Notes and Queries*, ser. 5, 3 (April 17, 1875): 306)

1875, April — Night. The gunboat HMS *Bulldog* is lying becalmed in the Gulf of Mexico north of Veracruz, Mexico. Naval surgeon Edward Lawton Moss sees a line of light along the northern horizon. It sweeps past the ship in a "series of swift luminous pulsations." (Edward L. Moss, "Report of an Unusual Phenomenon Observed at Sea," *Nature* 20 (1879): 428; Dolan, USO1, 69)

1876

1876 — William Baker Fahnestock, a physician, hypnotist, and spiritualist of Lancaster County, Pennsylvania, publishes *Worlds Within Worlds*, an illustrated volume that describes the inhabitants of other planets and the sun, based on the clairvoyant experiences of his patients. (William Baker Fahnestock, *Worlds Within Worlds: Or, New and Wonderful Discoveries in Astronomy*, Barclay, 1876; Clark IV 205)

1876, December 21 — 8:30–8:45 p.m. A bright bolide that explodes and breaks up into a group of 20–100 smaller balls is seen over a wide swath of the US from Topeka, Kansas, to western Pennsylvania. Over Columbus, Ohio, it is described as "a cluster or flock of meteors seemingly huddled together, like a flock of wild geese, and moving with the same velocity and grace of regularity. The color of their light was a yellowish red, like red rocket-balls." A stony chondrite falls 3 miles northwest of Rochester, Indiana, at the same time. (James Glaisher, et al., "Report on Observations of Luminous Meteors during the Year 1876–77," *Report of the British Association for the Advancement of Science* 47 (1877): 98, 149–152; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 144–145)

1877

1877, October — Astronomer Giovanni Schiaparelli reports seeing *canali* on the Martian surface from Brera Observatory in Milan, Italy, during the Great Opposition. While the term "canals" indicates an artificial construction, its proper translation as "channels" implies that the observed features are natural configurations of the planetary surface. From the incorrect translation into the term "canals," various assumptions are made about life on Mars; as these assumptions are popularized, the canals become famous, giving rise to waves of hypotheses, speculation, and fiction about the possibility of intelligent life on Mars—the Martians. Later, thanks to the observations of the Italian astronomer Vincenzo Cerulli, scientists come to the conclusion that the famous channels are actually mere optical illusions. (Wikipedia, "Martian canals")

1878

1878, January 22 — John Martin is out hunting near his ranch 6 miles north of Dallas, Texas, when he notices a dark object high in the southern sky. It is so bright it hurts his eyes as it moves with great speed to directly over his head. The object is "about the size of a large saucer" and looks like a large balloon. It speeds away rapidly. ("A Strange Phenomena," *Dallas (Tex.) Daily Herald*, January 23, 1878, p. 4; Patrick Gross, "The First Publicized Flying 'Saucer' Report?"; "Dallas 1878," Texas UFO Museum and Research Library, February 5, 2014; Clark III 375, 1158; Clark IV 419, 1332)

1878, July 29 — About 12:30 p.m. Astronomers James Craig Watson, director of the Ann Arbor (Mich.) Observatory, and Lewis Swift, an amateur from Rochester, New York, both claim to see planet-like objects close to the Sun during the total solar eclipse. Watson, observing from Separation Point, Wyoming, places the "ruddy star" about 2.5° southwest of the Sun and estimates its magnitude at 4.5. Watson says it has a definite disc, unlike stars, which appear as shimmering pinpoints of light. He also noes another object further to the west. Swift, observing from a location near Denver, Colorado, also sees what he takes to be an intra-mercurial planet ("a round red disk and being free from twinkling") about 3° southwest of the Sun. He estimates its brightness to be the same as that of Theta Cancri, a fifth-magnitude star which is also visible during totality, about six or seven minutes from the object. Swift also notes a second equally bright object. Both Watson and Swift describe at least one of their objects as red in color. The idea that four objects are observed during the eclipse generates controversy in scientific journals and mockery from German-American astronomer Christian Heinrich Friedrich Peters. Peters considers Swift's measurements as ambiguous and notes that the margin of error in the pencil-and-cardboard

recording device Watson had used was large enough to plausibly include a bright known star. (James C. Watson, "On the Discovery of an Intra-Mercurial Planet," *American Journal of Science*, ser. 3, 16 (1878): 230–233; James C. Watson, "On the Intra Mercurial Planets," *American Journal of Science*, ser. 3, 16 (1878): 310–313; Lewis Swift, "Letter from Mr. Lewis Swift, Relating to the Discovery of Intra-Mercurial Planets," *American Journal of Science*, ser. 3, 16 (1878): 313–315; C. H. F. Peters, "Some Critical Remarks on So-Called Intra-Mercurial Planet Observations," *Astronomische Nachrichten* 94 (1879): 321–340; Richard Baum and William Sheehan, *In Search of Planet Vulcan: The Ghost in Newton's Clockwork Universe*, Plenum, 1997, pp. 185–223)

1879

1879, April 12 — 8:30 p.m. Amateur astronomer Henry Harrison in Jersey City, New Jersey, is searching for Brorsen's Comet (5D/Brorsen) when he observes a "planetary nebula" between the Pleiades and the variable star Algol in Perseus. It is moving from northwest to southeast, maintaining its luminosity. He watches it for 3.5 hours, then takes a nap, but finds it again at 2:10 a.m. in the zenith, brighter than before. At 11:00 p.m., J. Spencer Devoe in Manhattanville, New York City, observes a bell-shaped object about 10° west of the zenith moving to the east, in a different direction than the motion of the stars. He watches it for a period of more than 6 hours. (Henry Harrison, "A Curious Phenomenon," *New York Tribune*, April 17, 1879, p. 2; J. Spencer Devoe, "Was It a Nebula?" *New York Tribune*, April 26, 1879, p. 2)

1879, May 15 — 9:40 p.m. The gunboat HMS *Vulture* is in the Persian Gulf about 25 miles south of the island of Levan, Iran, when the crew notices "luminous waves or pulsations" in the water that pass swiftly under the ship from the south-southwest. The appearance is like two revolving wheels of light, one to the east and another to the west that is moving in the opposite direction. The effect persists for 35 minutes. Commander John Eliot Pringle estimates that the shafts of light are about 25 feet wide. (J. Eliot Pringle, "Report of an Unusual Phenomenon Observed at Sea," *Nature* 20 (1879): 291; Dolan, USO1, 70–71)

1880

1880, March 22 — About 6:00 a.m. A large number of brilliantly luminous bodies are seen to rise from the horizon and pass from east to west at Kattenau, East Prussia [now Furmanovka, Kaliningrad Oblast, Russia]. They move through space "like a string of beads." Possible meteor procession. ("A Remarkable Phenomenon," *Nature* 22 (May 20, 1880): 64; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 169–170)

1880, March 26 — Night. The train depot operator and a few friends are walking at Galisteo Junction [now Lamy], New Mexico, when they hear loud voices and laughter coming from a "large balloon" shaped like a fish approaching from the west. A flower is dropped from the car of the balloon to which is attached a slip of silk-like paper on which Chinese characters are written. The next morning, searchers find a cup of peculiar workmanship, but both artifacts are purchased by a "wealthy young Chinaman" and a "collector of curiosities" who visits town on March 28, although this part of the tale seems facetious and racist. The yarn is typical of sensational newspaper hoaxes that have no basis in reality. ("Galisteo's Apparition," *Santa Fe Weekly New Mexican*, March 29, 1880, p. 3; "Solved at Last," *Santa Fe Weekly New Mexican*, April 5, 1880, p. 4; Patrick Gross, URECAT, December 3, 2007; Clark III 69–70, 592; Clark IV 93–94, 652)

1880, May — 11:30 p.m. The British India Steam Navigation Company steamer SS *Patna* is in the Persian Gulf when two enormous wheels of light with spokes 600–900 feet long appear on each side of the ship. Each wheel contains 16 spokes and makes a revolution in about 12 seconds. The phosphorescent phenomenon is observed by Captain Avern, Third Officer Manning, and J. W. Robertson. (Lee Fore Brace [J. W. Robertson], "Strange Phenomenon," *Knowledge* 4 (1883): 396; A. McD., "Strange Phenomenon," *Knowledge* 5 (1884): 30; J. W. Robertson, "Strange Phenomenon," *Knowledge* 5 (1884): 60; Dolan, USO1, 72–73)

1880, June? — David Muckle and W. R. McKay of East Kent [now Chatham-Kent], Ontario, are in a field on Muckle's farm when they hear a loud explosion and see a cloud of stones flying upward. They go to the spot and find a circular area, 16 feet across, that has been swept clean of vegetation. ("A Curious Phenomenon," *Rock Hill (S.C.) Herald*, July 7, 1880, p. 4)

1880, June 5 — 10:00 p.m. Commander R. E. Harris of the Asiatic Steam Navigation Company's steamship *Shahjehan* encounters waves of light from a rotating wheel on the surface of the Arabian Sea off the southwest coast of India. The phenomenon lasts for one hour before fading out. ("A Strange Phenomenon," *Nature* 21 (1880): 409–410; Dolan, USO1, 73–74)

1880, Early July — A train is running on the Chattanooga Railroad near Murfreesboro, Tennessee, in a thunderstorm when the engineer sees a large ball of fire rushing down the rails to the engine. As it passes under the locomotive, he feels a shock that jars the entire train. There is a loud explosion "opposite the ladies' car" and a telegraph pole is splintered from top to bottom. ("Passengers Shocked by Lightning," *Memphis (Tenn.) Public Ledger*, July 15, 1880, p. 2; Mark Rodeghier, "UFO/Vehicle Very Close Encounters," *IUR* 27, no. 1 (Spring 2002): 5)

1880, July 28 — 6:00–7:00 p.m. C. A. Youngman and Ben Flexner are looking out a drugstore window at 2nd and Chestnut streets in Louisville, Kentucky, when they see something in the air coming from the direction of the Ohio River bridge. As it approaches them, it appears to be a man surrounded by machinery, which he is working with his hands and feet. The object is too high to make out the details of its construction. The man moves off to the south, pedaling constantly. Around 8:00 p.m., the Royster family of Madisonville, Kentucky, watches a circular flying object with a ball at each end moving above the train depot. ("More Monkeying," *Louisville (Ky.) Courier-Journal*, July 29, 1880, p. 4; "The Flying Machine," *Louisville (Ky.) Courier-Journal*, August 6, 1880, p. 4; Theo Paijmans, "The Topography of the Damned," *The Anomalist*, no. 14 (2010): 7–8; Clark III 70; Clark IV 94)

1880, August 25 — Day. During a thunderstorm in Paris, French botanist Auguste Trécul sees a luminous, yellowish-white, cigar-shaped object emerge from a dark cloud. It drops some material that leaves behind a vertical luminous trail and splits into two without any sound. The object re-enters the cloud. (Auguste Trécul, "Électricité atmospherique: Cas remarquable de tonnerre en boule; éclairs diffus voisons de la surface du sol," *Comptes rendus hebdomadaires des séances de l'Académie des Sciences* 92 (1881): 775–777; Auguste Trécul, "Rappel de l'observation d'une matière incandescente, en fusion, tombée d'un nuage orageux," *Comptes rendus hebdomadaires des séances de l'Académie des Sciences* 103 (1886): 848–850; Camille Flammarion, *Thunder and Lightning*, Chatto and Windus, 1905, p. 87; Clark III 1163; Clark IV 1337)

1880, September 23 —David Lang of Gallatin, Tennessee, is said to disappear in full view of five witnesses and vanish without a trace. However, no such family lived in the area at the time, and the narrative bears some resemblance to a short horror story written by Ambrose Bierce titled "The Difficulty of Crossing a Field" in 1888. (Ambrose Bierce, "Whither?" *San Francisco (Calif.) Examiner*, October 14, 1888, p. 9; Ambrose Bierce, "The Difficulty of Crossing a Field," in *The Collected Works of Ambrose Bierce*, Neale, 1912, vol. 3, pp. 415–418; Stuart Palmer, "How Lost Was My Father?" *Fate* 8, no. 7 (July 1953): 75–85; Morris K. Jessup, *The Case for the UFO*, Citadel, 1955, pp. 143–144; Frank Edwards, *Stranger Than Science*, Lyle Stuart, 1959, pp. 15–17; "Fortean Corrigenda," *Fortean Times* 8 (October 1976): 6–7; Robert Schadewald, "David Lang Vanishes…Forever," *Fate* 30, no. 12 (December 1977): 54–60; Clark III 598; Clark IV 657)

1880, September 30 —9:45 p.m. A brilliant object is seen crossing the sky in Columbus, Georgia, at a very low altitude. Coming from the south, it heads northeasterly in a horizontal line. It appears made of three perfectly developed balls of an equal size and equidistant from each other. The first ball emits a tail that envelops the two following and extends behind them. The tail is luminous except at the far end, where it is indistinct and nebulous. It is visible for a full 50 seconds and continues on its course without falling. ("Wonders of a Meteor," *Marion (Ohio) Star*, October 5, 1880, p. 3)

1881

1881, Late October — An unusual fall of spider web occurs near the coast of Lake Michigan at Milwaukee, Green Bay, Fort Howard, Sheboygan, and Ozaukee County, Wisconsin. The webs seem to come from "over the lake" and fall from a great height. The strands are from 2 feet to several yards long, strong in texture, and very white. No spiders are seen. ("A Rain of Spider Webs," *Scientific American* 45 (1881): 337;Clark III 123; Clark IV 151)

1882

1882, July 6 — 10:30 p.m. Amateur astronomer N. S. Drayton in Jersey City Heights, New Jersey, watches a red object without a trail move across the sky from the constellation of Ursa Minor to Capricorn in 45 seconds. (N. S. Drayton, "A Supposed Meteor," *Scientific American* 47 (July 22, 1882): 53)

1882, November 17 — 6:00 p.m. An auroral beam is observed from the Royal Observatory, Greenwich, London, by astronomer Edward Walter Maunder and by John Rand Capron from his private observatory on Hog's Back, Surrey, England, in association with a geomagnetic storm. The beam is described in detail in various ways, including as a "beam," "spindle," "definite body" with a Zeppelin-like shape and pale green color, passing from horizon to horizon above the moon. The phenomenon transits the sky in approximately 75 seconds. (Wikipedia, "November 1882 geomagnetic storm"; J. Rand Capron, "The Auroral Beam of November 17, 1882," *Philosophical Magazine*, ser. 5, 15 (1883): 318–339; Edward Walter Maunder, "A Strange Celestial Visitor," *The Observatory* 39 (May 1916): 213–215; Paul Fuller, "The Life and Times of John Rand Capron (1829–1888)," *The Antiquarian Astronomer* 8 (March 2014): 21–45)

1883

1883, February 5 — 6:45 p.m. A witness at Lake Glasfjorden, near Arvika, Sweden, spots a meteor-like object high on the horizon moving from southeast to northwest. It makes several minor course changes, varies its color from white to yellow, and emits some sparks. After 18 seconds, it changes its course to the southeast and is so low to the ground that its light is reflected in the lake. By this time, it has a distinct tail. Total duration is 50 seconds. ("On February 5, at 6.45 p.m.," *Nature* 27 (March 1, 1883): 423)

1883, August 12–13 — Astronomer José Árbol y Bonilla, director of the El Cerro de la Bufa Meteorological Observatory in Zacatecas, Mexico, is observing the sun by eyepiece projection when he and an assistant see a large number of small bodies crossing the solar disc. Over the course of two days, they count a total of 447 dark objects. They seem bright as they approach the sun but are dark as they pass across its face. He takes several photographs and suspects that they are relatively near the earth. Mexican astronomers in 2011 suggested that a comet may have split into several pieces; these objects were estimated to have had a size of between 150 and 3,350 feet, and to have passed only 334 to 5,000 miles from the Earth; they thought a fragmented Comet 12P/Pons-Brooks was one possibility, in which case Earth barely avoided multiple Tunguska events or even a mass extinction; this was reported in the media and disputed in October 2011; but the source of these objects could also have been comet C/1883 D1 (Brooks-Swift) or even a third, unknown comet that year; the event also coincided with the annual Perseid meteor shower; even migrating birds cannot be ruled out. (José Á. y Bonilla, "Passage sur le disque solaire d'un essaim de corpuscles," *L'Astronomie* 4 (1885): 347–350; Hector Javier Durand Manterola, Maria de la Paz Ramos Lara, and Guadalupe Cordero, "Interpretation of the Observations Made in 1883 in Zacatecas (Mexico): A Fragmented Comet That Nearly Hits the Earth," *Earth and Planetary Astrophysics* (2011); "Billion-Ton Comet May Have Missed Earth by a Few Hundred Kilometers in 1883," MIT Technology Review, October 17, 2011; "OT-1883 Zacatecas Observation of Objects before Sun Were Not 12P/Pons-Brooks Fragments," October 17, 2011; Phil Plait, "Did a Fragmenting Comet nearly Hit the Earth in 1883? Color Me Very Skeptical," Bad Astronomy, October 17, 2011; "Did a Massive Comet Almost Wipe Out Humans in 1883?" The Week, January 8, 2015; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 189–207)

1884

1884, June 6 — 1:00 p.m. Rancher John W. Ellis and some of his ranch hands in south-central Dundy County, Nebraska, allegedly see a blazing object fall from the sky and crash into many pieces, burning the grass and fusing the sand. The light is so intense it blinds one of them. The newspaper suggests it is a "vessel belonging originally to some other planet." The remains of the object are said to have dissolved in a rainstorm. However, the tale is actually a fictional story written by a correspondent in Benkelman. (Wikipedia, "Dundy County UFO Hoax"; "A Celestial Visitor," *Lincoln (Nebr.) Daily State Journal*, June 8, 1884, p. 5; "The Magical Meteor," *Lincoln (Nebr.) Daily State Journal*, June 10, 1884, p. 4; Jerome Clark, "Spaceship and Saltshaker," *IUR* 11, no. 6 (Nov./Dec. 1986): 12, 21; Patricia C. Gaster, "'A Celestial Visitor' Revisited: A Nebraska Newspaper Hoax from 1884," *Nebraska History* 94 (2013): 90–99; Clark III 314–315, 593; Clark IV 388–389, 653)

1884, July 3 — 8:30 p.m. L. C. Yale of Norwood, New York, watches an object with a long tail move slowly from east to west. It has a "nucleus like a globe, as large as the moon, surrounded by a bright ring, two dark lines crossing the nucleus in vertical direction, the lines larger in the middle, straight on inside, curved on outside, tapering both ways to points." The general appearance is of a "gigantic sword of fire, moving handle first." ("A Great Meteor," *Illustrated Science Monthly* 2 (1884): 136)

1885

1885, February 16 — Night. During a severe snowstorm, a bright light suddenly flashes in the high rocks on the Pennsylvania side of the Delaware River some five miles northwest of Port Jervis, New York. The snow-covered hill glows like red-hot iron for several feet around, gleaming through the storm for several minutes, then growing dim and disappearing. ("Mysterious Light," *Wichita (Kan.) Beacon*, March 25, 1885, p. 1)

1885, February 24 or 25 — 5:00 a.m. Sailing in the North Pacific some 800 miles west of Victoria, British Columbia, Captain John Waters of the bark *Innerwick* and his mate see the sky turning fiery red. Suddenly a large fireball appears above the ship and falls hissing into the sea about 150 feet away from them, causing a wave of water to impact the ship. Electrical discharges run through the rigging and the masts. ("Frightful Experience at Sea," *Sacramento (Calif.) Record-Union*, March 3, 1885, p. 1; "Globe Lightning: An Extraordinary Electrical Phenomenon at Sea," *Buffalo (N.Y.) Commercial*, March 13, 1885, p. 2; "Notes and News," *Science* 5 (1885): 242–243; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 2, Anomalist, 2021, pp. 177–199)

1886

1886 — French novelist Jules Verne publishes *Robur the Conqueror,* which describes the appearance of mysterious objects and strange lights in the sky all over the world. It turns out that the sightings are of a flying machine, invented by the novel's anti-hero Robur, who kidnaps people and takes them on board the airship. (Wikipedia, "*Robur the Conqueror*")

1886, October 24 — Night. Nine persons who are sleeping in a hut some 10 miles from Maracaibo, Venezuela, are awakened by a loud humming noise and a dazzling light that illuminates the interior. The people begin to pray but they start vomiting as extensive swellings appear on the upper part of their bodies, especially around the face and lips. They feel no heat, although the light has a smoky appearance and a peculiar smell. The next morning, the swellings subside but leave black blotches. By November 2, the skin peels off and the blotches are round sores. Portions of their hair falls off. Trees around the hut show no damage until November 2, when they suddenly wither. The symptoms are similar to those of ionizing radiation syndrome. (Warner Cowgill, "Curious Phenomenon in Venezuela," letter, *Scientific American* 55 (December 18, 1886): 389; Clark III 949; Clark IV 1063; Patrick Gross, UFO Reports from the Past)

1886, November 3 — Between 8:00 and 9:00 p.m. A bright white cloud appears above Hamar, Norway, flashing rays of light in various directions. Retaining the same shape, it drifts to the northeast and is lost to sight. ("Between 8 and 9 o'clock," *Nature* 35 (December 16, 1886): 159; Clark III 1158 Clark IV 1332)

1887

1887, March 19 — 5:00 p.m. Captain Cornelis Dirks Swart of the Dutch bark *J.P.A.* sees a "meteor in the shape of two balls" during a storm in the North Atlantic about 590 miles northeast of Bermuda. One ball is black and the other is luminous and oblong. The luminous object descends with a roar and lights up the ship and surrounding water. The crew feels heat from the object even as solid lumps of ice fall on the deck and the rigging becomes iced. The side of the ship where it falls turns partially black and the copper plating is blistered. The wind increases to "hurricane force." ("Sea Captain's Large Story," *Boston (Mass.) Daily Globe*, May 8, 1887, p. 1; "Meteors at Sea," *Decatur (Ill.) Daily Republican*, May 9, 1887, p. 2; "Quite a Notable Story," *Boston (Mass.) Weekly Globe*, May 11, 1887, p. 1; "Rare Electrical Phenomenon at Sea," *American Meteorological Journal* 4 (July 1887): 98–

99; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History,* Anomalist, 2015, pp. 205–217; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 2, Anomalist, 2021, pp. 201–210)

1887, October 24 — Sunset. A man in Fine, New York, is looking to the east when he sees a group of sparkling silver balls "tumbling and rushing through the air going towards the east" and finally disappearing in the clouds. The display is visible for about 4 minutes and is seen by others in town. ("Fine," *Gouverneur (N.Y.) Free Press,* December 7, 1887, p. 3; Jerome Clark, *Hidden Realms, Lost Civilizations, and Beings from Other Worlds,* Visible Ink, 2010, p. 262)

1887, November 12 — Midnight. Captain R. F. Moore of the English steamer *SS Siberian,* sailing 10 nautical miles off Cape Race, Newfoundland, watches an enormous fireball rising from the sea to the height of 15 feet. It travels against the strong wind and comes close to the ship, then turns to the southeast and disappears. The object is seen for nearly 5 minutes. Moore says he has seen this phenomenon before and considers it a sign of stormy weather. ("Globular Lightning," *Science* 10 (1887): 324; Thomas Corwin Mendenhall, "On Globular Lightning," *American Meteorological Journal* 6 (February 1890): 437, 442–443; Theo Paijmans, "Fiery Objects Rising from the Oceans," Charles Fort Institute Blogs, July 6, 2007; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 2, Anomalist, 2021, pp. 151–174; Dolan, USO1, 74–75)

1887, November 18 — 7:00 p.m. The crew of the British steamer *Flamborough* is off the coast of New Jersey when they see a brilliant object that leaves a bright trail. As it passes overhead, Capt. Fraser is temporarily blinded and experiences a "considerable pain in his head." (Lore and Deneault, p. 46)

1888

1888, Early September — 3:15 p.m. During a severe thunderstorm, after a flash of lightning and a peal of thunder, witnesses see a huge flame at Highland Lake, near Winsted, Connecticut. The water is parted for yards by a huge ball of fire at least 10 feet in diameter, and billows rise on either side to a height of 20 feet. The light moves toward the head of the lake with great velocity. When it is within 100 yards of the shore, another flash of lightning strikes, and the fireball disappears. The waters of the lake remain disturbed for hours. ("A Ball of Fire on a Lake," *Hagerstown (Ind.) Exponent,* September 12, 1888, p. 3)

1889

1889, February 7 — 6:00 p.m. A cylindrical luminous object passes over Oella, Maryland, at only several hundred feet altitude. It lights up the village "as brilliantly as if by a strong electric lamp." It curves and appears to descend to the ground one mile away. It follows the course of the Patapsco River to the north for several seconds. ("A Brilliant Meteor," *Washington (D.C.) Evening Star,* February 9, 1889, p. 6)

1889, December 24 — 10:30 p.m. A young man named Oliver Lerch supposedly steps out of his family's home in South Bend, Indiana, to fetch water from a well. Five minutes later, the people in the house hear Lerch screaming. When they run outside, they can hear his voice, apparently coming from 100 feet above their heads, but they cannot see him. He is screaming, "Help! Help! It's got me!" Five minutes later, the voice has faded away, although it returns briefly again. Lerch's tracks in the snow end suddenly about half way to the well, and he is never seen again. The name of the disappearing man, the date, and the location change over several retellings. No one named Oliver Lerch lived in South Bend in 1890 and no contemporary account or police record exist of such an occurrence. Joseph Rosenberger claimed in 1979 that his 1950 article was fiction (though posing as fact). However, the story, which Rosenberger set in 1890, has been in circulation since at least 1904 as taking place in 1889. ("Indiana Mystery of the Man Who Disappeared Has Never Been Explained," *Joplin (Mo.) Globe,* December 31, 1904, p. 4; "A Strange Disappearance," *Minneapolis Tribune,* December 26, 1906, p. 3; Joseph Rosenberger, "What Happened to Oliver Lerch?" *Fate* 4, no. 5 (September 1950): 28–31; Morris K. Jessup, *The Case for the UFO,* Citadel, 1955, pp. 136–139; Frank Edwards, *Strangest of All,* Ace, 1956, pp. 102–103; Brad Steiger, *Strangers from the Skies,* Award, 1966; Kevin D. Randle, "The Disappearance of Oliver Lerch," *APRO Bulletin* 25, no. 3 (September 1976): 1, 3–4; Joe Nickell, "The Oliver Lerch Disappearance: A Postmortem," *Fate* 33, no. 3 (March 1980): 61–65; Clark III 597; Clark IV 657)

1890

1890, August 29 — The German ship *Doris* is in the North Atlantic some 340 miles off Jacksonville, Florida, when the crew sees an object about 5° above sea level. Captain Ohling watches it hover for one minute then slowly rise to 20° before it splits into two parts and disappears. (Lore and Deneault, p. 43; Dolan, USO1, 75–76)

1891

1891, May 14 or August 14 — Sunset. May King and some others in Toponas, Colorado, see a large round object surrounded by light moving about in the sky during a rainstorm. It is revolving as it travels slowly toward the northeast, leaving a luminous trail. (Frances Melrose, "Requests Fly in for UFO Information," Denver (Colo.) *Rocky Mountain News*, February 6, 1994, via *UFO Newsclipping Service*, no. 297 (April 1994): 10)

1891, June 13 — Day. An unnamed witness claims to see a "meteor" explode with a loud noise over the Wasson & Miller flour mill and cotton gin in Dublin, Texas. The object looks like "a bale of cotton suspended in the air after having been saturated in kerosene oil and ignited, except that it created a much brighter light" that dazzles people standing several hundred feet away. The object shatters into pieces before it hits the ground, the fragments setting the grass and weeds on fire. In addition to the fragments is a scrap of paper with writing in a strange language. ("Meteoric Explosion," *Dublin (Tex.) Progress*, June 20, 1891, p. 5; "Dublin 1891," Texas UFO Museum and Research Library, February 5, 2014)

1891, July 12 — 7:00 p.m. Residents of Theodore Street in Ottawa, Ontario, see over the rifle range a cigar-shaped balloon with a bright light on one end and a fan on the other traveling from south to north. (*MacLeod (Ont.) Gazette*, July 16, 1891; Clark III 70; Clark IV 94)

1891, September 2 — 8:00 p.m. Alonzo M. Swan and L. D. Dodson (an equestrian recovering from an illness) are camped in Coyote Springs, New Mexico [now within the bounds of Kirtland Air Force Base south of Albuquerque], to benefit from the mineral springs there when they see a brilliant light rise above a mountain to the south. As it moves closer against the wind, they see it has a series of "electric arc lights" around it and a "pole" or rudder that is similarly lit. The object is in view for nearly two hours. Another lighted object appears from the southwest and approaches the first object, but clouds prevent any further observation. Swan sees a lighted object again on September 4, although this time it could be a star. ("Strange Mid Air Ships," *Albuquerque (N.Mex.) Weekly Citizen*, September 12, 1891, p. 3; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 219–237)

1891, September 5 — 2:00 a.m. Two employees of an ice house in Crawfordsville, Indiana, Marshall McIntyre and Bill Gray, notice a white object about 300–400 feet in the air that is flying by means of several pairs of fins. It appears to be 18–20 feet long and 8 feet wide and has a single red glowing eye or light. When it begins circling a nearby residence on East Main Street, the two men take shelter in a barn. It moves away to the east but soon returns, whereupon the witnesses drive back to the ice house in their carriage. Rev. George W. Switzer, a Methodist minister, reports a similar apparition above his church. Some locals are convinced that the object was either an illusion created by the town's recently installed electric lights reflecting through the damp air and rain, or a flock of frightened killdeers. ("A Strange Phenomenon," *Crawfordsville (Ind.) Daily Journal*, September 5, 1891, p. 1; "Was It a Case of 'Jag'?" *Indianapolis Journal*, September 6, 1891, p. 1; "Mr. Switzer Saw the Spook," *Crawfordsville (Ind.) Daily Journal*, September 7, 1891, p. 4; "The Spook Explained," *Crawfordsville (Ind.) Daily Journal*, September 8, 1891, p. 9; "Crawfordsville's Airy Spook," *Indianapolis Journal*, September 9, 1891, p. 1; Vincent Gaddis, "Indiana's Sky Monster," *Doubt*, no. 14 (Spring 1946): 209–210; Chandler Lighty, "The Crawfordsville Monster," Hoosier State Chronicles, October 26, 2015; Clark III 1076; Clark IV 1192)

1892

1892, January? — George W. Crusselle and S. D. Cuthereil from the *USS Thetis* are wandering among the salt water lagoons on the west coast of Baja California near Punta Abreojos, Mexico, when they see a luminous object with

smooth edges about 30 feet in diameter approaching from the ocean at an altitude of 50 feet. It changes shape from circular to an hourglass and moves swiftly to the surface of a lagoon, covering it with a "brilliant halo of light." It rises moments later, changing its shape frequently, and moving swiftly in a zigzag fashion. After 15 minutes it disappears inland. (George W. Crusselle, "The Coast Survey; How the Thetis Conducted a Hydroelectric Survey; A Peculiar Electrical Phenomenon," *Atlanta (Ga.) Constitution*, April 10, 1892, p. 9; Dolan, USO1, 77–81)

1892, March 23 — Evening–1:00 a.m. Residents of Warsaw, Poland, watch a balloon over the city that casts rays of light from an electrical apparatus. It remains stationary until 1:00 a.m., then it takes off to the west. Other supposed balloons are seen March 22 or earlier over Kaunas Fortress, Lithuania; and Modlin Fortress (in Nowy Dwór Mazowiecki**)**, Sosnowiec, Dąbrowa Górnicza, and Dąbrowice, Poland. As they remain stationary for as long as 40 minutes, some assume they are piloted by German spies. ("Spying by Balloon," *New York Evening World*, March 25, 1892, p. 1; "Espionage by Balloon," *Manchester (UK) Guardian*, March 26, 1892, p. 8; "Balloons As German Spies," *New York Times*, March 26, 1892, p. 3; "Steering Military Balloons," *Birmingham Daily Post*, March 31, 1892, p. 8; "The German Military Balloons," *Manchester (UK) Guardian*, March 31, 1892, p. 8; "German Army Balloons in Active Use," *New York Tribune*, March 31, 1892, p. 1; Brett Holman, "The Phantom Balloon Scare of 1892," Airminded, July 11, 2009; Clark III 70; Clark IV 94)

1892, April 16 — Witnesses at Przemyśl Fortress, Poland, see a bright point of light in the north that seems to be a sphere emitting searchlight beams above and below it. The object is hovering at an altitude of 2,100 feet and begins circling. (Poland 7–8)

1892, June 1 — 11:30 p.m. A large balloon carrying a searchlight and four passengers passes over Newark, New Jersey, descending as low as 200 feet from the ground. ("Mysterious Balloon Sighted," *Middletown (N.Y.) Times-Press*, June 2, 1892, p. 5; Clark III 70; Clark IV 94)

1892, June 19 — Night. J. L. Shaw of Conyers, Georgia, sees a mysterious light in the sky from which balls of fire fall to the ground near him. ("Saw Balls of Fire," *Atlanta (Ga.) Constitution*, June 21, 1892, p. 10)

1892, August 5 — 11:00 p.m. Maud Dismore and Arthur Bull are sitting on a porch on Court Street in Visalia, California, when a reddish-blue light suddenly descends and hovers opposite the end of the porch. After a couple seconds it approaches them on the porch itself. It is about 6 feet high and 4 feet square, and its top seems to "wave back and forth." The witnesses feel engulfed in electricity, and they say the light has an "unearthly color." A small gate on the porch begins rattling, and it continues rattling even when Bull puts his hand on it. After a few seconds, the light blinks out and the rattling stops. ("Ignis Fatuus," *Visalia (Calif.) Daily Times*, August 12, 1892, p. 2)

1892, August 30 — 11:00 p.m. Several people in Waxahachie, Texas, see a "kind of balloon" with colored lights passing over the northern part of the city after hearing a man shouting a greeting. ("What Was It?" *Galveston (Tex.) Daily News*, September 2, 1892, p. 6; Clark III 70; Clark IV 94)

1892, September 20 — Large quantities of a white, thread-like substance fall from the sky during a rainstorm at Gainesville, Florida. Samples are sent to arachnologist George Marx of the US Department of Agriculture, who performs a chemical analysis that shows it to be from migrating spiders. ("Spider Web from the Clouds," *Scientific American* 67 (1892): 325; George Marx, "On Spiders' Web," *Proceedings of the Entomological Society of Washington* 2 (1892): 385–388; "An 1892 'Gossamer' Fall: And What the Experts Said about It," *CSI News Letter*, no. 22 (December 15, 1957): 22–23; Clark III 123–124; Clark IV 151)

1893

1893, February 24–25 — 10:00 p.m. Charles James Norcock, captain of the corvette HMS *Caroline*, is sailing about 16 miles south of Jeju Island, South Korea, in the Korea Strait when the officer of the watch observes some round lights resembling "Chinese lanterns festooned between the masts of a lofty vessel." They are moving slowly north and appear to be in the air between the ship and the Hallasan volcano on Jeju. They are visible until roughly 12:00 midnight, sometimes appearing as a mass, other times strung out more in an irregular line. The ship's crew observes them again the next night as they are sailing east from Port Hamilton [now the Korean islands of Geomundo]. This time they are visible until dawn. Although there are some odd characteristics of this observation, the likeliest explanation is that they are inferior mirages of distant fishing boats, as atmospheric

conditions are favorable on these dates. (Charles J. Norcock, "An Atmospheric Phenomenon in the North China Sea," *Nature* 48 (1893): 76–77; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 253–281)

1893, August 18 — Sunrise. People living near the small hamlet of Leslie in Cumberland County, Kentucky, notice that the sun has a peculiar color. Thousands of small discs, seemingly about the size of a wagon wheel, appear in the sky, all of them in motion. They appear round in shape from far away, but when closer to the ground they change to triangles, squares, or odd forms. Their colors vary: Some are bright red, others green or black, but when they are close to the ground they are all a deep purple color. All are silent. The phenomenon lasts about one hour, during which time the villagers fear it is judgment day. ("Judgment Day," *St. Louis (Mo.) Globe-Democrat*, August 20, 1893, p. 9)

1894

1894 — Night. Charlotte Ferguson, 11, glances out the window of her farmhouse near Warren, Ohio, and sees a huge, lighted, "zeppelin shaped object" pass slowly over the property at a low altitude. It hovers, points upward, and disappears silently into the sky. ("Case (1): Strange Zeppelin Awed Girl in 1894," *Flying Saucer News-Service Research Bulletin* 1, no. 8 (July 21, 1955): 1; Clark III 1159; Clark IV 1333)

1894, February? — Capt. Corning of the British schooner *W. and H. Witherspoon* sees several lights rise from the Gulf of Mexico off the west coast of Florida. They ascend to a height of 25 feet, explode, and disappear. ("Cum Grano Salis," *Lowell (Mass.) Daily Sun*, February 8, 1894, p. 1; Dolan, USO1, 81–82)

1894, May — During the opposition of Mars, the idea that Schiaparelli's *canali* are really irrigation canals made by intelligent beings is first hinted at, and then adopted as the only intelligible explanation, by American astronomer Percival Lowell in Flagstaff, Arizona, and a few others. The visible seasonal melting of Martian polar icecaps fuels speculation that an advanced alien race indigenous to Mars has built the canals to transport the water to drier equatorial regions. Newspaper and magazine articles about Martian canals and "Martians" capture the public imagination. Lowell publishes his views in three books: *Mars* (1895), *Mars and Its Canals* (1906), and *Mars As the Abode of Life* (1908). He writes: "The evidence of handicraft, if such it be, points to a highly intelligent mind behind it." Lowell remains a strong proponent for the rest of his life of the idea that the canals were built for irrigation by an intelligent civilization. (Wikipedia, "Martian canals")

1894, June 7 — Astronomers Percival Lowell and William H. Pickering at Lowell Observatory in Flagstaff, Arizona, see two "dazzling white specks" for a few moments on the south polar cap of Mars. The most likely explanation is the reflection of sunlight from ice on the surface or ice crystals in clouds. (Percival Lowell, *Mars*, Houghton, Mifflin, 1897 ed., pp. 86–87)

1894, July 20 — Sunset. Bernard Parry and his wife are near Marriott [now Marriott-Slaterville], Utah, when they see a "small black cloud" in the northeast quickly approaching them. It grows bigger, then smaller, as they watch it. When it is only 450 feet away, it stops and hovers. Its sides seem to be folded up toward the center. Many small black-and-white objects (birds?) are moving in its center. Suddenly the object pivots to the east and moves away toward Ogden. (*Ogden (Utah) Standard*, July 26, 1894)

1894, Late November — 11:00 p.m.–2:00 a.m. Mennonite farmers Henry W. J. Smith and Benjamin W. Blue see a luminous ball in the northeastern sky about 30° above the horizon some 3 miles west of Manchester, Kansas. The object, in the shape of a "casket," shoots toward the west 3° then returns to its original position. As it maneuvers near them, it opens several times, revealing various entities each time, from a crowned man to a "haughty woman" and a military leader. The original report appears in the *Evangelical Visitor*. ("Battle in the Heavens," *Wilkes-Barre (Pa.) Times*, October 6, 1894, p. 6)

1895

1895 — French parapsychologist Albert de Rochas is asked to hypnotize a family friend, "Mireille," who is suffering from some ailment. In one of her sessions, Mireille describes how she is rising in space, which she describes as luminous and peopled with phantoms. Subsequent sessions reveal that she has visited Mars and other planets in astral form. Mars has canals, of course, but also Martians who are less intelligent than earthlings. (Albert de Rochas, *Les vies successives: Documents pour l'étude de cette question*, Bibliothèque Chacomac, 1911; Hilary Evans, "Martians of the 1890s," *IUR* 11, no. 5 (Sept./Oct. 1986): 8–9)

1895, January 19 — Shortly before 2:00 a.m. The pilot of the Detroit and Milwaukee steamer notices a bright light some 15 miles to the south as the ship is approaching Grand Haven, Michigan, on Lake Michigan. He notifies the captain, who orders him to steer toward it. When the boat is within 5 miles of the light, they see another light about 5 miles to the west. They call up the passengers who also see the bright lights, which begin to flash at intervals. Something dark rises up between the steamer and the lights, eclipsing them briefly, ten subsides. The lights flash briefly then disappear with a rumble, and a large wave hits the ship. ("Blinded by Dazzling Light," *St. Louis (Mo.) Globe-Democrat*, January 20, 1895, p. 2; "Like a Midnight Sun," *Kansas City (Mo.) Star*, January 27, 1895, p. 10; Dolan, USO1, 82–84)

1895, July 23 — Night. English explorer Mary Kingsley is on the shore of Lake Ncovi [possibly Lake Nkonie or another lake in the area], Moyen-Ogooué, Gabon, when a ball of violet light the size of an orange descends and hovers just above the beach sand. It is joined by another ball of light, and the two circle around each other. Kingsley thinks it might be a luminous insect. She pursues them in her canoe, but one light moves off into the forest and the other goes into the lake. (Mary H. Kingsley, *Travels in West Africa*, Macmillan, 1904, p. 193; Dolan, USO1, 84–86)

1895, August — US psychical researcher James Hyslop begins investigating a case of automatic writing by Sarah Harper Cleaveland ("Mrs. Smead") in Onondaga County, New York. She keeps records of her planchette experiments and puts them at Hyslop's disposal. In August, she makes several references to the planet Mars and Jupiter. She provides a crude map of Jupiter's surface, and the planet is said to be the "babies' heaven." At the next sitting, she draws a map of Mars, the different zones named in the Martian language; she gives several communications about the inhabitants and the canals. Martian revelations cease for another 5 years until September 1900, when the communications return in a developed state. She draws men, boats, houses, and flowers, named in Martian and written in hieroglyphic characters. Some of the sketches (a self-winding double clock) are very ingenious, while others (a Martian airship) are peculiar but unconvincing. (James H. Hyslop, *Psychical Research and the Resurrection*, Small, Maynard, 1908, pp. 222–267; Hilary Evans, "Martians of the 1890s," *IUR* 11, no. 5 (Sept./Oct. 1986): 6–7; Clark III 298; Clark IV 338)

1895, August 31 — 8:00 p.m. *Oxford English Dictionary* lexicographer James Murray watches a "brilliant luminous body" move slowly over the Oxford University campus in Oxford, England, toward the east. At roughly the same time, other observers in London see a similar meteor pass over slowly for about 5 minutes, and A. Warren Melhuish sees it at Margate, Kent, around 10:15 p.m. (J. A. H. Murray, "Remarkable Meteoric (?) Appearance," London *Times*, September 4, 1895, p. 3; "Remarkable Meteoric Appearance," London *Times*, September 6, 1895, p. 8; A. F., "Remarkable Meteoric Appearance," London *Times*, September 10, 1895, p. 8; Clark III 1158; Clark IV 1332–1333)

1895, September 1 — 7:52 p.m. A witness sees a similar slow-moving fireball near Scarborough, Yorkshire, England. (I. W., "Remarkable Meteoric Appearance," London *Times*, September 7, 1895, p. 7)

1895, September 2 —10:15 p.m. Two observers in Bath, England, watch a large, luminous, comet-like object swoop out of the sky and disappear to the southwest. (A. F., "Remarkable Meteoric Appearance," London *Times*, September 10, 1895, p. 8)

1896

1896, July 1 — 6:00 p.m. A mysterious balloon passes over Winnipeg, Manitoba, to the east at an estimated 2,000 feet. It is lost to view after 20 minutes ("A Mysterious Balloon," Winnipeg *Manitoba Morning Free Press*, July 2, 1896, p. 4; "They Think It's Andreé's," *Chicago Tribune*, July 2, 1896, p. 1; "Was It Andrée's Balloon?," *Portland Oregonian*, July 2, 1896, p. 6; Robert E. Bartholomew, "A Balloon Mystery of B.C. and Manitoba 1896–97," *B.C. Historical News*, Fall 1997, pp. 27–29; Clark III 70; Clark IV 94)

1896, July 3 — The chief of the Kispiox people and a group of Canadian trappers see a brightly lit balloon traveling north near Blackwater Lake, British Columbia. The same day, a First Nations boy sees something similar at the Skeena River, British Columbia. ("It Was No Dream," Winnipeg *Manitoba Morning Free Press*, August 13, 1896, p. 2; Brett Holman, "Believing Is Seeing," Airminded, May 2, 2010)

1896, Mid-July — Night. Chester N. Crotsenburg, a postal clerk on the Chicago, Rock Island, and Pacific Railway, is on a train heading north from Princeton, Missouri, when he notices a round, dull-rose-colored light low on the western horizon. It then rises in height to 45°, and appears to be pacing the train, keeping a half-mile or one mile distance. After the train reaches Lineville, Iowa (13.7 miles away), it passes out of sight behind buildings. Possibly the moon. ("Ball Lightning," *Monthly Weather Review* 26 (August 1898): 358; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 1, Anomalist, 2019, pp. 291–304)

1896, August — Evening. Pearl Vickers, 9, and her family see a large "saucerlike" object with blinding lights hover above their property in Howell County, Missouri, for an extended time. The next morning, the family discovers three of their steers lying in a large patch of burned grass. The bodies are completely drained of blood, but there are only two small punctures in their jugular veins. (Pearl Chenoweth, as told to Shannon Graham, "Cattle-Killing UFO of 1896," *Fate* 38, no. 11 (November 1985): 52–54; Clark III 130, 1159; Clark IV 157, 1333–1334)

1896, August 11 — Charles Abbott Smith of San Francisco, California, is granted a patent for a cylindrical airship with a cone-shaped bow, "two wings hinged at the upper part of the vessel," and a compartment for machinery and passengers. (US Patent, "Air-ship," granted August 11, 1896)

1896, Late August — A William Jordan of San Rafael, California, claims have come across a machine shop in a secluded area southwest of Mount Tamalpais where the mechanics are working on an airship. They say that it is almost complete and swear Jordan to secrecy. Probable hoax. ("Others Who Saw It," *San Francisco (Calif.) Call,* November 23, 1896, p. 2; Clark III 71; Clark IV 95)

1896, October — Evening. A Miss Hagstrom is riding a bicycle on Telegraph Avenue in Oakland, California, when she notices an object with a powerful headlight moving toward the west and gradually descending. ("Saw the Mystic Flying Light," *San Francisco Call,* November 22, 1896, p. 13;Clark III 71; Clark IV 95)

1896, Late October — Fruit rancher Constant T. Musso and his family in Bowman, California. watch three bright lights moving toward the east at about 100 mph. ("Mission of the Aerial Ship," *San Francisco Call,* November 25, 1896, p. 1)

1896, Early November? — Evening. Some of the employees at the Sutro Heights estate [now Sutro Heights Park in the Richmond District] of San Francisco, California, belonging to Mayor Adolph Sutro watch a brilliant light approaching from the sea at a height of 500 feet. Two lights are visible, one a "misty-looking mass" and the other a searchlight. The object disappears in the direction of the city and turns to the north just before it passes from view. Another report suggests that the object passed over Seal Rocks and shone its searchlight on the seals. ("The Apparition of the Air," *San Francisco Call,* November 24, 1896, p. 1)

1896, Early November — 8:00 p.m. Louis Charmak and one other person in Woodland, California, notice three bright lights in the southwestern sky moving toward the northeast. As they reach Main Street, they rise another 100 feet in the air. They are close together and followed by a white trail of light. ("Was It an Airship?" *Woodland (Calif.) Daily Democrat,* November 24, 1896, p. 3)

1896, November 17 — Afternoon and evening. A mystery airship wave begins in California when residents of the Oak Park neighborhood of Sacramento see a high-flying object moving slowly in a circle, leaving a trail of smoke. Around 6:30 p.m., a light resembling an electric arc lamp appears in the night sky above Sacramento. Horse trainer David Carl notices it close to the ground and hears a voice saying, "We are too low down here. Send her up higher." Hundreds watch as it passes at low altitude for 30 minutes, avoiding buildings and hills. Some people claim to hear voices, either arguing or singing. R. L. Lowry sees four men pushing the vessel by its wheels. The witnesses include streetcar workers Charles Lusk and Granville C. Snider, who watch the object rise and fall as it moves southwest. (Wikipedia, "Mystery airship"; "Voices in the Sky," *Sacramento (Calif.) Evening Bee,* November 18, 1896, p. 1; "Strange Craft of the Sky," *San Francisco Call,* November 19, 1896, p. 1; Loren E. Gross, *UFOs: A History, 1896*, The Author, 1974; Thomas E. Bullard, *The Airship File*, The author, 1982; Clark III 70–71; Clark IV 94–95)

1896, November 20 — Afternoon. D. H. Risdon is working in an orchard near Tagus, California, when he spots an object "like an immense sheet" moving against the wind at a "considerable elevation." ("Saw the Mystic Flying Light," *San Francisco Call,* November 22, 1896, p. 13; Clark III 71; Clark IV 95)

1896, November 20 — 5:30 p.m. Passengers on a streetcar in Oakland, California, notice a "peculiar-looking contrivance" high in the sky and moving in a westerly direction toward San Francisco. It has a powerful headlight and another light on the bottom. It is also seen over Folsom, San Francisco, Sacramento, Modesto, Manteca, Sebastopol, and several other cities later in the evening and is reportedly viewed by hundreds of witnesses. (Wikipedia, "Mystery airship"; "Saw the Mystic Flying Light," *San Francisco Call,* November 22, 1896, p. 13; Clark III 71; Clark IV 95)

1896, November 22 — San Francisco attorney George D. Collins announces that he represents the airship inventor, a "very wealthy man who has been studying the subject of flying machines for fifteen years" and who moved to California from Maine in 1889. He claims the airship is a 150-foot metal contraption with two canvas wings 18 feet wide and shaped like a bird's tail. It has been built in Oroville and is now hidden in the San Francisco, California, area as the inventor deals with technical problems. However, people in Oroville sense a hoax, as they know of no such inventor. On November 24, Collins complains to the *San Francisco Call* that another newspaper, the *San Francisco Examiner,* has been printing falsehoods about him, including an interview with another attorney, Frederick Bradley. Suspicion falls on an itinerant dentist from Maine, Elmer H. Benjamin, who insists his only inventions are dental fittings. A prominent citizen of Oakland, George H. Carleton, claims to know the inventor but has been sworn to secrecy. Former California Attorney General William H. H. Hart soon claims to represent the mystery inventor, who has fired Collins for talking too much. But Hart is also blabbing prolifically, saying that two or three airships exist (a second built in an eastern state) and his role is to "consolidate both interests." Hart asserts that the airship can carry four men and 1,000 pounds of dynamite for dropping on Havana, Cuba. ("A Lawyer's Word for That Airship," *San Francisco Chronicle,* November 22, 1896, p. 36; "Collins Sticks to His Airship Story," *San Francisco Chronicle,* November 23, 1896, p. 12; "Have We Got 'Em Again?" *Sacramento Bee,* November 23, 1896, p. 1; "Coy Mr. Collins and His Airship," *San Francisco Chronicle,* November 24, 1896, p. 9; "The Apparition of the Air," *San Francisco Call,* November 24, 1896, p. 1; "Mission of the Aerial Ship," *San Francisco Call,* November 25, 1896, p. 1; "Hart Stands by His Ship," "Hart Confirms the Story from Sacramento," *San Francisco Call,* November 26, 1896, p. 1; "Three Airships, Says Hart," *San Francisco Call,* November 29, 1896, p. 1; Michael Busby, *Solving the 1897 Airship Mystery,* Pelican, 2003, pp. 249–315; Clark III 71–73; Clark 95–97)

1896, November 22 — 5:30 p.m. Another mystery light moving in a wavering fashion toward the southwest is seen in Sacramento, California, by many people. At times it disappears, then flashes out again with renewed brilliance. Edward J. Carragher, owner of the Saddle Rock Restaurant, views the light through binoculars and is able to see a large object supporting an arc lamp. Cigar store vendor Jacob Zemansky watches the undulating light through a telescope until it fades into nothingness. George Scott, assistant to California Secretary of State Lewis Henry Brown, is standing on the steps of the State Capitol building with three friends when they see the strange light moving to the northwest. Scott has a key to the Capitol dome, so he brings his friends to the top of the building, where they can see the light "very distinctly, sweeping across the sky toward the northwest." There are three lights, apparently attached to a dark structure. ("Have We Got 'Em Again?" *Sacramento Bee,* November 23, 1896, p. 1; "A Winged Ship in the Sky," *San Francisco Call,* November 23, 1896, p. 1; "Saw It from the Dome," *San Francisco Call,* November 29, 1896, pp. 1, 2)

1896, November 22 — 7:05 p.m. M. H. Cohen, a conductor on the Hayes Street line, sees an aerial light at about 300–400 feet altitude when he is at Market and 8th streets in San Francisco, California. Other people on the streetcar also watch the light, which is moving across the Golden Gate and flashing periodically. When the streetcar disembarks at 1st Street at 7:13 p.m., Cohen and the others see the light over the Twin Peaks downtown. At the top of Pierce Street hill, Cohen sees it returning from Twin Peaks, and at 7:51 p.m. he watches it from Ashbury Street. Airships are seen later at Oakland, Alameda, San Leandro, San Jose, California, and Tacoma, Washington. ("The Apparition of the Air," *San Francisco Call,* November 24, 1896, p. 1)

1896, November 23 — 7:00 p.m. A bright light is seen west of Chico, California, traveling to the northwest. The same or similar light is seen west of Red Bluff, California, flying west at about 2,000 feet. After a few minutes it descends to 1,000 feet. It disappears over the Coast Range. ("Mission of the Aerial Ship," *San Francisco Call,* November 25, 1896, p. 1)

1896, November 24 — 6:45 p.m. Several passengers on a train crossing the bay from San Francisco to Oakland, California, see an airship alternately stop, hover, and move on. Minutes later, 6th Street in Oakland is overflowing with onlookers as the object passes above Broadway, flashing its light. One spectator is watching through binoculars and says the airship's turns cause the searchlight to shine in different directions. Among the witnesses are Col. Thomas F. Garrity, city electrician George H. Carleton, George Hatton of the *Oakland Tribune,* and Melvin Holmes. ("Mission of the Aerial Ship," *San Francisco Call,* November 25, 1896, p. 1)

1896, November 25 — Evening. A mystery light flies in circular patterns around Sacramento, California, at a rapid rate of speed. Observers include Deputy Secretary of State George A. McCalvy, District Attorney Frank D. Ryan, and E. D. McCabe, the governor's personal secretary. It is three times as large as Venus, also visible. The light is observed for 20 minutes then reappears later in the evening. A Professor Dodge of Galt, California, claims he can make out the "outlines of a dark body" just above the light. ("Hart Confirms the Story from Sacramento," *San Francisco Call,* November 26, 1896, p. 1; Clark III 73; Clark IV 97)

1896, November 25 — 6:00 p.m. Col. H. G. Shaw and Camille Spooner are riding in a carriage near Lodi, California, when their horse stops suddenly. Looking up, they see three slender beings about 7 feet tall. Shaw walks up to them and asks them where they are from; they reply in an odd warbling language. He notes that they are hairless and wear no apparent clothing. The eyes are large and lustrous, and they each seem to be carrying an egg-shaped light and a breathing apparatus under the left arm. Shaw claims the beings try to lift him but they are not strong enough. They then notice a 150-foot airship hovering 20 feet above the water close to a bridge. The three beings float to the craft, open a door in the side, and disappear inside. The ship flies quickly out of sight. Shaw speculates that the beings are from Mars. ("Three Strange Visitors," *Stockton (Calif.) Evening Mail,* November 27, 1896, p. 1; Patrick Gross, UFOs in the Daily Press; Clark III 74–75, 592; Clark IV 98–99, 652)

1896, November 26 — 7:00 p.m. Farmer John Bawl and his family see an airship moving to the southwest over his residence on Monroe Street near Franklin Street in San Jose, California. It is lunging sharply from side to side and has a pair of flapping wings and a red light on the bottom. Musician and President of the University of the Pacific Moses Smith Cross also sees the strange aerial light when he is visiting a colleague two blocks away. ("It Flitted over San Jose," *San Francisco Call,* November 28, 1896, p. 1; "Three Airships, Says Hart," *San Francisco Call,* November 29, 1896, p. 1; Clark III 73; Clark IV 97)

1896, November 26 — 8:00 p.m. Electrician Cass L. Gilson (sometimes misprinted Case Gilson in the newspapers) and three other men see an unlighted airship in a clear sky 1,000 feet over Oakland, California. It is flying northward against the wind and looks like a "great black cigar with a fishlike tail." The body is at least 100 feet long and looks as if it is made of darkened aluminum. It is seen again at 8:30 p.m. and disappears in the direction of San Francisco. ("Says He Saw It," *Oakland (Calif.) Tribune,* December 1, 1896, p. 1; "Saw the Airship at Close Range," *San Francisco Call,* December 2, 1896, p. 14; Clark III 73; Clark IV 97)

1896, November 27 — 10:00 p.m. A prominent attorney and others in Woodland, California, see a cluster of lights attached to an apparent airship moving at an altitude of about 500 feet at about 25 mph. It remains visible for an hour. ("More Airship Stories," *Woodland (Calif.) Daily Democrat,* November 29, 1896, p. 2)

1896, November 27 — San Jose, California, electrician John A. Horen meets a stranger in San Francisco who takes him to an airship hidden in a remote location 50 miles away. The two allegedly board the airship and fly over Honolulu, Hawaii. Horen's wife calls him a practical joker and that he was asleep in bed at the time. ("Piercing the Void, Or on to Honolulu," *San Francisco (Calif.) Examiner,* December 2, 1896, p. 5)

1896, November 28 — Percy Drew watches an enormous airship with a red light over Oakland, California. ("Says He Saw It," *Oakland (Calif.) Tribune,* December 1, 1896, p. 1)

1896, December 1 — Harry Lytle watches an airship as it flies toward the southwest over the Coast Ranges 3 miles north of Rumsey, California. He claims to recognize it as an "aircycle," kind of a winged balloon with a pedal-driven propellor, plans for which he submitted to E. W. Brown of Davis, California, and which they constructed in 1893. He calls it the *Nonesuch.* On an alleged test flight to Los Angeles on March 2, 1893, the device was stolen by some "hoboes." He assumes the airship is his stolen invention. ("The Mystery Solved," *Woodland (Calif.) Daily Democrat,* December 8, 1896, p. 3)

1896, December 2 — Early morning. Two fishermen near Pacific Grove, California, supposedly see an airship land on the water and float to a beach. It has three occupants. Including a "captain," who explains that the craft is undergoing repairs and he hopes to make an announcement of his invention soon. ("The Airship Described by Fishermen," *San Francisco (Calif.) Call,* December 3, 1896, p. 1)

1896, December 3 — 12:00 noon. George Jennings, a proprietor of the bar in the Grand Central Hotel in Fresno, California, greets an old friend who comes into the bar, claiming to be one of the airship inventors, and he had made a forced landing in Contra Costa County. ("Stranded near Fresno," *San Francisco (Calif.) Call,* December 5, 1896, p. 2)

1896, December 3 — Late evening. An airship allegedly crashes near the Twin Peaks in San Francisco, California. Its two occupants, one of whom identifies himself as J. D. deGear, denies the airship is the one seen recently. Under close questioning, deGear confesses that the fake wreckage had been hauled to the crest of a hill and dumped into a gulch. The stunt is apparently devised by deGear and the director of an amusement park. ("Plunged from a Dizzy

Height," *San Francisco (Calif.) Call,* December 4, 1896, p. 1; "An Airship Which Rode in a Wagon," *San Francisco (Calif.) Chronicle,* December 4, 1896, p. 5; Clark III 315; Clark IV 389)

1896, December 3 — 9:00 p.m. William Gordon, a sailor, is asked by someone in Indio, California, if he can splice a rope. He is invited aboard a cigar-shaped airship parked a mile away. The pilot is "of swarthy appearance" and speaks Spanish to his female companion. ("The Woman in It," *San Francisco (Calif.) Call,* December 5, 1896, p. 2)

1896, December 4 — 6:30 p.m. Travelers on a freight train between Dixon and Elmira, California, see two large, bright lights moving parallel with them at about 1,000 feet altitude. The lights outdistance the train and disappear to the southwest. ("The Airship Again," *Woodland (Calif.) Daily Democrat,* December 7, 1896, p. 3; Clark III 74; Clark IV 98)

1896, December 26 — Early morning. Dairy farmer Ezekiel Sergeant and a hired man have just finished milking their cows near Wilmington, Delaware, when they hear strains of music in the air. Then a bottle falls at Sergeant's feet and breaks into pieces. He sees an enormous, fish-shaped airship with extended wings, a large tail, and a bright searchlight. Amid the shattered glass he finds a slip of paper allegedly written by Capt. James Dashiel and Thomas Murphy on the airship *Icarus* that is sailing from Salt Lake City to Cuba. ("Saw an Air-Ship," *Philadelphia (Pa.) Times,* December 28, 1896, p. 5; Clark III 75; Clark IV 99)

1897

1897 — A medium named West, who lives in Paddington, London, England, channels the words of Silver Pearl, who purports to be a Martian woman. A man named Starling relays the story to newspaper editor W. T. Stead, who publishes a short summary of Silver Pearl's descriptions of Mars, a fragment of poetry in the Martian language, and photos of two white-robed, bearded, and very human-looking Martian monarchs—Heries, king of Algáthanon, and his son—which are perhaps the earliest photos of purported aliens in history. (W. T. Stead, "News from Mars," *Borderland* 4 (1897): 406–409; Clark IV 471–472)

1897, Mid-January — Just after sunset. People in Acampo, California, see an airship the size of a small house, seemingly built of canvas, and moving to the southeast. It looks "like a cigar box with a spark of fire in it." A few days later, five Acampo residents see a "man with wings" lit by a a fiery glow. ("Airship Reported Again," *Stockton (Calif.) Evening Mail,* January 22, 1897, p. 5; *Stockton (Calif.) Evening Mail,* January 26, 1897; Clark III 75; Clark IV 99)

1897, January 31 — 9:30 p.m. A "large, glaring light," apparently from an airship, is seen for nearly 30 minutes west of Hastings, Nebraska, hovering, ascending, descending, and moving at a "most remarkable speed." ("See an Air Ship at Hastings," *Omaha (Nebr.) Daily Bee,* February 2, 1897, p. 2; Clark III 75; Clark IV 99)

1897, February–July — The mystery airship wave continues, from Nebraska and Colorado to Texas and Ohio. Hoaxes and pranks pollute the information pool in a major way during this era and the planet Venus and other celestial objects undoubtedly play a major role, but many airship reports emanate from manifestly sober, puzzled citizens, and they continue long after the initial excitement subsides. To all appearances, they are objects of some kind, but since newspapers rarely question witnesses critically about details at this time, little can be deduced from the mass of reports. (Loren E. Gross, *The Mystery of Unidentified Flying Objects—A Prelude, 1896–1949*, The author, 1971; Roger L. Welsch, "This Mysterious Light Called an Airship: Nebraska Saucer Sightings, 1897," *Nebraska History* 60 (1979): 92–113; Daniel Cohen, *The Great Airship Mystery,* Dodd, Mead, 1981; Thomas E. Bullard, *The Airship File*, The author, 1982; Jerome Clark, "Airships: Part I," *IUR* 16, no. 1 (Jan./Feb. 1991): 4–23; Jerome Clark, "Airships: Part II," *IUR* 16, no. 2 (Mar./Apr. 1991): 20–21, 24; Michael Busby, *Solving the 1897 Airship Mystery*, Pelican, 2004; Jerome Clark, "UFOs or Mystery Airships?" *IUR* 31, no. 4 (March 2008): 8–14, 29; J. Allen Danelek, *The Great Airship of 1897,* Adventures Unlimited, 2009; Dennis Crenshaw and P. G. Navarro, *The Secrets of Dellschau: The Sonora Aero Club and the Airships of the 1800s,* Anomalist, 2009; Clark III 75–85; Clark IV 99–109)

1897, February 4 — Night. A dozen people returning home from a prayer meeting in Inavale, Nebraska, see a bright light passing overhead. Six smaller lights are placed at intervals around a larger dark body. After 10 minutes it returns at a lower altitude, now visible as a conical object 30–40 feet long with two sets of wings and a large rudder. Voices can be heard plainly. ("Air Ship Is Seen at Inavale," *Omaha (Nebr.) Daily Bee,* February 6, 1897, p. 6; Clark III 75; Clark IV 99)

1897, February 17 — Night. Hy Smith, Charles Braternitz, and Harry Reese see a bright light moving to the east just west of Big Springs, Nebraska. The light repeatedly rises up about 300 feet then descends quickly, sending out sparks. ("Seen near North Platte," *Kearney (Nebr.) Hub*, February 18, 1897, p. 3; Clark III 75; Clark IV 99)

1897, Mid-February — Residents of Valley Falls, Kansas, can see the outlines of an airship behind a large light that passes over the town. ("The Supposed Kansas Airship," *Atchison (Kan.) Daily Globe*, February 27, 1897, p. 4; Clark III 75; Clark IV 99)

1897, February 26 — 10:15 p.m. People at the railway depot in Falls City, Nebraska, see an object with a large searchlight in the northern sky. According to dispatcher Ike Chidsey, it is moving west at 60 mph and also has a red light. Chidsey alerts other Missouri Pacific train stations to the west. Over the next four and a half hours, the object is seen over Stella, Beatrice, Wymore, Hastings, Kenesaw, and Hartwell. ("The Supposed Kansas Airship," *Atchison (Kan.) Daily Globe*, February 27, 1897, p. 4; Clark III 75; Clark IV 99)

1897, Early March — A large airship passes south over Ellinwood, Kansas, at an estimated 40 mph. It looks to be about 50 feet long by 20 feet wide with two immense wings or propellors on each side. The airship was "one blaze of light from stem to stern." (*Anita (Iowa) Republican*, March 3, 1897; Clark III 75–76; Clark IV 99–100)

1897, March 13 — Night. A bright fireball appears in the west over North Loup, Nebraska, moving up and down erratically. It occasionally throws out sparks. ("That Strange Light Again," Lincoln *Nebraska State Journal*, March 16, 1897, p. 5; Clark III 75; Clark IV 99)

1897, March 14 — 9:30 p.m. An object with a "big engine headlight" flies over South Omaha, Nebraska, and remains visible for 30–40 minutes. It is moving to the west and disappears behind some buildings. One of the witnesses is Isaac J. Copenharve, a compositor for the *Omaha Bee*. The light had also been seen about two weeks earlier. ("Visions of an Air Ship," *Omaha (Nebr.) Daily Bee*, March 16, 1897, p. 7; Clark III 75; Clark IV 99)

1897, March 23–26 — Night. Residents of Belleville, Kansas, watch a lighted airship moving at 75 mph and "lighting up the houses and city like an immense meteor." It hovers for 20–30 minutes, changes direction, and is seen on four nights in succession. At 9:20 p.m. on March 25, workers at the Chicago, Rock Island, and Pacific Railroad depot and others in Belleville watch a bright light pass above the city for 45 minutes. It disappears to the northwest and reappears two more times. Many people in Kansas City, Kansas, view the light, which disappears about 9:30 p.m. on March 26, although the timing suggests it is Venus. ("Say They Saw an Air-Ship," *Kansas City (Mo.) Times*, March 27, 1897, p. 5; "It Flies at Night," *Kansas City (Mo.) Journal*, March 28, 1897, p. 2; "Take Venus for an Airship," *Kansas City (Mo.) Star*, March 28, 1897, p. 2; Clark III 76; Clark IV 100)

1897, March 24 — Evening. Witnesses in Portage la Prairie, Manitoba, see an airship with a light on each end that is making a loud buzzing noise. (Clark III 76; Clark IV 100)

1897, March 27 — 8:30 p.m. A blood-red light appears in the western sky over Topeka, Kansas, moving northward parallel with the horizon until after 20 minutes it disappears "with a flicker." Among the witnesses is Kansas Gov. John W. Leedy, who describes it as a "very strange light." Harold T. Chase, editor of the *Topeka Capital*, is on the State House steps with Leedy and says the object is a large, oblong shape. ("Strange Light in the Sky," *Topeka (Kan.) Daily Capital*, March 28, 1897, p. 1; "Neither Star Nor Planet," *Kansas City (Mo.) Times*, March 29, 1897, p. 1; "Airship Is Seen by Gov. Leedy," *Chicago Tribune*, March 29, 1897, p. 4; Tim Hrenchir, "It Was 1897, and a Strange Light Appeared in the Sky over Topeka," *Topeka (Kan.) Capital-Journal*, August 18, 2021)

1897, April 1 — 8:00 p.m. Strange lights appear in the sky south of Kansas City, Kansas, zigzagging and crossing the horizon. ("Air Ship Headed toward Omaha," *Omaha (Nebr.) Daily Bee*, April 3, 1897, p. 9)

1897, April 1 — 9:00 p.m. J. E. Gunn, proprietor of the Commercial Hotel, and other residents of Everest, Kansas, watch a 30-foot-long object that looks like a canoe suspended from a balloon. Two wings are visible on each side. Its light appears to dim when the object is moving and glows brightly when hovering. ("Air Ship Headed toward Omaha," *Omaha (Nebr.) Daily Bee*, April 3, 1897, p. 9)

1897, April 1 — Night. Residents of Galesburg, Michigan, see a brilliant white light passing overhead. It is attached to a black object that emits a crackling sound. Human voices are heard distinctly. ("The Airship Story Spreads," *Cedar Rapids (Iowa) Evening Gazette*, April 2, 1897, p. 1; Clark III 76; Clark IV 100)

1897, April 2 — Evening. People in Wesley, Iowa, view a cone-shaped object with windows in the side through which light is visible. It is traveling slowly toward the northwest. ("Wesley Saw the Air Ship," *Algona (Iowa) Republican*, April 7, 1897, p. 8; Clark III 76; Clark IV 100)

1897, April 4 — 12:15 a.m. Dairy farmer Dick Butler is returning to his farm in Wolf Creek Township, Iowa, after delivering milk in Sioux City when he notices an electric-like light on his right about 200 feet away in a cornfield. He can see a dark object with light coming through its windows. It appears to be a "long, narrow car, resembling a corset box in shape," some 30–35 feet long and 6–7 feet high. Above the car floats a cigar-shaped bag about the

same length and 8–10 feet thick. When his horses see the object, they bolt and tumble his wagon into the ditch. By the time Butler recovers, the object is moving briskly in a descent to the south. He watches it as it moves out of sight. ("Air Ship Again," *Marshalltown (Iowa) Evening Times-Republican,* April 9, 1897, p. 3; Clark III 79; Clark IV 103)

1897, April 4 — 9:30 p.m. A dozen citizens of Troy, Kansas, see a light that resembles a locomotive headlight directly above the town. It slowly moves westward and sinks below the horizon. Probable observation of Venus. ("The Air Ship," Troy *Kansas Chief,* April 8, 1897, p. 3)

1897, April 5 — Evening. Many people in Wilmington, North Carolina, see an airship with colored lights in the sky to the west, moving at a "rapid rate." It is pointing a searchlight toward the earth. Looking through binoculars, some observers claim to see wires and ropes of rigging. ("Was It an Airship?" *Wilmington (N.C.) Messenger,* April 6, 1897, p. 1)

1897, Early April — An airship allegedly lands near Elburn, Illinois, where some farmers run across it. It is made of "some light substance like aluminum." Two aeronauts are repairing the vehicle and will only say that they are flying from the Pacific to the Atlantic by following the Chicago and North Western Railway. ("That Blooming Ship," *Rockford (Ill.) Daily Republic,* April 12, 1897, p. 1; Clark III 80; Clark IV 104)

1897, April 6 — 2:00 a.m. James Southard gets lost on his ranch near Peru, Nebraska, looking for strayed cattle. He notices a light on a bar in the Missouri River, and it turns out to be on a landed airship 200 feet long, whose crew are apparently repairing its searchlight. The aeronauts answer all of Southard's questions, telling him that "the craft is loaded with several tons of dynamite and is bound for Cuba" to bomb Spanish ships. ("Boarded the Airship," *Auburn (Nebr.) Granger,* April 9, 1897, p. 3; Clark III 80; Clark IV 104)

1897, April 6 — 11:00 p.m. Numerous residents of Guthrie, Oklahoma, see a dark object with a bright searchlight flying swiftly above the city. It moves back and forth, sinks close to the ground north of the city, then rises into the air at great speed and disappears. ("Guthrie Sees the 'Airship,'" *Kansas City (Mo.) Journal,* April 8, 1897, p. 1)

1897, April 8 — An airship allegedly crashes into a flagpole in Bethany, Missouri, killing its two aeronauts. The account is written by "A True Fakir." ("The Wrecked Ship," *St. Joseph (Mo.) Daily Herald,* April 9, 1897, p. 2; "Airship 'Landing' Caused Stir in 1897," *Bethany (Mo.) Republican-Clipper,* October 9, 1996, p. 3; Clark III 315; Clark IV 389)

1897, April 8 — 8:00 p.m. Many people in towns along the Burlington, Cedar Rapids, and Northern Railroad from West Liberty to Cedar Rapids, Iowa, see an object with a "bright glaring headlight," a glistening steel body, and wings on either side. It makes a hissing noise as it glides through the air. By 10:00 p.m., it fades from view to the north of Cedar Rapids. ("Airship Appears in Iowa," *Chicago Record,* April 9, 1897, p. 1; "The Mysterious Airship," *Detroit Free Press,* April 10, 1897, p. 2; Clark III 77; Clark IV 101)

1897, April 9 — 4:00 a.m. During a blizzard, an on-board explosion allegedly causes an airship to crash near the home of Johann Fliegeltoub of Lanark, Illinois, killing two of its occupants. A third shouts hysterically before lapsing into unconsciousness. Fliegeltoub charges admission to see the wreck. When the third recovers, he claims he and his companions are from Mars, repairs the airship, recovers the bodies, and flies away. ("Kinder Queer," *Sterling (Ill.) Evening Gazette,* April 13, 1897, p. 4; Clark III 315–316; Clark IV 390)

1897, April 9 — 8:30 p.m. Hundreds of people in Chicago, Evanston, Niles Center, and Schermerville, Illinois, see an airship bearing multicolored lights and swinging a huge white searchlight from side to side. Nearly 800 witnesses on Davis Street in Evanston watch the object, estimated to be 400 feet in length. Using binoculars, the outline of a structure can be seen behind the powerful light. By 9:30 p.m., the airship is last seen over South Chicago. Northwestern University astronomer George W. Hough, director of the Dearborn Observatory, tells the newspapers he is sure the airship is the star Alpha Orionis (Betelgeuse). ("See Airship or a Star," *Chicago Tribune,* April 10, 1897, pp. 1–2; "California Airship on the Wing," *Chicago Tribune,* April 11, 1897, p. 1; Robert G. Neeley Jr., "1897: The Airship in Illinois," *Journal of UFO Studies,* orig. ser. 1 (1979): 49–69)

1897, April 9 — 11:00 p.m. A bright light approaches Rhodes, Iowa, and allegedly plunges into a railroad water reservoir, causing the water to boil from the light's heat. ("Can This Be the Airship?" *Burlington (Iowa) Hawk-Eye,* April 14, 1897, p. 1; Clark III 315; Clark IV 389–390)

1897, April 10 — Evening. Witnesses in Marshfield, Wisconsin, see a cone-shaped airship with a bright headlight moving south of town. ("Hides in the Woods," *Chicago Chronicle,* April 11, 1897, p. 3; Clark III 77; Clark IV 101)

1897, April 10 — Night. An airship allegedly crashes north of Jefferson, Iowa, and leaves a hole in the ground. ("Fate of an Airship," *Jefferson (Iowa) Bee,* April 15, 1897, pp. 1, 4; "The Aerial Doodad," *Jefferson (Iowa) Souvenir,* April 17, 1897, p. 1; "See It Often in Platte County," *Omaha (Nebr.) Daily Bee,* April 17, 1897, p. 2; Clark III 316; Clark IV 390)

1897, April 10 — 10:00 p.m. A noise draws residents of Platte City, Missouri, outside where they can see a hovering object 100 feet long and 20 feet wide. Two immense wings on either side are moving up and down. Greenish light

beams shine down on Main Street from its back and front. Suddenly there is a hissing sound and explosions and the object moves away to the northeast. ("Saw the Airship," *Buffalo (N.Y.) Enquirer*, April 12, 1897, p. 1; Clark III 76; Clark IV 100)

1897, April 10 — 10:00 p.m. William Mulhall gets a glimpse of a bright light near the horizon in St. Louis, Missouri, slowly moving south-southwest. It turns to the north and moves in a straight line. He goes inside the drug store at 4998 Easton Avenue and alerts the clerk, George A. Miles, and the druggist, R. H. Pardee, to the strange light. By then, a crowd has formed on the corner. The light moves steadily, unlike a balloon, for 30 minutes until it disappears. ("Aerial Wonder Seen in St. Louis," *St. Louis Post-Dispatch*, April 12, 1897, pp. 1–2)

1897, April 10 — 10:30 p.m. Policemen, firemen, and many other residents of Jacksonville, Illinois, see a bright light moving swiftly from east to west a few hundred feet in the air. The light sways from side to side and throws out beams several hundred feet in length. When it is above the city, the object the light is attached to can be seen as metallic and long with possible wings. Some witnesses can hear voices. The object reverses direction over Jacksonville, throwing its searchlight in all directions, and disappears to the east. ("The Airship over Quincy," *Quincy (Ill.) Morning Whig*, April 11, 1897, p. 8; Robert G. Neeley Jr., "1897: The Airship in Illinois," *Journal of UFO Studies*, orig. ser. 1 (1979): 49–69; Clark III 79; Clark IV 103)

1897, April 10 — 11:00 p.m. A bright white light with red and green lights on either side of it is observed by many residents of Quincy, Illinois, flying low above the Mississippi River on the city's west side. At one point it is no more than 400–500 feet above the ground. The light is attached to a metallic cigar-shaped object. Two wings extend from the sides and on top is some kind of superstructure. Witnesses estimate its length to be 50–100 feet. The object ascends, moves east, then south, then west, hovers above South Park for a few minutes, then moves north and stops again. It reverses direction and leaves toward the south at "tremendous speed." ("The Airship over Quincy," *Quincy (Ill.) Morning Whig*, April 11, 1897, p. 8; Robert G. Neeley Jr., "1897: The Airship in Illinois," *Journal of UFO Studies*, orig. ser. 1 (1979): 49–69; Daniel Cohen, *The Great Airship Mystery: A UFO in the 1890s*, Dodd, Mead, 1981, pp. 65–66; Clark III 76; Clark IV 100)

1897, April 11 — 12:30 a.m. John Peterson, E. K. Rowley, George Moody, Bayard Taylor French, and other residents of Hawarden, Iowa, see a conical object about 60 feet long with four sets of 15-foot wings. It is flying so low (about 600 feet) that they can hear machinery, voices, and laughter. Two red lights are positioned on the tail end and a large searchlight is in the front. After three minutes it moves off to the north. ("Hawarden Has 'Em Too," *Sioux City (Iowa) Journal*, April 12, 1897, p. 2; "Another Wonderful Tale," *Des Moines (Iowa) Leader*, April 13, 1897, p. 3; Clark III 79; Clark IV 103)

1897, April 11 — Early morning. An airship allegedly explodes as it passes over Pavilion Township, Michigan. Part of an electric device and a propellor blade are recovered. Carpenters discover that the roof they are shingling is covered with minute fragments from the explosion. ("Went to Smash," *Detroit (Mich.) Evening News*, April 13, 1897; "Claim That the Air Ship Burst," *Saginaw (Mich.) News*, April 14, 1897, p. 2; "Signs of an Airship Explosion," *Angola (Ind.) Herald*, April 21, 1897, p. 7; Robert E. Bartholomew, "Michigan and the Great Mass Hysteria Episode of 1897," *Michigan Historical Review* 24, no. 1 (1998): 133, 135; Clark III 316; Clark IV 390)

1897, April 11 — 5:30 a.m. An alleged photo of an airship is taken at 4356 East Ravenswood Park in Rogers Park, Chicago, Illinois, by an ex-policeman named Walter R. McCann and George A. Overrocker, who provide copies to several newspapers. The *Chicago Tribune* photo editor pronounces it a fake because it looks like it is taken by a Kodak with a small lens that cannot achieve a panoramic view. A later report claims that McCann has photographed a piece of canvas on which an airship is painted. ("Airship Myth Yet Soars," *Chicago Tribune*, April 12, 1897, p. 5; *Chicago Times-Herald*, April 12, 1897; "Airship Is All a Joke," *Chicago Chronicle*, April 13, 1897, p. 2; *Watauga (N.C.) Democrat*, April 27, 1897, p. 1; Clark III 78; Wikimedia Commons, "Mystery airship 1897")

1897, April 11 — 12:15 p.m. Gary Carlton Jr. watches a flat object looking like a "big piece of yellow canvas" pass over Bloomington, Illinois, at a high altitude toward the northeast. ("The Air Ship," *Bloomington (Ill.) Daily Pantagraph*, April 12, 1897, p. 5; Clark III 77; Clark IV 102)

1897, April 11 — 7:45 p.m. John Lee and others in Benton Harbor, Michigan, watch an airship rapidly moving north-northwest for 15 minutes. With the naked eye it looks like a huge ball of fire, but through opera glasses it resembles a cluster of soft yellow lights. ("Air Ship Seen Here," *Benton Harbor (Mich.) Evening News*, April 12, 1897, p. 1; Clark III 77; Clark IV 101)

1897, April 11 — 8:00 p.m. R. G. Adams and his parents at 3126 Fourth Avenue South in Minneapolis, Minnesota, watch a lighted, cigar-shaped object flying low towards the southwest. Through binoculars it appears to be 18–20 feet long. A square light that changes from white to green to red, depending apparently on its speed, is on top. Hundreds of other people also see the object over the next four hours, maneuvering above Lake Minnetonka and eventually receding into the northeast. ("Saw It," *Minneapolis (Minn.) Daily Times*, April 12, 1897, p. 1;

"Cavorted in Midair," *Minneapolis (Minn.) Journal,* April 12, 1897, p. 6; "Does He Hail from Mars?" *St. Paul (Minn.) Pioneer Press,* April 12, 1897, p. 4; "Wonder! Mysterious Airship Seen by Stuart Mackroth," *Minneapolis Tribune,* April 13, 1897, p. 1; Clark III 77; Clark IV 101)

1897, April 11 — 8:00 p.m. A group of boys notices a spindle-shaped object passing west of Owatonna, Minnesota, on a northerly course. Other observers are alerted and a crowd grows. When viewed through opera-glasses. The object appeared to be cone-shaped with a bright headlight. ("City and County News," *Owatonna (Minn.) People's Press,* April 16, 1897, p. 2; Clark IV 101)

1897, April 11 — 9:00 p.m. An airship approaches Milwaukee, Wisconsin, from the northeast over Lake Michigan and heads toward the southwest. It stops and hovers 1,000 feet above City Hall for 15 minutes. ("Airship Is Seen Again," *Milwaukee (Wis.) Sentinel,* April 12, 1897; "Airship Myth Yet Soars," *Chicago Tribune,* April 12, 1897, p. 5; "Sure They Saw It," *Marshalltown (Iowa) Times-Republican,* April 12, 1897; "Is It a Star?" *St. Paul (Minn.) Pioneer Press,* April 13, 1897)

1897, April 11 — Night. Five men—Albert Lowerre, George Wilson, John Ryan, Max Fowler, and Roy Sharpe—in Deadwood, South Dakota, see odd lights floating in the air above them and the outline of an object sailing above the city for 20 minutes. ("Whole Fleet of Airships Witnessed by Duluthians," *St. Paul (Minn.) Pioneer Press,* April 13, 1897, p. 2; "Bulletins from the Airship," *Omaha (Neb.) Daily Bee,* April 14, 1897, p. 3; "The City," *Black Hills Daily Times* (Deadwood, S.Dak.), April 15, 1897, p. 3)

1897, April 11 — After 10:30 p.m. Stuart Mackroth is riding a bicycle just east of Minnetonka Mills, Minnesota, when a flying machine "shaped like an ordinary boat" passes overhead. It has red and green lights on each side and a powerful electric light in front. Inside he can see men, women, and children, all moving about "as if very busy." ("Wonder! Mysterious Airship Seen by Stuart Mackroth," *Minneapolis Tribune,* April 13, 1897, p. 1; Clark III 79; Clark IV 103)

1897, April 11 — 11:15 p.m. A bank clerk in Decatur, Illinois, sees an object "like two monster cigars with three bright headlights" moving to the north. ("Saw the Air Ship," *Decatur (Ill.) Evening Republican,* April 12, 1897, p. 8; Clark III 77; Clark IV 101)

1897, April 12 — Early morning. Two miles south of Louisville, Kentucky, Augustus Rodgers sees an oblong object 400 feet above him when he goes out to attend to his livestock. It is about 40 by 15 feet, brilliantly lighted, and flying at a speed of 100 miles an hour. Rodgers calls his wife and they watch it as it disappears to the southeast. They seem to make out the figure of a man aboard. ("Airship Passed in the Night," *Louisville (Ky.) Evening Post,* April 13, 1897, p. 6; Clark III 80; Clark IV 104)

1897, April 12 — Morning. F. L. Bullard, engineer on the Fast Mail train on the Chicago, Burlington, and Quincy Railroad, says he caught sight of an airship moving parallel with the train shortly after his Engine 950 left downtown Chicago. The train is moving at 70 mph, and by the time it reaches Lisle, Illinois, the object is far ahead. Bullard estimates it is moving at 100–150 mph. ("Air-Ship Distances a Train," *St. Louis (Mo.) Globe-Democrat,* April 13, 1897, p. 6)

1897, April 12 — 7:30 p.m. Numerous observers in St. Louis, Missouri, watch an object moving through the clouds at an elevation of about 25°. It has a powerful searchlight that sweeps the ground at regular intervals. The object is visible for 10 minutes before it suddenly disappears. ("Air Ship Seen," *St. Louis Post-Dispatch,* April 13, 1897, pp. 1–2)

1897, April 12 — 8:00 p.m. During a rainstorm in Lincoln, Illinois, more than 50 people stand on Pulaski Street to watch a light moving to the northeast. John Fitzgerald sees a V-shaped object with a bright searchlight moving rapidly toward Lincoln. It changes course, the light changes from white to green, and the object disappears behind clouds. ("Was It the Airship?" *Lincoln (Ill.) Daily Courier,* April 13, 1897, p. 3; "Was It the Airship?" *Lincoln (Ill.) Weekly Courier,* April 13, 1897, p. 8; Robert G. Neeley Jr., "1897: The Airship in Illinois," *Journal of UFO Studies,* orig. ser. 1 (1979): 49–69; Clark III 77–78; Clark IV 102)

1897, April 13 — Before sunrise. Augustus Rodgers, a farmer living two miles south of Louisville, Kentucky, goes outside to attend to his livestock. He sees an oblong object, some 40 feet long by 15 feet tall, flying about 400 feet in the air at 100 mph. His wife comes out to watch it with him, and they both see "a form like that of a man" standing in the front and directing its course. ("Airship Passed in the Night," *Louisville (Ky.) Evening Post,* April 13, 1897, p. 6)

1897, April 13 — Night. Mayor Charles Merritt Seely and other people in Canton, South Dakota, watch a winged airship passing to the north over the town with a red light in front and a green light in back. ("Airship Is Seen by Moonlight," *Omaha (Nebr.) Daily Bee,* April 15, 1897, p. 1; Clark III 76–77; Clark IV 101)

1897, April 13 — 11:15 p.m. Frederick Chamberlain and O. L. Jones are riding one mile west of Lake Elmo, Minnesota, when they notice a figure in a clearing, walking around as if he is looking for something. They turn off the road to investigate and hear a cracking sound followed by a rushing noise. A moment later they notice a gray-white object

that looks like the top of a covered wagon. It has two rows of four red or green lights. The object rises quickly at a sharp angle to clear the treetops. They can make out no machinery or wings or rudders or even an outline of the object. In the mud, Chamberlain finds 14 footprints, each 2 feet long, 6 inches wide, "arranged seven on each side, and in an oblong pattern." Adam Thielen, a nearby farmer, independently sees a dark object with red and green lights flying overhead about the same time. ("Adam Saw the Airship Light," *St. Paul (Minn.) Pioneer Press,* April 15, 1897, p. 5; Clark III 79; Clark IV 103)

1897, April 14 — Early morning. Marble merchant David W. Paul is traveling with a party of workmen from Burlington to Frankfort, Indiana. When they are at the middle fork of Wildcat Creek, they hear a "swishing, roaring sound" and see an object with a blinding white searchlight and smaller green and yellow lights. The object is cigar-shaped with wings or fins. It descends to just above the treetops, hovers there for a moment, then rises and noisily shoots off to the southwest. ("That Mysterious Airship," *Indianapolis (Ind.) Sentinel,* April 15, 1897, p. 6; Clark III 79; Clark IV 103)

1897, April 14 — 4:30 a.m. Farmers see an airship land about 3 miles northwest of Howard City, Michigan, and some go to investigate. Inside the craft is a "strange man" dressed in heavy furs although he seems "to have no use for them, as he was almost naked and seemed to be suffering from the heat." The man is 9.5 feet tall and speaks in a musical language that, however, sounds like bellowing. One farmer gets too close, and the giant kicks him severely enough to break his hip. ("Trip of the Airship," *Saginaw (Mich.) Courier-Herald,* April 22, 1897, p. 6; Clark III 83; Clark IV 107)

1897, April 14 — 3:00 p.m. An airship looking like an "immense bird" approaches Gas City, Indiana, from the northwest. As it draws nearer, witnesses see that it is cigar-shaped and "propelled by broad canvas wings." The object lands briefly one mile from town, terrifying some farm animals. As a crowd rushes toward it, it takes off and vanishes to the east. ("In Daylight," *Cincinnati (Ohio) Enquirer,* April 15, 1897, p. 1; "That Air Ship," *Xenia (Ohio) Daily Gazette.* April 15, 1897, p. 1; Clark III 79; Clark IV 103)

1897, April 14 — 3:00 p.m. A brownish cigar-shaped object with wings passes south of Marion, Indiana, coming from the northwest. Six passengers can be seen on board. ("Six Men Seen in the Airship," *Cincinnati (Ohio) Enquirer,* April 15, 1897, p. 1; "That Air Ship," *Xenia (Ohio) Daily Gazette.* April 15, 1897, p. 1; Clark III 80; Clark IV 104)

1897, April 14 — Evening. An airship allegedly smashes into a cow barn near Decatur, Illinois, ripping the roof off and frightening a cow, which whacks a farmer in the head. The airship manages to sail on. ("Airship Story," *Decatur (Ill.) Evening Republican,* April 15, 1897, p. 8; Clark III 316; Clark IV 390)

1897, April 14 — 7:30 p.m. An airship 100 feet long and 20 feet high in the center lands in a meadow three-quarters of a mile west of Birmingham, Iowa. A large crowd of men and boys sets out to examine the object, but when they are within several hundred feet, it rises with a loud whirring sound and moves away to the northwest. Two men can be distinctly seen inside, one carrying a lantern that he waves as the airship ascends. ("Airship Positively Seen," *Burlington (Iowa) Hawk-Eye,* April 16, 1897, p. 2; Clark III 79; Clark IV 103–104)

1897, April 14 — 8:00 p.m. James McKensie is feeding hogs on his farm north of Casstown, Ohio, when he hears an odd noise like a flock of geese passing overhead. Looking up, he sees an object with wings and a rudder flying slowly along about 150 feet in the air, and he distinctly hears music. As it disappears, he thinks he hears a human voice, and something large and white is thrown overboard. ("Talking Heard by the Citizens," *Cincinnati (Ohio) Enquirer,* April 16, 1897, p. 1; Clark III 79; Clark IV 103)

1897, April 14 — Just after 9:00 p.m. Farmhand John Halley and vintner Adolf Wenke see an airship land on Jefferson Street three miles west of Springfield, Illinois. They supposedly converse with one of its occupants, a bearded scientist who is outside the craft. Inside, they can see another man and a woman. The scientist says little other than "as soon as Congress recognizes Cuban belligerency his air ship would be heard from." ("Mystery Solved," *Springfield (Ill.) News,* April 15, 1897, p. 1; "A Springfield Story," *Decatur (Ill.) Evening Republican,* April 16, 1897, p. 1; "The Airship," *Bloomington (Ill.) Daily Pantagraph,* April 16, 1897, p. 6; Robert G. Neeley Jr., "1897: The Airship in Illinois," *Journal of UFO Studies,* orig. ser. 1 (1979): 49–69; Clark III 80; Clark IV 104)

1897, April 14 — Night. Many persons in Mount Vernon, Illinois, including Mayor Barton C. Wells, allegedly see an object "resembling the body of a huge man swimming through the air with an electric light on his back." ("Airship's Travels," *Cincinnati (Ohio) Commercial Tribune,* April 16, 1897, p. 1; Clark III 78; Clark IV 102)

1897, April 14 — Night. A man in Denton, Texas, is watching the stars with binoculars when he notices a shadow crossing the Moon. It is caused by a large cigar-shaped object with wings moving slowly to the southeast. In the front it has a powerful searchlight, and along the side appear a row of lighted windows. It remains in sight for 20 minutes. A woman also sees possibly the same object "bounding along through space like a balloon." ("That Wandering Airship," *Galveston (Tex.) Daily News,* April 15, 1897, p. 1; "The Air Ship Again," *Dallas (Tex.) Morning News,* April 15, 1897, p. 4; Clark III 77; Clark IV 101)

1897, April 14 — Night. The Rio Grande Railroad operator at Cresson, Texas, sees an object about 60 feet long and "resembling the top of a passenger coach in shape" with a powerful searchlight in the front and several smaller lights on the sides. It is moving to the southwest at a "terrific rate of speed" and has wings "something like that of a bat." It turns to the southeast after passing the station and disappears in the clouds after a few minutes. ("Sighting the Air Ship," *Dallas (Tex.) Morning News,* April 16, 1897, p. 5; Clark III 77; Clark IV 101)

1897, April 14 — 11:30 p.m. I. H. Woolsey, T. J. Cushman, and Edward Woods are near Shelburn, Indiana, when they witness a brilliantly illuminated airship passing overhead, about 200 feet above the ground. They describe it as barrel-shaped with a pointed front, "bound by heavy bands," and equipped with "the steering apparatus in the rear." ("Saw the Air Ship," *Terre Haute (Ind.) Evening Gazette,* April 15, 1897, p. 5)

1897, April 15 — Late evening. Telegraph repairman Patrick C. Byrnes is operating a railroad handcar about 7 miles west of Cisco, Texas, when he sees a light a little distance from the track on the south side. Knowing there is no farmhouse in the area, he goes to investigate. It is a landed cigar-shaped airship about 200 feet long and 50 feet across at its widest point. Several men are repairing its searchlight, and they tell him that the craft is loaded with several tons of dynamite for bombing Spanish troops and ships in Cuba. ("Oft-Seen Air-Ship," *Fort Worth (Tex.) Register,* April 18, 1897, p. 11; Clark III 80; Clark IV 104)

1897, April 15 — Between 7:00 and 8:00 p.m. William H. Walters watches as an object lands in a meadow less than a mile west of Birmingham, Iowa. He approaches it with a few other men, but it rises slowly with a whirring sound and sails away to the northwest. The object appears to be 100 feet long and 20 feet high, tapering at each end and carrying a large white light and two smaller red and green lights. ("Moonlight Phenomenon in Iowa," *Chicago (Ill.) Inter Ocean,* April 17, 1897, p. 2)

1897, April 15 — Night. An airship with red, green, and white lights lands on a farm near Eau Claire, Wisconsin. Five witnesses see an odd-looking man in a fur coat emerge and walk to a farmhouse belonging to Melvin Bannister, whose dogs are barking fiercely. The stranger points a lantern-like device at them and sends them running. Bannister answers the door and converses awkwardly with the man, who is speaking an odd language, but loans him a hammer, some nails, and a can of skim milk. The man returns the tools, along with a strange coin. The airship takes off with a whizzing sound. ("Brunswick and Drammen," *Eau Claire (Wis.) Leader,* April 17, 1897, p. 7; Clark III 83–84; Clark IV 108)

1897, April 15 — Night. An airship with a bright white light and two smaller red and blue lights appears about 1,500 feet in the air near Fort Snelling, St. Paul, Minnesota, moving northwest. It reverses direction and disappears. ("Seen at the Fort," *St. Paul (Minn.) Globe,* April 17, 1897, p. 8)

1897, April 15 — Night. C. A. Peckinpaugh and some 15 others see an airship land on Terry Peak southwest of Deadwood, South Dakota. It rises up and flies away before they can reach it. It is "cigar-shaped with enormous wings." ("The City," *Deadwood (S.Dak.) Weekly Pioneer-Times,* April 22, 1897, p. 2)

1897, April 15 — 8:15 p.m. Willis Mahon, ex-Marshal French, and other residents of Dunkirk, Ohio, watch a winged object "as large as a wagon bed" pass over the town toward the east. It has propellers on each end, a red light in front, and a greenish-yellow light on the tail. Voices can be heard coming from the object. ("Seen at Dunkirk," *Kenton (Ohio) News-Republican,* April 16, 1897, p. 4; "Talking Heard by the Citizens," *Cincinnati (Ohio) Enquirer,* April 16, 1897, p. 1; Clark III 77, 79; Clark IV 101, 103)

1897, April 15 — 9:00 p.m. Residents of Farmersville, Texas, notice a dim light traveling toward the city from the south at 60–80 mph. Thinking it might be a meteor heading toward the Earth, more people gather outside to watch. City Marshal Brown is in the western part of town making his rounds, and the "ship or balloon" passes overhead about 200 feet in the air. Brown can see two men in the object and something like a large Newfoundland dog. He can hear them talking but cannot understand what they are saying. ("Airship Seen in Galveston," *Galveston (Tex.) Daily News,* April 18, 1897, p. 2; Clark III 80; Clark IV 104)

1897, April 15 — 9:00 p.m. Many witnesses see a bright light like a locomotive headlight passing above Pierre, South Dakota. George Strong and James Seals can make out a dark object below the light. ("See It Often in Platte County," *Omaha (Nebr.) Daily Bee,* April 17, 1897, p. 2)

1897, April 15 — Between 9:00 and 10:00 p.m. A cigar-shaped airship with a row of red lights along the sides passes above Emerson, South Dakota. ("That Ubiquitous Airship," *Sioux City (Iowa) Journal,* April 17, 1897, p. 6; Clark III 77; Clark IV 101)

1897, April 15 — 9:30 p.m. Lawyer John Spencer Bounds is riding south of Osceola, Hill County, Texas, when a brilliant flash of light from a searchlight passes over his buggy. His horse is frightened, rears up, and nearly overturns the buggy. The light passes away from them and soon turns upward and shuts off. Looking up, Bounds sees a black, cigar-shaped object about 1,000 feet in the air with an undercarriage, from which the light had emanated. A number of incandescent lights are flashing around its lower edge. It glides along to the south and after a few miles turns the searchlight on again and shines it along the wooded banks of Aquilla Creek. The light turns off again,

and Bounds resumes his journey home to Hillsboro. ("Seen near Hillsboro," *Dallas (Tex.) Morning News,* April 17, 1897, p. 8; "Strange and Startling," *Austin (Tex.) Daily Statesman,* April 18, 1897, p. 7; Clark III 77; Clark IV 101)

1897, April 15 — Night. An airship allegedly explodes above Highland Station [now Sparks], Kansas. Amid the debris is a man named Pedro Sanchez of Cuba, who collects the wreck and ships it to St. Joseph, Missouri. ("News and Comment," *Atchison (Kan.) Daily Globe,* April 17, 1897, p. 1; Clark III 316; Clark IV 390)

1897, Mid-April — 3:00 p.m. Railroad conductor Capt. Jim Hooton is hunting near Homan, Arkansas, when he hears a loud mechanical sound like an air brake. Investigating, he discovers an airship undergoing repairs. The aeronauts are not very communicative, so once the repairs are complete, they reenter the airship and take off with a loud hissing sound. ("Saw the Air Ship," Little Rock *Arkansas Gazette,* April 22, 1897, p. 3; Clark III 80; Clark IV 104)

1897, Mid-April — Early evening. J. W. Lansing sees a cigar-shaped airship twice in Grinnell, Iowa. It moves in various directions, sometimes against a strong wind. ("He Saw It," *Springfield (Ill.) News,* April 26, 1897, p. 1; Clark III 77; Clark IV 101)

1897, Mid-April – Night. F. Crocker is sitting near the window of his apartment on Barr Street in Fort Wayne, Indiana, when he notices a yellowish light coming from the west. It seems attached to a pear-shaped object with the apex pointed downward. Two yellow rays of light come from its sides as it sways to and fro in the air. He calls R. J. (or R. T.) and J. L. Tretheway, who live in the apartment below his, and they also glimpse the object, which is in sight for 20 minutes. ("Sighted Here," *Fort Wayne (Ind.) Weekly Gazette,* April 15, 1897, p. 1; Clark III 78; Clark IV 102)

1897, Mid-April — Between 9:00 and 10:00 p.m. A man in Eldridge, North Dakota, sees an airship that looks like a car attached to a large, kite-shaped structure with wings. It stops and changes course. At one point the man is close enough to hear a humming sound. Some of the time it displays colored lights; at other times it is completely dark. ("He Saw the Air Ship," *Jamestown (N. Dak.) Weekly Alert,* April 22, 1897, p. 8; Clark III 78; Clark IV 102)

1897, April 16 — 12:03 a.m. An airship and a smaller "trailer which followed it very closely" are seen by residents of Danvers, Illinois. The objects are made of aluminum-like material, and its "occupants were dressed in western style." ("The Aerial Mystery," *Bloomington (Ill.) Daily Pantograph,* April 17, 1897, p. 5; Clark III 79–80; Clark IV 104)

1897, April 16 — 12:30 a.m. A group of people returning home from a lodge meeting in Bay City, Michigan, notice a large conical object approaching from the south and slowly descending to about 50 feet altitude above Center Avenue. A red light appears at either end of a body that is apparently 50–75 feet long. It shines with a dull red glow, as if there are lights on its upper side. The object moves away to the northeast. ("Air Ship a Reality," *Saginaw (Mich.) Courier-Herald,* April 16, 1897, p. 1; Clark III 77; Clark IV 101)

1897, April 16 — Morning. A large object passes slowly over Linn Grove, Iowa, heading north. Five men—James Evans, F. G. Ellis, Ben Buland, David Evans, and Joe Croskey—jump into a rig and follow it 4 miles north of town where it has landed. But when the pursuers get within 2,100 feet of the airship, it spreads out four massive wings and ascends again. The two occupants have extremely long beards and make desperate efforts to conceal themselves. They toss two enormous boulders "of unknown composition" out of the airship. ("More Air Ship Fakes," *Indianapolis Journal,* April 17, 1897, p. 1; Clark III 84, 87; Clark IV 108, 111)

1897, April 16 — While wandering in the hills east of Springfield, Missouri, W. H. Hopkins, a traveling insurance agent, spots a landed airship in a clearing. Next to it is a nude female with hair down to her waist. As she picks flowers, she speaks in an unknown language with a musical voice and fans herself as if the day is hot. In the shade cast by the craft lies a naked man with shoulder-length hair and a long beard. After a few minutes, Hopkins approaches the woman, who shrieks and runs toward the man. Hopkins speaks soothingly and the two aeronauts relax. Hopkins asks where they come from, and they point upward, pronouncing a word that sounds like "Mars." The two examine Hopkins's clothing, hair, and watch with great curiosity. They show him the interior of the ship but take off shortly afterward, "laughing and waving their hands." ("Golden Haired Girl Is in It," *St. Louis (Mo.) Post-Dispatch,* April 19, 1897, p. 1; Clark III 84, 1054–1055; Clark IV 108, 1170)

1897, April 16 — 8:00 p.m. Howard R. Bolander, superintendent of the Ohio Bicycle Works in Marion, Ohio, is looking at the night sky when he sees the light from a cigar-shaped object moving to the southwest. Its light looks like an incandescent lamp. ("Is Your Credulity in Condition for the Only True Airship Story?" *Marion (Ohio) Daily Star,* April 17, 1897, p. 9)

1897, April 16 — 9:30 p.m. The blacksmith in Boynton, Illinois, sees a cigar-shaped object "about 150 feet long and 50 feet wide" with two large wings and colored lights. (*Delavan (Ill.) Times,* April 22, 1897; Clark III 77; Clark IV 101)

1897, April 16 — 12:00 midnight. C. G. Williams is walking across a field two miles south of Greenville, Texas, when he comes across a brilliant light and a large, cigar-shaped object resting on the ground. Three aeronauts emerge from it; two go to work on the ship, and the third approaches Williams and asks him to mail some letters. The man tells him that the airship runs on electricity and that his invention was perfected in a small town in New York State. ("Different Colored Lights," *Galveston (Tex.) Daily News,* April 18, 1897, p. 2; "C. G. Williams Saw It," *Dallas (Tex.) Morning News,* April 19, 1897, p. 5; "C. G. Williams' Story," *Galveston (Tex.) Daily News,* April 19, 1897, p. 2; Jacobs, *UFO Controversy in America,* Signet ed., 1976, p. 9; Clark III 81; Clark IV 105)

1897, April 17 — 1:30 a.m. R. E. Draughon, a night watchman at a lumber plant in Beaumont, Texas, sees a "globular" object with a bright light the size of a star in one end. It is moving to the northwest at a high altitude. ("Night Watchman Saw It," *Galveston (Tex.) Daily News,* April 17, 1897, p. 2; "Seen at Beaumont," *Dallas (Tex.) Morning News,* April 18, 1897, p. 4; Clark III 78; Clark IV 102)

1897, April 17 — 6:00 a.m. An airship is said to collide with the tower of Judge James Spencer Proctor's windmill in Aurora, Texas, causing it to explode and strew debris over several acres. The pilot (reportedly "not of this world," or a "Martian" according to an alleged Army Signal Service officer named Thomas Jefferson Weems from nearby Fort Worth), does not survive the crash and is buried "with Christian rites" at the Aurora Cemetery. Wreckage from the crash site is either dumped into a nearby well located under the damaged windmill or ends up with the alien in the grave. Adding to the mystery is the story of Brawley Oates, who purchases Judge Proctor's property around 1935. Oates cleans out the debris from the well in order to use it as a water source, but later develops an extremely severe case of rheumatoid arthritis, which he claims is the result of contaminated water from the wreckage dumped into the well. As a result, Oates seals up the well with a concrete slab and places an outbuilding on the spot in 1945. The entire yarn is widely regarded as a hoax, although Proctor's windmill apparently did exist. (Wikipedia, "Aurora, Texas, UFO incident"; MUFON, "Aurora Texas Crash Part 1, MUFON Case File"; "A Windmill Demolishes It," *Dallas Morning News,* April 19, 1897, p. 5; Donald B. Hanlon, "Texas Odyssey of 1897," *Flying Saucer Review* 12, no. 5 (Sept./Oct. 1966): 9–10; "The Aurora, Texas Case," *APRO Bulletin* 21, no. 6 (May/June 1973): 1, 3–4; "Possible Grave of 'Airship' Pilot Sought in Old Texas Cowtown," *UFO Investigator,* June 1973, pp. 1, 3; Eileen Buckle, "Aurora Spaceman—R.I.P.?" *Flying Saucer Review* 19, no. 4 (July/Aug. 1973): 7–9; "Cemetery Vandalism Postpones Texas UFO Investigation," *UFO Investigator,* August 1973, pp. 1, 4; Walter H. Andrus, "Report on 1897 Aurora, Texas, Investigation," *Skylook,* no. 70 (September 1973): 7–9; H. Michael Simmons, "Once upon a Time in the West," *Magonia,* no. 20 (August 1985); Wallace O. Chariton, *The Great Texas Airship Mystery,* Wordware, 1991; Nigel Watson, "Down to Earth: UFO Investigation 1897 Style," *Magonia,* no. 43 (July 1992): 3–11; Kevin D. Randle, "Aurora, Texas, and the Great Airship of 1897," *Fate,* March 2003, pp. 34–36; Brian Dunning, "The Alien Buried in Texas," Skeptoid Podcast, no. 241 (January 18, 2011); Thomas E. Bullard, "Defending UFOs," *IUR* 34, no. 2 (March 2012): 8–10; "Aurora 1897," Texas UFO Museum and Research Library, February 5, 2014; Clark III 88, 316–318, 592–593; Max McNabb, "The 1897 Aurora, Texas, UFO Crash and the 'Alien' Buried in the Cemetery," Texas Hill Country, January 8, 2019; Mutual UFO Network, "Aurora, TX Crash, 1897," May 14, 2021; Clark IV 111–112, 390–392, 652)

1897, April 17 — Sam McLeary is riding along Forked Deer River near Dyersburg, Tennessee, when he allegedly sees a crashed airship in the woods. Its lone occupant is encased in ice, as he has apparently "succumbed to the pitiless cold" of the upper atmosphere." ("Fell in Gibson County," *Nashville (Tenn.) American,* April 16, 1897, p. 2; Clark III 316; Clark IV 390)

1897, April 17 — Evening. Several people see a cigar-shaped object with white, red, and green lights pass about 500 feet above Derry, Pennsylvania. It seems to have a car hanging about 10 feet below it. ("The Air Ship at Derry," *Indiana (Pa.) Weekly Messenger,* April 21, 1897, p. 2)

1897, April 17 — 8:30 p.m. A large white light attached to a cigar-shaped object passes over Trenton, Tennessee, at an altitude of about 1,500 feet. It has a red light on the left side and a green light on the right. The object remains in sight for 5 minutes then disappears to the east. ("Trenton Has 'Em," *Memphis (Tenn.) Commercial Appeal,* April 18, 1897, p. 4; Clark III 77; Clark IV 101)

1897, April 17 — 9:00 p.m. George Alverson, Alex Oxford, and Charley Hunter are walking on Manchester Street near the Cincinnati Southern Railway trestle bridge in Lexington, Kentucky. An airship lands and settles in a vacant lot about 600 feet away. They hurry forward but are stopped by a man who has just emerged from the machine. He is carrying a bucket, which he fills with water from a nearby spring. He declines to answer any of their questions, reenters the airship, and flies away to the southeast. ("Talked with the Airship Man," *Cincinnati (Ohio) Enquirer,* April 19, 1897, p. 5; Clark III 80; Clark IV 104)

1897, April 18 — 8:30 p.m. W. E. Roe, captain of the Ohio River packet *T. M. Barnsdall,* as well as watchman Elmer Hardy and engineer Litus Kinnard, sees a light high in the air above the river as the riverboat is lying at

Sistersville, West Virginia. It seems to be moving to the northwest but at other times it retraces its course. Around 12:00 midnight it disappears over a hill to the west. ("The Airship Seen near Marietta," *Marietta (Ohio) Daily Register,* April 19, 1897; "That Air Ship: Prominent Steamboatman Observed It," *Parkersburg (W.Va.) Sentinel,* April 20, 1897, p. 1; "Hovered over the Town," *Cincinnati (Ohio) Commercial Tribune,* April 20, 1897, p. 2)

1897, April 18 — 9:30 p.m. An object with a bright light and propellers is seen southeast of Lyons, Nebraska, traveling to the northwest. Some young observers estimate it is moving at 4–6 mph. One witness using opera glasses sees a "large man muffled in a great coat, apparently presiding over some kind of a steering apparatus." When the object is south of Bancroft it makes 2–3 large circles and then moves to the southwest. ("Airship's Lamp Is Lighted," *Omaha (Nebr.) Daily Bee,* April 20, 1897, p. 5; "Saw the Air Ship," Lyons (Nebr.) *Logan Valley Sun,* April 21, 1897, p. 1; Clark III 80; Clark IV 104)

1897, April 19 — 1:30 a.m. As people are returning from a party at the Armory Hall in Natchitoches, Louisiana, they see a bright light attached to a massive airship in the form of a balloon with a cigar-shaped undercar. The light dims while it is over the city and intensifies again when it has passed beyond it. It moves in undulations and is visible for 30 minutes. ("The Airship Seen in Louisiana," *New Orleans Daily Picayune,* April 21, 1897, p. 6)

1897, April 19 — 2:00 a.m. A man in El Paso, Texas, sees a cigar-shaped object with lighted portholes on each side. The object approaches from the east and passes overhead at 500 feet. Voices from the craft are heard. ("The Air Ship Seen in El Paso," *El Paso (Tex.) Herald,* April 20, 1897, p. 4)

1897, April 19 — 6:00 a.m. A farmer sees an airship descend in a wooded area near Elysian, Minnesota. He runs toward it and sees three men inside, but it ascends abruptly. (*Mankato (Minn.) Review,* April 20, 1897; Clark III 80; Clark IV 104)

1897, April 19 — 12:00 noon. George Dunlap, a man known to Davis H. Tucker, physician at the Harlem Prison Farm [now the Jester State Prison Farm] in Fort Bend County, Texas, is riding in the country near Lake Charles, Louisiana, when he sees an airship moving toward him about half a mile distant. It makes a loud whistling noise, scaring his horses and causing him to be thrown from the buggy. As the horses flee, the ship lands, a rope comes down, and two men rush over to apologize. They are the owner Mr. Wilson (formerly of Fort Worth, Texas) and his friend Scott Warren. The man is taken into the airship and introduced to two others, a Mr. Waters and a Hispanic man. Wilson tells him the airship is sustained by a gas, and that several of them have been built. ("Was Aboard an Airship," *Dallas (Tex.) Morning News,* May 16, 1897, p. 18; Clark III 81; Clark IV 105)

1897, April 19 — 9:00 p.m. A bright light moves from the northwest over Cochransville [now a ghost town], Monroe County, Ohio, where it hovers for 20 minutes, flashing red, white, and green lights. Through binoculars a cone-shaped object with large fins on either side can be discerned. It is apparently 180 feet long. ("Hovered over the Town," *Cincinnati (Ohio) Commercial Tribune,* April 20, 1897, p. 2; "Swear They Saw the Airship," *Washington (D.C.) Times Herald,* April 20, 1897, p. 5; Clark III 77; Clark IV 101)

1897, April 19 — 10:30 p.m. Rancher Alexander Hamilton, his son Will, and his hired hand Gid Heslip are awakened by a noise in the cattle pen of their ranch at Yates Center, Kansas. They watch as a 300-foot-long, cigar-shaped airship with a carriage underneath descends to about 30 feet above the ground. Two men, a woman, and three children are heard talking in the carriage. They see a calf caught in a nearby fence with a cable knotted around its neck that connects to the airship above. They cut the cable and the airship floats away. A few weeks later, Hamilton admits he made the story up. ("Air Ship Takes a Cow!" *Yates Center (Kan.) Farmers Advocate,* April 23, 1897, p. 5; "Air Ship Steals a Calf," *Kansas City (Mo.) Times,* April 27, 1897, p. 1; "The Air Ship in Kansas," *Atchison County (Mo.) Mail,* May 7, 1897, p. 1; Jerome Clark, "The Great Airship Hoax," *Fate* 30, no. 2 (February 1977): 94–97; Jerome Clark, "Some Clarifications on the Leroy, Kansas, Calfnapping Hoax," *Pursuit* 10, no. 1 (Winter 1977): 17–18; Jerome Clark, "The Leroy, Kansas, Calfnapping Hoax of 1897," *Flying Saucer Review* 22, no. 6 (April 1977): 26; "Revelations in 1897 Kansas 'Calfnapping,'" *APRO Bulletin* 25, no. 12 (June 1977): 7–8; Daniel Cohen, *The Great Airship Mystery,* Dodd, Mead, 1981, pp. 92–102; Clark III 86–87, 130, 593; "Cigar-Shaped UFO Abducting a Cow Was Witnessed in 1897 by Kansas Rancher Alexander Hamilton and Others," Eyes on Cinema YouTube channel, November 18, 2023; Clark IV 110–111, 157, 652–653)

1897, April 19 — After 11:00 p.m. John R. Ligon, an agent for a brewery in Houston, and his son Charley notice lights in a pasture a few hundred yards away near Beaumont, Texas. They walk over and discover four men moving around a large dark object, who ask for water. They accompany Ligon to his house, each bringing two baskets, which they fill and return. One of the men identifies himself as "Wilson" and says they are traveling in a flying machine that has been over the Gulf of Mexico and is now headed toward Iowa. Ligon says the airship is 130 feet long and 20 feet wide, propelled by four large wings and powered by electricity. Wilson gives Ligon a tour of the ship and says it is one of five built in a small Iowa town. Rabbi Aaron Levy of Beaumont also claims to have met aeronauts from a landed airship near the city around the same time. ("Inspected the Air Ship," *Houston (Tex.) Daily Post,* April 21, 1897, p. 2; "The Airship," *New Orleans Daily Picayune,* April 25, 1897, p. 7; "Topics of the

Times," *New York Times,* April 28, 1897, p. 8; Jerome Clark, "Mystery Aeronauts of Texas," *IUR* 33, no. 3 (December 2010): 5–6; Jerome Clark, "Mr. Wilson and the Aeronauts of 1897," *Fortean Times* 362 (January 2018): 38–43; Clark III 81–82; Clark IV 105–106)

1897, April 19 — Around 12:00 midnight. F. R. Pryor, James Freels, and William Barnes watch an airship approach from the northeast and land near Pryor's residence on Shoal Creek near Cowgill, Missouri. It remains there a few minutes, then takes off to the northwest. It has a bright-white headlight and two green and red lights. ("The Air Ship Seen," *Hamilton (Mo.) Farmer's Advocate,* April 28, 1897, p. 1)

1897, April 20 — Henry Heintz of Elkton, South Dakota, patents an airship consisting of a cigar-shaped balloon and a structure for passengers beneath it. In April 1900, he brings his invention out for a test flight in front of the Elkton blacksmith shop. The airship rises 8 feet into the air before plopping to the ground. (US Patent, "Air Ship," granted April 20, 1897; "South Dakota Airship Proves a Flat Failure," *Sioux Falls (S.Dak.) Argus-Leader,* April 16, 1900, p. 3; Henry Heintz, "Heintz's New Flying Machine," *The Aeronautical World* 1, no. 8 (March 2, 1903): 171–172; Richard T. Read and David Rambow, "Hydrogen and Smoke: A Survey of Lighter-Than-Air Flight in South Dakota Prior to World War I," *South Dakota History* 18, no. 3 (1988): 132–151; Ruth Becken, *A History of Elkton,* [City of Elkton,] 2000, p. 94; Jerome Clark, "Mr. Wilson and the Aeronauts of 1897," *Fortean Times* 362 (January 2018): 42; "Hero the Elephant and the Heintz Airship," Roadside America, January 31, 2023)

1897, April 20 — 2:00 a.m. Charles McGar, night operator of the Southern Pacific Railroad, sees an airship at Sabinal, Texas, flying toward the west at about 300 feet with a whirring sound. ("An Operator Saw It," *Galveston (Tex.) Daily News,* April 23, 1897, p. 3)

1897, April 20 — 9:20 a.m. A Mrs. Burkhardt of Columbia Heights on the southwest side of Massillon, Ohio, sees a "new fangled kite" in the air and points it out to her neighbor, Mrs. Case. They notice it has a large sail and is propelled by a wheel, like a windmill's, at the rear. Mrs. Case's son Bert thinks the object is flying at 1,500–2,000 feet altitude. Frank Reed finds a letter on his premises, dated today, from a William R. Harris "on board airship, bound for Cuba." ("Neighbors All Saw It," *Toledo (Ohio) Blade,* April 21, 1897, p. 2; "They Saw the Air Ship," *Massillon (Ohio) Independent,* April 22, 1897; "More Air Ship Talk," *Massillon (Ohio) Independent,* April 22, 1897, p. 5)

1897, April 20 — 10:00 p.m. Sheriff Henry W. Baylor of Uvalde, Texas, sees a bright light and hears strange voices behind his house. He finds a landed airship and its crew of three men, one of whom is named "Wilson" (from Goshen, New York), who inquires after an acquaintance, C. C. Akers of Eagle Pass, Texas. After procuring water from a hydrant in Baylor's yard, the men board the airship, which speeds away northward toward San Angelo. County Clerk Henry J. Bowles sees the airship as it passes over Getty Street in Uvalde. Akers tells a reporter in Galveston that he knew a New Yorker named Wilson when he lived in Fort Worth in 1876–1877. Baylor's seemingly compelling testimony disintegrates after he confesses in late May to making the whole story up, possibly in collusion with Akers. ("The Airship in West Texas," *Galveston (Tex.) Daily News,* April 24, 1897, p. 3; "The Airship at Uvalde," *Weimar (Tex.) Mercury,* May 1, 1897, p. 6; "Airship Story Exploded," *Weimar (Tex.) Mercury,* May 22, 1897, p. 7; Jerome Clark, "Mystery Aeronauts of Texas," *IUR* 33, no. 3 (December 2010): 6–7; Jerome Clark, "Mr. Wilson and the Aeronauts of 1897," *Fortean Times* 362 (January 2018): 40–41; Clark III 82–83; Clark IV 106–107)

1897, April 21 — 12:30 a.m. An employee of the *Picayune* newspaper in New Orleans, Louisiana, steps outside the office and sees an airship, 50–60 feet long and bearing a powerful searchlight. He returns to tell his colleagues, but by the time they come out, the airship is gone. ("The Airship," *New Orleans Picayune,* April 21, 1897, p. 9)

1897, April 21? — 8:00 p.m. A man is riding his horse between Lancaster and Baltimore, Ohio, when something scares his horse. He sees an object with two brilliant white lights on either end landing in a nearby field. He tethers his horse and approaches the object, which seems as large as a house. Inside he can see two men conversing, so he walks up to ask them questions. One of the aeronauts seems to be Japanese and the other speaks English with a British accent. The craft is called the *Aeribarque,* and they are on a test flight. The aeronaut says that they often land in remote areas and come to nearby towns for supplies or mechanical parts, posing either as tourists or "harmless cranks trying to invent perpetual motion." After giving the witness a demonstration of the electrical lighting system, they take off into the sky. ("Aeribarque, That's It's Official Name," *Cincinnati (Ohio) Enquirer,* April 25, 1897, p. 9)

1897, April 21 — Night. Witnesses near Bluffton, Indiana, see an airship with pointed ends "fully a mile high." It is visible moving to the northeast for 8–10 minutes. ("It Is Seen Again," *Bluffton (Ind.) Chronicle,* April 28, 1897, p. 1; Clark III 77; Clark IV 101)

1897, April 21 — 11:00 p.m. Confectioner John S. Scheer, Frank King, and Frank Mulick of Erie, Pennsylvania, watch a cigar-shaped, winged object moving north at a relatively high rate of speed. It has a large propeller on its tail end,

but it flies silently and disappears over Lake Erie. ("Passed over Erie," *Erie (Pa.) Daily Times,* April 22, 1897, p. 8; Clark III 77; Clark IV 101)

1897, April 22 — 7:30 p.m. Prominent citizens, including the mayor, observe a low-flying airship heading slowly southwest above Kenly, North Carolina. Its sails "resembled mosquito netting to the naked eye." The outlines of two people aboard are plainly visible. ("Men Seen in the Airship," *Raleigh (N.C.) News and Observer,* April 25, 1897, p. 4; Clark III 80; Clark IV 104)

1897, April 22 — 10:10 p.m. A ball of fire is seen moving slowly and horizontally from southwest to northeast over Kokomo, Indiana. Some people can distinguish the faint outlines of a cigar-shaped object and wings. The light is white with a reddish tint and no more than 300 feet in altitude. The witnesses include Harry M. Grimes, William E. Sollenberger, and banking executive Frank McCarty. ("The Mysterious Air Ship," *Kokomo (Ind.) Daily Tribune,* April 23, 1897, p. 4; Clark III 77; Clark IV 101)

1897, April 22 — 11:00 p.m. John M. Barclay wakes up when he hears a whirring noise that causes his dogs to bark wildly outside his home near Rockland, Texas. He goes outside and sees an oblong airship with wings and brilliant lights. When he first sees it, the object is hovering 150 feet above the ground. It circles a few times then lands in a nearby pasture. Barclay goes down to investigate with his Winchester rifle, but the lights go out as he gets closer. Some 90 feet away from the airship he is stopped by a man who asks him to put his rifle down. He identifies himself as "Smith" and gives Barclay $10 to purchase lubricating oil, two chisels, and bluestone. When Barclay returns with the materials, the aeronaut will only say he is from "anywhere," adding that "we will be in Greece tomorrow." ("Supplies for Airship," *Houston (Tex.) Post,* April 25, 1897, p. 13; Clark III 80; Clark IV 104)

1897, April 22 — 12:00 midnight. Frank Nichols, a farmer living 2 miles east of Josserand, Texas, is awakened by a whirring noise. Outside, he sees a huge airship in his cornfield. Before he can get close, two men with buckets ask him if they can draw water from his well. Nichols consents and in return they give him a tour of the vessel, whose motive power is "highly condensed electricity." One aeronaut tells him that five airships have been built in an Iowa town. ("That Airship," *Houston (Tex.) Post,* April 26, 1897, p. 2; Clark III 82; Clark IV 106)

1897, April 23 — Morning. An object like a floating balloon is seen flying southeast down the Potomac River in Washington, D.C., by officers and soldiers at Fort Myer, Virginia, and officials of the Analostan Boat Club. Those with binoculars can see that it has two hulls coupled together, hanging vertically and rocking from side to side. It gradually disappears from view into the hills. ("The Airship Again," *Salem (Ohio) Daily News,* April 24, 1897, p. 5)

1897, April 23 — Night. Henry A. Hooks and A. W. Hodges of Kountze, Texas, allegedly meet two aeronauts named Wilson and Jackson when their airship suffers a gas leak and lands. ("That Airship," *Houston (Tex.) Post,* April 25, 1897, p. 5; Clark III 82; Clark IV 106)

1897, April 24 — An airship in need of repairs lands near Stringers Ridge on the other side of the river from Chattanooga, Tennessee. An unnamed journalist talks to one of the aeronauts, who identifies himself as Prof. Charles Davidson of Sacramento, California, the inventor of the airship, which can travel as fast as 93 mph. ("Is This a Reality?" *Knoxville (Tenn.) Morning Tribune,* April 25, 1897, p. 1; Clark III 80; Clark IV 104)

1897, April 24 — 11:00 p.m. Howard Warn is outside his home in Toledo, Ohio, when he notices bright, multicolored lights moving rapidly toward the southwest. The lights are attached to a cigar-shaped object at an altitude of 500 feet. He calls his father, Milo S. Warn, and they watch the lights until the object disappears into heavy clouds to the southwest. ("Say They Saw the Airship," *Cleveland (Ohio) Plain Dealer,* April 28, 1897, p. 5; Clark III 77; Clark IV 101)

1897, April 25 — Evening. As some residents of Merkel, Texas, are leaving a church service, they notice a heavy, anchor-shaped object being dragged by a large rope that is attached to an airship in the sky not far above them. After 10 minutes, a small figure dressed in a blue sailor suit starts climbing down the rope. But when he sees people watching him, he cuts the rope and returns to the airship, which moves away to the northeast. The anchor goes on exhibit at a local blacksmith shop. ("Anchor of the Airship," *Houston (Tex.) Post,* April 28, 1897, p. 5; Clark III 84; Clark IV 108)

1897, April 25 — Night. William F. Whittier, editor of the *Sunbury (Ohio) News-Item,* sets up his camera in the printing office to take lightning photographs. He manages to take a photo of a nearby lightning strike and develops it the following morning. The negative shows not only the lightning but the outline of what seems to be an airship. Whittier makes many copies of the photo and sells them to Sunbury residents. ("Fairy Story: A Sunbury Editor Takes a Photograph," *Dayton (Ohio) Daily Journal,* April 28, 1897)

1897, April 25 — After 12:00 midnight. An airship allegedly passes over San Antonio, Texas. The newspaper makes the unfounded claim that it is piloted by Hiram Wilson of New York and C. J. Walsh of San Francisco, its inventors. (*San Antonio (Tex.) Express,* April 26, 1897; Clark III 83; Clark IV 107)

1897, April 28? — 8:00 p.m. Hiram C. LaGrone hears a disturbance among his horses on his ranch at Deadwood, Texas. Stepping outside, he sees a brilliant, multicolored light approaching from the southwest. It slows, hovers, then lands in a field. LaGrone walks up and discovers five men, two of whom take rubber bags and procure water from his well. The other three tell him that this is one of five airships touring the country (and the same one that landed in Beaumont on April 19). ("The Airship," *Houston (Tex.) Post,* April 30, 1897, p. 7; Clark III 82–83; Clark IV 106–107)

1897, May 2 — 1:00 a.m. Edwin Shaffer is driving a rig about one-half mile west of Cassville, Indiana, when he encounters a landed airship 40 feet long. The object spooks his horse, which will not run past it. Shaffer claims the airship is crewed by midgets who speak no English. ("The Air Ship at Cassville," *Kokomo (Ind.) Daily Tribune,* May 4, 1897, p. 8; Clark III 84; Clark IV 108)

1897, May 4 — 9:00 p.m. Louis Dumhoff, a physician living at 112 Garfield Place in Cincinnati, Ohio, sees a red, egg-shaped light, "the rays escaping in the center and at each end." It passes to the southeast in about 5 minutes, moving in a zigzag, up-and-down course. Conductor J. C. Gaupel and attorney W. J. Klein also see the light in the same neighborhood. ("Airship," *Cincinnati (Ohio) Enquirer,* May 5, 1897, p. 7; Clark III 78; Clark IV 102–103)

1897, May 6 — During a rainstorm five miles west of Hot Springs, Arkansas, Deputy Sheriff John McLemore and Constable John J. Sumpter Jr. see a light in the sky descend behind a hill one half-mile away. After seeing two persons carrying lights, they draw their rifles and demand to know who is there. A man with a long, dark beard tells them that he and two others are traveling around the country in an airship and hope to end up in Nashville, Tennessee. He invites the officers to take a ride and transport them to somewhere dry, but they tell him they prefer to get wet. They return to the spot 40 minutes later and the airship is gone. ("Swore They Saw It," Little Rock *Arkansas Gazette,* May 9, 1897, p. 1; "Swear They Saw It," *Arkadelphia (Ark.) Southern Standard,* May 14, 1897, p. 2; Clark III 80–81; Clark IV 104–105)

1897, May 8 — 8:00 p.m. An airship with a brilliant light speeds above Cincinnati, Ohio, from the southeast to the northwest at a high altitude and an estimated 100 mph. ("Another Air Ship," *Fort Wayne (Ind.) Journal Gazette,* May 9, 1897, p. 5)

1897, May 9 — 8:00 p.m. Abe Parker of Norwalk, Ohio, sees an object with 10–12 bright white and red lights moving slowly over the town for about 10 minutes. Other witnesses report hearing music coming from it. An unnamed young witness, who follows the object out of town for about one mile after it passes over Main Street, says the shadow cast by the object is round. ("That Airship Again," *Cleveland (Ohio) Plain Dealer,* May 11, 1897, p. 3; Clark III 78–79; Clark IV 103)

1897, May 11 — 10:00 a.m. John E. Hopley is one of a small group of people in Sandusky, Ohio, who watch a "fleecy white bulk" floating far away to the west. Through binoculars the object looks like a white bird with long black wings. Hopley guesses that it is 1–2 miles high, 20 miles away, and 60–80 feet long. ("The Air Ship: John E. Hopley Sees This Modern Invention," *Bucyrus (Ohio) Evening Telegraph,* May 11, 1897, p. 4)

1897, July 4 — 7:45 p.m. Hundreds of witnesses in Lexington, Kentucky, see a lighted object silhouetted against a storm cloud in the southwest moving to the north at 500 feet altitude. When it nears the city, the light goes out and it disappears after passing over the western part of the city. ("The Air Ship or Its Twin Brother Passes over Lexington," *Lexington (Ky.) Morning Herald,* July 5, 1897, p. 5; Clark III 84; Clark IV 108–109)

1897, July 29 — Sunset. Farmer Andrew Henderson sees a large, unlighted, oblong object with a suspended car and a huge sail drifting to the northeast over his farm three miles from Whitemouth, Manitoba. He estimates it is only a half-mile away. ("Could It Be Andree?" Winnipeg *Manitoba Free Press,* July 31, 1897, p. 1; "Big Balloon Story," Winnipeg *Manitoba Free Press,* August 2, 1897, p. 1; Clark III 85; Clark IV 109)

1897, August 24 — 6:45 p.m. A balloon with an attached car is seen moving steadily southwest above Asheville, North Carolina, by Dr. Willard P. Whittington, Harry Batterham, and J. B. White who are standing on Grove Street. It is about one mile in altitude. ("Maybe It Was Andree on His Return?" *Charlotte (N.C.) Observer,* August 27, 1897, p. 3; Clark III 85; Clark IV 109)

1897, August 28 — 3:00 a.m. Luther Myers hears dogs barking outside his home in Carlisle, Pennsylvania. When he looks through the window, he sees a rapidly moving airship with a light on each end. It has a propeller and rotates as it moves forward. ("Our Closeby Neighbors," *Chambersburg (Pa,) Valley Spirit,* September 1, 1897, p. 5; Clark III 85; Clark IV 109)

1897, September 7 — 2:00 p.m. V. H. Hollingsworth and his family in Ellsworth (between Sherman and Denison), Texas, see an unusual object approaching from the east. It has a fan-like wheel on front and fin-like projections on the side. ("The Air Ship," *Marshall (Tex.) Evening Messenger*, September 9, 1897, p. 2; Clark III 85; Clark IV 109)

1897, November 2 — 12:45 p.m. Engineer Charles W. West sees a balloon of unusual size passing southwest above Dartmouth, Nova Scotia. It looks like an inclined cylinder with rounded ends and has a car suspended from it. After 20 minutes it passes out of sight. ("Saw the Man Who Saw the Ship," *Boston Daily Globe*, November 5, 1897, p. 3; "May Have Been Geese," *Meriden (Conn.) Record-Journal*, November 5, 1897, p. 1; Clark III 85; Clark IV 109)

1897, November 13 — Early morning. Jeremiah MacDonald is returning to his home in Binghamton, New York, when a blinding light flashes and something plows into the ground near his house. It proves to be a meteorite. Curious locals break it open and find "curious marks that some think to be characters," perhaps from another planet like Mars. ("Message Perhaps from Mars," *New York Times*, November 14, 1897, p. 1; "Wiggins on the Aerolite," *New York Times*, November 18, 1897, p. 5; Clark III 318; Clark IV 392–393)

1897, November 19 — 11:00 p.m. A telegraph operator in Kellogg, Iowa, sees a bright, bluish light moving rapidly to the southwest. He notifies the operator at Colfax, Iowa, and people in the depot there also see it. ("See the Airship," *Chicago (Ill.) Chronicle*, November 20, 1897, p. 2; Clark III 85; Clark IV 109)

1897, December 5 — Early morning. Engineer John J. Hussey and fireman John Henderson of the Great Northern Railroad in northern Minnesota see a "large, white long light which seemed surrounded by some dark objects" near Deerwood. Other employees of the Great Northern and Northern Pacific railways also view the light. ("Was It an Air-Ship," *Saint Paul (Minn.) Globe*, December 7, 1897, p. 2; Clark III 85; Clark IV 109)

1898

1898 — English author H. G. Wells publishes *The War of the Worlds*, one of the earliest stories to portray a conflict between humans and an extraterrestrial race. The novel is the first-person narrative of both an unnamed protagonist in Surrey and his younger brother in London as southern England is invaded by Martians. (Wikipedia, "*The War of the Worlds*")

1898, January 10 — 9:00 p.m. Residents of Rome, Georgia, watch a blue light "attached to some dark and indistinguishable object" as it flies from the northwest to the east. ("Star-Gazing in Rome," *Atlanta (Ga.) Constitution*, January 11, 1898, p. 4; Clark III 85; Clark IV 109)

1898, February 4 — Mid-day. The postmaster of Greifswald, Mecklenburg-Vorpommern state, Germany, and 11 other persons see an object crossing the Sun's disk. They watch the object approach the Sun for 15 minutes, take one hour to pass, and stay visible for another hour until clouds obscure it. (Martin Brendel, "Ueber ein 1898 Febr. 4 in Greifswald beobachtetes Phänomen," *Astronomische Nachrichten* 145 (1898): 333–334)

1898, April 4 — Night. People in Niles, Michigan, see an airship with red and blue lights. It returns for the next three nights. ("The 'Airship' at Niles," *Delphos (Ohio) Herald*, April 9, 1898, p. 1; Clark III 85; Clark IV 109)

1898, May 2 — Dusk. Bystanders in front of the Pearson building in downtown New Castle, Pennsylvania, notice a bright arc light moving in from the southwest just below the clouds and remaining visible for 5 minutes. ("A Mysterious Light," *New Castle (Pa.) News*, May 4, 1898, p. 10; Clark III 85; Clark IV 109)

1898, early June — Evening. Several people in Chippewa Falls, Wisconsin, observe an object that looks like an "illuminated board," 16 feet long by 9 inches broad, suspended in the air. The light has a "lurid, glaring nature." ("Neighborly Chit-Chat," *Centralia (Wis.) Enterprise and Tribune*, June 11, 1898, p. 8)

1898, June 1 — 8:30 p.m. Harry McCandliss is riding in the country near Emporia, Kansas, when he sees a cigar-shaped object flying toward the northwest at about 300 feet. It is suspended from a balloon and is peppered with electrical lights. At one point the lights go out then reappear. A searchlight beam in the front skitters in different directions. It ascends to 600 feet and is lost to view. ([News note], *Emporia (Kan.) Gazette*, June 2, 1898, p. 4; Clark III 85; Clark IV 109)

1898, October 4 — 9:00 p.m. A brilliant object passes over Italy, Greenville, Garland, and Blossom, Texas. Initially moving in an easterly direction, it seems to change course and shoot upwards then burst, throwing out three distinct objects, one red, the other white, and the last one blue. The red and blue lights die out, but the white one continue a few seconds before it too bursts, emitting a shower of sparks. Blossom merchant Dick Moore says the light is so glaring that he thinks his "house was falling on him." About 2.5 miles north of Sherman, 12-year-old George Campbell is riding with his father when they see the fireball descending, apparently coming as close as 3 feet above the ground before moving upward; they can hear a buzzing noise and think the object is about 10 feet in diameter. ("Aerial Phenomena in Texas," *Dallas (Tex.) Morning News,* October 5, 1898; "Aerial Phenomena in Texas," *Galveston (Tex.) Daily News,* October 6, 1898, p. 6; "Thrilling Sight," *Yoakum (Tex.) Daily Herald,* October 6, 1898, p. 2; "A Bright Meteor," *Denton County (Tex.) News,* October 6, 1898, p. 8; "The Meteor," *Dallas (Tex.) Morning News,* October 7, 1898; "Aerial Phenomena," *Caldwell (Tex.) News-Chronicle,* October 7, 1898, p. 5; "Thrilling Sight," *Dublin (Tex.) Progress,* October 7, 1898, p. 3; "Thrilling Sight," *Jacksonville (Tex.) Banner,* October 7, 1898, p. 3; "Thrilling Sight," *Cisco (Tex.) Round-Up,* October 8, 1898, p. 8; Theo Paijmans, "High Strangeness in Texas," *Fortean Times* 286 (May 2012): 30)

1898, October 4 (or 3) — Night. At Fort Washita, Oklahoma, Mrs. William Peveto (possibly Mary Peveto) watches a fireball (probably the same one as October 4) descend. A few minutes later, distracted by the meteor, she is standing in her kitchen when a "female ghost" appears and chats with her for a few minutes, saying that if she would follow her, she will lead her to a fortune. Peveto becomes terrified, and the entity flees through a closed door. The entity visits her again on other nights, again talking about treasure in the basement. They continue until February 1899 when they occur nightly. At one point the ghost claims to have been murdered years ago in Fort Washita and shows her strangle marks around her neck. Poltergeist phenomena (tables moving) occur and a male ghost also talks to her. Peveto becomes ill and apparently moves away from the place. ("Ghosts at Old Fort Washita," *Dallas (Tex.) Morning News,* October 20, 1898; "Old Fort Washita Ghosts: Mrs. Peveto Contributes Another Uncanny Chapter to the Record," *Dallas (Tex.) Morning News,* March 26, 1899; Theo Paijmans, "High Strangeness in Texas," *Fortean Times* 286 (May 2012): 30–31)

1899

1899 — Serbian-American inventor Nikola Tesla is working in his laboratory near Colorado Springs, Colorado, when he observes unusual signals from his receiver that he speculates are communications from another planet. He mentions them in a letter to a reporter in December 1899 and to the Red Cross Society in December 1900. Reporters treat it as a sensational story and jump to the conclusion Tesla is hearing signals from Mars. In 1901, Tesla writes that it has not been immediately apparent to him that he is hearing "intelligently controlled signals" and that the signals could have come from Mars, Venus, or other planets. It is possible that he is intercepting Guglielmo Marconi's European experiments in July 1899—Marconi may have transmitted the letter S (dot dot dot) in a naval demonstration, the same three impulses that Tesla hinted at hearing in Colorado; signals from another experimenter in wireless transmission; or "whistlers," very low frequency radio waves generated by lightning flashes. Brian Dunning of the *Skeptoid* podcast attributes Tesla's signals to pulsars, which are not identified until 1968. (Nikola Tesla, "Talking with the Planets," *Colliers Weekly* 26 (February 9, 1901): 4–5; Margaret Cheney, *Tesla: Man Out of Time,* Dorset Press, 1989 ed., pp. 111–113; Daniel Blair Stewart, *Tesla: The Modern Sorcerer,* Frog, 1999, p. 372; Michael D. Swords, "Radio Signals from Space, Alien Probes, and Betty Hill," *IUR* 29, no. 4 (July 2005): 11; W. Bernard Carlson, *Tesla: Inventor of the Electrical Age,* Princeton University, 2013, p. 315; Brian Dunning, "The Black Knight Satellite," Skeptoid podcast, no. 365, June 4, 2013)

1899 — Swiss psychologist Carl Jung investigates his 15-year-old cousin, Hélène Preiswerk ("S.W."), in Basel, Switzerland, who claims to be a spiritualist medium. Her trances frequently involve journeys to other planets. She claims that Martians have flying machines, and they irrigate the land with canals and artificial lakes. (Hilary Evans, "Martians of the 1890s," *IUR* 11, no. 5 (Sept./Oct. 1986): 7–8)

1899, Mid-January — Late night. People returning from a dance near McMahan, Texas, see a group of stars in formation, moving in one direction. A few miles further east, hunters camping on a hilltop see the full outline of an airship with headlights and windows. (*Dallas (Tex.) News,* January 25, 1899; Clark III 85–86; Clark IV 109–110)

1899, January 26 — 11:00 p.m. People outside the opera house in McAlester, Oklahoma, watch an airship "like a railway car suspended from a large balloon-like arrangement" pass overhead. It shines a bright searchlight along the ground. ([News note], *Garfield County (Okla.) Democrat,* February 9, 1899, p. 4; Clark III 86; Clark IV 110)

1899, April 8 — After farmer Phineas Ewing notices eggshells falling around him in Armstrong Township, Indiana, he looks up and sees a flying machine or balloon. ("Egg Shells Fall from the Skies," *Evansville (Ind.) Courier and Press*, April 9, 1899, p. 1; "Farmer's Strange Story," *Bremen (Ind.) Enquirer*, April 21, 1899, p. 7; Clark III 77; Clark IV 101–102)

1899, June 1 — Late evening. Observers in Kamen-Rybolov, Primorsky Krai, Russia, see a blue sphere about 28 inches in diameter flying silently from south to north near the steamboat *Kazak Ussuriyskiy* moored on Lake Khanka. It is seen for 20 minutes, then it returns later in the evening flying north to south at greater speed, disappearing 11 minutes later. (Stonehill and Mantle, *Russia's USO Secrets,* Flying Disk, 2020, p. 113)

1899, July 4 — 4:30 p.m. A mystery balloon floats across the sky in Spokane, Washington, from southwest to northeast. Before it disappears, it ascends so high that "nothing but a small black ball far up in the heavens could be discerned." ("Who Owns the Big Balloon?" *Spokane (Wash.) Chronicle*, July 5, 1899, p. 2; Clark III 86; Clark IV 110)

1899, October — Midnight. Physician Malcom McKinnon is driving home to Fosston, Minnesota, in his carriage when a dazzling ball of white light crosses the road ahead about one-quarter of a mile away, lighting up the road like daylight. It resembles an electric arc lamp and moves slowly from north to southeast about 3 feet above the ground, throwing the field furrows into visible relief. As it passes closer, McKinnon sees that it is clearly "disk shaped, about the size of an umbrella." It is in sight for 30 minutes. ("Dr. McKinnon 'Saw Things,'" *Minneapolis (Minn.) Journal*, October 25, 1899, p. 4; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 239–251)

1900

1900 — Psychic medium Catherine-Elise Müller (under the pseudonym "Hélène Smith") of Geneva, Switzerland, becomes famous with the publication of *Des Indes à la Planete Mars* (*From India to the Planet Mars*) by Théodore Flournoy, professor of psychology at the University of Geneva. The medium and the psychologist remain very close until 1900, when the book is first published, documenting her various series of somnambulatory trances in which she experiences a civilization on Mars, its technology, landscape, flora, and fauna, and her former lives: the "Martian" cycle, "Ultramartian" cycle, "Hindu," "Oriental," and "royal" cycles. Müller learns to speak, read, and write what she claims is the Martian language, writing out the Martian communications on paper and translating them into French, thus popularizing automatic writing. Flournoy concludes that her Martian language has a strong resemblance to Müller's native French and that her automatic writing involves "romances of the subliminal imagination, derived largely from forgotten sources (for example, books read as a child)." (Théodore Flournoy, *From India to the Planet Mars: A Study of a Case of Somnambulism with Glossolalia*, Harper & Brothers, 1900; Victor Henry, *Le Langage Martien*, J. Maissonneuve, 1901; Theodore Flournoy, "Nouvelles observations sur un cas de somnambulisme avec glossolalia," *Archives de psychologie* 1 (1901): 101–255; Society for Psychical Research, PSI Encyclopedia, "Hélène Smith"; Hilary Evans, "Martians of the 1890s," *IUR* 11, no. 5 (Sept./Oct. 1986): 4–6; Clark III 298; Clark IV 206, 337–338)

1900? — Night. James Scrimgeour and his sister see a mysterious light below the horizon about three-quarters of a mile away from them in Perthshire, Scotland. It is moving at high speed in a zig-zag pattern toward the west and traveling across fields where there are no roads. (Clark III 1168; Clark IV 1342)

1900, Summer — Dusk. A 12-year-old girl is walking back to her farm from Cadwst, Denbighshire, Wales, when a large disc-shaped object about 14 feet in diameter silently passes above her and over a nearby meadow. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 13–14)

1900, Mid-summer — 3:00 a.m. Perrian A. McGilvra, 14, is returning on horseback from a dance near Reedsburg, Wisconsin, when his horse begins acting up. He sees a large, dark, dirigible-shaped object passing over a grove of poplar trees. The trees bend like they are in a strong windstorm, but he notices no wind. The object flies over his head with a whooshing sound. The horse remains frightened even after the object leaves. (Clark III 1161; Clark IV 1336)

1900, December — Percival Lowell at Lowell Observatory in Flagstaff, Arizona, records a shaft of light that projects from a "well-known geographical point" on Mars for 70 minutes. ("Science Notes," *Scientific American* 84 (1901): 179)

1901

1901, March 7 — S. H. Milliken of Pinos Altos, New Mexico, sees an airship and takes a Kodak photo of it. It has the appearance of three cigar-shaped objects lashed together. When the photo resurfaces some 70 years later, it looks suspiciously like a kite. (*Silver City (N.Mex.) Enterprise,* March 15, 1901; "Seventy Years Ago," *Silver City (N.Mex.) Enterprise,* March 18, 1971; Clark III 1162; Clark IV 1336)

1901, April 4 — 8:30 p.m. W. S. Hoseason is aboard the SS *Kilwa* in the Strait of Hormuz east of the island of Larak, Iran, when the crew notices multiple shafts of light rotating on the surface of the water at a speed of 60 mph for 15 minutes. The ship encounters the phenomenon again on April 9 in the Arabian Sea off the Indian coast south of Karachi [now in Pakistan]. (W. S. Hoseason, "Remarkable Phosphorescent Phenomenon Observed in the Persian Gulf, April 4 and 9, 1901," *Quarterly Journal of the Royal Meteorological Society* 28 (1902): 29–32; "April 4, 1901: Phosphorescent Sea," *Nature* 125 (March 29, 1930): 513; Dolan, USO1, 89–90)

1901, Summer — Day. A 10-year-old boy is walking home to Bournbrook, West Midlands, England, through a path behind his family's garden when he comes upon a large box-shaped device with a small, centrally placed turret. The only opening is a door, through which two small men (less than 4 feet tall) in military uniforms (but no insignia), each wearing an odd-looking cap with a wire sticking up on both sides, step out. One stays by the door, but the other walks toward the boy and waves him away. The beings go back in the craft, a bright flash surrounds it, and it shoots into the air with a whooshing sound. (Jenny Randles and Philip Barnet, "Humanoids Encountered in 1901?" *Flying Saucer Review* 24, no. 5 (March 1979): 28–29; "UFO Britannia: Part 1, The Early Years," Above Top Secret, December 19, 2012; Jenny Randles, "The 'Wes' Effect 1: The Hut That Flew," *Fortean Times* 309 (Christmas 2014): 27; Clark III 261; Clark IV 301)

1902

1902, May 13 — 8:00 p.m. A blue-colored fireball appears over Austin, Texas, and ascends into the sky until it disappears. ("Flying Saucers Old Stuff Here," *Austin (Tex.) Statesman,* May 14, 1902, Delwood sec., p. 3; Clark III 1168; Clark IV 1342)

1902, August 26 — 8:00 p.m. The RMS *Orizaba* is in the Gulf of Aden not far off Cape Guardafui, Somalia, when it passes through a clearly defined, luminous circular area where the water is "boiling and twisting" from beneath. The phenomenon persists for about one hour. ("An Extraordinary Phenomenon," *Sydney (N.S.W.) Morning Herald,* October 4, 1902, p. 10; Dolan, USO1, 90–91)

1902, October 28 — 3:05 a.m. The lookout and Second Officer A. H. Raymer (or Rayner) of the SS *Fort Salisbury,* steaming in the North Atlantic some 730 miles south of Côte d'Ivoire, see an object in the water leaving a "long, luminous trailing wake" and two lights in line on its upper surface. The object sinks as the ship passes it 120–150 feet on the port side. They estimate its length as 500–600 feet and tapering from 5 to 30 feet across. They assume that some disturbances along its length are caused by fins. ("Again the Sea Serpent," *Southland (N.Z.) Times,* January 7, 1903, p. 3; "The following is the latest contribution," *Zoologist,* ser. 4, 7 (1903): 38–39; Dolan, USO1, 91–93)

1902, November 20 — 9:27 a.m. Richard Griffiths, the assistant astronomer at Adelaide Observatory in South Australia, is taking meteorological observations with a colleague when they see a "brilliant globular light" in the south-southeast at about 42° elevation. When it is nearly overhead, it appears elongated and takes "an elliptical form." It moves slowly north and remains visible for 4 minutes, covering about 20° of arc. It disappears above the northern horizon. ("Remarkable Phenomenon," *Melbourne (Vic.) Argus,* November 21, 1902, p. 5; "Remarkable Astronomical Phenomenon," *Sydney (N.S.W.) Morning Herald,* November 21, 1902, p. 5; "A Celestial Stranger," *Melbourne (Vic.) Age,* November 21, 1902, p. 6; "An Unusual Apparition," *Adelaide (S.A.) Advertiser,* November

21, 1902, p. 4; "Was It a Fireball?" *Adelaide (S.A.) Advertiser,* November 21, 1902, p. 4; "A Bright Meteor," *The Australasian* (Melbourne, Vic.), November 22, 1902, p. 39; "An Adelaide Phenomenon," *Hillston (N.S.W.) Spectator and Lachlan River Advertiser,* November 29, 1902, p. 3; Bill Chalker, "Early Australian Historical Encounters," 1997)

1903

1903, March 17 — Mid-evening. Madge Brosius, 12, and her father Charles see a "huge object like a gigantic ripe cucumber with slightly tapered ends" over the family farm in Helmer, Indiana. Its inside is illuminated, and it has 8 windows in two rows of four each. Her father estimates it is 100 feet long. It begins moving away from him as he moves toward it, zigzagging like a child's balloon losing air. (Madge Brosius Allyn, "The Flying Cucumber of 1903," *Fate* 24, no. 3 (March 1971): 45–47; Clark III 1162; Clark IV 1336)

1903, August — A fireball is seen by numerous residents of Callaway, Nebraska, on several occasions, usually appearing near a specific spot on a deserted road. In one instance, it entered a buggy causing the driver and passenger to immediately abandon it. ("Fiery Spook Chases Them," *Everett (Wash.) Daily Herald,* August 29, 1903, p. 2; Clark IV 265, 301)

1903, September 29–October 3 —An implement dealer named Ulysses G. Griffith is on his way home in Van Meter, Iowa. As he approaches, he notices a strange point of light like a spotlight emanating from the top of the Mather & Gregg's building. He approaches cautiously, but the light sails across the street. He tells others about the experience, and over the next few days several people report a half-human, half-animal entity with large bat-like wings. The townsfolk chase the creature to a local mine shaft, down which it disappears, never to be seen again. ("Town of Van Meter Wrought Up over a Fishy Story," *Des Moines (Iowa) Daily News,* October 4, 1903, p. 1; "Van Meter Mystery Not Solved," *Des Moines (Iowa) Daily News,* October 5, 1903; "Van Meter Hot under the Colar," *Des Moines (Iowa) Daily Capitol,* October 6, 1903; "A Winged Monster," *Saint Paul (Minn.) Globe,* October 11, 1903, pp. 1, 4; Craig Woolheater, "The Van Meter Visitor," Cryptomundo, May 9, 2013; Chad Lewis, Noah Voss, and Kevin Lee Nelson, *The Van Meter Visitor*, On the Road, 2013; "Half Human, Half Bat: Van Meter Remembers a 1903 Visit from a Winged Monster," *Des Moines (Iowa) Register,* July 1, 2015; Clark III 1216–1218; "Hunting the Van Meter Monster in Iowa: Expedition X," Discovery UK YouTube channel, October 14, 2022; "A Strange Being Is Terrifying People in Iowa: The Van Meter Visitor," The Insomnia Society YouTube channel, February 1, 2023; "Bizarre Rural Mystery of The Van Meter Visitor (ft. Tyler Stone)," Edge of Reality YouTube channel, November 24, 2024; Clark IV 1392–1394)

1903, December 17 — Inventors Orville and Wilbur Wright make the first controlled, sustained flight of a powered, heavier-than-air aircraft with the *Wright Flyer* 4 miles south of Kitty Hawk, North Carolina. (Wikipedia, "*Wright Flyer*")

1904

1904 — Late afternoon. Wirt M. Covert, 17, and Arthur B. Eldert are returning on horseback from a grocery store in Dixboro, Michigan, when they see a large object in the air moving west behind the steeple of the Dixboro United Methodist Church. He compares its shape to the Confederate ironclad *Virginia* and it has a thick mast sticking up from its center and orange light shining through some windows. Suddenly it rises at about a 60° angle over the hills, tipping its mast back, and disappears. (Letter, *True,* February 7, 1965; Clark III 1162; Clark IV 1336)

1904, February 28 — Mid-evening. The steamer USS *Supply* is transporting the ill Governor of Guam, William Elbridge Sewell, from Guam to San Francisco, California. About 300 miles west-southwest of San Francisco, commanding Lt. Frank Herman Schofield observes three objects "beneath the clouds, their color a rather bright red." As they approach the ship they appear to soar, passing above the broken clouds. After rising above the clouds, they appear to "be moving directly away from the earth. The largest had an apparent area of about six suns. It was egg-shaped, the larger end forward. The second was about twice the size of the sun, and the third, about the size of the sun. Their near approach to the surface appeared to be most remarkable." The objects are in sight for over two minutes by three people. Barry Greenwood thinks they are meteors, but Bruce Maccabee is not so sure. (NICAP, "Three

Red Objects Sighted from USS Supply"; "Meteors Fly Upward," *New York Herald*, March 9, 1904, p. 7; "Navy Officer Sees Meteors," *New York Times*, March 9, 1904, p. 1; Frank H. Schofield, "Remarkable Meteors," *Monthly Weather Review* 32 (March 1904): 115; Bruce Maccabee, "Even More Remarkable," *IUR* 9, no. 5 (Sept./Oct. 1984): 14–15; Bruce Maccabee, "Meteors? Even More Remarkable," 2005; Barry Greenwood, "The USS Supply Sighting of 1904," *UFO Historical Revue*, no. 2 (September 1998): 2–6; Clark III 1168; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 329–351; Clark IV 1342)

1904, June — 10:00 p.m. When Tony Darby goes outside to the well on his farm 5 miles north of Rolling Prairie, Indiana, he notices two round, orange-colored, silent objects hovering 5–6 feet from the ground near the barn. He estimates they are the size of wagon wheels. One of the objects is 2 feet behind and to the left of the other. Running back to the house, he calls for his mother and brother, and all three walk toward the objects, which move away slightly then stop when the witnesses stop. Soon the objects move steadily away to the northeast, still maintaining their relative positions, at about the speed of a man walking. They pause briefly in a small hollow, then continue over a small hill and out of sight. (Lore and Deneault, pp. 91–92)

1904, December 5–1906 — Mary Jones of Tal-y-bont, Gwynedd, Wales, begins her public ministry as a missionary at Egryn Chapel during the Welsh revival. Her prayer meetings are often accompanied by a star-like light of unusual brilliance and magnitude, as well as moving lights. For example, at Bryncrug the gallery of a chapel is flooded by a mysterious light during her prayer meeting. After the service, a ball of fire is seen in the area by both revival participants and some passersby. Newspaper journalists sent to cover the story also see the lights, sometimes when Jones is absent. Sometimes columns or bands of colored lights are observed. On three occasions, Jones is visited by a man dressed in black who delivers a message "which she is frightened to relate." (Beriah G. Evans, "Merionethshire Mysteries," *Occult Review* 1, no. 3 (March 1905): 113–120; Beriah G. Evans, "Merionethshire Mysteries," *Occult Review* 1, no. 4 (April 1905): 179–186; Beriah G. Evans, "Merionethshire Mysteries," *Occult Review* 1, no. 5 (May 1905): 287–295; "Mystic Lights in Wales," *Adelaide (S.A.) Advertiser*, May 26, 1905, p. 5; A. T. Fryer, "Psychological Aspects of the Welsh Revival: 1904–5," *Proceedings of the Society for Psychical Research* 19 (December 1905): 80, 97–107; Kevin McClure and Sue McClure, *Stars, and Rumours of Stars*, The Authors, [1980]; David Edward Pike, "Mary Jones the Welsh Prophetess of 1905," Welldigger, November 30, 2015; Clark III 726, 1169–1170; Clark IV 807, 1343–1344)

1905

1905 — Frederick Spencer Oliver's book *A Dweller on Two Planets* is published posthumously. It is a narrative channeled by Oliver in Yreka, California, through automatic writing and mental dictations by a spirit calling itself Phylos the Tibetan, an Atlantean who reveals his story from 1883 to 1886. The book deals with deep esoteric subjects including karma and reincarnation and describes Phylos's final incarnation in 19th century America where his Atlantean karma plays itself out. In that incarnation (as Walter Pierson, gold miner and occult student of the Theo-Christic Adepts) he travels to Venus in an astral body while his physical form remains at a temple inside Mount Shasta, California. Phylos claims his fellow Atlanteans traveled through the air in cigar-shaped airships. (Wikipedia, "*A Dweller on Two Planets*"; Frederick Spencer Oliver, *A Dweller on Two Planets*, Baumgardt, 1905; Clark IV 115)

1905 — Gerald Thew, 7, and a friend are standing on the east bank of the Hudson River in Yonkers, New York, when they notice a slow-moving, wheel-shaped object approaching from across the river. It seems to be about 10 feet in diameter. When it reaches the shore, it bounces higher, and as it moves over the land, it follows the contours of the landscape until it disappears over a hill. (Clark III 1168; Clark IV 1342)

1905, August 3 — 1:30 a.m. Farmer John A. Jackson is driving a herd of hogs from Silsbee (a former settlement 6 miles southwest of El Centro) to Imperial, California, when a bright light flashes on him from above. He is momentarily blinded, and the hogs start running away. Jackson sees it is a searchlight from an airship about 100 feet long and propelled by wings that move up and down. It has smaller lights along the sides. Jackson wakes up W. E. Wilsie, who lives nearby, and they watch it disappear to the northeast. Another farmer, A. J. Morey, also glimpses the airship. ("Aerial Navigation in Imperial Valley," *Imperial (Calif.) Press*, August 5, 1905, p. 4; Clark III 1162; Clark IV 1337)

1906

1906 — Herbert Vern DeMott, 10, watches an object come down near his family's water well in Mitchell, South Dakota. As he approaches it, a door rolls back and he is welcomed inside by two human-like occupants who are sitting inside on camp stools. They converse with him fluently, but he does not know where they come from. He sees a lever that apparently can cut off the earth's "magnetism," allowing the object to rise. The occupants take water from the farm's horse trough to be "used in making electricity." ("DeMott Rock Study Crosses Continents," *Albany (Oreg.) Democrat-Herald,* August 27, 1973, p. 11; Patrick Gross, URECAT, July 22, 2009; Clark III 261; Clark IV 301)

1906 — 10:30 p.m. A. A. Carnegie, an officer on the SS *Patrick Stewart,* sees a phosphorescent light wheel moving on the surface of the water while steaming through the Gulf of Oman. The spokes of the wheel are about 20 feet apart and moving faster than 60 mph. ("Remarkable Display of Phosphorescence," *Quarterly Journal of the Royal Meteorological Society* 32 (1906): 280; Dolan, USO1, 93)

1906, January 4 — Night. Martin Meyerson is on the beach at Paia, Maui, Hawaii, when he sees a green object with the shape and diameter of the full moon appear from behind the southern slopes of the Wailuku Mountains. It is so bright it illuminates the cane fields below, then travels like a "slow-pitched baseball" and disappears behind Mount Haleakala to the southeast. (Clark III 1168; Clark IV 1342)

1906, Late May — Night. An airship carrying lights is seen at Hallock, Minnesota, alternately moving and hovering before it vanishes at high speed. (*Kittson County (Minn.) Enterprise,* June 1, 1906; Clark III 1162; Clark IV 1337)

1906, September 16 — Late afternoon. Hundreds of people in Indianapolis, Indiana, see a "cigar-shaped object" like an airship pass over the city. It is seen first in Irvington and then floats over the southern side of the business district where it is distinctly seen from downtown. Some estimate it to be 2,000 feet in the air; the watchman at the courthouse tower looks at it through binoculars but cannot see any detail. It disappears to the west. ("Ship Founders in Air," *Indianapolis Star,* September 17, 1906, p. 1; Clark III 1162; Clark IV 1337)

1906, October 7 — 5:00 p.m. An airship again floats over the southeastern portion of Indianapolis, Indiana, and is seen by many as it turns northeast and disappears in the distance. ("Ship Floats over City: Hundreds See It in Flight," *Indianapolis Star,* October 8, 1906, p. 3; Clark III 1162; Clark IV 1337)

1906, November — Dusk. Roy Russell and four other cotton-pickers are taking a brief respite from work 10 miles southeast of Anadarko, Oklahoma, when they see a fiery object shaped like a stovepipe. From an initial altitude of 60 feet, the object sinks down, comes toward them, and passes within 16 feet at eye level. Then it seems to flatten out and just blacks out. Another similar object follows and then several others. Russell watches them for 20 minutes. ("Recalls Fiery 1906 U.F.O.," *Des Moines (Iowa) Tribune,* May 4, 1966, p. 36; Clark III 1168; Clark IV 1342–1343)

1907

1907 (or 1908) — Dusk. A couple in Toronto, Ontario, see a luminous ball flying in an undulating motion from west to east parallel with the horizon. It is visible for several minutes. (Clark III 1168; Clark IV 1343)

1907, March 14 — 2:00 a.m. The P&O steamship *Delta* is navigating in the Malacca Strait about 45 miles off the coast of North Sumatra when Second Officer S. C. Patterson notices shafts of yellow light like spokes of a wheel moving on the surface of the water. The phenomenon persists about 30 minutes. ("Display of Phosphorescence," *Quarterly Journal of the Royal Meteorological Society* 33 (1907): 294; Dolan, USO1, 93–94)

1907, April 16 — 8:00 p.m. Several residents of Glendeane [now Glen Dean], Kentucky, see a "mysterious light" moving toward them. It hovers near the home of Mrs. T. A. Keenan for 15 minutes, then flies closer to the town, flashing lights. Something like a person is seen within. It settles in a hollow, where it appears to be a cone-shaped object. It remains visible for 2 hours, growing smaller. ("A Mysterious Light," *Breckenridge (Ky.) News,* May 8, 1907, p. 2; Clark IV 1267)

1907, April 20–26 — The *Nashville American* prints some tall tales about encounters with occupants of a balloon who land briefly in various places (usually near a spring) around central Tennessee. The witnesses include a farmer named W. A. Smith, Walter Stephenson, Herman Schubert, and Asa Hickerson. The aeronauts are dressed strangely, play music, and speak a foreign language. ("Weird Tale from Dickson," *Nashville (Tenn.) American,* April 21, 1907, magazine section, p. 9; "Kneel in Prayer Beside Spring," *Nashville (Tenn.) American,* April 22, 1907, p. 2; "Aeronauts at Pleasant Spring," *Nashville (Tenn.) American,* April 22, 1907, p. 3; "Here's a Weird Tale," *Cincinnati (Ohio) Enquirer,* April 25, 1907, p. 6; "Blazing Staff Lights Up Scene," *Nashville (Tenn.) American,* April 28, 1907, p. 12; Theo Paijmans, "The Tennessee Aeronaut Flap of 1907," *Fortean Times* 313 (May 2014): 28–29; Clark III 671–672; Clark IV 745–746, 1267–1270)

1907, May 12 — 1:00 a.m. A "strange star" is seen at San Bernardino, California, first in the zenith, then moving eastward, increasing in size and turning reddish, until it goes below the horizon at 3:30 a.m. ("Marvel over This Star," *Los Angeles Times,* May 13, 1907, sec. 2, p. 9; Clark IV 1267)

1907, Summer — While playing along the shore of a lake near Vilppula [now Mänttä-Vilppula], Finland, a group of boys see a light come from over the water and settle on the beach nearby. A door opens, and human-like beings emerge, sending the youths running. Searchers who come to the site later find traces and footprints. (Center for UFO Studies, HUMCAT Index 1900-1909, p. 7; Clark III 261; Clark IV 301–302)

1907, July 2 — Just before 12:00 noon. Bishop John Stephen Michaud is talking with Vermont ex-governor Urban A. Woodbury at the corner of Church and College streets in Burlington, Vermont, when they hear a loud explosion and see a torpedo-shaped object about 6 feet long and 8 inches in diameter suspended in the air about 300 feet away. It is dark, with several tongues of flame issuing from it at various points, as if its covering is ruptured. It slowly begins to move to the southeast. The explosion has either knocked down or stunned a horse in College Street. A strong downpour of rain ensues shortly afterward. Although described as a "possible case of ball lightning," the object appears more likely to have been an exploded balloon that someone has attached fireworks to in preparation for a Fourth of July celebration. ("Saw Ball of Fire," *Burlington (Vt.) Free Press,* July 3, 1907, p. 7; William H. Alexander, "A Possible Case of Ball Lightning," *Monthly Weather Review* 35 (July 1907): 310–311; Clark III 1163; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 1, Anomalist, 2019, pp. 354–372, reprinted in "Revisiting the Bishop's Torpedo," *Fortean Times* 387 (Christmas 2019): 44–51; Clark IV 1337)

1907, July 7 — 6:40 p.m. W. E. Thomas is watching a vivid sunset in Phoenix, Arizona, when he sees a "blue disk floating in the heavens apparently close to the sun." It passes in front of the sun, completely covering it. Other discs appear until there are seven of them. His wife also sees the objects, which are constantly in motion, changing directions and sometimes moving in a straight-line formation. The disks are visible for another hour until sunset, when they are last seen as blue blotches. ("Phoenix Man Sees Blue Stars," *Tucson (Ariz.) Citizen,* July 11, 1907, p. 4; Clark IV 1267)

1907, September 16 — Late afternoon. Residents of Wenatchee, Washington, see a balloon moving at a high rate of speed at an altitude of 900–1,000 feet. It has a cabin suspended below it, from which some claim to hear music emanating. A hunter watching the object through binoculars claims to see two men and a woman in the cabin. It disappears over the crest of Badger Mountain. ("Balloon Sails over the City," *Wenatchee (Wash.) Daily World,* September 17, 1907, p. 1; Clark IV 1269)

1907, Fall (or Fall 1908) — After sunset. Two lights, one in front of the other, pass directly at a great height over Waltham, Massachusetts. They pass from view in about 3 seconds. (Clark III 1168; Clark IV 1343)

1907, October 12 — 10:00 a.m. Residents of Fort Myers, Florida, see an oddly shaped "monster balloon" moving rapidly to the south. ("Fort Myers Sees 'Things' in the Air," *Tampa (Fla.) Morning Tribune,* October 13, 1907, p. 1; Clark IV 1267)

1907, December 5 — 9:30 p.m. A "large balloon" with red and green lights passes over Northport, New York, toward the southeast, changing altitude several times. ("Balloon's Night Flight," *Brooklyn (N.Y.) Eagle,* December 7, 1907, p. 1; Clark IV 1267)

1908

1908 — British theosophist William Kingsland writes *A Child's Story of Atlantis,* which purports to be information about the lost continent channeled by a 9-year-old girl named Laurie. The Atlanteans flew around in several types of aerial machines. (William Kingsland, *A Child's Story of Atlantis,* Theosophical Publishing Society, 1908; Clark IV 116)

1908, February 1–2 — 7:00 p.m. Residents of Kent and Tacoma, Washington, see a bright light moving slowly from north to south. Probably the planet Venus. ("Strange Light Seen West of Kent," *Tacoma (Wash.) Daily News,* February 3, 1908, p. 1; "Strange Lights Seen at High Altitude," *Tacoma (Wash.) Daily News*, February 4, 1908, p. 3; Clark III 1163; Clark IV 1337)

1908, March 30 — 10:15 p.m. F. W. Longbottom in Queens Park, Chester, England, is photographing the Whirlpool Galaxy (NGC 5194) in Canes Venacti with a 12.25-inch reflector. When the plate is developed, it shows an unknown nebulous object some 25 minutes of arc northeast of the galaxy. He does not see the object when he examines the same spot again on April 6. (F. W. Longbottom, "Comet or ———?" *The Observatory* 31 (1908): 215–216)

1908, May — Late evening. Helen C. Peterson sees a string of lighted beads in the sky over Great River, Long Island, New York. The first light stops and as the others reach it, they seem to bump into it. It grows a little bigger, appearing like a large star. Suddenly it begins to spin like a pinwheel, but without sparks. The motion stops and what looks like a very bright star takes off at great speed toward the southeast. (Clark III 1168–1169; Clark IV 1343)

1908, Late May — 6:30 p.m. W. S. M'Intosh and two other trappers watch a bright light resembling a searchlight moving around at treetop level near Glenham, Southland, New Zealand. They view the light on two other occasions, sometimes moving against the wind. ("Seen Last Winter," *Otago Daily Times*, July 31, 1909, p. 10; Clark III 1164; Clark IV 1338)

1908, June 30 — 7:14 a.m. A large explosion takes place near the Podkamennaya Tunguska River in Yeniseysk Governorate [now Krasnoyarsk Krai], Russia. Evenki natives and Russian settlers in the hills northwest of Lake Baikal observe a column of bluish light, nearly as bright as the sun, moving across the sky. About 10 minutes later, there is a flash and a sound similar to artillery fire. Eyewitnesses closer to the explosion report that the source of the sound moves from the east to the north of them. The sounds are accompanied by a shock wave that knocks people off their feet and breaks windows hundreds of kilometers away. The explosion over the sparsely populated eastern Siberian taiga flattens 770 square miles of forest and possibly causes up to three human casualties. The event is generally attributed to the air burst of a meteoroid. It is classified as an impact event, even though no impact crater has been found. The object disintegrates at an altitude of 3–6 miles rather than hitting the surface of the Earth. The area is so remote that the site is not inspected until 1927 by a team led by Russian mineralogist Leonid Kulik, who finds a zone about 5 miles across where trees are scorched and devoid of branches but still standing upright. More exotic explanations for the event include a black hole impact, antimatter, a UFO crash (as recently as 2004 by Russian ufologist Yuri Labvin), a nuclear explosion, and an inadvertent experiment by Nikola Tesla. (Wikipedia, "Tunguska event"; Hobana and Weverbergh 10–30; John Baxter and Thomas Atkins, *The Fire Came By: The Riddle of the Great Siberian Explosion*, Doubleday, 1976; Surendra Verma, *The Mystery of the Tunguska Fireball*, Thriplow, 2005; Vladimir Rubtsov, *The Tunguska Mystery*, Springer, 2009; Phil Plait, "Aliens Saved Tunguska!" Bad Astronomy, May 29, 2009; Mark Peplow, "Rock Samples Suggest Meteor Caused Tunguska Blast," *Nature*, June 10, 2013; Daniil E. Khrennikov, et al., "On the Possibility of Through Passage of Asteroid Bodies across the Earth's Atmosphere," *Monthly Notices of the Royal Astronomical Society* 493 (March 2020): 1344–1351; Hannah Osborne, "The Tunguska Event Was the Biggest Asteroid Impact in Recorded History: How Did It Vanish without a Trace?" Live Science, May 29, 2023)

1908, Summer — Repeated sightings of unidentified airships, sometimes flying against the wind, take place in Denmark. They usually have wings and searchlights; on one occasion, an antenna is seen jutting from the front end. Other reports are of oddly shaped clouds from which a searchlight emanates, sweeping the ground. (Willy Wegner, "The Mystery 'Airship' over Denmark in 1908," *The UFO Register* 8, no. 1 (November 1977): 3–8; Clark III 1163; Clark IV 1337)

1908, July 11 — Russian explorer and naturalist Vladimir K. Arsenyev is walking near the mouth of the Gobilli River in the Sikhote-Alin range, Khabarovsk Krai, Siberia, when he encounters a human-like footprint. Something is moving around in the bushes, and he throws a stone at it. Suddenly he hears the beating of wings, and a large,

dark figure emerges from the fog and flies over the river. (Vladimir Arsenyev, *V gorakh Sikhote-Alinya,* 1937; Yurij B. Petrenko, [Letter] "Forerunner of the Flying 'Lady' of Vietnam?" *Flying Saucer Review* 19, no. 2 (Mar./Apr. 1973): 29–30)

1908, July 25 — About 6:00 p.m. A "large airship sailing very high" is seen passing from north to south over the Forestville neighborhood of Bristol, Connecticut. It seems to be an elongated gas bag under which a framework with a propeller is suspended. After "maneuvering" a while, it stops and circles over Lake Compounce then changes course toward the southwest. An East Bristol man named Wilson later claims it was a pig-shaped balloon he had sent up for his daughter's birthday party, but "balloon" sightings continue in Massachusetts through December. ("Large Airship Seen Sailing over East Part of Bristol, Ct.," *Boston Herald,* July 26, 1908, p. 16; "The Lake Compounce Airship," *Willimantic (Conn.) Daily Chronicle,* July 29, 1908, p. 26; Clark III 1163; Clark IV 1337)

1908, July 26 — A special agent force in the Department of Justice, forerunner of the FBI, is created by Attorney General Charles Bonaparte. Its first chief is Stanley Finch. Attorney General George W. Wickersham renames the force the Bureau of Investigation in March 1909. (Federal Bureau of Investigation, Timeline, March 31, 2002)

1908, October — Skipper J. H. Stockman of the smack *Superb* is fishing in the North Sea 35 miles out of Lowestoft, Suffolk, England, when he sees a large "star" rise out of the water and approach his ship. He signals it with a red flare, and to his surprise he is immediately answered with a red flare above him. He then shows a white flare and receives a blue flare in response. The object appears sausage-shaped and carries a single light. It disappears in the direction of the Netherlands. (*East Anglian Daily Times,* May 20, 1909; *Norfolk News,* May 22, 1909; David Clarke, "Scareships over Britain: The Airship Wave of 1909," *Fortean Studies* 6 (1999); Patrick Gross, URECAT, August 17, 2013; Clark III 1163; Clark IV 1337)

1908, October 22 — 11:00 p.m. F. D. Derbek, a naval doctor aboard the Russian steamship *Okhotsk,* observes a bright greenish-white radiance flaring up under the ship's stern while it is in the Sea of Okhotsk off Siberia. It expands and surrounds the ship, traveling along with it for a while, then moving off to the side and ahead. It reaches the horizon in 2–3 minutes. (Stonehill and Mantle, *Russia's USO Secrets,* Flying Disk, 2020, p. 77; Dolan, USO1, 94–95)

1908, October 31 — 4:00 a.m. A lighted balloon is seen moving above Bridgewater, Massachusetts. Philip Prophett and John Flynn see the light shining downward on the ground. The object ascends and disappears to the east. ("Mystery of the Air," *Manchester (N.H.) Union,* November 2, 1908, p. 2; Clark III 1163; Clark IV 1337)

1909

1909 — Night. Frederick G. Hehr sees a bright white light executing a "curious dance" over a village one mile away in East Frisia, Lower Saxony, Germany. A minute later the light suddenly streaks in his direction, coming within 300 feet as it passes by at 60 feet altitude. Three seconds later it is gone. ("Report from the Readers," *Fate* 4, no. 5 (July 1951): 95–96; Clark III 1169; Clark IV 1343)

1909, March 4 — 8:25 p.m. Charles Maberly, an organist at St. Michael's Church in Lambourne, Berkshire, England, is returning home from choir practice when he sees a bright searchlight attached to a torpedo-shaped dirigible heading west at 200 feet altitude. He walks for about 50 yards watching it. As it passes out of sight, he hears three explosions at regular intervals. (London *Evening News,* May 18, 1909; Carl Grove, "The Airship Wave of 1909: A Preliminary Survey," *Flying Saucer Review* 16, no. 6 (Nov./Dec. 1970): 9; Clark III 1163–1164; Clark IV 1338)

1909, March 23 — 5:15 a.m. Police Constable James Kettle of Peterborough, England, sees a powerful light about 1,200 feet in the air above Cromwell Road making an engine-like buzz. The light is on a dark, fast-moving oblong object. It is in view for about 3 minutes. ("Quite a Sensation! What a Night Policeman Saw!" *Peterborough Advertiser,* March 27, 1909, p. 7; "Aerial Mystery," London *Standard,* May 17, 1909, p. 7; "What Did P.C. Kettle See? Another Old Mystery Revived," *Flying Saucer Review* 6, no. 4 (July/Aug. 1960): 11–12; Carl Grove, "The Airship Wave of 1909: A Preliminary Survey," *Flying Saucer Review* 16, no. 6 (Nov./Dec. 1970): 9; Nigel Watson, "Phantom Airships over Britain in 1909, and Their Impact on Society," *Common Ground,* no. 3 (November 1981): 18–23; David Clarke, "Scareships over Britain: The Airship Wave of 1909," *Fortean Studies* 6 (1999): 39–63; Clark III 1163; Clark IV 1338)

1909, April 21 — 9:45 p.m. Fred Harrison of King's Lynn, Norfolk, England, sees a "long, dark object" moving swiftly overhead just above treetop level. It carries a searchlight that illuminates the road, farm buildings, trees, and everything it touches. ("Mystery of the Air," London *Daily Express*, May 14, 1909, p. 1; David Clarke, "Scareships over Britain: The Airship Wave of 1909," *Fortean Studies* 6 (1999))

1909, May 5 — Night. C. W. Allen and two other men are motoring through Kelmarsh, Northampton, England, when they hear a loud explosion in the air followed by the rumbling of an engine. Allen sees an oblong dark shape, perhaps 100 feet long, with lights in front and behind moving at an altitude of 500–600 feet. They dimly perceive some men on a platform below it. It passes out of sight at 20 mph northeast toward Peterborough. (*East Anglian Daily Times*, May 13, 1909; Carl Grove, "The Airship Wave of 1909: A Preliminary Survey," *Flying Saucer Review* 16, no. 6 (Nov./Dec. 1970): 11; David Clarke, "Scareships over Britain: The Airship Wave of 1909," *Fortean Studies* 6 (1999); Clark III 1164; Clark IV 1338)

1909, May 9 — 11:20 p.m. Miss H. M. Boville notices from her bedroom window at Southend-on-Sea, Essex, England, a "large dark object looming out of the sky" and traveling slowly from the east. After a few seconds it remains nearly stationary for a few minutes in front of her window, and she sees the outline of a torpedo-shaped airship about 1,300 feet in altitude. It rises higher then travels swiftly to the west toward London. It shows two powerful searchlights at each end very briefly. (London *Evening News*, May 15, 1909; Carl Grove, "The Airship Wave of 1909: A Preliminary Survey," *Flying Saucer Review* 16, no. 6 (Nov./Dec. 1970): 10; David Clarke, "Scareships over Britain: The Airship Wave of 1909," *Fortean Studies* 6 (1999); Clark III 1164; Clark IV 1338; "The Great Scareship Panic of 1909," Catherine Warr YouTube channel, February 28, 2025)

1909, May 16 — 1:30 a.m. A Mrs. Wigg, who lives near Belle Vue Park on Yarmouth Road, Lowestoft, Suffolk, England, wakes up to an engine-like sound. She looks out her window and sees a long, dark, bottle-shaped object pass by at a low altitude. She thinks she can see a man in front, steering the craft. Other people in Lowestoft hear engine sounds and flashes of light around the same time. (*East Anglian Daily Times*, May 18–19, 1909; *Norfolk News*, May 19, 1909, p. 13; David Clarke, "Scareships over Britain: The Airship Wave of 1909," *Fortean Studies* 6 (1999); Clark III 1164; Clark IV 1338)

1909, May 17 — The subject of mystery airships is brought up in a debate in the House of Commons. Arthur Fell, MP for Great Yarmouth, England, had asked Secretary of State for War Richard Haldane if he could give the number of dirigibles, either built or in progress of being built, in Germany. Haldane replies that 7 dirigible airships have been built and another 5 are under construction. Horatio Myer, MP for Lambeth North, follows up by asking Haldane: "Will the honourable gentleman, in any report he may circulate, tell us about a certain dirigible supposed to be hovering about our coast?" The question is greeted with laughter and Haldane does not reply. (Neil R. Storey, *Zeppelin Blitz: The German Air Raids on Great Britain during the First World War*, History Press, 2015, pp. 10–11)

1909, May 18 — 11:00 p.m. Charles Lethbridge (part-time dock worker and Punch-and-Judy showman) is traveling on a "spring cart" from Senghenydd on his way home to Cardiff, South Wales. At the summit of Caerphilly Mountain he sees a long, tube-shaped object sitting on the grass by the roadside, with two men busily working on something. They are wearing heavy fur coats and fur caps that fit tightly over the heads. Lethbridge proceeds to about 60 feet from them when they notice him and start jumping up and jabbering in a foreign language. They quickly pick up something from the ground, then jump into a little carriage suspended from the object (with wheels at the bottom), which rises into the air in a zig-zag fashion. When it clears the telegraph wires, two electric lights shine out and the craft heads toward the southeast. Lethbridge returns to the site with a newspaper reporter and they find signs of trampling in the grass for about 45 feet. They also pick up a small red French military label, letterhead from a London stockbroker, many newspaper clippings with references to airships or the German army, and a tin box with paste for polishing metal. ("Airship Mystery," *The Guardian* (London), May 20, 1909, p. 7; "Mystery of the Air," London *Daily Express*, May 20, 1909, p. 1; "The Airship Mystery: Strange Stories in South Wales," *The Weekly Mail* (Wales), May 22, 1909, p. 7; Brett Holman, "What the Showman Saw," Airminded, November 17, 2014; Nick Redfern, "UFOs over Wales: A 1909 Wave," Mysterious Universe, May 23, 2016)

1909, May 19 — 1:15 a.m. Robert Westlake, railroad signalman at King's Junction in the Queen Alexandra Dock at Cardiff, Wales, sees a cigar-shaped object flying swiftly at perhaps 2,600 feet and making a whizzing noise. It has two lights and is moving eastward. Some dock workers who are loading the *SS Arndale* also see the object for "a minute or two." It passes over the Bristol Channel towards Weston-super-Mare. Aeronaut Percival G. Spencer says that he recently sold several of his "man-lifting" 25-foot-long model airships to advertising firms in the UK, one of them in Cardiff. (*London Globe*, May 19, 1909; Brett Holman, "Wednesday, 19 May 1909," Airminded, May 19, 2009; *London Standard*, May 21, 1909; Brett Holman, "Friday, 21 May 1909," Airminded, May 21, 2009)

1909, May 19 — 11:30 p.m. A lone motorcyclist observes a glowing light traveling in a straight trajectory overhead near Wroxham, Norfolk, England. As it passes, the motorcycle headlight fails. It begins working again after the UFO passes. ("Norwich Lights," *London Evening News,* May 20, 1909, p. 1; *East Anglian Daily Times,* May 21, 1909; *Norfolk News,* May 22, 1909; Carl Grove, "The Airship Wave of 1909, Pt. 2," *Flying Saucer Review* 17, no. 1 (Jan./Feb. 1971): 17, 19; Mark Rodeghier, *UFO Reports Involving Vehicle Interference,* CUFOS, 1981, p. 1; David Clarke, "Scareships over Britain: The Airship Wave of 1909," *Fortean Studies* 6 (1999); Brett Holman, "Saturday, May 22, 1909," Airminded, May 22, 2009)

1909, May 19 — 12:00 midnight. A Mr. Chatten, grocer's assistant, is cycling home to Tharston, Norfolk, England, when he is dazzled by a bright light with a bluish tinge overhead. It switches off for a few seconds, and Chatten can see a long, cigar-shaped object 300–400 feet above him, moving rapidly toward Norwich. On its underside is a framework with a yellow light at each end. ("Airship Mystery," London *Daily Telegraph,* May 21, 1909, p. 12; Carl Grove, "The Airship Wave of 1909, Pt. 2," *Flying Saucer Review* 17, no. 1 (Jan./Feb. 1971): 17, 19; David Clarke, "Scareships over Britain: The Airship Wave of 1909," *Fortean Studies* 6 (1999); Brett Holman, "Saturday, May 22, 1909," Airminded, May 22, 2009; Clark III 1164; Clark IV 1338)

1909, June 16 — 4:10 a.m. M. Delingette, director of the meteorological station at Đồng Hới, Vietnam, observes a luminous, elongated object moving from west to east. Four fishermen watch the object for 8–10 minutes until it falls into the sea. ("Etoiles filantes, bolides, aérolithes," *L'Astronomie* 23 (1909): 519–520)

1909, June 19 — 3:00 a.m. Captain Gabe and the second mate of the Danish East Asiatic Company steamship *Bintang,* while passing through the Malacca Strait, observe curved light waves traveling across the water in the form of "long arms issuing from a center." The system moves forward, decreasing its velocity of rotation, and is visible for 15 minutes. ("Curious Light Phenomena of the Indian Seas," *Scientific American* 106 (1912): 51, 58; Dolan, USO1, 95–96)

1909, July–August — A mystery airship wave begins in New Zealand with numerous sightings of unusual nocturnal lights and airships seen in both daytime and nighttime. The sightings are at first most intense over the southern end of South Island. In the following weeks the reports appear to move northward and by August, Australia also falls under the grip of what press accounts call "aerialitis." ("The 'Lights' in the Sky," *Melbourne (Vic.) Argus,* August 21, 1909, p. 15; Granville Oldroyd and Nigel Watson, *The New Zealand Invasion,* The Authors, 1985; Bill Chalker, "Early Australian Historical Encounters," 1997; Robert E. Bartholomew, "The Great Zeppelin Scare of 1909," NZ Skeptics, May 1, 1998; Hilary Evans and Robert E. Bartholomew, *Outbreak!,* Anomalist, 2009, pp. 479–483; Brett Holman, "Scareships over Australia—1," Airminded, October 20, 2010; Brett Holman, "Scareships over Australia—II," Airminded, October 23, 2010; Brett Holman, "Scareships over Australia—III," Airminded, October 25, 2010; Clark III 65–66; Tony Brunt, "The New Zealand UFO Wave of 1909," Ufocus NZ, July 22, 2020; Clark IV 89–90, 1338)

1909, July 11 — Night. Several people in Kaitangata, on New Zealand's South Island, report seeing a mysterious light, possibly from a dirigible, for 30 minutes. The light bobs in and out of view over the Wangaloa Hills. ("A Mysterious Light," *Otago Daily Times,* July 16, 1909, p. 10; "A Mysterious Light," *New Zealand Herald,* July 27, 1909, p. 5; "The Airship Mystery," *Otago Evening Star,* July 27, 1909, p. 5; "The 'German' Theory," *Otago Evening Star,* July 29, 1909, p. 4; *Outbreak!* p. 480; Bryan Dickeson, "The '1909 Kelso Airships' of New Zealand," Ufocus NZ, July 22, 2020)

1909, July 19 — 6:30–9:00 p.m. A mysterious aerial light is seen in Oamaru, New Zealand. ("The Airship Mystery," *Otago Evening Star,* July 29, 1909, p. 4; Tony Brunt, "The New Zealand UFO Wave of 1909," Ufocus NZ, July 22, 2020)

1909, July 23 — 12:00 noon. Mrs. James Russell and several schoolchildren in Kelso, New Zealand, see an airship shaped like a boat that flies toward them from the east, circles above the school, and returns in the same direction. It seems to have a propeller. ("The Airship Mystery," *Otago Evening Star,* July 29, 1909, p. 4; "The Mysterious Lights," *Otago Daily Times,* July 30, 1909, p. 8; "The Airship Mystery," *Otago Witness,* August 4, 1909, p. 32; Bill Chalker, "Early Australian Historical Encounters," 1997; Hilary Evans and Robert E. Bartholomew, *Outbreak!,* Anomalist, 2009, p. 480; Bryan Dickeson, "The '1909 Kelso Airships' of New Zealand," Ufocus NZ, July 22, 2020; Clark IV 89)

1909, July 24 — 5:00 p.m. George McDuff, another student in Kelso, New Zealand, sees an airship near his home. Sixty years later, he attributes it to his imagination. (Robert E. Bartholomew, "The Great New Zealand Zeppelin Scare of 1909," *New Zealand Skeptic* 47 (Autumn 1998): 1, 3–5)

1909, July 24 — Night, Several people near Kaka Point, New Zealand, see a "large illuminated object." Fearing it is a German Zeppelin about to land, the witnesses run off, vowing to shoot at it if it returns. ("Alleged Airships," Otago *Clutha Leader,* July 27, 1909, p. 4)

1909, July 30 — 5:00 a.m. Two men working on a dredge on the Mataura River north of Gore, New Zealand, see a lighted object descend out of the mist. It appears to be a narrow, boat-shaped craft that circles the dredge over a period of several minutes, rising and falling like a bird, and varying its speed. Two figures can be seen inside. It disappears into the mist, leaving behind a yellow glare. ("The Airship Mystery," *Otago Evening Star,* July 30, 1909, p. 4; "Two Miners See the 'Ship,'" Wellington *Dominion,* July 31, 1909, p. 7; "More Airship Stories," *Auckland Star,* July 31, 1909, p. 5; Bill Chalker, "Early Australian Historical Encounters," 1997; Clark III 66; Tony Brunt, "The New Zealand UFO Wave of 1909," Ufocus NZ, July 22, 2020; Clark IV 90, 302)

1909, July 31 —Early morning. A farmhand in Greenvale, New Zealand, is feeding horses when a loud whirring sound from an airship frightens the animals. The object, 150 feet long and "like a boat with a flat top," is moving so fast that by the time he rouses friends, it has almost vanished. Around the same time, a resident of Dunedin sees an airship on Grosvenor Street. A beam of yellow light shoots up what seems to be a mast and remains there as the object passes from view. ("Aerial Navigation," *Otago (N.Z.) Daily Times,* July 31, 1909, p. 10; "Aerial Lights," *Otago (N.Z.) Daily Times,* August 2, 1909, p. 5; Tony Brunt, "The New Zealand 'UFO' Wave of 1909," 1967, reprinted in Paranormal New Zealand, August 21, 2014; Clark III 1164; Clark IV 1338)

1909, July 31 — 4:55 p.m. A dark, cigar-shaped object with a boxlike structure underneath it is seen speeding above the hills near Akatore, New Zealand, then climbing into the western sky. (Tony Brunt, "The New Zealand 'UFO' Wave of 1909," 1967, reprinted in Paranormal New Zealand, August 21, 2014; Clark III 1164; Clark IV 1338)'

1909. July 31 —11:30 p.m. A couple living near Gore, New Zealand, watches an airship above the Blue Mountains. At first they only see a bright light, but then they realize it is attached to a cigar-shaped machine that is flying a straight course with a rocking motion. It reappears at 1:00 and 3:00 a.m. (Tony Brunt, "The New Zealand 'UFO' Wave of 1909," 1967, reprinted in Paranormal New Zealand, August 21, 2014; Clark III 1164; Clark IV 1338)

1909, August 2 — 3:00 a.m. Thomas Robertson sees a large boat-shaped object with lights near Sumpter's Hill, Oamaru, New Zealand, clearly illuminated by the Moon. Two figures are visible inside. It disappears swiftly to the west. (Bill Chalker, "Early Australian Historical Encounters," 1997)

1909, August 2 — Night. A light seen moving in the sky above Nelson, New Zealand, is attributed to the planet Mars. ("What Was It?" *Nelson Evening Mail,* August 3, 1909, p, 2)

1909, August 3 — Night. A man is riding in Waipawa, New Zealand, when his horse becomes nervous. He sees a large, gray, torpedo-shaped object passing overhead. Three persons are visible in it, one of whom shouts to him in an unknown language. The object rises to a great height, showing lights fore and aft. After circling around, it disappears behind a hill. ("A Nocturnal Visitor," *Waipawa (N.Z.) Mail,* August 5, 1909, p. 3; "Conquest of the Air," *Hastings (N.Z.) Standard,* August 5, 1909, p. 8; *Hawke's Bay Herald,* August 6, 1909; Clark III 66, 261; Tony Brunt, "The New Zealand UFO Wave of 1909," Ufocus NZ, July 22, 2020; Clark IV 90)

1909, August 7 — 10:30 p.m. Four young men at brick kilns near the railway station in Goulburn, New South Wales, see a bright, pale blue light arise from behind some hills to the east. After ascending, it circles back in the direction it came from. The object is said to be visible every night from August 5–10. ("The Goulburn 'Airship,'" *Sydney (N.S.W.) Morning Herald,* August 11, 1909, p. 10; "Those Mysterious Lights," *Sydney (N.S.W.) Evening News,* August 12, 1909, p. 5; "Mysterious Lights," *Taranaki (N.Z.) Daily News,* August 10, 1909, p. 2; Bill Chalker, "Historical Australian UFO Reports," *UFO Research Australia Newsletter* 4, no. 3 (Nov./Dec. 1983): 27; Clark III 66; Clark IV 90)

1909, August 9 — 7:30–8:00 p.m. A flying object with lights on its front and back sails at a great altitude from west to east over Concord, New Hampshire, eventually disappearing into a cloud. Capt. Lyman Jackman at first thinks it is a balloon, but its estimated speed of 45–50 mph against the wind leads him to think otherwise. At about the same time, Bertha Niles of Vale Perkins, Quebec, watches a similar lighted object moving west to east. ("Air Ship or Meteor," *Concord (N.H.) Evening Monitor,* August 10, 1909, p. 3; "Air Ship or What?" *Concord (N.H.) Evening Monitor,* August 13, 1909, p. 7; Clark III 1164; Clark IV 1338–1339)

1909, August 9 — Night. Residents of Moss Vale, New South Wales, watch a large lighted object like an airship float over the town. ("Is It an Airship?" *Sydney (N.S.W.) Morning Herald,* August 10, 1909, p. 7)

1909, August 10–13 — A brightly lighted object is seen in various towns in New South Wales—Breadalbane, Sydney, Bathurst, Helensburgh, Sutherland, Zeehan, and Picton. Both fire balloons and the planet Mars (then in opposition) are suspected, as well as Venus and Jupiter, which are in conjunction. A pair of lights are repeatedly seen in Perth, Western Australia, and its suburbs. ("The Mysterious Light," *Goulburn (N.S.W.) Evening Penny*

Post, August 14, 1909, p. 2; "The Lights in the Sky," *Goulburn (N.S.W.) Evening Penny Post,* August 17, 1909, p. 1)

1909, August 13 — 11:00 p.m. Residents of Glen Innes, New South Wales, see an object like a balloon moving to the north. Through a telescope, the object looks like an inverted top. The lower portion is lighted, and as it revolves, a small light turns on the land beneath. It continues drifting northward. ("Is It a Balloon?" *The Daily Telegraph* (Sydney, N.S.W.), August 16, 1909, p. 8; Bill Chalker, *The Oz Files,* Duffy and Snellgrove, 1996, p. 31; Clark III 66; Clark IV 90)

1909, August 15 — Night. After several nights of watching mysterious lights, residents of Bulli, New South Wales, observe one of the objects through a telescope. They claim to see a group of gigantic creatures attempting to "signal to the earth." One is trying to jump off, but clouds intervene and the light apparently goes away. ("Other Worlds Than Ours," *Adelaide (S.A.) Chronicle,* August 21, 1909, p. 38; Clark III 66–67; Clark IV 90–91)

1909, August 18 — 2:30 a.m. Four men (Capt. Edward P. Sisson, Ernest T. Newton, Prentice Lanphear, and Edward M. Knapp) at the Coast Guard life-saving station on the south side of Fishers Island, New York, see a winged airship 60 feet long and 20 feet wide. Moving swiftly against the wind, it moves in from the northeast, its engines whirring and a dazzling white light at its head. Two dark figures can be seen in the center of the object. Visible for 3 minutes, the object moves off to the west. ("Aeroplane over Fishers Island," *New London (Conn.) Day,* August 29, 1909, p. 9; "Fishers Islanders See Big Aeroplane," *Providence (R.I.) Journal,* August 19, 1909, p. 1; Joseph Trainor, "The New England Airship Invasion of 1909," *Fortean Studies* 1 (1994): 59–70; Clark III 1164; Clark IV 1339)

1909, August 22 — Evening. Residents of Upper Montclair, New Jersey, watch a mystery airplane that emits a large puff of smoke. It descends and flies off to the north. ("Airship over Montclair," *New York Times,* August 24, 1909, p. 2; Clark III 1164; Clark IV 1339)

1909, August 24 — An airship circles twice above the city of Tallinn, Estonia, before it disappears over the Gulf of Finland. (*Dagens Nyheter* (Stockholm, Sweden), August 25, 1909; John A. Keel, "Mystery Aeroplanes of the 1930s, Part 1," *Flying Saucer Review* 16, no. 3 (May/June 1970): 10, 11; Clark III 1163; Clark IV 1337)

1909, September — 7:30 p.m. E. B. Hanna of South Windham, Connecticut, watches a high-flying, meandering "searchlight" along Windham Center Road for about an hour. After heading toward him, it changes direction and moves southward. ("What Mr. Hanna Saw May Have Been the Worcester Airship," *Willimantic (Conn.) Chronicle,* December 14, 1909, p. 8; Clark III 1165; Clark IV 1339)

1909, September 1 — 4:30 p.m. A cigar-shaped object is seen maneuvering at Gore, New Zealand, gradually disappearing to the northeast. ("In the Air," *Southland Times,* September 2, 1909, p. 5; "Gore Mystery Solved," *Southland Times,* September 4, 1909, p. 5)

1909, September 3 — 9:00 a.m. Several hundred residents of Bloomingdale, Indiana, see a "dirigible balloon" pass over the city for 15 minutes. The car beneath the gas bag is plainly visible. ("Sights Strange Airship," *Indianapolis Star,* September 4, 1909, p. 5; Clark III 1163; Clark IV 1339)

1909, September 20 — During the opposition of Mars, astronomer Eugène Antoniadi uses the 83cm aperture telescope at Meudon Observatory in Paris, France, to observe Mars. He sees no canals. The outstanding photos of Mars taken at the new Baillaud dome at the Pic du Midi Observatory in the French Pyrenees also bring formal discredit to the Martian canal theory, and the notion of canals begins to fall out of favor. Around this time, spectroscopic analysis also begins to show that no water is present in the Martian atmosphere. (Wikipedia, "Martian canals")

1909, September 24 — An object similar to a Parseval airship flies low over Gräsön [now Hindersön island] and Östhammar, Uppsala, Sweden, moving from northeast to west. Later, a winged object passes over the Slottsskogen park in Gothenburg, Sweden, at an altitude of 330 feet. (John A. Keel, "Mystery Aeroplanes of the 1930s, Part 1," *Flying Saucer Review* 16, no. 3 (May/June 1970): 10, 11; Clark III 1163; Clark IV 1337)

1909, September 30 — Evening. A balloon "supposed to be from Chicago" passes over Edinburgh, Indiana. Its anchor somehow gets entangled in high-tension wires of the traction station for the Indianapolis, Columbus, and Southern interurban rail. It moves south to Taylorsville a few minutes later, and it is so low to the ground that the occupants are able to talk to passersby. ("Tramp Balloon Snaps Wires," *Indianapolis Star,* October 1, 1909, p. 9; Clark III 1165; Clark IV 1339)

1909, October — 10:30 p.m. Rev. Ruth Smith and some church members are riding in a wagon in La Porte, Indiana, when the horses rear and a blinding light splashes across the road. A large structure resembling two inverted bowls, separated by a row of lights, is hovering, with several phosphorescent beams extending to the ground. It is encircled in a corona of light and begins moving slowly. After 15 minutes, it blinks out. (Lore and Deneault, p. 97; Clark III 1169; Clark IV 1343)

1909, December 13 — 10:00 p.m. A. W. Norris of Mabelvale, Arkansas, sees a bright, bobbling light moving through the air about 300 feet above him from the south. ("Airship Flies near Little Rock, Perhaps," Little Rock *Arkansas Gazette,* December 15, 1909, p. 7; Clark III 1165; Clark IV 1339–1340)

1909, December 22 — 6:30 p.m. Many residents of Worcester, Massachusetts, see a "brilliant ray" emitted by a large black object 1,000 feet high in the southwestern sky. After circling over the town, the object heads to the west, where it is seen over Marlboro. It returns to Worcester between 7:00 and 7:30 p.m., flying at low altitude and sporting a searchlight. One policeman thinks he sees enormous wings; others detect one or two figures inside. The airship is attributed to a Worcester businessman named Wallace E. Tillinghast, who has told the *Boston Herald* on December 12 that he has invented a heavier-than-air monoplane and has made more than 100 test flights at night to Boston and New York City. But Tillinghast never offers his aircraft for public viewing, and people gradually realize it is a hoax. ("Tells of Flight 30 Miles in Air," *Boston Herald,* December 13, 1909, p. 1; "Tillinghast to His Story Clings," *Berkshire (Mass.) Eagle,* December 14, 1909, p. 2; "Sailed over the Harbor: Unknown Airship Makes a Flight in Night," *Boston Globe,* December 20, 1909, p. 1; "Worcester Agape at Airship Lights," *Boston Herald,* December 23, 1909, p. 1; "Airship Seen in Two Cities," *Boston Globe,* December 23, 1909, p. 1; "Airship Flies High above Worcester," *New York Times,* December 23, 1909, p. 1; "Worcester Palpitating: All Excitement Today over That Airship," *Boston Globe,* December 23, 1909, pp. 1, 4; "Airship Is Just Venus," *Boston Globe,* December 24, 1909, pp. 1, 2; Thomas E. Bullard, *The Airship File,* The Author, 1982, pp. 270–279; Joseph Trainor, "The New England Airship Invasion of 1909," *Fortean Studies* 1 (1994): 59–70; Robert E. Bartholomew, "Two Mass Delusions in New England," New England Skeptical Society, April 1998; Stephen Whalen and Robert E. Bartholomew, "The Great New England Airship Hoax of 1909," *New England Quarterly* 75, no. 3 (September 2002) :466–476; Hilary Evans and Robert E. Bartholomew, *Outbreak!,* Anomalist, 2009, pp. 483–486; Clark III 1165; Clark IV 1139)

1909, December 23 — 6:00 p.m. Charles F. Flynt and several other people in Augusta, Maine, see a brilliantly lighted object moving from northeast to southwest when he is leaving his office at the newspaper. It is balloon-shaped, taller than it is wide. They watch it until it almost disappears. Flynt sees it again about one hour later near his residence on East Crescent Street. Flashes of light, apparently moving up and down, come from the object as it gradually settles down around Betsy Howard Hill. It swings around in the sky and moves in a different direction before it disappears again to the southwest, perhaps as far away as Lewiston. Some observers claim to see two wings and two lights, one in the rear and another shining on the wings. Horace E. Bowditch thinks it is diamond-shaped. ("Strange Object Passes over Augusta Early Thursday Evening," Augusta *Daily Kennebec Journal,* December 24, 1909, p. 9; Clark III 1165; Clark IV 1339)

1909, December 23 — 6:00–10:00 p.m. An airship is seen flying over Worcester, Massachusetts, and several nearby towns. Thousands of residents pour into the streets, bringing Worcester to a temporary standstill. P. D. Donahue of Baltic, Connecticut, says he could see two men in the vessel. After a sighting in Willimantic, Connecticut, the mayor says there is "no doubt but that it was an airship." Thousands of citizens of Boston, Massachusetts, and neighboring communities see an airship with lights flying at an altitude of around 400 feet. Alex Randall of Revere reports wings, tail, and propeller, but other observers only see a cylindrical shape at most. C. D. Rawson of Worcester later claims he had attached small lanterns and a reflector to the legs of large owls and was responsible for the sightings. ("Skyship of Mystery Flies above Boston," *Boston Journal,* December 24, 1909, p.1; "Mysterious Air Craft Circles about Boston for Nearly Six Hours," *Boston Herald,* December 24, 1909, p. 1; "Reporter Thinks He Found Home of Aeroplane," *Meriden (Conn.) Journal,* December 24, 1909, p. 5; "Airship Is Just Venus," *Boston Globe,* December 24, 1909, pp. 1, 2; "Airship Story Worries Them," *Boston Globe,* December 26, 1909, p. 14; "Airship Owl Is Worcester Tale," *Boston Herald,* December 26, 1909, p. 15; "UFOs an Old Question," *Worcester (Mass.) Daily Telegram,* December 23, 1966; Joseph Trainor, "The New England Airship Invasion of 1909," *Fortean Studies* 1 (1994): 59–70; Clark III 1165; Clark IV 1339)

1909, December 24 — Night. Thousands of people in Boston again watch the twin lights of a supposed airship ascending and descending in the sky. ("Certain As the Stars: Airship Again on Route," *Boston Globe,* December 25, 1909, pp. 1–2; Clark III 1165; Clark IV 1339)

1909, December 24 — In Providence, Rhode Island, author H. P. Lovecraft sees what people are claiming is Tillinghast's airplane bearing a powerful searchlight, but he identifies it as the planet Venus. ("City Is Airship Mad," *Providence (R.I.) Journal,* December 25, 1909, p. 2; "Providence Men See Searchlight in Sky," *Providence (R.I.) Journal,* December 25, 1909, p. 14; "Venus and the Public Eye," *Providence (R.I.) Sunday Journal,* December 26, 1909, Sec. 2, p. 5; H. P. Lovecraft, *Collected Essays, Volume 3: Science,* ed. S. T. Joshi, Hippocampus, 2005, p. 99; Joseph Trainor, "The New England Airship Invasion of 1909," *Fortean Studies* 1 (1994): 59–70; Clark III 1165; Clark IV 1339)

1910

1910 — Myrtle B. Lee, 7, and her brother Jack are playing in the yard of their home in Fulton County, Arkansas, when they see a bright object hovering above the trees about 150 feet away. It is silver-colored and shaped like a Zeppelin. They watch it begin moving and vanish in the distance. (Clark III 1165; Clark IV 1340)

1910, January 6 — 7:30 p.m. Mr. and Mrs. R. W. Tyler watch the bright light of a supposed airship above East Poultney, Vermont. ("The Inevitable Airship," *Rutland (Vt.) Daily Herald*, January 10, 1910, p. 4)

1910, January 7 — 1:00 a.m. Loomer Opera House Manager John H. Gray and policeman John Manley see an object with a "chain of electric lights hitched together with strand of fire" over Willimantic, Connecticut. ("Willimantic Men See Things Again," *Hartford (Conn.) Courant*, January 8, 1910, p. 1; Clark III 1165; Clark IV 1339)

1910, January 12 — 11:00 a.m. An unknown cigar-shaped aircraft is seen moving over Chattanooga, Tennessee, to the northeast. It returns on January 13. Probable hot-air balloon hoax. ("Airship Sailed over the City," *Chattanooga (Tenn.) News*, January 13, 1910, p. 1; "Airship in the Air," *Chattanooga (Tenn.) Daily Times*, January 13, 1910, p. 7; "Airship Stirs South," *New York Tribune*, January 13, 1910, p. 1; "Airship Out in Sky Again Today," *Chattanooga (Tenn.) News*, January 14, 1910, p. 7; "Another Airship Flying," *Chattanooga (Tenn.) Daily Times*, January 14, 1910, p. 6; Patrick Gross, URECAT, February 20, 2013; Clark III 1165; Clark IV 1340)

1910, January 12 — 4:30 p.m. An unknown airship flies high over Huntsville, Alabama, against the wind, from southwest to northeast, disappearing over the crest of Chapman Mountain. ("Strange Airship," *Huntsville (Ala.) Journal*, January 13, 1910, p. 1; "Airship Passes Almost Directly over Huntsville," *Nashville (Tenn.) Banner*, January 13, 1910, p. 9; Clark III 1165; Clark IV 1340)

1910, January 14 — 6:55 p.m. Two men on Summit Hill in Knoxville, Tennessee, see a large airship moving south. Its outlines are distinct. The men hear a hum of machinery and see sparks from "its motors." ("Positive That They Saw an Airship," *Knoxville (Tenn.) Journal*, January 15, 1910, p. 7; Clark III 1165; Clark IV 1340)

1910, January 21 — 7:30 p.m. A light that flashes from right to left then from left to right is seen in the northwest sky at Milbong, Queensland, Australia, for about 30 minutes. It hovers for about 5 minutes, then moves away, disappearing and reappearing more than a dozen times and appearing like "the flicker of a looking-glass in the sun." It repeats the performance on February 8. ("Strange Light in the Sky," *Ipswich (Queensland) Times*, February 11, 1910, p. 4)

1910, Spring or Summer — Morning. Lawrence J. Crone is playing on a baseball field in the Violetville neighborhood of Baltimore, Maryland, when he sees a metallic, brown, blimplike object, more than 100 feet long, hovering above a pine tree 200 feet away. It has a row of colored, rectangular windows. Through one he can see as many as 20 strange entities taking turns looking at him. Their heads are pointed, and they are dressed in light-colored garments with a fur-like texture. Each has small dots for eyes and a slit for a mouth. Two other young men also see the object and are badly frightened. (Patrick Gross, URECAT, February 20, 2013; Clark III 262)

1910, Summer — Night. Carl H. Darden is riding near Vernal, Utah, when he notices that his horse is acting strangely. He dismounts and walks the horse into a clearing, where he sees a row of lights a few feet above the ground. They are attached to a huge, hovering disc. After watching it a while, he steps toward it, and it makes a buzzing sound as if in warning. As he advances, it rises slowly into the sky until it reaches an altitude of several hundred feet, when it suddenly streaks off to the north. (Clark III 1169; Clark IV 1343)

1910, August 12 — 12:00 midnight. Captain Breyer and officers of the Dutch steamer *Valentijn* observes a luminous, rotating light wheel on the surface of the South China Sea near the Natuna Islands off Borneo. At one point the light flashes seem to be just above the water. ("Curious Light Phenomena of the Indian Seas," *Scientific American* 106 (1912): 51, 58; Dolan, USO1, 96)

1910, August 17 — Evening. Some workers in a forest east of Dessau, Saxony-Anhalt, Germany, watch as a balloon suddenly bursts into flame and falls into the woods. The remains are not found. Locals speculate that it was a toy balloon filled with hot air. ("Reported Explosion of a Balloon," London *Times*, August 19, 1910, p. 6; Clark III 1167; Clark IV 1341)

1910, October 25 — 5:30 p.m. A mystery airship is seen at Minderoo Station, Western Australia, by Mrs. A. J. Roe, wife of the station manager. She says it "looked compact, like a dirigible balloon, but it appeared to be squarer and

more like an aeroplane. The sun shone on it, and flashes came from it, as though reflected from something revolving, or from metal work." Three station hands also see the object. ("Mysterious Airship Sighted at Onslow," *Sydney (N.S.W.) Morning Herald,* December 5, 1910, p. 9; "Was It an Airship?" *Broken Hill (N.S.W.) Barrier Miner,* December 7, 1910, p. 7; Bill Chalker, "Early Australian Historical Encounters," 1997; Brett Holman, "Scareships over Australia—IV," Airminded, October 27, 2010; Clark III 67–68; Clark IV 91–92)

1910, October 27 — 1:10 a.m. An airship with a powerful headlight and red and green taillights is seen flying at 600 feet above Swift Current, Saskatchewan. Observers at Irvine, Alberta, see it at 4:45 a.m. going west. It is also seen at Medicine Hat, Alberta, flying southwest. ("Unknown Aeronaut in Alberta," *Calgary (Alberta) Herald,* October 27, 1910, p. 1)

1910, October 29 — 5:30 a.m. Two objects flying at a great altitude are seen over East Providence, Rhode Island, by newspaper workers and others up early. They are too distant to be recognized as dirigibles or balloons, but they resemble luminous pumpkins. One is far ahead of the other, but both are "cutting pigeon wings, looping aerial loops, circling and diving like birds and generally doing skylark stunts." ("Aviators Seen High Up in Air near City," *Providence Journal,* October 30, 1910, p. 1; Clark III 1166; Clark IV 1340)

1911

1911 — Spiritualist Joseph Benjamin Leslie publishes *Submerged Atlantis Restored,* which contains the psychic writings of spirit medium Carrie C. Van Duzee of Erie, Pennsylvania, channeled to her by four Atlantean spirits. The ancient Atlanteans, they say, "preferred aerial navigation to that of water" and used airships constructed out of a light metal and propelled by an electric force. (J. Ben Leslie, *Submerged Atlantis Restored,* Austin, 1911; Clark IV 116)

1911, January 9 — Harvard astronomer William H. Pickering tells the *Boston Post* that he believes Venus is populated by "huge monsters and lizards such as roamed the earth ages ago." He adds that "If human life exists on Venus, the people do not live as we do." ("Olden Monsters Inhabit Venus?" *Chicago Tribune,* January 9, 1911, p. 8)

1911, May 5 — 5:00 p.m. William Nixon is working at his father's sawmill 18 miles from St. George, Queensland, Australia, when he sees a flying machine carrying two men, one of whom is dressed in dark clothing. He estimates it is traveling from south to northwest at about 1,000 feet. ("Mysterious Airships," *Perth West Australian,* May 15, 1911, p. 5; "Mysterious Airship," *Clarence and Richmond Examiner* (Grafton, N.S.W.), May 18, 1911, p. 2; Clark III 68; Clark IV 92)

1911, July 22 — Evening. A ball of fire the size of the full moon is seen for several hours at Durango, Colorado. For a time it grows even larger, then diminishes in size until it disappears entirely. ("Large Ball of Fire Is Seen in the Sky," *Reno (Nev.) Evening Gazette,* July 25, 1911, p. 1)

1911, August 3 — 9:00 p.m. Adam H. McCullough and his wife Carrie are driving on Brinkerhoff Avenue in Mansfield, Ohio, when they notice a light, as brilliant as an arc light, in the northern sky. It has an apparent size of 6 inches and looks to be about 50 feet up. It remains visible for several minutes then fizzles out. ("A Phenomenon," *Mansfield (Ohio) News,* August 4, 1911, p. 10)

1911, August 11 — Night. The Japanese ocean liner *America Maru* is in the North Pacific Ocean two days east of Honolulu on its way to San Francisco when the passengers and officers see a "large meteor" shoot up out of the ocean, make a complete circle in the sky leaving a red, glowing trail, and descend back into the water. A short time later, another smaller meteor is seen rising and falling in the distance. The observations are followed by the appearance of a lunar rainbow. ("Meteors and Moon Rainbows Awe Ship," *San Francisco (Calif.) Examiner,* August 18, 1911, p. 3; Dolan, USO1, 97–98)

1911, August 24 — 1:00 a.m. Captain Tellefsen of the steamer *Solva* is called up by his first officer to look at rays from a pillar of light on the surface of the water in the Gulf of Thailand. The rays are quite bright, move very rapidly, persist about one hour, and appear to be electrical. ("Strange Lights at Sea," *Straits Times* (Singapore), September 5, 1911, p. 6; Dolan, USO1, 99–100)

1912

1912, February 17 — 7:30 p.m. The SS *Ariosto* of the Thomas Wilson line is steaming in the Arabian Sea 20 miles off the coast of modern Pakistan south of Karachi when the crew encounters a succession of waves of light on the surface coming from all directions. The water becomes agitated "like a boiling pot" as the lights pass through. The ship moves through the display in 20 minutes, after which it fades out, then it starts up again after 20 minutes with an ever greater intensity, lasting for 15 minutes. ("A Remarkable Phenomenon," Perth *West Australian,* April 18, 1912, p. 4; Dolan, USO1, 100–102)

1912, April 8 — Sunset. Charles Tilden Smith at Little Bedwyn, Wiltshire, England, observes the apparent fan-shaped shadow of a stationary object 45° in the sky against the altostratus cloud layer. The dark patch remains stationary against the moving clouds and is visible for 30 minutes. Meteorologist Charles John Philip Cave suspects the object is a pilot balloon. (Charles Tilden Smith, "Clouds and Shadows," *Nature* 89 (1912): 168; Charles J. P. Cave, "Clouds and Shadows," *Nature* 89 (1912): 268)

1912, Summer — Evening. A group of children playing outside in Osborn [now a flood plain north of Wright-Patterson AFB], Ohio, watch for several minutes a string of stars moving up and down like a snake and moving from east to west. (Clark III 1171; Clark IV 1345)

1912, Fall — About 2:30 p.m. C. F. Rowling, 15, and two friends see three perfectly round, pale-green objects less than a mile away in the northern sky over Alameda, California. They are traveling in parallel with the horizon in a vertical formation (one atop the other) and heading west. They are completely silent and 75–100 feet in diameter. He watches them for 10 seconds before they pass behind some trees. (Clark III 1170; Clark IV 1344)

1912, October 14 — 7:00 p.m. Noise from an unseen aircraft startles the residents of Sheerness, Kent, England, including Lieut. Raymond Fitzmaurice. Some can see an aerial light thought to belong to a dirigible. Nearby at Eastchurch, residents light flares to guide the craft in case it needs to land. The incident comes up in a debate in Parliament on November 21. MP William Joynson-Hicks asks First Lord of the Admiralty Winston Churchill whether the government has any zeppelins capable of traveling at 60 mph, but Churchill answers no. However, some authorities conclude that the incident is caused by the intrusion of the LZ 13 *Hansa* Zeppelin over British airspace. ("The German Airship over Sheerness," *The Aeroplane* 3 (November 14, 1912): 497; "The Alleged Visit of a Foreign Airship," London *Times,* November 22, 1912, p. 8; "A German Paper on the Sheerness Incident," *The Aeroplane* 3 (November 28, 1912): 540; "Airship Mystery: Was It a Zeppelin?" *Bradford (UK) Daily Telegraph,* January 14, 1913; Nigel Watson, Granville Oldroyd, and David Clarke, *The 1912–1913 British Phantom Airship Scare,* Fund for UFO Research, 1988; Alfred Gollin, *The Impact of Air Power on the British People and their Government, 1909–14,* Stanford University Press, 1989, pp. 223–227; Brett Holman, "The Sheerness Incident," Airminded, October 14, 2007; Hilary Evans and Robert E. Bartholomew, *Outbreak!,* Anomalist, 2009, pp. 486–487; Brett Holman, "Secrets of the German Aërial Fleet—I," Airminded, May 29, 2013; Nigel Watson, *UFOs of the First World War,* History Press, 2015, pp. 44–47; UFOFiles2, p. 6; Clark III 1166; Clark IV 1340)

1913

1913, January 4 — 5:00 a.m. Council worker John Hobbs hears aerial motors at Dover, England, and sees a light speeding toward him from the sea in a northeasterly direction. It is moving steadily despite a gale-force wind. Two other people, tradesman Mr. Langley and Police Constable Pierce, hear the noise but do not see the object. ("Unknown Aircraft over Dover," London *Times,* January 6, 1913, p. 6; "Mysterious Airship," London *Daily Telegraph,* January 6, 1913, p. 10; "Dover Airship Mystery," *Bristol (UK) Evening News,* January 7, 1913, p. 4; "The Airship Mystery," London *Times,* January 13, 1913, p. 6; "The English Phantom Airship," *Berliner Tageblatt,* February 25, 1913; "The Airship Psychosis in England," *Berliner Tageblatt,* February 26, 1913; Brett Holman, "Monday, 6 January 1913," Airminded, January 6, 2013; Brett Holman, "The Phantom Airship Panic of 1913: Imagining Aerial Warfare in Britain before the Great War," *Journal of British Studies* 55, no. 1 (2016): 99, 106; Clark III 1166; Clark IV 1340)

1913, January 6 — 10:00 p.m. Two lights "thought to be the lamps of an airship" maneuver in the sky over Lavernock Battery, Vale of Glamorgan, Wales. ("Mystery Airships," London *Daily Express,* January 7, 1913, p. 5; "Mysteries of the Air," London *Evening Post,* January 7, 1913, p. 6; Brett Holman, "Friday, 10 January 1913," Airminded, January 10, 2013; Clark III 1166; Clark IV 1340)

1913, January 17 — 4:45 p.m. Capt. Lionel Lindsay, chief constable of Glamorganshire, watches a large, fast-moving object above Cardiff, Wales, leaving in its wake a dense volume of smoke. Other witnesses see the light moving west from Cardiff at considerable speed. ("An Airship over Cardiff," London *Times*, January 21, 1913, p. 10; "The Airship at Cardiff," London *Times*, January 22, 1913, p. 10; "Airship Mystery," *Nottingham (UK) Daily Express*, January 21, 1913; "A Mystery of the Sky," *Yorkshire (UK) Post*, January 21, 1913; "Airship Ahoy!" *South Wales Evening Post*, January 21, 1913, p. 6; Brett Holman, "Tuesday, 21 January 1913," Airminded, January 21, 2013; Brett Holman, "Wednesday, 22 January 1913," Airminded, January 22, 2013; Clark III 1166; Clark IV 1340)

1913, January 25 — 7:00–8:30 p.m. Several people see a mysterious aircraft over the Clubmoor neighborhood of Liverpool, England. It is traveling about 25 mph and carries a brilliant light. ("Aircraft over Liverpool," London *Times*, January 28, 1913, p. 13; Brett Holman, "Tuesday, 28 January 1913," Airminded, January 28, 2013; Clark III 1166; Clark IV 1340)

1913, January 25 — 8:25 p.m. Villagers of Chancery, Ceredigion, Wales, watch a mystery airship with searchlights that turns south and leaves in the direction of Carmathenshire. ("Mystery Airship," London *Daily Express*, January 30, 1913, p. 1; Brett Holman, "Thursday, 30 January 1913," Airminded, January 30, 2013; Clark III 1166; Clark IV 1340)

1913, January 27 — 9:00 p.m. A resident of Stretford, Greater Manchester, England, sees an aircraft "like a huge ball" passing silently overhead in a southerly direction. He estimates its speed at 40 mph and its altitude as 700 feet. It has a yellowish light that later turns light red. When it is over Eccles, it turns westward in the direction of Liverpool. ("Is It a German Airship?" London *Daily Express*, January 31, 1913, p. 5; Brett Holman, "Friday, 31 January 1913," Airminded, January 31, 2013; Clark III 1167; Clark IV 1341)

1913, January 29 — 8:00 p.m. An airplane with a powerful searchlight is seen over Iași, Romania, coming from the direction of Russia. It maneuvers over the town for 10 minutes and then moves toward the barracks. Troops are mustered out and signals are given for the aviator to land. Two warning shots are fired, but the lights go out and the object disappears. Other mystery aircraft are seen this month at military barracks in Focșani, Brăila, and Târgovişte. ("'Russian Aeroplane' Scare in Roumania," *Manchester Guardian*, January 31, 1913, p. 9; Romania 8–9)

1913, February 1 — Evening. A Russian airplane equipped with a searchlight is seen maneuvering over Lvov, Ukraine. Another mystery plane, making signals, is spotted over Ternopil, Ukraine. (London *Globe*, February 4, 1913, p. 3; "Airplane Fired at," London *Daily Express*, February 3, 1913, p. 7; "Vénus et l'ignorance astronomique," *L'Astronomie* 27 (1913): 133)

1913, February 2 — 7:30 p.m. Police Constable Church at Aberavon, Wales, watches an airship flying for an hour over Swansea Bay and the Mumbles. ("Another Mysterious Airship," London *Times*, February 3, 1913, p. 6; Brett Holman, "Monday, 3 February 1913," Airminded, February 3, 2013; Clark III 1166; Clark IV 1340)

1913, February 2 — 8:45 p.m. Mr. Trubshaw of East Croydon, England, sees an airship come in from the southeast and disappear rapidly to the northwest. Rays of light stream from it on the right and the left and downward. Others see the object, said to be moving with the wind. ("Mysterious Fly-by-Night," London *Daily Express*, February 3, 1913, p. 7; Brett Holman, "Monday, 3 February 1913," Airminded, February 3, 2013; Clark III 1166; Clark IV 1340)

1913, February 2 — 9:25 p.m. Robert Lawrence Thornton sees an airship pass over his house in Framfield, East Sussex, England. ("The Mystery Airships," London *Daily Express*, February 4, 1913, p. 1; Brett Holman, "Tuesday, 4 February 1913," Airminded, February 4, 2013)

1913, February 5 — Evening. Numerous witnesses in Newport, Cardiff, and Neath, South Wales, watch a "dirigible" carrying a bright light pass in a northwesterly direction. Newspapers begin to suspect that the reports are actually of the planet Venus, fire balloons, or atmospheric illusions. ("The 'Mysterious Airship,'" *Manchester (UK) Guardian*, February 6, 1913, p. 9; William Porthouse, [Letter] "The Planet Venus Responsible," *Manchester (UK) Guardian*, February 27, 1913, p. 8; Hilary Evans and Robert E. Bartholomew, *Outbreak!*, Anomalist, 2009, p. 487; Brett Holman, "Thursday, 6 February 1913," Airminded, February 6, 2013)

1913, February 9 — 9:00 p.m. An earth-grazing meteor procession is seen from locations across Canada, the northeastern United States, and Bermuda, and from many ships at sea, including eight off Brazil, giving a total recorded ground track of over 7,000 miles. The meteors are particularly unusual in that there is no apparent radiant—no point in the sky from which the meteors appear to originate. Witnesses are surprised to see a procession of between 40 and 60 bright, slow-moving fireballs moving from horizon to horizon in a practically identical path. Individual fireballs are visible for at least 30 to 40 seconds, and the entire procession takes some 5 minutes to cross the sky. Subsequent observers also note a large, white, tailless body bringing up the rear, but the various

bodies making up the procession continue to disintegrate and travel at different rates throughout their course, so that by the time observations are made in Bermuda, the leading bodies are described as "like large arc lights in appearance, slightly violet in colour," followed closely by yellow and red fragments. Research carried out in the 1950s by Alexander D. Mebane uncovers a handful of reports from newspaper archives in the northern United States. At Escanaba, Michigan, the *Press* states the "end of the world was apprehended by many" as numerous meteors travel across the northern horizon. In Batavia, New York, a few observers see the meteors and many people hear a thundering noise, while other reports are made in Nunda and Dansville, New York (where several residents again think the world is ending) and Osceola, Pennsylvania. The observations are analyzed in detail later in 1913 by the astronomer Clarence Chant, leading him to conclude that as all accounts are positioned along a great circle arc, the source is a small, short-lived natural satellite of the Earth. One curious feature of the reports, highlighted by Mebane, is that several appear to indicate a second meteor procession on the same course around 5 hours later, although the Earth's rotation means that there is no obvious mechanism to explain this. One observer, A. W. Brown from Thamesville, Ontario, reports seeing both the initial meteor procession and a second one on the same course at 2:20 a.m. the next day. Chant's original report also refers to a series of three groups of "dark objects" that pass on the same course as the previous meteors from west to east over Toronto on the afternoon of February 10, which he suggests are "something of a meteoric nature." (Wikipedia, "1913 Great Meteor Procession"; Clarence A. Chant, "An Extraordinary Meteoric Display," *Journal of the Royal Astronomical Society of Canada* 7 (1913): 145–191; William H. Pickering, "The Meteoric Procession of February 9, 1913, Part 1," *Popular Astronomy* 30 (1922): 632–637; Alexander D. Mebane, "Observations of the Great Fireball Procession of 1913 February 9, Made in the United States," *Meteoritics* 1, no. 4 (1956): 406–421; Condon, pp. 570–571, 579–581; Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report,* Dundurn Press, 2006, pp. 31–35; "Sample Press Coverage of the 1913 Meteor Procession," *UFO Historical Revue*, no. 12 (September 2006): 7; Martin Beech and Mark Comte, "The Chant Meteor Procession of 1913: Towards a Descriptive Model," *American Journal of Astronomy and Astrophysics* 6, no. 2 (2018): 31–38; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 1, Anomalist, 2019, pp. 383–385)

1913, February 21–26 — Airships are seen every night in Britain, from the Orkney Islands to Portsmouth. Some sightings may be due to fire balloons, the remains of which occasionally turn up. ("Seeing Airships," *Manchester Guardian*, March 1, 1913, p. 9; Clark III 1166–1167; Clark IV 1341)

1913, February 21 — Evening. An airship is seen at several locations around Selby, North Yorkshire, England. It alternately flies and hovers, flashing a searchlight and skirting the roofs of houses before vanishing to the north at "great speed." At one point a group of businessmen waiting for a train at the Church Fenton railway station are treated to the sight of a powerful searchlight running along the tracks. Other witnesses hear the whir of motors as the vehicle passes by. ("The Fly-by-Night," London *Daily Express*, February 24, 1913, p. 7; "Mystery Airship," *London Evening Standard*, February 24, 1913, p. 13; "Air Spies Startle Britain," *Indiana (Pa.) Evening Gazette*, February 24, 1913, p. 3; "Night Raids by Air," London *Daily Express*, February 25, 1913, p. 1; "Mystery Airship," *London Evening Standard*, February 25, 1913, p. 5; Brett Holman, "Monday, 24 February 1913," Airminded, February 24, 2013; Brett Holman, "Tuesday, 25 February 1913," Airminded, February 25, 2013; Clark III 1166; Clark IV 1340)

1913, February 22 — 9:40 p.m. Lt. James Boyce is standing in his garden on North Cliff Avenue in Scarborough, North Yorkshire, England, when he sees a light moving in the sky. He watches it move to the north for 15 minutes. ("Seen at Scarborough," London *Daily Telegraph*, February 25, 1913, p. 11; Clark III 1166; Clark IV 1340)

1913, February 25 — 8:00 p.m. Coast guards at Hornsea, Yorkshire, England, see a bright light traveling to the west and report it to the Admiralty. Robert Falconer Jameson watches it through binoculars and sees that the lights are attached to a cone-shaped craft. A little later, the object appears over Hull, seen by crowds in the city center and Paragon Interchange for over an hour. It alters its course frequently and hovers occasionally. ("Airship Mystery," London *Daily Telegraph*, February 26, 1913, p. 11; Brett Holman, "Wednesday, 26 February 1913," Airminded, February 26, 2013; Clark III 1166; Clark IV 1340)

1913, February 28 — 8:15 p.m. Capt. J. H. Parker, skipper of the fishing trawler *Othello*, is in the North Sea about 170 miles northeast of Hull, England, when he sees an airship with a powerful searchlight. He is on the bridge with his chief engineer, and within a few minutes the object is directly overhead. It circles the vessel twice, keeping its searchlight focused on the ship at all times, then moves off to the west. ("Airship and Trawler," *Hull (UK) Evening News*, March 4, 1913, p. 8; "Reply to a Parting Salute," London *Guardian*, March 5, 1913, p. 7; "Mysterious Airship," *Liverpool Echo*, March 5, 1913, p. 5; "In the North Sea: Airship Nearly Collides with Trawler's Masts," *Manchester Courier and Lancashire General Advertiser*, March 5, 1913, p. 7)

1913, March 13 — 6:00 p.m. Two women walking along a forest road by the Schwielowsee between Caputh and Ferch, Brandenburg, Germany, observe an airship catch fire and explode. The fire brigades of three villages, 40 riflemen from a local garrison, and several police officers and medical attendants rush to the scene. They search the woods south of Potsdam until early morning but find nothing. Though the women are considered trustworthy, they are accused later of hoaxing the report. Later, airman Lt. Zwickau claims that he was firing rockets while flying from Leipzig to Döberitz in order to see his way in the night. ("An Airship Catastrophe near Potsdam?" *Berliner Tageblatt,* March 13, 1913, p. 3; "The Tale of the Airship," *Berliner Tageblatt,* March 13, 1913, p. 4; "Phantom Airships," London *Daily Telegraph,* March 14, 1913, p. 15; "Mysterious Airship near Berlin," *Manchester Guardian,* March 14, 1913, p. 8; Brett Holman, "Friday, 14 March 1913," Airminded, March 14, 2013; Clark III 1167; Clark IV 1341)

1913, April 8 — 8:23 p.m. An airship reappears over Cardiff, Wales, once again seen traveling at high speed to the southwest by Chief Constable Lionel Lindsay. ("The Cardiff Aerial Mystery Again," *Manchester Guardian,* April 9, 1913, p. 9; Brett Holman, "Wednesday, 9 April 1913," Airminded, April 9, 2013; Clark III 1167; Clark IV 1341)

1913, May (or May 1914) — Morning. Silbie J. Latham, 12, is working with his brothers Sid and Clyde on a cotton farm 2.5 miles west of Farmersville, Texas. Their two dogs, on the other side of a picket fence 50–75 feet away, begin barking and howling. The boys stop work and go to investigate. They see a little man, dark green in color and 18 inches high, who "looked like he was sitting on something." His arms are hanging down by his sides. He has a Mexican-looking hat on, but no other clothes. Right after the boys get there, the two dogs jump him and tear him to pieces. Blood and internal organs spew out, but it doesn't cry out. The boys go back and check the spot the next day, but the remains are gone. (Alex Evans [Jerome Clark], "Encounters with Little Men," *Fate* 31, no. 11 (November 1978): 83–86; Patrick Gross, URECAT, October 19, 2006; Clark III 262; Clark IV 302)

1913, June 29 — Sunset. A golden, oval-shaped object passes over Lansing, Michigan, from southeast to northwest at a great height. It moves swiftly, taking only 3 minutes. ("Strange Aircraft Passes over Lansing at Great Rate of Speed Sunday," *Lansing (Mich.) State Journal,* June 30, 1913, p. 3; Clark III 1167; Clark IV 1341–1342)

1913, August 22 — 4:00 a.m. The Rev. G. W. Payne, his wife, and a Mr. and Mrs. Preston watch an airplane with a searchlight hovering fairly high above the Hunter Valley near Newcastle, New South Wales. After a short time it moves away to the west. ("Newcastle Night Aviators," *Maitland (N.S.W.) Daily Mercury,* August 23, 1913, p. 4; Brett Holman, "A Miscellany of Australian Mystery Aircraft, 1903–1940—II," Airminded, August 12, 2022)

1913, October — Swiss astronomer Fritjof Le Coultre at the Geneva Observatory in Switzerland reports seeing "bluish-white flashes" on Mars for 17 consecutive nights. Lowell Observatory in Flagstaff, Arizona, also observes them. However, astronomer Guillaume Bigourdan at the Paris Observatory thinks the flashes are merely "auto-suggestion." ("Is Mars Trying to Signal Us?" *Santa Cruz (Calif.) Evening News,* November 24, 1913, p. 1)

1914

1914 — 3:00 p.m. Hans M. Schnitzler, 7, is sitting in his front yard in Pawtucket, Rhode Island, when he hears a musical humming sound and sees a 30-foot domed object about 25 feet away hovering about 10 feet above the ground across the street in front of a church. An opening appears and eight small entities emerge and begin singing a melody over and over again. Then they return inside. The object rises slowly and disappears behind the church. He remembers the melody and plays it on his harmonica years later. ("Correspondence," *CUFOS Associate Newsletter* 3, no. 6 (Dec. 1982/Jan. 1983): 3)

1914, January —A man and his children in Pretoria, South Africa, watch a "powerful light or lamp" attached to an airplane as it circles the neighborhood with a "loud swishing noise." (*Johannesburg Star,* August 26, 1914; Clark III 1172; Clark IV 1346)

1914, March — Twilight. A farmer is returning to his house at Lajoumard, Haute-Vienne, France, when he sees a round, green, luminous object hovering just above a hilltop. Several small beings emerge, walk around the machine, and go back inside. The object takes off. (Patrick Gross, URECAT, March 3, 2013; Clark III 262; Clark IV 302)

1914, Summer — Mid-afternoon. For about 60 minutes at Mount Lyndhurst Station, South Australia, an unusual substance floats by at a constant altitude. Some pieces, 6–8 inches long, fall to earth and leave no trace. (Keith Basterfield, "Angel Hair: An Australian Perspective," *IUR* 27, no. 1 (Spring 2002): 6)

1914, June — 4:00 a.m. Gustav Herwagen sees a lighted cigar-shaped object hovering near the ground a short distance away in Hamburg, Germany. It is surrounded by a halo of light and has a row of illuminated windows. Four or five small beings, about 4 feet tall, are standing next to it. They notice Herwagen looking at them and quickly enter the craft from a ladder. The door closes and the object rises soundlessly and disappears. (*UFO-Nachrichten,* April 1962; Illobrand von Ludwiger, *Best UFO Cases: Europe*, National Institute for Discovery Science, 1998, p. 93; Patrick Gross, URECAT, November 28, 2007; Clark III 262; Clark IV 302)

1914, August — William J. Kiehl, 18, is with seven others in a small cove along the shore of Georgian Bay, Ontario. They see a strange machine on the surface of the lake. Two little men wearing square masks and purple-green coveralls are working with a hose leading from the water to inside the UFO. Three other figures, dressed in khaki, are adjusting some rods that are pulsating with various colors. The beings notice the group watching them and run into the machine, which starts vibrating with colors. It starts to ascend, but one being has not made it inside and is hanging on. After hovering 12 feet in the air to balance itself, it rapidly accelerates upward. A likely hoax. ("Old-Timer Tells of Outer Spacemen in Letter to Wanaque Police Officer," *Paterson (N.J.) News,* August 15, 1966, p. 9; Lorenzen, *Flying Saucer Occupants,* Signet, 1967, pp. 20–23; Clark III 262; Clark IV 302–303; Dolan, USO1, 102–103)

1914, August 10–11 — Night. Maj. Becke, commander of defenses at Barrow-in-Furness, Cumbria, England, reports that two or three cigar-shaped airships are seen above the Vickers shipyard. Soldiers fire upon them with machine guns and the only anti-aircraft battery on the west coast. (UFOFiles2, p. 7–8)

1914, August 11–September 9 — Many British residents in South Africa observe a mystery monoplane that is assumed to be on a German reconnaissance mission. Most of the sightings are at night and at a distance. The government issues a statement on August 29 that there are no Union airplanes in South Africa, so any mystery aircraft are assumed to be enemies and should be fired upon. ("Mysterious Aeroplane Flights," *Cape Times* (Capetown), August 15, 1914, p. 7; "Aeroplane Sighted," *Cape Times* (Capetown), August 18, 1914, p. 5; "Aeroplane Reports," *Cape Times* (Capetown), August 20, 1914, p. 5; "The Aeroplane," *Cape Times* (Capetown), August 21, 1914; "Aeroplanes in the Union," *Cape Times* (Capetown), August 22, 1914, p. 7; "Mysterious Airship at Sanday," *Pretoria News,* August 24, 1914, p. 5; "Aeroplane Mystery," *Johannesburg Star,* August 26, 1914, p. 4; "The Mysterious Aeroplane," *Cape Argus* (Capetown), August 27, 1914, p. 5; "Aviator Discusses Air Visitors," *Cape Times* (Capetown), September 5, 1914, p. 5; "Aeroplane Problem," *Cape Times* (Capetown), September 18, 1914, p. 5; Edgar Sievers, *Flying Saucers über Südafrika,* Sagittarius, 1955; Gordon W. Creighton, "Saucers and South Africa," *Flying Saucer Review* 8, no. 4 (July/Aug. 1962): 18–21; Hilary Evans and Robert E. Bartholomew, *Outbreak!* Anomalist, 2009, pp. 487–489; Clark III 1172–1173; Clark IV 1346–1347)

1914, August 13 — 7:30 p.m. High Constable Hobson and numerous residents of Sweaburg, Ontario, see "two large aeroplanes" pass from east to west. Sporadic sightings of mystery airplanes continue in the region for the next two weeks. ("Reports Aeroplanes over Oxford Village," *London (Ont.) Free Press,* August 13, 1914, p. 2; "Three Aeroplanes Scan Topography of the Province, *London (Ont.) Free Press,* September 5, 1914, p. 8; Barry Greenwood, "And Yet More in 1914!" *UFO Historical Revue,* no. 12 (September 2006): 6; Hilary Evans and Robert E. Bartholomew, *Outbreak!* Anomalist, 2009, p. 491)

1914, August 14 — Afternoon. A large ball of fire sweeps over the southeast portion of Montpelier, Vermont, seen by employees of the C. P. Gill stone cutting plant near the Winooski River. It is accompanied by a loud noise. One man says the heat of the object has scorched his hands. The plant motor stops as the object passes over, and insulation from some electrical wires is found burned off. ("Great Ball of Fire," *Rutland (Vt.) Daily Herald,* August 18, 1914, p. 5)

1914, Autumn (or 1915) — Dusk. A man is having an outdoor meal with his family in Bujoreanca, Romania, when they see a reddish object moving to the east 60 feet above the ground, causing trees to bend from its movement, and making a whistling noise. It leaves a trail of glowing sparks and reappears for 6–7 days in the same position. (Hobana and Weverbergh 224)

1914, September — Two schoolboys named Uden and Hopkins are wandering along Caerphilly Mountain, South Wales, when they encounter an unexpected mist. Two white humanoid figures with piercing eyes and unusually tall hats are standing at the edge of it. They approach, and the boys take off. (Center for UFO Studies, HUMCAT Index 1910–1939, p. 9; Patrick Gross, URECAT, March 5, 2013; Clark III 262–263; Clark IV 303)

1914, September 3 — 9:00 p.m. Three airplanes with powerful searchlights that sweep the countryside are seen at Petrolia, Ontario. Scores of residents watch the spectacle for hours as every field glass in town is "brought into requisition." One plane flies in the direction of Oil Springs to the south, while a second hovers near Kingscourt, and a third appears to travel eastward toward London along the Grand Trunk Railway. ("Petrolea Planes," *London (Ont.) Free Press,* September 5, 1914, p. 2; "Three Aeroplanes Scan Topography of the Province," *London (Ont.) Free Press,* September 5, 1914, p. 8; "Why Get Excited?" *London (Ont.) Free Press,* September 5, 1914, p. 16)

1914, September 8–10 — Mysterious airplanes are seen at Springbank, Ontario. Fred Bridge is one of the witnesses who sees the searchlights and hears the roar of the motors, and he urges the authorities to take the reports seriously. ("Pipe Line Road Saw Three Aeroplanes," *London (Ont.) Free Press,* September 11, 1914, p. 9)

1914, September 8–11 — Soldiers of the 19th Regiment on guard at the Welland Canal, Ontario, observe airships with red lights passing over St. Catharines. One drops a rocket "large enough to wreck a house." ("Airships Fly over the City," *St. Catharines (Ont.) Standard,* September 12, 1914, p. 1; Clark III 1172–1173; Clark IV 1347)

1914, September 9 — Mid-day. Amateur astronomer William Herbert Steavenson points his 3-inch refracting telescope in West Norwood, south London, England, at the planet Mercury, then about 8° distant from the Sun, when a round, luminous object the apparent size of the planet, but brighter, speeds across his field, passing centrally from south to north in about 3 seconds. A few seconds later, another appears going in the same direction. More follow, and the display continues until at least 3:00 p.m. when the sky becomes overcast. He watches several hundred bodies pass; about half are perfectly round and the rest are dumbbell shaped. All the objects are well defined and intrinsically brighter than Venus. The prevailing color is yellowish white. Steavenson sends a telegram to the Rev. T. E. R. Phillips at Ashstead, Surrey, but the sky is now overcast and he cannot confirm the observation. Steavensen thinks high-altitude seeds are the most likely explanation. (W. H. Steavenson, "Bright Objects Observed near the Sun," *Journal of the British Astronomical Association* 25 (1914): 36–38)

1914, October 10 — Afternoon. Albert Alfred Buss is observing the sun using a spectrographic telescope at Manchester, England, when he sees an "absolutely black spindle-shaped object" against the sun. (Albert Alfred Buss, "Cosmic and Terrestrial Flotsam and Jetsam," *English Mechanic* 100 (October 14, 1914): 256; Clark III 1170; Clark IV 1345)

1914, October 12 —Residents of Niagara Falls, New York, hear engine noises and watch lights sailing across the sky. Some of them stop to hover. (*Niagara (N.Y.) Gazette,* October 13, 1914; Clark III 1173; Clark IV 1347)

1914, October 21 — 5:50 a.m. Several soldiers see an airplane carrying a powerful spotlight flying directly above the Wolesley Barracks [now CFB London] and nearby ordnance depots in London, Ontario. Sgt. Joseph, on guard duty, hears the nose of engines first, then looks and sees the airplane coming from the northeast. It is flying too high and fast to allow anyone to fire on it. ("Soldiers Claim They Saw Airship over Barracks," *London (Ont.) Evening Free Press,* October 21, 1914, p. 1)

1914, November 19 — After 12:00 midnight. Guards on duty at the Toronto Power Generating Station in Niagara Falls, Ontario, see mysterious red, green, and yellow lights, perhaps signals, flashing on the US shore. They seem to form particular patterns. ("Signal Across River?" *Buffalo (N.Y.) Express,* November 19, 1914, p. 7)

1914, November 19 — Night. Two airplanes with searchlights are seen above Forestville, New York, flying northward toward Silver Creek. ("Seeing Things in Air," *Buffalo (N.Y.) Express,* November 21, 1914, p. 7)

1914, November 21 — Some 20–30 people watch an airship flying at 2,300 feet descend to about 1,300 feet and shine a searchlight on a passing ship near Skjaervser lighthouse on the island of Mindlandet, Nordland, Norway. ("Airship at Tjølta," *Morgenbladet* [Oslo], November 25, 1914, p. 2; Clark III 1167–1168; Clark IV 1342)

1914, December 4 — 12:00 midnight–5:00 a.m. Many people in Toronto, Ontario, wake up to hear the apparent rumbling of airplane engines, loud enough to rattle some windows. No planes are visible, so some suspect the noise is created by a crane dredge operating in the Inner Harbour. ("Aeroplane Raid Robs Citizens of Slumber," *Toronto (Ont.) Star,* December 4, 1914, p. 6)

1914, December 15 — 4:10 p.m. The crew of a Hull trawler, the SS *Ape,* is streaming toward Great Yarmouth, Norfolk, England, when they see a "black object astern" which gradually approaches them. It turns and heads for the Lincolnshire coast where it vanishes in the fog. (UFOFiles2, p. 8)

1915

1915 — 11:00 p.m. Angel Hansen sees, in the northern sky of Bergen, Norway, a bright, brown-red object twice as big as the Moon. It remains motionless for 30 seconds, then descends, stops, and hovers for 15 seconds. It repeats this maneuver two or three times. Then it accelerates and disappears to the west. ("Norske og danske rapporter 1915–1971," *UFO Nyt* 1972 no. 3 (May/June): 118)

1915, February 14 — 9:15 p.m. The mayor and three city constables of Brockville, Ontario, see the lights of unknown aircraft crossing the St. Lawrence River heading for Ottawa. They can hear the sound of motors. A second flying machine is heard as it crosses the river from the direction of Morristown, New York. Three balls of fire drop from it into the river. Two more objects pass from the east and west ends of Brockville. The mayor, who has seen one of the planes flash a searchlight beam that lights up a city block, tells the police chief to alert the mayor and police chief in Ottawa. At 9:30 p.m., the mayor of Gananoque, Ontario, reports that two invisible aircraft are heard flying over his town. Prime Minister Robert Borden hears about the reports and orders the lights on Parliament Hill to be turned off at 11:15 p.m. Several Members of Parliament rush to the roof to see if they can spot any airplanes. The entire city shuts off its lights 5 minutes later. The airplanes do not reappear, but Ottawa is placed on high alert. Later, Brockville police find two paper balloons that might explain the sightings. ("Ottawa in Darkness Awaits Airplane Raid," *Toronto Globe*, February 15, 1915, pp. 1–2; "Scare in Ottawa over an Air Raid," *New York Times*, February 15, 1915, p. 1; "Yankees Sent Up Balloons Which Exploded at Brockville Causing Airship Raid Scare," *London (Ont.) Free Press*, February 15, 1915, pp. 1, 9; "House To Be Dark Again To-night," *Ottawa Journal*, February 15, 1915, p. 1; "Were Toy Balloons and Not Aeroplanes!" *Toronto Globe*, February 16, 1915, pp. 1–2; "Parliament Hill in Darkness," *Toronto Globe*, February 16, 1915, p. 2; "Ottawa Again Dark in Fear of Air Raid," *New York Times*, February 16, 1915, p. 4; "Laughing at Ottawa," *Ottawa Journal*, February 16, 1915, p. 2; "No Confidence Is Placed in Story of Fire Balloons from Morristown," *Ottawa Journal*, February 16, 1915, p. 12; "Airships on Canada Border," *Eagle River (Wis.) Review*, February 19, 1915, p. 4; Robert Bartholomew, "Phantom German Air Raids on Canada: War Hysteria in Quebec and Ontario during the First World War," *Canadian Military History* 7, no. 4 (1998): 29–36; Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report*, Dundurn Press, 2006, pp. 36–38; Hilary Evans and Robert E. Bartholomew, *Outbreak!* Anomalist, 2009, pp. 492–493; Brett Holman, "The Air Raid That Didn't," Airminded, February 13, 2014; James Powell, "The Phantom Air Raid, 14 February 1915," Historical Society of Ottawa, October 30, 2014; Clark III 1173; Clark IV 1347)

1915, February 15 — Early morning. Residents in a Toronto, Ontario, suburb notify police of a "strange aeroplane" hovering above their homes. Later, a man in Guelph sees "three moving lights passing over" the Ontario Agricultural College. He alerts other residents in his boarding house and they watch the silent lights until dawn. (Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report*, Dundurn Press, 2006, pp. 37–38)

1915, February 19 — 7:55 a.m. A mystery airplane passes over Buffalo, New York, at 2,500–3,000 feet, headed to the northeast. At times it seems to head directly for Canada, but it quickly swerves back again. ("Buffalo Surprised by Visit of Aeroplane," *Niagara Falls (Ont.) Evening Review*, February 19, 1915, p. 1; Clark III 1173; Clark IV 1347)

1915, April 26 — Possibly the first UFO film ever made, *The Mysterious Airship* premieres in the United States. A lost two-reel French short produced by the Ideal Film Company in Fort Lee, New Jersey, and distributed by United Film Service, the film does involve a mysterious airship built by aeronauts, but it is more of a murder mystery. ("United Film Service," *The Moving Picture World* 24 (May 1, 1915): 806; Barry Greenwood, "UFO Feature Film: In 1914!" *UFO Historical Revue*, no. 12 (September 2006): 2–4; Barry Greenwood, "*The Mysterious Airship*: An Early Silent Film, Update," *UFO Historical Revue*, no. 14 (May 2015): 1–3; Internet Movie Database, "The Mysterious Airship")

1915, Summer — Bjarne Westvand, 6, sees a dark, bell-like object descend and land behind a hill at the mining settlement of Jakobsbakken, Nordland, Norway. Two 3-foot-tall humanoids appear from behind the hill and move toward him. One "smiles" at the boy, who is about the same size. It has long, dark, wavy hair, gray skin, and a disproportionately large head. They are both wearing dark brown coveralls. After conversing in a booming voice, they return behind the hill, and shortly afterward the object rises up and disappears into the sky. ("Kloss-hold kontakt med humanoider i 1915!" *Rapportnytt* 1981 no. 4, pp. 3–4)

1915, Summer (or Summer 1916) — 11:00 p.m. A platoon of officer cadet corps troops on a training mission observe a bright, coppery-orange disc the apparent size of the full moon at 40°–50° elevation near Henley-on-Thames, South Oxfordshire, England. It shifts its position to show a straight edge, then dips slightly before disappearing suddenly. (Clark III 1171; Clark IV 1345)

1915, Late June — Just before dawn. Cecilia Peel Yates of Ashburton, Devon, England, is awakened by her dogs barking. She sees outside her bedroom window a bright light in the sky bearing north. It disappears in the direction of Haytor rocks on Dartmoor. This incident is followed by others at Hexworthy and Dartington in July and August, so much so that British Naval Intelligence sends two officers out to investigate. ("An Early UFO: That's Official," *Northern UFO News,* no. 124 (Mar./Apr. 1987): 6; Nick Redfern, "UFOs and the Military, 1915: Pt. 1," Mysterious Universe, May 7, 2014; Nick Redfern, "UFOs and the Military, 1915: Pt. 2," Mysterious Universe, May 8, 2014; Clark III 1171; Clark IV 1345)

1915, July 16 — Silvanus Edworthy sees a lighted airplane in London, Ontario. ("Saw an Aeroplane," *London (Ont.) Free Press,* July 17, 1915, p. 3)

1915, July 17 — Another mystery airplane is seen near Massena, Ontario. ("People near Massena, Ont., Spy Strange Lights in Heavens," *London (Ont.) Free Press,* July 20, 1915, p. 9)

1915, July 18 — Night. A military guard at the wireless station at Point Edward, Ontario, fires five shots at what he takes to be airplanes. Two large paper balloons plummet to earth. ("Point Edward Guard Brings Down Balloons," *London (Ont.) Free Press,* July 21, 1915, p. 7)

1915, July 20 — 11:00 p.m. A mysterious aircraft is seen by several citizens of Châteauguay, Quebec. A rumor arises that a German resident of the town, now missing, has secretly flown across the border to the United States. ("French Believe German Officer 'Flew the Loop,'" *London (Ont.) Free Press,* July 22, 1915, p. 1)

1915, September 4 — 9:30 p.m. Two British Naval Intelligence officers, Lt. Col. William Price Drury and Lt. C. Brownlow, on Dartmoor, Devon, England, watch a "bright white light, considerably larger in appearance than a planet" ascend steadily from a meadow to a height of 50–60 feet. It then swings 300 feet or so to the left and suddenly vanishes. The officers have been investigating reports of similar lights seen in the region during the summer. In December, GHQ Home Forces issues a 16-page confidential report on the investigation and concludes there is "no evidence on which to base a suspicion that this class of enemy activity ever existed" and that 89% of the reports are explained. Some "moving lights in the air" are attributed to marsh gas. ("An Early UFO: That's Official," *Northern UFO News,* no. 124 (Mar./Apr. 1987): 6; Nick Redfern, "UFOs and the Military, 1915: Pt. 1," Mysterious Universe, May 7, 2014; UFOFiles2, pp. 11–12; Clark III 1171; Clark IV 1345)

1916

1916? — Mrs. Whiteland of Aldeburgh, Suffolk, England, sees from an open window a "round platform" on which nearly a dozen men wearing blue uniforms and little round hats stand gripping a handrail. It is moving in the air about 30 feet above the house and coming from the direction of a nearby marsh. It moves toward a railway yard and disappears behind some houses. ("The Aldeburgh Platform," *Flying Saucer Review* 15, no. 1 (Jan./Feb. 1969), pp. 23–24; "The Aldeburgh Platform," parts 1–3; David Halperin, "UFOs, Screen Memories, and the Aldeburgh Platform Mystery," April 8, 2016; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History,* Anomalist, 2015, pp. 299–314; Clark III 263; Clark IV 303)

1916, January 15 — Dusk. Mame Zehner of the Kensington neighborhood in Philadelphia, Pennsylvania, sees a "big black dot" in the sky and thinks she can discern the framework and engine of an airplane. ("Aeroplane or Blackbird?" *Philadelphia Evening Bulletin,* January 24, 1916, p. 2; "Raid by Phantom Aero," *Washington (D.C.) Post,* January 26, 1916, p. 3; Michael T. Shoemaker, "UFO Saboteurs," *Fate* 38, no. 12 (December 1985): 59–64; Clark III 1173; Clark IV 1347)

1916, January 31 — Afternoon. J. M. Smith, a shoe salesman in the Tacony neighborhood of Philadelphia, Pennsylvania, watches a "big aeroplane" swoop down to within 250 feet above his home and head southwest toward the Frankford Arsenal. A spokesman at the arsenal is adamant that it was "nothing more than blackbirds." ("Another Aeroplane Sighted," *Philadelphia Evening Bulletin,* February 1, 1916, p. 3; Michael T. Shoemaker, "UFO Saboteurs," *Fate* 38, no. 12 (December 1985): 59–64)

1916, January 31 — 8:25 p.m. Royal Flying Corps Lieut. Reginald Maxwell is cruising his B.E.2c biplane at 10,000 feet near Romford, Essex, England, patrolling for German Zeppelins. He sees an "artificial light" to the north. He follows it northeast for 20 minutes, but it moves higher and he loses it in the clouds. At the same time, Royal Flying Corps pilot Sub-Lieut. J. Eric Morgan, also flying a B.E.2c at 5,000 feet near Rochford, Essex, and looking for Zeppelins, sees an object about 100 feet away with a row of windows "like a railway carriage with the blinds drawn." He tries to close on it, but his engine is malfunctioning. When he fires his pistol at it, the lights rise and

rapidly disappear. Morgan is forced to make a crash landing. (Capt. Joseph Morris, *The German Air Raids on Great Britain, 1914–1918*, Sampson, Low, Marston, 1925, pp. 81–82; David Clarke, "The Pennine Phantom Helicopter and Other Scares (Pt. 2)," *UFO Brigantia*, no. 25 (March/April 1987): 7, 13–14; David Clarke, "Britain's First Military UFO Encounter?" Part 1 and Part 2, The Real UFO Project, 2004; UFOFiles2, p. 10; Clark III 1173; Patrick Gross, "ACUFO," November 8, 2023, and "ACUFO," September 23, 2023; Clark IV 1347)

1916, January 31 — 8:45 p.m. Albert J. Parsons, a security guard at the DuPont Powder Plant at Carney's Point, New Jersey, across the Delaware River from Wilmington, Delaware, sees the outline of what seems to be an airship moving slowly or hovering above the plant. After 15 minutes, it moves off to the southeast. Several other men report the whirring noise of motors, and flying objects are also reported in Coatesville, Pennsylvania, and Richardson Park in Wilmington. Plant officials take his report seriously at first, but when in a subsequent interview on February 3, he mentions that the airship carried a light, they begin to discount it because "Men familiar with aeroplanes say these machines do not carry lights." They begin to attribute it to "auto-hypnosis." A motor is heard again in the area at 9:00 p.m. and 12:00 midnight on February 5. Other Wilmington residents begin reporting lights or solid machines. Finally, the sightings are explained as a particularly bright conjunction of Jupiter and Venus in the western sky. ("Mystery Airship Hovering over Powder Plants," Wilmington (Del.) *Every Evening*, February 3, 1916, pp. 1, 6; "Aeroplane Hovers over Powder Plant at Carney's Point," *Wilmington (Del.) Evening Journal*, February 3, 1916, pp. 1, 14; "Doubt by Du Ponts That Airship Flew over Powder Mill," *Philadelphia Evening Bulletin*, February 3, 1916, p. 1; "Powder Guard Says He Saw Airship," *Wilmington (Del.) Morning News*, February 4, 1916, p. 1; "Now Think Airship Was Only Phantom," *Wilmington (Del.) Evening Journal*, February 4, p. 2; "DuPont Officials Confirm Visit of Mysterious Aero," *Philadelphia Inquirer*, February 4, 1916, pp. 1, 6; "Again Report Airship over Carney's Point," *Wilmington (Del.) Evening Journal*, February 5, p. 7; "Another Citizen 'Sees' the Airship," *Wilmington (Del.) Evening Journal*, February 7, p. 1; "Jupiter and Venus Again Flirt with Many Sky Gazers," *Wilmington (Del.) Evening Journal*, February 15, p. 1; Michael T. Shoemaker, "UFO Saboteurs," *Fate* 38, no. 12 (December 1985): 59–64; Robert E. Bartholomew, "War Scare Hysteria in the Delaware Region in 1916," *Delaware History* 28 (Spring/Summer 1998): 71–76; "Air Prowler over Delaware: How Bright Planets Sparked Wartime Airship Scare," *Salisbury (Md.) Daily Times*, January 26, 2024)

1916, February 5 — A railway worker spots two airplanes near Montreal, Quebec. Some think there is a connection between the sighting and a suspicious man seen under the Victoria Bridge across the St. Lawrence River. Guards open fire on the figure, who then flees. ("Two Aeroplanes Close to Montreal," *London (Ont.) Free Press*, February 7, 1916, p. 1)

1916, February 12 — Night. Mrs. A. Boyce and her daughter see a mystery airplane to the east of Dover, Delaware, flying south. ("Air Ship or Owl," Wilmington (Del.) *Every Evening*, February 19, 1916, p. 6)

1916, February 13 — Evening. A conjunction of Venus and Jupiter in the western sky is responsible for reports of a lighted airplane in London, Ontario. ("Display in Sky Mistaken for an Aerial Invasion," *London (Ont.) Free Press*, February 14, 1916, p. 12)

1916, February 13 — Evening. William K. Knight, a farmer living two miles east of Dover, Delaware, sees an object in the sky during a storm. He calls his wife Lillian and son Harold, who also watch the object for 10 minutes. It has a bright red light and a white light. The object moves several times, finally descending. ("They're 'Seeing Things' Down the State, Too," *Wilmington (Del.) Evening Journal*, February 14, p. 1)

1916, February 13 — 8:00–9:00 p.m. Citizens of Wilmington, Delaware, crowd the streets to see what they think is a German airplane. It is first seen floating over Ninth and Broome streets, and it later is seen flying low and circling the Baltimore and Ohio railway depot at Delaware Avenue and DuPont Street. It is also seen from the Pennsylvania railway station and over Richardson Park. Witnesses in the Lyon Tabernacle hear a machine and rush out to look for an airplane, which they see drifting along Brandywine Creek, then hovering above the Washington Street Bridge, before passing out of sight to the southwest. ("Citizens Declare They Saw Airship," *Wilmington (Del.) Morning News*, February 14, 1916, pp. 1–2; "Honest, Now, Did You Yourself See That Aeroplane?" Wilmington (Del.) *Every Evening*, February 14, 1916, p. 7)

1916, February 15 — Night. Two dozen residents of Middletown, Delaware, see an airplane carrying three lights (red, white, and bluish-green) in the eastern sky. It is first spotted by Norman L. Beale and his wife passing above the Delaware River. Elmer Vinyard, night operator at the telephone exchange, ad Ernest A. Truitt also see the object and its lights. Truitt can hear a "whirring noise." ("Are Sure They Saw an Aeroplane," Wilmington (Del.) *Every Evening*, February 16, 1916, p. 13)

1916, February 26 — 4:30 a.m. John Tullyson, head watchman at Globe Elevators, and John Gustavson at the Carnegie Coal Dock in Superior, Wisconsin, hear an engine noise and see a large flying object "50 feet wide and 100 feet long," with three lights, "one on each end and one in the middle." Moving swiftly at 600 feet altitude, the object carries a long rope trailing behind it with a large object attached to it. Three "men" are inside the craft, one of them sitting in the front of the machine. The other two seem to be looking around. Possible Chinese lantern or airplane. ("Airship Soars over Allouez Docks," *Superior (Wis.) Telegram,* February 26, 1916, p. 1; "Airship Is Seen over Twin Ports," *Eau Claire (Wis.) Leader-Telegram,* February 27, 1916, p. 1; "Aeroplane over Great Lakes Is Alarm Source," *Minneapolis (Minn.) Star-Tribune,* February 27, 1916, p. 1; "Strange Biplane Hovers over Superior Elevators," *Minneapolis (Minn.) Journal,* February 27, 1916, p. 2; "Mysterious Aeroplane Continues Nocturnal Trips over Superior," *Superior (Wis.) Telegram,* February 29, 1916, p. 5; "Mysterious Aeroplane over Lake Superior," *Burlington (Vt.) Free Press,* March 1, 1916, p. 12; "Practical Jokers Get into Aeroplane Game," *Superior (Wis.) Telegram,* March 1, 1916, pp. 4, 12; "Aeroplane Seen at Superior," *St. Albans (Vt.) Weekly Messenger,* March 2, 1916, p. 10; "Strange Biplane Hovers over Superior Elevators," *Golden Valley (N.Dak.) Chronicle,* March 3, 1916, p. 3; "Aeroplane Lands at Vermillion Lake," *Superior (Wis.) Telegram,* April 11, 1916, p. 8; Patrick Gross, URECAT, March 16, 2013; Clark III 263; Clark IV 303)

1916, March 12 — Early evening. Claude D. McGee is walking home from a trip to a ranch outside Lowry, South Dakota, when he sees a strange glowing light in the hills ahead of him. Suddenly the light swings in a huge arc down into the valley but stays close to the wall of hills where it comes to rest. It stays there a few moments then swings back to where it had been about 2 miles away. It repeats the action twice then disappears. (Clark III 1171; Clark IV 1345)

1916, May 4 — Evening. Astronomers Charles Dillon Perrine and Anna Estelle Glancy observe an object resembling a comet at the National Observatory in Córdoba, Argentina. It is moving remarkably fast, moving 10° toward the sun within an hour and passes below the horizon. It has a prominent tail of 8°–10° in length. ("Comet or Meteor?" *Scientific American* 115 (1916): 493)

1916, May or June — Late morning. A witness about 8 miles south of Rensselaer, Indiana, watches an elongated oval object, 40 feet long and 8–12 feet thick, hovering above the ground about one mile away at the foot of a hill. It appears to have a dull-gray finish. After 10 seconds, it streaks away at a 25° angle toward the southeast and disappears. (Lore and Deneault, p. 104)

1916, July 6 — Hundreds of residents of Windsor, Ontario, watch a biplane over the city for 30 minutes. Several witnesses using binoculars claim they can see the "figure of the aviator." ("Unknown Aviator Surveys Windsor," *London (Ont.) Free Press,* July 7, 1916, p. 14)

1916, July 19 — 10:30 p.m. Walter H. Eager and another witness in Huntington, West Virginia, watch a nebulous object in the shape of a dirigible that slowly fades from view. Possibly a light pillar created by a nearby blast furnace. (Walter H. Eager, "An Unusual Aurora," *Scientific American* 115 (1916): 241; Martin Shough and Wim van Utrecht, *Redemption of the Damned,* vol. 1, Anomalist, 2019, pp. 391–397)

1916, December 17 — On the Western front in Europe, Canadian soldier Maurice Philipp Tuteur and two sergeant majors watch a Zeppelin-like object rise into the clouds in the rear of their lines. It darts ahead at an estimated speed of 200 mph, turns around, darts backward, and shoots up and disappears. ("I Saw a Flying Saucer," *Flying Saucers,* May 1959, pp. 6–18, 78; Clark III 1170; Clark IV 1345)

1917

1917, between January and April — Anni Lattu, who lives alone in the Finnish village of Jyrinvaara (or Alho), said to be about 3.7 miles west of Kurkieki (now in the Russian Republic of Karelia) and near a lake named Kankaanlampi, sees a large machine shaped like a wash basin land near her house. Small creatures, which she describes as devils, emerge from it by ladder. Somehow she can understand a bit of their language, especially one that she describes as the "leader," and they take her on board by force, flying her around the world and "near the stars." The craft is warm inside and it has comfortable seats. The beings want her to stay with them, but she refuses, and they return her to the road outside her house. (Heikki Virtanen, "First Known Abduction Case in Finland?" *Nordic UFO Newsletter,* 1988 no. 1, pp. 3–4)

1917, April — Night. Residents of the African American neighborhood of Charlotte, North Carolina, report hearing strange, motor-like noises in the air at night for several nights. Some have fleeting glimpses of the swiftly moving dark objects that are causing the noise. ("The Colored People Are Seeing Visions," *Charlotte (N.C.) News,* April 11, 1917, p. 13)

1917, April 12 — Residents of Manchester, New Hampshire, hear whirring sounds like an airplane in the air. (Clark III 1173; Clark IV 1347)

1917, April 13 — Early morning. Two National Guardsmen are stationed on the railroad bridge linking Portsmouth, New Hampshire, and Kittery, Maine, when they hear the noise of an airplane. They see an unidentified aircraft circling near the bridge. When it descends, apparently to make a pass at the bridge, one of the guardsmen panics and fires his rifle at it. It moves off and disappears in the distance. A police officer on duty at Rochester, New Hampshire, hears an aerial noise that he assumes is an airplane, and James Walker, a railway motorman, sees an airplane over Gonic, New Hampshire, high in the air and flying north. ("Strange Airship Fired Upon," *Indiana (Pa.) Evening Gazette,* April 13, 1917, p. 1; "Hunt for Aircraft Base," *Manchester (N.H.) Union,* April 14, 1917, pp. 1, 3; "Guards on Kittery Bridge Fire at Mysterious Airplane," *Lewiston (Maine) Daily Sun,* April 14, 1917, p. 3; "Strange Aeroplane Heard and Seen by Rochester People," *Manchester (N.H.) Union,* April 14, 1917, pp. 1, 3; Hilary Evans and Robert E. Bartholomew, *Outbreak!* Anomalist, 2009, pp. 496–497; Clark III 1173; Clark IV 1347)

1917, April 14–17 — 8:00 p.m. An airship passes over Milton, New Hampshire. (Clark III 1173; Clark IV 1347)

1917, April 23 — Residents of North Conway, New Hampshire, observe mysterious lights near Mount Kearsarge. ("Lights Hover over Kearsarge," *Manchester (N.H.) Union,* April 26, 1917, p. 1)

1917, April 30 — Night. Mrs. Edson Roberts of Wolfeboro, New Hampshire, hears an aircraft above her house, near the East Alton line. An hour later, Charles Churchill is awakened in Deerfield, New Hampshire, by a peculiar noise and sees an airplane in the distance that seems to be flashing signals toward Portsmouth. However, this latter case could be a hoax. ("Aeroplane Seen at Deerfield," *Manchester (N.H.) Union,* May 1, 1917, p. 1; "Deerfield Discredits an Aeroplane Yarn," *Portsmouth (N.H.) Herald,* May 2, 1917, p. 6)

1917, May 13 — Three shepherd children at the Cova da Iria in Fátima, Portugal—Lúcia dos Santos and her cousins Francisco and Jacinta Marto—report seeing a woman "brighter than the sun, shedding rays of light clearer and stronger than a crystal goblet filled with the most sparkling water and pierced by the burning rays of the sun." The woman wears a white mantle edged with gold and holds a rosary in her hand. She asks them to devote themselves to the Holy Trinity and to pray "the Rosary every day." The children had seen an "angel" at the cove since the spring of 1916. (Wikipedia, "Our Lady of Fátima")

1917, June 13 — The three children at Fátima, Portugal, again see the lady, who reveals that Francisco and Jacinta will be "taken to heaven" soon, but Lúcia will live longer to spread the message. The lady also purportedly reveals to the children a vision of hell and entrusts a secret to them, described as "good for some and bad for others." (Wikipedia, "Our Lady of Fátima")

1917, August 13 — Some 18,000 people have been flocking to Fátima and nearby Aljustrel, Portugal, drawn by reports of visions and miracles. The assembled multitude hears thunder and witnesses lightning in a clear blue sky. Then the sun grows pale and a cloud hovers above the oak tree where the apparitions usually appear. Provincial administrator Artur de Oliveira Santos, believing that these events are politically disruptive, takes the children into custody, jailing them before they can reach the Cova da Iria. Santos interrogates and threatens the children to get them to divulge the contents of the secrets.

1917, August 19 — Instead of the promised apparition in the Cova da Iria on August 13, the children see the Virgin Mary at nearby Valinhos, Portugal. She asks them again to pray the rosary daily, speaks about the miracle coming in October, and asks them "to pray a lot."

1917, Late Summer — 12:30 p.m. John Boback is walking along railroad tracks in Youngstown, Pennsylvania, when he hears a swishing sound and sees an elliptical object about 100 feet away on the ground in a pasture. It has portholes emitting light from the interior and a smooth surface. Moments later the object ascends smoothly in a gradual climb and flies away to the east. (Lore and Deneault, pp. 104–105)

1917, Early September — Witnesses at Salida, Colorado, watch distant moving lights flicking on and off over a period of several days. Through a telescope, one light appears to be a revolving wheel with lights on it. (Arlene Shovald, "Edwards' UFO Sighting Not Salida's First," *Salida (Colo.) Mountain Mail,* September 7, 1995; Clark III 1171; Clark IV 1345)

1917, September 13 — With the three children in attendance, the crowd at the Cova da Iria, Portugal, see a "luminous globe" sail across the sky. A white cloud envelops the children and the oak tree. A rain of white roses is said to have fallen out of the heavens but dissolves just before landing. Behind the cloud, the crowd can see Lúcia talking to the invisible lady.

1917, October — Seven-year-old Elizabeth Klarer and her older sister Barbara have their first alleged encounter with a UFO on their parents' farm Connington in the KwaZulu-Natal midlands, South Africa. While playing outside the farmhouse, Elizabeth claims to witness a giant orange-red wheel rolling across the sky. The plummeting object, also described as a fiery pockmarked meteor or planetoid, is intercepted by a silver disc bathed in a pearly luster. Around this time Elizabeth begins receiving occasional telepathic messages from a friendly space alien named Akon. (Elizabeth Klarer, *Beyond the Light Barrier*, Howard Timmins, 1980; Clark III 657; Clark IV 732)

1917, October 13 — After some newspapers report that the Virgin Mary has promised a miracle for the last of her apparitions, a huge crowd, possibly between 30,000 and 100,000, including reporters and photographers, gathers at Cova da Iria, Portugal. What happens then becomes known as the "Miracle of the Sun." Various claims are made as to what really happened. The three children report seeing a panorama of visions during the event, including those of Jesus, Our Lady of Sorrows, Our Lady of Mount Carmel, and Saint Joseph blessing the people. Father John de Marchi, an Italian Catholic priest and researcher who wrote several books on the subject, included descriptions by witnesses who believe they observed a miracle created by Mary, the mother of Jesus. After a period of rain, the dark clouds break and the Sun appears as an opaque, spinning disc in the sky. It appears significantly duller than normal and casts multicolored lights across the landscape, the people, and the surrounding clouds. The Sun then seems to careen towards the earth before zigzagging back to its normal position. Witnesses report that their previously wet clothes become "suddenly and completely dry, as well as the wet and muddy ground that had been previously soaked because of the rain that had been falling." Not all witnesses report seeing the Sun "dance." Some people only see the radiant colors, and others, including some believers, see nothing at all. The only known picture of the Sun taken during the event does not show anything unusual. No unusual solar phenomena are observed by scientists. Some theologians, scientists, and skeptics have offered alternative explanations that include psychological suggestibility of the witnesses, temporary retinal distortion caused by staring at the intense light of the Sun, a sundog, and optical effects caused by natural meteorological phenomena. The Miracle of the Sun is interpreted by others as a UFO event. Investigator Joe Nickell thinks that the effects are "a combination of factors, including optical effects and meteorological phenomena, such as the sun being seen through thin clouds, causing it to appear as a silver disc. Other possibilities include an alteration in the density of the passing clouds, causing the sun's image to alternately brighten and dim and so seem to advance and recede, and dust or moisture droplets in the atmosphere refracting the sunlight and thus imparting a variety of colors." (Wikipedia, "Miracle of the Sun"; Santuária de Fátima, [photos of the Miracle of the Sun]; "O Milagre do Fátima," *Ilustração Portuguesa*, no. 610 (October 29, 1917): 353–355; M. Alexander, "UFO—Seen by Sixty Thousand Witnesses!" *Flying Saucer Review* 4, no. 1 (Jan./Feb. 1958): 10–11; Antonio Ribera, "What Happened at Fátima?" *Flying Saucer Review* 10, no. 2 (March/April 1964): 12–14; Gilbert S. Inglefield, "Fatima: The Three Alternatives," *Flying Saucer Review* 10, no. 3 (May/June 1964): 5–6; Peter Rogerson, "The Sun Maiden," *Merseyside UFO Bulletin* 4, no. 2 (June 1971): 22–26; Joaquim Fernandes, "The Apparitions of the Virgin at Fatima Considered in Relation to the UFO Phenomenon," *Awareness* 12, no. 4 (1983/1984): 4–10; John de Marchi, *Fatima: The Full Story*, St. Paul, Minn.: Catechetical Guild Educational Society, 1990; Auguste Meessen, "Apparitions and Miracles of the Sun," in *Science, Religion, and Conscience*, Actas do Forum International, Centro Transdisciplinar de Estudos da Consciência, October 23–25, 2003, Santos, 2005; Joaquim Fernandes and Fina D'Armada, *Heavenly Lights: The Apparition of Fátima and the UFO Phenomenon*, EcceNova Editions, 2005; Joe Nickell, "The Real Secrets of Fatima," *Skeptical Inquirer* 33, no. 6 (Nov./Dec. 2009): 14–17; Jeffrey S. Bennett, *When the Sun Danced*, University of Virginia, 2012; Artur Wirowski, "Modelling of the Phenomenon Known as 'the Miracle of the Sun' as the Reflection of Light from Ice Crystals Oscillating Synchronously," *Journal of Modern Physics* 3, no. 3 (2012): 282–289; Clark III 484–485, 878; Frère Michel de la Sainte Trinité, "The Miracle of the Sun at Fatima," Regina Cæli, December 2016; Philippe Dalleur, "Fatima Pictures and Testimonials: In-Depth Analysis," *Scientia et Fides* 9, no. 1 (2021): 9–45; Clark IV 532–533, 972)

1918

1918 — Pandit Subbaraya Shastry in India begins dictating a Sanskrit text on the topic of vimanas, mythical flying chariots of the ancient Hindus. Shastry claims the work, titled the *Vaimānika Śāstra*, is psychically channeled to him by the ancient Hindu sage Bharadvaja, and that the vimanas were advanced flying machines. He completes it around 1922. The existence of the text is revealed in 1952 by G. R. Josyer. A Hindi translation is published in 1959, while the Sanskrit text with an English translation is published in 1973. (Wikipedia, "Vaimānika Śāstra"; Subbaraya Shastry, *The Vimanika Shastra*, trans. G. R. Joyser, 1973; Clark IV 115)

1918, Winter? — Edwin T. Bauhan and other soldiers at Rich Field in Waco, Texas, see a noiseless, flame-colored, cigar-shaped object 100–150 feet long flying overhead at an altitude of 500 feet. ("1918 Sighting," *Civilian Saucer Investigation Quarterly Bulletin* 1, no. 4 (Winter 1954): 10–11; Lore and Deneault, p. 105; Clark III 1170; Clark IV 1345)

1918, March 1 — Early morning. A woman at Tahunanui Beach, Nelson, New Zealand, sees two distinct "seaplanes" flying together near the surface of the water. They soon diverge, one going in the direction of the eastern hills and both getting lost in the clouds. ("Seaplanes over Tasman Bay," *Nelson Colonist*, March 2, 1918, p. 4; Brett Holman, "The Mystery Aeroplane Scare in New Zealand—1," Airminded, August 28, 2013)

1918, Summer — 7:30 p.m. At an isolated ranch 60 miles from Malta, Montana, 9-year-old Theodore Warren sees a cigar-shaped "airship" with windows that shine with greenish light. It flies in from the mountains in the east and hovers above the ranch house. He watches it for a while, and then it "whooshes" away to the northwest. (Ione Warren Conway, "A UFO(?) from the Past," *IUR* 7, no. 6 (Nov./Dec. 1982): 16)

1918, August 12 — After 5:00 p.m. Two women at Durie Hill, Whanganui, New Zealand, see an airplane moving swiftly off the South Spit heading toward the south. It disappears behind Landguard Bluff. Other witnesses come forward to corroborate the sighting. ("Aeroplane off Wanganui," *Wanganui Chronicle*, August 13, 1918, p. 4; Brett Holman, "The Mystery Aeroplane Scare in New Zealand—IV," Airminded, October 26, 2013)

1918, August 13 — Evening. Mr. C. Rawlinson is cycling to a dance on Carrington Road, New Plymouth, New Zealand, when he sees a bright star against some mountains about 6 miles away. It starts flashing red and white and moves closer and downward, then rises to 400–500 feet and performs other maneuvers. He rides home to tell his sisters, who also see the light until about 8:30 p.m., when it moves off to the sea. ("Local and General," *Wellington Dominion*, August 14, 1918, p. 4; Brett Holman, "The Mystery Aeroplane Scare in New Zealand—IV," Airminded, October 26, 2013)

1918, October — During operations against the Bolshevik Army in Tulgas, Arkhangelsk Oblast, Russia, soldiers of the US 339th Infantry Regiment watch a round object the color of burnished copper, with a faint light and vapor obscuring much of its shape. (Letter to J. Allen Hynek; Jan Aldrich)

1919

1919 — Wireless inventor Guglielmo Marconi claims that he has detected large-wavelength radio signals from Mars. He claims the most frequent signal is the Morse code for "S," or three short dots. The signals, however, are subsequently traced to an experiment conducted by chemist Irving Langmuir at the General Electric Laboratories in Schenectady, New York. ("'Hello, Earth! Hello!'" White Earth (Minn.) *The Tomahawk*, March 18, 1920, p. 6)

1919, January 22 — After 10:00 p.m. A brilliant light the size of a tennis ball appears in a garden at Shuttlewood, Derbyshire, England. When the witness approaches it, it moves away at a leisurely pace and passes through wire netting. It follows the top of a hedge, turns right, and ascends until it finds a break in the high branches of a tree, where it hovers for 3 minutes before flying on. The witness then notices his neighbor's farm is illuminated with bright white light. Several minutes later, the sphere returns to the garden, hovers another 3 minutes, then approaches the witness. As it does so, it turns from white to orange. It moves away, stops above a neighbor's garden, travels along a hedge, traverses a field, and circles a row of houses before soaring into the sky and disappearing. The light is seen for 40 minutes. (Ananda Sirisena, "The Light at Shuttlewood," *Flying Saucer Review* 20, no. 5 (March 1975): 17–19, 28; Mark Ian Birdsall, "The Luminous Pearl of 1919," *Quest International* 10, no. 2 (1991): 26–27; Clark III 1171; Clark IV 1345–1346)

1919, June — Mid-afternoon. A young boy in Scorbé-Clairvaux, Vienne, France, sees a metallic disc reflecting sunlight. It descends, dims, flies away horizontally, and disappears. (Joel Mesnard, "Catalogue d'observations inédites," *Lumières dans la Nuit*, no. 289–290 (July/Aug. 1988): 28)

1919, June 2 — 9:30 a.m. A tiny circular cloud appears in an otherwise cloudless sky over Ottertail, Minnesota. Suddenly it expands to several times its size. Seconds later, the window that the witness is watching through starts to shake and creak. By the time it stops, the cloud has expanded more and now has a ragged appearance, bending toward the earth. A black object shoots out of the bottom of the cloud, leaving a vapor trail, and begins making 6–7 barrel rolls. It then peels off in a straight line, headed north. ("Supersonic Jet in 1919?" *IUR/Frontiers of Science* 3, no. 6 (Jan./Feb. 1982): 14–15; Clark III 1170; Clark IV 1344)

1919, July — 11:00 a.m. A young brother and sister who live on a farm near Webster City, Iowa, hear a strange chirping sound while out playing. They turn and see a brown-green object under a tree near a creek 75 feet from them. They notice a similarly colored figure standing in a door that has been lowered down. It makes strange guttural sounds. They see another figure running toward the stream leading to a pond. This smaller one dips up some water into a can. The larger figure seems to be hurrying the smaller figure back into the object. The door slams shut with a metallic sound, and the vehicle rises up quickly with its three legs still out and goes over a hill. The soil where the object had been is covered with round spots that resemble cane marks. (Patrick Gross, URECAT, July 23, 2009; Clark III 263; Clark IV 303–304)

1919, Late summer — 10:00 p.m. Harry Anderson, 13 (or 16), is out riding with his family and two friends when their car runs out of oil east of Barron, Wisconsin. A passing farmer offers to give them some oil, and Harry accompanies him 2 miles away to his farmhouse. Harry walks back to the car alone and sees 20 little men walking in single file towards him. Their heads are bald, and the figures are dressed in leather "knee pants" held up by suspenders. They are mumbling but pay no attention to him. Terrified, he continues and does not look back. (Alex Evans [Jerome Clark], "Encounters with Little Men," *Fate* 31, no. 11 (November 1978): 83–86; Patrick Gross, URECAT, July 24, 2009; Clark III 263; Clark IV 303)

1919, December 1 — Boni & Liveright publishes Charles Fort's first book of scientific anomalies, *The Book of the Damned.* Fort gathers reports of objects or "vessels" that he humorously speculates might be visitors from a multitude of worlds that have come to earth over the centuries. Among his wilder expressions is the suggestion that floating land masses in the sky harbor civilizations and oceans. Fort also speculates that someone is fishing for us and that an alien race considers us its property, warning off all interlopers. It receives positive reviews from Ben Hecht and Booth Tarkington. (Charles Fort, *The Book of the Damned*, Boni & Liveright, 1919; Wikipedia, "*The Book of the Damned*"; Jim Steinmeyer, *Charles Fort: The Man Who Invented the Supernatural*, Tarcher, 2008, pp. 173–174; Clark III 506–507; Ulrich Magin, "The Book of the Damned," *Fortean Times* 386 (December 2019): 38–43; Clark IV 557)

1920

1920 — Day. Stanley Clason, 10, is walking across his uncle's pasture in northern Montana when he sees an object traveling from northwest to southeast. It has a "long, slim, pointed shape" and appears "silvery in color." ("Report from the Readers," *Fate* 7, no. 4 (April 1954): 115–116; Clark III 1171; Clark IV 1345)

1920, Summer — 11:00 p.m. A group of young people, including sisters Louise and Marie Grasset, returning from a dance at Nontron, Dordogne, France, observe small beings in the air above a wooded area. Luminous balls surround the figures, who are giving off "musical sounds." (Patrick Gross, URECAT, October 3, 2017; Clark III 264; Clark IV 304)

1920, June 3 — Day. Jesse Clark Linch is fishing on a pond near Mount Pleasant, Iowa, when he sees a soundless, blue, disc-shaped object emerge from behind a grove of 100-foot-high maple trees. It flies across the pond and lands 15 feet away. Linch gets up and walks toward it, but it rises up, slowly moves over some trees to the west, and disappears. ("Mini UFO Landed near Mt. Pleasant in 1920," *The UFO Examiner* 2, no. 2 (June 1978): 8, 19; "Man Visited by Strange Object While Fishing in Iowa in 1920," *MUFON UFO Journal*, no. 382 (February 2000): 12; Clark III 1170; Clark IV 1344)

1920, June 8 — 6:00 p.m. About 200 people see a cylindrical object flying at a height of about 75 feet between Wathena, Kansas, and Rushville, Missouri. A witness in Rushville sees it make a right-angle turn and head east, where it disappears into a cloud. ("1920 UFO Reported," *Skylook*, no. 71 (October 1973): 16; Clark III 1171;Clark IV 1345)

1920, Late October — 3:00 a.m. C. B. Alves sees four flying discs 50 miles north of Freeport, Texas, when he is out fishing with some friends. They look like two big silver plates set edge to edge. Each appears to be about 25 feet in diameter and 10 feet thick at the center. ("Report from the Readers," *Fate* 8, no. 2 (February 1955): 122–123; Clark III 1170; Clark IV 1344)

1921

1921 — An 8-year-old is playing in the hillocks near a canal in Marseille, France. He is suddenly accosted by two tall, slender men wearing apparent diving suits who drag him into a strange looking "tank." After a while, an opening appears in the ceiling, and in a few moments he finds himself back on the ground. He must walk all afternoon to get back to the place where the UFO picked him up 5 minutes earlier. ([Letter], "J'ai voyagé en soucoupe," *Paris-Match*, no. 291, October 23, 1954; Patrick Gross, UFOCAT, September 7, 2006; Clark III 264; Clark IV 304)

1921, Late July — 2:00 a.m. Annie Baker of 39 Highland Road, Southsea, Portsmouth, England, sees a "strange looking bladder like monster the shape of an airship only much wider" during a thunderstorm. It is luminous and remains stationary for several minutes but moves away and disappears quickly. (UFOFiles2, pp. 13–15)

1921, July 29 — The Council on Foreign Relations is incorporated. Founded by corporate lawyer Elihu Root, the organization brings diplomats, high-level government officials, and academics together with lawyers, bankers, and industrialists to engineer foreign policy. The first issue of *Foreign Affairs* is published in September 1922. (Wikipedia, "Council on Foreign Relations")

1921, September — The British Air Ministry has asked the public to submit reports on observations of ball lightning to its Meteorological Office. The results are summarized by geophysicist Harold Jeffreys, who notes very little uniformity in the observations, with little agreement on size, duration, color, or shape. (Harold Jeffreys, "Results of the Ball Lightning Inquiry," *Meteorological Magazine* 56 (September 1921): 208–211; UFOFiles2, pp. 13–16)

1921, September 1 — J. H. C. Macbeth of the Marconi Wireless Telegraph Company announces that inventor Guglielmo Marconi is convinced he has intercepted wireless signals from Mars while cruising in the Mediterranean Sea on his mobile laboratory and yacht, the *Elettra.* The signals are regular and "produced high in the meter band." One of them resembles the letter "V" in the Marconi Code. ("Message Received from Mars?" *San Luis Obispo (Calif.) Daily Telegram*, September 1, 1921, p. 1; "Marconi Sure Mars Flashes Messages," *New York Times*, September 2, 1921, p. 1; Orrin E. Dunlap Jr., *Marconi: The Man and His Wireless*, Macmillan, 1937, pp. 267–269; Michael D. Swords, "Radio Signals from Space, Alien Probes, and Betty Hill," *IUR* 29, no. 4 (July 2005): 11)

1921, October 9 — Harvard University astronomer William Henry Pickering claims that he has discovered, through two years of observation, vegetation growing in lunar craters that contain water and a source of heat. They seem to form strips or "canals" that vary according to season. ("Says 2 Crops a Day Grow on the Moon," *New York Times*, October 9, 1921, p. 6)

1922

1922 — Starting this year, ghost lights are seen every year until 1932 in the desert near the Oregon Canyon Ranch, McDermott, Nevada. They look like lanterns or car headlights in the distance. More than 50 of the sheepherders in the area have seen the lights, including Tito Bengoa, the brother of Frank and Christopher Bengoa of the King's River Ranch near Orovada. (Kenneth Arnold, "Phantom Lights in Nevada," *Fate* 1, no. 3 (Fall 1948): 96–98)

1922 — Elsa Sheridan of Jamaica, New York, claims to have made numerous dream journeys to Mars, Venus, and other planets in the solar system and she describes and illustrates their inhabitants in an often whimsical fashion. ("Mystery of Elsa Sheridan's 'Dream' Travels to Other Worlds," *Buffalo (N.Y.) Illustrated Express*, May 7, 1922,

Sec. 7, p. 2; Theo Paijmans, "An Amazon of Outer Space," *Fortean Times* 322 (January 2015): 24–25; Clark IV 206–207)

1922, Summer — A teenage couple, William O'Brien and Irma (later married surname is Hinz), are walking home from a movie in Detroit, Michigan, and see a large disc-shaped object hovering above a vacant lot on South Dragoon Street. Rectangular windows surround the perimeter of the UFO's base. Seated at those windows are 20 or so bald-headed beings with close-set eyes. They stare at the witnesses, who become unnerved and leave. (Center for UFO Studies, HUMCAT Index 1910–1939, p. 21; Clark III 264; Clark IV 304)

1922, Summer — Many witnesses in Warsaw, Poland, see a silvery object, shaped like two hemispheres divided by a rotating ring, that shoots a beam of light and ascends with a loud noise. (Bronislaw Rzepecki, "UFOs and Ufologists in Poland," *IUR* 11, no. 2 (Mar./Apr. 1986): 15; Poland 8)

1923

1923 — Two DePauw University college students, Andrew Wallace Crandall and Herrick Greenleaf, watch a revolving red object pass over Greencastle, Indiana. The object, round and glowing, moves silently from northeast to southwest, then vanishes. (Lore and Deneault, p. 106)

1923 — A photograph shows a domed disc hovering near the church tower in Sebeş, Romania. (Romania 10-11)

1923 — An American named Nina Murnie Doney publishes *My Life on Eight Planets*, an apparent science fiction tale about her astral travels to other planets in the solar system and her observations on the inhabitants. (Nina Murnie Doney, *My Life on Eight Planets: Or, A Glimpse of Other Worlds*, Doney & Cashill, 1923; Clark IV 208–209)

1923, October — Boni & Liveright publishes *New Lands* by Charles Fort, who writes about odd aerial and astronomical observations: "It seems no more incredible that up in the seemingly unoccupied sky there should be hosts of living things than that the seeming blank of the ocean, should swarm with life." (Charles Fort, *New Lands*, Boni & Liveright, 1923; Wikipedia, "*New Lands*"; Jim Steinmeyer, *Charles Fort: The Man Who Invented the Supernatural*, Tarcher, 2008, pp. 198–199; Clark III 507, 1098; Ian J. Kidd, "New Lands and Other Worlds," *Fortean Times* 444 (May 2024): 48–49; Clark IV 557, 1224)

1923, October 23 — 7:00 p.m. Alastair Moray is employed as a supercargo on a four-masted schooner named the *Cask* that is running alcoholic beverages from Scotland to the US across the Atlantic Ocean. He sees a pear-shaped ball of fire materialize about midship, then float past him at 50 feet away and 30 feet from the water. It glows and darkens three times, leaves a faint trail, and moves an apparent 180 feet before disappearing. (Alastair Moray, *The Diary of a Rum-Runner*, Houghton Mifflin, 1929, p. 58)

1924

1924 — A farmer near Gem, West Virginia, allegedly sees a silent, wingless aircraft crash in a wooded area. A newsman named John Cole, the sheriff, and other locals find the wreckage, which is 75 feet long with windows but no propellor. Some odd "Oriental"-looking strangers are at the site, dressed in either black suits or silver coveralls, and speaking a foreign language. Cole takes a fragment of the object home, but he is awakened around 3:00 a.m. by a man in an Army uniform who demands the fragment back. Cole gives it to him. Two days later, Cole returns to the site, but all trace of the wreckage has vanished. (John A. Keel, *The Eighth Tower*, Saturday Review, 1975, pp. 142–143; Clark III 340; Clark IV 376)

1924, January — 1:00 a.m. Perry G. Powers and Duncan Miller are returning to a ranch when they see a beam of light shining on the snow in the Osage Hills, Oklahoma. It emanates from a large oval-shaped object with white dots of light on the side and blue flame at the trailing end. It makes a slight hissing noise and moves out of sight over the horizon in less than 3 minutes. ("1924 Sighting," *Civilian Saucer Investigation Quarterly Bulletin* 1, no. 4 (Winter 1954): 10; UFOEv, p. 129; Clark III 1171; Clark IV 1345)

1924, April — German occultist Friedrich Marby asserts that he has been in psychic contact with Martians, who actively avoid visiting Earth because its atmosphere is populated with evil sexual demons. The Martians are masters of technology, which includes a method of harnessing cosmic rays. ("Nachrichten vom Mars?" *Der eigene Weg*, no.

2 (April 1924): 1–10; "Weitere Nachrichten vom Mars," *Der eigene Weg*, no. 3 (May 1924): 22; Theo Paijmans, "An Ariosophist on Mars," *Fortean Times* 343 (September 2016): 28–29; Clark IV 207–208)

1924, August 22 — Mars enters an opposition closer to Earth than at any time in the century before. In the US, a National Radio Silence Day is promoted during a 36-hour period in August 21–23, with all radios quiet for 5 minutes on the hour, every hour, just in case the Martians take the opportunity to communicate with Earth. At the US Naval Observatory in Washington, D.C., an SE-950 radio receiver is lifted 1.9 miles above the ground in a dirigible tuned to a wavelength between 8 and 9 kilometers, using a "radio photo message continuous transmission machine" recently invented by Amherst College and Charles Francis Jenkins of Washington. The program is led by retired astronomer David Peck Todd with the military assistance of Chief of Naval Operations Adm. Edward Walter Eberle, with William F. Friedman (US Army chief cryptographer), assigned to translate any potential Martian messages. The device records radio signals on chemically treated film. One signal consists of a "fairly regular arrangement of dots and dashes along one side" and on the other "at almost evenly spaced intervals … curiously jumped groups each taking the forms of a crudely drawn human face." Todd tells a reporter, "It may not be a message from Mars, but if it isn't from Mars, where is it from?" Astronomer Frederick E. Fowle of the Smithsonian thinks they are "disturbances introduced by solar or terrestrial causes not yet understood." Other scientists suggest the images are caused by static discharge from a passing trolley car, malfunctioning radio equipment, or the natural symphonic radio waves produced by Jupiter. (Jerome Clark, "Conversations with Martians," *IUR* 29, no. 3 (Fall 2004): 20; Michael D. Swords, "Radio Signals from Space, Alien Probes, and Betty Hill," *IUR* 29, no. 4 (July 2005): 11–12; Kristen Gallerneaux, "Reaching for Mars," Past Forward, August 23, 2016; Jessica Leigh Hester, "Everybody Shut Up! We're Listening for Mars," Atlas Obscura, August 3, 2018)

1924, Fall — Dusk. A hunter in a rowboat on Okanagan Lake, British Columbia, sees a faint blue light moving from northeast to southwest. It temporarily disappears behind a mountain but reappears and approaches the boat, passing it at a distance of 200 feet and a speed of 30–40 mph. The object is pearly silver in color with faint dark blue light at the rear. After moving a quarter mile away, it ascends and disappears at terrific speed. (Clark III 1171–1172; Clark IV 1346)

1925

1925 — Thomas Green is riding with another young man on a farm near Moora, Western Australia, when they come across an object "like two saucers placed edge on edge" resting on a paddock. Some oval-shaped windows are visible, and it is resting on four legs splayed outwards. The two decide to return home. Several days later they return and find the earth "scuffed about" on the spot. (Bill Chalker, "The CE II Experience in Australia," *ACOS Bulletin*, no. 9 (March 1977): 11–12; Bill Chalker, "Historical Australian UFO Reports," *UFO Research Australia Newsletter* 4, no. 3 (Nov./Dec. 1983): 28)

1925, June — 2:30 a.m. A driver stops his Ford Model T to watch a 300-foot-long, cigar-shaped object flying south toward Chicago, Illinois. Red sparks are peeling away from its nose and it has multicolored lights. As it passes in front, the driver feels a heat wave. (*San Diego (Calif.) Evening Tribune*, August 12, 1965; Clark III 1171; Clark IV 1345)

1925, August 25 — 9:20 p.m. Second Officer P. Hawkins of the SS *Somersetshire*, in the Arabian Sea about 150 miles south of Oman, observes luminous waves of light passing toward the ship from the east at great speed. The sea becomes flat calm, and the display lasts until 10:40 p.m. (Carl Feindt, "Report #58," waterufo.net; Dolan, USO1, 103–104)

1926

1926 (or 1927) — 3:00 p.m. A 14-year-old girl is tending cows in a meadow between Brzezie and Ujazd, Poland. Suddenly the cows become agitated and pull on their halters. She notices three cement-colored spherical objects some 650 feet away in a field to the north. In front of each is a small entity dressed in greenish uniforms. (Poland 9)

1926, January — 1:00 p.m. Aviator Bert Acosta is flying somewhere between Wichita, Kansas, and Colorado Springs, Colorado, when he notices 6 or so objects that look like manhole covers flying off his starboard wing 600 feet away. They keep pace with his plane for 5 minutes. Finally they turn, change course, and fly away. (Jacques Vallée, *Anatomy of a Phenomenon,* Ace ed., 1965, p. 49; Patrick Gross, "ACUFO," September 23, 2023)

1926, June — After midnight. Farmer Ion Bunescu is with his horses on the Leurda plateau near Colun, Romania, when he sees a light ascend from the village of Cârța. An illuminated globe moves toward him with a light so strong that it brightens the River Olt some 2.5 miles away. (Hobana and Weverbergh 224–225; Romania 9–11)

1926, August — Dusk. Frank Tezky and his father watch 6 disc-shaped objects in Westmont, Illinois. Five smaller discs are trailing in a straight line behind a much larger one, moving west beneath cirrus clouds, which reflect the light cast by the objects. (Clark III 1170; Clark IV 1344)

1926, Late September — 11:00 p.m. An Air Mail pilot named Colin Murphy is repeatedly buzzed by a huge glowing object one hour after he takes off in his DH-4 biplane from Salt Lake City, Utah. The object is a 90-foot-long cylinder with no wings or propeller. Every time the object approaches closer than 150 feet, his engine sputters and misfires. He is forced to land in a sheep pasture, whereupon the object shoots away to the south. Possible hoax. (Patrick Gross, "ACUFO," Septembe 23, 2023)

1926, October 27 — Attorney and "telepathist" Hugh Mansfield Robinson, who has been in contact with a female Martian entity named Oomaruru since 1918, convinces the central radio office in London, England, to send out a message, "*MMM opesti nipitia secomba*" over the airwaves. He intends for it to be picked up by Martian wireless. The next day, he claims that Oomaruru telepathically told him that only the first three letters had been received. Robinson describes the Martians as 7–8 feet tall with large ears, a wealth of black hair, and almond eyes. Over the years he continues receiving messages from Oomaruru while in a trance and attempting to send signals to Mars. Psychic investigator Nandor Fodor, who has attended some of Robinson's séances, calls him "as slippery as a human eel." (Earl J. Johnson, "Imagination Runs Wild about Visit of Martian Realm," *Pomona (Calif.) Bulletin*, October 28, 1926, p. 1; "Doctor Files Mars Message by Radio 'at Sender's Risk,'" *Vancouver (B.C.) Sun,* October 28, 1926, p. 18; Nandor Fodor, *The Haunted Mind,* Garrett, 1959, pp. 259–269; Clark III 1018–1020; Marc Hartzman, "Earth to Mars in the 1920s: The Strange Case of the Man Who Tried to Contact Martians via Radio," Weird Historian, February 22, 2018; Maurizio Verga, *Earth Calling Mars,* The author, 2024; Clark IV 1132–1134)

1926, November 8 — Early evening. Playing hide-and-seek with friends in Bolton, Lancashire, England, Henry Thomas (or Thomson) slips into a backyard off Euston Street and finds three figures dressed in odd suits made of silvery gray rubber tubes. They are looking into a window in the back of a house. A tube extends from their helmets into a tank on each figure's back. They turn to look at him and he sees their heads are pale and "shaped like lightbulbs" and they have slits for mouths. Thomas runs away as all three of the entities move toward him. (Peter Brookesmith, *UFO: The Complete Sightings Catalogue,* 1995, p. 31; "1926: Humanoid Hide and Seek," ThinkAboutIt; Jenny Randles and Peter Hough, *The Complete Book of UFOs,* Sterling, 1996, pp. 35–37; Clark III 264; Clark IV 304)

1927

1927 — For a few weeks, 10-year-old Cecil "Danny" McGann, his family, and other farmers in the area of Fernvale, New South Wales, are terrorized by dancing aerial lights during the night, the unusual deaths of their cattle and pigs, mystery intruders, apparitions, circular areas of scorched grass, large and unfamiliar birds, bizarre noises, and strange men in odd suits. McGann is still terrified of this series of events when he relates them to UFO investigator Bill Chalker in 1985. (Bill Chalker, "Physical Traces," *UFOs 1947–1987,* Fortean Tomes, 1987, p. 190; Bill Chalker, "The Terror Down Under," *Fate* 41, no. 9 (September 1988): 72–80; Clark III 485–491; Clark IV 534–539)

1927 — Morning. A young girl is sitting on the bank of the Po River near Corbola, Rovigo, Italy, when she sees a shiny round object sink under the surface about 23–26 feet away. It is 6–9 feet in diameter and surrounded by a glow. A few minutes later it emerges from the river, disturbing the water, and shoots into the sky. Before it disappears, she sees a "small man" inside, visible from the neck up. (Maurizio Verga, *ITACAT: Il Catalogo Italiano degli Atterraggi UFO: Volume I, Caso fino al 1954*, UPIAR, 2005, p. 2; Dolan, USO1, 104–105)

1927, March or April —A 5-year-old boy in West Frankfort, Illinois, sees a bright, flashing disc silently approaching him. It stops and hovers above a house about 100 feet away. About 40 feet in diameter, the object seems made of stainless steel with a smooth surface. Attached on the bottom is a "gondola" with 4–5 portholes that open up and shine a blue-white light. The object slowly drifts 100 feet to the right and stops again, this time dropping a line or rod from its bottom. The portholes close, the object rotates, and it takes off in the direction it has come. The next day the boy returns to the site and finds an area soaked with oil. (Clark III 1172; Clark IV 1346)

1927, Summer — Reece Andrew Lacey, 9, sees a large fish-like object with "big fins extended outward near the front, and small, short ones near the rear" in Wolfe County, Kentucky. ("Report from the Readers," *Fate* 11, no. 2 (December 1958): 111–112; Clark III 1171; Clark IV 1345)

1927, July — Agricultural engineer Gheorghe Achimescu sees a smoke-gray, cylindrical object fly silently from west to east over the village of Nicolae Bălcescu, Romania, at an altitude of 650–950 feet. He estimates it is about 50 feet long with a diameter of 10 feet. (Hobana and Weverbergh 152–153)

1927, August 5 — Russian artist, writer, and philosopher Nicholas Roerich, his wife Helena, and his two sons George (Yuri) and Svetoslav, while on a four-year expedition to the Himalayas, Tibet, China, and Russia, observe an apparent UFO near Qinghai Lake, Tibet. "We all saw, in a direction from north to south, something big and shiny reflecting the sun, like a huge oval moving at great speed. Crossing our camp this thing changed in its direction from south to southwest. And we saw how it disappeared in the intense blue sky. We even had time to take our field glasses and saw quite distinctly an oval form with shiny surface, one side of which was brilliant from the sun." (Nicholas Roerich, *Altai-Himalaya*, Frederick A. Stokes, 1929, pp. 361–362; Nicholas Roerich, *Heart of Asia*, Roerich Museum, 1930, pp. 149–150; Nicholas Roerich, "Light in the Desert (Gantok, 1928)," in *Shambhala*, Frederick A. Stokes, 1930, p. 244; Brad Sparks, "Analysis: Roerich Case, Aug. 5, 1927"; Clark III 1170; Clark IV 1272, 1319–1320, 1344)

1927, Late summer — Long delayed echoes—radio echoes that return to the sender several seconds after a radio transmission has occurred—are first observed by civil engineer and amateur radio operator Jørgen Hals from his home near Oslo, Norway. The cause of LDEs remains unknown, although A. G. Shlionsky has proposed 15 different explanations. (Wikipedia, "Long delayed echo"; Carl Størmer, "Short Wave Echoes and the Aurora Borealis," *Nature* 122 (1928): 681; Sverre Holm, "The Five Most Likely Explanations for Long Delayed Echoes," March 16, 2004; Sverre Holm, "15 Possible Explanations for Long Delayed Echoes," November 6, 2007)

1927, October 18 — Richard Sweed is driving west on the outskirts of Bakersfield, California, when he sees a bluish-gray metallic disc with portholes take off from the ground at a 45° angle. It is about 60 feet in diameter and makes a whining sound. He examines the spot where the object had rested and finds the sand "fused like glass crystals." (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 18)

1928

1928, January 3 — Kansas journalist Charles Benedict Driscoll begins writing about ball lighting in his syndicated column, "The World and All," keeping the subject alive for many years. (Charles B. Driscoll, "The World and All," *Lexington (Ky.) Herald*, January 3, 1928, p. 4)

1928, May — Mystic and white supremacist William Dudley Pelley claims he has an out-of-body experience in which he travels to other planes of existence devoid of corporeal souls. He describes his experience in an *American Magazine* article titled "My Seven Minutes in Eternity," expanded to a book 1933 as *Seven Minutes in Eternity.* In later writings, he describes the experience as "hypo-dimensional." During this event, he meets with God and Jesus, who instruct him to undertake the spiritual transformation of America. He later claims that the experience gives him the ability to levitate, see through walls, and have out-of-body experiences at will. (William Dudley Pelley, *"Seven Minutes in Eternity" with Their Aftermath*, Robert Collier, 1929; Clark III 1285; Clak IV 1468)

1928, Summer — A 6-year-old girl sees a black, faceless, 5-foot-high figure with a large head and dangling arms in a field off Anstey Lane, Leicester, England. She thinks it is a scarecrow but notices a "large globe on legs" near the figure. She wakes up her father (who is resting in the open air) but when she turns around, the scarecrow and the

globe are gone. (Pauline Berger, "The Disappearing Scarecrow," *Flying Saucer Review* 15, no. 1 (Jan./Feb. 1969): 29; Clark III 264; Clark IV 304)

1928, June 13 — 9:00–10:00 p.m. Something like a "great blurred electric light" appears over Miami, Florida, for more than 30 minutes. One witness, amateur astronomer R. C. Fahrion, describes it as a comet without a tail, but it does not move, is of an "enormous size," and disappears very suddenly. ("Miami Astronomers Unable to Identify Light in Sky," *Miami Herald,* June 14, 1928, p. 1; "Miamians Watch Sky Mystery, Mistaken for Tailless Comet," *Miami News,* June 14, 1928, p. 12; Clark III 1172; Clark IV 1346)

1928, Early November — 10:30 p.m. Norman H. Sabie and Thorsten Sabie are driving cattle near Milton, North Dakota, when they notice a round, metallic object, like a "soup bowl turned upside down," speed by at a low altitude (15–20 feet), emitting 4–5 rays of light that illuminate the ground and startle cattle. It makes a sound like air pouring through a tube. (UFOEv, p. 129; Clark III 1170; Clark IV 1344)

1928, November — French diplomatic scholar Henri Pensa writes that a silvery object trailing fire is seen in Rodez, Aveyron, France, coming from the "direction of Mars." He says that in the winter of 1927–1928, he has seen a bright light, usually between 8:00 and 11:00 p.m., that brightens the landscape. (Giuseppe Stilo, "Francia, 1928: Marte Attacca?" Cielo Insolito, no. 6, March 2018)

1929

1929 — In Hertford, England, a 5-year-old girl and her 8-year-old brother have such an unsettling experience that they do not talk about it themselves until about 1960, and the woman herself does not reveal it to outsiders until 1970. They are playing in a garden when they hear engine sounds and see a tiny (12 or 15 inches wide) biplane coming over the fence from the direction of an orchard. It swoops down, nearly hitting a trash can, and lands for a few seconds before resuming its flight. While it is stationary, the girl can see a "perfectly proportioned tiny pilot wearing a leather flying helmet, who waved to us as he took off." (Gordon Creighton, "A Weird Case from the Past," *Flying Saucer Review* 16, no. 4 (July/Aug. 1970): 30; Clark III 1173; Clark IV 1348)

1929 — A Greek sponge diver in Tarpon Springs, Florida, is underwater gathering sponges when he sees a silver disk with lights move past him twice. (Patricia Themaras, "Underwater UFO in 1929," *MUFON UFO Journal,* no. 416 (December 2002): 15)

1929, Spring (or Spring 1930) — 11:00 a.m. In a small patch of blue sky, a hiker near Port Blakely, Washington, sees a white, silvery, oval-shaped object for 10–15 minutes. It is half the apparent size of the full moon. (Clark III 1170; Clark IV 1344–1345)

1929, June 15? — 11:00 p.m. As he is driving home at Ferme-Neuve, Quebec, Levis Brosseau, 20, sees something like a black cloud with a yellow light resting on a hillside. He gets out to investigate and discerns a structured object 50 feet in diameter. Outside of it, 4–5 small men of yellowish color are moving quickly about. Soon the object flies overhead, "purring like a milk separator," and he hears two voices arguing. (*La Semaine Illustrée,* September 23, 1968; "Flying Saucer Witness Tells When the Aliens Landed in Quebec in the 1920's," *Saucers, Space, and Science,* no. 54 (1969): 10; Center for UFO Studies, HUMCAT Index 1910–1939, p. 31; John Brent Musgrave, *UFO Occupants and Critters: The Patterns in Canada,* Global Communications, 1979, pp. 20–21; Clark III 264; Clark IV 304)

1929, September — Medical student William Walton is crossing a street in Oak Park, Illinois, when he sees a very bright yellowish-white light like two saucers pressed together. It approaches his position, and he hears a humming sound like the throbbing of a turbine and feels heat and pressure. The object passes over him at about 100 feet altitude, but the force knocks him to his knees. After it passes, he detects an odor of sulfur. (Linda Zimmerman, *More Hudson Valley UFOs,* Eagle Press, 2017)

1930

1930 — 10:00 a.m. A woman is driving the family car in an isolated hilly area of Texas when she rounds a curve and sees a huge object about 100 feet across by the side of the road. A small door is open with steps leading down to the ground. One side of the object is braced up by two slender legs with round plates for feet. A man of normal size

comes walking toward her and forces her to stop. He seems to speak to her telepathically, telling her to leave the road and make a shortcut through a gully. Some 8–10 other figures walk forward, much smaller and with slanted eyes. They are wearing tan coveralls and tight caps. Despite potential damage to her car, she drives through the gully as the larger man walks alongside. The next thing she remembers is walking up to her porch at her home 15 miles away. It is around 12:00 midnight. In March 1968, having read *Interrupted Journey* about the Betty and Barney Hill case, she writes to the Colorado project and offers herself for hypnosis and research. Edward Condon files the letter under "psychological" and does not respond. (Michael D. Swords, "Too Close for Condon: Close Encounters of the 4th Kind," *IUR* 28, no. 3 (Fall 2003): 4–5; Patrick Gross, URECAT, August 29, 2019)

1930 — Day. Schoolboys and teachers at the Barton Hill Academy in Bristol, England, watch a cigar-shaped metallic object speed across the sky faster than a dirigible. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 16–19)

1930 — RAAF Squadron Leader George Jones is sent to Warrnambool, Victoria, Australia, to investigate reports of a formation of "mystery aircraft" seen above the coast. Further reports are made in the near Pacific and Papua New Guinea areas later in the year, and in 1931 the RAAF denies any of its planes are involved in mystery planes observations "reported widely in Tasmania." (Bill Chalker, "Air Marshall Sir George Jones and the UFO," 2000)

1930 — 9:30 p.m. Two men walking along a lane at Tomintoul, Scotland, see a white light "like a meteor." When it gets brighter, they can see figures moving inside it. The witnesses think it is a ghost light. (Patrick Gross, URECAT, September 20, 2018; Clark III 264; Clark IV 304)

1930, Spring (or Spring 1931) — 7:00 p.m. As he walks down a country road near Newberry, Michigan, high school student Ralph Newman sees a "distinctly green fireball" in the low eastern sky that moves from south to north. About the size of the full moon, its light brightens the countryside, then it vanishes. (Clark III 1175; Clark IV 1349)

1930, May — Day. A top-shaped object 40 feet wide lands in a garden in Greensboro, North Carolina. Mr. and Mrs. J. T. Rankin and their two daughters can see the head and shoulders of a figure inside wearing a tight-fitting outfit and helmet. Some 5–10 minutes later the object ascends quietly and is gone. (Center for UFO Studies, HUMCAT Index 1910–1939, p. 33; Patrick Gross, URECAT, September 15, 2018; Clark III 264)

1930, June? — A British India steamer encounters an area of bubbling water in the Gulf of Martaban, Burma, that soon turns into a submarine light wheel with beams 30 feet across. ("Strange Lights on Sea," *Canberra (A.C.T.) Times*, June 18, 1930, p. 6; Dolan, USO1, 107–108)

1931

1931, January 1 — 1:00 a.m. J. Stewart Childerhose and his brother, two farmers of Cobden, Ontario, see an object with a brilliant white light on its front illuminating treetops on the shore of Muskrat Lake. Green and white lights twinkle on its tail end. It moves in a rectangular path, then speeds up suddenly and climbs out of sight. (Lore and Deneault, p. 108)

1931, January 26 — Author Tiffany Thayer founds the Fortean Society during a dinner with Charles Fort in the Savoy-Plaza Hotel in New York City in order to promote his books and ideas. (Wikipedia, "Fortean Society"; Jim Steinmeyer, *Charles Fort: The Man Who Invented the Supernatural*, Tarcher, 2008, pp. 239–241)

1931, February — Charles Fort writes in *Lo!*, published this month, that "Unknown, luminous things, or beings, have often been seen, sometimes close to this earth, and sometimes high in the sky. It may be that some of them were living things that occasionally come from somewhere else." He invents the word "teleportation" to describe mysterious transportations of persons, animals, and objects. (Charles Fort, *Lo!*, Claude Kendall, 1931; Wikipedia, "*Lo!*"; Jim Steinmeyer, *Charles Fort: The Man Who Invented the Supernatural*, Tarcher, 2008, pp. 235–243; Clark III 507–508, 1098; Clark IV 557–558, 1224, 1255)

1931, May — 4:30 p.m. Pasquale Masala is out riding his horse with a friend a few miles southeast of Paulilatino, Sardinia, Italy. When they reach a megalithic tomb known as Nuraghe Trudumeddu, they dismount to enjoy the view. Suddenly, a strange object the size and shape of a football emerges from the partially blocked entrance of the tomb. It travels at a height of about 3 feet above the ground at a constant speed of about 10–15 mph and enters a thick patch of undergrowth. Marsala runs after it for about a half mile and notices that the bushes part in front of the object and close up after it passes. His companion is frightened and insists on returning to the village. (Mary

Boyd, "An Early Italian Cross-Country Case," *Flying Saucer Review* 20, no. 3 (December 1974): 21; 1Pinotti 13–14; Clark III 1174–1175; Clark IV 1349)

1931, June 6 — Aviator Francis Chichester sees a dull gray-white airship "like an oblong pearl" ahead and to his left as he is making the first solo flight in a Gypsy Moth seaplane from New Zealand to Australia over the Tasman Sea. He looks away briefly, and it has disappeared. Then, the object reappears ahead and to his right. It draws closer to about a mile distant, then it vanishes. Again it reappears and vanishes by decreasing in size as it approaches. (Francis Chichester, *The Lonely Sea and the Sky*, Hodder and Stoughton, 1964, p. 165; "UFO: Sir Francis Chichester Recounts His 1931 Sighting, Earliest UFO Report on Film!" Hotblack Desiato YouTube channel, October 21, 2014; Keith Basterfield, "Aviator Francis Chichester's Classic Sighting: Is the Date Wrong?" Unidentified Aerial Phenomena–Scientific Research, May 29, 2018; Clark III 1175; Patrick Gross, "ACUFO," September 23, 2023; Clark IV 1349)

1931, June 18 — A large steamer, "well-lit with masthead lights but mysteriously silent," is seen by two pilots to pass up Spencer Gulf toward the Port Augusta Channel, South Australia. It makes no reply to their signals. No such ship arrives in Port Augusta. ("The Ghost Ship," Darwin *Northern Territory Times*, June 30, 1931, p. 2; Dolan, USO1, p. 108)

1931, Summer — Alice May Williams of Auckland, New Zealand, begins writing letters over a two-year period to Edison Pettit and Seth Barnes Nicholson, astronomers at the Mount Wilson Observatory in Pasadena, California, describing her encounters with telepathic aliens who fly in a circular machine "like a great big lamp." She writes that "The Planet mars is inhabited by human spirits like us can talk eat & drink wear clothes, but have great power. They are something people of this earth have never seen." Their ships "are round like the moon with airtight shutter at the front, glass. The machine must be built with some light material, airproof fireproof, waterproof. The inside must be like a room, 2 beds tables & chairs." Much of her information seems to be derived from articles in the *Auckland Star* about conditions elsewhere in the solar system. (David Herkt, "Who No: Letters from Alice May Williams," Speaker: Public Address, September 3, 2012)

1932

1932 — Danish pilots Lt. Col. Peter Grunnet and Lt. Tage Andersen are flying an H.M.II (Heinkel HE 8) seaplane over eastern Greenland as part of a photogrammetric survey. Suddenly, Andersen notices they are being followed by a hexagonal metallic object about a mile behind them. (Rufus Drake, "UFO Crisis over Greenland," *Saga*, October 1976, pp. 36–38, 54, 60; Patrick Gross, "ACUFO," September 24, 2023)

1932, April or May — Terry F. Lapeza sees an aluminum-like disc with yellowish lights or "portholes" on the underside, about 100 feet in diameter over Durham, New York. It is moving north at about 300 mph. (UFOEv, p. 129)

1932, Early summer (or early summer 1933)— 7:30 p.m. Teenager Fred W. Van Sant and his brother Milton see 7–8 "meteors flying in a bunch" over hills east of Oakland, California. They maintain the same altitude from east to west in a great arc. The objects are silent and are so bright they seem to be emitting their own light. (Clark III 1175; Clark IV 1349)

1932, June —Evening. Reuben D. Knight is standing on the porch of his farmhouse near Wattsburg, Pennsylvania, when he notices a bright speck of light approaching from some woods to the south. Growing in size, it comes to within 4 feet of him and appears as a silvery-blue ball about 14 inches in diameter. It travels in a loop and circles back to the woods in a steady path of 35–40 mph. After it circles past him again, he calls his wife and she sees the ball make a final loop before it disappears in the woods. (Clark III 1175; Patrick Gross, URECAT, August 19, 2018; Clark IV 1349)

1933

1933 — Earl J. Duncan and a Native American boy are in a truck near Fort Washakie, Wyoming, on the Wind River Indian Reservation. As they reach the crest of a hill, they see three perfectly round, pulsating, orange-red balls about 900 feet away. They are moving "in absolute alignment" about 20 feet from the ground toward the nearest mountain range. After 5 minutes of silent movement they disappear over a nearby mountain. (Clark III 1175; Clark IV 1349)

1933, February — Night. A witness sees an apparent Japanese airplane seemingly taking photos over March Field [now March Air Reserve Base] in Riverside County, California. Two Army planes allegedly shoot the airplane down. But no wreckage is ever found, and the Army says no March Field planes are sent up for such a purpose. If true, the event is possibly related to the war games held at March Field three months later. ("Deny Japanese Airplane over Army Airfield," *Elsinore Leader-Press,* February 23, 1933, p. 1; "Flyers 'Bomb' March Field," *Los Angeles Times,* May 16, 1933, part 2, p. 2; Joe Blackstock, "Dogfight over March Field in 1933 Was Maybe Just an Early UFO Sighting," *Riverside (Calif.) Press-Enterprise,* August 1, 2022)

1933, April — Physicist Karl Guthe Jansky announces his discovery of radio waves coming from the direction of the center of the Milky Way. He detects them accidentally when he is studying radio signals from thunderstorms using a rotating directional antenna (the world's first radio telescope) at the Bell Telephone laboratories field station in Holmdel, New Jersey. (Wikipedia, "Karl Guthe Jansky"; "New Radio Waves Traced to Centre of the Milky Way," *New York Times,* May 5, 1933, p. 1; John Kraus, "The First 50 Years of Radio Astronomy, Part 1: Karl Jansky and His Discovery of Radio Waves from Our Galaxy," *Cosmic Search* 3, no. 4 (Fall 1981); Woodruff T. Sullivan III, "Karl Jansky and the Discovery of Extraterrestrial Radio Waves," in W. T. Sullivan III, ed., *The Early Years of Radio Astronomy: Reflections Fifty Years after Jansky's Discovery,* Cambridge University, 1984, pp. 3–42)

1933, Summer — For weeks, strange lights in the sky are reported around Tobin Lake, Saskatchewan. Curious about the reports, two young men and a woman drive to the lake from Napawin. On their way they see a glow near the horizon, so they park and trek a quarter mile into the woods where they can see a large, oval-shaped craft sitting on legs. From an open central doorway shines a bright orange glow; a ladderlike stairway extends downward with a dozen figures dressed in silver suits moving up and down the steps. They appear to be repairing the craft. The witnesses watch for 30 minutes when they decide to return to their truck and get closer. Two nights later they return and find imprints and burn marks, which they photograph. Two of them write an article that they submit to magazines, which refuse to publish what they consider outlandish fiction. (John Brent Musgrave, "Saskatchewan, 1933: UFO Stops for 'Repairs,'" *Flying Saucer Review* 22, no. 6 (April 1977): 16–17; Patrick Gross, URECAT, July 15, 2009; Clark III 264; Clark IV 304–305)

1933, Summer — 2:30 a.m. A man who still insists on anonymity in 1964 is driving near Cherryville, Pennsylvania, when his car gets a flat tire. As he is jacking it up, he sees a faint violet light in the field on his right. Curious, he walks about 200 feet toward the light and sees a bell-shaped object about 10 feet in diameter and 6 feet high on the grass. Light is issuing from a circular door about 1 foot in diameter. He pushes it and it swings open. Putting his head inside, he cannot see much because of the peculiar light coming from the ceiling. The chamber inside is about 6 feet in diameter, 4 feet high, and full of tubing and dials on a console. An ammonia scent pervades the room, which is notably chilly. The man then walks around the object, touching the surface, which is slick, metallic, and cold. After 10 minutes, he goes back to the car, replaces the tire, and drives home. ("Flying Saucer Spotted in 1933," *Allentown (Pa.) Sunday Call-Chronicle,* February 16, 1964, pp. B1–B2; "1933 Sighting Reported," *APRO Bulletin,* July 1964, pp. 7–8; Patrick Gross, URECAT, July 16, 2009; Clark III 1175–1176; Clark IV 1350)

1933, Summer — Night. Frank Van Keuren is fishing with others along the waterway off Beach Haven, New Jersey. Suddenly they are illuminated by a searchlight coming from an object moving slowly and silently about 1,000 feet in the air. It goes on to circle some radio towers about 8 miles away, flooding them with light. (Lorenzen, *UFOs: The Whole Story,* Signet, 1969, pp. 19–20)

1933, Summer — The curate in Långträsk, Sweden, sees a mystery single-wing airplane fly over this small community 12 times, following the same southwest to northeast route. On four occasions, the plane appears at low altitude, but no marks or insignia are visible. One time, the plane flies only a few feet above the parsonage, and the curate thinks he can see two people in the cabin. (John A. Keel, "Mystery Aeroplanes of the 1930s, Part 2," *Flying Saucer Review* 16, no. 4 (July/Aug. 1970): 9, 12; Clark III 1174; Clark IV 1348)

1933, June 1 — English mountaineer Frank Smythe, during the British Mount Everest Expedition in the Himalaya Mountains of Nepal, is heading for camp at 27,500 feet when he sees two dark objects floating in the blue sky. In shape they resemble kite balloons, except that one appears to possess short squat wings. As they hover motionless, they seem to pulsate in and out as though they are breathing. A minute or two later they disappear behind mountain mist. (Frank S. Smythe, *Camp Six: An Account of the 1933 Mount Everest Expedition,* Hodder and Stoughton, 1937, pp. 264–266; Barry Greenwood, "UFOs on Mt. Everest in 1933," *UFO Historical Revue,* no. 5 (July 1999): 2–3; Clark III 1098; Clark IV 1224)

1933, June 13 — An unknown aircraft allegedly crashes at Magenta, just west of Milan, Italy. After retrieving it, the Italian government establishes a top-secret group, Gabinetto Ricerche Speziale/33, to examine the craft. It is headed by Prime Minister Benito Mussolini, Foreign Minister Galeazzo Ciano, and Air Marshal Italo Balbo, with scientific support from Guglielmo Marconi and astronomer Gino Cecchini. Debris is reportedly stored in the hangars of the SIAI-Marchetti aircraft company in Vergiate, Varese. Journalists are ordered to keep silent about the incident due to national security. The 1st Armored Division captured the SIAI-Marchetti facility in April 1945, so they allegedly could have sent the debris back to the United States. (Good Need, pp. 12–15; J. Antonio Huneeus, "UFO Chronicle," *Fate* 53, no. 9 (September 2000): 8–9, 59; Roberto Pinotti and Alfredo Lissoni, *Gli "X-Files" del Nazifascismo,* 2001; Alfredo Lissoni, "UFO Cover-up by Mussolini! New Documents 'Will Revolutionize Ufology'!" *Flying Saucer Review* 46, no. 3 (Autumn 2001): 13–17; Giuseppe Stilo, "Fascisti su Marte," *UFO Rivista di Informazione Ufologica,* no. 27 (August 2003): 32–39; Massimiliano Grandi, "I 'Files Fascisti' sotto esame," *UFO Rivista di Informazione Ufologica,* no. 29 (July 2004): 44–47; 2Pinotti 179–197; John Greenewald, "The UFO Files of Mussolini: Fascist UFO Files by Roberto Pinotti," The Black Vault, August 10, 2020; Kevin D. Randle, "David Grusch and the 1933 Italian UFO Crash," A Different Perspective, June 21, 2023; Brian Dunning, "Mussolini's Aliens," Skeptoid podcast no. 900, September 5, 2023; Michael Organ, "Mussolini's Flying Saucer 1933," Rambling Thoughts of an Overactive Mind, October 28, 2023; "The 1933 Magenta, Italy UFO Crash," UAP Gerb YouTube channel, March 18, 2024; Josep Guijarro, "Confirmado: Marconi trabájo para el Comité RS/33," Espacio Misterio, April 26, 2024)

1933, July 5 — Evening. Four RAF Hawker Fury I biplanes flying over Sussex, England, encounter a gigantic light that shines directly into the center of their formation from a higher altitude. Two Hawkers experience mechanical trouble and separate. Capt. Nigel Tompkins and Lt. Bruce H. Thomas make emergency landings when both their planes' engines quit. On his way down, Thomas passes so close to the light that it causes burns on his face and hands. Probable hoax. (*History of the III Fighter Squadron, RAF,* London Press, 1947; Jan Aldrich, "Aircraft/UFO Encounters Prior to 1942," Project 1947; Patrick Gross, "ACUFO," September 23, 2023)

1933, July 31 (or August 1) — 9:15 p.m. Somewhere between Butt Valley Reservoir and Humbug Valley, California, high-school science teacher Paul M. Barry Jr. is skywatching when he sees two objects shoot across the sky. They are solid, prolate spheroids with a green luminescence. Their brightness changes considerably as they approach the zenith and diminish as they approach the horizon. He thinks they are 8–10 miles distant. The two objects disappear and are followed by a third. (Clark III 1175; Clark IV 1350)

1933, Fall — 11:45 p.m. A chemist in Contra Costa County, California, hears a humming sound outside coming from the northeast. Looking out the window, he sees the yard bathed in a steady blue-purple light. Suddenly the light goes out and the humming ends with a "pow" sound. (Lorenzen, *UFOs; The Whole Story,* Signet, 1969, p. 19)

1933, Late November — After sunset. A lone observer sees what appears to be an aircraft land on ice-covered lake Fjosoken, Sorsele, Sweden. It takes off and circles the lake for one hour, during which time it projects a powerful searchlight on the lake's surface. However, local police interview the witness and suspect that he was looking at Venus. (Swords 361)

1933, December 24 — 6:00 p.m. Witnesses in Kalix, Norrbotten, Sweden, see beams of light coming from a machine that seems to be searching the ground below. The beams are "blinding." The sighting is part of a wave of "ghost flier" reports of gray monoplanes without identifying markings that are reported over rural areas of Scandinavia from November 15, 1933, through February 11, 1934. The Swedish Military Record Office accumulates 96 reports from Sweden, 234 from Norway, and 137 from Finland, and the Swedish Air Force undertakes at least two reconnaissance missions in search of the mystery planes. More than 50% of the reports take place between 5:00 p.m. and 7:00 p.m., when Venus is low over the horizon. (Vincent H. Gaddis, "Visitors from the Void," *Amazing Stories* 21, no. 6 (June 1947): 159–161; John A. Keel, "The Mystery Aeroplanes of the 1930s, Part 1," *Flying Saucer Review* 16, no. 3 (May/June 1970): 10, 11; Ole Johnny Brænne, "The Norwegian 'Ghost Fliers' of 1933–37," *INFO Journal,* no. 73 (Summer 1995): 6–11; *Strange Company* 7; Anders Liljegren, "Ghost Flier Mystery Still Unresolved," *AFU Newsletter* 41 (September 2001): 1–3; Hilary Evans and Robert E. Bartholomew, *Outbreak!* Anomalist, 2009, pp. 497–499; Swords 361–363)

1933, December 26 — 9:30 a.m.–2:25 p.m. During a heavy snowstorm in New York City, many people hear the sounds of an aircraft circling in the air, though weather conditions prevent it from being seen. Checks with airports fail to produce any information about a flight. Residents of Newark, New Jersey, also hear the sounds of an aircraft. ("'Lost' Plane Heard in Snow over City," *New York Times,* December 27, 1933, p. 2; Clark III 1174; Clark IV 1348)

1933, December 28 — The 4th Swedish Flying Corps begins an investigation of the ghost flyers in Tärnaby. ("Mystery Plane Is Hunted by Swedish Army Fliers," *New York Times*, January 1, 1934, p. 21; John A. Keel, "Mystery Aeroplanes of the 1930s, Part 2," *Flying Saucer Review* 16, no. 4 (July/Aug. 1970): 12)

1933, December 30 — Swedish customs sends a request for air support to Gen. Eric Virgin, head of the Swedish Air Force, to help apprehend the ghost fliers who could be smuggling liquor into Sweden. However, he is cautious and wants more information to evaluate. (Good Above, p. 13; Swords 361–362)

1934

1934 — Mining engineer and mystic Guy Ballard writes *Unveiled Mysteries*, in which he introduces the concept of "ascended masters," spiritually enlightened beings who in past incarnations were ordinary humans, but who have transformed and exist on a higher plane. Ballard claims the book was dictated to him by the ascended master St. Germain, and during an out-of-body trip he meets 12 "tall masters" from Venus inside the Teton Range in Wyoming. He and his wife go on to found the "I AM Activity," a popularized form of theosophy. (Godfré Ray King [Guy Ballard], *Unveiled Mysteries*, Saint Germain Press, 1934; Clark III 298, 609; Clark IV 338, 668)

1934, January — George Adamski, who has been a lecturer and counselor on spiritual topics since about 1928, opens the Monastery of the Royal Order of Tibet at 758 Manzanita Drive, Laguna Beach, California. The monastery serves as his home and headquarters until 1940. (George M. Eberhart, "George Adamski—New Age Meets the Space Age," *IUR* 21, no. 2 (Summer 1996): 20; Marc Hallet, *A Critical Appraisal of George Adamski, the Man Who Spoke to the Space Brothers*, The author, July 2016, pp. 14–20; "Laguna Beach, 1932–1940: From Temple to Ranch," The Adamski Case, September 27, 2019)

1934, January 2 — 3:45 a.m. Olof Hedlund is taking a walk in Sorsele, Västerbotten, Sweden, when he hears an engine above him. There is a full moon and visibility is good. He sees an airplane fly over the city from the west, passing directly above the train station. It turns three times in wide circles, then it takes off to the north, following the railroad tracks. It is at about 1,300 feet altitude and visible for 15 minutes. (John A. Keel, "Mystery Aeroplanes of the 1930s, Part 2," *Flying Saucer Review* 16, no. 4 (July/Aug. 1970): 12)

1934, January 9 — A mystery airplane is seen again over Västerbotten province, Sweden. The Swedish Air Force loses two aircraft trying to discover where the plane is based. ("Mystery Plane Reported," *New York Times*, January 10, 1934, p. 11; *Strange Company* 7–8)

1934, January 10 — Gen. Pontus Reuterswärd, chief of armed forces in Upper Norrland, Sweden, recommends to officials of Norrbotten County that they request assistance from the Air Force to deal with the ghost fliers. Norrbotten administrator Bernard Gärde is skeptical of the "vague and unreliable" reports at first. (*Svenska Dagbladet*, January 27, 1934, p. 3; Swords 361–362)

1934, January 22 — A mystery aircraft flies over the military fortress at Boden, Norrbotten, Sweden, seen by 30 soldiers, and Reuterswärd alerts the press that planes had flown over restricted military areas. (*Svenska Dagbladet*, January 27, 1934, p. 3; John A. Keel, "Mystery Aeroplanes of the 1930s, Part III—The Landings," *Flying Saucer Review* 17, no. 4 (July/Aug. 1971): 17; Swords 362)

1934, January 27 — Swedish MP Arvid Lindman puts a question to Prime Minister Per Albin Hansson, asking what action the government plans to take about the ghost fliers. (Swords 362)

1934, February 1 — Night. A mystery aircraft flies in circles for two hours over central London, England. Its engine is noisy, and its course can be clearly seen by its lights. On February 6, Under-Secretary of State for Air Philip Sassoon claims that it was an RAF plane carrying out a training exercise in coordination with ground forces. (*The Times* (London), February 2, 1954; John A. Keel, "Mystery Aeroplanes of the 1930s, Part 2," *Flying Saucer Review* 16, no. 4 (July/Aug. 1970): 13)

1934, February 2 — Prime Minister Hansson tells the Swedish Parliament that most ghost flier sightings are misidentifications or fantasy, while others are unsolved. (Swords 362)

1934, February 2 — Night. A large unidentified airplane is seen over eastern Finland close to the Russian frontier, apparently scouting the district. Flights of ghost planes and mysterious lights have been seen for the past month over Helsinki and Vyborg, Finland, as well as Sweden and Norway. The Scandinavian mystery fliers continue to be seen into 1935. ("Finnish Alarm Grows over 'Ghost' Planes," *New York Times*, February 4, 1934, p. 9; Ole Johnny Brænne, "The Norwegian 'Ghost Fliers' of 1933–37," *INFO Journal*, no. 73 (Summer 1995): 6–11; *Strange Company* 8–9)

1934, February 5 — Several witnesses see a "flying machine" crash-land during a snowstorm on Mount Fager in Norway. Looking through telescopes, they can see the plane and its two-man crew shoveling snow away from the craft, which is resting on a plateau. On February 7, one of several search parties find apparent airplane tracks and curious footprints nearby, but a subsequent investigation by Norwegian marine and police personnel determine that it is impossible for an airplane to start up from that location and the tracks are actually furrows created by the storm. Separate police search parties scour the area and determine that the "plateau' is a "moderately steep hill" and the ghost plane was a large rock. (*Svenska Dagbladet* (Stockholm), February 7, 1934, p. 22; *Svenska Dagbladet* (Stockholm), February 8, 1934, p. 3; *Svenska Dagbladet* (Stockholm), February 9, 1934, p. 22; *Svenska Dagbladet* (Stockholm), February 10, 1934, p. 6; John A. Keel, "Mystery Aeroplanes of the 1930s, Part III: The Landings," *Flying Saucer Review* 17, no. 4 (July/Aug. 1971): 17, 18)

1934, February 12 — Norrbotten, Sweden, administrator Bernard Gärde officially requests assistance of the Air Force with the ghost fliers. But air surveillance has actually been taking place since early January. (Swords 362)

1934, March 4 — Sweden calls off its hunt for the ghost fliers, although sightings are still being reported. Even though 24 airplanes participated in the search, no Swedish pilot has seen a ghost flier. Soldiers on the ground occasionally report sound from a motor or lights in the sky. (Swords 362–363)

1934, April 30 — Gen. Reuterswärd tells the press that several ghost flier reports in January had been of real, unidentified aircraft involved in a violation of Sweden's airspace. MP Elof Lindberg accuses him of not being competent enough to draw such a conclusion. (Anders Liljegren, "The Ghost Fliers of the 1930s: A Status Report (May 1982)," *AFU Newsletter*, no. 24 (May/Aug. 1982): 6–8; Good Above, p. 13; Swords 363)

1934, June 11 — Night. Two mystery airplanes circle around London, England: "The machines were low enough for their outlines, as well as their navigation lights, to be clearly visible against the sky." Regulations prohibit RAF planes from flying over London at less than 5,000 feet. (John A. Keel, "Mystery Aeroplanes of the 1930s, Part 2," *Flying Saucer Review* 16, no. 4 (July/Aug. 1970): 13)

1934, Summer — Day. 9-year-old Coral E. Lightner and two friends watch a white object "like an open umbrella without the ribs or spurs" glide silently through the sky from the west-southwest to the northwest over Barron, Wisconsin. It moves silently with a slight undulation before it disappears after 20 seconds. (Lorenzen, *FS Hoax*, pp. 15–16; "The Wisconsin Flying Saucer That Changed UFO Research Forever," Wisconsin Frights, September 20, 2018)

1934, July 14 — Late evening. French tourist Paul Faiveley is retuning to his rented cabin in the New Forest in southern England when the ground around him is illuminated by a perfectly circular white disc. It is too bright to look at directly. It moves toward him briefly, then hovers. After 2 minutes, it develops a blue fringe like a halo, but this goes out after one minute. Then the white light dims and turns yellow, orange, and finally red. The object takes off and disappears. (Jean-Claude Bourret, *The Crack in the Universe*, Neville Spearman, 1974; Clark III 1176; Clark IV 1350)

1934, August 9 — Around 5:00 a.m. Musician Leon M. Thompson is boating on Keuka Lake in western New York when he notices an odd cloud on the west side of the lake. It is in the form of an elongated cone some 60–75 feet in length and 10–15 feet in diameter at its largest point. Suddenly the sky lights up in a flash and the cloud emits a fireball that arcs across the lake to the east and leaves a fiery train. It falls on a cottage and throws up a cloud of mist or steam that slowly dissipates. ("Ball of Fire Brings Thrill to Fisherman," *Elmira (N.Y.) Star-Gazette*, August 4, 1934, p. 5; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 315–328)

1935

1935 — 10:00 p.m. Edward Winters of the US 4th Coast Artillery Regiment watches a dull-red, Zeppelin-shaped object flying over the Panama Canal Zone at high speed from the Pacific to the Atlantic for about 30 minutes. Later it returns, moving in the opposite direction farther away. (NICAP case file)

1935 — Astronomer Arthur M. Harding writes that "Surely there must be some forms of life on Venus that are not so very different from what we find on earth." (Arthur M. Harding, *Astronomy: The Splendor of the Heavens Brought Down to Earth*, Garden City Publishing, 1935, p. 408)

1935, January 10 — Charles Spayde, the operator of a telegraph station west of Lima, Ohio, claims that he has been receiving a "series of strange, unintelligible signals" that are broad in wavelength and "come in all over the dial." He is convinced they are not static or mechanical disturbances and they do not originate on this planet. ("Strange Radio Noises May Be Signals from Another Planet," *Lima (Ohio) News*, January 10, 1935, p. 10; Jerome Clark, "Conversations with Martians," *IUR* 29, no. 3 (Fall 2004): 20)

1935, January 22 or 23 — 8:00 p.m. A woman in Vienna, Virginia, sees a lightning-like flash in the southwest that flares up several times then dies down. It seems to come from a "great blazing light, almost a ball of fire," that is moving around the horizon. It is lost to view in the southeast. ("A correspondent from Vienna, Va., writes," *Science* 81 (1935): 294; Clark III 1175)

1935, Spring — Night. A Mr. Aerts sees a brilliant circular object "like aluminum" in the sky above the roofs of nearby houses in Mechelen, Belgium. It lands and he sees two small occupants come out of the rear; they wear square helmets with short antennas and are apparently examining the exterior surface. (Center for UFO Studies, HUMCAT Index 1910–1939, p. 42; Clark III 265; Clark IV 305)

1935, April 5 — 7:30 p.m. A farmer named Mora sees a large, round, brilliant object descend and hover just above the ground near his property in Aznalcázar, Seville, Spain. Several small beings appear and stroll around it. (Vicente-Juan Ballester Olmos, *A Catalogue of 200 Type-I UFO Events in Spain and Portugal*, Center for UFO Studies, 1976, p. 1; Patrick Gross, URECAT, April 9, 2007; Clark III 264–265; Clark IV 305)

1935, May — Radu Popescu and his cousin are walking by the Olt River near Drăgășani, Romania, when they come upon what seems to be a Romany wagon. They see five figures—one next to the object, two farther away, and another two next to a boat on the shore. Suddenly the figures run toward the object, something black covers it, an antenna appears, and it rises up above the river. It turns to a white color as it moves away. (Romania 121–122)

1935, July 1 — The US Division of Investigation officially becomes the Federal Bureau of Investigation. (Federal Bureau of Investigation, Timeline, March 31, 2002)

1935, July 8 — The Swedish Chief of Staff releases its final report on ghost fliers. After concluding that 42 of the 487 reports investigated by Sweden, Norway, and Finland are of actual aircraft violating borders, the military admits the phenomenon is at least partially real. (Swords 363)

1936

1936 — Atmospheric physicist William Jackson Humphreys, after examining 280 cases, argues that ball lightning is caused by persistence of vision, meteorites, will-o'-the-wisp, brush discharge, and other natural phenomena. (W. J. Humphreys, "Ball Lightning," *Proceedings of the American Philosophical Society* 76 (1936): 613–626)

1936 — Late evening. Mrs. E. P. Higgins and another member of the Canal Zone Astronomical Society observe a moving orange-red star passing from north to south near Miraflores Lake, Panama. Suddenly it halts and travels in three small circles from right to left. ("I Saw a Flying Saucer," *Flying Saucers*, May 1959, pp. 6–18, 78; Lore and Deneault, pp. 112–113; Clark III 1176; Clark IV 1350)

1936, January — George Adamski's Royal Order of Tibet publishes *Universal Jewels of Life* as a free monthly newsletter for those attending his meetings in Laguna Beach, California. Besides Adamski, talks are also given by Marguerite Weir, Alice Wells, and others. Beginning in May, the Royal Order has a weekly 15-minute slot on local radio stations KFOX in Long Beach and KMPC in Los Angeles. He also publishes *Wisdom of the Masters of the Far East*, a summary of his "ageless wisdom" teachings. ("Laguna Beach, 1932–1940: From Temple to Ranch," The Adamski Case, September 27, 2019)

1936, February 14 — 6:00 p.m. During a blizzard in Cody, Wyoming, residents hear the roar of an airplane engine circling the town several times. There is silence for an hour, then the sound returns at 7:00 p.m. The airport sets up flares to guide the plane in, but the sounds fade and no explanation for the incident can be found. ("Mystery Plane Battles Storm," *Portland Oregonian*, February 15, 1936, p. 1; "Plane Still Mystery," *Portland Oregonian*, February 18, 1936, p. 1; Clark III 1174; Clark IV 1348)

1936, August 17 — A metallic disc with a diameter of 33–40 feet is seen flying soundlessly near Venice, Italy. It has windows and alternating white and red lights. Two fighters from a nearby air base attempt to intercept it but

cannot reach it. After maneuvering for an hour and passing above Mestre, Veneto, it appears more like a torpedo-shaped object. Two other smaller, domed discs are also seen following it. A report on the incident is sent to Foreign Minister Galeazzo Ciano. (Good Need, p. 12; Roberto Pinotti and Alfredo Lissoni, *Gli "X-Files" del Nazifascismo*, 2001)

1936, Fall — Before 12:00 midnight. Louie R. Lindblad and five companions from Texarkana, Arkansas, are fox hunting in Bowie County, Texas [around the current site of the Red River Army Depot] when they observe numerous star-like objects in a circular formation. Occasionally a light would fly across the circle and take up another position until they all seem to relocate. They watch the display for about 30–40 minutes. (L. R. Lindblad, "The Night the Stars Changed Places," *MUFON UFO Journal*, no. 150 (August 1980): 12)

1936, October 10 — 4:15 a.m. Capt. Mario Rossi, flight instructor at the airfield at Orbetello, Grosseto, Italy, is flying a Savoia-Marchetti SM.62 at 12,465 feet over Talamone, Italy, when he sees an unusual light ahead of his plane. He follows the light, which is at a slightly higher altitude and moving at nearly 440 mph. Rossi loses it after flying into a cloud for 12 minutes and finding himself over Elba. (Ernesto Thayaht, "Three Sightings in Italy," *Flying Saucer Review* 1, no. 3 (July/Aug. 1955): 6; 1Pinotti 15–16; Patrick Gross, "ACUFO," September 24, 2023)

1936, October 15 — Night. Holger Berg and another worker at the Civilian Conservation Corps in Eklutna, Alaska, are walking south toward Anchorage when the see a light approaching them from the south. It is attached to a cigar-shaped object embedded in a blue-green haze and making a strange buzzing noise. As the object passes directly overhead, they notice it actually has a triangular shape and multicolored lights on its tail end. Frightened, they dive into a nearby snowbank then run back to Eklutna. (National UFO Reporting Center, "NUFORC UFO Sighting 16166," February 5, 2001; Marler 64–66; "Eyewitness Holger Berg Talks about His 1936 Sighting of a Cigar-Shaped UFO in Eklutna, Alaska," Eyes on Cinema YouTube channel, January 10, 2024)

1936, Winter — Robert Damion, an astronomer of Nice, Alpes-Maritimes, France, who has a private observatory in the Alps, claims that for several nights a "certain portion of the sky in the vicinity of Mars" has been lit up with a deep bluish tint for 40 seconds each time. He is convinced that Mars is trying to signal Earth. ("Strange Light from Mars Called Signal to Earth," *Ogden (Utah) Standard-Examiner*, March 11, 1936, p. 12)

1937

1937, January — A man who later becomes an administrator in a Missouri state agency chases a disc-shaped object in his private aircraft over Van Buren, Missouri. (Harley D. Rutledge, *Project Identification: The First Scientific Field Study of UFO Phenomena*, Prentice-Hall, 1981, p. 213)

1937, January 1 — Noon. Pilot Howard S. Behr is flying a Curtiss-Wright CW-15 Sedan at 3,000 feet over Virginia on his way to Raleigh, North Carolina. Suddenly he sees an object beginning to cross his flight path about 1,000 feet below him. It looks like a gondola, gun-metal gray in color, with both of its ends turned up. He estimates it is about 35–40 feet long and traveling at 150 mph. It moves off to his left and disappears. (Jerome Clark, *Strange Skies: Pilot Encounters with UFOs*, Citadel, 2003, p. 6; Patrick Gross, "ACUFO," September 24, 2023)

1937, January 4 — New ghost flier sightings around the fortress at Boden, Norrbotten, Sweden, have prompted Gen. Pontus Reuterswärd to alert Minister of Defence Janne Nilsson about the possibility of foreign spies. (Swords 363)

1937, Late January — Ghost fliers return to Västerbotten, Sweden. A light is seen wandering near the horizon east of Umeå. A light brighter than a headlight is reported from a community near Dorotea. A light similar to position lights on an aircraft flies over a village outside Stensele. (Swords 363)

1937, February 11 — MP Elof Lindberg demands in the Swedish Parliament that a commission with civil experts, not military, should investigate the ghost flier intrusions. He suspects the military has embellished the reports to direct more resources to the northern region and to the Air Force in general. (*Svenska Dagbladet* (Stockholm), February 14, 1937, p. 14; Swords 363)

1937, February 11 — 9:00 p.m. The crew of the fishing vessel *Fram* is departing Kvalsvik, Norway, when they notice a "large aeroplane" with red and green glowing lights resting on top of the water. The captain turns the boat around to offer assistance, but the object's lights go out and it is cloaked in a "cloud of smoke" and vanishes. (John A. Keel, "Mystery Aeroplanes of the 1930s, Part IV," *Flying Saucer Review* 17, no. 5 (Sept./Oct. 1971): 22; *Strange Company* 11)

1937, May 19 — Lindberg's request for a civilian ghost flier investigation is rejected by Swedish Minister of Defence Janne Nilsson, who explains that no new facts have surfaced and few new observations have been reported. (Swords 363)

1937, May 30 — Amateur astronomer Latimer J. Wilson of Nashville, Tennessee, is observing Mars through a 12-inch reflector when he sees a series of intermittent bright flashes across the south polar cap. A line of tiny white spots seems to extend across the cap, some coalescing to swell in a brilliant white spot that quickly becomes yellow, then red-yellow, the "phenomenon passing from left to right across the polar cap." (Latimer J. Wilson, "Apparent Flashes Seen on Mars," *Popular Astronomy* 45 (1937): 430; Walter H. Haas, "Flashes on Mars Observed in 1937 and Some Random Remarks," *The Strolling Astronomer* 45, no. 1 (Winter 2003): 43–45)

1937, Summer — An object allegedly falls from the sky in Langenau [now Czernica, Poland] into a field belonging to Eva Braun's family and is retrieved by German soldiers. It supposedly winds up in Wernher von Braun's laboratory, but the story is probably mythical. (Poland 116–117)

1937, September — Tiffany Thayer publishes the first issue of the *Fortean Society Magazine* (retitled *Doubt* in 1944) in New York City. (*Fortean Society Magazine* 1, no. 1 (September 1937); Clark III 516; Clark IV 565)

1937, September — Electrical engineer Grote Reber builds one of the first radio telescopes in his back yard in Wheaton, Illinois. It consists of a parabolic dish of sheet metal 30 feet in diameter tuned to a radio receiver 25 feet above the dish. Although he does not confirm Jansky's 1933 discovery of radio waves in space, he does so with his third model in 1938. (Wikipedia, "Grote Reber"; Grote Reber, "Cosmic Static," *Astrophysical Journal* 91 (June 1940): 621–624; John Kraus, "The First 50 Years of Radio Astronomy, Part 2: Grote Reber and the First Radio Maps of the Sky," *Cosmic Search* 4, no. 1 (1982))

1937, September 10–12 — George Adamski's Royal Order of Tibet organizes a festival in Laguna Beach, California, dramatizing the "teachings of the universal masters" and a round-table discussion focusing on the "present day needs in unifying all mankind." ("Laguna Beach, 1932–1940: From Temple to Ranch," The Adamski Case, September 27, 2019)

1938

1938 — The Ford Foundation and Rockefeller Foundation begin contributing large amounts of money to the Council on Foreign Relations. They create various Committees on Foreign Relations throughout the country, which later become governed by the American Committees on Foreign Relations in Washington, D.C., funded by a grant from the Carnegie Corporation. Influential men are chosen in several cities and are brought together for discussions in their own communities as well as participating in an annual conference in New York. These local committees serve to influence local leaders and shape public opinion to build support for the council's policies, while also acting as "useful listening posts" through which the Council and US government can "sense the mood of the country." (Wikipedia, "Council on Foreign Relations")

1938 — Dusk. A group of children in Silver City, New Mexico, watch a gray-skinned, gray-suited, human-like figure floating at treetop level. He seems to be wearing a cape and a wide belt that has points sticking out of it. (Clark III 777; Clark IV 858)

1938 — Harvey L. Sperry, 13, sees a white, vapor-like object moving at 5–10 mph at less than 100 feet altitude from north to south in Minneapolis, Minnesota. Its rim seems to be "composed of two interwoven parts revolving and moving in opposite directions." (Lore and Deneault, p. 136; Clark III 1176)

1938, February — Raymond A. Palmer is hired as editor of *Amazing Stories* magazine, owned by Ziff-Davis in Chicago, Illinois. He immediately sets out to enliven the periodical, which is close to folding. Concentrating on "space opera" stories, he expands its size to more than 200 pages and encourages readers to contribute content. (Wikipedia, "Raymond A. Palmer")

1938, Summer — Midnight. Artist Malcolm B. Perry sees what looks like a Navy blimp moving east to west over Somerville, Massachusetts. It has apparent portholes in the sides, and he can see the silhouette of someone looking at him. Other figures are taking turns looking through portholes. It disappears below some low clouds. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 20–21; "1938: Perry's Alien," *UFO Roundup* 5, no. 37 (September 4, 2000); Clark III 265; Clark IV 305)

1938, July 25 — 11:30 p.m. A lieutenant and his aide see a strong light coming from a hovering lens-shaped object near Guadalajara, Spain. It is over 35 feet in diameter and 15 feet high. A platform with two moving figures is lowered from underneath. A blue beam from the object shines on the witnesses, who feel a sudden chill. The platform rises back up, and the object glows with an intense white light and flies away. (Vicente-Juan Ballester Olmos, "Survey of Iberian Landings," in Charles Bowen, ed., *UFOs in Two Worlds*, special issue of FSR, August 1971, p. 46; Vicente-Juan Ballester Olmos, *A Catalogue of 200 Type I UFO Events in Spain and Portugal*, CUFOS, 1976, p. 2; Clark III 265; Clark IV 305)

1938, October — Dusk. A man is in a cornfield with his father near Alger, Ohio, when an object moves up and hovers about 500 feet above the field. The tractor motor stops running. The object is about 100 feet in diameter and has a ring of pulsating, multicolored lights around it. Soon it makes a right-angle turn and vanishes in the sky, after which they get the tractor working again. (Michael D. Swords, "The Timmerman Files," *IUR* 26, no. 4 (Winter 2001–2002): 14)

1938, October 22 — Italian Lt. Col. Mario Pezzi reaches a record altitude of 56,850 feet in a Caproni Ca.161. It is still the highest a manned, propeller-driven biplane has gone. (Wikipedia, "Mario Pezzi (aviator)")

1938, October 30 — 8:00 p.m. "The War of the Worlds" episode of the American radio drama anthology series *The Mercury Theatre on the Air*, directed and narrated by actor and future filmmaker Orson Welles, is an adaptation of H. G. Wells's novel *The War of the Worlds* (1898). It is performed and broadcast live in New York City as a Halloween episode over the Columbia Broadcasting System radio network. Some listeners hear only a portion of the broadcast and, in the tension and anxiety prior to World War II, mistake it for a genuine news broadcast. Thousands of them share the false reports with others or call the media or police to ask if the broadcast is real. Many newspapers assume that the large number of phone calls and the scattered reports of listeners rushing about or fleeing their homes prove the existence of a mass panic, but such behavior is not widespread and the program has relatively few listeners. According to media historian Joseph W. Campbell, the most common response said to indicate a panic is calling the local newspaper or police to confirm the story or seek additional information. That, he writes, is an indicator that people are not generally panicking or hysterical. "The call volume perhaps is best understood as an altogether *rational* response." Some New Jersey media and law enforcement agencies receive up to 40% more telephone calls than normal during the broadcast. In the days after the adaptation, widespread outrage is expressed in the media. The program's news-bulletin format is described as deceptive by some newspapers and public figures, leading to an outcry against the broadcasters and calls for regulation by the FCC, which declines. Some government agencies in the US, Germany, and Russia take note of how segments of the population are easily manipulated into thinking fiction is fact. According to Annie Jacobsen, the confusion allegedly inspires Joseph Stalin to create a similar scenario with a fake alien crash in the US. West Windsor, New Jersey, where Grovers Mill (the scene of the Martian invasion) is located, commemorated the 50th anniversary of the broadcast in 1988 with four days of festivities including art and planetarium shows, a panel discussion, a parade, burial of a time capsule, a dinner dance, film festivals devoted to H. G. Wells and Orson Welles, and the dedication of a bronze monument to the fictional Martian landings. (Wikipedia, "*The War of the Worlds* (1938 radio drama)"; Hadley Cantril, *The Invasion from Mars*, Princeton University, 1940; John Gosling, *Waging the War of the Worlds: A History of the 1938 Radio Broadcast and Resulting Panic, Including the Original Script*, McFarland, 2009, pp. 19–98; Jacobsen, *Area 51*, pp. 22, 211; Robert E. Bartholomew and Benjamin Radford, *The Martians Have Landed!* McFarland, 2012, pp. 16–22; Graff ix–xiv; Eghigian, *After*, pp. 44–45)

1938, December 17 — The process of nuclear fission is discovered by chemist Otto Hahn and his assistant Fritz Strassmann at the Kaiser Wilhelm Institut für Chemie in Berlin, Germany, producing barium by bombarding uranium with neutrons. (Atomic Heritage Foundation, "Atomic Timeline")

1939

1939? — Sisters Lucile and Allene Holt, daughters of Rev. Turner Hamilton Holt, claim they are separately told by their father, a cousin of Secretary of State Cordell Hull, that Hull personally showed Holt a wrecked circular craft of some kind and glass jars holding unknown creatures. These are stored in a sub-basement of the US Capitol building in Washington, D.C. Both sisters are told the story when Holt is a minister at the Shenandoah Christian Church in Greenwich, Ohio, before 1947, but researchers can find no confirmation in any of Hull's papers or memoirs. (William E. Jones and Eloise G. Watson, "Pre–World War II 'Creature' Retrieval?" *IUR* 26, no. 4 (Winter 2001–2002): 6–9, 12)

1939, January 13 — The process of nuclear fission is explained theoretically in Stockholm, Sweden, by Lise Meitner and her nephew Otto Robert Frisch, who compares it to the biological fission of living cells. (Atomic Heritage Foundation, "Atomic Timeline")

1939, January 25 — A Columbia University team conducts the first nuclear fission experiment in the US in the basement of Pupin Hall on the south side of 120th Street in New York City. The experiment involves placing uranium oxide inside an ionization chamber and irradiating it with neutrons, then measuring the energy released. The results confirm that fission is occurring and hints strongly that it is the isotope uranium-235 that is undergoing fission. (Richard Rhodes, *The Making of the Atomic Bomb*, Simon & Schuster, 1986, pp. 267–270)

1939, January 26 —The Carnegie Institution of Washington holds a press conference at the Fifth Washington Conference on Theoretical Physics in D.C. to announce the discovery of nuclear fission. (Atomic Heritage Foundation, "Atomic Timeline")

1939, Late summer — Night. A girl sleeping in the back yard of her home in Fort Worth, Texas, is awakened by a whirring noise. She sees a small object approaching from the east at an altitude of 20–30 feet. When it gets close, it descends to the level of her bed and hovers briefly at the foot, so close that she can touch it. It has the shape of an "old-time Mississippi steamboat with a deck around the bottom." Strata or veins run through it, and a soft, blue-green glow surrounds it. It is 3 feet around and 1 foot high. It rises suddenly and disappears. ("Woman Says Strange Object Flew by Her Bed in Yard," *Fort Worth (Tex.) Star-Telegram,* March 24, 1950, p. 23; Clark III 1176; Clark IV 1350)

1939, Early August — George Pârvu and four other schoolchildren are playing in an open field in Armășești, Romania, when they see a bright light in the sky moving in a zigzag fashion. It circles a few times then descends in their direction, getting bigger and brighter. The egg-shaped object hovers silently at an altitude of 230–260 feet. Suddenly it becomes a dull coppery color and lands about 140 feet away. Two of the children flee but Pârvu and two others remain. The bottom of the object has a ring of small turbine blades that look like paddles in a water mill. It seems to be 16 feet high. A hatch opens and two little men about 4 feet tall come out, dressed in gray diving suits. They walk toward the children, one of them holding a rectangular box pointing at the ground. The children approach them, holding hands, but when they are about 23 feet away the other man points a thick stick-like device at them and they are no longer able to move forward. The little men bow in their direction, waist deep, then turn around and reenter the object, which takes off. The children find a circular area of yellowed grass where the object had been. Pârvu feels energized, but one of the other boys is temporarily sick. Pârvu encounters what he perceives to be the same object in August 1944, August 1949, and the summer of 1954 (in the center of Bucharest). (George Pârvu, *La voia destinului*, CNI Coresi, 2011; Romania 124–128)

1939, August 2 — Hungarian-American physicist Leo Szilárd writes a confidential letter to President Roosevelt, in consultation with fellow Hungarian physicists Edward Teller and Eugene Wigner. He has persuaded Albert Einstein to sign it as well. The letter warns that Germany might develop atomic bombs and suggests that the United States should start its own nuclear program. It results in the establishment of research into nuclear fission by the US government, and ultimately to the creation of the Manhattan Project. Delayed by the outbreak of war in Europe, the letter is eventually hand-delivered to Roosevelt by economist Alexander Sachs on October 11. Roosevelt gives the letter to his aide, Brig. Gen. Edwin "Pa" Watson with the instruction: "Pa, this requires action!" (Wikipedia, "Einstein–Szilard letter"; Atomic Heritage Foundation, "Atomic Timeline")

1939, October — An egg-shaped object with 8 spots like portholes is observed through an astronomical reflector telescope at Wisconsin Rapids, Wisconsin. (Richard H. Hall, *From Airships to Arnold,* UFO Research Coalition, 2000, p. 17)

1939, October 21 — After reading Szilárd's letter, Roosevelt creates an Advisory Committee on Uranium, which meets for the first time at the National Bureau of Standards in Washington, D.C. The committee consists of NBS Director Lyman James Briggs, Army Lt. Col. Keith F. Adamson, and Navy Cmdr. Gilbert C. Hoover. It is attended by physicists Fred L. Mohler from the National Bureau of Standards and Richard Brooke Roberts from the Carnegie Institution of Washington, and Szilárd, Wigner, and Teller. Einstein is invited but declines to attend. Adamson is skeptical about the prospect of building an atomic bomb, but is willing to authorize $6,000 (equivalent to $107,000 in 2018 dollars) for the purchase of uranium and graphite for Szilárd and Enrico Fermi's experiments into producing a nuclear chain reaction at Columbia University. (Wikipedia, "S-1 Executive Committee")

1939, November 13 — 7:00 a.m. A building foreman is driving past a deserted farm near Brockworth, Gloucester, England, when he hears a high-pitched humming sound. He watches a gray, bell-shaped object hovering about 20 feet above a field 100 feet away. He estimates it is about 25 feet across. Dark window-like patches are visible on the side. A "curtain" of blue-green light emanates from the underside. After about two minutes, the green light retracts into the base of the object. The object then tilts to an angle of about 80° and moves away without a sound. (Jenny Randles, "Bell-Like UFO from W.W.2," *Probe Report* 3, no. 4 (April 1983): 12–14; Jenny Randles and Peter Warrington, *Science and the UFOs*, Basil Blackwell, 1985, p. 3; Jenny Randles, "Beam Me Up," *Fortean Times* 381 (July 2019): 29–30)

1940

1940 — Astronomer Royal Harold Spencer Jones publishes *Life on Other Worlds*, an essay on the cosmos, the possibility of life arising, science's tools, the development of the Earth, solar system bodies without atmospheres, the giant gas planets, Venus, Mars, the origin of solar systems, and possibilities for life beyond the solar system. (H. Spencer Jones, *Life on Other Worlds*, Macmillan, 1940; Michael D. Swords, "SETI/ETI and UFOs," *JUFOS* 5 (1994): 141–142)

1940, March — George Adamski moves from Laguna Beach to a property along the Star Route in Valley Center, California, about 9 miles from where Palomar Observatory is under construction to set up a spiritual retreat. He acquires a 15-inch telescope to create an interest in astronomy. ("Palomar Mountain, 1940–1960: From Obscurity to World Fame," The Adamski Case, September 22, 2019)

1940, March — US physicist John R. Dunning and colleagues at Columbia University verify the hypothesis of Danish physicist Niels Bohr that fission is more readily produced in the rare uranium-235 isotope than the abundant uranium-238 isotope. Dunning begins investigating gaseous diffusion as a process for enriching uranium. (Atomic Heritage Foundation, "Atomic Timeline")

1940, March — Otto Robert Frisch and Rudolf Peierls, two researchers at the University of Birmingham in England—who ironically have been assigned to investigate nuclear weapons by Australian physicist Mark Oliphant because, as enemy aliens in Britain, they are ineligible to participate in secret war work—issue the Frisch-Peierls memorandum. It contradicts the common thinking of the time that many tons of uranium would be needed to make a bomb, requiring delivery by ship. The calculation in the memorandum shows that a bomb might be possible using as little as 1–10 kilograms of pure uranium-235, which would be quite practical for aircraft to carry. (Wikipedia, "Frisch–Peierls memorandum"; Atomic Heritage Foundation, "Atomic Timeline")

1940, March 22 — Franklin D. Roosevelt signs Executive Order 8381, creating the three security levels for the most important documents: Restricted, Confidential, and Secret. (US President, Executive Order No. 8381, "Defining Certain Vital Military and Naval Installations and Equipment," March 22, 1940)

1940, March 23 — Night. An RAF Wellington bomber flying near Cuxhaven, Germany, is shadowed by an object with a fixed searchlight about 7,500 behind it and to starboard. (Graeme Rendall, "80 Years Ago, the Royal Air Force Saw Flying Objects They Could Not Explain," The Debrief, December 2, 2022)

1940, March 24 — Night. An RAF bomber near Bremerhaven, Germany, is followed by two unidentified objects with searchlights. After 5 minutes the crew shoots at them with their machine gun and the lights go out. (Graeme Rendall, "80 Years Ago, the Royal Air Force Saw Flying Objects They Could Not Explain," The Debrief, December 2, 2022)

1940, Spring — Afternoon. Walking down a street in Hinsdale, Illinois, William T. Powers sees five disc-shaped objects in the northern sky. They are traveling together at 100–200 mph and disappear into a cloud. (Clark III 1177; Clark IV 1352)

1940, April 10 — The first meeting of the MAUD Committee in England, established in response to the Frisch-Peierls memorandum to determine if an atomic bomb is feasible, meets in the Royal Society committee room in Burlington House, London. The original members are physicists George Paget Thomson, James Chadwick, John Cockcroft, Mark Oliphant, and Philip Burton Moon; physicists Patrick Blackett, Charles Drummond Ellis, and chemist Norman Haworth are subsequently added, along with a representative of the Director of Scientific Research at the Ministry of Aircraft Production (MAP). (Wikipedia, "MAUD Committee")

1940, May — Morning. Dutch immigrant Udo Wartena is working his mining claim near the base of Boulder Mountain, Montana, when he hears a humming sound. Curious, he climbs to higher ground and sees a large silver disc, 100

feet across, hovering a short distance away. A circular stairway is let down, a man descends it, and starts walking toward Wartena, who approaches him. The man has white hair and is wearing gray overalls, a gray cap, and slippers. He asks in English if his crew can take on some water, Wartena agrees, and a hose is let down into a stream. Wartena is invited onto the craft, where he meets another white-haired man who says they are about 600 and 900 years old. The first man explains that the craft moves by using stored stellar energy. Wartena chats with them further and is subjected to an examination by an X-ray-like machine. As he is let off, the man tells him not to tell anyone about the incident. Wartena keeps that promise until right before his death in 1989. (Warren P. Aston, "The Udo Wartena Encounter, *UFO Magazine*, March/April 1998; "The Udo Wartena Encounter," Phantoms and Monsters, January 2, 2013)

1940, Mid-May — 9:00 a.m. Lavern P. Zewiske and his father Paul are checking some recently planted corn on their farm near Fairbank, Iowa. A gray object with multiple hooked "hairs or tentacles" moving around on the bottom passes overhead at 500–1,000 feet. ("Out of the Past," *CUFOS Associate Newsletter* 5, no. 5 (Oct./Nov. 1984): 6)

1940, May 21— President Franklin D. Roosevelt authorizes the FBI to conduct electronic surveillance and wiretapping on US spies, saboteurs, or suspicious individuals. ("Warrantless FBI Electronic Surveillance," US Senate, Select Committee to Study Governmental Operations with Respect to Intelligence Activities, Final Report, April 23, 1976, pp. 271–351)

1940, Summer (or summer 1941) — Near St. Clair, Pennsylvania, as he is walking along a country road, young Frank Sever hears a loud noise in the nearby woods. He sees something like an "aluminum building" partly concealed in the trees. A short distance from it he sees "six small men milling about or looking for something on the ground." Thinking they are ghosts, he runs. Later he comes back and confirms there is no building on the spot. (Clark III 265; Clark IV 305)

1940, June — Afternoon. An anti-aircraft unit on the Isle of Hoy, Orkney Islands, Scotland, receives an alert that proves to be a false alarm. The witness, using a height-and-range finder, focuses on an unusual object in the sky. For 10 seconds he tracks an oblate spheroid moving rapidly in a horizontal path, its height recorded at 38,000 feet. (Jenny Randles and Peter Warrington, *Science and the UFOs*, Basil Blackwell, 1985, p. 9)

1940, August 11 — The RAF Bomber Command issues a report on "Phenomena Connected with Enemy Night Tactics" concerning unidentifiable aircraft observed by bombing crews over the coast of Holland and the Ruhr Valley of Germany. The report suggests the sightings are either due to observer strain or German "experimental apparatus." (*Strange Company* 16–17)

1940, September 19 — English inventor Henry Tizard leads a secret delegation to Washington, D.C., to meet with Vannevar Bush and Alfred Lee Loomis of the US National Defense Research Committee to disclose the technical details of the UK's Chain Home early warning radar stations, which have been locating incoming Luftwaffe bombers. The US shares its Navy's longwave CXAM radar system but admit that it does not have enough transmitter power. At a subsequent meeting on October 6, Edward George Bowen and John Cockcroft reveal the cavity magnetron, a direction-finding device with an amazing power output of about 10 kilowatts at 10 centimeters. The exchange opens up channels of communication for jet engine and atomic bomb development and catalyzes Allied technological cooperation during World War II. (Wikipedia, "Tizard Mission"; Robert Buderi, *The Invention That Changed the World*, Simon & Schuster, 1996)

1940, November —The Radiation Laboratory at the Massachusetts Institute of Technology officially opens, its primary mission to develop a working radar system for fighter planes. (Wikipedia, "MIT Radiation Laboratory" "; Robert Buderi, *The Invention That Changed the World*, Simon & Schuster, 1996)

1941

1941 — A physicist and his wife are traveling north on US Highway 99 north of Bakersfield, California, and pull off to the side to watch a long, slender object of a blazing red, green, and yellow color moving about 8 miles east of them. It is traveling at about 50 mph at an altitude of 200–300 feet and is clearly outlined against the foothills. It seems to be several times longer than a bomber. ("Recent Sightings," *APRO Bulletin*, January 1957, p. 5)

1941, Early spring — 9:00–9:30 p.m. Rev. William Guy Huffman of the Red Star Baptist Church in Cape Girardeau, Missouri, is summoned to an apparent airplane crash one Saturday. When he arrives at the scene, about 15 miles

from town, he finds a weird-looking craft "broken and scattered all around," but smooth and rounded without edges or seams. A cockpit with a chair facing an instrument panel remains intact. Police officers, military men, and plain-clothes individuals are sifting through the wreckage. He also sees three non-human bodies about 4 feet tall with long arms, oversized heads, and large eyes. He says a prayer for them, and afterward sees someone take a photo of an alien propped up by the arms between two plainclothesmen. The following evening, he is given a copy of the photo by a member of his congregation (thought to be Garland D. Fronabarger), but he loans it later to someone who never returns it. Huffman's wife Floy reveals the story to her granddaughter, Charlette Mann, on her deathbed in 1984, who relates the story to ufologist Leonard Stringfield. (Paul Blake Smith, *MO41: The Bombshell before Roswell*, W&B Publishers, 2015; Clark III 343–344; Billy Booth, "1941 Cape Girardeau, Missouri Crash," liveabout.com, February 5, 2019; Kevin Randle, "Cape Girardeau UFO Crash, 1941," A Different Perspective, December 5, 2019; Clark IV 379–380)

1941, March — The Chain Home radars placed around the English coastline detect a formation of blips moving across the English Channel. RAF fighters are sent to intercept, but their crews see nothing and the blips fade. The radar returns are characterized as radar "angels," invisible targets in the clear atmosphere. (David Clarke, "The Radar Angels," *Fortean Times* 195 (May 2005): 36–37)

1941, March 17 — The Western Defense Command is established as the command formation of the US Army responsible for coordinating the defense of the Pacific Coast and training soldiers prior to their deployment overseas. (Wikipedia, "Western Defense Command")

1941, May — With the help of the American Legion, volunteers are recruited into the Aircraft Warning Service, the civilian arm of the Army's Ground Observer Corps. On the east coast, the AWS is under the auspices of the Army Air Force's 1st Interceptor Command based at Mitchel Field near Uniondale, New York. On the west coast, the AWS is under the auspices of the 4th Interceptor Command based in Riverside, California. On both coasts, observation posts, information centers, and filter centers are established. (Wikipedia, "Aircraft Warning Service"; Project 1947, "Aircraft Warning Service (AWS): Freeman Observation Post #52")

1941, June 20 — The Army Air Corps becomes the US Army Air Forces to provide the air arm greater autonomy. (Wikipedia, "United States Army Air Forces")

1941, June 26 — The first draft of the final report of the MAUD Committee is written by George Paget Thomson and circulates among committee members. It concludes that an atomic bomb is feasible. Vannevar Bush receives a copy. Without the help of the MAUD Committee the Manhattan Project would have started months behind. Instead, they are able to begin thinking about how to create a bomb, not whether it is possible. (Wikipedia, "MAUD Committee")

1941, June 28 — Roosevelt establishes the Office of Scientific Research and Development; Vannevar Bush is appointed director. It subsumes the National Defense Research Committee, whose Uranium Committee becomes the Uranium Section of the OSRD, soon renamed the S-1 for security reasons. To the S-1 Section, Vannevar Bush adds American physicist Samuel King Allison, Russian-American physicist Gregory Breit, American physicist Edward Condon, physicist Lloyd P. Smith, and Henry DeWolf Smyth. American physicist Ross Gunn is dropped in line with an NDRC policy not to have Army or Navy personnel in the sections. Lyman James Briggs remains the chairman, with American physicist George B. Pegram as the vice chairman. (Wikipedia, "Office of Scientific Research and Development")

1941, Late June — About 5:30 p.m. Helen Michailoff and her mother are in Odessa, Ukraine, when they see a raspberry-red object slowly moving east and emitting smoke. Thinking it is a bomb, they rush to the basement, but there is no explosion. ("Out of the Past," *CUFOS Associate Newsletter* 4, no. 5 (Oct./Nov. 1983): 4)

1941, July 3 — The Northrop N-1M, an experimental "flying wing" aircraft with a 38-foot wingspan, is first flown at Baker Dry Lake in the Mojave Desert, California, by test pilot Vance Breese for several hundred yards. He reports that the aircraft can fly no higher than 5 feet. After this is corrected, the N-1M takes another 28 flights through November. (Wikipedia, "Northrop N-1M")

1941, July 11 — Roosevelt establishes the Office of the Coordinator of Information, a forerunner of the Office for Strategic Services, headed by lawyer William J. Donovan. It is tasked with collecting and analyzing national security information. (Wikipedia, "Office of the Coordinator of Information")

1941, September — Night. Seaman Mar Doroba, Anthony Kornilak, and others on the British troopship *SS Pulaski* in the Mozambique Channel see a "strange globe glowing with greenish light, about half the size of the full moon."

They watch it for more than an hour before it disappears. (*Strange Company* 17; Lore and Deneault, pp. 130–131; Clark III 501; Clark IV 551)

1941, October 2 — German test pilot Heini Dittmar attains an unofficial airspeed record of 623 mph in a rocket-powered Messerschmidt Me 163A at Peenemünde, Germany. (Wikipedia, "Heini Dittmar")

1941, Early October — A possible UFO crash/retrieval takes place during preparations for the US Army's Carolina maneuvers in south central North Carolina (possibly in or around the Uwharrie National Forest). The sketchy story is based on the participation of Pvt. Guy B. Simeone, who relates a few details about a crash and dead "little people" to his family in a letter and phone call. Walter N. Webb reports on his investigation of the incident in 1996. (Walter N. Webb, "An Anecdotal Report of a UFO Crash/Retrieval in 1941: Part 1," *IUR* 21, no. 4 (Winter 1996): 20–28; Walter N. Webb, "An Anecdotal Report of a UFO Crash/Retrieval in 1941: Part 2," *IUR* 22, no. 1 (Spring 1997): 28–32)

1941, October 9 — Roosevelt approves an atomic weapons program after meeting with Office of Scientific Research and Development Director Vannevar Bush and Vice President Henry A. Wallace. On Bush's advice, Roosevelt chooses the US Army to run the project rather than the Navy, although the Navy has shown far more interest in the field, and is already conducting research into atomic energy for powering ships. Bush's negative experiences with the Navy has convinced him that it would not listen to his advice and cannot handle large-scale construction projects. (Cameron Reed, "Manhattan Project Mystery," Forum on the History of Physics, Spring 2012)

1941, Early December — Army Lt. Walter Hanson and his wife are stranded in the Georgia countryside when they run out of gas. They see a star-like object that swiftly moves in circles counterclockwise. Suddenly it stops and takes off obliquely. (*Strange Company* 17–18; Lore and Deneault, p. 140)

1941, December 8 — Around noon. Red Cross volunteer Yoshio Taketa is resting on the lawn of the Kuhio School in Honolulu, Hawaii, with 9 others. The smoke is still rising from the Pearl Harbor attack to the west. One of them notices a round white object at about 20,000 feet overhead. It floats away slowly. (Clark III 501; Clark IV 550)

1941, December 18 — With the US at war, funding for an atomic bomb is now available in amounts undreamed of the year before. At the S-1 Section meeting, American physicist Ernest Lawrence asks for $400,000 for electromagnetic separation, and the section immediately recommends granting it. MIT physicist Karl Taylor Compton is allocated $340,000 for nuclear reactor research at Columbia and Princeton, and $278,000 at the University of Chicago. Another $500,000 is earmarked for raw materials. His proposed schedule is no less breathtaking: to produce a nuclear chain reaction by July 1942, and an atomic bomb by January 1945. In January 1942, he creates the Metallurgical Laboratory, centralizing the work at the University of Chicago. (Wikipedia, "S-1 Executive Committee")

1941, December 22 —Electrical engineer George Bogner stops his car at the corner of St. Agnes Avenue and Pleasant Street in Utica, New York, to watch a round, metallic object speed silently across the sky. He estimates it at 100 feet in diameter and moving at 300 mph. (*Strange Company* 18; Lore and Deneault, pp. 140–141)

1942

1942 — Naval Intelligence Officer Bernard M. Baruch Jr. develops a submarine reporting network, Communication Instruction for Reporting Enemy Sightings on which CIRVIS is modeled in 1948. (US Naval War College, Master Script for "Communication Instruction for Reporting Enemy Sightings," undated; NICAP, "Capt. Bernard Baruch Jr.")

1942 — Night. Sgt. Dirk Wylie [pen name of writer Joseph "Harry" Dockweiler] is serving in a military police company on an "island outpost" off the southern coast of the US. While on duty, he sees a glowing object like a flare traveling horizontally over the sea. After 30–60 seconds, it descends into the water and disappears. About 2 minutes later it reappears, rising vertically until it climbs out of sight. (Dirk Wylie, "Space Ships?" *Amazing Stories* 20, no. 2 (May 1946): 151; Dolan, USO1, 112–113)

1942 — 1:00 a.m. A woman returning home in Prouvy, Nord, France, finds herself face-to-face with three small entities with large round heads and short beards. They have large, luminous yellow eyes and wear tight, one-piece suits with a metallic sheen that leave only their faces exposed. The beings stare at her without moving, so she goes inside to get her husband, but by the time they return the entities have gone. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 3; Patrick Gross, URECAT, September 26, 2007; Clark III 265; Clark IV 305)

1942, February 24–25 — The Battle of Los Angeles takes place, a rumored enemy attack and subsequent anti-aircraft barrage over Los Angeles, California. Air raid sirens sound throughout Los Angeles County on the night of February 24. A total blackout is ordered, and thousands of air raid wardens are summoned to their positions. At 3:16 a.m., the 37th Coast Artillery Brigade begins firing .50 caliber machine guns and 12.8-pound anti-aircraft shells into the air at reported aircraft; more than 1,400 shells are eventually fired. Pilots of the 4th Interceptor Command are alerted, but their aircraft remain grounded. The artillery fire continues sporadically until 4:14 a.m. The "all clear" is sounded and the blackout order lifted at 7:21 a.m. Several buildings and vehicles are damaged by shell fragments, and five civilians die as an indirect result of the anti-aircraft fire. Three are killed in car accidents in the ensuing chaos and two die of heart attacks attributed to the stress of the hour-long action. The incident is front-page news along the Pacific coast and earns some mass media coverage. Within hours of the end of the air raid, Secretary of the Navy Frank Knox holds a press conference, saying the entire incident was a false alarm due to anxiety and "war nerves." Knox's comments are followed by statements from the Army on February 26 that reflect General George C. Marshall's belief that the incident was caused by commercial airplanes used as a psychological warfare campaign to generate panic. Some contemporary press outlets suspect a cover-up. Rep. Leland M. Ford (R-Calif.) calls for a congressional investigation, saying, "none of the explanations so far offered removed the episode from the category of 'complete mystification' ... this was either a practice raid, or a raid to throw a scare into 2,000,000 people, or a mistaken identity raid, or a raid to lay a political foundation to take away Southern California's war industries." The Japanese government, after the war ended, declares that they had flown no airplanes over Los Angeles during the war. In 1983, the US Office of Air Force History attributes the event to a case of "war nerves" triggered by a lost weather balloon and exacerbated by stray flares and shell bursts from adjoining batteries. A number of fake documents about this incident have been circulated by Timothy S. Cooper. (Wikipedia, "Battle of Los Angeles"; NICAP, "Battle of Los Angeles"; "No Bombs Dropped, No Planes Shot Down," *Los Angeles Herald Express*, February 25, 1942, p. 1; "Army Says Alarm Real," *Los Angeles Times*, February 26, 1942, pp. 1, A; "Stimson Says 15 Planes over City," *Los Angeles Times*, February 27, 1942, pp. 1, 5; "Japanese Carry War to California Coast," *Life*, March 9, 1942, pp. 19–23; US Office of the Chief of Military History, "History of the Western Defense Command, 17 March 1941–30 September 1945," five ms. vols., Appendix no. 5, "Chronology of Enemy Operations on Pacific Coast of Continental United States," pp. 25–27; *History, Fourth Anti-Aircraft Command, January 9, 1942, to July 1, 1945*, pp. 112–124; Wesley Frank Craven and James Lea Cate, *The Army Air Forces in World War II: Vol. 1, Plans and Early Operations*, Office of Air Force History, 1948, pp. 283–286; Lore and Deneault, pp. 74–87; Patrick Gross, "Los Angeles, February 25, 1942"; Good Above, pp. 15–17; Good Need, pp. 17, 31; *Strange Company* 19–22; Robert Wood, "'Leaked' Documents Shed New Light on Outcome of 'Battle of Los Angeles,'" *MUFON UFO Journal*, no. 506 (June 2010): 3–7, 18–19; Brett Holman, "New Light on the Battle of Los Angeles," Airminded, April 20, 2011; "Battle of Los Angeles on 2-23-1942 – Ray Angler, Air Raid Warden," in Ufology: A Primer in Audio, 1938–1959, November 21, 2013; Lorraine Boissoneault, "The Great Los Angeles Air Raid Terrified Citizens—Even Though No Bombs Were Dropped," *Smithsonian* magazine, January 19, 2018; Clark III 1176–1177; David Marler, "The Battle of LA UFO Incident," OpenMindsTV YouTube channel, October 9, 2018; William Mills Tompkins, *Selected by Extraterrestrials, Volume 2*, CreateSpace, 2020, pp. 19–24; "David Marler Talks about the Battle of LA, a UFO Story," KRQE YouTube channel, November 30, 2023; Clark IV 1350–1351)

1942, February 26 — Army Chief of Staff George C. Marshall writes Roosevelt that as many as 15 unknown commercial aircraft, flying at various speeds up to 200 mph and at elevations from 9,000 to 18,000 feet, were responsible for the Battle of Los Angeles. (presidentialufo.com, "General George Marshall Secret Memo to President Roosevelt about the Unidentified Objects over Los Angeles on February 25, 1942"; Good Above, pp. 17, 446)

1942, February 26 — Royal Netherlands Navy cruiser *HNLMS Tromp*, returning to Australia after the Battle of Badung Strait (off Bali in Indonesia), reports a large, illuminated disc speeding above it in the Timor Sea and maneuvering for nearly 4 hours. It departs at an estimated 3,500 mph. ("Australasia," *Flying Saucer Review* 3, no. 6 (Nov./Dec. 1957): 6; Clark III 501; Clark IV 550)

1942, March 5 — Benjamin Smith, formerly of the Army Air Corps, sees several blinking lights moving slowly over the Middle River adjacent to Essex, Maryland. They circle the river two or three times then disappear. Smith reports the incident to local police, who then inform Naval Intelligence. (*Towson (Md.) Union News*, March 6, 1942; Jan Aldrich)

1942, March 9 — The Air Service Command becomes a major Army Air Forces unit to support logistical functions. (Wikipedia, "Air Materiel Command")

1942, March 25 [possibly early June] — Midnight. Flight Lt. Roman Sobiński of the No. 301 Polish Bomber Squadron is flying an RAF Vickers Wellington bomber over the Zuiderzee in the Netherlands after returning from a bombing

mission on the Ruhr Valley, Germany. He hears from his rear gunner, Sgt. Stanislaw Sep-Szarzynski, that an aircraft is approaching the rear of heir aircraft. Sobiński sees a bright light that he thinks might be a searchlight on a German fighter. As it draws closer, he sees it has a coppery color. When it reaches to 600 feet away, the rear gunner fires on it. Sobiński notices that the tracer rounds are hitting the object but have no effect, merely disappearing on impact. After 2 minutes, the object moves to the port side at terrific speed and stays 600 feet off the left wing. Both the rear and front gunner, Sgt. Krzysztof Grabowski, fire rounds at it to no effect. Sobiński takes evasive actions, but the object maintains the same relative position, despite constant fire. A moment later, the object moves to the front of the aircraft, stays for a short period, then takes off at a 45° angle and disappears. Sobińksi later discovers that another Wellington bomber crew to their rear has also encountered the same phenomenon. (Gordon W. Creighton, "Foo Fighters," *Flying Saucer Review* 8, no. 2 (March/April 1962): 15; *Strange Company* 23–25; "6. 1942 Foo Fighter Encounter – Maj. Ray Sabinski," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; Clark III 501; Graeme Rendall, "80 Years Ago, the Royal Air Force Saw Flying Objects They Could Not Explain," The Debrief, December 2, 2022; Patrick Gross, "ACUFO," September 26, 2023; Clark IV 550)

1942, Spring — Rev. Robert H. Moore and six other persons attending the Seabury-Western Theological Seminary in Evanston, Illinois, watch a small, light-gray, rectangular object over the northern part of town for 10 minutes. (Lore and Deneault, p. 142)

1942, April 1 — The Materiel Division of the Air Service Command assumes responsibility for R&D and procurement and is redesignated as the Air Corps Materiel Command. (Wikipedia, "Air Materiel Command")

1942, May — 3:00 p.m. Abdon Gonzales Tello, 13, and other boys see a silvery, cigar-shaped object in the sky to the west of Miraflores, Peru. Its ends are cut off at sharp angles, and it takes 20 seconds to proceed to the south and out of sight. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 22)

1942, June — Col. James C. Marshall is selected to head the Manhattan Project. (Wikipedia, "Manhattan Project")

1942, June 13 — Roosevelt establishes the Office of Strategic Services, a wartime intelligence agency, with Gen. William J. Donovan at its head. (Wikipedia, "Office of Strategic Services")

1942, June 19 — Roosevelt abolishes the S-1 Section and replaces it with the S-1 Executive Committee, tasked with the technical and contractual aspects of producing an atomic bomb, while the Army handles engineering, construction, and site selection. American chemist James B. Conant is appointed as its chairman, and Lyman James Briggs, Karl Taylor Compton, Ernest Lawrence, and American chemists Eger V. Murphree and Harold C. Urey as its other members. Roosevelt approves the committee's recommendation to move to the pilot plant stage and build piles to produce plutonium and electromagnetic, centrifuge, and gaseous diffusion plants to produce uranium-235. (Wikipedia, "S-1 Executive Committee")

1942, Late June — 4:00 p.m. Mr. and Mrs. Bonardi and several farmers watch a blue, oval-shaped object with a silver-gray dome in the woods near Cussey-sur-l'Ognon, Doubs, France. It has portholes and a tripod landing gear that is visible as it hovers low above the ground and emits a mechanical noise. Light comes from the portholes. The witnesses approach to within 66 feet, but the object takes off vertically and disappears after 6–10 minutes. A 5-foot-diameter circle is found in the grass. (Michel Bougard, *La Chronique des O.V.N.I*, Jean-Pierre Delarge, 1977, p. 261)

Late 1942? — According to records released in August 2010, Prime Minister Winston Churchill supposedly classifies for 50 years an alleged UFO incident because of fears it could create mass panic. The incident allegedly involves an RAF reconnaissance plane returning from a mission in Europe. The aircraft is over or near the English coastline when it is allegedly intercepted by a strange metallic object that matches the aircraft's course and speed for a time before shooting away. The plane's crew photograph the object, which "hovered noiselessly" near the aircraft before moving off. According to the documents, details of the cover-up emerge when a man writes to the government in 1999 seeking to find out more about the incident. He describes how his grandfather, who served with the RAF, was present when Churchill and Gen. Dwight Eisenhower discussed how to deal with the encounter. However, the evidence is hearsay and somewhat questionable. (UFOFiles2, pp. 20–21)

1942, Summer — 5:50 p.m. An RAAF pilot is on flying patrol off the Tasman Peninsula, Tasmania, following reports by fishermen of strange lights on the waters of Bass Strait. A "singular airfoil of glistening bronze color" appears out of a cloudbank. It's about 150 feet long, 50 feet in diameter, and has a dome on top. It accompanies his plane for a few minutes before departing at "a hell of a pace." It turns again and dives into the ocean, throwing up a

"whirlpool of waves." (Bill Chalker, "Australian A.F. UFO Report Files," *APRO Bulletin* 30, no. 10 (October 1982): 6–7)

1942, Late summer — Pvt. Albert Lancashire, 27, is standing guard at Cresswell radar station near Newbiggin-by-the-Sea, Northumberland, England, when he sees a cloud-enshrouded light approaching from the North Sea. As it descends, he is drawn up into it by a beam. Small men grab him and carry him into the craft, where he sees other human figures of normal height, including an apparent captain with dark hair and goggles. He is made to lie down on a couch or table. He has only vague memories of what happens next, but he thinks a medical exam is performed. He wakes up back at his sentry post. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 4; "New Time Lapse Case from England Uncovered," *MUFON UFO Journal*, no. 107 (October 1976): 17–18; Clark III 265; Jenny Randles, "The First Gentleman of BUFORA," *Fortean Times* 420 (July 2022): 31; Clark IV 305)

1942, August — Evelyn M. Howell and two other adults see a huge cigar-shaped object hovering near them between Lafayette Township and Newton, New Jersey. It has "two rows of windows" that give off blue, green, white, and red fluorescent lights. They watch it for 10 minutes, after which it silently and slowly takes off. Howell and her husband see a similar object on the drive home to Ogdensburg, New Jersey. (Clark III 1178; Clark IV 1352)

1942, August 5 — Early morning. The Navy destroyer *USS Helm* is on its way to the Solomon Islands in preparation for the Guadalcanal landings. A radio blackout is in effect. An aircraft approaches, a full alert is sounded, and three cruisers (*Vincennes*, *Quincy*, *Astoria*) and seven other ships open fire on it. The object is not hit and proceeds to circle around the fleet. An anonymous sailor on security detail on the *Helm* watches it through binoculars and sees it as 90 feet in diameter, oval, with a round dome on top. The ships continue to fire on the UFO, which attains extremely high speeds. Commanding Officer Chester Edward Carroll later hears that the aircraft is neither German nor Japanese. (*Strange Company* 27–28)

1942, August 11 — Night. An RAF bomber squadron on a mission near Aachen, Germany, sees a bright white light rise from the ground to 8,000 feet, where it flies approximately level for about 2 minutes. A few crews report that it appears to zig-zag along the ground before taking off in a climbing turn. Brilliant white periodic bursts occur that may cause a change of course. Some crews think that it subdivides when the bursts take place. Burning pieces fall from it like a meteor. The color fades to orange and the object is last seen heading toward the ground after a total of 5 minutes. (Graeme Rendall, "80 Years Ago, the Royal Air Force Saw Flying Objects They Could Not Explain," The Debrief, December 2, 2022)

1942, August 12 — Day. Sgt. Stephen J. Brickner of the 1st Marine Division on Tulagi in the Solomon Islands is cleaning his rifle when an air-raid warning is sounded. He dives into his foxhole looking to the sky. He hears a roaring sound unlike that of an aircraft. Soon he sees a formation of more than 150 silvery objects, in straight lines of 10 or 12. The objects seem to wobble slightly. They are flying faster than Japanese planes and are soon out of sight. (Good Above, p. 18; *Strange Company* 28–29; Clark III 501–502; Clark IV 550)

1942, August 13 — The Manhattan Engineering District, with Brig. Gen. James C. Marshall as district engineer, is established by Chief of the US Army Corps of Engineers Maj. Gen. Eugene Reybold. (Wikipedia, "Manhattan Project")

1942, August 29 — 7:00 p.m. Army Air Corps control tower operator Pvt. Michael Solomon sees two small reddish objects descend near the AAC Advanced Flying School at Columbus, Mississippi, then speed away. He later contacts government officials and officers from the school in an attempt to confirm his sighting. (UFOEv, p. 19; Clark III 1177; Clark IV 1351–1352)

1942, September 23 — Col. Leslie Groves is promoted to brigadier general and becomes director of the Manhattan Project. The Military Policy Committee, consisting of Vannevar Bush (with James B. Conant as his alternative), Maj. Gen. Wilhelm D. Styer, and Rear Adm. William R. Purnell, is created to oversee the project. (Wikipedia, "Manhattan Project")

1942, September 25 — RAF Bomber Command's Operational Research Section releases a report titled "A Note on Pyrotechnic Activity over Germany." An unnamed Flak Liaison Officer has coordinated the reports from No. 3 and No. 5 Groups and determines there are two types of phenomena: a ball of fire that is shot from the ground and drips multicolored fragments, and multi-part flares. Another type involves "small coloured balls" that climb to 7,000 feet. (*Strange Company* 32)

1942, September 29 — US Under Secretary of War Robert P. Patterson authorizes the Corps of Engineers to acquire 56,000 acres in Tennessee for Site X, which will become the Oak Ridge, Tennessee, laboratory and production site. (Wikipedia, "Oak Ridge, Tennessee")

1942, Fall — 9:00 p.m. Research engineer Nathan Carver sees a dark, elliptical object in Long Branch, New Jersey, sharply outlined against the stars of the Milky Way. It is flickering yellow-orange flames from its back. The

object silently speeds from horizon to horizon in 10–15 seconds in a gradually descending path. (Richard H. Hall, *From Airships to Arnold,* UFO Research Coalition, 2000, p., 20)

1942, October — 8:50 p.m. James L. Toft and another witness see an elongated object with a dome and lights at either end descending to the ground at Radway Green in Cheshire, England. At the landing site they find a circular burned area and several footprint-like indentations. (Michel Bougard, *La Chronique des O.V.N.I.,* Jean-Pierre Delarge, 1977, p. 263)

1942, October 7 — Land at Oak Ridge, Tennessee, is acquired by eminent domain for Clinton Engineer Works. (Wikipedia, "Clinton Engineer Works")

1942, October 9 or 10 — 10:00 a.m. A sailor on watch duty on the USS *Helm*, a naval destroyer escorting transports and patrolling in the area of Guadalcanal island, sees an object approaching the fleet on the wrong radio beam, shortly after an unidentified radar target is picked up by one of the fleet's cruisers. All ships go to battle stations. The watch sailor views it through binoculars, and it appears to be a silvery disc with a dome on top. Its altitude remains between 3,000 and 4,000 feet. When the object approaches to within 9,000 feet, the crews open fire on it, although it is moving too fast for them to aim properly. It makes a sharp right turn and heads south, increasing its speed and circling the entire fleet twice for 5 minutes before moving away to the south. Afterward, the gun control director estimates the object is traveling up to 10,000 mph. (Paul C. Cerny and Robert Neville, "U.S. Navy 1942 Sighting," *MUFON UFO Journal*, no. 185 (July 1983): 14–15)

1942, October 19 — Leslie Groves approves J. Robert Oppenheimer to coordinate the scientific research of the Manhattan Project at the Site Y laboratory in Los Alamos, New Mexico. (Wikipedia, "Manhattan Project")

1942, November — The crews of an anti-submarine squadron patrolling in the Bay of Biscay, France, spot a large wingless aircraft behind them. One of the men takes several photos of it with a Fairchild K-20 camera. The object soon gains altitude and after 15 minutes it executes a 180° turn and disappears. Only one of the photos, with a filter applied, shows any details and it is passed on to US and RAF intelligence. ("The Case for the 'Sea-Saucer,'" *CRIFO* Newsletter 1, no. 10 (January 7, 1955): 5)

1942, November 15 — Teams under physicists Herbert L. Anderson and Walter Zinn have constructed 16 experimental nuclear reactors under the Stagg Field stands at the University of Chicago. (Wikipedia, "Metallurgical Laboratory")

1942, November 25 — The Los Alamos site in New Mexico is acquired for Project Y. (Wikipedia, "Project Y")

1942, November 28 — 10:40–10:45 p.m. Capt. Lever and the No. 61 Squadron crew of an RAF Lancaster are returning from a bombing raid on Turin, Italy, when about 10–15 miles southwest of the city they see an object 200–300 feet long traveling southeast at a speed of 500 mph. It has four pairs of red lights spaced along its body and is flying on a level course. Five minutes later, as the Lancaster approaches the Alps at 14,000 feet, the crew sees the object again traveling southwest up a valley. It disappears when the red lights go out. (Good Need, pp. 18–19, 32; *Strange Company* 34–35; UFOFiles2, pp. 25–26)

1942, December — A Technical Data Laboratory is established at Wright Field near Dayton, Ohio, as part of the Army Materiel Command. Its operations include the evaluation of foreign aircraft and related equipment. (US Air Force, "National Air and Space Intelligence Center Heritage," July 31, 2015)

1942, December — 8:00 p.m. RAAF Lt. Bruce Clyde Lumsden is flying a Hawker Hurricane heading for the French coast. About 7,000 feet over the mouth of the River Somme, France, he observes two orange lights climbing, one slightly above the other. He completes a full turn, putting the lights behind him on the port side. They now appear brighter and larger. When they reach his altitude, they stop climbing and stay at his altitude. He makes another full turn, but the objects stay with him. Lumsden dives to 4,000 feet, but the lights match his maneuvers. He increases his speed to 260 mph and gradually leaves them behind. His squadron mates do not believe him, but the next night another squadron member has a similar encounter with a green light. (*Strange Company* 36; Clark III 502; Clark IV 550–551)

1942, December 2 — Chicago Pile-1, the first nuclear reactor, goes critical at the University of Chicago under the leadership and design of Enrico Fermi, achieving a self-sustaining reaction just one month after construction was started. (Wikipedia, "Chicago Pile-1")

1942, December 27 — The Northrop N-9M, a prototype flying wing bomber with a wingspan of 60 feet, makes its first test flight at Jack Northrop Field [now Hawthorne (Calif.) Municipal Airport] with pilot John Wescott Myers. Through May, 44 more flights are made, nearly all terminated by mechanical failures. (Wikipedia, "Northrop N-9M")

1943

1943 — The National Bureau of Standards allegedly conducts an investigation into unexplained aerial phenomena under Hugh Latimer Dryden in conjunction with intelligence about German research into jet aircraft. The bureau has some concern that the phenomena could interfere with internal combustion engines. (Jacques Vallée, *Forbidden Science,* North Atlantic, 1992, p. 309)

1943 — While on a ship off the Russell Islands in the Solomons, US Navy shipfitter Lloyd Kenyon and several other sailors see several disks traveling at a huge speed. ("Objects Seen Several Times," Portland *Oregon Daily Journal*, June 27, 1947, p. 8; Clark III 502; Clark IV 551)

1943 — Seaman Matthew Mengle is on a ship in the Persian Gulf when he sees a huge disc below the surface of the water. The object is glowing with a soft greenish light and paces the ship before moving out of sight. ("'Hidden' UFO Reports Given NICAP," *UFO Investigator* 1, no. 10 (July/Aug. 1960): 6, 7; Dolan, USO1, 113)

1943 — Night. While stationed at RAF Compton Bassett [now Lower Compton], Wiltshire, England, Barbara Whiteley sees a cigar-shaped object with 5–6 lights pointing downward pass overhead at a low altitude. (Clark III 502; Clark IV 551)

1943, January 15 — During a US bombing raid over Cherbourg, Manche, France, several crews see "large numbers of projectiles resembling 'schools of flying fish,' about a foot long and similar to incendiary bombs, coming up from a direction of the town." (*Strange Company* 38; Patrick Gross, ACUFO, October 2, 2023)

1943, January 16 — Leslie Groves approves development of the Hanford site in Washington State for plutonium production. (Wikipedia, "Hanford Site")

1943, February 9 — Land for a plutonium production complex is acquired at Hanford, Washington. (Wikipedia, "Hanford Site")

1943, February 18 — Construction begins for Y-12, a massive electromagnetic separation plant for enriching uranium at Oak Ridge, Tennessee. (Wikipedia, "Y-12 National Security Complex")

1943, April 1 — Los Alamos Laboratory is established in New Mexico and begins operations. (Wikipedia, "Project Y")

1943, April 5 — 9:50 a.m. Flight instructor Gerry A. Casey and a student pilot in a Vultee BT-13A Valiant watch a radiant-orange, elliptical disc dive at their aircraft near Long Beach, California. There is no propellor and it has a rounded hump above and below. It hovers alongside with a slight wobble, then accelerates, turns from orange to white, and climbs out of sight in 2 seconds. (Project 1947, "UFO Reports, 1943"; Gerry A. Casey, "UFO: The Time for the Telling Has Come," Tacoma (Wash.) *Western Flyer*, July 7, 1989, via *UFO Newsclipping Service* 241 (August 1989), p. 3; "Unusual U.S. Coastal Aerial Observations during World War 2," *UFO Historical Revue*, no. 1 (June 1998): 4–5; Patrick Gross, "Observation at Long Beach, 1943")

1943, April 9 — 5:00 p.m. Kazimierz Bzowski and other resistance fighters are monitoring a fire in the Warsaw Ghetto in Poland. They notice a flying object approaching them at about 60 mph. Through binoculars it appears to be a sphere colored with tangled strips of both raspberry and blue-green colors. Bzowski estimates it is at an elevation of 200 feet and is about 25 feet in diameter. They observe German and Lithuanian snipers on Bonifraterska street shooting at it, although the bullets seem to pass through it. The object alters course and heads toward Old Town, then stops dead and shoots away at great speed. (Poland 13)

1943, Spring — A New Zealand fighter pilot flying a Hawker Hurricane over North Africa is followed by an orange-red glow that then positions itself off his wingtip, matching the pilot's evasive maneuvers. He manages to fire at it several times, to no effect. It vanishes when he returns to base. (Graeme Rendall, "The Foo Fighters: Today's Pilots Encounters with UAP Are Nothing New," The Debrief, April 15, 2021)

1943, May — Capt. Gordon W. Cammell is flying an RAF Lancaster bomber back over the English Channel when he and his entire crew see a "huge orange ball on or near the sea" 7,000–8,000 feet below them. Over the next 10 minutes, they watch it project a bright and constant light. (*Strange Company* 41; Dolan, USO1, 113–114)

1943, May — Late night. John Walker is serving as an RAF armaments officer at a small airfield near Ludham, Norfolk, England. Walking home from a village dance, he notices a green glow in the road ahead. Getting closer, he sees that it is coming from a man standing by the side of the road. He is wearing a diving helmet on his head and an oblong object on his chest. The green glow is coming from his chest and fanning upward over his face, which has a "sickly grin." He does not react to Walker's presence in any way. In an adjacent field, Walker can see a large domed object like a "bell tent." Standing next to it are two more figures, both wearing a grayish garment. Walker

moves quickly past and returns to his airfield. (Philip Mantle, "Pre-1947 Entity and UFO in Norfolk? An I.U.N. Archive Case," *UFO Brigantia*, no. 28 (Nov./Dec. 1987): 9–11)

1943, May 19 — The Northrop N-9M flying wing bomber prototype crashes 12 miles west of Muroc Army Air Base [now Edwards AFB], California, killing its pilot Max Constant. (Wikipedia, "Northrop N-9M")

1943, May 26 — Late night. Capt. Ray Smith and copilot Sgt. Gordon N. Cockcroft are flying at 18,000 feet in a Halifax bomber on a run near Essen, Germany, when they see a silvery-gold cylindrical object, larger than their aircraft, on the port side. It has several evenly spaced portholes. It is hovering at a 45° angle. After 20–30 seconds it climbs away at high speed. (Norman Oliver, "Report—Extra!" *BUFORA Journal* 6, no. 3 (Sept./Oct 1977): cover, 8–9; "Correspondence," *CUFOS Associate Newsletter* 3, no. 5 (Oct./Nov. 1982): 4–6; *Strange Company* 40; Project 1947, "UFO Reports, 1943"; Good Need, pp. 19–20; John Hanson and Dawn Holloway, *Haunted Skies: The Encyclopaedia of British UFOs: Volume 1, 1940–1959*, Fortean Words, 2010, pp. 33–34)

1943, June — The Army Air Force's Air Tactical Service Command meets with Lockheed Aircraft Corporation in Burbank, California, to ask them to develop a jet fighter. (Wikipedia, "Skunk Works")

1943, June 2 — Construction begins on K-25, the gaseous diffusion plant at Oak Ridge, Tennessee. (Wikipedia, "K-25")

1943, July — Lockheed Engineer Kelly Johnson and other associate engineers hand-deliver a proposal for the XP-80 jet fighter to the Air Tactical Service Command. Two days later, the go-ahead is given to Lockheed to start development, and the Skunk Works is born in Burbank, California, with Johnson at the helm. The name supposedly comes from the *L'il Abner* comic strip, which has a place called "Skonk Works" where a strong beverage is brewed from skunks, old shoes, and other ingredients. (Wikipedia, "Skunk Works")

1943, July 18 — A French prisoner in a German labor camp near Gdynia, Poland, is walking to work along the Baltic Sea when he sees a flat, metallic object embedded in the sand. A human figure is standing next to it, apparently trying to dig it up. When he passes by, the figure, apparently an Asian woman with long blonde hair and dressed in a tight-fitting overall, turns in his direction. The witness assumes she is the famous German aviator Hanna Reitsch and helps her dig the experimental aircraft out of the sand. The object is 20 feet in diameter and looks like two metallic saucers put together. The woman touches the witness's chest with her hand and points to the sky. She touches her belt and a door in the object opens. She crawls inside, the door closes, and the object ascends and departs at a tremendous speed. (Jean Sider, *Ultra Top-Secret: Ces OVNIs qui font peur*, Axis Mundi, 1990)

1943, September — Morning. A witness driving a car in Laguna Larga, Córdoba, Argentina, sees a large, saucer-shaped object standing on the ground. It is wider than the road. When he approaches, the object begins to whistle like a motor, climbs to about 1,000 feet, and disappears at terrific speed. On the ground, the witness finds a bright object about 4 inches long. (Richard H. Hall, *From Airships to Arnold*, UFO Research Coalition, 2000, p. 21)

1943, September — During an air battle between the Germans and Russians, a member of the Spanish Blue Division fighting with the Germans near Pushkin outside Leningrad [now Saint Petersburg], Russia, notices a disc-shaped object above the planes. It appears to be observing the battle, then disappears at a fantastic speed. (Antonio Ribera, *Platillos Volantes en Iberoamerica y España*, Santiago Pomaire, 1968, pp. 411–412)

1943, September — Ray Palmer, editor of *Amazing Stories* magazine, receives a letter from a reader named Richard S. Shaver, who claims to have discovered "Mantong," a proto-language that is the source of all earthly languages. In Mantong, each sound has a hidden meaning, and by applying this formula to any word in any language, one can decode the secret meaning. Palmer applies the formula to several words and realizes Shaver might be onto something. (Wikipedia, "Richard Sharpe Shaver"; Walter Kafton-Minkel, *Subterranean Worlds*, Loompanics, 1989, p. 136; Clark III 609; Clark IV 668–669)

1943, September 6 — 9:50 a.m. During an aerial fight over Stuttgart, Germany, the crews of two aircraft of the 384th Bomb Group, commanded by Capt. Raymond P. Ketelson, observe two round objects "resembling silvery discs" floating downward through the aircraft formation. One hits the wing of a B-17 bomber, setting it on fire. The bomber does not return from the mission. (*Strange Company* 43)

1943, Autumn — A Polish bomber unit based in England claims that silver-blue balls of fire appeared near their wing on six missions when they raided the Nazi V-1 weapons plant in Peenemünde, Germany. RAF intelligence officer Michael Bentine debriefs them later and asks, "But what did it do to you?" They reply, "Nothing." Bentine points out, "Well it was not a very effective weapon, was it?" (David Clarke and Andy Roberts, "The Foo Fighters: The RAF Experience," The Real UFO Project, January 2003; UFOFiles2, p. 20)

1943, October — Maj. Robert Visarius, Luftwaffe officer, is operating a ground defense radar during an Allied air offensive in Kassel, Germany. After the raid, he notices a radar target about 24 miles away that at first is

motionless. Then it moves rapidly toward his position and is tracked at a distance of 11 miles away. Through a powerful telescope mounted on the radar, Visarius and his colleagues can see a silvery, light-reflecting object. (Illobrand von Ludiwger, *Ungewöhnliche Eigenschaften Nichtidentifizierbarer Lichterscheinungen*, MUFON-CES, 1978, p. 77)

1943, October — 9:00 p.m. Wilberta Finley, an air spotter for the Civil Air Patrol, notices a "huge dark aerial object approaching" her home in Santa Barbara, California, facing the Goleta Valley. Moving low and soundlessly, it barely skims over a nearby hill. From its front a beam of light shoots down, and at intervals it swings from side to side as if scanning the hills and homes below. (Wilberta M. Finley, "Report from the Readers," *Fate* 11, no. 11 (November 1958): 116–118; Clark III 1178; Clark IV 1352)

1943, October 10 — Construction begins for the first reactor at the Hanford site in Washington. (US Department of Energy, Office of History and Heritage Resources, "Hanford Becomes Operational," August 7, 2013)

1943, October 14 — Night. A group of B-17s from the 384th Bombardment Group are returning from a mission over Germany when they see a cluster of silver-colored discs in the path of their formation and closing with the bombers. The crews talk back and forth, discussing and confirming the sight before them. They describe the objects as "about one inch thick and three inches in diameter…gliding down slowly in a very uniform cluster." One of the bombers goes directly through the cluster "with absolutely no effect on engines or plane surface," even though one is heard to strike the tail assembly. A mass of black debris about 3-4 feet long is also observed. (Martin Caidin, *Black Thursday*, Dell, 1962, pp. 188–190; Frank Edwards, *Flying Saucers—Here and Now!* Lyle Stuart, 1967, pp. 77–78; Clark III 502; Clark IV 551)

1943, October or November — 11:00 p.m. 2Lt Thomas J. Duzynski is stationed at Camp Ibis on the west side of the Dead Mountains Wilderness northwest of Needles, California. Taking a stroll outside his tent, he notices an elliptical-shaped object traveling to the south at high speed parallel to the ground between himself and the mountains. It banks sharply, almost on edge, and gains altitude, disappearing in seconds. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 22–23)

1943, November — Ray Palmer publishes an article, "An Ancient Language?" on the language of Mantong in the January 1944 issue of *Amazing Stories* and enters into correspondence with Richard S. Shaver, who responds with a 10,000-word document titled "A Warning to Future Man." Shaver writes of advanced prehistoric races who built underground cities before abandoning Earth for another planet because of damaging radiation from the Sun. Those ancients also abandoned some of their own offspring here, a minority of whom remained noble and human "Teros," while most degenerate over time into a population of mentally impaired sadists known as "Deros"—short for "detrimental robots." Shaver's robots are not mechanical constructs, but robot-like due to their savage behavior. These Deros still live in the cave cities, according to Shaver, kidnapping surface-dwelling people by the thousands for meat or torture. Deros can be blamed for nearly all misfortunes, from minor "accidental" injuries or illnesses to airplane crashes and catastrophic natural disasters. Though generally confined to their caves, the Deros sometimes travel in spaceships or rockets, and have dealings with equally evil extraterrestrials. Shaver claims to possess first-hand knowledge of the Deros and their caves, insisting he had been their prisoner for several years. The article stirs considerable reader interest, and the pages of *Amazing Stories* are soon filled with stories and articles about the "Shaver mystery." (Wikipedia, "Richard Sharpe Shaver"; [Richard] S. Shaver, [Letter], "An Ancient Language?" *Amazing Stories* 18, no. 1 (January 1944): 206–207; [Ray Palmer,] "Mantong: The Language of Lemuria," *Amazing Stories* 19, no. 1 (March 1945): 71, 206; Walter Kafton-Minkel, *Subterranean Worlds*, Loompanics, 1989, pp. 136–137; Richard Toronto, *War over Lemuria: Richard Shaver, Ray Palmer, and the Strangest Chapter of 1940s Science Fiction*, McFarland, 2013; Clark III 454, 609, 872, 1068; Clark IV 499–500, 668–669, 966, 1183–1184)

1943, November — 10:30 p.m. The Sledge family of Escondido, California, sees a disc with a dome and square windows hovering about 15 feet above the roof of their house and emitting a soft humming sound. In two of the windows, human-like silhouettes are visible. When Mrs. Sledge shines a flashlight on the ground, it blinks out and disappears. ("Unusual U.S. Coastal Aerial Observations during World War 2," *UFO Historical Revue*, no. 1 (June 1998): 2, 5)

1943, November 4 — The X-10 Graphite Reactor at Oak Ridge, Tennessee, goes critical. The Y-12 plant is separating uranium-235 from natural uranium, which is 99.3% uranium-238, by using calutrons to perform electromagnetic isotope separation. (Wikipedia, "X-10 Graphite Reactor")

1943, December? — Matt P. Dillingham is on evening duty adjacent to Mullinix Field [now Bonriki International Airport] on Tarawa Atoll in the Pacific Ocean. He begins receiving radar plots showing a north-south track to the west moving at 750 mph. It disappears, but two other targets on the same trajectory appear, moving at the same speed.

The same targets are repeated for several nights following. ("Out of the Past," *CUFOS Associate Newsletter* 4, no. 6 (Dec. 1983/Jan. 1984): 6)

1943, December — 10:30 p.m. Four young women are having supper opposite the wharf in Oslo Fjord, Norway, when they see a light that appears to be on the wharf. Fearing sabotage, they hurry into their cars and drive toward the wharf along a mountain road. All three cars stall at once, so they abandon them along the road and head down a snow-covered hillside toward an object on the ground that appears to be a hazy orange light shaped like a church bell. It is emitting a hissing sound. Moments later, the object rises up and hovers some 9–18 feet above the water. It then moves off at "fantastic speed," turning a deep blue color, and disappears. They advance to where the object was resting and find a crater-like impression about 4.5 feet in diameter and 3 feet deep. Outside this circle, the snow has melted. (Neville Thornhill, "U.F.O. Lands in Norway—in 1943: Witness Describes First Recorded E-M Case," *Australian Flying Saucer Review*, no. 7 (September 1967): 10)

1943, December 2 — Night. Some 105 German Junkers Ju 888 bombers attack the port of Bari, Italy, a key supply center for Allied forces. 28 Allied ships are sunk, including the US Liberty ship *SS John Harvey*, which is carrying mustard gas intended for retaliation in case German forces use chemical warfare. Liquid sulfur mustard from the bombs spills into waters already contaminated by oil from the other damaged vessels. The many sailors who abandoned their ships into the water become covered with the oily mixture. The wounded are pulled from the water and sent to medical facilities whose personnel are unaware of the mustard gas. Medical staff focus on personnel with blast or fire injuries. Within a day, the first symptoms of mustard poisoning appear in 628 patients and medical staff, including blindness and chemical burns. That puzzling development is further complicated by the arrival of hundreds of Italian civilians also seeking treatment, who have been poisoned by a cloud of sulfur mustard vapor that blows over the city when some of *John Harvey's* cargo explodes. As the medical crisis worsens, little information is available about what is causing the symptoms, because US military command want to keep the presence of chemical munitions secret from the Germans. By the end of the month, 83 of the 628 hospitalized military victims have died. The number of civilian casualties, thought to have been even greater, cannot be accurately gauged since most have left the city to seek shelter with relatives. (Wikipedia, "Air raid on Bari")

1943, December 11 — US bombers conduct a daylight raid on Emden, Germany, and observe an unknown object about the size of a Thunderbolt aircraft over the target area. It passes below the bombers in a straight line and at terrific speed, leaving a vapor trail that persists. (Project 1947, "UFO Reports, 1943"; David Clarke and Andy Roberts, *Out of the Shadows*, Piatkus, 2002, pp. 15–16; *Strange Company* 51–52; Patrick Gross, "ACUFO," October 1, 2023)

1943, December 14 — Night. British 255 Night Fighter Squadron leader Patrick Hardy Vesey Wells is flying his Bristol Beaufighter on a patrol mission around Naples, Italy, when he and his navigator notice a small bright light behind them. It stays on their tail, moving from side to side. After 1–2 minutes it goes off in another direction. (A. Speir, "Patrolling over Kent: 28 November 1940, No 249 Squadron, from RAF Station North Weald," *Military History Journal* 9, no. 5 (June 1994); *Strange Company* 52)

1943, Winter — Day. While on a bombing mission over central Germany, Sgt. Louis Kiss, a tail gunner on the *Phyllis Marie*, a B-17 of the 390th Bombardment Group, sees an odd-looking sphere approach the plane from behind and below. It seems to be the size of a basketball and shimmery gold. The object hovers just above one wing, then passes over the top to the other wing where it hovers again. Soon it moves to the rear and gets caught in the B-17's backwash and disappears. ("First Official Foo-Fighter Records Discovered," *Just Cause*, no. 32 (June 1992): 4–5; Clark III 502; Clark IV 551)

1943, Winter — 3:00 p.m. Harry G. Barnes, a member of the Washington, D.C., Metropolitan Police Department stationed at No. 1 Precinct, sees three oval-shaped objects in V-formation speeding eastward across the northeast sky. The objects have pulsating, greenish-red exhausts that occasionally flare and curl around them. (UFOEv, p. 64; Clark III 1177)

1944

1944 — During a mission to bomb oil fields in Romania, a Russian Tupolev Tu-2 piloted by Maj. Bajenov and Boris Surikov is flying over southwest Ukraine at an altitude of 3 miles when a large, elliptical object approaches them. The bomber starts shaking, the oil pressure rises, and Surikov feels a strong electrostatic charge. Even after the object passes, the bomber's wings are covered with glowing discharges. (Good Need, pp. 21–22)

1944 — George Adamski and his followers move closer to Palomar Mountain, California, along the Road to the Stars where his long-time associate Alice K. Wells sets up a roadside café, Palomar Gardens. According to coworker

Charlotte Blodget, "Each member of the group shared in the manual labor that went into this effort, and since heavy restrictions were still in effect regarding materials [in the war's aftermath], anything available had to serve." Adamski builds a "small observatory" to house his 15-inch telescope to study the skies. ("Palomar Mountain, 1940–1960: From Obscurity to World Fame," The Adamski Case, September 22, 2019; George M. Eberhart, "Palomar Gardens Café," *IUR* 30, no. 3 (May 2006): 9)

1944, January 15 — The Materiel Command becomes the AAF Materiel Command. (Wikipedia, "Air Materiel Command")

1944, February — 2:30 a.m. An Australian Beaufort bomber is flying at 4,500 feet over Bass Strait, Australia, when it is joined by an object like a "dark shadow" with a flickering flame coming out of its rear. It appears only 100–150 feet away and stays with the bomber for 18–20 minutes, during which time its radio and direction-finding instruments fail. It shoots away at 700 mph. (R. Gardner, "The Fliers We Wanted to Forget," *Melbourne Sun Pictorial,* September 22, 1979; Bill Chalker, "Australian A.F. UFO Report Files," *APRO Bulletin* 30, no. 10 (October 1982): 7; Bill Chalker, *The Oz Files*, Duffy and Snellgrove, 1996, pp. 35–36)

1944, February 9 — RAF No. 5 Group issues a report of its investigation on "Rocket Phenomena," concluding that the air crews are seeing either rockets fired from aircraft, parachute rockets, or high-explosive projectiles at maximum altitudes of 18,000 feet. Reports of objects changing their course are either defects causing erratic flight or light flak tracers reaching their highest point and descending. (*Strange Company* 57–58)

1944, February 20 — 2:30 a.m. Two guards of the 3rd Marine Division on Guadalcanal in the Solomon Islands see what they first assume are the headlight beams of a truck coming from a swamp about three-quarters of a mile from their position. It moves laterally about 50 feet and they see it is a circular light about 50–60 feet long and 20 feet high. It then rises into the air about 25 feet and heads in the direction of the guards at about 45 mph. It makes a 45° turn and passes about 100 feet above the trees of a coconut grove. Several days later, a 200-foot cut in the reeds is discovered in the approximate spot where the light originated. (Alvin G. McNish, "Letter," *CUFOS Associate Newsletter* 5, no. 5 (Oct./Nov. 1984): 2)

1944, February 23 — Brig. Gen. George C. McDonald is appointed assistant chief of staff for intelligence for the newly created US Strategic Air Forces in Europe. "Many months preceding the collapse of Germany, McDonald recognized the imperative need for the creation of a new type of intelligence activity to investigate and exploit air intelligence objectives in Germany and liberated countries. This unique system was established and consisted of a great number of highly qualified technical and scientific personnel to exploit all the worldwide aeronautical research developments of Germany. This resulted in the collection of priority intelligence information of value in the prosecution of the war against Japan; technical and non-technical information of immediate operational significance and value; as well as a substantial portion of important documents and personnel of the German Air Ministry that enabled the US Army Air Forces to undertake long-range research with respect to many valuable-phases of air doctrine, research, employment, organization, procedure, and plans of the German air force." Among the personalities involved in the operation are some who will become involved in UFO investigations in the future: Col. John A. O'Mara, Col. Howard M. McCoy, Col. Harold E. Watson, and Col. Malcolm D. Seashore. (Wikipedia, "United States Strategic Air Forces in Europe")

1944, February 24 —Night. Southwest of Saint-Quentin, Aisne, France, three silver objects are seen by an RAF bomber returning from a mission over Schweinfurt, Germany. They resemble Zeppelins but move independently of the wind. (*Strange Company* 60)

1944, March — An Army Air Force pilot flying a B-17 sees a fast-moving, glowing green object light up the cockpit and speed out of sight over the horizon at Carlsbad, New Mexico. (UFOEv, p. 19)

1944, March 1 — The first prototype H.IX V1, an unpowered glider with fixed tricycle landing gear, is tested in Germany, but there is an accident when the pilot attempts to land without first retracting an instrument-carrying pole extending from the aircraft. The design is taken from the Horten brothers and given to Gothaer Waggonfabrik. (Wikipedia, "Horten Ho 229")

1944, Spring (or 1945) — Two grammar school teachers are driving in the mountains near Auberry, California, when their car stalls and they see a cigar-shaped object with lighted portholes along the side hovering in a nearby ravine. They watch it for several minutes until it begins moving slowly out of the ravine, ascends, and shoots away to the west at a tremendous speed. The car engine remains stalled for a while, then starts by itself. ("Past Sightings Come to Light," *APRO Bulletin,* Jan./Feb. 1968, p. 5)

1944, April — Late afternoon. Near the Eastern front in western Slovakia, a man is standing on a hill near his home when he sees a dark round object moving at high speed to his right for less than one minute. It moves at a steady speed and is followed by another object about 20 seconds later. As many as 6 others appear, and five are visible at one time, each beginning as a pinpoint of light, growing bigger, then decreasing back to a pinpoint. The display lasts for about 5 minutes. ("Correspondence," *CUFOS Associate Newsletter* 3, no. 5 (Oct./Nov. 1982): 2)

1944, April 5 — The Y-12 plant at Oak Ridge has sent 200 grams of enriched uranium to Los Alamos. Italian-American physicist Emilio Segrè receives the first sample and within 10 days discovers that the spontaneous fission rate is too high for use in a gun-type fission weapon (because of pu-240 isotope present as an impurity in the pu-239). (Atomic Heritage Foundation, "Atomic Timeline")

1944, April 26 — Night. RAF pilot Arthur Horton of the 622 Squadron is returning from a bombing mission to Essen, Germany, when he is followed by four orange balls of light with "short stubby wings" and emitting sparks, two on each side of the aircraft. He takes evasive action with his Lancaster, but the objects follow all his maneuvers for 10 minutes. When they reach the coast of Holland, they seem to "burn themselves out." (*Strange Company* 64–65; UFOFiles2, pp. 16, 18; Patrick Gross, "ACUFO," October 20, 2023)

1944, April 29 — A gun camera film from a German Messerschmitt Bf 110 fighter bomber firing on a Russian Ilyushin DB-3 bomber somewhere on the Eastern Front shows a light moving across the path of the Russian aircraft. Possible foo-fighter? ("1944 German Gun Camera Films FW-190 vs. B-17s, B-24s WWII Air Raids over Germany 29794" [at 4:14], PeriscopeFilm YouTube channel, April 14, 2020; "NUFORC UFO Sighting 182788," National UFO Reporting Center, August 28, 2024)

1944, May 29 — The Aircraft Warning Service is deactivated. (Wikipedia, "Aircraft Warning Service")

1944, June — 11:00 a.m. Three Lockheed P-38s of the 1st Fighter Group are flying at 33,000 feet over the Adriatic Sea northeast of Bari, Italy, when they see a round, silver disc above them at about 50,000 feet. The object drops about 10,000 feet and stays with them for 3 minutes, then speeds north out of sight. (Richard H. Hall, *From Airships to Arnold,* UFO Research Coalition, 2000, p. 22)

1944, June — 12:30 p.m. David A. K. Morris, a fitter with Service Unit 10 of the Royal New Zealand Air Force, takes a swim with a friend at Torokina Beach, Bougainville Island, Papua New Guinea. They see "a huge, dark-gray, seemingly metallic, bulbous mass hanging out of a large cumulus cloud." It moves silently, its outline fading into the cloud and out of sight. It resembles a Zeppelin or the R101 airship, only bigger. (D. Morris, "RNZAF Camp UFO Sighting of 1944," Ufocus NZ, July 22, 2020)

1944, June — Edward W. Ludwig is commanding a small, Coast Guard–manned cargo vessel near Palmyra Atoll. While looking for a lost Navy patrol plane, he observes a bright aerial sphere that alternately moves and stops for 30 minutes. ("True Mystic Experiences," *Fate* 3, no. 8 (December 1950): 82–87)

1944, June 10? — The Liberty ship *SS George E. Badger* is off Omaha Beach in Normandy, France, when gunner Edward Breckel sees a "dark ellipsoidal object" on the horizon about 5 miles away. "Blunted on each end like a sausage," the silent craft remains in view for 3 minutes, moving slowly at about 15 feet above the surface of the water. ("The Case for the 'Sea-Saucer,'" *CRIFO Orbit* 1, no. 10 (January 7, 1955): 5; *Strange Company* 67)

1944, June 13 — Afternoon. A V-2 rocket launched by the Germans from Peenemünde Airfield explodes in an air burst about 4,900 feet above a cornfield near Bäckebo in Kalmar County, Sweden, after it flies into some cumulus clouds that block the controller's line of sight. It is supposed to crash in the Baltic Sea outside occupied Bornholm, Denmark. The Swedes exchange the wreckage with the UK in return for some fighter aircraft. (Wikipedia, "Sweden during World War II"; Mats Burström, Anders Gustafsson, and Håkan Karlsson, "The Air Torpedo of Bäckebo: Local Incident and World History," *Current Swedish Archaeology* 14 (2006): 7–24; Clark III 527; Clark IV 576)

1944, Early July — 10:30 a.m. During Allied operations in the area around Loreto, Castelfidardo, and Osimo, in Ancona province, Italy, Antoni Szachnowsky, of the 2nd Polish Artillery Regiment, notices an egg-shaped, glistening, metallic, motionless object. The Polish Army anti-aircraft gun fires on it, then the German batteries join in. Eventually both sides stop, and the object remains motionless for a minute. Then it tilts at a 45° angle, moves rapidly upward, and disappears. ("1944: An Italian Foo-Fighter?" *UFO Sightings Italia*, no. 2, March 2002)

1944, July 4 — Oppenheimer reveals Segrè's final measurements to the Los Alamos staff, and the development of the gun-type plutonium weapon "Thin Man" is abandoned. Designing a workable implosion design (Fat Man) becomes the top priority of the laboratory, and design of the uranium gun-type weapon (Little Boy) continues. (Atomic Heritage Foundation, "Atomic Timeline")

1944, July 6 — German test pilot Heini Dittmar attains an unofficial airspeed record of 702 mph in a rocket-powered Messerschmidt Me 163B at Lagerlechfeld, Bavaria, Germany. (Wikipedia, "Heini Dittmar")

1944, July 9 — Afternoon. After a successful air strike by the US 449th Bombardment Group against the Concordia-Vega refinery at Ploești, Romania, witness Grigore Zmeuranu sees a round, yellowish object flying from the north at a speed about 3-4 times that of an aircraft. It leaves a short vapor trail, moves over the bombed area, and returns silently in the same direction. ("Rumania: Reports down the Years," *Flying Saucer Review* 15, no. 1 (Jan./Feb. 1969): 32–33; "Rumanian Sightings Revealed," *UFO Investigator* 4, no. 12 (June/July 1969): 1, 5; Hobana and Weverbergh 226–227; *Strange Company* 71)

1944, July 17 — The Air Service Command and the AAF Materiel Command are placed under AAF Materiel and Services. (Wikipedia, "Air Materiel Command")

1944, Late July — Evening. Jaakku Kivistö is serving in the Finnish Army as a noncommissioned medical officer stationed on a farm near Impilahti, Karelia [now Russia], by Lake Ladoga. He notices a large object next to the corn-drying building on a steep hillside that he at first takes for a military truck. As he walks closer, he sees it is reddish in color, moving slowly about 150–230 feet in the air, 100 feet long, and has a row of black windows. It moves off quickly in the direction of the lake and vanishes. ("A Close Encounter from the Year 1944," *Nordic UFO Newsletter,* 1985 no. 1, pp. 3–5)

1944, Summer — 5:00 p.m. François Panes watches a cigar-shaped object at an altitude of about 5,000 feet above the Kamensko Forest north of Blovice, Czechoslovakia [now Czech Republic], glittering brightly with no wings, no rudder, and no propeller. It is about 150 feet in diameter and 300–400 feet long. The object is lit up from underneath. It slowly descends, after which it rises up again and vanishes into the blue sky after 10–15 minutes. (Hobana and Weverbergh 215–216)

1944, Summer — Day. Madeleine Arnoux, 13, is riding her bicycle west along route D42 from Toulon-sur-Arroux toward La Verchère, Saône-et-Loire, France. She stops along a dirt track to pick some wild berries and notices a dull, metallic object about the size of a Volkswagen landed at a point where the track curves into the woods. Therer are some beings about 3 feet tall and dressed in brown coveralls standing nearby. She has the feeling that she cannot move, but finally runs to retrieve her bicycle. When she looks back again, the object and the beings are gone, but a strong wind is blowing the trees at the spot where it had been. (Madeleine Arnoux, "Un Cas d'Atterrissage datant de 1944," *Lumières dans la Nuit*, no. 118 (June 1972): 20–21; F. Lagarde, "A French Landing in 1944," *Flying Saucer Review Case Histories*, no. 12 (December 1972): 8)

1944, Summer — Fred Wieland and some friends are riding their bicycles on a footpath adjacent to the Grand Central Parkway in Queens, New York City. As they climb a hill, they look up and see a cigar-shaped object "broadside" to them. It is of smooth metallic construction with no windows or openings. They race to the top of the hill for a better look, but by then the object has completely disappeared. (Clark III 1178; Clark IV 1352)

1944, Summer — Mid-day. Franceen Andron is at Camp McCain, southeast of Grenada, Mississippi, when she sees a large, fat, cigar-shaped object that changes from dull black to gray to "fog blue." It is joined by three smaller discs that appear below it after emerging from a cloud. The large object disappears first, followed by the discs, which race away in different directions. (NICAP case file)

1944, Summer — Day. Asa Howard Jr. is outside the barracks at RAF Molesworth in Cambridgeshire, England, when he and other airmen see a pencil-shaped, metallic object moving faster than a jet about a mile away. While watching it for about 2 minutes, they see it pass behind a small cloud before it disappears. (NICAP case file)

1944, August — Night. Officer George Todt of the 38th Regiment, Second Infantry Division, is between Saint-Lô and Vire, Normandy, France, when he sees a cherry-red light one-fifth the size of the moon moving silently west at 120 mph towards Omaha Beach. It stops over the American lines and hovers for 14 minutes. It expands and contracts regularly every few seconds. Col. Francis Henry Boos and another officer also observe it. (*Strange Company* 78–79)

1944, August 11 — Shortly after midnight. Capt. Alvah M. Reida is piloting a B-29 bomber based at Kharagpur, India, on a bombing mission over Palembang, Sumatra, Indonesia, when his right gunner and copilot notice a sphere "probably five or six feet in diameter, of a very bright and intense red or orange in color" that constantly throbs, at about 12,500 feet, pacing them about 1,500 feet off the starboard wing. It keeps up with the B-29, then flying at 210 mph. Reida tries to shake it off his plane, but it stays in the same relative position until, after 8 minutes, it makes an abrupt 90° turn and accelerates rapidly, disappearing in the overcast. (UFOEv, p. 23; Good Above, p. 19; *Strange Company* 71–75; Clark III 503; Clark IV 552)

1944, August 11 — Night. RAF Warrant Officer Ronald R. Claridge is over France aboard a No. 7 Squadron Lancaster bomber returning from a bombing run on La Pallice, La Rochelle, Charente-Maritime, France, when his radar screen goes blank. Another crewman shouts to look at a vast disc-shaped object with a long row of lights on their

starboard side. They watch it for 3 minutes, then it shoots away in a flash of light. Later he draws a watercolor painting to show how the UFO dwarfed the bomber. (UFOFiles2, pp. 26–27)

1944, Mid-August — 11:00 a.m. During the Warsaw Uprising in Poland, Zenon Sergisz notices a German bomber passing by, as well as three bright points of light that descend as the bomber moves away. The lights are flattened spheres that move low behind some buildings then rise up at an angle and disappear. (Poland 14–15)

1944, August 17 — The Allied command creates the Combined Intelligence Objectives Subcommittee (CIOS), charged in part with investigating the strange balls of fire. (*Strange Company* 79)

1944, Late August — Sgt. Ness and another man of the mine-laying platoon of the 175th Infantry Regiment, 29th Infantry Division, see a large rectangular object "like a railroad boxcar" with no apparent source of propulsion move steadily at about 90 mph over the front lines near Brest, Brittany, France, and out to sea. At one point the object passes in front of the moon, briefly obscuring it from view. (Lore and Deneault, pp. 120–121)

1944, Late August — 4:20 p.m. A nurse, Mrs. E. M. Church, on her way to a tram station in Christchurch, New Zealand, sees an object like an "upturned saucer" resting on the ground near the road. It seems to be 20 feet across and 9 feet high. Two beings, not quite 4 feet tall, are inside, visible through a rectangular window. A third stands motionless, just outside an open door. All three seem to be looking toward the lights of a nearby fairground. The nurse cannot decide if their skin color is green or they are dressed in green, but all are encased in a transparent oblong box. The head takes up half of their bodies and there are no apparent legs or arms. She inadvertently makes a noise, and the outside figure notices her. Its helmet flips over automatically, and it drifts inside the object, which rises up and disappears in the clouds. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 12; Clark III 265; Clark IV 305)

1944, August 30 — A 16-year-old girl is riding her bicycle in Saint-Jean, Haute-Garonne, France, when she sees a semi-spherical object about 13 feet in diameter and 8 feet tall resting on the ground. At first it appears white, then turns to orange. It oscillates from left to right and takes off. (Richard H. Hall, *From Airships to Arnold*, UFO Research Coalition, 2000, pp. 23, 32)

1944, August 31 — The Army Air Forces Air Technical Service Command is formed as the result of the merging of the Materiel and Air Service Commands. (Wikipedia, "Air Materiel Command")

1944, September — Dusk. Three Oak Ridge workers (a man named Nelson, A. C. Butler, and Albert Profitt) are driving 2 miles southeast of Oliver Springs, Tennessee, when a strange object appears about 50 feet ahead of them at the level of their windshield. It is glossy white in color and about 30 feet long and 4 feet wide. Nelson eases the car up to the object, but it withdraws; when he stops, it also stops. Soon the light rises high in the air and disappears over Black Oak Ridge. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp, 23–24)

1944, September — 9:00 p.m. Canadian Army Lance Cpl. Carson Yorke is just outside Antwerp, Belgium, during a German bombardment. He steps out of his vehicle and sees a glowing globe traveling at about 30 mph and 40 feet altitude from the front lines toward the city (in the same course that the German V-2s are following). It seems to be 3–4 feet in diameter and looks "as though it was cloudy glass with a light inside." It disappears from view, then is followed by another, then five others in succession. (Jerome Clark and Lucius Farish, "The Mysterious 'Foo Fighters' of WW II," *Saga UFO Report*, Spring 1975; Clark III 502; Clark IV 551)

1944, September 2 — Two chemists are killed, and Arnold Kramish almost killed, after being sprayed with highly corrosive hydrofluoric acid while attempting to unclog a uranium enrichment device that is part of the pilot thermal diffusion plant at the Philadelphia Navy Yard. (Wikipedia, "Arnold Kramish")

1944, September 6 — The Combined Intelligence Objectives Subcommittee holds its first meeting in London, England. Present are Air Commodore K. C. Buss (Air Ministry), Gen. George C. McDonald (AAF Director of Intelligence), Lt. Col. Lewis F. Powell Jr., Col. Howard M. McCoy (chief of the Air Technical Section), Howard P. Robertson (CalTech physicist), and Cmdr. Ian Fleming (Admiralty). (*Strange Company* 80)

1944, Early October — Night. A rapidly moving object latches onto the tail of a Northrop P-61 Black Widow of the 422nd Night Fighter Squadron over western Germany. The light follows the plane as the pilot takes evasive maneuvers, losing it only after he dives into a cloud bank. The plane's radar observer is badly shaken and is still hyperventilating the following day. The pilot logs the object as a Messerschmitt Me 163 Komet "rocket-propelled interceptor." (Graeme Rendall, "The Foo Fighters: Today's Pilots Encounters with UAP Are Nothing New," The Debrief, April 15, 2021)

1944, October — Late night. Members of a family who live in an isolated area on the outskirts of Rochester, Pennsylvania, are awakened by a loud noise and flash of light. The father goes to the door, where he sees a 4.5-foot-tall figure dressed in a brown robe. Fifteen feet to its left are five other figures dressed in luminous brown metallic suits. Their heads seem large, with only a slit for a mouth. The arms are long, with long thin fingers.

Three of them enter the house and the father accompanies them to a landed craft nearby. He remembers nothing else when he wakes up in the morning. A round, burned circle 20 feet from the house and 25 feet in diameter is found the next day. (Clark III 265–266; Clark IV 305–306)

1944, October — Nellie Carlin and another woman are about to drive to work in St. Paul, Minnesota, when they see what seems to be an airplane about to crash. It abruptly stops 20 feet above their heads, revealing itself to be a brown, bullet-shaped object with a flat end "like frosted glass with a bright light behind it." It makes a crackling noise, turns right, and ascends at great speed. (Clark III 1178; Clark IV 1352)

1944, October 10 — 8:00 p.m. A bicyclist riding in Älghult, Kronoberg County, Sweden, is illuminated by a light beam coming from a nearby woods. He sees a large, shining sphere rise silently and rapidly from the ground to treetop height and stop, appearing moonlike and golden. After about 5 minutes, the object disappears abruptly. (Anders Liljegren, *From the Archive (2): UFO-Phenomena in the Fall of 1944*, AFU, n.d., pp. 2–6)

1944, Late October — 9:30 p.m. 1Lt. J. B. Douglas Jr. and other soldiers of the 489th Armored Field Artillery near Weert, Netherlands, watch a bright silvery object through field glasses moving silently from northwest to southwest through an arc of 90° in about 30–45 minutes. (UFOEv, pp. 30, 129)

1944, October 28 — Physicist David T. Griggs, a civilian adviser on radar to the War Department, is asked by Gen. Henry H. "Hap" Arnold to look into incidents of unusual aerial phenomena in Europe and interview pilots. He later moves his investigation to the Pacific Theater. His report to Arnold at the end of the war has never been located. He was interviewed by James E. McDonald on April 10, 1969. (Michael D. Swords, "David Griggs and the Foo Fighters," *IUR* 31, no. 1 (January 2007): 17–19)

1944, October 30 — Late night. RAF Flight Engineer Maurice Juberley of the 640 Squadron is returning from a bombing mission over Köln, Germany. His Halifax III is flying at 19,000 feet above the clouds when the rear gunner reports a ball of orange fire closing in on them. He orders an evasive maneuver and loses the light. (*Strange Company* 86)

1944, Early November — Night. Lieut. Col. Oris B. Johnson's 422d Night Fighter Squadron, equipped with P-61 Black Widow fighters, reports seeing 15–20 mystery objects every night over Germany, either alone or in formations of four. Johnson says he could accept that the reports are rocket planes or night fighter jets. (*Strange Company* 87)

1944, November 3 — The Japanese Army launches the first of some 9,300 Fu-Go bomb-bearing fire balloons intended to land in North America to instill fear and terror. About 300 are found or seen in America. It is likely that more of them land in unpopulated areas. On November 4, a US Navy patrol craft discovers one of the first Fu-Go balloons floating off San Pedro, Los Angeles, California. National and state agencies are placed on heightened alert status when balloons are found in Wyoming and Montana before the end of the month. (Wikipedia, "Fu-Go balloon bomb"; Franklin Matthias, "Japanese Balloon Bombs Fu-Go," Atomic Heritage Foundation, August 10, 2016)

1944, November 4 — Night. RAF Lancaster bombers over Solingen, Germany, report what they call "scarecrow" dummy airplanes that explode with a sheet of flame and dense black smoke. ("German Dummy Planes Explode Amid Our Own," *New York Times*, November 6, 1944, p. 3)

1944, November 12 — 9:30 p.m. A radio station in Santiago, Chile, broadcasts a version of *The War of the Worlds* in Spanish in which Martians land in Puente Alto, causing a panic and the death by heart attack of at least one person in Valparaíso. (John Gosling, *Waging the War of the Worlds: A History of the 1938 Radio Broadcast and Resulting Panic, Including the Original Script*, McFarland, 2009, pp. 99–102)

1944, November 16 (or 30?) — 11:55 p.m. Lt. J. L. Besmond, officer of the day on the *USS Gilliam*, enroute from Oro Bay, Papua New Guinea, to Leyte Gulf, Philippines, observes an unusual object at a distance of 21 miles. Fire Control Officer P. Kendall Bruce describes it as a bright green globe that rises from behind the ship and moves in a "perfect parabola at great speed, finally disappearing behind the horizon to the north." (NICAP, "UFO Observed from USS Gilliam"; *Strange Company* 95–96; Clark III 503; Clark IV 552)

1944, November 22 — 10:00 p.m. RAF 9 Squadron is flying at 12,000 feet somewhere over Germany after returning from a bombing mission in Trondheim, Norway. Flying Officer Dennis Nolan sees a clearly defined, "pyrotechnic pink," spherical object, fluctuating in brightness, flying at their same altitude to the rear of their bomber. The object accelerates and decelerates abruptly with jerking movements, moving from side to side, well astern. (*Strange Company* 89; Powell, *Scientist*, 65)

1944, November 24 — Capt. William D. Leet's B-17 crew (part of the 2nd Bombardment Group, 5th Wing of the Fifteenth Air Force) is returning from bombing a target at Klagenfurt, Austria. While flying over northeastern Italy near Trieste, Leet notices a blinding light and feels an intense heat. It goes away quickly, but seconds later he sees a "round amber light" sitting off the left wingtip of the B-17. It is bright and perfectly circular. Leet orders the gunners not to shoot at it. Sgt. Harris, the upper gunner, thinks it is 10 feet in diameter and 150–300 feet away. The object stays with them over the Adriatic Sea for 50 minutes, until it "just turned off" like a light bulb.

(William D. Leet, "The Flying Fortress and the Foo-Fighter," *MUFON UFO Journal*, no. 133 (Jan./Feb. 1979): 3–4; *Strange Company* 90–93; Clark III 502–503; Clark IV 551–552)

1944, November 29 — 3:00 p.m. Reginald Herbert Mortimer and his daughter Frances are on the Bruce Peninsula between Lake Huron and Georgian Bay, Ontario, when they hear a hissing sound behind them and see 9 disc-shaped objects pass overhead at approximately 2,000 feet. Moving three abreast in a square configuration, they are lost to sight over the lake. (Clark III 1179)

1944, November 29 — Night. A Bristol Beaufighter crew (pilot Lieut. Edward A. Schlueter and radar observer Lieut. Donald J. Meiers of the 415th Night Fighter Squadron, and intelligence officer Capt. Fred B. Ringwald as observer) is on a bombing mission and flying above the Rhine River north of Strasbourg, Bas-Rhin, France. They see "eight to 10 bright orange lights off the left wing…flying through the air at high speed." Neither the airborne radar nor ground control registers anything nearby. Schlueter and Meiers also see red lights on November 26 above Mannheim, Germany. (Jo Chamberlin, "The Foo Fighter Mystery," *American Legion Magazine,* December 1945, pp. 9, 43; Harold T. Wilkins, "The Strange Mystery of the Foo Fighters," *Fate* 4, no. 6 (Aug./Sept. 1951): 98–106; Zoe Crasney, "What Were the Mysterious 'Foo Fighters' Sighted by WWII Night Flyers?" *Smithsonian Air and Space Magazine,* August 2016; *Strange Company* 93–95; Clark III 503; Clark IV 552)

1944, December 13 — SHAEF in Paris, France, issues a press release identifying the fireballs as a "new German weapon" and that the Ninth Air Force has reported seeing "many silver balls floating in the air above enemy territory." An Army Air Force spokesman says on December 20 that the silver balls have "no detectable effects" on Allied planes. He does not know whether or not they are metallic. ("Floating Mystery Ball Is New Nazi Air Weapon," *New York Times,* December 14, 1944, p. 6; *Strange Company* 96, 101)

1944, December 14–28 — Numerous balls of light are reported by the Night Fighter Squadrons during bombing raids over Germany. Pilot and operations officer Charlie Horne of the 415th Night Fighter Squadron suggests calling the objects "foo fighters," a name gleaned from the men's favorite comic strip, "Smokey Stover" by cartoonist Bill Holman. The comic follows the escapades of a madcap fire fighter who calls his fire truck the "Foomobile." Smokey Stover often states, "where there's foo, there's fire." (Jo Chamberlin, "The Foo Fighter Mystery," *American Legion Magazine,* December 1945, pp. 9, 43–47; "More Foo-Fighter Records Released," *Just Cause,* new ser., no. 33 (September 1992): 2–6; "The Foo Fighters of World War II, Part One," Saturday Night UFOria; Clas Svahn, "The Origin of the Expression 'Foo Fighter,'" *IUR* 25, no. 3 (Fall 2000): 18; Don Berliner, with Marie Galbreath and Antonio Huneeus, *UFO Briefing Document: The Best Available Evidence,* Dell, 2000, pp. 47–49; *Strange Company* 96–111; Swords 3–5; Barry Greenwood, "Foo Fighter Archive Donated to UHR," *UFO Historical Revue,* no. 17 (December 2015): 2–8; Graeme Rendall, "The Foo Fighters: Today's Pilots Encounters with UAP Are Nothing New," The Debrief, April 15, 2021)

1944, December 23 — 6:00 a.m. A Bristol Beaufighter crew of the 415th Night Fighter Squadron is patrolling at 10,000 feet near Haguenau, France, when they see two orange lights climbing toward them from the ground. They level off and remain on the plane's tail for 2 minutes, then peel off, "flying under perfect control," and go out. (Jo Chamberlin, "The Foo Fighter Mystery," *American Legion Magazine,* December 1945, p. 44; "More Foo-Fighter Records Released," *Just Cause,* new ser., no. 33 (September 1992): 1, 4)

1944, December 23 — Night. Navy Lt. George Arents III and copilot Lt. Elon Forster are flying a military DC-3 at 9,000 feet between Blackstone and Richmond, Virginia, when they notice a cigar-shaped object hovering below them at about 4,000 feet. It appears to be 200 feet long and has two horizontal rows of blue-lighted windows and a flaming exhaust coming out of its tail. (Jan Aldrich)

1944, Late December through February 1945 — Radar operators at Naval Air Station Pasco, Washington, report unusual blips that appear out of nowhere and proceed from northwest to southeast. A Grumman F6F Hellcat fighter is scrambled on at least two occasions with orders to shoot down anything that appears to be hostile, but nothing is seen. In another incident, Lt. JG Clarence R. Clem accompanies Lt. Commander Richard Brown and Ensign C. T. Neal to a waiting aircraft and Brown takes off in pursuit of a ball of fire that quickly leaves him behind as it speeds off to the northwest and is lost to radar. On another occasion, naval officer R. W. Hendershot, flying an SNJ aircraft, is asked by ground radar to make contact with two high-altitude blips flying at the speed of a single-engine Piper Cub. Though he can see nothing, he is convinced the blips are real. (Headquarters Fourth Air Force, "Air Defense Measures at Hanford Engineering Company," January 23, 1945; *Strange Company* 142; Nukes 43–44; Project 1947, "UFOs over Hanford: Cdr. R. W. Hendershot," June 22, 2014; Robert L. Hastings, "Reports Confirm UFO Activity at the Hanford Nuclear Weapons Plant during World War II," UFOs & Nukes, August 9, 2015; Robert L. Hastings, "Former US Navy Pilot Says Huge Fireball Maneuvered above the Hanford Atomic Plant during World War II," UFOs & Nukes, October 5, 2015)

1945

1945 — A slow-moving object, 25–35 feet in diameter, comes within 225 feet of a witness in Sheffield, Yorkshire, England. Through a large window he can see 6-feet-tall beings with short legs, short hair, and one-piece suits. ("Ufonauts Seen in 1945," *Northern UFO News*, no. 21 (February 1976): 5; Clark III 266; Clark IV 306)

1945, January — Ray Palmer edits, rewrites, and publishes Richard S. Shaver's description of the cave-dwelling Dero for the March 1945 issue of *Amazing Stories* under the title "I Remember Lemuria." The issue sells out and generates quite a response. Between 1945 and 1949, many letters arrive attesting to the truth of Shaver's claims (tens of thousands of letters, according to Palmer). The correspondents claim that they, too, have heard strange voices or encountered denizens of the Hollow Earth. (Wikipedia, "Richard Sharpe Shaver"; Richard S. Shaver, "'I Remember Lemuria,'" *Amazing Stories* 19, no. 1 (March 1945): 12–70; Walter Kafton-Minkel, *Subterranean Worlds*, Loompanics, 1989, pp. 137–144; Richard Toronto, *War over Lemuria: Richard Shaver, Ray Palmer, and the Strangest Chapter of 1940s Science Fiction*, McFarland, 2013; David Halperin, "The Shaver Mystery—Richard Shaver, Ray Palmer, and the Quest for Lemuria (Part 1)," July 4, 2014; Clark III 872, 1069; Clark IV 966, 1184)

1945, January 2 — 2:30 a.m. USAAF Lieut. Jack Green and navigator Lieut. Warren Barber, 653rd Bombardment Squadron, are conducting a reconnaissance flight in a Mosquito over the Netherlands and northern Germany when they encounter two balls of fire on three occasions pacing their plane. Barber describes them as a "pair of fog lights, shooting up to 60 or 70,000 feet." (*Strange Company* 114–116, 208–209)

1945, January 2 — The *New York Times* publishes an article stating that the foo fighters are German weapons. Lieut. Donald J. Meiers of the 415th Night Fighter Squadron says he has been followed by foo-fighters twice in November 1944. "A foo-fighter picked me up at 700 feet and chased me 20 miles down the Rhine Valley [Germany]. I turned to starboard and two balls of fire turned with me. I turned to the port side and they turned with me. We were going 260 miles an hour and the balls were keeping right up with us." ("Balls of Fire Stalk U.S. Fighters in Night Assaults over Germany," *New York Times*, January 2, 1945, pp. 1, 4; "Science: Foo-Fighter," *Time*, January 15, 1945, p. 72; *Strange Company* 117–118)

1945, January 2 — Col. Clayton Lawrence Bissell, in the Pentagon's Office of the Assistant Chief of Staff for Intelligence, sends SHAEF in Paris a classified message seeking an explanation for the red balls of fire pacing planes. No response has been located to date. ([Clayton Lawrence] Bissell, [message], January 2, 1945; Project 1947, "UFO Reports, 1945")

1945, January 16 —Lt. Col. Leavitt Corning Jr. of the XII Tactical Air Command sends a secret memo to the assistant chief of air intelligence requesting further information on the "Night Phenomenon." (*Strange Company* 126–127)

1945, January 20 — First Tactical Air Force Executive Officer Maj. Samuel V. Boykin responds to Corning asking for more particulars about the reports. (*Strange Company* 127)

1945, January 22 — British prisoners being force-marched out of the German Heydebreck labor camp (near modern Kędzierzyn-Koźle, Poland) see a four-engine bomber overhead. Behind it is a "brilliant light" that is following it closely. (Clark III 503; Clark IV 552)

1945, between January 26 and 31 — Louis Gracie and four other sailors on the troop transport USS *McCracken* near the Solomon Islands watch a submerged object about 20 feet in diameter with a dull finish. The ship passes over it. (Jan L. Aldrich, "Updated Draft Catalogue of UFOs/USOs Reported by Seagoing Services, NavCat 2.0," Project 1947, 2015; Dolan, USO1, 114–115)

1945, January 30 — 12:10 a.m. A 415th Night Fighter Squadron crew observes two amber-colored "lights in the air at 2,000 feet" between Wissembourg, Bas-Rhin, France, and Landau, Germany. They seem to be about a foot in diameter and 20–50 feet apart. The lights follow their Bristol Beaufighter, closing in to about 1,000 feet before disappearing. (*Strange Company* 129; "Foo Fighter Archive Donated to UHR," *UFO Historical Revue*, no. 17 (December 2015): 7)

1945, January 30 — Capt. Fred B. Ringwald, intelligence officer for the 415 Night Fighter Squadron, responds to Corning's January 16 request by offering a summary of 14 foo fighter reports from December 14, 1944, to January 29, 1945. ([Memo], Fred B. Ringwald to AC of S A-2 XII Tactical Air Command, January 30, 1945; *Strange Company* 129–132)

1945, February — Meade Layne founds the Borderland Sciences Research Associates in San Diego, California, and publishes the first issue of its newsletter, *The Round Robin*. Working with local medium Mark A. Probert, who channels "etheric" entities from discarnates with advanced knowledge of spirit and cosmos, Layne and BSRA seek to explore the mysteries of the invisible world. (Borderland Sciences Research Associates, [History]; Håkan

Blomqvist, "*Round Robin* and Contactee History," Håkan Blomqvist's Blog, March 30, 2014; Clark III 876; Clark IV 970)

1945, February 2 — The first Hanford plutonium arrives at Los Alamos. (Atomic Heritage Foundation, "Atomic Timeline")

1945, February 2 — The first flight of the H.IX V2 is made in Oranienburg, Germany. All subsequent test flights and development are done by Gothaer Waggonfabrik in Gotha. By this time, the Horten brothers are working on a turbojet-powered design for the *Amerika Bomber* contract competition and do not attend the first test flight. The test pilot is Leutnant Erwin Ziller. Two further test flights are made in February. There are reports that during one of these test flights, the H.IX V2 undertook a simulated dogfight with a Messerschmitt Me 262, the first operational jet fighter, and that the H.IX V2 outperformed the Me 262. However, the Me 262 is considered by many as unsuitable for fighter missions, being slow in turning. (Wikipedia, "Horton Ho 229")

1945, February 7 — Afternoon. Several F6F fighters on patrol (one piloted by Ensign Norman P. Stark) from the *USS Wasp* aircraft carrier anchored at Ulithi Atoll in the Caroline Islands are told to investigate a radar target at 30,000 feet some 10 miles west of the fleet. Before they can reach altitude, the object moves back to the west at high speed. They catch a brief visual glimpse of it. (LCDR Norman P. Stark, "A WWII F6F Navy Fighter Pilot's Experiences in the Pacific," Battle of Saipan, January 1, 2000)

1945, February 10 — The *Chicago Tribune* and Washington *Times-Herald* reveal Bill Donovan's plans for a postwar intelligence agency and publishes a secret memo he has sent to Roosevelt proposing its creation. The article compares the proposed agency to the Gestapo. Knowing that Americans want a smaller federal government after the war, Roosevelt is not entirely sold on Donovan's proposal, although Donovan feels reasonably confident that he can talk the president into the idea. J. Edgar Hoover disapproves of Donovan's plan, which he sees as a direct threat to FBI authority, even though Donovan has stressed that his agency will operate only abroad, not domestically. (Walter Trohan, "Super-Spy Idea Denounced As New Deal OGPU," *Chicago Tribune*, February 10, 1945, p. 1; Mark Riebling, *Wedge: From Pearl Harbor to 9/11*, Simon & Schuster, 2002, pp. 59–61; Central Intelligence Agency, "Origins of CIA," August 3, 2005)

1945, February 11 — Air Commodore Colin McKay Grierson, RAF assistant chief of staff A2, refers Ringwald's report to the Air Ministry. (*Strange Company* 133–134)

1945, February 14 — Rocket engineers Rudolf Schriever and Klaus Habermohl allegedly fly a Nazi-engineered flying disk in Prague, Czechoslovakia, that reaches an altitude of 40,680 feet in 3 minutes and a speed of 1,243 mph in horizontal flight. The plans for these devices supposedly come from the German experts Schriever, Habermohl, Richard Miethe, and the Italian Giuseppe Belluzzo. Habermohl and Schriever choose a wide ring that revolves around a fixed, dome-shaped cockpit and consists of adjustable wing disks that can be placed in an appropriate position depending on whether they are needed for takeoff or level flight. (Wikipedia, "Nazi UFOs"; Rudolf Lusar, *Die Deutschen Waffen und Geheimwaffen des Zweites Weltkrieges*, 1958; Andreas Müller, "Dauerthema: UFOs und das Dritte Reich: Eine kritische Analyse," grenzWissenschaft-aktuelle.de, September 5, 2023)

1945, Mid-February — As their C-47 prepares to land at Biggs Field, Fort Bliss, El Paso, Texas, S/Sgt Ralph Bayer is alarmed to see an aircraft approaching from the left and only 900 feet below them. The object is about 30 feet long and a dull, flat gray in color, and it travels in a straight course 500 feet above the ground until it disappears. (Clark III 1178; Clark IV 1352)

1945, February 18 — Disaster strikes during the third test flight of the H.IX V2 in Gotha, Germany. Erwin Ziller takes off without any problems to perform a series of flight tests. After about 45 minutes, at an altitude of around 800 meters, one of the Jumo 004 turbojet engines develops a problem, catches fire and stops. Ziller is seen putting the aircraft into a dive and pulling up several times in an attempt to restart the engine and save the precious prototype. He undertakes a series of four complete turns at a 20° angle. Ziller does not use his radio or eject from the aircraft. He already is unconscious as a result of the fumes from the burning engine. The aircraft crashes just outside the boundary of the airfield. Ziller is thrown from the aircraft on impact and dies from his injuries two weeks later. The prototype aircraft is completely destroyed. (Wikipedia, "Horton Ho 229")

1945, February 22 — Night. A B-24 bomber flying near Chichijima in the Ogasawara (Bonin) Archipelago, Japan, sees an object trailing exhaust. It is also picked up on radar and follows the plane for about 20 miles before disappearing off the screen. (Project 1947, "UFO Reports, 1945")

1945, March — The K-25 gaseous diffusion plant at Oak Ridge, Tennessee, begins production. (Wikipedia, "K-25")

1945, March — A man is squirrel hunting in a wooded area near Belfast, Maine, when he sees a huge, elongated object just above the trees. He runs after it, thinking it is a dirigible about to crash. The object crashes into the trees at the far edge of a clearing, splitting a huge pine tree down the middle. He smells burned rubber. The object seems to be as big as several B-36 bombers. As he stands there stunned, the lowest end of the craft begins to rise and he

hears a humming sound of increasing intensity. After it rises to a horizontal position, it begins to spin faster and faster and the hum becomes very intense. Suddenly one end spews a shower of fine, silvery threads that glint in the sunlight. The object begins to change to a white metallic color and it takes off straight up at fantastic speed. ("I Saw a Flying Saucer," *Flying Saucers,* May 1959, pp. 6–18, 78; Clark III 1178–1179; Clark IV 1352–1353)

1945, March — 3:00 p.m. Army Air Force Sgt. James L. Lease and E. E. Dickey are driving south on the Santa Rosa Highway north of Fort Sumner, New Mexico, when they see the glint of a flying object to the west. It appears to be a grayish metal and motionless about 12–14 feet off the ground. Suddenly it swoops away at great speed and is out of sight within seconds. (*Strange Company* 142–143; Powell, *Scientist,* 65)

1945, March — Ray Palmer travels to Barto, Pennsylvania, and spends a weekend with Richard Shaver and his wife. He witnesses Shaver's channeling trances and the different voices describing the cavern world that he generates during his sleep. (Wikipedia, "Richard Sharpe Shaver"; Walter Kafton-Minkel, *Subterranean Worlds,* Loompanics, 1989, pp. 137–144; Richard Toronto, *War over Lemuria: Richard Shaver, Ray Palmer, and the Strangest Chapter of 1940s Science Fiction,* McFarland, 2013; David Halperin, "The Shaver Mystery—Richard Shaver, Ray Palmer, and the Quest for Lemuria (Part 1)," July 4, 2014; Clark III 872, 1069; Clark IV 966, 1184)

1945, March 10 — A Japanese Fu-Go balloon strikes a high-tension wire on the Bonneville Power Administration in Washington State. The balloon causes sparks and a fireball that results in the power being cut. Coincidentally, the largest consumer of energy on this power grid is the Hanford site of the Manhattan Project, which suddenly loses power. The officer in charge at Hanford, Col. Franklin Matthias, says "it shut down the plant cold, and it took us about three days to get it back up to full power again." ("Japanese Ballons and Attached Devices," *Technical Air Intelligence Center Report,* no. 41 (May 1945); Joel Shurkin, "Japanese Balloon Attack Almost Interrupted Building First Atomic Bombs," Inside Science, March 21, 2016; Franklin Matthias, "Japanese Balloon Bombs Fu-Go," Atomic Heritage Foundation, August 10, 2016; Donald W. Meyers, "It Happened Here: Japanese Balloon Bombs Found in Yakima Valley," *Yakima (Wash.) Herald-Republic,* June 10, 2019)

1945, March 12 — Nearly a week after the US Army launches Operation Lumberjack to cross the Rhine River, the Ho 229 is included in the *Jäger-Notprogramm* (Emergency Fighter Program) for accelerated production of inexpensive "wonder weapons." The prototype workshop is moved to the Gothaer Waggonfabrik (Gotha) in Friedrichroda, Germany. In the same month, work commences on the third prototype, the Ho 229 V3. (Wikipedia, "Horton Ho 229")

1945, March 18 — Grierson writes to Samuel V. Boykin that the Air Ministry thinks the fireballs are either Me-262's or flak rockets. (*Strange Company* 147)

1945, March 18 — Night. A 416th NFS crew is flying a Mosquito 25 miles northwest of Florence, Italy. Suddenly a light is flying alongside them at 13,000 feet. It doesn't appear on the radar screen. The pilot turns the plane toward the light, keeping on its tail, pursuing at 260 mph and climbing to 16,000 feet. Suddenly the light disappears. (*Strange Company* 148)

1945, March 19 — 1:00 p.m. The crew of the battleship USS *New York* is leaving port on Manus in the Admiralty Islands, preparing to rejoin Task Force 54 in preparation for the invasion of Okinawa. When the ship's radar detects a single incoming blip, officers issue a call to General Quarters. Crew members can see an object hovering high above the ship. Capt. Kemp C. Christian Sr. is watching it through binoculars, and it appears silver in color and smaller than a full moon. It remains still, matching the ship's course and speed. After 30 minutes, Kemp orders the ship's anti-aircraft guns to fire on the object, but it is out of range. After a few more seconds, the object climbs swiftly until it is out of sight and off the radar scope. (William McGuire and Mark Murphy, "Profiles: New York or Bust," *The New Yorker,* October 27, 1945; Carl Feindt, "Report #1090," waterufo.net; NICAP, "South Pacific in the Area of the Admiralty Islands, Mid-March 1945"; Stephen A. Pratt, [Letter], *MUFON UFO Journal,* no. 203 (March 1983): 16; *Strange Company* 151–152)

1945, Late March — At least two residents of Dresden, Germany, see a round, flat, silver-colored object without propellors or wings hovering silently in the air. It suddenly disappears like a "burst soap bubble." ("Weltrundschau," *Weltraumbote,* no. 32/22 (July/Aug. 1958): 14–15; Clark III 503; Clark IV 552)

1945, March 25 — Around 10:30 p.m. Company A of the US 44th Armored Infantry Battalion is bivouacked on a hill along the Autobahn between Mannheim and Darmstadt, Germany, when 6–7 circular, glowing, yellow-orange objects approach at 150 feet, roughly following the road. They are not in strict formation and seem individually controlled. John G. Norris recalled that after 5–6 minutes they are hidden by the trees. (*Strange Company* 153–154; Clark III 503; Clark IV 552)

1945, March 26 — During an air operation, Lieut. Calvin P. Lamb (pilot), Lieut. James G. Holmes (radar observer), and Sgt. John W. McIsaac (gunner) notice lights on an airborne object. The lights follow them through a few turns but move away as the crew orbits north of Iwo Jima, Japan. They give chase, obtaining a slight target on the aircraft radar, then the object pulls out of sight. A similar lighted object is again seen March 28 by Lieut. William F. Sill

(pilot), Flight Officer George W. Hayden (radar observer), and PFC William Brasvell (gunner). (Project 1947, "UFO Reports, 1945")

1945, April — During operations around Okinawa, Japan, the radar crew on the aircraft carrier *USS Independence* frequently notices strange radar returns that move at slow speeds (30–70 mph). Aircraft and destroyers sent to search for them never find anything. These radar ghosts are usually detected 25–30 miles away at an altitude of 1,500 feet, but occasionally 3,500 feet. The primary diagnostic for these false returns is their speed. The Navy nicknames them the "ghost of Nansei-shoto" after the Japanese name for the Ryukyu Islands, of which Okinawa is one. (*Strange Company* 183–186)

1945, April — Ray Palmer publishes a second story by Richard Shaver, "Thought Records of Lemuria," in the June issue of *Amazing Stories.* Here it is revealed that Shaver's knowledge of the cave world and Lemuria isn't really a "racial memory," as the first story had asserted. Shaver, working in a factory, heard voices speaking to him, apparently through his welding gun. (Richard S. Shaver, "Thought Records of Lemuria," *Amazing Stories* 19, no 2 (June 1945): 16–52)

1945, April 3–4 — US B-29 bombers over Honshu, Japan, encounter numerous balls of light tagging along with them. (*Strange Company* 157–159)

1945, April 7 — Walter and Reimar Horten, German designers associated with wingless aircraft, are arrested by US troops near Göttingen, Germany. (Lance Cole, *Secret Wings of World War II: Nazi Technology and the Allied Arms Race*, Pen & Sword, 2015)

1945, April 7 — Mid-morning. Capt. Louis B. Sewell is serving as a navigator in a B-17 over the North Sea on the way to a bombing target near Berlin, Germany. Suddenly, out of the sun, an apparent German fighter dives at the aircraft from the side, leveling off for a swift attack. However, the object has no wings, and it rolls over into a dive without firing. Suddenly it stops in mid-air, and Sewell can see it against the sea below. The object then takes off at about 2,000 mph and disappears. Sewell's radio operator turns over several photos he took of the object to intelligence officers. (Harley D. Rutledge, *Project Identification,* Prentice-Hall, 1981, p. 250)

1945, April 10 — 11:00 p.m. James L. Landry [or Hendry] sees from his porch in Jeffersontown, Kentucky, a bright light that seems to be directly above Fisherville, 3 miles to the east. Its brightness fluctuates and it seems to be moving directly toward his location, casting a light beam downward. After 10 minutes, it goes out "like a snuffed candle." ("A Meteor?" *Louisville Times,* April 14, 1945; "Another Sky-Light," *Doubt* 13 (Winter 1945/1946): 195; Project 1947, "UFO Reports, 1945"; Clark III 1177; Clark IV 1352)

1945, April 10 — As part of the Manhattan Project, 18 people in the US are injected with plutonium in doses ranging from 95 to 5,900 nanocuries without their knowledge or consent. The intent is to study how plutonium is absorbed into the digestive tract. The last experiment is conducted on July 18, 1947. (Wikipedia, "Unethical human experimentation in the United States")

1945, April 12 — Roosevelt dies at Warm Springs, Georgia. Harry S. Truman is sworn in as president.

1945, April 17 — Maj. Gen. James P. Hodges writes a memorandum to Gen. Henry H. "Hap" Arnold, saying that infrared devices are now available to take photographs of "balls of fire" in the Pacific. (Project 1947, "UFO Reports, 1945")

1945, April 22 — The *USS Lewis Hancock* is northeast of Okinawa, Japan, when the SG radar picks up an unidentified target at 6 miles heading their way at 70–115 mph. Its movements are erratic. Two miles out, the ship identifies a "tight formation of more than fifty birds." (*Strange Company* 184)

1945, April 24 — The *USS Audubon* is headed for Okinawa, Japan, with US Army passengers and equipment. Radar operators pick up "unidentified aeroplanes" heading their way. The screens show a blip, alternately fuzzy and strong, some 8 miles away headed down the starboard side at 25 mph. Still, nothing can be seen visually, and the radar operator suggests that it is a flock of birds. (*Strange Company* 184–186)

1945, April 25 — 9:45 a.m. Acting Squadron Leader Kit Francis Williams of the RAF 617 Bomber Squadron is flying a Lancaster with 25 other aircraft to bomb Hitler's headquarters at Berchtesgaden, Germany, in the Bavarian Alps. Just after a turn near Kaiserslautern, Germany, at 16,500 feet, Williams witnesses an object like a large woolly blanket that takes up his entire windshield. He thinks it could be as much as 4–5 miles wide. It moves vertically and is gone in an instant. Suddenly his aircraft loses its electrical power and loses one of its bombs. He and his bomber and engineer get severe headaches. They return to base in England after regaining power. (Keith Basterfield, "Observation by Pilot over Germany, 1945," Unidentified Aerial Phenomena—Scientific Research, November 14, 2016)

1945, April 26 — Gen. Curtis LeMay's XXI Bomber Command's Air Intelligence staff produces a 5-page report representing the most up-to-date information and theories on the balls of fire seen in the Pacific theatre of war but

cannot find a good explanation for them. ("Balls of Fire," Twentieth Air Force, XXI Bomber Command, *Air Intelligence Report* 1, no. 8 (April 26, 1945): 9–14; *Strange Company* 162–163)

1945, April or May — Day. During the Okinawa campaign, "bright gold balls" moving in a straight line shoot over the island. Several battleship and destroyer radars track them moving at 600 mph. (Clark III 503; Clark IV 552)

1945, Late Spring — 10:30 a.m. Two brothers in St. James, Missouri, notice metallic disc with a clear dome hovering above the family garage. It is about 35 feet in diameter and 12 feet tall. A human-like being about 5 feet 6 inches tall is inside the dome, wearing brown coveralls. It seems to notice the witnesses and immediately touches something in front of it. The object moves forward with a hum like an electric motor. After a click, the object sways in the air. One of the brothers runs underneath it and sees on the underside an area with grille work, The craft takes off and follows the contour of the ground, picks up speed, and disappears over a hill. (Richard H. Hall, *From Airships to Arnold,* UFO Research Coalition, 2000, pp. 26, 31)

1945, May — German scientist Viktor Schauberger, who has been using inmates from the Mauthausen concentration camp to help him develop new aircraft and submarine engines, is captured by Allied forces in Leonstein, Austria. Supposedly his devices and documents, which allegedly include a prototype flying saucer, are kept under lock and key. He is released in March 1946 and moves to Linz, Austria, but the Americans do not confiscate his workshop and laboratory materials, although they prohibit him from further military experimentation. (Wikipedia, "Nazi UFOs")

1945, May 3 — Early morning. Nine B-24's with the 11th Bombardment Group's 431st Squadron are heading out on a bombing mission against Japanese air installations on Truk [now Chuuk] Atoll in Micronesia. One plane over Fala Island sees two objects at their altitude of 11,000 feet, changing from cherry red to orange then white, then dying out and turning cherry red again. Both follow the B-24 through all sorts of evasive actions. (NICAP, "May 2, Truk Atoll Sighting"; Jo Chamberlin, "The Foo Fighter Mystery," *American Legion Magazine* 39, no. 6 (December 1945): 9; "B-24 Sights Circles of Light," *UFO Historical Revue,* no. 2 (September 1998): 8; Richard H. Hall, *From Airships to Arnold,* UFO Research Coalition, 2000, pp. 25–26; *Strange Company* 163–165; Patrick Gross, "Foo Fighters: The Truk Atoll, May 2, 1945, Foo Fighter Incident")

1945, May 5 — A pregnant woman, Elsie Mitchell, and five children are killed when they discover a Japanese Fu-Go balloon bomb that has landed in the forest of Gearhart Mountain near Bly in southern Oregon. (Wikipedia, "Fu-Go balloon bomb"; "Mystery Blast Kills 6 Persons," *Spokane (Wash.) Spokesman-Review,* May 7, 1945, p. 1; "Blast Kills 6: Five Children, Pastor's Wife in Explosion," *Klamath Falls (Oreg.) Herald and News,* May 7, 1945, pp. 1, 6; Allan T. Duffin, "Project Fugo: The Japanese Balloon Bombs," *Military Heritage* 9, no. 2 (October 2007); Francine Uenuma, "In 1945, a Japanese Balloon Bomb Killed Six Americans, Five of Them Children, in Oregon," *Smithsonian Magazine,* May 22, 2019; Don Bourgeois, "Weaponized Chinese Balloon Not New, Oregon Attacked by Japan in WWII," *Portland (Oreg.) Tribune,* February 7, 2023)

1945, May 23 and 25 — Night. In the wake of two B-29 raids on Tokyo, Japan, both nights, businessman Iomoyo Okado looks up from his air raid shelter and sees slow-moving "roundish objects, like hot cakes, about 20 square yards" in diameter, and silent. They are blue or gray in color. ("'Flying Hot Cakes' over Tokyo in 1945," *St. Joseph (Mo.) News-Press,* July 12, 1947, p. 6; Clark III 503; Clark IV 552)

1945, May 25 — Early morning. Capt. Louis B. Sewell is flying a B-17 carrying some troops south over the Atlantic Ocean from Port Lyautey [modern Kenitra], Morocco, to Dakar, Senegal, when he notices a metallic, elliptical object at the same altitude about 5–10 miles distant. During the 8-hour flight, they all can see it 6 or 7 times through the clouds. At times, it hovers. (Harley D. Rutledge, *Project Identification,* Prentice-Hall, 1981, pp. 250–251)

1945, May or June — Day. The crew of a US Marine transport east of Okinawa sees, about a quarter of a mile from them, a long cigar-shaped object with three smaller metallic disks behind it. The disks disappear behind or into the cigar, which shoots off at high speed. (Clark III 503; Clark IV 552)

1945, Summer — After 5:00 p.m. Future ufologist Ann Druffel is on a bus returning from her summer job in Long Beach, California, when she sees out of the left-hand window a bright, stationary, yellowish-white light in the northeastern sky. It looks like Venus but has a yellow color. She gets off the bus and still watches it, walking home. Soon she sees it is moving slowly to the northwest. She gets her mother to view it as well. Druffel thinks it is too high to be a coastal defense balloon. Druffel watches it for 90 minutes, after which it takes on some "activity." Some 10–15 pieces of light begin separating from it, fading from view after moving several diameters away from the large object. (Ann Druffel, "UFO Sightings by UFO Researchers: The 'Inaccessible Cases,' Part 1," *MUFON UFO Journal,* no. 139 (September 1979): 14–15; Herbert S. Taylor, "Satellite Objects: A Further Look," *IUR* 29, no. 2 (Summer 2004): 3–4)

1945, Summer — Future ufologist Illobrand von Ludwiger sees an object like a black plate, whose diameter is one-eighth that of the Moon, flying against the wind below the clouds, in Stendal, Saxony-Anhalt, Germany. (Margaret Sachs, *The UFO Encyclopedia,* Putnam, 1980, p. 357)

1945, Summer — Radioman Robert S. Crawford and 13 other sailors aboard the US Army Transport *Delarof* see a large, dark sphere rise out of the ocean east of Adak in the Aleutian Islands, Alaska. The UFO, showing darkly against the setting sun, climbs almost straight up for a few moments, then it arcs into level flight, and circles the ship two or three times. All the observers are convinced it is a large object. Crawford estimates the UFO is 150–250 feet in diameter. The gun crews hold their fire. After several minutes, it disappears to the south. (NICAP, "Large Object Emerges from Sea near the *Delarof*"; "The Question of Submerging UFO's," *UFO Investigator* 4, no. 5 (March 1968): 4; Dolan, USO1, 115–117)

1945, Summer — Mrs. Helen Allen sees a "long, silver-colored cigar" that appears suddenly out of the haze above Crane Beach in Ipswich, Massachusetts. Huge and silent, it hovers low over the water not far from the shore. After a few seconds, it speeds away and disappears. (Lore and Deneault, p. 148)

1945, June 1 — The Army Air Force approves a Northrop-recommended change for installing eight jet engines in each of two modified YB-35 piston-driven flying wings, which are redesignated YB-49s. (Wikipedia, "Northrop YB-49")

1945, June 1 — 7:30 p.m. A shiny, tubular object, 5–6 feet long, is observed over Morganton, North Carolina. It streaks toward the northwest, blue flame shooting from the rear. After it vanishes in the mountains near Lake James, witnesses hear an explosion. (Vincent H. Gaddis, "Visitors from the Void," *Amazing Stories* 21, no. 6 (June 1947): 159–161; Loren E. Gross, *The Mystery of Unidentified Flying Objects—A Prelude, 1896–1949*, The author, 1971, p. 156; Clark III 1178; Clark IV 1352)

1945, June 9 — XXI Bomber Command Air Intelligence issues an Air Intelligence Report on the balls of fire in the Pacific Theatre. The Truk sighting is attributed to an unknown Japanese experimental aircraft, though not a jet. ("'Light' Follows B-24 from Truk," *Air Intelligence Report* 1, no. 14, June 8, 1945, pp. 13-14; *Strange Company* 177–180)

1945, July — The 9th Bombardment Group on Tinian in the Northern Marianas: "During our night missions in June and July a UFO phenomenon was reported. Our air crews started sighting balls of fire, i.e., glowing objects about the size of a full moon which flew around in the vicinity of our flying patterns over Japan. One of our crews reported that one of the objects followed their airplane halfway to Iwo Jima. I saw them on two missions. I don't remember any reports of any hostile action by these objects and the reports of sightings stopped after a couple of months. The object of these reports was dismissed by some experts as the planet Venus. And, after these reports started coming in, some crews did mistake the rising full moon as one of these balls of fire. Some reports speculated that these balls of fire were exhausts from a Japanese development called a Baka Bomb, but exhaust flames can only be seen from the rear; and these objects appeared to have the same size and intensity in whatever direction they were traveling. I have never heard of any official assessment as to what these objects were. I had an occasion to ask General LeMay about them several years after the war and he had no explanation. I am sure that what I saw was neither Venus nor the moon nor a Baka Bomb." (Lorenzen, *UFOs: The Whole Story,* Signet, 1969, p. 24; Henry C. Huglin, "Group Commander's Reminiscences," in Lawrence S. Smith, et al., *History of the 9th Bombardment Group (VH),* 9th Bomb Group Association, 1995, pp. 27–28)

1945, July — In northern Okinawa, Japan, on a bluff looking toward the South China Sea, Artillery Capt. William A. Mandel sees a cigar-shaped object with a lighted tail moving at eye level at about 200 –300 mph at an elevation of no more than 400 feet. He estimates its length at 30–40 feet and its diameter at 6–8 feet. (Project 1947, "UFO Reports, 1945")

1945, July — When several balloon-shaped objects appear above Selfridge Field [now Selfridge Air National Guard Base] near Mount Clemens, Michigan, the base commander asks for a volunteer to attack them as possible Japanese balloon bombs. Jean Kisling, serving with a Free French Air Force detachment as an instructor on P-47 Thunderbolts, accepts the challenge. He chases one "well beyond the service ceiling of the P-47D" and opens fire with 8 machine guns. The object shoots away sideways on edge, leaving a contrail. (Good Need, p. 24)

1945, July 1 — The Air Technical Service Command is moved into T-2 Intelligence. (Wikipedia, "Air Materiel Command")

1945, July 16 — The first detonation of a nuclear weapon (an implosion-style plutonium-based bomb) takes place at the Trinity site on what is now the White Sands Missile Range near Alamogordo, New Mexico. At this time, the bomb's price tag, adjusted for inflation, is $28 billion. (Wikipedia, "Trinity (nuclear test)")

1945, Mid-July — Noon. Pilot Roland D. Powell and five other Grumman F6F Hellcat pilots at Naval Air Station Pasco, Washington, are scrambled after radar reports a fast-moving object that is now stationary above the nearby Hanford nuclear facility. They see a bright object with a saucer-like appearance. It is the size of three aircraft

carriers, side-by side, oval shaped, very streamlined like a stretched-out egg, pinkish in color, and emitting some kind of vapor. It hovers in a fixed position at 65,000 feet and then goes straight up and disappears. (NICAP, "Huge Saucer over Nuclear Reactor—Radar/Visual"; Roland D. Powell, Byron D. Varner, and Walter Andrus, "UFO Sighting over Hanford Nuclear Reactor in 1945," *MUFON UFO Journal*, no. 344 (December 1996): 13–14; *Strange Company* 188; Patrick Gross, "Alleged UFO Intercept Attempt at Hanford Nuclear Plant, July 1945")

1945, July 20 — The Joint Chiefs of Staff establish Operation Overcast, a forerunner to Project Paperclip, a secret recruitment program to aid in postwar military research. The Joint Intelligence Objectives Agency is established to conduct the operation. (Wikipedia, "Operation Paperclip")

1945, July 24 — President Truman discloses to Soviet leader Joseph Stalin that the United States has atomic weapons. Stalin feigns little surprise, since he already knows this through espionage. (Gene Dannen, "Truman Tells Stalin, July 24, 1945")

1945, August — The Army Signal Security Agency persuades ITT, RCA, and Western Union to continue the wartime cable intercept program, both foreign and domestic, now called Project SHAMROCK. No courts, no warrants. It remains secret from Congress and the President. (Wikipedia, "Project SHAMROCK")

1945, August — 5:00 a.m. Ilona Johansson-Paasonen, staying in a sauna along lake Längelmävesi, Finland, wakes up and sees a 35-foot dazzling ball of fire streaking in her direction along the opposite shore. She throws herself to the floor, but when nothing happens she looks outside and sees a big dog, frozen in terror, its gaze fixed on the lake and a dark log-like object, 6 feet long, gliding through the water with a tall, slender man at the prow. He is dressed in a green coverall. On the other side another man sits steering an engine enclosed within a big glass bulb. (Ilona Johansson-Paasonen, "Humanoideja Längelmävedellä?" *Vimana* 1970, no. 3/4, pp. 22–24; Ilona Johansson-Paasonen, "Humanoids at Längelmävesi," *Flying Saucer Review Case Histories*, no. 13 (February 1973): 3–4; Clark III 266; Clark IV 306)

1945, August 6 — 8:15 a.m. An atomic bomb (a fission weapon containing 64 kilograms of Uranium-235, Little Boy) is detonated 1,900 feet above Hiroshima, Japan, by the *Enola Gay*. The weapon is considered very inefficient, with only 1.7% of its material fissioning, but it is enough to obliterate the city. Some 78,000 people die instantly or immediately afterward in the firestorm. By the end of the year, another 25,000 will also sicken and die from radiation exposure. (Wikipedia, "Atomic bombings of Hiroshima and Nagasaki")

1945, August 7 — During a press conference with the *Seattle Times*, Col. Franklin Matthias, officer in charge at the Hanford Engineer Works in Washington, admits the plant has had problems with aerial intrusions, but that radar has been installed and an arrangement made with the Navy to intercept any unidentified aircraft. (Project 1947, "UFOs over Hanford: Commander R. W. Hendershot")

1945, August 9 — 11:01 a.m. Another atomic bomb (an implosion-type plutonium weapon, Fat Man) is dropped on Nagasaki, Japan, by *Bockscar*. Although the bomb is more powerful than the one used on Hiroshima, its effects are confined by hillsides to the narrow Urakami Valley. At least 35,000–40,000 people are killed, and 60,000 others are injured. (Wikipedia, "Atomic bombings of Hiroshima and Nagasaki")

1945, August 10 — 3:00 a.m. Pianist Doris La Fountain is driving home along Market Street after finishing a concert at a night club in East Paterson [now Elmwood Park], New Jersey. She is accompanied by music store proprietor Thomas Brino and James Shaw of Clifton, New Jersey. For about 5 minutes they watch a brilliant red and green rectangular object maneuver at ground level about 70 feet away. It shoots off into the sky and disappears. ("Seeing Saucer Sweet Music to a Pianist," *New York Daily News*, September 8, 1957, Passaic-Bergen Sec., p. 22; Lore and Deneault, p. 145)

1945, August 16 — A UFO allegedly crashes near San Antonio, New Mexico, near the site of the first atomic test, and is discovered by Jose Padilla, 9, and Remigio Baca, 7, when they are looking for a cow. The crashed saucer has created a gouge, and they can see entities moving around inside. They collect two shiny metal parts from the periphery of the crash site. A recent analysis shows that the metal is of terrestrial origin. In a comprehensive analysis of the case in 2023, Douglas Dean Johnson shows that Padilla and Baca fabricated the story in 2003 in the hope to profit by it, hijacking the names of a real policeman (Eddie Apodaca) and a real governor (Dixy Lee Ray) as characters, and that Baca significantly changed his story over time. ("New Mexico UFO Crash Encounter in 1945," UFO Evidence; Remigio Baca, "San Antonio, NM August 1945 Crash Retrieval," in *3rd Annual UFO Crash Retrieval Conference Proceedings, November 4–6, 2005*, Wood and Wood, 2005, pp. 151–156; Paola Leopizzi Harris, "The Reme Baca and Jose Padilla Witness Case," The UFO Chronicles, November 30, 2010; Remigio Baca and Jose Padilla, *Born on the Edge of Ground Zero: Living in the Shadow of Area 51*, The Authors, 2011; Paola Harris, "Mystery at San Antonio, New Mexico, Crash Site," *MUFON UFO Journal* 578 (June 2016): 1, 11–15; John Greenewald, "Analysis of Two Metallic Parts Purportedly from a Crashed Unidentified Aerial Object (San Antonio, New Mexico, August 16, 1945)," The Black Vault, February 1, 2017; Jacques Vallee and

Paola Leopizzi Harris, *Trinity: The Best-Kept Secret*, StarWorksUSA, 2021; Kevin D. Randle, "*Trinity: The Best Kept Secret*—A Critique," A Different Perspective, June 2, 2021; Jacques Vallée, "The Other Lessons of Trinity," Trinity blog, December 6, 2021; Kevin D. Randle, "Jacques Vallée and Ten Unexplained UFO Cases and Metallic Debris," A Different Perspective, December 16, 2021; Douglas Dean Johnson, "Crash Story: The Trinity UFO Crash Hoax," Mirador, May 1, 2023; Douglas Dean Johnson, "Crash Story File: Eddie Apodaca, the Real Policeman Who Cracked the Trinity UFO Crash Case," Mirador, May 1, 2023; James Clarkson, "Trinity 1945 UFO Hoax," James Clarkson UFO Investigations, May 8, 2023; Jacques Vallée, "Jacques Vallée Hits Back at Hoax Claims over Trinity UFO Crash Book," Journo Jottings, May 15, 2023; Douglas Dean Johnson, "Crash Story File: The Reme Baca Smoking-Gun Interview," Mirador, May 20, 2023; Douglas Dean Johnson, "Crash Story File: 'Witness' Credibility Implodes for Jacques Vallée's Trinity UFO Crash Tale," Mirador, January 25, 2024; "A UFO Sighting and the Creatures Seen by One Man in the Summer of 1945: 'They Walk Like Us,'" CBS News Los Angeles, August 21, 2024; Clark IV 1288–1293, 1391)

1945, August 21 — Manhattan Project physicist Harry Daghlian is conducting an after-hours experiment at the remote Omega Site of the Los Alamos Laboratory in New Mexico when his hand slips. The test assembly he has built—a ball of plutonium surrounded by tungsten carbide bricks—goes critical. He sees a momentary blue flash and is struck by a wave of gamma and neutron radiation amounting to more than 500 rem. He disassembles the experiment, walks away, and admits himself to medical care. He falls into a coma and dies on September 15, the first person to die accidentally from close exposure to nuclear fission. ("Atomic Bomb Worker Died 'from Burns,'" *New York Times,* September 21, 1945, p. 10; Adam Higginbotham, *Midnight at Chernobyl,* Simon & Schuster, 2019, pp. 30–31)

1945, August 28 — Twelve 5th Air Force intelligence specialists flying on a C-46 approaching Iwo Jima (in the Ogasawara Islands, Japan) see three white, teardrop-shaped objects paralleling the plane. Navigational needles go wild, the engine sputters, and the plane falters until the objects speed away. One of the passengers is future UFO investigator Leonard Stringfield. (NICAP, "C-46 Encounters Objects / Magnetic Compasses 'West Wild'"; Leonard H. Stringfield, *Inside Saucer Post…3-0 Blue*, The Author, 1957, pp. 7–8; Stringfield, *Situation Red,* Fawcett Crest, 1977, pp. 9–10; *Strange Company* 191–193, 209–211; Clark III 503–504; Clark IV 552–553)

1945, September — The first group of seven German rocket scientists arrive at Fort Strong in Boston harbor, Massachusetts, through Operation Overcast: Wernher von Braun, Erich W. Neubert, Theodor A. Poppel, August Schultze, Eberhard Rees, Wilhelm Jungert, and Walter Schwidetzky. By the end of the year, they and two other groups are moved to Fort Bliss, Texas, and White Sands, New Mexico, as "War Department Special Employees." (Wikipedia, "Operation Paperclip")

1945, September — The US Army atomic bomb production unit, Z Division, named for its director, Jerrold R. Zacharias from Los Alamos, New Mexico, moves to Oxnard Field, New Mexico, from Wendover Field [now Airport], Utah, to be closer to Los Alamos. This marks the beginning of Sandia Base [now part of Kirtland AFB]. Nearby Kirtland Field is used as a B-29 base for aircraft compatibility and drop tests. By October, all the staff and facilities at Wendover are transferred to Sandia. As reservist officers are demobilized, they are replaced by about 50 hand-picked regular officers. (Wikipedia, "Manhattan Project")

1945, September — Policy adviser Ferdinand Eberstadt writes for Secretary of the Navy James Forrestal a report recommending a complete realignment of national security organizations. (Wikipedia, "Eberstadt Report")

1945, September 20 — The OSS is dissolved by Executive Order, effective October 1, scattering personnel through the Departments of State and War. The Research and Analysis Branch is transferred to the State Department. The War Department takes over Secret Intelligence (SI) and Counter Espionage (X2), which are rolled up into the Strategic Services Unit (SSU) headed by Brig. Gen. John Magruder, the former OSS Deputy Director of Intelligence who oversees the OSS liquidation. Most of the other personnel are cashiered. (Wikipedia, "Office of Strategic Services")

1945, September 26? — Night. Machinist Mate First Class George M. Reynolds, attached to the submarine tender *USS Beaver* with Submarine Squadron 45, anchored in Buckner Bay, Okinawa, Japan. He is on the main deck when he sees a bluish light move to the south, turn right, go over to the west, stop, and stand still. When it moves again, it goes back to the general area it started from. (*Strange Company* 195–196)

1945, September or October — Sailors aboard the Liberty Ship *James S. Lawson* 8 miles off the coast of Costa Rica see an orange disk that appears 50 feet away and 20 feet below the surface. For 20 minutes the object maintains its position on the starboard side of the ship, pacing it. It appears to be 25–30 feet in diameter. After 20 minutes, it accelerates and disappears in the water. (Carl Feindt, "Report #1640: A Letter to Ivan T. Sanderson," waterufo.net; Dolan, USO1, 117–118)

1945, Fall — Around 6:00 a.m. Two girls in Rainsville, Alabama, wake up to a swooshing sound and notice the trees outside are shaking. They see a large, half-moon-shaped object, positioned on its side, fly overhead. It ascends into fog over a nearby valley and disappears. (Clark III 1179; Clark IV 1353)

1945, October — 8:00 p.m. While driving a car between Bryan and Stryker, Ohio, Gerald M. Kryling and his wife Thelma approach a bright light about 50 feet in the air and 20 feet from the road near some high-tension wires. It appears to be a 35-foot oval object with an amber-colored opening like a window that has shadows moving around inside. It takes off horizontally at great speed and then moves straight up. (Clark III 266; Clark IV 306)

1945, October 1 — Project RAND is set up under special contract to the Douglas Aircraft Company and begins operations in December. Its first president is Douglas executive Franklin R. Collbohm. The name is derived from Research and Development, and its purpose is to act as a channel of scientific and technical information to the US military. (Wikipedia, "RAND Corporation")

1945, October 9 — Brig. Gen. George C. McDonald, AAF director of intelligence, writes to Maj. Gen. Elwood Richard Quesada in answer to a request for the investigation into wartime "balls of fire." Exhaustive investigations of German technical personnel and US and UK sources reveal no confirmation of German involvement with the phenomena. (Macdonald–Quesada correspondence, October 1945)

1945, November — Operation Overcast is renamed Project Paperclip. (Wikipedia, "Operation Paperclip")

1945, December — Lt. Col. Jo Chamberlin's article on foo fighters appears in *American Legion Magazine.* Intelligence officers have ordered him not to state his military rank or position, but he is a special aide to Gen. Henry H. "Hap" Arnold. (Jo Chamberlin, "The Foo Fighter Mystery," *American Legion Magazine* 39, no. 6 (December 1945): 9, 43–47; "Foo Fighter Archive Donated to UHR," *UFO Historical Revue*, no. 17 (December 2015): 2–8)

1945, December 5 — A training flight (Flight 19) of five TBM Avenger torpedo bombers disappears while over the Atlantic Ocean. The squadron's flight plan is scheduled to take them due east from Fort Lauderdale, Florida, for 141 miles, north for 73 miles, and then back over a final 140-mile leg to complete the exercise. The flight never returns to base. A report by Navy investigators concludes that flight leader Lt. Charles C. Taylor mistook small islands offshore for the Florida Keys after his compasses stopped working, resulting in the flight heading over open sea and away from land. The report is later amended by the Navy to read "cause unknown" to avoid blaming Taylor for the loss of five aircraft and 14 men. One of the search-and-rescue aircraft deployed to look for them, a PBM Mariner with a 13-man crew, also disappears. The report attributes the loss of the PBM aircraft to an explosion in midair while searching for the flight. According to contemporaneous sources, the Mariner has a history of explosions due to vapor leaks when heavily loaded with fuel, as it might have been for a potentially long search-and-rescue operation. A tanker off the coast of Florida sees an explosion and a widespread oil slick when fruitlessly searching for survivors. The weather is becoming stormy by the end of the incident. None of the Avenger bombers have been found. (Wikipedia, "Flight 19"; Larry Kusche, *The Bermuda Triangle Mystery—Solved*, Harper & Row, 1975, pp. 97–122; Larry Kusche, *The Disappearance of Flight 19*, Harper & Row, 1980)

1945, December 25 — A witness is standing on the shore during a blizzard on a small island off the west coast of Ireland, waiting for a boat that will return him to the mainland, when a silver domed object with a square base descends from the clouds and lands on the water. It is surrounded by purple lights and emits a whirring noise, resembling a drill. The object rises again and lands in a field, crushing two cows. The top of the craft slides open, and two humanoid figures with "squarish legs" and wearing gray-black rubber suits emerge. One of them walks across the water to the shore, placing a large vial on the ground. The other fires a red ray at a cow, burning through it. A farmer's dog approaches, barking, but the humanoid points a "box with lights and antennae" at it, hypnotizing the dog. The dog then walks up to the UFO and is taken aboard. Five or six similar craft streak overhead as a mist envelops the UFO. Both beings float back into the craft. Before leaving, one of the beings notices the witness and waves. Startled, the witness runs away. The farmer later advises the witness to keep the experience a secret. (Mark Malony, "A New Irish Close Encounter Report," *Irish UFO News*, no. 2 (July 1976): 5–6; "Northern Ireland Report, Part 2," *Northern UFO News*, no. 31 (December 1976): 4)

1946

1946 — The US nuclear stockpile consists of 9 atomic bombs. (Ryan Crierie, "U.S. Nuclear Stockpile, 1945–2009")

1946 — Dancers on the roof of a nightclub in Istanbul, Turkey, watch the rapid passage of four square-shaped lights, reddish in color and aligned side by side, moving from the east and disappearing in the west in less than 60 seconds. One witness, meteorologist and RAF pilot George Raymond Leatherbarrow, estimates their altitude at

50,000 feet based on reflections on cirrus clouds. (G. R. Leatherbarrow, "Two Early UFO Cases from the Middle East," *Awareness* 5, no. 3 (Autumn 1976): 4–5; Clark III 1177; Clark IV 1352)

1946 — American astrophysicist Charles Greeley Abbot writes that he thinks Earth might make contact with Venusians, coming into "fluent communication by wireless with a race brought up completely separate, having their own systems of government, social usages, religions, and surrounded by vegetation and animals entirely unrelated to any here on earth." (Charles Greeley Abbot, *The Earth and the Stars*, Van Nostrand, 1946, p. 110; Roger D. Launius, "Venus-Earth-Mars: Comparative Climatology and the Search for Life in the Solar System," *Life* 2, no. 3 (2012): 255–273)

1946 — A space vehicle allegedly crashes near Great Falls, Montana, and is retrieved by the military. Alien bodies are shipped to Muroc Army Air Force Base [now Edwards AFB] in California. (James J. Hurtak, "The Occupants of Crashed 'Saucers,'" *The UFO Register* 10, no. 1 (December 1979): 2–3; Clark 343; Clark IV 379)

1946 — A farmer named Gunyon in Westerham, Kent, England, calls the British Technical Intelligence staff asking that the Air Ministry come and remove one of these "darned contraptions" which has fallen on his farm. The intelligence officers ask for directions and are told to drive from Croydon to Westerham, turning onto a lane when they reach a pub called The White Dog. Amid great security, two staff cars are dispatched, but fail to find the farm. They locate a pub called The White Hart and a farmer named Bunyan, who strenuously denies having made the call. Although the incident appears to be a hoax, few people can reach the Technical Intelligence staff and convince them to make a field visit. Indeed, the intelligence officers believe that former Air Intelligence scientist Reginald Victor Jones, who has been skeptical of foo fighters and ghost rockets, is behind the affair. Jones writes that a signal is received from Gen. Douglas MacArthur's staff in Tokyo, asking for confirmation of a report that a Russian flying bomb had recently crashed in England. The other Director of Intelligence on the Air Staff, Air Commodore Roland Eugene Vintras, suggests to Jones that this might tie in with the "Westerham Incident." (R. V. Jones, *Most Secret War*, Hamish Hamilton, 1978, pp. 507–513; "UFO Britannia: Part 2—World War Foo and Post War Cover Ups," Above Top Secret forum, December 19, 2012)

1946 — 3:30 a.m. May Ackerman is awakened by a brilliant light shining in her bedroom in northwest Detroit, Michigan. It comes from a silent, luminous oval object with a transparent band across its midsection that is hovering in her neighbor's yard. Inside the band is a humanoid. The object departs abruptly. ("West Side Detroit Woman Sights Strange Craft and 'Navigator' in 1946," *Vimana* 1, no. 1 (October 1954): 2, 4; Clark III 266: Clark IV 306)

1946, Winter — Night. Ralph Newman and his wife are waiting at a bus stop in Darien, Connecticut, when they notice an object with a rocket-like exhaust moving silently from horizon to horizon from north to south. (Clark III 530; Clark IV 579)

1946, January 10 — The Air Materiel Command at Wright Field, Ohio, issues a restricted-access document, *German Flying Wings Designed by Horten Brothers* by Capt. N. LeBlanc, detailing the drawings, photos, models, and documents relating to aircraft designed by Nazi aircraft designers the Horten brothers that were recovered in Germany by Allied forces. (N. LeBlanc, *German Flying Wings Designed by Horten Brothers*, Air Material Command, Technical Intelligence summary report no, F-SU-1110-ND, January 10, 1946; Col. H. M. McCoy to Maj. Gen. George McDonald, "Flying Disc," September 24, 1947; H. P. Dabrowski, *The Horten Flying Wing in World War II: The History and Development of the Ho 229,* Schiffer, 1991; Kevin D. Randle and Donald R. Schmitt, "Roswell and the Flying Wing," *IUR* 18, no. 4 (July/Aug. 1993): 3; John Powell, "The Horten Flying Wings," War Bird Forum, July 2019)

1946, January 10 — 11:58 a.m. Harold D. Webb and Herbert P. Kauffman, scientists at Project Diana conducted by the US Army's Evans Signal Laboratory at Fort Monmouth, New Jersey, use a modified SCR-271 radar operating at 110 MHz with 3 kW peak-power to bounce radar echoes off the Moon. USAF Maj. Gen. Harold M. McClelland remarks to the press that this could be an "opening step" in communicating with intelligent life outside the Earth. (Wikipedia, "Project Diana"; Jack Gould, "Contact with Moon Achieved by Radar in Test by the Army," *New York Times*, January 25, 1946, p. 1; "Radar May Discover Life Existing on Other Planets," *Greensboro (N.C.) Daily News*, January 26, 1946, p. 1; Trevor Clark, "How Diana Touched the Moon," *IEEE Spectrum* 17 (May 1980): 44–48)

1946, January 18 — 11:00 p.m. A US C-54 transport plane is at 7,000 feet over the French countryside on its way to Paris, France. Suddenly the pilot sees a brilliant "shooting star" about 35° above the horizon. It streaks down below the eastern horizon, then reappears and moves in a hyperbola before falling again. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 1; Clark III 523; Clark IV 573)

1946, January 22 — President Truman creates a National Intelligence Authority (State, War, Navy, Chief of Staff, and a presidential representative with the DCI as a non-voting member) for policy and coordination and a Central

Intelligence Group for operations under it. Rear Adm. Sidney Souers heads the CIG as Director of Central Intelligence. (Wikipedia, "National Intelligence Authority")

1946, February 21 — 8:30 p.m. One or more meteors are seen in west Finland and the counties of Västerbotten, Västernorrland, Kopparberg [now Dalarna], Gävleborg, Uppsala, Östergötland, and Skaraborg [now Västra Götaland] in Sweden. It supposedly sets a farmhouse on fire in Vaasa province, Finland. It leaves a long trail of smoke in the sky. (Archives for the Unexplained, "Case XXX: The Meteor That Did Not Start a Fire")

1946, February 22 — Diplomat George F. Kennan, deputy chief of the US State Department mission in Moscow, has tried repeatedly to persuade President Truman and policymakers to abandon plans for cooperation with the Soviet government in favor of a sphere of influence policy in Europe. He sends a 5,363-word telegram (the "Long Telegram") to Secretary of State James F. Byrnes outlining a new strategy of containment of the Soviet menace by applying "counterforce at a series of constantly shifting geographical and political points." (Wikipedia, "X Article")

1946, February 27 — Scientists Ernst Henry Krause, James Van Allen, Fred Lawrence Whipple, and six others meet at Princeton University to organize the Upper Atmosphere Research Panel (V-2 Panel), a group that will oversee meteorological and astronomical experiments at White Sands Proving Ground in New Mexico using V-2 rockets brought to the US after World War II. Ohio State University astronomer J. Allen Hynek joins the team shortly afterward as a consultant. (Wikipedia, "Upper Atmosphere Research Panel"; David DeVorkin, "Organizing for Space Research: The V-2 Rocket Panel," *Historical Studies in the Physical and Biological Sciences* 18, no. 1 (1987): 2; O'Connell 33–35; Graff 33–35)

1946, March — The Air Technical Service Command becomes the Air Materiel Command. (Wikipedia, "Air Materiel Command")

1946, March 5 — 6:00 p.m. João Prestes is returning on foot from a fishery on the banks of the Tietê River to his sister's home in Araçariguama, São Paulo, Brazil. As he is entering the house, a light from outside strikes and envelopes him. He becomes dizzy and confused but manages to get up and go inside. He summons Araci Gomide, a nurse who has served in the military with him. Gomide describes his friend as being literally cooked, with his flesh detaching from his bones, injuries on his feet and ankles, and his feet clenched like the claws of a bird. His arms are burned and the flesh on his fingers is falling off. His chest, neck, and face also seem to be burned but not charred or red. Prestes dies on the way to a hospital in Santana di Parnaíba at 3:00 a.m. (Felipe Machado Carrión, "The Terrible Death of João Prestes at Araçariguama," *Flying Saucer Review* 19, no. 2 (March/April 1973): 14–15; Clark III 166–167; Brazil 17–21; Pablo Villarubia Mauso, "The Incredible Saga of João Prestes," UFO Casebook; Pablo Vilarrubia Mauso, "Horror em Araçarighama," Portal Fenomenum, February 21, 2022; Clark IV 193–194)

1946, March 6 — The Western Defense Command is deactivated. (Wikipedia, "Western Defense Command")

1946, April 2 — The Strategic Services Unit is transferred to the new Central Intelligence Group and becomes the Office of Special Operations. (Wikipedia, "Strategic Services Unit")

1946, April 14 — Dusk. Paul Cummings Jr. is driving east on US Highway 136 about 10 miles east of Havana, Illinois, with Douglas Gowdy. A bright orange ball appears in the road about 1 mile ahead, gliding down the highway only one foot above the pavement and possibly touching both shoulders of the road. When it is within 2,000 feet, Cummings pulls the car over and stops, and they rush out to lie down in a ditch, fearing an explosion. When they look up again, the object is nowhere in sight. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 26–27)

1946, April 25 — While ice fishing at Anima Nipissing Lake, Ontario, Don Cameron and his family watch 12–14 small disc-shaped objects descend at a 45° angle about 75 feet away. They come spinning down on the ice, rise 2 feet into the air, then come down again. Cameron walks toward them, and they ascend and shoot away at the same angle and direction. They find black marks on the snow and ice. (Clark III 1179; Clark IV 1353)

1946, April or May — Around 12:00 noon. Richard R. Hill and Stanley Ogdrzyiak are driving in an open convertible on the Country Club Road near Lafayette, New York. Suddenly they see a gleaming, metallic, cigar-shaped object in the sky. It remains motionless at 5,000–10,000 feet altitude, which at that height would make it 300–400 feet long. After 2 minutes, it disappears instantaneously. ("Case 84," *CRIFO Newsletter* 2, no. 3 (June 3, 1955): 4; Clark III 1179; Clark IV 1353)

1946, May — Day. Navy Lieutenant Andrew A. Titcomb is on leave and picking oranges at his wife's family home at La Grange, north of Titusville, Florida, when he hears a whistling noise and sees a dark "flying football" directly

overhead at about 1,000 feet elevation moving at 125 mph. It appears 15–20 feet in diameter and flies in an arc to the southeast. It disappears in a cloudbank. (UFOEv, p. 6; Clark III 1179; Clark IV 1353)

1946, May 2 — Project RAND releases its first report, *Preliminary Design of an Experimental World-Circling Spacecraft,* which is a proposal for a US satellite program. Engineers Robert M. Salter, James Everett Lipp, and one other person at RAND serve as the editors of the report. It states that "The achievement of a satellite craft would produce repercussions comparable to the explosion of the atomic bomb." (Wikipedia, "Preliminary Design of an Experimental World-Circling Spaceship")

1946, May 13 — The Soviets establish a rocket center called NII-88 [now TsNIIMash] at Kaliningrad [now Korolyov], Russia, northeast of Moscow. Missile designer Sergei Korolev is appointed chief designer of Section 3 on long-range missiles. Stalin declares Korolev's name a secret, which it remains until his death in 1966. Russia keeps dozens of its captured German scientists here, working on special projects until 1955. (Wikipedia, "TsNIIMash")

1946, May 13 — A rocket is seen traveling over Helsinki, Finland, in a southwesterly direction at 1,000 feet. It supposedly moves at supersonic speed, emitting a magnesium-like light and a trail of smoke. (Jan L. Aldrich, comp., *The Ghost Rocket File*, Fund for UFO Research, 2000, p. 10)

1946, May 18 — 10:45 p.m. Gösta Carlsson, later to become founder and owner of Cernelle AB, is walking in the forested area of Kronoskagen near Ängelholm, Sweden, when he sees a disc-shaped machine more than 50 feet in diameter. On the top is a cupola with oval windows, and beneath it are an oblong "fan," two legs, a small ladder, and openings. A man dressed in a white, one-piece outfit gestures to Carlsson to stop. Two other occupants, three of them women, all wearing suits and transparent helmets, are nearby. One of the males points a boxlike device at the witness, who leaves the scene but returns by a different route 30 minutes later, just in time to see the UFO depart. A concrete model of the UFO is dedicated in 1963 as a memorial. (Wikipedia, "Ängelholm UFO memorial"; Sven-Olof Fredrickson, "The Ängelholm Landing Report," *Flying Saucer Review* 18, no. 2 (Mar./Apr. 1972): 15–17; Anders Liljegren, "High-Quality Investigation of 1946 CEIII Case," *AFU Newsletter*, no. 38 (March 1995): 2–3; Clark III 528–529; Clas Svahn, "Gösta Carlssons möte," Riksorganisationen UFO-Sverige, July 10, 2018; Håkan Blomqvist, "UFO-Sweden Memories: Ängelholm 1996," Håkan Blomqvist's Blog, July 1, 2020; Clas Svahn and Gösta Carlsson, *Mötet i gläntan: Sveriges mest kända närkontakt med UFO,* 3rd ed., Parthenon, 2021; Clark IV 306, 577–578)

1946, May 21 — Two motorists report an elongated craft resembling a rocket or Zeppelin over Stora Mellösa, Sweden. One of the witnesses sees two short wings, although the other cannot see any despite watching the object for 5 minutes. (Swords 12)

1946, May 24 — 2:20 a.m. Witnesses in Landskrona, Sweden, see a wingless, cigar-shaped object, spurting sparks from its tail. About 300 feet above the ground, it is moving at airplane speed toward the southwest. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 1; Göran Jansson, "Spökraketerna 1946," January 2005, p. 6; Clark III 524; Clark IV 573)

1946, May 28 — The *Aftonbladet* newspaper in Stockholm, Sweden, is the first to use the term "Spökraket" (ghost rocket) in a headline. ("Spökraket jagades i bil genom Roslagen," *Aftonbladet*, May 28, 1946; Swords 12)

1946, May 31 — 11:43 a.m. A huge, metallic, wingless cigar moves rapidly at 1,000 feet altitude over Katrineholm, Sweden. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 2–3; Clark III 524; Clark IV 573)

1946, Summer — Late evening. Two women on a walk in Johannesburg, South Africa, see an aerial object hovering 5 feet above the roof of a nearby hotel. It is shaped like a saucer with a round, golden ball in the center, evenly split between the top and bottom sections. They hear a clicking noise, and the ball drops through the saucer until it is level with the roof. More clicks are heard, and the ball rises through and above the saucer 8–9 feet. In the space between the ball and the disc the witnesses see two figures larger than normal height (7 feet), fair-complexioned and broad-shouldered, with short wavy hair. They are wearing white uniforms with stiff collars and stand motionless until the object floats away and is lost to view. (John Judge, "Near-Landing in 1946 in Johannesburg," *Flying Saucer Review* 24, no. 5 (March 1979): 14–16; Clark III 266; Clark IV 306)

1946, Summer — Day. Eleanor Hancock is in Colorado Springs, Colorado, looking southwest toward Cheyenne Mountain when two shining silver objects appear, moving rapidly in tandem from east to west toward the escarpment. Just before they reach the mountain, they turn sharply upward, still in formation, and disappear. (Clark III 1179; Clark IV 1353)

1946, June 6 — The Joint Research and Development Board is created by the Secretaries of War and the Navy to coordinate research efforts. (Joint Research and Development Board, Organization Authority Record, June 6, 1946)

1946, June 9 — Night. An enormous light drops earthward over Sala, Sweden, leaving a long, fiery trail. An explosion is heard. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 3; Clark III 524; Clark IV 573)

1946, June 9 — 10:17 p.m. A rocket-like light passes over Helsinki, Finland, at 10,000 feet leaving a smoke trail and making a distant rumble. A luminous afterglow lasts 10 minutes. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 3; ; Clark III 524; Clark IV 573)

1946, June 10 — Lieut. Gen. Hoyt Vandenberg replaces Souers as director of the CIG. He expands it and wins the right to collect intelligence in Latin America. (CIA Historical Staff, *Chronology 1946–65*, vol. 1, 1946–1955, p. 9)

1946, June 12 — The Swedish Defense staff secretly orders reports of unknown rockets to be collected by military and civilian defense units in Sweden. (Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 33; Clark III 527; Clark IV 576)

1946, June 18 — A first-strike scenario, the Pincher war plan, is created by the US military to strike Moscow and the Caucasus with 50 nuclear weapons if the Soviets invade the Middle East. It is never officially approved, but the Joint Chiefs agree to use it for planning purposes. (Phillip S. Meilinger, "The Early War Plans," *Air Force Magazine*, December 1, 2012)

1946, June 25 — A four-engine Northrop XB-35 flying wing bomber makes its first test flight from Jack Northrop Field [now Hawthorne Municipal Airport] to Muroc Army Air Field [now Edwards AFB] in California. (Wikipedia, "Northrop YB-35")

1946, June 26 — The commander of the military district in Morjärv, Sweden, issues instructions on how to report incidents with "certain kind of light phenomena' that might be associated with "tests made by foreign powers with guided weapons." (Swords 12).

1946, July — *Amazing Stories* publishes four short articles in its September 1946 issue by William C. Hefferlin, each describing a wonderful new invention that has come to the author, according to editor Ray Palmer, "from Tibet by mental telepathy." One of the inventions is a "circle-winged airplane." In later issues, Hefferlin and his wife Gladys go on to describe the Rainbow City, an underground Martian city beneath Antarctica where the flying saucers originate. (W. C. Hefferlin, "What Man Can Imagine: The 'Ghyt' Motor," *Amazing Stories* 20, no. 6 (September 1946): 142–143; W. C. Hefferlin, "Burn Water for Fuel," *Amazing Stories* 20, no. 6 (September 1946): 144–145; W. C. Hefferlin, "Power!" *Amazing Stories* 20, no. 6 (September 1946): 150–151; W. C. Hefferlin, "Circle-Winged Plane," *Amazing Stories* 20, no. 6 (September 1946): 157; "A Description of Rainbow City from the Hefferlin Manuscript (Hollow Earth)"; Walter Kafton-Minkel, *Subterranean Worlds*, Loompanics, 1989, pp. 160–167; Clark III 610; Clark IV 669)

1946, July — Day. A long, silver-colored cigar appears suddenly out of the haze over Crane Beach, Ipswich, Massachusetts, moves noiselessly over the water, then disappears suddenly. (Lore and Deneault, p. 148; Clark III 1179; Clark IV 1353)

1946, July — 2:00 p.m. Hans Sorensen is cycling near Viskinge, Denmark, when he sees three discs flying silently overhead. The underside is uneven and dull gray, but they are like "polished mirrors" on top. (*Sjællands Tidende* (Ringsted, Denmark), April 17, 1971; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 16; Clark III 528; Clark IV 577)

1946, July 1 — Able nuclear test, Bikini Atoll, Marshall Islands. Radio-controlled autopilots are installed in eight B-17 bombers, converting them into remote-controlled drones that are then loaded with automatic cameras, radiation detectors, and air sample collectors. Their pilots operate them from mother planes at a safe distance from the detonation. The drones can fly into Able's mushroom cloud, which would have been lethal to crew members. (Wikipedia, "Operation Crossroads")

1946, July 3 — The Joint Research and Development Board is established. Essentially it is Vannevar Bush's existing cadre of brain trust from the still active Office of Scientific Research and the postwar Joint New Weapons Committee. Added to this are other reconstituted R&D committees and advisers like Lloyd Berkner of the Carnegie Institution of Washington. The original founding members are physicist Alfred Lee Loomis, biologist Caryl Parker Haskins, physicist Luis Walter Alvarez, physicist William Shockley, and Georges Doriot. Two military representatives each from the Army, Navy, and Air Force complete the board's membership. Counting Bush, this makes a board of 12. (Michael Hall and Wendy Connors, "The Research and Development Board: Unanswered Questions," *IUR* 26, no. 2 (Summer 2001): 7–8)

1946, July 6 — A special ghost rocket investigations committee is formed with Col. Bengt Jacobsson from the Royal Swedish Air Force Materiel Administration as chairman. Other members are Henry Kjellson and Eric Malmberg from the Air Administration; Maj. Nils Ahlgren and Capt. Gerdt Stangenberg from the Air Defense department; chemist Gustaf Ljunggren; physicist Martin Fehrm; and Olof Kempe from the Defense Radio Institute. They hold

at least 12 meetings, beginning on July 10. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 13; Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 33; Swords 12; Clark III 527; Clark IV 576)

1946, July 6 — Astronomer Bertil Lindblad, after consulting with the Swedish Defense staff on ghost rocket reports, remarks that the "adjective 'cigar-shaped' is something new." (Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 33)

1946, July 9 — A journalist finds three dubious fist-size fragments, one of iron and the other two slag-like, after a bright projectile is seen over a beach at Njurunda, Sweden. (Göran Jansson, "Spökraketerna 1946," January 2005, p. 12; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 14)

1946, July 9 — 2:30 p.m. Erik and Asa Reuterswärd take a photo of a greenish-white daylight meteor by a lake at Guldsmedshyttan, northwest of Lindesberg, Sweden. They are atop a forest watchtower and have a good view of the object. The image is circulated to newspapers throughout Sweden; however, the photo probably shows an unusual daylight meteor, not a ghost rocket. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 5–6; Clas Svahn, "The 1946 Ghost Rocket Photo," *IUR* 27, no. 3 (Fall 2002): 12–14, 23; Göran Jansson, "Spökraketerna 1946," January 2005, p. 12; Swords 13–14; Clas Svahn, "Spökraketerna: Den Största Gåtan," Riksorganisationen UFO-Sverige, March 7, 2017;)

1946, July 9 — 2:30 p.m. Two people on the north side of Vaxön, Sweden, watch a glowing white object with a blue-white tail streak across the sky in about 2 seconds, disappearing to the southeast. Around the same time, a witness at Järna Station in Södertälje sees an object "like a glass flask in a thermos" descending from a high altitude. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 6; Clark III 524; Clark IV 573)

1946, July 9 — 2:30 p.m. A member of the US legation sees a silent ghost rocket falling rapidly over Stockholm, Sweden, according to a July 11 telegram from State Department official Christian M. Ravndal to Washington, D.C. Hundreds of other observations take place over central Sweden. Ravndal suggests that the Soviets are trying to intimidate the Swedes. (Good Above, p. 20; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 6, betw. 12–13; Göran Jansson, "Spökraketerna 1946," January 2005, p. 11; Clark III 524, 527; Clark IV 573, 576)

1946, July 9 — 2:35 p.m. Efrain Johnson sees a strange, cigar- or sugarloaf-shaped object to the east of Ockelbo, Sweden. It shines like silver and appears "like some glistening mass." It falls to the ground and is gone in a few moments. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 6; Clark III 526; Clark IV 575)

1946, July 9 — About 3:00 p.m. A housewife near Sörbo, Sweden, is washing on the shore of Södra Barken when she sees a falling object coming from the northeast. It changes color from blue to green and has a long tail. It tumbles into the lake about 320 feet away. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 6–7; Clark III 526; Clark IV 575)

1946, July 9 — 3:30 p.m. A young man in Mockfjärd, Sweden, sees a silver-colored star diving toward the ground with a whistling noise. It comes down about 490 feet away from him, and he is blinded by the intense light. He thinks it crashes into Mt. Landholm. A powerful burning smell lingers for 15 minutes. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 7; Clark III 526; Clark IV 575)

1946, July 9 — 3:35 p.m. Many people see a bright red, rocket-like object moving swiftly over Turku, Finland, and leaving a short trail. It casts shadows on the ground. (A. Mauritz Hietamaki, "Some Little-Known UFO Reports from Finland," *Awareness* 5, no. 3 (Autumn 1976): 5; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 7; Clark III 524; Clark IV 573)

1946, July 10 — A brilliantly glowing projectile trailing luminous smoke crashes into a beach near Norrvikssand, Sweden. Airline pilot Torvald Linden and other witnesses find a shallow crater a little more than 3 feet in diameter. A mass of slag-like material, some of it reduced to powder (which burns the hands when touched) is found at the site and collected into bags. A journalist from *Svenska Dagbladet* on July 11 finds a "burnt-brown object with a hollow cylinder" with a diameter of about 1–2 inches. Military authorities take over the site. The debris is taken to Dr. B. Backlund at a laboratory in Kubikenborg, who finds it contains paper with microscopic black-and-white squares like a screen. Some porous, rust-colored fragments are also present. The same day, the beach is visited by Lt. Col. Rudberg, Capt. C. Ljungdahl, and Capt. R. Westlin, who conclude that the material has been in the area for a long time. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 10–12; Clark III 526; Clark IV 575–576)

1946, July 10 — 2:30 p.m. A bluish flying cigar 10–12 times the diameter of the full moon in length passes over Stockholm, Sweden. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 9; Clark III 524; Clark IV 573)

1946, July 12 — Swedish Intelligence agrees to cooperate in sharing ghost rocket information with the British military attaché in Stockholm, Sweden, Maj. de Salis. (Swords 20)

1946, July 12 — Day. The railway station master at Gryon, Vaud, Switzerland, is watching a B-24 Liberator flying overhead at 15,000 feet when he also sees a "flying bomb" looking like a big star traveling northeast at about 250 mph. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 14)

1946, July 12 — 10:00 p.m. Inga Eriksson is in her garden in Usta, Örebro, Sweden, when she hears a sharp, sizzling sound in the air and sees three silvery triangular objects traveling horizontally from east to west. They are visible only for 2 seconds, but her mother notes that the electrical power has gone out in their home. (AFU case file)

1946, July 15 — The Swedes provide the British attaché with analytical reports of all observations to date. (Swords 20)

1946, July 16 –18 — US Secretary of the Navy James Forrestal makes an unexpected visit to Stockholm, Sweden, to meet with the Swedish Defense Minister Allan Vougt and two members of the special committee on ghost rockets. (Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 35)

1946, July 18 — Two British intelligence officers arrive in Stockholm to meet with their counterparts in Sweden. One is from the Air Ministry (Squadron Leader Barrie Heath) and the other (Maj. Malone) is from MI10(a), a branch of the Directorate of Military Intelligence. (Swords 20)

1946, July 18 — 12:00 noon. Sigvat Skaug and his son, who live along Lake Mjøsa in southeastern Norway, and his sister Åse Tandberg watch two rocket-like objects about 7 feet long pass over their heads at a very low altitude. They fall simultaneously into the lake, throwing the water several feet into the air. The objects look like V-1 rockets and come in low from the west at about 150 feet, causing the trees to sway. They fall into the lake about 1.2 miles from the western shore and 4.3 miles from Minnesund. (NICAP, "'Ghost Rocket' Crashes into Lake"; Björn Överbye, "Ghost-Bombs over Sweden," *Flying Saucer Review* 15, no. 2 (March/April 1969): 17–18; Clas Svahn and Anders Liljegren, "The Kölmjärv Ghost Rocket Crash Revisited," *AFU Newsletter* 27 (Jan./Dec. 1984): 1–5; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 18–19; Ole Jonny Brænne, "Observations of Unidentified Submarine Objects in Norway," *IUR* 20, no. 1 (Jan./Feb. 1995): 12–13, 17; Göran Jansson, "Spökraketerna 1946," January 2005, pp. 19–20; Swords 16; Clark III 526; Clark IV 576; Dolan, USO1, 121–122)

1946, July 18 — Three workers see a ghost rocket above Ortviken, Sweden. Shortly afterward, Gunnar Falck watches a silvery cylinder moving over the northern part of Sundsvall. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 17;Clark III 524; Clark IV 573)

1946, July 19 — 11:15 a.m. In the village of Bölebyn, Sweden, Leonard Danielsson and his sons Kjell, Dan, and Hans see an "aeroplane" moving against the wind to the southwest. The boys say it looks like a large, metallic milk canister. It travels from horizon to horizon in about 20 minutes before disappearing in the northwest. (Swords 17)

1946, July 19 — 11:30 a.m. Kurt Larsson, 11, is fishing at the north end of Lake Kattisträsket, Sweden, when he hears a roaring sound. A huge column of water rises out of the lake as if a mine has detonated. Military officers from Boden investigate, but the lake is too muddy to send in a diver. They conclude that whatever fell is buried in 15 feet of mud. (Swords 24)

1946, July 19 — 11:45 a.m. Many witnesses see a gray, winged rocket crash into Lake Kölmjärv, Sweden, with a loud bang close to the southwest bank. Knut Lindbäck says it generates a high plume of water when it hits the surface, "followed by another cascade as if something had detonated." Water lilies and other aquatic plants are torn up and thrown on the shore. Lieut. Karl-Gösta Bartoll from the Boden engineer corps arrives the next day to supervise the salvage operation. Engineers Roland Rynniger and lab technician Torsten Wilner from the Defense Research Department also arrive with a Geiger counter. A three-week search turns up no traces of metal, even though the evidence points to an underwater explosion. (NICAP, "'Ghost Rocket' Crashes into Lake"; Clas Svahn and Anders Liljegren, "The Kölmjärv Ghost Rocket Crash Revisited," *AFU Newsletter* 27 (Jan./Dec. 1984): 1–5; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 20, 76; Göran Jansson, "Spökraketerna 1946," January 2005, pp. 20–26; Swords 17–20, 24; Clark III 524–525, 526, 529; Clark IV 574–575, 576, 579; Dolan, USO1, 119–120)

1946, July 19 — 3:00 p.m. Karl and Tyra Axberg are sitting on the porch of their cabin on Lake Vassarajärvi in Norrbotten County, Sweden, when they hear a loud noise. A projectile comes in at a very low angle and hits the water at a 30° angle, continuing underwater for about 600 feet. A military team led by Karl-Gösta Bartoll can find no trace of a "ghost bomb." (Swords 24–25)

1946, July 19 — 3:40 p.m. Ingrid Hansson is sunbathing with her father on a floating jetty at the northern end of Lake Marmen, near Sunnanå, Sweden. She hears a violent roaring over the water and looks up to see an object bouncing along the surface, stirring up a wake. The object has created a water column 66 feet high upon impact. (Swords 25)

1946, July 19 — Maj. Gen. George C. McDonald prepares a memorandum for the Commander of the Army Air Forces Gen. Carl Spaatz on reports of "rockets" over Scandinavian countries. (Jan L. Aldrich, comp., *The Ghost Rocket File*, Fund for UFO Research, 2000, pp. 9–11)

1946, July 24 — 1:20 p.m. Engineer Tennlund sees a small cigar-shaped object with a pair of small wings south of Vålberg, Värmland, Sweden. It comes from the direction of Norway (west) at great speed with no sound. Tennlund thinks it crashes into Vänern lake. (Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 35)

1946, July 25 — The Swedish military states that the ghost rockets are definitely not meteors. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 23; Clark III 527; Clark IV 576)

1946, July 25 — Baker nuclear test, Bikini Atoll in the Marshall Islands. (Wikipedia, "Operation Crossroads"; Fran Ridge, "The Baker Blast: Cause for Alarm?" May 4, 2013)

1946, July 27 — British Air Attaché Capt. Henderson informs the Foreign Office in London, England, that cooperation with Swedish Air Staff should be kept from the Americans. (David Clarke and Andy Roberts, *Out of the Shadows*, Piatkus, 2002; Joel Carpenter, "Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two"; Swords 20)

1946, July 28 — Night. Sections of Oslo, Norway, are shaken by two violent aerial explosions. An "intense white light" accompanies the blasts. ("Oslo Shaken by 2 Explosions," London *Daily Telegraph*, July 29, 1946, p. 1; Clark III 526; Clark IV 576)

1946, July 29 — Norway begins censoring ghost rocket reports just as Sweden is doing. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 25)

1946, July 30 — 1:15 p.m. Two objects shaped like dark crosses are seen in the sky over Filipstad, Värmland, Sweden. (Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 35)

1946, July 30 — 3:12 p.m. William Jorgensen, a soldier at the fort at Oskar-Fredriksborg, Stockholm, Sweden, sees a silent flying object with short wings at a distance of about 6,560 feet. It is moving faster than a jet aircraft. (Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 35)

1946, July 30 — 5:00 p.m. A customs officer on the Norway-Sweden border watches a silvery torpedo with short wings. The object moves in from the south but changes direction with a sharp turn and continues east with a whining sound. (Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 35)

1946, August — Day. Charles A. Johnson is driving on US Highway 41 along Lake Michigan north of Chicago, Illinois, when he sees three silver discs going from east to west in a triangular formation. (Clark III 1179; Clark IV 1354)

1946, August — 8:30 p.m. A young man sees a pan-shaped object near a road in Sint-Niklaas, Belgium. A small entity holding an acacia branch is nearby. The being enters the object through an opening on the underside. Afterward, traces of burning on the ground are detected. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 20; Clark III 266; Clark IV 306)

1946, Early August — An astronomer and meteorologist is looking at some clouds through a telescope in Stockholm, Sweden, and sees a luminous object that he estimates is about 90 feet long, torpedo-shaped, and metallic. It has a "tapered tail that spewed glowing blue and green smoke and a series of fire balls." The object explodes with a terrific flash. ("Swarm of Mysterious Rockets Is Seen over Capital of Sweden," *New York Times*, August 12, 1946, pp. 1, 7; "Sweden Plans Radar Fight on 'Rockets,'" *Los Angeles Times*, August 13, 1946, p. 1; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 39; Clark III 524–525; Clark IV 573)

1946, August 1 — President Truman signs the Atomic Energy Act, transferring the control of atomic energy from military to civilian hands, effective on January 1, 1947. It categorizes information on atomic energy as "born classified," even if it is not created by any US government agency. "Restricted Data" is not a level of classification; rather, a document can be classified as Confidential, Secret, or Top Secret, while also containing Restricted Data. In addition, a document containing Restricted Data can also contain Critical Nuclear Weapon Design Information. In this way, a document can be classified as Secret (S), Secret//Restricted Data (S//RD), or Secret//Restricted Data-Critical Nuclear Weapon Design Information (S//RD-CNWDI), depending on the type of information it contains. (Wikipedia, "United States Atomic Energy Commission")

1946, August 1 — Truman approves the establishment of the Office of Naval Research for "planning, fostering, and encouraging scientific research" in relation to naval power and national security. (Wikipedia, "Office of Naval Research")

1946, August 1 —Col. Edwin Kennedy Wright, Vandenberg's executive assistant at the Central Intelligence Group, sends a memorandum to President Truman saying the ghost rockets conform to a V-1 shape and seem to be launched from the USSR. The report notes that the missiles can turn and fly circular courses, seemingly indicating radio control. Most information comes from the military attaché in Sweden and the conclusions are from the director of

intelligence for the War Department general staff. (Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 10, 12; Swords 21–23)

1946, August 1 — 6:00 p.m. AF Capt. Jack E. Puckett is flying over Tampa, Florida, in a C-47 transport and sees a long cylinder twice the size of a B-29 with luminous portholes. After 3 minutes, it disappears at a speed of 1,500 mph. ("Rocket Craft Encounter Revealed by World War 2 Pilot," *UFO Investigator* 1, no. 2 (Aug./Sept. 1957): 15; UFOEv, p. 19; Clark III 529–530; Clark IV 579)

1946, August 5 — 6:26 p.m. A luminous object is seen by a motorist near Landskrona, Skåne, Sweden.

1946, August 5 — 11:00 p.m. A fast-moving, silent, circular object glitters in the sun over Skåne, Sweden, as it heads toward the south-southwest at a high altitude. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 28; Clark III 525; Clark IV 573)

1946, August 6 — The US delegation in Budapest, Hungary, reports that a German scientist now working for the Russians has revealed that the Soviets have developed guided rockets called V-3 and V-4 that are able to fly a round trip of 700 miles. (Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 10)

1946, August 7 — A Top Secret message from the Commander-in-Chief Air Forces, Pacific, to Gen. Lauris Norstad, War Department Operations, requests guidance on the current classification of the substitute code word "Majestic" for Operational Plan Olympic (the invasion of Northern Japan). The plan has been downgraded to Restricted (Message CM1472 IN). The answer is that both code words had been declassified by the JCS on October 8, 1945 (Message CM96908 OUT 8 Aug 1946). (Jan Aldrich; Murray Bott, "Military Codenames 'Olympic' and 'Majestic,'" UFO UpDates, April 4, 2002)

1946, August 7 — Swedish Lt. Lennart Neckman of the Defense Staff's Air Defense Division sees a clear, yellow flame passing low and slow over the countryside. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 30; Clark III 527; Clark IV 576–577)

1946, August 8 — Chief of Swedish Air Defense Maj. Nils Ahlgren says that some of the rockets are seen at low altitude, maneuver in half circles, and appear to come from the south. (Göran Jansson, "Spökraketerna 1946," January 2005, p. 36)

1946, August 11 — 8:47 p.m. Astronomer Bertil Lindblad sees an exploding fireball in Ljugarn on Gotland, Sweden. (Göran Jansson, "Spökraketerna 1946," January 2005, p. 38)

1946, August 11 — 9:00–10:00 p.m. Hundreds of people in central and southern Sweden see "ghost bombs" that fly from south to north, giving off a brilliant blue-white light. Sometimes two of the objects are seen flying together. Some witnesses see smaller silver balls come out of the larger objects, which are variously described as cylinders and torpedoes with a "wide nose" and "fire-spurting tail." ("Swarm of Mysterious Rockets Is Seen over Capital of Sweden," *New York Times*, August 12, 1946, pp. 1, 7; "Swedes Use Radar in Fight on Missiles," *New York Times*, August 13, 1946, p. 4; Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 37; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 33–39; Don Berliner, with Marie Galbreath and Antonio Huneeus, *UFO Briefing Document: The Best Available Evidence*, Dell, 2000, pp. 50–53; Göran Jansson, "Spökraketerna 1946," January 2005, pp. 38–40; Clark III 525, 527; Clark IV 573, 577)

1946, August 12 — 10:00 a.m. A twin-engine Saab 18 Swedish Air Force bomber crashes and explodes near Valdshult, Jönköping, Sweden, killing three airmen. Rumors circulate that it collided with a ghost rocket, but an investigation indicates that the pilot lost control. (Good Need, pp. 39–40)

1946, August 12 — A group of Boy Scouts near Göteborg, Sweden, watch a "flying missile" turn 35° then resume its original course. ("2 Swedes Escape a 'Ghost Rocket,'" *New York Times*, August 14, 1946, p. 11)

1946, August 12 — 8:15 p.m. A torpedo-shaped ghost rocket moves slowly over a seaport town in southern Sweden, barely grazing the roofs and trailing smoke. It continues out to sea and seems to come down on a small island. Two men go out to investigate, but the island is too overgrown to allow a search. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 40–41; Clark III 526; Clark IV 576)

1946, August 12 — Night. Briand Jensen, a night watchman in Struer, Denmark, sees a speeding rocket approach from the northeast, explode with a roar, and illuminate the sky with a blinding flash. ("2 Swedes Escape a 'Ghost Rocket,'" *New York Times*, August 14, 1946, p. 11)

1946, August 13 — Capt. Roscoe H. Hillenkoetter, US naval attaché in Paris, forwards as top secret a report by the French government on ghost rocket activity in Scandinavia. It states that "a good number of these projectiles are of the V-1 type in the form of a torpedo with two small wings." A map shows them originating in the Leningrad [now St. Petersburg] area, Russia. (Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 11; Swords 21; Good Need, pp. 38–39)

1946, August 13 — The Hungarian report of August 6 causes Maj. Gen. Stephen J. Chamberlin, Army assistant chief of staff for intelligence, to ask Budapest for further information. Top-secret requests are sent to military attachés in

London, Stockholm, Oslo, Helsinki, and Copenhagen asking for listings of all ghost rocket reports, as well as V-3 and V-4 missiles. The military attaché in Oslo reports that a Soviet ship in the north Baltic Sea has been transmitting code to shore stations regarding the ghost rockets. The military attaché in Moscow asks other European officials about where the rockets originate and gets several answers, which he forwards on to Chamberlin: Hiiumaa island, Estonia; Latvia; or Peenemünde, Germany. Gen. Joseph T. McNarney of the US Forces in Europe Theater replies that Peenemünde is a likely origin, since the site has been refurbished. The military attaché in Stockholm suspects Hiiumaa, Peenemünde, or Parikkala in Finland, while the naval attaché in Stockholm thinks that Łeba, Poland, is the launch site. (Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 10–11)

1946, August 13 — The *New York Times* says the ghost rocket situation is extremely dangerous ("near the boiling point") and that Sweden will not tolerate such violations, borrowing some radar equipment from Great Britain. ("Swedes Use Radar in Fight on Missiles," *New York Times.* August 13, 1946, p. 4)

1946, August 13 — The US naval attaché and the Assistant US military attaché in Stockholm interview three Swedish Air Force officers assigned to the General Staff who say that they believe the objects are rockets. (Joel Carpenter, "Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two"; Swords 21)

1946, August 13 — Afternoon. A troop of Boy Scouts in Denmark see a rocket-like object moving quickly at an altitude of 1,600 feet. They can see small side wings and fins. A blue-white light streams from the bottom, and it diverges from a straight course to a 35° curve. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 43; Clark III 525; Clark IV 573)

1946, August 13 — 8:00 p.m. A cigar-shaped object flies past a witness at Karlskrona, Sweden, at a distance of only 150 feet. Only 5 feet long, it emits a faint green light and trails smoke from the rear. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 43; Clark III 525; Clark IV 573)

1946, August 14 — The *New York Times* reports that Secretary of State Dean Acheson is "very much interested" in the ghost rockets. ("2 Swedes Escape a 'Ghost Rocket,'" *New York Times,* August 14, 1946, p. 11; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 46; Clark III 527; Clark IV 577)

1946, August 14 — 10:02 a.m. Swedish Air Force pilot Lieut. Gunnar Irholm and his signaler, Cpl. Möller, are flying a B-18A bomber at 650 feet 4 miles northeast of Malingsbo in central Sweden when they see a dark cigar-shaped object approaching on their left. It has no visible wings, rudders, lights, flame or projections of any type. It appears to follow the terrain at 370–430 mph, maintaining the same height, then vanishes into a storm cloud. ("Ghost Rockets over Scandinavia," *Intelligence Review,* no. 49, January 9, 1947, US Department of Defense; Don Berliner, Marie Galbraith, and Antonio Huneeus, *Unidentified Flying Objects Briefing Document,* UFO Research Coalition, December 1995, pp. 33–35; Swords 15–16; "Cigar Sighted from B-19 Bomber," *AFU Newsletter*, no. 44 (September 2002): 1–4)

1946, August 15 — Night. Several residents of the east side of Waterloo, Iowa, see an object buzzing rapidly around some trees. It gradually ascends, surrounded by a cloud of white vapor, and disappears high in the sky. One person calls it "a great white bird; another, a bomb." Mrs. Russell Lampman says that the object is "6 feet, 3 inches tall, like a large man, and rather rectangular in shape." She and her husband watch it for an hour after it starts hovering about 20–25 feet above a nearby alley. (Al Starr, "Street Scene," *Waterloo (Iowa) Sunday Times,* August 18, 1946, p. II-1; "Well, We Saw It First!" *Waterloo Daily Courier,* July 7, 1947, p. 2; Project 1947, "UFO Reports: 1946")

1946, August 16 — Col. L. H. Johnson, US naval attaché in Stockholm, transmits a "Top Secret Report R334-46 of 13 August 1946 Subject: SWEDEN Guided Missiles Rocket Sightings Over Sweden." It concludes: "No tangible evidence to date as to nature or origin of rockets reported over Sweden, although Swedish Defense Staff insists that they are rockets." (Joel Carpenter, "Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two"; Jan L. Aldrich, comp., *The Ghost Rocket File*, Fund for UFO Research, 2000, pp. 32–35)

1946, August 16 — A missile produces an enormous explosion over Malmö, Sweden, that shakes or breaks many windows. Some witnesses think they can see fragments of the object falling to earth. ("Windows Broken by Rocket Bomb," *Manchester Guardian,* August 17, 1946, p. 6; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 50; Jan L. Aldrich, comp., *The Ghost Rocket File*, Fund for UFO Research, 2000, p. 36; Clark III 527; Clark IV 576)

1946, Late August — Margaret Sprankle, a civilian employee at Tinker AFB near Oklahoma City, Oklahoma, is returning from work when she sees, about 300 feet away, a large, metallic, lens-shaped structure about 75 feet in diameter. It is hovering on edge, the flat side toward her. On the lower right side are 12–14 square windows; in each, visible from the shoulders up, is a figure. Their heads are very round. Aftre about 90 seconds, the object rotates 90° on its vertical axis and silently flies northwest and disappears in 5 seconds. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 22; Richard H. Hall, *From Airships to Arnold,* UFO Research Coalition, 2000, pp. 28, 32; Clark III 266; Clark IV 306)

1946, August 18 — 8:00 or 10:00 p.m. An aerial object like a 9-foot cigar is seen moving slowly on the north side of Copenhagen, Denmark. It explodes with extraordinary force. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 53; Clark III 525; Clark IV 573–574)

1946, August 19 — The US military attaché in Moscow reports on the visit of Maj. Stig Wennerström of the Swedish Air Force, who reveals that radar indicates the ghost rocket launch site is at Peenemünde, Germany. The rockets appear to be radio-controlled, carry no warheads, are self-destructive, and are plotted over a range of 620 miles. Sometimes they follow zigzag courses. (Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 12)

1946, August 19 — Two US experts on aerial warfare, aviation legend General Jimmy Doolittle and British Group Captain Douglas Bader, and General David Sarnoff, president of RCA, arrive in Stockholm, Sweden, ostensibly on private business, and independently of each other. The official explanation is that Doolittle, who is now vice-president of the Shell Oil Company, is inspecting Shell branch offices in Europe, while Sarnoff, a former member of General Dwight D. Eisenhower's London staff, is studying the market for radio equipment. However, the story indicates that the Chief of the Swedish Defense Staff, Col. C. R. Kempf, makes no secret that he "was extremely interested in asking the two generals advice and, if possible, would place all available reports before them." However, Doolittle denies the correlation to Barry Greenwood in 1984, and researchers have found no evidence to support a collaboration. ("Doolittle, Sarnoff Stir Swedish Talk," *New York Times,* August 21, 1946, p. 3; "Doolittle Consulted by Swedes on Bombs," *New York Times,* August 22, 1946, p. 2; Joel Carpenter, "Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two"; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 53–54; Swords 21, 24; Clark III 527; Clark IV 576)

1946, August 21 — The General Staff in Norway issues a memorandum to the press asking it not to mention any ghost rockets seen over the country and to pass on all reports to the military Intelligence Department. In Sweden, the ban is limited to any mention of where the rockets are seen to land or explode. ("Britain to Send Radar to Sweden," London *Daily Telegraph,* August 22, 1946, p. 1; Good Above, p. 21)

1946, August 22 — 3:00 p.m. Photographer Gösta Skog takes a color film of a ghost rocket at Getå, 100 miles south of Stockholm, Sweden. The cigar-shaped object appears out of a cloud at 3,000 feet, trailing exhaust. The film turns out to be overexposed. (Swords 14–15; Clas Svahn, "Spökraketerna: Den Största Gåtan," Riksorganisationen UFO-Sverige, March 7, 2017)

1946, August 22 — Director of the Central Intelligence Group (CIG) Lt. Gen. Hoyt Vandenberg writes a top secret memo to President Truman via Adm. William D. Leahy, stating that the "weight of evidence" points to Peenemünde (which has become a Soviet naval base), East Germany, as the origin of the ghost rockets, and that a US military attaché in Moscow has been told by a "key Swedish Air Officer" [Wennerström] that radar course-plotting leads to the conclusion that Peenemünde is the launch site. CIG speculates that the missiles are extended-range developments of V-1s being aimed for the Gulf of Bothnia for test purposes and "do not overfly Swedish territory specifically for intimidation; self-destruct by small demolition charge or burning." (Hoyt Vandenberg. "Memorandum for the President," August 22, 1946; Ossian Goulding, "Mystery of 'Rockets' over Sweden," London *Daily Telegraph,* August 27, 1946, pp. 1, 6; Joel Carpenter, "Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two"; Barry Greenwood, "Significant Ghost Rocket Documents Available," *UFO Historical Revue,* no. 15 (June 2015): 1–8; Clark III 527; Clark IV 577)

1946, August 23 — The British Foreign Office states that English radar experts, including Reginald Victor Jones, having returned from Sweden, had "submitted secret reports to the British government on the origin of the rockets." (Good Above, p. 21)

1946, August 24 — Stockholm Air Attaché Maj. Gen. Alfred A. Kessler Jr. informs the War Department that the Ghost Rockets are an "unintentional hoax which developed naturally but which exploited by Defense staff by implication and lack of frankness possibly interest defense budget and to alert west against east." (Joel Carpenter, "Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two")

1946, August 24 — Admiral Henry Kent Hewitt, Commander of US Naval Forces in Europe, writes a letter to the US naval attaché in Oslo, Norway, on "Rocket Bombs or Guided Missiles over Norway and Sweden." Two "missiles" have fallen into a lake near Oslo, and the US Navy is "very interested." ([Adm. Henry Kent Hewitt], Letter to US Naval Attaché, Oslo, "Rocket Bombs or Guided Missiles over Norway and Sweden," August 24, 1946)

1946, August 24 — Evening. A Norwegian student and a Swedish engineer are boating on a small river "somewhere in Sweden" when a light approaches them from the southeast. It resembles a full moon and emits an intense light: "As it passed immediately overhead, it grew so bright you could see a well as on a sunny day." The object, about 10 feet long, releases four stars that fall silently to the ground. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 58–59; Clark III 525; Clark IV 574)

1946, August 26 — The US military attaché in Stockholm reports that the Swedes, possibly worried about a Soviet veto of their application for UN membership, have canceled their request for British radar equipment. (Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 13)

1946, August 29 — The American embassy in Stockholm tells the State Department that the ghost rockets are probably Soviet missiles. ([Memo on telegram of August 27, 1946]; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 63A; Good Above, pp. 22, 447)

1946, August 31 — After becoming one of the first Western journalists to view the ruins of Hiroshima, John Hersey publishes a 31,000-word article in *The New Yorker* on the effects of the atomic bomb on six survivors of the bombing Hiroshima. It is the first glimpse that the American public has on the devastation of nuclear warfare and the effects of radiation. (John Hersey, *Hiroshima*, Alfred A. Knopf, 1946; Lesley M. M. Blume, *Fallout: The Hiroshima Cover-Up and the Reporter Who Revealed It to the World*, Simon & Schuster, 2020)

1946, September — German rocket engineer Walter Ziegler tells Army CIC that 400 men from his former rocket group at Bayerische Motoren Werke (BMW) in Munich, Germany, are invited by Russian military officers to a fancy dinner, wined and dined, then taken home. Several hours later, all 400 are woken up by the Russians and forced to take a trip. (Ziegler is not among them.) They are transported by train to a small town ("Kubischew") outside Moscow, Russia, where they remain and work on secret military rocket projects under terrible conditions. (Jacobsen, *Area 51*, p. 42)

1946, September 1–2 — Late night and early morning. Rocket-shaped objects are seen over northern Greece, according to Prime Minister Konstantinos Tsaldaris. Physicist Paul Santorinis is placed in charge of an investigation. He rules out Russian missiles, but the Army ends the investigation in 1947. ("Rockets over Nation," *Chicago (Ill.) Tribune*, September 6, 1946, p. 2; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 62–63; Good Above, p. 23; Clark III 525; Orestis Lazanakis, "UAP in Greece," UAP Check, July 27, 2024; Clark IV 574)

1946, September 3 — Soviet officials deny responsibility for the Scandinavian ghost rockets, claiming that such accusations are "anti-Soviet misinformation" that is "poisoning the international atmosphere." ("Russians Cry 'Slander' to Rocket-Firing Charge," *New York Times*, September 4, 1946, p. 10; Clark III 527; Clark IV 577)

1946, September 7 — British pilot Edward Mortlock Donaldson attains an airspeed record of 616 mph in a Gloster Meteor F Mk 4 at Littlehampton, England. (Wikipedia, "Edward Donaldson (RAF officer)")

1946, September 9 — The scientific advisor to MI6, English physicist Reginald Victor Jones, considers the ghost rockets a social panic phenomenon. An RAF Intelligence report, "Investigation of Reported Missile Activity over Scandinavia," identifies eight types of ghost rocket sightings: iron cylinder, magnesium-like light, white core surrounded by blue-green, shining ball with tail, torpedo-shape, black object with flame, small rocket, small missile. It takes the daytime reports seriously but concludes are probably only a few genuine reports of actual missiles. (Joel Carpenter, "Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two"; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 63–64; Swords 26–27; Clark III 526, 527; Clark IV 574–575, 577)

1946, September 11 — The Chief of Naval Intelligence requires naval attachés to forward information on Soviet rocket research and operations including launches from submarines. (NARA, US Naval Intelligence files; Jan Aldrich)

1946, September 11 — Jack Northrop grounds the XB-35, which has suffered gearbox and propeller control problems, until the Army Air Force can fix its propulsion system. (Wikipedia, "Northrop YB-35")

1946, September 11 — 2:00 p.m. Justin B. Rinaldi is standing in a friend's backyard in Engle, New Mexico, when he hears a loud whirring sound and sees a black object whiz by. It is pointed at one end, has a narrow body, and what appear to be fins on the tail. It is traveling fast at an altitude of 75 feet. Rinaldi sees it hit a clump of trees at a ranch house and the "branches parted like a great force had struck." He and friends go to the site but can find nothing. ("Flying Disc Tales Bring 2 Reports from Engle Area," *Albuquerque (N.Mex.) Journal*, June 29, 1947, p. 1; Clark III 530; Clark IV 579)

1946, September 12 — Cmdr. Robert A. Winston, acting naval attaché in Stockholm, Sweden, writes to the London naval attaché in a secret air mailgram that he suspects there is a secret British-Swedish collaboration on ghost rocket information designed to keep the US from learning the truth. (Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 13)

1946, Mid-September — Two luminous globes that shine "like an electric arc" are seen flying in a straight line over Longwy, Meurthe-et-Moselle, France. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 66; Clark III 525–526; Clark IV 574)

1946, September 18 — Two greenish globes, one following close behind the other, zoom over Castanheira, Portugal. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 67; Clark III 526; Clark IV 574)

1946, September 21 — Chemist Gustaf Ljunggren of the Swedish National Defense Research Institute summarizes for the Swedish Defense staff his analysis of 27 finds of mysterious substances, allegedly from ghost rockets. None are radioactive and all have mundane explanations. (Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, pp. 33–34)

1946, September 22 — 3:15 a.m. A rocket-shaped object is seen for 90 seconds over Florence, Italy. It makes an abrupt turn, then speeds south toward Rome. ("Svenskarockets," *Doubt*, no. 17 (1946): 255; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 69)

1946, September 25 — 12:00 midnight. Mme. Deman in Ostend, Belgium, sees a ball of light fall near her home and throw up a large cloud of smoke. ("'Ball of Light' at Ostend," London *Daily Telegraph*, September 27, 1946, p. 8; Clark III)

1946, September 28–29 — Mysterious "meteor-like activity is reported at Verviers, Belgium. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 70)

1946, September 30 — David Sarnoff, in a speech at the Waldorf-Astoria Hotel in New York City, says that the "ghost bombs are no myth but real missiles." ("Sarnoff Predicts Weather Control and Delivery of the Mail by Radio," *New York Times*, October 1, 1946, p. 1, 48; Joel Carpenter, "Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two")

1946, Fall — 9:00 p.m. Gladys McCage and her 4-year-old son see a yellowish-orange light coming from the northwest at a "terrific speed" toward their farm 8 miles north of O'Neill, Nebraska. Its color changes to red as it approaches, and soon it is hovering above the witnesses. They run toward the house and the cigar-shaped object swings up to the northeast. McCage says it is as big as a football field, has windows, and is making a loud noise. A yellowish-blue-green flame is shooting out near the back, and it is traveling too fast for any plane at the time. (Clark III 530; Clark IV 579)

1946, October — Ray Palmer publishes a letter from Maurice Doreal (pseudonym of Claude D. Dodgin) of the Brotherhood of the White Temple in Denver, Colorado, regarding the "Shaver mystery." Doreal claims intimate knowledge of the subterranean realms, which he claims are inhabited by the Black Brotherhood and protected by "space-warps." In 1949 Doreal claims to have visited caves inside Mount Shasta, California, inhabited by Atlantean masters. He equates Shaver's Dero with an evil group of Lemurians. (M. Doreal, "He's Been in Caves Too!" *Amazing Stories* 20, no. 7 (October 1946): 177–178; Walter Kafton-Minkel, *Subterranean Worlds*, Loompanics, 1989, pp. 154–160; Charmaine Ortega Getz, "The (Sort of) Amazing Story of Maurice Doreal and the Brotherhood of the White Temple Revealed at Last," Weird Colorado, September 6, 2015)

1946, October — Harold Sherman's novel *The Green Man* is first published in Ray Palmer's *Amazing Stories*. It revolves around an alien named Numar, a peaceful messenger from another planet who has the ability to make our technology stand still. It is followed by a sequel, *The Green Man Returns*, in 1947. In a 1979 reprint of both novels, Sherman writes: "Sometime in the year 1945, when Martha and I were living in Chicago, I had a series of visions wherein I saw Space Beings, possessed of high intelligence, visiting our Earth in space ships of different shapes and sizes, for the purpose of exploration and eventually to fill our skies with large space vehicles, coming in force, hopefully on a friendly mission to help Mankind save itself from self-destruction." (Harold M. Sherman, "The Green Man," *Amazing* Stories 10, no. 7 (October 1946): 8–47, 76–157; Harold Sherman, *The Green Man and His Return*, 1979)

1946, October — University of Manchester astronomer Bernard Lovell uses the radar equipment at Jodrell Bank Observatory in Cheshire to confirm that transient radar echoes are from ionized meteor trails, showing that meteor showers can be tracked in the daytime as well visibly at night. He is later able to determine the orbits of meteors in annual meteor showers to show they are in solar orbit and not of interstellar origin. (Wikipedia, "Jodrell Bank Observatory")

1946, October 1 — The US Military Attaché in London, England, writes a top-secret memo to the War Department complaining that the British "may not have given us all information on reported rockets over Scandinavia." (Jan L. Aldrich, comp., *The Ghost Rocket File*, Fund for UFO Research, 2000, p. 73)

1946, October 9 — Evening. George Adamski and some associates are watching a meteor shower associated with Comet 21P/Giacobini-Zinner when they see a "gigantic spacecraft" hovering above the mountain ridge south of Mount Palomar, California. He claims to meet a military officer a few weeks later who assures him that the object was indeed from another world. Others in San Diego see an object with a long, tube-shaped fuselage, giant wings, and two red lights. The medium Mark Probert later tells the press that he has established psychic communication with

the occupants and the object is called the Kareeta. ("Sparks Fly As Comet Passes Earth," *Los Angeles Daily News*, October 10, 1946, p. 3; "Space Ship Flaps Wings over San Diego, 'Observers' Claim," *San Diego (Calif.) Union*, October 15, 1946, p. 1; "Welcome? Kareeta!" *Round Robin* 2, no. 10 (1946): 3–7; Leslie and Adamski, *Flying Saucers Have Landed*, British Book Centre, 1953, pp. 172–174; Harold T. Wilkins, *Flying Saucers on the Attack*, Citadel, 1954, pp. 41–48; Colin Bennett, *Looking for Orthon*, Paraview, 2001, pp. 28–29; Curt Collins, "1946, Before Saucers, Kareeta: UFO Contact in California," The Saucers That Time Forgot, August 8, 2017; Clark III 298, 455; Clark IV 338–339, 500)

1946, October 10 — 4:00 a.m. Waltraut Anlauf, a telephone operator in Friedland Refugee Camp, Lower Saxony, Germany, sees small, elongated flashes at a great height in the sky. They look like cigars and are luminescent white in front and bluish-white in back. She sees about 10 objects pass per minute. Sometimes there is an interruption of about 10 minutes, and then new groups appear. The sighting lasts one hour. Possibly these are part of the Taurid meteor shower. (Clark III 529; Clark IV 578)

1946, October 10 — The defense staff in Sweden admits it cannot explain the ghost rockets because reports are too vague. About 80% appear to be meteors ("celestial phenomena"), although radar has tracked a few unusual targets. The report concludes that they are not V-type bombs. ("Swedish Inquiry Fails to Solve Rocket Case," *New York Times*, October 11, 1946, p. 3; Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 71–72; Good Above, p. 23; Clark III 528; Clark IV 577)

1946, October 15 — Belgian Defense Minister Raoul de Fraiteur issues a statement saying that recent sightings of "meteor-like objects" in Belgium have been explained. ("Svenskarockets," *Doubt*, no. 17 (1946): 17; Clark III 528; Clark IV 577)

1946, October 21 — Two persons on the shore of a lake in southern Sweden hear a whistling sound in the air, like a "flock of birds." They see an object moving over the trees at a low altitude. It is dart-shaped and has short wings and a "ball-shaped tip." It falls into the lake and possibly explodes on impact. (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 74; Clark III 527; Clark IV 576)

1946, November — The War Department issues a press release on how German scientists are helping out at Wright Field, Ohio. (Dolan, p. 12)

1946, November 29 — A top secret Air Intelligence report, "Significant Developments of Scientific Warfare in Russia," designates the ghost rockets as "V-5" weapons produced by the Siebel Works in Halle, Germany. (Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 13)

1946, December 3 — The Swedish military reports that about 100 impacts were investigated by the Defense Research Institution and not found to be rockets. (Joel Carpenter, "Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Three")

1946, December 10 — Gen. Curtis LeMay answers an inquiry from Assistant Secretary of War for Air Stuart Symington about establishing interim projects at the Air Materiel Center (AMC). LeMay's answer: The Commander of AMC on his own volition may establish an interim project; however, to continue the project it must be approved for the next budget cycle. (Air Force Historical Research Agency, Maxwell AFB; Jan Aldrich, "Secret Twining Letter: 'The Reported Phenomena Are Real,'" October 11, 2008)

1946, December 23 — Jacobsson's ghost rocket committee issues its final report on 987 ghost rocket cases, stating that 225 reports had been made in full daylight. More than 100 reports describe spool-shaped objects with or without wings. It concludes: "Despite the extensive effort, which has been carried out with the means available, and seven months after the first observations, no actual proof that a test of rocket projectiles has taken place over Sweden has been found." (Loren E. Gross, *UFO's, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 75–76; Anders Liljegren and Clas Svahn, "The Ghost Rockets," *UFOs 1947–1987*, Fortean Tomes, 1987, p. 36; Swords 26)

1947

1947? — A man writes a letter to the *Nashville Tennessean* claiming that he has encountered strange little men, "all heads and arms and legs, glowing like fireflies" on a nearby airfield. They exchange greetings by sign language and their saucer takes off in a cloud of dust. ("All over the Nation People Talk of Saucers," *Nashville Tennessean*, July 9, 1947, p. 1; Clark III 266–267; Clark IV 307)

1947 — A private pilot flying over New Mexico in his Taylorcraft L-2 allegedly spots some wreckage, lands, and goes to a nearby ranch house. The pilot and rancher walk to the site, where they find much metallic material. Inside the

front edge of the craft are three humanoid beings, 4 feet tall, with hairless heads and large black eyes, and clad in coveralls. Soon a military team shows up, detained for a while, then released after promising not to say anything. (Clark III 344; Clark IV 381–382)

1947 — Cmdr. Bernard Baruch Jr. makes 44 trips at his own expense to lobby for the implementation of the peacetime Communication Instruction for Reporting Enemy Sightings (CIRES) message system. He meets with DCI Gen. Hoyt Vandenberg, Rear Adm. Roscoe Hillenkoetter, Secretary of the Air Force Stuart Symington, Rear Adm. Earl E. Stone, Vice Adm. Arthur W. Radford, Rear Adm. John E. Gingrich, Adm. DeWitt Clinton Ramsey, Maj. Gen. Robert W. Harper, Lieut. Gen Idwal H. Edwards, Vice Adm. Ralph Riggs, Capt. Richard Burke (USCG), and about 20 other officials. (NICAP, "Capt. Bernard Baruch, Jr.")

1947 — 11:00 p.m. Air Force pilot Edwin T. Yeoman is returning home with his wife Eva after going to a movie in Sacramento, California. As they drive northeast, they see a stationary light hovering at an altitude of 3,000–4,000 feet above Roseville. After watching it for 5 minutes, the light gets brighter, rises vertically for several thousand feet, makes an abrupt 90° turn, and shoots across the horizon from east to west. (CUFOS case file)

1947, January — Crew members of the hydrographic surveying ship USS *Maury* traveling in the North Pacific between San Francisco and Hawaii map a large, stationary underwater object of some kind. The ship makes several passes over it with their sonar, after which the object accelerates and disappears in the depths. (Carl Feindt, "Report #1117," waterufo.net; YN-3 Wayne Anderson, "USS Maury, AGS16: Thanks for the Memories, 1945–1969"; Dolan, USO1, 125–126)

1947, January 1 — The civilian US Atomic Energy Commission assumes responsibility for nuclear energy from the wartime Manhattan Project. The Armed Forces Special Weapons Project assumes responsibility for all aspects of nuclear weapons remaining under military control. (Wikipedia, "United States Atomic Energy Commission"; Wikipedia, "Armed Forces Special Weapons Project")

1947, January 9 — The US Defense Department's *Intelligence Review*, no. 49, contains a four-page summary of ghost rocket sightings and suggests some may have been Soviet test missiles or jet airplanes. ("Ghost Rockets over Scandinavia," *Intelligence Review*, no. 49, January 9, 1947, US Department of Defense; Don Berliner, Marie Galbraith, and Antonio Huneeus, *Unidentified Flying Objects Briefing Document*, UFO Research Coalition, December 1995, pp. 33–35)

1947, January 16 — 11:30 p.m. An RAF Mosquito plane chases an unidentified target detected on radar at RAF Trimley Heath Radar Station [now closed] near Felixstowe, Suffolk, England, moving at a speed calculated to be faster than sound at an altitude of 38,000 feet over the North Sea, 50 miles north of the Netherlands coast. The target, later referred to as a "ghost plane" or "Charlie," descends to 17,000 feet and takes controlled, evasive action. The plane pursues it for 40 minutes, even though the pilot cannot see it visually, until he loses it over the Norfolk coast. (Sparks, p. 16; ClearIntent, p. 151; David Clarke, "Operation Charlie," 2002; Martin L. Shough, "A New Study of the British 'Ghost Airplanes' of 1947," April 2009; UFOFiles2, p. 29)

1947, January 17 — 11:37 p.m. After two unidentified targets similar to yesterday's are reported by RAF Neatishead, northeast of Norwich, England, over the North Sea, another radar track enters the Eastern Sector area, and an RAF Mosquito piloted by Flight Lt. William Kent is scrambled to 18,000 feet. Kent attempts to close in, but his onboard radar is unable to keep it on track because the target is "jerking violently" and taking evasive action. After 20 minutes, the target descends below 2,000 feet and is lost from ground radar. Unofficially the radar operators give the intruder a name—Charlie—and when the Air Ministry later begins a concerted effort to solve the mystery, its code name is "Operation Charlie." (Martin L. Shough, "A New Study of the British 'Ghost Airplanes' of 1947," April 2009)

1947, January 20 — In London, Ben Lockspeiser, chief scientist for the UK Ministry of Supply, after meeting with Swedish scientists and air force authorities, informs the American naval attaché in London, England, Cmdr. Jenkins, that the Swedes doubt the rockets are from Russia but prefer that the US and UK continue to think so. Natural phenomena and popular imagination are considered the causes. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes*, The Author, 2000, pp. 3–5)

1947, January 23 — Night. Three senior RAF officers are visiting RAF Neatishead in Norfolk, England, for an interception exercise when an unidentified radar target makes another appearance at 28,000 feet. RAF Mosquitos from Yorkshire are scrambled, but by the time the aircraft reach the area, the target is gone. (Martin L. Shough, "A New Study of the British 'Ghost Airplanes' of 1947," April 2009; David Clarke, "Operation Charlie")

1947, January 27 — RAF Flying Officer Stewart of the Northern Signals Area, after investigating the Operation Charlie radar incidents at RAF Neatishead, England, issues a report, no longer extant, that suggests that some of the targets are radiosonde balloons released by the USAAF's 8th Weather Squadron in Downham Market, Norfolk.

However, RAF and Air Ministry sources continue to refer to the sightings as unexplained over the following months. (Martin L. Shough, "A New Study of the British 'Ghost Airplanes' of 1947," April 2009)

1947, January 29 — Secretary of War Robert P. Patterson and Secretary of the Navy James V. Forrestal issue a memorandum that formally establishes the Armed Forces Special Weapons Project, a new agency to take over responsibility for the aspects of nuclear weapons that still remain under the military. It is to be jointly staffed by the Army and Navy. Los Alamos Laboratory's ordnance engineering Z Division and AFSWP establish themselves at Sandia Base, New Mexico, bringing the strict secrecy that has prevails at Los Alamos. (Wikipedia, "Armed Forces Special Weapons Project")

1947, February 5 — Around 7:30 a.m. Frederick Walter Flavel and his wife Emma are walking to their house in Lock, South Australia, when they see five gray, oblong objects rise apparently from the sea and move from northwest to southeast. At 9:00 a.m., Ronald Ernest Ellis and two other railroad workers in Port Augusta, South Australia, watch five white or light-pink egg-shaped objects moving across the sky from north to south at about 6,000 feet. They quiver, cast shadows on the ground, and move out of sight in a few seconds. (NICAP, "Five Objects Cast Shadows"; "C.R. Workmen See Phenomenon," *Port Augusta (S.A.) Transcontinental*, February 7, 1947, p. 1; "Objects in Sky Seen at Lock," *Port Augusta (S.A.) Transcontinental*, February 21, 1947, p. 1; Keith Basterfield, "Cold Case, Port Augusta, 5 February 1947," Unidentified Anomalous Phenomena—Scientific Research, January 29, 2011; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 329–350; Keith Basterfield, "Flying Eggs at Port Augusta, February 1947," Magonia—Down Under, December 13, 2015; Keith Basterfield, "Flying Eggs, Port Augusta 1947, Main Witness Was Interviewed in 2006," Magonia—Down Under, January 8, 2016; Keith Basterfield, "Port Augusta, South Australia, 'Flying Eggs,' 1947, Witness Deceased," Unidentified Anomalous Phenomena—Scientific Research, January 20, 2016; Keith Basterfield, "Four Months before Kenneth Arnold," Unidentified Anomalous Phenomena—Scientific Research, June 23, 2017)

1947, February 8 — A US Navy Privateer bomber flying over Sweden picks up signals that might be directing rockets. (Letter from US Naval Forces Europe, London, to Chief of Naval Operations; Jan Aldrich)

1947, February 17 — Capt. J. B. Pearson Jr., US naval attaché in London, England, sends an intelligence report to the Chief of Naval Intelligence about his conversation with Col. Westergard, head of the Airplane Design Section for the Swedish Air Ministry. Westergard tells him some 40% of the 1,000 ghost rocket sightings are "reliable." They seem to originate in Peenemünde, Germany, and fly toward Finland. The best observation is from an artillery officer who sees an object in his optical range finder and follows it for about 90 seconds. It is in level flight at 4.5 miles distance and is about 36 feet long and torpedo shaped. (J. B. Pearson Jr., "Visit to Stockholm, Sweden: Report on Pilotless Aircraft Built in Sweden and Strange Guided Missiles over Sweden," February 17, 1947; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes*, The Author, 2000, p. 7)

1947, February 28 — Capt. Emmet O'Beirne, Chief of the Defensive Air Branch, writes a memorandum to the chief of the USAF Office of Air Intelligence about the branch's interview with H. W. Flickinger, vice president for exports at Republic Aircraft Corp. after his return from Sweden: "He stated that he had seen one of the Swedish 'spook rockets' in flight, which resembled the V-1 buzz bomb but was somewhat smaller. The noise of this missile was more that of a rocket than like a V-1." (Emmet O'Beirne, "Daily Activity Report," February 28, 1947; Jan Aldrich)

1947, March 12 — President Truman appears before a joint session of Congress and commits US support to Greece and Turkey, declaring it the policy of the United States to "support free peoples who are resisting attempted subjugation by armed minorities or by outside pressures." (Wikipedia, "Truman Doctrine")

1947, March 21 — A cigar-shaped object with smoke coming from its tail is seen flying from east to west at considerable height over southern Sweden by several witnesses. It looks metallic and is about 60 feet long, flying slowly. The object seems to turn around and fly back eastward briefly. ("'Phantom Bomb' Returns to Skies over Sweden," *New York Times*, March 22, 1947, p. 8; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes*, The Author, 2000, p. 9)

1947, April — The June 1947 issue of *Amazing Stories* is devoted in its entirety to "proofs" of Richard Shaver's claims and includes four of his novellas. Vincent Gaddis has written a prescient article on UFOs, titled "Visitors from the Void." (Richard S. Shaver, "Formula from the Underworld," *Amazing Stories* 21, no. 6 (June 1947): 10–29; Vincent H. Gaddis, "Visitors from the Void," *Amazing Stories* 21, no. 6 (June 1947): 159–161; David Halperin, "The Shaver Mystery—Richard Shaver, Ray Palmer, and the Quest for Lemuria (Part 2)," July 11, 2014)

1947, April — 11:00 a.m. US Weather Bureau meteorologist Walter A. Minczewski watches a silvery disc through a theodolite while tracking a ceiling balloon in Richmond, Virginia. It is traveling east to west at less than 15,000 feet and has a flat bottom and a dome on top. (NICAP, "Silvery Disc Seen through Theodolite"; Sparks, p. 16; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 62; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes*, The Author, 2000, pp. 17–21; Clark III 375; Clark IV 419)

1947, April 15 — The US Naval Attaché in Stockholm issues a secret intelligence report, "Sweden: Guided Missiles, Alleged Rockets over Sweden." Both the naval and military attachés agree that there is nothing to the ghost rocket episode. No foreign missiles have overflown or landed in Sweden, according to the evidence available. "Swedish officials prefer to dismiss it as an unexplained press sensation." (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes*, The Author, 2000, p. 16)

1947, April 16 — Presidential advisor Bernard Baruch delivers a speech, written by journalist Herbert Bayard Swope, that uses the term "Cold War" for the first time. He declares, "Let us not be deceived: We are today in the midst of a cold war." Newspaper columnist Walter Lippmann gives the term wide currency with his 1947 book *The Cold War*. (Wikipedia, "Cold war (term)")

1947, April 17 — Col. Oliver G. Haywood Jr. of the Atomic Energy Commission writes a memorandum to Harold A. Fidler at the Clinton Engineer Works in Oak Ridge, Tennessee, saying: "It is desired that no document be released which refers to experiments with humans and might have adverse effect on public opinion or result in legal suits. Documents covering such work should be classified 'secret.'" (Advisory Committee on Human Radiation Experiments, memo, "Documents Retrieved from Oak Ridge Operations: The Atomic Energy Commission's Declassification Review of Reports on Human Experiments and the Public Relations and Legal Liability Consequences," December 6, 1994; Wikipedia, "Unethical human experimentation in the United States")

1947, Late April or early May — 12:05 p.m. Mrs. William Down and Mrs. H. G. Olavick of Tucson, Arizona, see an unusual, fleecy cloud in an otherwise cloudless sky. Moving around it in "yo-yo fashion" are a number of small discs with a dull-white finish. They move up and down and sideways, occasionally disappearing into or behind the cloud. They watch the objects for 5–7 minutes, then all the discs disappear above the cloud, while a larger object emerges from the cloud and moves eastward. Behind it comes a V-formation of nine of the smaller discs, which then climbs at high speed toward the northeast and disappears in 2–3 seconds. The witnesses assume the objects are some new type of aircraft. (Bloecher, p. ix; Herbert S. Taylor, "Satellite Objects and Cloud Cigars," *IUR* 29, no. 1 (Spring 2004): 4)

1947, May — Farmer H. Nettlebeck is in his field near Gogeldrie, New South Wales, when he hears a swishing noise. Looking up, he sees five metallic objects flying in a V formation. They appear to be at 2,000 feet altuitude and moving at 1,000 mph. ("Flying Discs Seen over Gogeldrie," *Murrumbidgee Irrigator* (Leeton, N.S.W.), July 8, 1947, p. 2)

1947, May — 9:00 p.m. Harry Bentrup Jr. is on his porch in Jennings, Missouri, when a circular object surrounded by a ring of luminous green lights swoops in quickly from the east, hovers above him for 15 seconds, then takes off to the west. (MUFON case file)

1947, May 1? — Mrs. W. C. Clark of Memphis, Tennessee, watches two objects "like tennis balls" fly over her yard. ("Three Memphians Say They Saw Objects," *Memphis (Tenn.) Commercial Appeal*, July 7, 1947, p. 2)

1947, May 1 — Rear Adm. Roscoe H. Hillenkoetter replaces Hoyt Vandenberg as Director of Central Intelligence.

1947, May 5 — Hillenkoetter writes to Baruch, saying that his CIRES plan is "on the verge of being put into effect." (Jan Aldrich)

1947, May 10 — Rose Slawuta of Newark, New Jersey, sees a shining, elliptical object with a gold band around it approaching from the west. ("'Flying Saucers' Keep on Whirling and More from Area Join 'I See' Club," *Newark (N.J.) Star-Ledger*, July 7, 1947, pp. 1–2; Bloecher, p. I-2)

1947, May 14 — 8:30 p.m. A spherical object 3-4 feet in diameter is seen over Budapest, Hungary, passing southeast to northwest at about 3,000 feet altitude in a flat trajectory. (Allied Control Commission for Hungary; George Mitrovic, *The Gateways to the Gods*, Kindle, 2012)

1947, May 15 — 4:11 p.m. A Hermes test missile (V-2) at White Sands Proving Ground, New Mexico, goes off course and lands 6 miles east of Alamogordo five and a half minutes after launch. Commanding Officer Lt. Col. Harold R. Turner blames "peculiar phenomena" for the accident. The official explanation is that the V-2 had a defective fin. Trade consultant and former state representative Jon Andrew Kissner finds evidence in 1994 that possibly another object was seen in the vicinity of the rocket after the launch that might have been responsible for the

failed test. (Wikipedia, "Hermes program"; "V-2 Goes Astray, Lands in Six Miles of Alamogordo," *Las Cruces (N.Mex.) Sun-News*, May 16, 1947, p. 1; Good Need, pp. 55–57)

1947, May 17 or 19 — 8:30 p.m. Byron B. Savage, an RCA field engineer, sees a frosty-white or silvery elliptical object about the size of a B-29 heading northwest at 10,000 feet over Oklahoma City, Oklahoma, at three times the speed of a jet (about 1,800 mph). After it noiselessly passes overhead, he hears a sound "like the rushing of air." (NICAP, "Round and Flat Object Observed by Field Engineer"; Sparks, p. 16; "Whatever That Object Was, Sooner Says He Saw One," *Miami (Okla.) Daily News-Record*, June 26, 1947, p. 7; *Oklahoma City Times*, June 26, 1947; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes*, The Author, 2000, pp. 27–28)

1947, May 19 — Around 12:30 p.m. Navy veteran Dean A. Hauser and six other Pike's Peak Railway workers (including Ted Weigand, Marion Hisshouse, T. J. Smith, L. D. Jamison) at Manitou Springs, Colorado, are taking a lunch break when they watch a silver object come in from the northwest, hover overhead, and gyrate at 1,000 feet. The UFO is moving "erratically in wide circles" and reflects light like it is made of metal. After 20 minutes it disappears in a straight line to the west-northwest. ("Manitou Vets Relate Story: Another 'Disk' Seen," *Denver Post*, June 28, 1947, p. 1; Bloecher, p. I-1; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes*, The Author, 2000, pp. 29–30; Clark III 375; Clark IV 419)

1947, Late May — 11:00 a.m. Colden R. Battey, a physician from Augusta, Georgia, is fishing 10 miles off St. Helena Sound, near Beaufort, South Carolina. He notices a formation of four disc-like objects flying overhead in a southeasterly direction at a terrific rate of speed. The discs appear to be spinning on their axes and are at an estimated altitude of 20,000 feet. They are silvery and appear highly polished, and on their undersides Battey can see a circular rim or projection, about one-quarter of the way from the edges. No sound is heard as they fly overhead. The formation speeds out of view in less than 20 seconds. (NICAP, "Four Discs Flying Overhead"; "'Flying Saucers' Seen by Doctor near Beaufort," *Orangeburg (S.C.) Times and Democrat*, July 5, 1947, p. 1; Bloecher, p. I-2; Clark III 375; Clark IV 419)

1947, May 29 — 7:30 p.m. A Hermes II test missile (a modified V-2) is launched from White Sands Proving Ground in New Mexico to test the "Organ," a series of ramjet air intakes designed to take pressure measurements. The missile travels south instead of north and lands in the Tepeyac Cemetery, 3 miles south of Juárez, Mexico, creating an international incident. It leaves a crater 50 feet wide and 24 feet deep. German scientists Wernher von Braun and Ernst Steinhoff are conducting the test. (Wikipedia, "Hermes program"; J. Terry White, "The Hermes II Incident," White Eagle Aerospace, May 2, 2011)

1947, June — The *Bulletin of the Atomic Scientists* puts the first illustration of its Doomsday Clock on the cover of the June issue. Set at seven minutes before midnight, the clock becomes a metaphor for threats to humanity from unchecked technological advances. (Wikipedia, "Doomsday Clock")

1947, June — AMC civilian engineer W. R. Presley takes a muddy photo of a UFO at Oak Ridge, Tennessee. It is most likely a photographic flaw. (*Hynek UFO Report*, p. 142)

1947, June 2 — Private pilot Forrest Wenyon is flying over Rehoboth Beach, Delaware, and sees a silvery, jar-shaped object cross in front of his plane. It has a silver-white, fiery exhaust. (NICAP, "Jar-Shaped Object Crosses in Front of Aircraft"; Sparks, p. 16; Bloecher, p. III-9)

1947, June 4 — Project Mogul flight number 4 is allegedly launched (unofficially or unsuccessfully or delayed or without a Rawin target) from Alamogordo Army Air Field, but there is no evidence that it can account for the debris later found on Mack Brazel's ranch near Corona, New Mexico. (Kevin D. Randle, "The Project Mogul Flights and Roswell," *IUR* 19, no. 6 (Nov./Dec. 1994): 6–7, 23; Robert J. Durant, "Project Mogul Still a Flight of Fancy," *IUR* 26, no. 1 (Spring 2001): 17–27; David Rudiak, "The Phony Mogul Balloon Trajectory," 2002; Kevin D. Randle, "Mogul and Roswell," A Different Perspective," July 11, 2013; Kevin D. Randle, "A Few Facts about Project Mogul," A Different Perspective, August 12, 2013; Kevin D. Randle, "Truth about Mogul," A Different Perspective, April 4, 2016; Kevin D. Randle, "Mogul Flight No. 4: The End," A Different Perspective, November 27, 2022; Clark IV 427; Kevin D. Randle, "David Rudiak's Analysis against Mogul," A Different Perspective, February 16, 2025)

1947, June 5 — US Secretary of State George C. Marshall gives an address at the Harvard University commencement in which he offers American aid in a sweeping plan to invest in and promote post-war European recovery and reconstruction. (Wikipedia, "Marshall Plan")

1947, June 9 — A still-unlocated air intelligence summary is released, alleging that the Soviets in eastern Siberia are producing (or may be able to produce) 1,400 (or 1,800) aircraft based on the Horten brothers' VIII-type, low-aspect, disc-shaped design by 1952. A Russian aviation historian thinks that the factories in question are at the

time producing copies of the German Messerschmidt Me 262 jet fighter. A correct, more detailed summary of the intelligence report is published in December 1948 in Air Intelligence Report Number 100-203-79, "Analysis of Flying Object Incidents in the U.S." (Jan Aldrich)

1947, June 10 — 3:30 p.m. Gyorik Ferenc and others on Arena Street [modern Dózsa György út] in Budapest, Hungary, watch four yellow-red discs moving toward the northwest in a straight-line formation for about 30 seconds. They are about 165 feet apart. The objects make a small arc around a corner of a park before disappearing. (Project Blue Book record; Joe Brill, "UFO's behind the Iron Curtain," *Skylook*, no. 76 (March 1974): 8)

1947, June 12 — 6:15 p.m. Lovena Erickson sees two high-speed, round objects at a high altitude over Weiser, Idaho. They move up and down twice and leave a vapor trail that persists for more than an hour. (NICAP, "June 12, 1947, Weiser, Idaho"; Sparks, p. 17; US National Archives, Record Group 341, "Weiser, Idaho, June 1947"; Bloecher, p. II-8)

1947, June 18 — Day. E. H. Sprinkle is one of a half-dozen Eugene, Oregon, residents who spot a formation of round objects "racing overhead" on a course to the northeast. Watching from Skinner's Butte outside town. Sprinkle takes a snapshot of the objects with an inexpensive camera as they race over. Enlargements of the photograph show "seven dots" in a formation "shaped like an X or a Y, lined up across the sky." Newspaper photographers say the dots "might be a fault in the developing process" that sometimes appears on a negative that has not been agitated properly in the developer. ("Local Man Asserts Flights Seen Here," *Eugene (Oreg.) Guard*, June 26, 1947, p. 1; "Others Report Flying Discs," *Salem (Oreg.) Capital Journal*, June 27, 1947, p. 13; "Reports of Puzzling 'Discs' Flying over Cascades Come from Northwest Residents," *Roseburg (Oreg.) News-Review*, June 27, 1947, p. 1; Bloecher, p. IV-3)

1947, June 19 — USAAF Col. Albert Boyd reaches a world airspeed record of 624 mph in a Lockheed P-80R Shooting Star at Muroc AFB [later Edwards AFB], California. (Wikipedia, "Albert Boyd")

1947, June 19 — Maj. Gen. Stephen Chamberlin, head of War Department Intelligence, authorizes three electronic signals intelligence flights between July 1 and August 1 to look for radio signals over the Baltic Sea. The Swedish military is told that they are training flights. (Jan Aldrich)

1947, June 21 — 11:55 a.m. Guy R. Overman watches several silvery objects moving below a plane at Spokane, Washington. (NICAP, "Eight Disc-Shaped Objects As Big As a House"; Sparks, p. 17; Bloecher, p. II-18)

1947, June 21 — Log salvager Harold A. Dahl is patrolling east of Maury Island, Washington, with his 15-year-old son Charles and two crewmen when he allegedly sees six doughnut-shaped objects. Five of them are circling the sixth, which seems distressed. When it is directly above the boat at 500 feet, it supposedly spews some hot slag-like material that breaks Charles's arm and kills his dog. Dahl claims he filmed the objects. (Wikipedia, "Maury Island incident"; [Curtis Fuller], "The Mystery of the Flying Disks," *Fate* 1, no. 1 (Spring 1948): 18–48; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers*, Palmer, 1952, pp. 24–40; Ruppelt, pp. 24–27; John A. Keel, "The Maury Island Caper," *UFOs 1947–1987*, Fortean Tomes, 1987, pp. 40–43; Kevin D. Randle, "Maury Island UFO Crash," A Different Perspective, July 17, 2010; Clark III 721; Brian Dunning, "Maury Island: The Government's Alien Artifacts," Skeptoid podcast, no. 820, February 22, 2022; Kevin D. Randle, "Maury Island and National Geographic," A Different Perspective, November 19, 2024; Clark IV 789)

1947, June 22 — Dahl claims he is visited by a mysterious dark-suited man who knows all about the sighting. He tells his associate Fred L. Crisman, and they allegedly go to the beach to pick up fragments. Dahl mails Ray Palmer in Chicago, Illinois, some fragments. (Brian Burden, "MIBs and the Intelligence Community," *Awareness* 9, no. 1 (Spring 1980): 6–7, 11–13; J. B. Delair, "Some Observations on the Previous Article," *Awareness* 9, no. 1 (Spring 1980): 13–17; Clark III 721, 726; Kenn Thomas, *Maury Island UFO: The Crisman Conspiracy*, IllumiNet, 1999; Charlette LeFevre and Philip Lipson, "The Maury Island UFO Incident," February 2014; Clark IV 789, 807)

1947, June 22 — Edward Louis DeRose in Greenfield, Massachusetts, sees a small, round-shaped, silvery-white object moving in a northwesterly direction faster than a speeding plane at an estimated altitude of 1,000 feet. The object stays in view for 8–10 seconds until obscured by a cloud bank. It reflects the sunlight strongly as if is made of polished aluminum or silver. (Air Force Base Intelligence Report, "Flying Discs," July 30, 1947; Kevin D. Randle, "Roswell, Nathan Twining, and the Mini-EOTS," A Different Perspective, October 6, 2014)

1947, June 22 — 3:30 p.m. G. Oliver Dickson sees a shiny disc "a little like a blimp" flying north to south about 3,000 feet above Mount Franklin just north of El Paso, Texas. He estimates it is about 40 feet across and 5 feet thick. ("More El Pasoans Report Seeing 'Flying Discs' in Southwest," *El Paso (Tex.) Times*, June 29, 1947, pp. 1–2)

1947, June 22 — Evening. Yale University astrophysicist Lyman Spitzer is speaking on WTIC radio in Hartford, Connecticut, and speculates that if life on Mars developed a bit earlier than on earth, it is possible that Martians have been civilized for millions of years. "Unless they had spent some time in a large city or had landed sufficiently recently to be photographed, we would have no record of their being here," he says, and that "any few

men who had seen them would probably not be believed by anyone else." ("Mars May Be Peopled, Says Yale Speaker," *Hartford (Conn.) Courant,* June 23, 1947, p. 1; Clark III 455; Clark IV 500)

1947, June 23 — Afternoon. Disabled stunt pilot Richard Rankin views 10 flat, circular objects flying in a V-formation over his house in Bakersfield, California. About two hours later, 7 of the objects are seen flying in the opposite direction. (Sparks, p. 17; "Pilot Recalls Seeing Discs," *Portland Oregonian,* July 3, 1947, p. 11, via FBI files, p. 15; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers,* 1952, pp. 69–71; Bloecher, p. II-3; Kevin D. Randle, "More Pre-Arnold UFO Sightings," A Different Perspective, June 30, 2013)

1947, June 23 — 9:30 p.m. Richard L. Bitters and his wife Martha are returning from a movie in Wapakoneta, Ohio, when they see a saucer-like object flying an uneven course in the sky. ("Saucer Just Didn't Fit Editor's Idea of a 'Scoop,'" Madison *Wisconsin State Journal,* July 7, 1947, p. 2; Bloecher, p. III-6)

1947, June 24 (or 30) — Afternoon. Bill Schuening, a farmer, is driving his pickup truck down a remote rural road 25 miles north of Pendleton, Oregon, when he hears a loud humming sound. Coming over a rise, he sees in a nearby field a large disc-shaped object hovering 5–6 feet off the ground. He can also see two short (3 feet tall) figures wearing green suits and white helmets standing underneath the object. The figures suddenly vanish, and the craft then shoots towards the Columbia River, makes a big circle, and flies towards the mountains. (NICAP, "Man Sees Figures Standing near Disc"; "Two Pendleton Residents Tell of Mystery Discs," *Klamath Falls (Oreg.) Herald and News,* June 30, 1947, p. 1; "Stories of UFOs Started in Pendleton 40 Years Ago," Pendleton *East Oregonian,* June 24, 1987, via *UFO Newsclipping Service,* no. 219 (October 1987): 10; Clark III 267; Patrick Gross, URECAT, November 7, 2018; Clark IV 307)

1947, June 24 — 1:50 p.m. Railroad engineer Charles Kastl sees 9 or 10 spinning discs in the air about 12 miles east of Joliet, Illinois. They are a string of flat circular objects "going faster than anything I've ever seen." Kastl can see no connecting link between them, but they act as though the leading disc has a motor in it to power the others, because when it flips, the others do as well. When it rights itself, the others also right themselves. (NICAP, "Engineer Reports 10 Shiny Flat Discs"; "Flying Discs Seen by Railroad Man," *Cedar Rapids (Iowa) Gazette,* June 28, 1947, p. 2; Kevin D. Randle, "The June 23, 1947 UFO Sighting," A Different Perspective, March 20, 2013)

1947, June 24 — 3:00 p.m. Boise, Idaho, businessman Kenneth Arnold, flying his CallAir Model A-2 from Chehalis to Yakima, Washington, sees a string of nine objects flying in an echelon formation past Mount Rainier, Washington. At first he assumes they are jets, but he can see no trails. They cover the 50-mile distance between Rainier and another peak in 1 minute 42 seconds. He estimates their speed to be at least 1,200 mph. The objects swerve in and out of the smaller peaks, flipping from side to side in unison, dipping, and presenting their lateral surfaces, which reflect the bright sunlight and cause the flashes he saw earlier. They are in view for about two and a half minutes and are last seen heading south over the last high peak of Mount Adams. Arnold tells the airport staff about it in Yakima at 4:00 p.m. and they call ahead to Pendleton, Oregon, to alert them of Arnold's arrival at an air show and his story. A large crowd awaits him, and a discussion follows. The consensus is that Arnold has seen guided missiles. But no such technology exists at the time that can match the objects' description and performance, and the late 1990s explanation that Arnold observed a flight of white pelicans is equally improbable. Researcher Martin Shough concludes in 2010: "Examination of the sighting report in detail improves its evident internal consistency, rather than degrading it, and study of the principal contending explanations reveals that they are each very much less attractive when tried out in quantitative detail against the best information than they may appear at first sight." (Wikipedia, "Kenneth Arnold UFO Sighting"; [Project Blue Book file]; NICAP, "Kenneth Arnold Sighting"; Center for UFO Studies, [clippings and reports]; "'Mystery Airplanes' Seen near Mt. Rainier," *Corvallis (Oreg.) Gazette-Times,* June 25, 1947, p. 1; Kenneth Arnold, "I Did See the Flying Disks!" *Fate* 1, no. 1 (Spring 1948): 4–10; Kenneth Arnold, *The Flying Saucer As I Saw It,* The author, 1950; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers,* Palmer, 1952, pp. 9–13; Bloecher, p. Liberation Times, September 2, 2024; Clark IV 196–199, 482)

1947, June 24 — 3:30 p.m. Idaho Lieutenant Governor Donald S. Whitehead and Justice of the Peace Jacob M. Lampert see an object with a brilliant head and a smoky tail from an office window in downtown Boise, Idaho. It dips from view after about 20 minutes. ("Whitehead, Lampert, Join 'Disc List,'" Boise *Idaho Statesman*, July 3, 1947, p. 9; Bloecher, pp. III-18–19)

1947, June 24 — Afternoon. Fred M. Johnson, a prospector in the Mount Adams, Washington, area, sees 5-6 oval objects with tails about 30 feet in diameter. He watches one through a telescope. They are not flying in any sort of formation and as they bank in a turn, the sunlight flashes off them. As they approach, Johnson notices that his compass begins to spin wildly. When the objects finally vanish in the distance, the compass returns to normal. Johnson's report is the very first "unidentified" case in the Project Sign files. (NICAP, "Prospector Compass Incident"; Sparks, p. 17; Bloecher, p. IV-3; Schopick, pp. 1–2; Loren E. Gross, *UFOs, a History: Volume 1, 1947*, The Author, February 1991, pp. 48-49; Olsen, sec. 3, p. 2; Project 1947, "UFO Documents, 1947"; Bruce Maccabee, "The Arnold Phenomenon: Part Three," *IUR* 20, no. 3 (May/June 1995): 6–7; Martin Shough, "The Singular Adventure of Mr. Kenneth Arnold," June 2010, pp. 106, 109–110; Clark III 170–171; Randle, *Levelland*, 2021, pp. 58–59; Clark IV 197–198)

1947, June 25 — Kenneth Arnold goes to the *East Oregonian* office in Pendleton, Oregon, and speaks with reporters Nolan Skiff and William C. Bequette. Arnold says the "saucer-like" objects were racing over the Cascade Mountains with a peculiar weaving motion "like the tail of a Chinese kite." Bill Bequette writes the first saucer news story for the newspaper. He does not use the term "flying saucer," but headline writers in other papers use it (such as the *Philadelphia Inquirer* on June 26), and reporters start picking it up. ("Impossible! Maybe, But Seein' Is Believin', Says Flier," Pendleton *East Oregonian*, June 25, 1947, p. 1; "Flying Saucers Puzzle Pilot," *Philadelphia Inquirer*, June 26, 1947, p. 1; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers*, 1952, Palmer, pp. 13–15; Pierre Lagrange, "A Moment in History: An Interview with Bill Bequette," *IUR* 23, no. 4 (Winter 1998): 15, 20; "Saturday Night Uforia: 'It Seems Impossible—But There It Is,'" Daily Kos, April 18, 2009; Phil Wright, "The Sighting," Portland *East Oregonian*, June 16, 2017; Clark III 170)

1947, June 25 — Shortly after 12:00 noon. W. I. Davenport is working on the roof of a house at 82nd Street and Holmes Road in Kansas City, Missouri, when he hears the sound of a motor. Looking up, he sees 9 objects approaching from the east. They are aluminum-colored and leave vapor trails. ("Puzzle in Sky Whiz," *Kansas City (Mo.) Star*, June 26, 1947, p. 6)

1947, June 26 — 2:00 a.m. Mrs. J. M. Harrison watches a large fireball pass toward the northwest from her residence at 4639 South Oakenwald, Chicago, Illinois. It breaks up into two dozen small discs that whirl around rapidly. ("Dr. Urey Scoffs at 'Atom Angle' to Flying Disks," *Chicago Tribune*, July 6, 1947, p. 8)

1947, June 26 — Kenneth Arnold is interviewed live on KWRC radio in Pendleton, Oregon, by broadcaster Theodore A. "Ted" Smith. (Patrick Gross, "About the June 25, 1947, Interview on WKPG Radio by Bill Bequette"; "Kenneth Arnold Interviewed by Bill Bequette [actually Ted Smith]," Nutsandbolts UFO YouTube channel, December 12, 2010)

1947, June 26 — Northrop delivers a second four-engine XB-35 flying wing aircraft to Muroc AFB [now Edwards AFB], California. (Wikipedia, "Northrop YB-35")

1947, June 27 — 9:50 a.m. Mrs. W. B. Cummings is driving about 5 miles southeast of San Antonio, New Mexico, when she sees a bright silver object descending quickly in the east. It leaves a short white trail. White Sands officials say there has been no missile testing since June 12. ("More El Pasoans Report Seeing 'Flying Discs' in Southwest," *El Paso (Tex.) Times*, June 29, 1947, p. 1)

1947, June 27 — Pentagon Army AF Public Relations Officer Capt. Tom Brown says the army has no idea what the discs are. (Loren E. Gross, *UFOs, a History: Volume 1, 1947*, The Author, February 1991, p. 16)

1947, June 27 — In a United Press dispatch from Pendleton, Oregon, Kenneth Arnold expresses frustration over the furor that his saucer sighting has caused. A preacher has called him from Texas to say that the flying discs are "harbinger of doomsday." A woman recognizes Arnold in a Pendleton café and runs out shrieking that he is "the man who saw the men from Mars." He says the whole thing has gotten out of hand: "Half the people I see look at me as a combination Einstein, Flash Gordon, and screwball. I wonder what my wife back in Idaho thinks." ("Report of 'Flying Saucers' Causes Furor; Texas Preacher Calls Flock for World's End," *Medford (Oreg.) Mail Tribune,* June 27, 1947, p. 1)

1947, June 27 — Day. Capt. Robert D. Dwan, a pilot out of Alamogordo Army Air Field [now Holloman AFB], New Mexico, is flying a private plane near Engle, New Mexico, at 3,000 feet, when he looks down and sees a "ball of fire, with a fiery blue tail behind it." The object is about 2,000 feet below him, and he is "certain it is a meteorite." The object disintegrates as he watches it. (Bloecher, pp. III-9–10)

1947, June 27 — Afternoon. Clyde Homan sees two groups of loosely bunched objects, rocking back and forth as they fly noiselessly above Woodland, Washington. The objects are bright, flat, and moving at an estimated 600 mph. (NICAP, "Two UFO Groups Sighted"; "Woodland Man Sights Disks at Close Range," Portland *Oregon Journal,* June 28, 1947; "More Folks Declare They Saw 'Saucers,'" *Twin Falls (Idaho) Times-News*, June 29, 1947, p. 1; Bloecher, pp. II-1–2)

1947, June 28 — 1:15 p.m. Lieut. Eric B. Armstrong, flying an F-51 at 6,000 feet 30 miles north of Lake Mead, Nevada, sees a formation of 5–6 objects streak by his plane. They are in close formation at an estimated speed of 285 mph. (NICAP, "Formation of 5–6 Objects Head toward P-51"; Sparks, p. 17; Bloecher, p. III-10; Michael D. Swords, "The Lost Words of Edward Ruppelt," *IUR* 20, no. 2 (Mar./Apr. 1995): 14–15; Clark III 436; Clark IV 482)

1947, June 28 — 9:20 p.m. Two pilots and two intelligence officers (Capt. Wilson H. Kayko, Capt. John H. Cantrell, 1st Lt. Theodore Dewey, and Capt. Redman) at Maxwell Field [now Maxwell AFB] in Montgomery, Alabama, see a bright light zigzagging across the sky for 25 minutes. When it is directly overhead, the UFO makes a sharp 90° turn and disappears to the south. (NICAP, "Object Zig-Zags with Bursts of Speed"; Bloecher, p. III-3; Sparks, p. 18)

1947, June 29 — 1:15 p.m. Carl J. Zohn, a guided missile expert with the Naval Research Laboratory, is 20 miles east-northeast of Las Cruces, New Mexico, to observe a V-2 rocket launch scheduled for July 3. Between 1:00 and 1:30 p.m., he is riding out to the testing grounds with John R. Kauke and NRL scientist Curtis C. Rockwood (and his wife Nancy) when they see a silvery disc flying at 8,000–10,000 feet. It has no appendages, wings, tail, or propellers. After about 60 seconds it disappears. (NICAP, "Naval Research Lab Rocket Scientists See Silver Discs"; Sparks, p. 18; "Reports from Experts Lend More Serious View to 'Discs,'" *Washington (D.C.) Evening Star,* July 8, 1947; "Stiff Necks–Goggle Eyes Order of the Day As 'Discs' Continue," *Clovis (N.Mex.) News-Journal,* July 8, 1947, p. 1; "War Department Is Puzzled about Flying Saucers Too; Army Keeping an Open Mind," Reno *Nevada State Journal,* July 9, 1947, p. 7; Bloecher, p. III-18; Evelyne Tsezana, "Grandpa Zohn Saw UFOs in New Mexico," Geni, April 6, 2011; Curt Collins, "UFOs and Autos," The Saucers That Time Forgot, January 11, 2024)

1947, June 30 — 9:10 a.m. Naval Lt. William G. McGinty is flying a P-80 from Williams AFB [now Phoenix-Mesa Gateway Airport], Arizona, near the Grand Canyon when he observes two circular objects diving at inconceivable speed and landing 25 miles south of the canyon. (NICAP, "P-80 Pilot Sees Circular Objects Dive and Land"; Sparks, p. 18; Bloecher, p. II-12; Michael D. Swords, "The Lost Words of Edward Ruppelt," *IUR* 20, no. 2 (Mar./Apr. 1995): 14–15; Clark III 436; Clark IV 482)

1947, June 30 — Eighth Air Force Brig. Gen. Roger M. Ramey and intelligence officer Col. Alfred Kalberer hold a press conference in Fort Worth, Texas, on the flying discs. Ramey thinks people are "seeing heat waves." Kalberer labels the sightings as "Buck Rogers stuff." (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 June 24th–July 6th, Supplemental Notes*, The Author, 2000, p. 17)

1947, Summer — Naval Cmdr. L. H. Witherspoon sees a disc-shaped UFO flash over the airport at Pittsburg, Kansas. (UFOEv, p. 30)

1947, July — Around this time the Air Force Research and Development office of the Air Materiel Command organizes an informal project at Wright Field in Dayton, Ohio, to collect UFO reports in the interests of national security. The project officer at Wright Field is Lt. Col. Edward G. Nabell Jr. (Sparks, p. 13; Clark III 937; Clark IV 1047)

1947, Early July — A cyclist near Amfreville-la-Mi-Voie, Seine-Maritime, France, encounters an oval object, 10 feet long and 5 feet high, resting on the road 100 feet in front of her. Two small beings dressed in outfits and headgear are busy around it. When she honks her horn, the entities scurry into the object, entering it through a 20-inch opening. The UFO rises, oscillates, and streaks away. (Jimmy Guieu, "Enquête effectuée à Rouen," *Phénomènes Inconnus,* new ser., 4 (1972): 7; Patrick Gross, URECAT, August 81, 2006; Clark III 267; Clark IV 307)

1947, July 1 — Day. Animal ecologist Charles K. Gunn, his wife Edna, and two passengers are driving near North Bedeque, Prince Edward Island, when they see a bright, shapeless object speeding along in the sky for 30 seconds. (Bloecher, p. III-18)

1947, July 1 — A target is picked up on radar at Chitose Air Base, Hokkaido, Japan, moving 16 miles north at speeds in excess of 500 mph. The blip instantly reverses course four times, breaks into two objects, then merges into one again. (Col. James F. Olive Jr., "Radar Pick-Ups of High-Speed Targets in the Far East," Memorandum for Assistant Chief of Air Staff, Washington, D.C., September 26, 1947)

1947, July 1 — Col. Alfred Kalberer holds another press conference in Fort Worth, Texas, and brings astronomer Oscar Monnig along to comment that the discs are "an interesting study in human psychology." (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 June 24th–July 6th, Supplemental Notes*, The Author, 2000, pp. 23–24)

1947, July 1 — Night. Albuquerque, New Mexico, Chamber of Commerce official Max Hood sees a bluish disc zigzagging for about 30 seconds. (Bloecher, p. III-17; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 June 24th–July 6th, Supplemental Notes*, The Author, 2000, pp. 23)

1947, July 1 — 10:10 p.m. Meteorologist Ellwood E. Unger and his wife watch a round, orange, luminous object going about 100 mph after they leave a movie theater in Louisville, Kentucky. ("Here's the Latest Disk Dope—It's Strictly From Unger," *Louisville (Ky.) Courier-Journal*, July 3, 1947, p. 1; Bloecher, p. III-2; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 June 24th–July 6th, Supplemental Notes*, The Author, 2000, p. 23)

1947, July 1? — 11:00 p.m. Mrs. A. M. King is with another passenger on the deck of the Union-Castle Mail *SS Llandovery Castle* as it is steaming through the Mozambique Channel. They notice a star-like object traveling fast toward the ship. It shines a strong beam of light on the water within 150 feet of the ship, then descends, the beam shortening and becoming brighter as it nears the water. Soon the light switches off and they can see a metallic object that looks like a cigar with the end cut off. It remains about 20 feet above the sea, moving parallel with the ship. King estimates it is about four times the length of the ship and four times as tall. After a few seconds, a large flame erupts from the rear of the object. It vanishes soundlessly in the darkness. (Lorenzen, *FS Hoax*, pp. 18–19; Loren E. Gross, *The Fifth Horsemen of the Apocalypse: UFOs, a History, 1947 June 24th–July 6th, Supplemental Notes*, The Author, 2000, pp. 25–30)

1947, July 1–3? — According to Annie Jacobsen's informant, EG&G engineer Alfred O'Donnell, the upcoming Roswell, New Mexico, crashes are the result of a psychological warfare operation by Soviet leader Joseph Stalin to fly into US airspace two disc- or wing-shaped aircraft based on a Horton brothers design obtained at the end of World War II. One craft allegedly contains living dwarves or children (human guinea pigs) who had been surgically altered using similar methods to those used in Auschwitz concentration camp by Nazi doctor Josef Mengele. This aircraft is remotely controlled by the crew of the second craft. The idea is to land the first aircraft in a visible location in the US, perhaps in Washington, D.C. The children would exit the craft and present themselves to the highest echelons of the government. However, the two aircraft crash in the New Mexico desert and, he claims, the Atomic Energy Commission is put in charge of the remains. (Jacobsen, *Area 51*, pp. 367–374; Kremlin 30–36)

1947, July 1–3 — US Signal Corps radar sites in southern New Mexico and one at Kirtland Air Force Base near Albuquerque allegedly track an object "flitting around" the sky, frequently returning but finally disappearing on the night of July 4. Much of this story originates with now-discredited Roswell witness Frank Kaufmann, who claims he was ordered to bring a group of radar experts to Alamogordo to evaluate unexplained radar targets at White Sands Missile Range. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 159; Kevin D. Randle, *A History of UFO Crashes*, Avon, 1995, p. 8; Jim Wilson, "Roswell Plus 50," *Popular Mechanics* 174 (July 1997): 48–53; Kevin D. Randle, "Frank Kaufmann, Roswell Witness," *IUR* 27, no. 3 (Fall 2002): 8, 17–19; Mark Rodeghier, "Frank Kaufmann Exposed," *IUR* 27, no. 3 (Fall 2002): 9–11, 26)

1947, July 2 — 8:00 p.m. Spectators at a baseball game at the Cincinnati (Ohio) Milling Machine Company watch two slow-moving discs hovering above the field for 10 minutes. ("100 at Ball Game Tell of Seeing Two Mystery Saucers," *Cincinnati (Ohio) Post*, July 7, 1947, p. 1)

1947, July 2 — 9:50 p.m. Mr. and Mrs. Dan Wilmot see an oval object like two inverted saucers pass over their house moving northwest in Roswell, New Mexico. (Sparks, p. 19; "No Details of Flying Disk Are Revealed," *Roswell (N.Mex.) Daily Record*, July 8, 1947, p. 1; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 159; Kevin D. Randle and Donald R. Schmitt, "When and Where Did the Roswell Object Crash?" *IUR* 19, no. 1 (Jan./Feb. 1994): 13–14; Patrick Gross, "Mr. and Mrs. Dan Wilmot," April 24, 2017; Patrick Gross, "Paul Wilmot," April 25, 2017)

1947, July 3 — 8:55 a.m. William F. LeFevre watches a shiny, mirror-like disc zoom over River Drive near West 8th Street in Denver, Colorado, at several thousand feet and make a 45° turn before vanishing toward the southwest. (*Denver Post*, July 5, 1947; Michael David Hall and Wendy Ann Connors, *Alfred Loedding and the Great Flying Saucer Wave of 1947,* Rose Press, 1998, p. 44)

1947, July 3 — Morning. Project Mogul Flight number 8, a cluster of plastic balloons, is launched from Holloman AFB, New Mexico. (Kevin D. Randle, "The Project Mogul Flights and Roswell," *IUR* 19, no. 6 (Nov./Dec. 1994): 6–7, 23)

1947, July 3 — 2:30 p.m. Amateur astronomer John F. Cole watches a group of 10 objects moving northwest near Harborside, Maine, at 600–1,200 mph. Each is 50–150 feet wide. The objects are milling about in loose formation like a "swarm of bees" for 10–15 seconds. (NICAP, "Astronomer Observes Ten Large Objects"; Sparks, p. 19; Bloecher, p. III-18; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects,* Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 60)

1947, July 3 — The *St. Louis Post-Dispatch* reports that the Air Research Center at Wright Field, Ohio, and the army intelligence service are looking into the flying discs. An INS dispatch states that Commander of the Army Air Force Gen. Carl Spaatz has asked Wright Field to look into such reports. Air Materiel Command's Lt. Gen. Nathan F. Twining tells *Idaho Evening Statesman* reporter David N. Johnson that officials are indeed looking into the discs and that Wright Field has no comparable technology. Lieut. William C. Anderson, Wright Field public relations officer, says there is no confirmation that the discs exist. Maj. Paul Gaynor says the Army Air Force needs more concrete information. German scientists working at Wright Field are asked about the discs, but they say they have heard nothing about any such experiments in Europe. ("Army Gets Around to Checking 'Flying Discs' and Is Mystified," *St. Louis Post-Dispatch,* July 3, 1947, p. 1; Dave Johnson, "AAF Investigates Reports of Mysterious Air Objects," Boise *Idaho Daily Statesman,* July 3, 1947, pp. 1, 9; "Military Says 'No Results' in Disc Probe," Boise *Idaho Daily Statesman,* July 4, 1947, p. 2; "Weird 'Flying Saucers' Seen over 10 States," *New York Daily News,* July 4, 1947, Final ed., p. 8; "Flying Disc Riddle Baffles Officials," *Long Beach (Calif.) Independent,* July 4, 1947, pp. 1, 5)

1947, July 3 — 5:45 p.m. Farmer Ewen McNeill in Village Green, east of Charlottetown, Prince Edward Island, sees a black, rocket-shaped projectile trailing a blindingly white flame and a smoke trail pass overhead as he is working his fields. It seems to be flying at 10,000 feet and is visible for 15 seconds. Around the same time, a resident of Augustine Cove watches an "object the size of an apple" traveling south at high speed. ("'Saucers' Coast-to-Coast Giving Canadians Headache," *Windsor (Ont.) Daily Star,* July 7, 1947, pp. 1–2; Bloecher, p. II-17; Clark III 528; Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, p. 64; Clark IV 577)

1947, July 3 — 6:30 p.m. Mrs. Walter Johnson and her family see 8–9 discs flying out of the southern sky 6 miles west of Saint Maries, Idaho, over the St. Joe River. The objects came in "very fast, slow down jerkily, then flutter to the ground like leaves." Mrs. Johnson thinks the objects are about the size of a "five-room house." When they reach a clearing in the timber, they appear to "settle down" a few at a time. Mrs. Johnson reports the sighting to intelligence officers at the Spokane Army Air Base [now Fairchild AFB], and an intensive air search is carried out by two missions of the National Guard's 116th Fighter Group. Local sheriff's deputies also make a ground search, but no traces of a landing can be found. ("'Saucer' Reports Increase As Sky Is Searched in Vain," *Spokane (Wash.) Spokesman-Review,* July 7, 1947, pp. 1, 6; "Dishman Residents Saw 'Flying Saucers' Land," *Spokane (Wash.) Spokesman-Review,* July 7, 1947, p. 6; Bloecher, p. II-12)

1947, July 3 — 7:30 p.m. Project Mogul Flight number 9, a cluster of plastic balloons, is launched from Holloman AFB, New Mexico. (Kevin D. Randle, "The Project Mogul Flights and Roswell," *IUR* 19, no. 6 (Nov./Dec. 1994): 6–7, 23)

1947, July 4 — 3:00 a.m. Lenora Woodruff wakes up in her home at 184 S. Arlington Avenue, East Orange, New Jersey, when several airplanes fly overhead. She looks out and sees a "strange goldenish platter" moving swiftly across the sky. It disappears in a second. ("South Plainfield Woman Reports Seeing 'Flying Saucer' Formation," *Bridgewater (N.J.) Courier-News,* July 5, 1947, p.1)

1947, July 4 — After 4:00 a.m. Mrs. Martin Kole is awakened in her home in Alexandria, Virginia, by something shining through her bedroom window. She sees a large, round object hovering in the southwestern sky. She watches it for a few minutes, then goes back to bed. ("'Flying Discs' Reported Here As Rumors Pour in Over Nation," *Washington (D.C.) Evening Star,* July 5, 1947, p. 2; "2 D.C. Area Residents Say They Saw 'Flying Saucers,'" *Washington (D.C.) Evening Star,* July 6, 1947, p. 9; Bloecher, p. II-6)

1947, July 4 — The United Press service rounds up theories about the flying discs. It quotes Army Air Force "experts" saying that the sightings might be caused by weather conditions, or meteorites, or foreign aircraft that it is "our responsibility to know about it and take proper action." Occultist Ole J. Sneide from San Francisco, California,

thinks they are "oblate spheroid space ships from other planets" with hidden bases on the dark side of the moon. This is apparently the first public mention of an extraterrestrial origin for flying saucers in the media. ("U.S. Stops 'Laughing Off' Stories of Flying Disks," *Hollywood (Calif.) Citizen-News,* July 3, 1947, p. 1; "These Flying Discs? Piffle! It's Old Stuff to Ole Sneide," Palo Alto (Calif.) *Peninsula Times Tribune,* July 3, 1947, p. 12; "Flying Disks Said 'Space Ships' from Other Solar Systems," *Bryan (Tex.) Eagle,* July 3, 1947, p. 8; "Buck Rogers Special," *Santa Rosa (Calif.) Press Democrat,* July 4, 1947, p. 2; J. Campbell Bruce, "The Sneide Letter," *San Francisco (Calif.) Chronicle,* July 8, 1947; Clark III 455–456; Curt Collins, "A 1947 Pioneer of the UFO Extraterrestrial Hypothesis," The Saucers That Time Forgot, December 16, 2021; Clark IV 501)

1947, July 4 — 10:30 a.m. CAA official Irving C. Allen is flying a small aircraft near Moscow, Idaho, when he sees a white disc moving north for 5 minutes as it crosses his path several miles in front of him. ("Weird Reports of Seeing Discs Starts Jitters," *Pittston (Pa.) Sunday Dispatch,* July 6, 1947, p. 1; Bloecher, p. III-10)

1947, July 4 — 11:00 a.m. C. J. Bogne and other witnesses in a car near Redmond, Oregon, see four discs flying past Mt. Jefferson on a straight course at high speed. (Sparks, p. 19; Ruppelt, p. 20; Bloecher, p. II-9)

1947, July 4 — 11:00 a.m. Harry Hale, production manager of the *Portland Oregonian,* sees one shiny disc moving swiftly just west of Beaverton, Oregon. ("Air Liner Crew Confirms Flying Disks over State; Many Seen during Day over City," *Portland Oregonian,* July 5, 1947; Project 1947, "UFO Reports, 1947")

1947, July 4 — 1:05–5:30 p.m. Many people in Portland, Oregon—including KOIN newsman Frank Cooley, deputy Clark County Sheriff Fred Krives, Portland police officer Kenneth A. McDowell, and Oregon highway patrol Sgt. Claude Cross—view five large discs moving at high speed to the east, two flying south and three to the east, with an oscillating or wobbling motion, sudden 90° turns or zigzagging. Radio reports alert other officers (including Walter Lissy, Robert Ellis, and Earl Patterson, all WWII veterans) who see the metallic objects that look like a disc or hubcap or pie-pan or half-moon flashing in the sun. No vapor trail or noise (except possible humming) is reported. (NICAP, "Seven Discs Observed by Many Witnesses"; Sparks, p. 20; "Air Liner Crew Confirms Flying Discs over State; Many Seen during Day over City," *Portland Oregonian,* July 5, 1947; Project 1947, "UFO Reports, 1947"; Bloecher, pp. II-9, III-15; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects,* Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 58; Michael David Hall and Wendy Ann Connors, "Alfred Loedding: New Insight on the Man behind Project Sign," *IUR* 23, no. 4 (Winter 1998): 5)

1947, July 4 — 2:50 p.m. Seven people (among them Winfield and Charity Montooth and Edith May Bush) picnicking at Twin Falls Park, seven miles east of Twin Falls, Idaho, watch a group of discs in a rough V-formation flying at great speed. Ten minutes later, a second flight of 9–10 objects circle overhead in a loose formation. They gain altitude rapidly and move to the west. By 3:10 p.m., when a third flight passed overhead, about 60 people in the park witness 18 or more of the discs circling around before ascending rapidly. In its coverage of this sighting, an unnamed Twin Falls newspaper reporter uses the phrase "unidentified flying objects," apparently for the first time. ("Flying Saucer Mystery Grows," *Tucson (Ariz.) Daily Citizen,* July 5, 1947, p. 4; "Area Residents Join Many Seeing 'Discs,'" *Twin Falls (Idaho) Times-News,* July 6, 1947, pp. 1, 6; Bloecher, p. II-5)

1947, July 4 — 5:00 p.m. Nova Hart and his wife Marveline are picnicking off Old Saint Charles Road west of Pattonville, Missouri. They see a saucer-shaped object, ribbed underneath like a "parachute canopy," gliding slowly (50–60 mph) and silently from south to north about 300 feet off the ground. It seems to have a propeller attached to a red conical structure on the bottom and is about 20–25 feet in diameter. ("'Flying Saucer' Reported Seen in St. Louis County," *St. Louis (Mo.) Globe-Democrat,* July 6, 1947, p. 1; Bloecher, p. II-14)

1947, July 4 — After 5:00 p.m. Private pilot Dan Whelan and passenger Duncan Underhill are flying at 5,000 feet west of Long Beach, California, when they see a disc about 2,000 feet above them, traveling at 400–500 mph. They estimate it is 40–50 feet in diameter and flying north-northwest. ("'Air Disc' Mystery Grows, Baffles U.S.," *Hollywood (Calif.) Citizen-News,* July 5, 1947, pp. 1, 3; Bloecher, p. III-10)

1947, July 4 — 5:45 p.m. Coast Guard Yeoman Frank Ryman photographs a round disc over his home at 12321 22nd Street NE, Lake City, Seattle, Washington. The object is in sight for 4–5 minutes and is seen by at least 20 others, traveling 500 mph. The photo shows a small, blurred white oval against a background of sky, but when enlarged the object is quite distinct. The Air Force explains it as a weather balloon. ("Observers Report Discs over Entire Western Area," Salt Lake City *Deseret News,* July 5, 1947, p. 1; UFOEv 87; Bloecher, pp. IV-3–4; London UFO Research Unit, "Seattle, Washington, America, North America"; Kenneth Lloyd Larson, "A Summer 1947 Sighting," *IUR* 20, no. 1 (Jan./Feb. 1995): 19–20; Michael D. Swords, "Can You Learn Anything from UFO Photos, Part Two," The Big Study, July 5, 2012)

1947, July 4 — 6:30 p.m. United Press correspondent John C. Corlett, along with artist V. H. Selby and their wives, see a white disc speeding over Boise, Idaho, at an altitude of about 10,000 feet. It takes about 3 seconds to disappear.

("View of 'Flying Saucers' over Ontario Dumbfounds Veteran Pilot, Other Crew Member of Airliner," *Portland Oregonian*, July 5, 1947; Project 1947, "UFO Reports, 1947")

1947, July 4 — 7:00 p.m. George Aster and others at Hauser Lake, Idaho, watch a flying disc for 30 minutes as it hovers with a lateral oscillation about 30° above the horizon at an estimated 20,000 feet. It shoots straight up and vanishes when a small aircraft approaches it. ("Disks Seen Here Today, Is Report," *Spokane (Wash.) Spokesman-Review*, July 7, 1947, p. 1; Bloecher, pp. II-6–7)

1947, July 4 — Sunset. Henry Seay, a farmer living 2 miles north of Fayetteville, Arkansas, watches three yellow discs flying overhead to the southwest, dropping sparks, and frightening his cattle and horses. The following night it happens again and the cows go into a panic, running off to the other side of the pasture. Some kind of dust falls on Seay, although it does not burn. After several seconds, the object rises up vertically 30–40 feet and shoots off horizontally at 50 mph. ("Discs Reported over Farm of Henry Seay," Fayetteville *Northwest Arkansas Times*, July 7, 1947, p. 1; Bloecher, p. IV-1)

1947, July 4 — Sunset. M. K. Leisy, a junior intern at the Institute of the Pennsylvania Hospital at 44th and Market streets in Philadelphia, is reading on the porch of the hospital when he hears a loud roar. A large transport plane passes overhead, but he also sees a dark sphere with a luminous halo around it moving below the clouds at a moderate speed. It disappears into the clouds. ("Flying Discs Seen over City," *Philadelphia Inquirer*, July 5, 1947, pp. 1, 3; Bloecher, pp. II-14–15)

1947, July 4 — 8:12 p.m.? United Air Lines Flight 105 pilots Capt. Emil J. Smith and First Officer Ralph Stevens are flying from Boise, Idaho, to Seattle, Washington, when they see a formation of five discs over Emmett, Idaho, silhouetted against the sunset. Stewardess Marty Morrow sees them as well. The objects appear to merge and speed away to the northwest. Another group appears and arranges itself in a straight line. The nine objects are seen at least 12 minutes over a distance of 45 miles. (NICAP, "5 Discs Sighted by United Flight"; Sparks, p. 20; "View of 'Flying Saucers' over Ontario Dumbfounds Veteran Pilot, Other Crew Member of Airliner," *Portland Oregonian*, July 5, 1947; "Crew of Passenger Plane Tell of Seeing 'Flying Saucers' in Idaho," *Hagerstown (Md.) Daily Mail*, July 5, 1947, pp. 1–2; "'Frankly, I'm Baffled,' Says Airliner Pilot After Observing Queer Airborne Objects," *Portland Oregonian*, July 6, 1947, p. 24; E. J. Smith, "Flier Tells of Seeing the Flying Saucers," *New York Daily News*, July 6, 1947, pp. 2, 40; Project 1947, "UFO Reports, 1947"; Bloecher, pp. III-10–11; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers*, 1952, Palmer, pp. 18–19; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 41–42; Wendy Connors and Michael Hall, *Alfred Loedding and The Great Flying Saucer Wave of 1947*, Rose Press, 1998, pp. 52–55)

1947, July 4 — The first of the special flights from Washington, D.C., arrives at Roswell Army Air Field [now closed], New Mexico (presumably to investigate the radar reports claimed by Frank Kaufmann). On the plane is Warrant Officer Robert Thomas. Thomas and his companions are in uniform upon arrival, but quickly change to civilian clothes. Thomas wants an on-site briefing as soon as it can be arranged. These men remain at RAAF throughout the later retrieval. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, pp. 160–161)

1947, July 4 — During a thunderstorm near Corona, New Mexico, W. W. "Mack" Brazel hears a tremendous thunderclap that sounds like an explosion but is somehow different from the rest of the thunder. Others in the area report the same phenomenon. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 160)

1947, July 4 — 11:27 p.m. Army Signal Corps radar sites in southern New Mexico supposedly continue to track a mysterious object. Kirtland AFB's commander scrambles a fighter jet piloted by Kenny Chandler to locate the object, but he cannot find it. Before midnight, Frank Kaufmann allegedly sees a brilliant glow on the radar display, pulsates a number of times, then explode in a starburst. The belief is that the object has now crashed. Jim Ragsdale and "Trudy Truelove" supposedly see a bright flash of light and hear a roaring sound that passes overhead. Ragsdale knows that something has struck the ground close to their campsite. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 160; Kevin D. Randle and Donald R. Schmitt, "When and Where Did the Roswell Object Crash?" *IUR* 19, no. 1 (Jan./Feb. 1994): 14; Kevin D. Randle, "The Truth about the Jim Ragsdale Story," *IUR* 21, no. 3 (Fall 1996): 13–16, 29–30; Jim Wilson, "Roswell Plus 50," *Popular Mechanics* 174 (July 1997): 48–53; The Roswell Files, "Jim Ragsdale," April 11, 1998; Kevin D. Randle, "Frank Kaufmann, Roswell Witness," *IUR* 27, no. 3 (Fall 2002): 8, 17–19; Mark Rodeghier, "Frank Kaufmann Exposed," *IUR* 27, no. 3 (Fall 2002): 9–11, 26; Jacobsen, *Area 51*, p. 36; Kevin D. Randle, "Jim Ragsdale's Roswell Tale," A Different Perspective, April 22, 2015)

1947, July 5 — 3:00 a.m. Acting on what he claims are orders from Brig. Gen. Martin F. Scanlon of the Army's Air Defense Command, discredited Roswell witness Frank Kaufmann returns to Roswell Army Air Field from

Alamogordo to alert Colonel William H. Blanchard, Roswell AAF commanding officer, about a potential crash. (Jim Wilson, "Roswell Plus 50," *Popular Mechanics* 174 (July 1997): 48–53)

1947, July 5 — 5:00 a.m. Archaeologists, including William Curry Holden, working the sites around Roswell, New Mexico, stumble across an impact site where an object has crashed. One of them heads to the closest phone to tell Sheriff George A. Wilcox of the discovery of the remains of a crashed aircraft of some kind. Wilcox calls the local fire department to alert them about the crash. One truck, with Dan Dwyer on it, responds to the call. The site is about 35–40 miles north of Roswell. The Roswell Fire Department, escorted by members of the Roswell Police Department, makes a run along Pine Lodge Road northwest of Roswell. They are among the first civilians to stumble across the impact site. (Thomas J. Carey, "The Search for the Roswell Archaeologists: Casting the Net," *IUR* 18, no. 6 (Nov./Dec. 1993): 3–8, 23–24; Thomas J. Carey, "The Continuing Search for the Roswell Archaeologists: Closing the Circle," *IUR* 19, no. 1 (Jan./Feb. 1994): 4–12; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, pp. 33–36; Kevin D. Randle and Anthony Bragalia, "Two Roswell Witnesses, Reconsidered," *IUR* 32, no. 3 (July 2009): 6–8, 24)

1947, July 5 — 5:01 a.m. Project Mogul Flight number 10, a cluster of plastic balloons, is launched from Holloman AFB, New Mexico. (Kevin D. Randle, "The Project Mogul Flights and Roswell," *IUR* 19, no. 6 (Nov./Dec. 1994): 6–7, 23)

1947, July 5 — 5:30 a.m. According to discredited Roswell witness Frank Kaufmann, a small contingent of men from Roswell Army Air Field in New Mexico drive north on what is now US Highway 285. Near mile marker 132, they turn off the road and began driving across the desert, stopping from time to time to cut the barbed-wire fencing. They discover a heel-shaped craft measuring about 25 feet long and 12 feet wide embedded in a cliff. The soldiers find civilians on the site already. Besides the archaeologists, a local man named Larry Campbell (later called Jack Armstrong or Cactus Jack) also claims to have been there. They escort them off while others secure the area. Five bodies are allegedly found on the site. The impact site is cleaned and secured by 11:30 a.m. Annie Jacobsen has interviewed Alfred O'Donnell, later an engineer at EG&G, who tells her that one of the objects crashed and was recovered by the Joint Chiefs, including the airframe, propulsion equipment, and the power plant. It has no wings or tail. The fuselage is round and there is a dome on top. Inside there are Cyrillic letters stamped or embossed in a ring running around the inside. Army intelligence officers suspect that the craft is the brainchild of German airplane engineers, Walter and Reimar Horten, working for the Russian military. A frantic search to find what happened to the brothers allegedly takes place; informants like Austrian physicist Adolf Smekal of Frankfurt, Germany, provide leads, with confusing results for several months. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 161; Thomas J. Carey, "The Strange Saga of 'Cactus Jack,'" *IUR* 22, no. 1 (Spring 1997): 3–11; Jim Wilson, "Roswell Plus 50," *Popular Mechanics* 174 (July 1997): 48–53; Jacobsen, *Area 51*, pp. 36–40)

1947, July 5? — The Roswell base photography unit is cut out of photographing the debris and bodies, so Sgt. Frederick Benthal is supposedly flown in from Washington, D.C., to conduct the photography, along with Jack Rodden. (Anthony Bragalia, "The Roswell Base Photographers: Their Crash Secrets Revealed," UFO Explorations, July 2013; Clark IV 393–394)

1947, July 5 — 10:00 a.m. W/O Robert Thomas and his crew proceed to the impact site. The bodies, originally covered by sheets, are now in lead-lined body bags. Only those with the highest clearance are allowed close to the center of the impact. Guards are posted, facing out, to keep the curious away. According to researcher Kathy Kasten, the dead bodies are taken to Roswell Army Air Field, but one is still alive and taken to Fort Stanton [now closed] in Lincoln, New Mexico, whose Marine Hospital was used to confine troublesome German and Japanese detainees during World War II. Allegedly, aerospace physician William Randolph Lovelace II travels there from Albuquerque to examine the survivor, who reportedly dies one week later and is buried in the Fort Stanton cemetery. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 161; Nick Redfern, *The Roswell UFO Conspiracy*, Lisa Hagan, 2017, pp. 204–221)

1947, July 5 — Following the rain the night before, Brazel inspects the pastures surrounding the J. B. Foster ranch house southeast of Corona, New Mexico. Riding with him is the young son of the Proctors, William D. Proctor. During the inspection, Brazel discovers a large debris field. Scattered on the slopes and into the sinkhole and depressions are plastic-like beams, pieces of lightweight balsawood-like material only stronger, light metallic foil (which doesn't stay bent or folded, resumes its original shape, and won't tear), and heavy-gauge monofilament. The debris is thick enough that the sheep refuse to cross the field and are driven around it to water more than a mile away. Brazel, taking a few scraps of the material, heads to the home of his closest neighbors, Floyd and Loretta Proctor. He shows them "a little sliver" of material that he can neither burn nor cut. Some of the beams have symbols on them that reminds Brazel of Chinese ideograms. The Proctors suggest he take it into town to show the sheriff. (Don Schmitt and Kevin D. Randle, "Did a Balloon Crash at Roswell?" *IUR* 15, no. 4 (July/Aug. 1990):

Randle, "Roswell Crash Date and Mogul Problem," A Different Perspective, December 27, 2022; Graff 3; "Bill Brazel Jr. Talks about His Father Mack, Discoverer of the 1947 Roswell UFO Wreckage," Eyes on Cinema YouTube channel, June 29, 2024; "Witnesses and Researchers Talk About the Roswell UFO Crash in an Excellent In-Depth 1993 Documentary," Eyes On Cinema YouTube channel, September 17, 2024)

1947, July 5 — Day. Farmer Sherman Campbell discovers a star-shaped, tinfoil-covered object on his farm on Westfall Road southwest of Circleville, Ohio. A piece of balloon is attached to the top. At first suspected to be one of the flying discs, it becomes obvious that it is part of a weather balloon. ("'Flying Disc' Believed Found on Pickaway Farm," *Circleville (Ohio) Herald,* July 5, 1947, p. 1; "Humorists Muddle Hunt for 'Flying Saucers,'" *Circleville (Ohio) Herald,* July 8, 1947, p. 1; Curt Collins, "Flying Saucers Foiled Again," The Saucers That Time Forgot, July 6, 2023)

1947, July 5 — 2:30 p.m. Automobile dealer Kjell Qvale and dozens of others see a triangular formation of silvery discs flying south near Auburn, California. They appear directly overhead and are in view for 3–4 minutes, disappearing one at a time, but not over the horizon. ("Skeptical Experts Call Disc Reports 'Mass Illusion,'" *San Francisco Examiner,* July 8, 1947, p. 1; Bloecher, p. II-5)

1947, July 5 — 4:40 p.m. Lawrence H. "Bus" Cowham is driving east on Elizabeth Boulevard in Twin Falls, Idaho, when he sees a group of small, shiny discs soaring west through the sky beneath a cloud. They disappear out of sight in less than one minute. ("Area Residents Join Many Seeing 'Discs,'" *Twin Falls (Idaho) Times-News,* July 6, 1947, p. 6)

1947, July 5 — 3:00 p.m. Louis E. Starr, national commander-in-chief of the Veterans of Foreign Wars, tells the VFW encampment in Columbus, Ohio, that he is expecting information soon from the Pentagon on "the fleets of flying saucers," although an expected telegram does not arrive. He asserts that "too little is being told to the people of this country." ("Starr to Reveal Data on Saucers," *Portland Sunday Oregonian,* July 6, 1947, p. 24)

1947, July 5 — Later that evening, Brazel removes the large, circular piece of the debris from the range. Brazel either loads it into the back of his truck or drags it along behind. He stores it in a livestock shed about three miles north of the crash site. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell,* Evans, 1994, p. 163)

1947, July 6 — Brazel gets up early, completes his chores, and then drives into Roswell, New Mexico, about 75 miles away. He stops at the office of Sheriff George A. Wilcox. Contrary to published reports, Wilcox is excited about the find and suggests the military at the Roswell Army Air Field [now closed] be notified. While waiting for the military officers to arrive, Wilcox dispatches two of his deputies to the ranch. They have only the directions given by Brazel, but both men are familiar with the territory; and Wilcox believes they will be able to find the debris field. KGFL reporter Frank Joyce calls Wilcox, who tells him Brazel is in his office with an interesting story. Brazel allegedly gets on the phone with Joyce and mentions debris and a stench from dead bodies. ("Affidavit of George 'Jud' Roberts," December 30, 1991; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, pp. 163–164; Graff 3)

1947, July 6 —1:45 p.m. Maj. A. B. Browning and the crew of a B-25 flying over Clay Center, Kansas, see a silvery disc about 30–50 feet in diameter slightly lower than their plane. It paces them for a while then shoots off. (NICAP, "30–50′ Circular Object Paces B-25, Accelerates"; Sparks, p. 21; Bloecher, p. III-11)

1947, July 6 — J. Allen Hynek, assistant director of the Ohio State University's Perkins Observatory in Delaware, Ohio, tells the press that he is interested in flying disc reports but suspects they "aren't likely to be objects from outer space" because they have only been seen in the US, particularly in the Pacific Northwest. (*Columbus (Ohio) Citizen,* July 6, 1947; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 June 24th–July 6th, Supplemental Notes*, The Author, 2000, p. 58)

1947, July 6 — Day. Army Air Corps Capt. James H. Burniston and his wife watch a round, flat object that oscillates on its lateral axis of travel three quarters of the way across the sky in a few seconds at Fairfield-Suisun Army Air

Field [now Travis AFB] near Fairfield, California. (NICAP, "Round Flat Object Size of C-54"; Sparks, p. 21; Bloecher, p. III-3)

1947, July 6 — 2:45 p.m. David A. Kenney, an aircraft instruments engineer, and two others watch an oval-shaped UFO flying at a high altitude for nearly 2 minutes near Encampment, Wyoming. (Bloecher, p. III-17; David Kenney, "Right Place, Right Time," *IUR* 30, no. 4 (August 2006): 28)

1947, July 6 — Afternoon. Francis Howell and his wife are in their yard at 317 Ash Street in Tempe, Arizona, when they see an object floating down to the ground with a kite-like motion. It appears to be about 2 feet across and made of aluminum. It disappears behind some trees. The Howells and some neighbors walk toward the place where it apparently has landed, and they see the disc ascend at a 45° angle and move at high speed toward the northwest. ("Tempeans See 'Disc,'" Phoenix *Arizona Republic*, July 7, 1947, p. 1; Bloecher, p. II-13)

1947, July 6 — Colonel William H. Blanchard, Roswell AAF commanding officer, entrusted with oversight of the first and only atomic-bomb strike force in the world, the 509th Bomb Group, orders Jesse A. Marcel, the air intelligence officer, to investigate the debris report. Marcel immediately drives to the sheriff's office. Marcel interviews Brazel, examines the pieces of the material that Brazel brought in, and decides he had better visit the ranch to examine the field for himself. Marcel, taking some of the debris with him, returns to the base and reports to Blanchard on what he has seen. Blanchard, convinced that he is in possession of something highly unusual, perhaps Soviet, alerts the next higher headquarters. Marcel and Blanchard all know this is not from any type of balloon. Marcel returns to the sheriff's office with the senior counterintelligence agent assigned to the base, CIC Captain Sheridan W. Cavitt. They escort Brazel back to his ranch and examine the debris field. Acting on orders from Major General Clements McMullen, deputy commander of the Strategic Air Command, Blanchard obtains more of the debris from the sheriff's office. It is sealed in a courier pouch and loaded on an airplane to be flown on to the Fort Worth Army Air Field, where it is given to Colonel Thomas J. DuBose for transport on to Washington, D.C. After Marcel and Cavitt leave with Brazel, the two deputies return to say they did not find the debris field but observed a burned area in one of the pastures. There the sand has been turned to glass and blackened. It looks as if something circular has touched down. (Robert Shirkey, Affidavit, April 30, 1991; Thomas Jefferson DuBose, Affidavit, September 16, 1991; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, pp. 37–40, 164; Good Need, p. 89; Nukes 482–483; Graff 3–4)

1947, July 6 — 8:45 p.m. Army Staff Sgt. Ira L. Livingston watches a procession of glowing round objects moving at 500 mph over Birmingham, Alabama. A new one appears every 5 seconds. Many others report UFOs in the area between 8:00 and 9:00 p.m. Robert Crossland, a copy reader for the *Birmingham Age-Herald*, takes a photo that shows two round white spots close together. ("'Flying Saucers' Reported from 39 States, But Seem to Be Concentrated Here," *Birmingham (Ala.) News*, July 7, 1947, pp. 1, 5; Ruppelt, pp. 20–21; Bloecher, pp. III-3–4, IV-4; Michael David Hall and Wendy Ann Connors, *Alfred Loedding and the Great Flying Saucer Wave of 1947*, Rose Press, 1998, pp. 67–68)

1947, July 6 — 9:00 p.m. Because of the distance to the ranch over roads that are less than adequate, Brazel, Marcel, and Cavitt do not arrive until after dark. They stay at the "Hines" house (an old ranch house close to the debris field), eat cold beans, and wait for daylight. Marcel runs a Geiger counter over the large piece of wreckage Brazel has stored in the cattle shed. He detects no sign of radiation. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 165)

1947, July 7 — 2:00 a.m. Joseph J. Kuritz is stopped by a state patrolmen on US Highway 31 near South Bend, Indiana, for speeding. Kuritz claims he and Bernard Jagodzinski are chasing a "glaring object flying south" at treetop level and going about 200 mph. They have it in view for 10 minutes before getting stopped. ("Driver Chasing 'Disk' Arrested for Speeding," *South Bend (Ind.) Tribune*, July 7, 1947, p. 1)

1947, July 7 — 2:00 a.m. A special flight (the first) leaves Roswell AAF for Andrews AAF in Washington, D.C. Some of the debris and the bodies are on that flight. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 165)

1947, July 7 — Brazel takes Marcel and Cavitt out to the debris field. It is three-quarters of a mile long and 200–300 feet wide. A gouge starting at the northern end of it extends for 400–500 feet toward the other end. It looks as if something has touched down and skipped along. The largest piece of debris is recovered at the southern edge of the gouge. The debris is as thin as newsprint, but incredibly strong. There is foil that, when crumpled, unfolds itself without a sign of a wrinkle, I-beams that flex slightly and have some symbols on them, and material resembling Bakelite. Marcel and Cavitt walk the perimeter of the field and then range out looking for more details or another crash site but find nothing else. Finally, they return and spend the remainder of the day collecting debris. They load the rear of Marcel's car and then the jeep carryall driven by Cavitt. About dusk they begin the trip back to Roswell. (Don Schmitt and Kevin D. Randle, "The Roswell Material," *IUR* 16, no. 6 (Nov./Dec. 1991): 10–11; Kevin D. Randle, "Don't Bother Me with the Facts…," *IUR* 18, no. 3 (Jan./Feb. 1993): 16–17, 24;

Swords, "A Different View of 'Roswell: Anatomy of a Myth,'" *Journal of Scientific Exploration* 12, no. 1 (1998): 103–125; Robert M. Wood, "Critique of 'Roswell: Anatomy of a Myth,'" *Journal of Scientific Exploration* 12, no. 1 (1998): 127–140; Thomas J. Carey and Donald R. Schmitt, "Mack Brazel Reconsidered," *IUR* 24, no. 4 (Winter 1999): 13–19; Robert A. Galganski, *The Roswell Debris Field: An Engineer's Perspective*, Fund for UFO Research, 2002; Kevin D. Randle, "Bessie Brazel Schreiber and the Roswell Crash," A Different Perspective, September 19, 2015; "A Very Special Gathering: 'These Are the Children of Roswell, They Have Come Home,'" Eyes On Cinema YouTube channel, July 6, 2024)

1947, July 7 — AMC commander Lieut. Gen Nathan Twining unexpectedly flies to Alamogordo AAF and Kirtland AAF in New Mexico, remaining there until July 11. Army Air Forces Commander Gen. Carl Spaatz is supposedly "vacationing" in Washington State. He tells reporters he knows nothing about the flying discs. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 165)

1947, July 7 — A hoax in Shreveport, Louisiana. A 16-inch aluminum disc with smoke coming out of it is found. Army investigators find "Made in USA" on the disc. It is one of many homemade gadgets, weather balloon radar targets, circular saws, and other disc-like debris that people find or make in order to have some fun in the press or with gullible saucer-seekers. (Teletype from FBI New Orleans to J. Edgar Hoover, July 7, 1947, via FBI UFO files, p. 4; Sparks, p. 21; "Speaking of Pictures: A Rash of Flying Disks Breaks Out over the U.S.," *Life*, July 21, 1947, p. 14; ClearIntent, p. 149; Kevin D. Randle and Donald R. Schmitt, "Secret Projects and Open Eyes: A Response," *IUR* 19, no. 3 (May/June 1994): 15–17; Kevin D. Randle, "The Hoover Memo Again," A Different Perspective, July 29, 2015; Maurizio Verga, "Here They Are! Early Crashes of Flying Saucers, a Visual History," *Cielo Insolito*, no. 6 (March 2018): 8–27)

1947, July 7 — 9:55 a.m. Newspaper editor John Brackett and his wife Wilma see an object streak across the sky in Reno, Nevada, leaving a trail of bluish-white vapor. It is high in the sky and traveling at about 1,000 mph. ("Tiny Speck Whizzes across Sky Here at Unbelievable Rate of Speed; Many Reno Persons See Small Object," Reno *Nevada State Journal*, July 8, 1947, p. 14; Bloecher, pp. III-7–8)

1947, July 7 — 10:10 a.m. On a runway on the west side of Rogers Dry Lake at Muroc Army Airfield [now Edwards Air Force Base] in southern California, XP-84 test pilot Maj. Jowell C. Wise and several others see a yellowish-white object at 10,000–12,000 feet traveling west in an oscillating motion at about 200 mph. It stops at one point, then continues in horizontal flight. (NICAP, "Oscillating Sphere Observed by Test Pilot & Others"; Sparks, p. 21; Affidavit, J. C. Wise to Thomas A. McMillan, August 13, 1947)

1947, July 7 — 11:30 a.m. Flight instructor Kenneth Jones out of Elkhart, Wisconsin, is practicing take-offs and landings with a student near Koshkonong. They watch a disc descending vertically on edge through the alto-cumulus clouds at 6,000 feet, stop at 4,000 feet, assume a horizontal orientation, and fly horizontally for 15 seconds, covering 23 miles at 5,500 mph. At one point it heads straight towards them on a course of about 120°, then stops again (apparently overhead) and disappears. (Sparks, p. 22; Bloecher, p. III-11; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes*, The Author, 2001, p. 9)

1947, July 7 — Gen. Hoyt Vandenberg's activity log: 1:10 p.m., answers a *Toronto Star* reporter's question about possible secret military aircraft. Vandenberg says no AAF planes are looking for discs, but National Guard planes are looking into the discs on their own. 1:50 p.m., Stephen Leo, public relations officer for AF Secretary Stuart Symington, calls concerning the Shreveport, Louisiana, incident. 1:55 p.m. Leo and Gen. Curtis LeMay discuss the discs. Col. Warren, at Ellington Field [now Ellington Airport] in Houston, Texas, calls concerning the Shreveport disc. 4:20 p.m., Col. Warren calls back and says the incident is a hoax. (David Rudiak, "Lt. Gen. Hoyt S. Vandenberg and Roswell," Roswell Proof, 2001)

1947, July 7 — 2:30 p.m. Capt. Robert J. Southey and Clem Hackworthy are flying a private aircraft near East Troy, Wisconsin, when they see a fast-moving silver object flying southeast from Eagle to Muskego, covering 17 miles in 20 seconds (approximately 3,060 mph). They try to photograph it, but it quickly disappears, then suddenly

reappears about 10 miles away. (Sparks, p. 22; Bloecher, pp. III-11–12; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes*, The Author, 2001, p. 9)

1947, July 7 — 3:10 p.m. Don Wisher and Vic Levin are surf fishing 3 miles north of Fort Bragg, California, when they see a flat, glistening object descending toward them from the over ocean with a distinctive hum. It hits he water about one-half mile off shore. It floats for a short while and then sinks. (*San Rafael (Calif.) Independent*, July 10, 1947; Carl Feindt, "Report #62," waterufo.net; Dolan, USO1, 126–127)

1947, July 7 — A meeting is held in the office of Brig. Gen. George F. Schulgen, chief of the Requirements Intelligence branch of Army Air Force Intelligence. It is decided to investigate five flying disc incidents with "qualified" observers and obtain detailed statements: two in Seattle, Washington; one in Boise, Idaho; one in Palm Springs, California; and one in Washington State. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes*, The Author, 2001, p. 16)

1947, July 7 — John Philip Bessor of Zelienople, Pennsylvania, writes to the US Air Force to offer his own theory that UFOs are "a form of space animal, or creature, of a highly attenuated (ectoplasmic?) substance, capable of materialization and dematerialization, whose propellant is a form of telekinetic energy." ("Report from the Readers," *Fate* 4, no. 4 (May/June 1951): 88; John P. Bessor, "Are the Saucers Space Animals?" *Fate* 8, no. 12 (December 1955): 6–12; "Who 'Discovered Space Animals'?" *CSI News Letter*, no. 22 (December 15, 1957): 31; Clark III 1098; Clark IV 1224–1225; Curt Collins, "The 1947 ET Hypothesis of John P. Bessor," The Saucers That Time Forgot, February 15, 2019)

1947, July 7 — 4:00 p.m. William A. Rhodes, an independent scientist and inventor in Phoenix, Arizona, is walking to his workshop in his backyard at 4333 N. 14th Street when he hears a "whoosh" and sees an object banking in tight circles to the south at an altitude of about 1,000 feet. He takes two photos as it passes above his house, the first as it is approaching and looks somewhat cigar-shaped, and the second as it is banking and looks more heel-shaped with a small hole in the center. The photos are reproduced in the July 9 issue of the *Arizona Republic*. A few weeks later, an Army Air Corps Intelligence officer from Hamilton Army Airfield [now closed] in Novato, California, visits Rhodes and takes the prints and negatives, but Rhodes is unable to get them back. However, Kenneth Arnold obtains them on a later visit to Hamilton, and they wind up with James E. McDonald. Rhodes actually has an informal top-secret clearance because of his invention of a degaussing device for ships. He dies in 2007 at the age of 90. (NICAP, "The Rhodes Photo Case"; Robert C. Hanika, "Speedy 'Saucer' Zips through Local Sky," Phoenix *Arizona Republic*, July 9, 1947, pp. 1–2; Bloecher, p. IV-4; Kevin D. Randle, "More of the Best UFO Photographs," A Different Perspective, November 30, 2006; Kevin D. Randle, "Beyond the Rhodes Photographs," A Different Perspective, October 4, 2010; Kevin D. Randle, "William Rhodes and His Ph.D," A Different Perspective, October 19, 2010; Kevin D. Randle, "Rhodes Wrap-Up," A Different Perspective, October 26, 2010; Michael D. Swords, "Can You Learn Anything from UFO Photos, Part Two," The Big Study, July 5, 2012; Swords 53, 54; Kevin D. Randle, "Coast-to-Coast AM: FLIR and William Rhodes," A Different Perspective, May 25, 2023; Kevin D. Randle, "Coast-to-Coast AM: The Rhodes Photographs Revisited," A Different Perspective, December 28, 2023)

1947, July 7 — 5:20 p.m. Radar technician David W. Chase watches a disc-shaped object passing overhead at Medford, Oregon. It appears to be flying at 600–700 mph on edge at right angles to the surface of the earth, though following its contours at 500–1,000 feet. The object gives off a bright light. (Bloecher, p. III-18; Ray Palmer, "New Report on the Flying Saucers," *Fate* 4, no. 1 (January 1951): 63–81; Clark III 1099; Clark IV 1225)

1947, July 7 — 7:45 p.m. Five students on a practice baseball field at Ohio State University in Columbus, Ohio, see three metallic oval objects flying swiftly and silently in a triangular formation overhead. They seem to be about 10 feet in diameter and are flying east over the Olentangy River. They are out of sight within 10 seconds. (Bloecher, p. II-6)

1947, July 7 — 9:00 p.m. Orrin Williams and his wife Albertine, along with Mr. and Mrs. Cecil Grant, are fishing on Great Pond near Rome, Maine, when they see a "spinning rocket" come out of the southern sky and stop abruptly overhead, where it hovers as a ball of fire. A similar object comes from the east, passing close by the first one. A third object approaches from the east and stops by the first object before moving on. The first object then retraces its path to the south at high speed. The display lasts several minutes. (Bloecher, p. II-10)

1947, July 7 — 9:30 p.m. Charles Crockett, 15, is walking along Western Avenue in Manchester, Maine, when he sees a cluster of luminous objects to the west, just above the treetops on the north end of Cobboseecontee Lake. They are still visible when he arrives home and alerts his mother and grandmother. Possible searchlight beams. ("'Flying Saucers' Still Seen Flitting in N.E. Sky," *Bangor (Maine) Daily News*, July 8, 1947, pp. 1–2; Bloecher, p. II-20)

1947, July 7 — 10:15 p.m. *Louisville Times* photographer Al Hixenbaugh is at Preston Street and Bickels Lane in Louisville, Kentucky, when he notices three "fiery balls" in the sky. He takes a 5-second exposure, capturing two of the objects that show as slightly curved streaks. He estimates they are 1–2 miles away, moving at 200 mph, and

at an altitude of 1,000–2,000 feet. Robert Delara of 2745 West Market Street also sees the three objects shooting northward. (*Louisville (Ky.) Times*, July 8, 1947; "'Flying Liver Pills' over Kentucky," *Cincinnati Enquirer*, July 9, 1947, p. 1; Bloecher, pp. IV-4–5; "La Fotografía (y la Pélicula) Al Hixenbaugh 1," Marcianitos Verdes, February 5, 2017)

1947, July 8 — 2:00 a.m. Marcel stops at home in Roswell to show his wife Viaud and son Jesse Jr. some of the Corona, New Mexico, crash debris. Over the next hour they examine it on the kitchen floor. Marcel Sr. says it is a flying saucer. Marcel is not breaking regulations since nothing has yet been classified. With the help of his son, Marcel loads it into the car to be taken to Roswell AAF. ("Affidavit of Jesse A. Marcel Jr.," March 6, 1991; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 166; Robert J. Durant, "C. B. Moore's Mogul Tape," *IUR* 23, no. 2 (Summer 1998): 7–9, 32; Robert A. Galganski, "Probing the Roswell Thin-Strut Debris," *IUR* 24, no. 3 (Fall 1999): 8–12, 30; Karl T. Pflock, et al., "Debris Details," *IUR* 24, no. 4 (Winter 1999): 28–29)

1947, July 8 — 6:00 a.m. Marcel and Cavitt visit with Blanchard in his quarters and tell him what they have seen. Blanchard calls base Provost Marshal Maj. Edwin D. Easley and orders him to post guards on the roads around the debris field. Armed guards encircle the primary areas, denying access to anyone without official business. Easley is directed to locate Brazel and have him escort the MPs to the debris field. Blanchard calls Eighth Air Force headquarters in Fort Worth, Texas, and advises them of the new find. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 166; Kevin D. Randle, "New Documentation for Roswell: The Easley Letter," A Different Perspective, November 6, 2023)

1947, July 8 — 7:30 a.m. The regular 9:00 a.m. Roswell Army Air Field staff meeting is moved up 90 minutes. The main topic for discussion is Marcel and Cavitt reporting an extensive debris field near Corona in Lincoln County, New Mexico, approximately 75 miles northwest of Roswell. A preliminary briefing is provided by Blanchard about the separate impact site approximately 40 miles north of Roswell. Samples of wreckage are passed around the table. Pieces that resemble metal foil, paper-thin yet extremely strong, and pieces with unusual markings along their length are handed from man to man, each voicing their opinion. No one is able to identify the crash debris. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 166)

1947, July 8 — 9:00 a.m. Cavitt and Lewis S. Rickett, who has returned from an assignment in Carlsbad, New Mexico, drive a staff car to the impact site north of Roswell, followed by MPs. They are stopped by the guards who are still posted. When they arrive, they see that a small containment of debris remains that Rickett is allowed to examine. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 166)

1947, July 8 — 9:30 a.m.–9:20 p.m. Four separate UFO sightings take place at Muroc Army Airfield [now Edwards AFB] in southern California, the Air Force's aircraft testing and development center. Ruppelt says these are the first sightings "that really made the Air Force take a deep interest in UFOs." At 9:30 a.m., 1st Lt. Joseph C. McHenry and three others see two silver discs heading silently in a westerly direction at about 350–400 mph at about 8,000 feet; after they pass, a third disc is seen to the north flying in tight circles. At 11:50 a.m., Maj. Richard R. Shoop, Col. S. A. Gilkey, and Capt. John P. Stapp are sitting in an observation truck at Rogers Dry Lake and see an oval, white, aluminum-like object silently descending from 20,000 feet for about 90 seconds; it has two knobs or thick fins on the top. Around 4:00 p.m., a pilot flying an F-51 some 40 miles south of Muroc sees a "flat object of a light-reflecting nature"; it is flying too high for him to climb up to it. At 9:20 p.m., spherical objects are again seen in the area, this time at 8,000 feet and moving against the wind at 300 mph. (NICAP, "Observers Sight Saucer over Base"; NICAP, "Object Observed by Four Witnesses in Observation"; NICAP, "Object Descends to Ground Level, Rises"; NICAP, "Flat Object with Fin Observed by F-51 Pilot"; Sparks, pp. 22–23; Affidavit, Joseph C. McHenry to Thomas A. McMillan, July 11, 1947; Affidavit, Richard R. Shoop to Thomas A. McMillan, July 11, 1947; Affidavit, Jannette Marie Scott to Thomas A. McMillan, July 14, 1947; Affidavit, John Paul Stapp to Thomas A. McMillan, August 12, 1947; Bloecher, pp. III-4, 12; Michael D. Swords, "The Lost Words of Edward Ruppelt," *IUR* 20, no. 2 (Mar./Apr. 1995): 14–15; Clark III 436, 783–784; Clark IV 482, 865; Patrick Gross, "The Muroc Army Air Field Incidents")

1947, July 8 — 11:00 a.m. Col. William Blanchard dictates a press release about the Roswell recovery to Public Information Officer Lt. Walter Haut, who delivers the release to radio stations around noon (the first apparently to Frank Joyce at KGFL) and the newspapers in Roswell, New Mexico. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 167; Patrick Gross, "Roswell 1947—Witnesses, Art McQuiddy," November 8, 2005)

1947, July 8 — The Army Air Force issues a press release saying that, based on a "preliminary study," the flying discs are *not* secret bacteriological weapons designed by a foreign power, experimental army aircraft, or spaceships.

However, Army and Navy officials are not certain what they are. ("'Saucer' Dept.—All Designs," *Racine (Wis.) Journal Times*, July 8, 1947, p. 6)

1947, July 8 — Airplane inventor Orville Wright tells the press that the saucer craze is propaganda "dished up by the government to support the current State Department campaign to get us into another war." ("Wright Raps Saucers As War Propaganda," *Cincinnati (Ohio) Enquirer*, July 9, 1947, p. 1)

1947, July 8 — Rep. Lyndon B. Johnson (D-Tex.) requests information on the flying discs from the War Department. Someone from Gen. Carl Spaatz's office writes back on July 21 to tell him the Army Air Forces are looking into it, but there is "no indication" that the discs are "new or unusual missiles or aircraft." (Swords 38)

1947, July 8? — British radio and TV entertainer Hughie Green is driving across the US. About 250 miles west of Philadelphia, Pennsylvania, he hears an announcement that a flying saucer "had crashed in New Mexico and that the Army were moving in to investigate. Later the program was interrupted again and quite a few details were given." When he arrives at Philadelphia, there is nothing in the newspapers or on the radio. ("Star Puzzled," *Flying Saucer Review* 1, no 1 (Spring 1955): 3; "Hughie Green: 'Peripheral Witness to Roswell?'" Above Top Secret forum, October 20, 2012; Clark III 319; Clark IV 336)

1947, July 8 — 1:00 p.m. Marcel goes on a B-29 special flight (the second) to Fort Worth Army Air Field, Texas, with the wreckage to report to Gen. Roger M. Ramey. The pilot is Lt. Col. Payne Jennings Jr. with Lt. Col. Robert Barrowclough riding in the bombardier's seat. Only a few packages are loaded onto the plane. One, a triangular package about two feet long, is wrapped in brown paper. The other three are about the size of shoe boxes. They are so light that it feels as if there is nothing in them. When it lands in Fort Worth, the enlisted soldiers on the plane are ordered to remain aboard until a guard is posted and Marcel gets off taking one of the packages that he has been carrying on his lap. According to Flight Engineer M/Sgt. Robert Porter, the soldiers go to the mess hall once the guard is posted. The remaining debris is transferred to a B-25 that is flying to Wright Field in Dayton, Ohio. Marcel goes to Ramey's office and puts the package on his desk. They both go to a map room, where Marcel shows him where the debris was found. When they return to Ramey's office, Marcel sees that the package he brought has been substituted by a torn-up weather balloon. Ramey proposes a plan that possibly originates from his bosses at the Pentagon. Attention needs to be diverted from the more important impact site north of Roswell by acknowledging the Corona location. Too many civilians are involved, and the press is already alerted. (Robert Shirkey, Affidavit, April 30, 1991; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, pp. 167–168; Thomas J. Carey and Donald R. Schmitt, "Flight to Fort Worth: From Complicity to Cover-Up," *IUR* 25, no. 2 (Summer 2000): 7–13, 30)

1947, July 8 — 2:26 p.m. Haut's press release about the recovered disc reaches the Associated Press wire. The story announces: "The army air forces here today announced a flying disc had been found" the previous week. It says that the disc is recovered by intelligence officers of the 509th Bomb Group at Roswell Army Air Field [now closed], New Mexico, with the help of local ranchers and the Chavez County Sheriff's Office. It adds that the disc is being loaned by Maj. Marcel "to higher headquarters." (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 167)

1947, July 8 — 2:30 p.m. Blanchard decides it is time to "go on leave." Too many phone callers into the base are asking to speak with him. He, along with a few members of his staff, drive out to the Corona, New Mexico, debris field. Those left at the base are told to inform the reporters that the colonel is now on leave. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, p. 167; Kevin D. Randle, "When a Leave Is Not a Leave: Col. Blanchard and the Roswell Timeline," *IUR* 19, no. 4 (July/Aug. 1994): 18–20; Karl T. Pflock, "Taking Liberties with a Leave," *IUR* 20, no. 2 (Mar./Apr. 1995): 18)

1947, July 8 — 2:41 p.m. The press release is put on the United Press wire.

1947, July 8 — 3:50 p.m. An Army National Guard pilot flying near Mount Baldy, California, observes a flat object, reflecting light, about the size of a fighter. He gives chase, attempting to keep it in sight, but is unable to do so. (Air Force Base Intelligence Report, "Flying Discs," July 30, 1947; Kevin D. Randle, "Roswell, Nathan Twining, and the Mini-EOTS," A Different Perspective, October 6, 2014)

1947, July 8 — 4:26 p.m. Thomas Dale is flying a small plane at 2,800 feet over Alton, New Hampshire, with passenger Jere Stetson. They see a metallic object some 2 miles away to the east and some 1,500 feet below their aircraft. It approaches them at great speed before veering to the north. They estimate it is 20 feet long and "not exactly round." (Bloecher, p. III-12)

1947, July 8 — 4:30 p.m. The *Roswell Daily Record* carries the "RAAF Captures Flying Saucer" story. In Fort Worth, Texas, Ramey issues a statement saying the Roswell officers were fooled and that the material is a Rawin target device suspended by a Neoprene rubber balloon. ("Rawin" is a method of determining wind speed and direction by using radar or radio waves to track a balloon carrying either a radar-sensitive target or radio transponder.). The debris is switched for the newspaper photographer, James Bond Johnson, at a press conference held by Ramey

and Col. Thomas J. DuBose in late afternoon. Johnson takes six photos of the debris and leaves after 20 minutes. One of the photos shows Ramey holding a piece of paper (the "Ramey memo") with words written on it; unfortunately, the resolution is inadequate to decisively "deblur" the text using modern technological methods. A weather officer, Maj. Irving Newton, is called in to identify the debris as from a balloon. A photo of Newton with the debris is taken by another photographer. ("RAAF Captures Flying Saucer on Ranch in Roswell Region," *Roswell (N.Mex.) Daily Record,* July 8, 1947, p. 1; "Disc Seized by Army Only Piece of Balloon; Search Still Going On," *Philadelphia (Pa.) Inquirer,* July 9, 1947, pp. 1, 3; "Captured New Mexico 'Disc' Proves Dud," Phoenix *Arizona Republic,* July 9, 1947, p. 1; Donald R. Schmitt and Kevin D. Randle, "Fort Worth, July 8, 1947: The Cover-Up Begins," *IUR* 15, no. 2 (Mar./Apr. 1990): 21–23; Donald R. Schmitt and Kevin D. Randle, "The Fort Worth Press Conference: The J. Bond Johnson Connection," *IUR* 15, no. 6 (Nov./Dec. 1990): 5–16; Thomas Jefferson DuBose, Affidavit, September 16, 1991; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell,* Evans, 1994, pp. 41–43, 168; Robert A. Galganski, "Probing the Roswell Thin-Strut Debris," *IUR* 24, no. 3 (Fall 1999): 8–12, 30; Donald R. Burleson, "Deciphering the Ramey Memo," *IUR* 25, no. 2 (Summer 2000): 3–6, 32; Robert A. Galganski, "The Roswell Debris Field: Size Doesn't Matter," *IUR* 25, no. 4 (Winter 2000–2001): 14–19, 30; James Houran and Kevin D. Randle, "'A Message in a Bottle': Confounds in Deciphering the Ramey Memo from the Roswell UFO Case," *Journal of Scientific Exploration* 16, no. 1 (2002): 45–66; Barry Greenwood, "An Observation on the Ramey Memo," *UFO Historical Revue,* no. 11 (March 2004): 1–8; James Houran, *A Search for Meaning in the Ramey Document: From the Roswell UFO Case*, Fund for UFO Research, 2006; Dennis Balthaser, "Interview: James Bond Johnson (Roswell Wreckage Photographer)," The UFO Chronicles, March 27, 2006; Barry Greenwood, "Ramey Memo Redux: Line 5," *UFO Historical Revue,* no 13 (September 2009): 5–19; Kevin D. Randle, *Roswell in the 21st Century,* The Author, 2016; Nick Redfern, *The Roswell UFO Conspiracy,* Lisa Hagan, 2017, pp. 232–238; Graff 8–9; "Interview with Roswell 'UFO Debris' Photographer, Star-Telegram Reporter J. Bond Johnson," Eyes on Cinema YouTube channel, February 2, 2024; Kevin D. Randle, "Roswell Solved: I Think Not," A Different Perspective, July 29, 2024)

1947, July 8 — 5:17 p.m. Special Agent Percy Wyly II in the Dallas, Texas, FBI office sends a teletype headed "Flying Disc, Information Concerning" to J. Edgar Hoover and Strategic Air Command in Cincinnati, Ohio, expressing some doubt about the balloon explanation: "telephonic conversation between [Eighth Air Force] and Wright Field had not borne out this belief. Disc and balloon being transported to Wright Field by special plane for examination." Wyly receives this information from Maj. Edwin M. Kirton at Fort Worth. Roswell mortician Glenn Dennis, intrigued by inquiries from the base about small caskets, visits the base hospital but is turned away forcibly; a nurse friend (possibly 1st Lt. Adeline "Eileen" M. Fanton) warns him to leave before he gets into trouble and supposedly tells him that three alien bodies had been found. Other witnesses to recovered bodies include T/Sgt Ernest R. Robbins, Maj. Edwin D. Easley, Ruben and Pete Anaya, New Mexico Lieutenant Governor Joseph Montoya, Sgt. Melvin E. Brown (who says the bodies looked Asian), Capt. Oliver "Pappy" W. Henderson, Staff Sgt. Robert A. Slusher, and Charles H. Forgus. ([Wyly's teletype message]; "Affidavit of Sappho Henderson," July 9, 1991; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell,* Evans, 1994, pp. 168–169; Mark Rodeghier and Mark Chesney, "Who's the Dummy Now? The Latest Air Force Report," *IUR* 22, no. 3 (Fall 1997): 10; Good Need, pp. 91–93; Nick Redfern, *The Roswell UFO Conspiracy,* Lisa Hagan, 2017, pp. 97–100; "Roswell: W. Glenn Davis [sic] Interview, 11 19 1990," NICAP Official YouTube channel, July 8, 2021)

1947, July 8 — 6:29 p.m. An Associated Press story goes out that a Fort Worth Army Air Field officer (Newton) has identified the Roswell debris as a weather balloon. ("AP Wires Burn with 'Captured Disk' Story," Champaign (Ill.) *Daily Illini,* July 9, 1947, p. 5; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell,* Evans, 1994, pp. 46–52, 168)

1947, July 9 — 1:00 a.m. William Valetta sees 5–6 domed discs streaking eastward as he stands outside his house at 4328 South Emerald Avenue in Chicago, Illinois. They make a swishing noise and he sees a blue flame underneath each of them. Smoke seems to be coming from the tops. (Bloecher, pp. II-13–14)

1947, July 9 — RAAF officers locate Mack Brazel and take him to the base for questioning, then to the *Roswell Daily Record* and radio station KGPL for a revised, sanitized version of his story, this time saying he found the debris on June 14. Copies of Haut's original press release are recovered. Three fully loaded C-54's carry debris to Los Alamos, New Mexico, via Kirtland AFB, according to Robert E. Smith, First Air Transport Unit. A crate allegedly carrying alien bodies is flown from Roswell to Fort Worth in a B-29, according to Staff Sgt. Robert A. Slusher, who says he was on board. (Don Schmitt and Kevin D. Randle, "Roswell, July 9, 1947," *IUR* 14, no. 6 (Nov./Dec. 1989): 4–6, 23; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell,*

Evans, 1994, pp. 53–58, 169–171; Kevin D. Randle, "Bessie Brazel's Story," *IUR* 20, no. 3 (May/June 1995): 3–5, 24; Thomas J. Carey and Donald R. Schmitt, "Mack Brazel Reconsidered," *IUR* 24, no. 4 (Winter 1999): 13–19; Kevin D. Randle, "Bessie Brazel Schreiber and the Roswell Crash," A Different Perspective, September 19, 2015)

1947, July 9 — The FBI interviews Capt. Emil J. Smith and copilot Ralph Stevens at Boise (Idaho) Municipal Airport about their July 4 sighting. (ClearIntent, p. 151; Good Above, pp. 253–254)

1947, July 9 — US Sen. Glen H. Taylor (D-Idaho) says he hopes the saucers will turn out to be space ships from another planet, whose hostility might end all our "petty arguments on earth." ("'Can't Laugh Off Saucers,' Says Senator," *Boston Globe*, July 9, 1947, p. 5)

1947, July 9 — The US Army Air Force issues classified orders requiring reports of any "saucer-like" objects to be investigated and passed on to T-2 Technical Intelligence at Wright Field, Ohio, with summaries sent to the Pentagon. However, most of the early cases still go directly to the Air Force Office of Intelligence at the Pentagon. (Michael David Hall and Wendy Ann Connors, "Alfred Loedding: New Insight on the Man behind Project Sign," *IUR* 23, no. 4 (Winter 1998): 6)

1947, July 9 — 10:30 a.m. President Truman meets with Sen. Carl Hatch (D-N.Mex.).

1947, July 9 — 10:35 a.m. Assistant Secretary of War for Air Stuart Symington meets with Lt. Gen. James Doolittle and Gen. Hoyt Vandenberg. The conversation is presumably about the flying discs. (Donald R. Schmitt, *UFO Crash at Roswell II,* Moonset, 2001)

1947, July 9 — 10:50 a.m. Doolittle, Vandenberg, and Symington meet in the office of Army Chief of Staff Dwight D. Eisenhower. Maj. Gen. Lauris Norstad, director of the Plans and Operations Department, is also present. (Donald R. Schmitt, *UFO Crash at Roswell II,* Moonset, 2001)

1947, July 9 — 11:58 a.m. Vandenberg calls President Truman.

1947, July 9 — 12:50 p.m. Vandenberg and Symington meet with the Joint Chiefs.

1947, July 9 — 12:17 p.m. *Idaho Statesman* aviation editor and former B-29 pilot David N. Johnson, flying in an Idaho Air National Guard AT-6 Texan, sees a black object standing out against the clouds as he prepares to land at Gowen Field [now Boise Airport], Boise, Idaho. Johnson takes 10 seconds of 8mm motion-picture film (but it shows no trace of the object). It makes a slow roll, then makes a stair-step climb, then disappears into the clouds. (NICAP, "AT-6 Encounters Black Disc"; Sparks, p. 23; Dave Johnson, "Flying Reporter Finally Sights Black, Darting Disc High over Boise," Boise *Idaho Statesman,* July 10, 1947, pp. 1, 6; Dave Johnson, "Boise Newsman Photographs Disc," *Oakland (Calif.) Tribune,* July 10, 1947, p. 9; Dave Johnson, "Flying Newsman Learns Disc Failed to 'Take' on Movie Film," Boise *Idaho Statesman,* July 11, 1947, pp. 1, 9; UFOEv, pp. 13, 130; Bloecher, pp. III-12–13; Michael D. Swords, "The Lost Words of Edward Ruppelt," *IUR* 20, no. 2 (Mar./Apr. 1995): 14–15; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes,* The Author, 2001, pp. 39–43, 55; Clark III 436; Clark IV 482)

1947, July 9 — 2:30 p.m. Vandenberg and Symington meet again.

1947, July 9 — 4:17 p.m. Vandenberg meets with Maj. Gen. Emmett O'Donnell Jr., director of information for the Army Air Force. (Donald R. Schmitt, *UFO Crash at Roswell II,* Moonset, 2001).

1947, July 9 — Late afternoon. 1Lt Chester P. Barton, stationed at Roswell Army Air Field in New Mexico, is sent by Maj. Edwin D. Easley to go to the crash site and report back to him about what is going on. He gets no closer than about 50 feet from the wreckage, which appears to have burned. He is convinced it is the remains of a B-29 bomber. He remains at the site for about 90 minutes then reports back to Easley. (Joseph Stefula, "The Roswell Testimony of Chester P. Barton," *IUR* 26, no. 2 (Summer 2001): 21–23, 29–31)

1947, July 9 — Brig. Gen. George F. Schulgen, chief of the Requirements Intelligence branch of Army Air Force Intelligence, requests FBI help with the problem of the flying discs from Special Agent S. Wesley Reynolds. Army intelligence claims they are not Army or Navy craft. He says that Air Corps Intelligence is utilizing all its scientists to study the cases to see whether they are natural or artificial or inspired by "individuals of Communist sympathies with the view to causing hysteria and fear of a secret Russian weapon." (E. G. Fitch to D. M. Ladd, "Flying Disks," July 10, 1947; ClearIntent, p. 148; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes,* The Author, 2001, p. 14)

1947, July 9 — Shortly after 5:00 p.m. Electrician Raymond Edward Lane and his wife are picking huckleberries near Midland, Michigan, when they hear a kind of "puff" noise nearby. Looking up, they see a ball of white, sparkling fire, like a Fourth of July sparkler, about the size of a bushel basket, no more than 100 feet away. It is hovering several feet above a stretch of sand. After about 10 or 15 seconds, the light goes out and the object vanishes. The only thing that remains is a peculiar dark substance on the sand and some metallic fragments. Lane collects fragments of the material in a tin can and brings them the next morning to Robert S. Spencer, a senior researcher at the Dow Chemical Company materials research laboratory in Midland. Spencer goes to the site with Lane and

Dow's internal security chief Edward Fales. Spencer has the Dow spectroscopy laboratory analyze the fragments and reports that the shiny pellets are largely silver mixed with a bit of silicon. They conclude that it consists of fused sand. By the end of September, the lab has analyzed ash-like powder found at the site. It turns out to be thorite that is slightly radioactive, mixed with magnesium hydroxide and other trace minerals. The conclusion is that the sighting is the result of some kind of home-made fireworks experiment, although Dow chemist John Josef Grebe suspects it might have been a small missile. (NICAP, "Object Hovers over Sand"; Bloecher, pp. IV-2–3; Joel Carpenter, "The Midland Fireball: Dow Chemical, UFOs, and Evidence," *IUR* 23, no. 3 (Fall 1998): 28–32)

1947, July 9 — 11:30 p.m. Constable Eric Kearsey sees four yellowish discs flying in close formation above Grand Falls, Newfoundland. He calls other people to watch them as well. They are moving at high speed to the east with a dipping motion. At 11:40 p.m., an egg-shaped object "the size of a barrel head" passes overhead in the same direction. (*St. John's (Newf.) Evening Telegram,* July 9, 1947; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes,* The Author, 2001, pp. 45–46)

1947, July 10 — FBI agent E. G. Fitch forwards Schulgen's request to Assistant Director of the Domestic Intelligence Division D. Milton "Mickey" Ladd at FBI headquarters in a memo titled "Flying Disks." Ladd adds a note saying that the "Bureau does not believe it should go into these investigations" because many cases are "pranks." Associate FBI Director Clyde Tolson adds, "I think we should do this," while J. Edgar Hoover writes, "I would do it but before agreeing to it we must insist upon full access to discs recovered. For instance in the La. Case the Army grabbed it and would not let us have it for cursory examination." (E. G. Fitch to D. M. Ladd, "Flying Disks," July 10, 1947; RosRept, pp. 25–26; Good Above, p. 541; Kevin D. Randle, "The Hoover Memo Again," A Different Perspective, July 29, 2015)

1947, July 10 — Roswell debris and bodies have been flown from Fort Worth to Wright Field, according to future Brig. Gen. Arthur Exon, then stationed at Wright Field, Ohio, who says that a special unit is created to study them. The story is slightly corroborated by Jack G. Tiffany Jr., whose father Jack G. Tiffany Sr. is one of the crew members that flies debris from Fort Worth to Dayton. ("Brig. Gen. Arthur E. Exon," Roswell Proof; Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, pp. 61–66; Thomas J. Carey and Donald J. Schmitt, *Inside the Real Area 51*, New Page, 2013, pp. 165–175; Nukes 483–486; Anthony Bragalia, "Scientists Who Studied Roswell UFO Crash Debris and Bodies Named," UFO Explorations, Aug./Sept. 2023)

1947, July 10 — 10:00 a.m. John H. Janssen, aviation editor of the *Morristown Daily Record,* takes a photo of four luminous objects as he is flying his Piper J-3 Cub at 10,000 feet over Morristown, New Jersey. Three of the objects are silvery white, while the fourth is a dull metallic color. ("'Flying Saucers' Invade Morristown; 4 Discs Photographed near Airport," *Paterson (N.J.) Evening News,* July 11, 1947, p. 10; NICAP, "07-10-1947 USA, New Jersey, Morristown")

1947, July 10 — 10:30 a.m. Lt. Gen. Curtis LeMay, deputy chief of Air Staff for Research and Development at the Pentagon, meets with Vandenberg, Maj. Gen. Leslie Groves, and Lt. Gen. Robert Miller Montague.

1947, July 10 — 12:15 p.m. Doolittle and Vandenberg meet with Truman.

1947, July 10 — 2:40 p.m. Secretary of War Robert P. Patterson meets with Groves and Montague.

1947, July 10 — 4:25 p.m. A V-2 launch is aborted at White Sands Proving Ground, New Mexico, after 32 seconds due to an early yaw. Lieut. Gen. Nathan Twining stops at White Sands before returning to Wright Field, Ohio.

1947, July 10 — 4:47 p.m. University of New Mexico astronomer Lincoln LaPaz, his wife Leota, and two daughters, Jean and Mary, are driving west on Highway 60 near Fort Sumner, New Mexico, when they see a sharply outlined, white ellipsoidal object wobbling in the sky to the west about 25 miles away. They watch it for about 30 seconds, then it disappears behind a cloud, but reappears 5 seconds later further to the right. He estimates its size as 245 feet long and 100 feet thick at the maximum, with a horizontal speed of 120–180 mph and a vertical speed of 600–900 mph. It moves silently with no vapor trail. It resembles no known aircraft. (NICAP, "200′ Ellipsoidal Object Sighted by La Paz Family"; Sparks, p. 24; H. B. Darrach Jr. and Robert Ginna, "Have We Visitors from Space?" *Life,* April 7, 1952, p. 84; Bloecher, p. III-19; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects,* Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 60; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes,* The Author, 2001, p. 58)

1947, July 10 — 5:30 p.m. Three civilian airline mechanics (John N. Mehrman Jr., Robert Leidy, and John E. Woodruff) at Ernest Harmon AFB [now Stephenville International Airport] are returning from a fishing trip and driving up a mountain road near Stephenville Crossing, Newfoundland. They see a bluish-black exhaust trail that has cut through some clouds leaving a "hole." Woodruff sees a disc-shaped object the apparent size of a C-54 transport plane coming out of the clouds and traveling at a terrific rate of speed. The hole remains in the cloud for more than an hour. Leidy takes two Kodachrome photos of the exhaust trail. The sighting later impresses Project Sign personnel to the extent that they ask questions about UFO effects on clouds. (NICAP, "Harmon Field Photo";

Sparks, p. 24; Loren E. Gross, *UFOs, a History: Volume 1, 1947,* The Author, February 1991, pp. 44–45; Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report,* Dundurn Press, 2006, pp. 49–50; Chris Rutkowski, "The Cold, Hard Facts about UFOs in Canada," *IUR* 34, no. 1 (September 2011): 8–9; Michael D. Swords, "Can You Learn Anything from UFO Photos, Part Two," The Big Study, July 5, 2012; Swords 38–39; Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, pp. 167, 264–267)

1947, July 10 — Mack Brazel is still being held at a guest house on the Roswell, New Mexico, base. The officers try to convince him not to say anything about what he has seen. They also try to prevent him talking to reporters. He is given a physical by doctors at the base hospital. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell,* Evans, 1994, p. 172)

1947, July 11 — Debriefings of all military participants in the Corona debris recovery operation take place. They are taken into a room in small groups and told that the recovery is highly classified and not to talk about it. Military personnel warn civilians around Roswell, New Mexico, that they are not to talk about what happened. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell,* Evans, 1994, pp. 72–76, 172)

1947, July 11 — 11:00 a.m. USAAF Col. Bruce H. Perry and Maj. William E. Geyser, 59th AACS Group, see a round 2–3 foot or 10-foot aluminum or silver-metallic sphere traveling at great speed to the south of Elmendorf AFB [now Joint Base Elmendorf-Richardson], Anchorage, Alaska. Estimated altitude is 3,000–4,000 feet. (NICAP, "Round 3′ Aluminum Object at Great Speed"; Sparks, p. 24)

1947, July 12 — Kenneth Arnold is interviewed at the Hotel Owyhee in Boise, Idaho, by Lt. Frank M. Brown and Capt. William L. Davidson, who have flown in from Hamilton Army Airfield [now closed] in Novato, California. He also submits a written statement to Army Air Force intelligence, referring to the objects as "saucer-like." At the end of the report he draws a picture of what the objects appeared to look like at their closest approach to Mt. Rainier, Washington. He writes, "They seemed longer than wide, their thickness was about 1/20th their width." As to motion, Arnold writes, "They flew like many times I have observed geese to fly in a rather diagonal chain-like line as if they were linked together." (James Easton suggests in 2007 that Arnold may have seen pelicans, based on their movements, but this seems unlikely.) While they are at Arnold's house, Brown and Davidson hear that pilot Emil J. Smith is in Boise on a layover, and all three go to the airport to talk to him. (Frank M. Brown, "Memorandum for the Officer in Charge," July 16, 1947; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers,* Palmer, 1952, pp. 21–23; Kenneth Arnold, "Confidential," Project 1947; Michael David Hall and Wendy Ann Connors, "Alfred Loedding: New Insight on the Man behind Project Sign," *IUR* 23, no. 4 (Winter 1998): 6; James Easton, "Kenneth Arnold and the Pelicans," UFO Conjectures, April 4, 2007; Martin Shough, "The Singular Adventure of Mr. Kenneth Arnold," June 2010)

1947, July 12 — The FBI conducts a shorter follow-up interview with Capt. Emil J. Smith. (ClearIntent, p. 153)

1947, July 12 — 2:30 p.m. Earl Page is flying a light plane from Las Vegas to Salt Lake City with his wife Beulah and son Ronald. Over Utah Lake, Utah, they see a formation of discs approach their plane from the front and pass to the right. Page thinks they may be as close as 50 feet. He banks the plane sharply to pursue them, but they disappear in the distance. All three of the witnesses experience an overwhelming emotional reaction, as well as nausea. (Frank B. Salisbury, *The Utah UFO Display*, Devin-Adair, 1974, p. xvii)

1947, July 12 — 6:30 p.m. USAAF Maj. Edward Graham and others at Elmendorf AFB [now Joint Base Elmendorf-Richardson], Anchorage, Alaska, see a balloon-like grayish object, 10 feet long, flying northwest at 100 mph at an altitude of 1,500 feet and following the contour of mountains 5 miles away. It is paralleling the course of a landing C-47. (Sparks, p. 24)

1947, July 12 — 6:35 p.m. Seamen John C. Kennedy and Ben Bobberly are on duty at Naval Air Station Seattle at Sand Point [now closed and redeveloped as Magnuson Park], Seattle, Washington. They notice a silvery disc-shaped object flying overhead to the east at 12,000 feet. At about the same time, Arnold Bergh and James Calahan watch three silvery discs flying quickly north from their location near North 82nd Street and 11th Avenue in Seattle. (Bloecher, p. III-6)

1947, July 13 — 5:48 p.m. Warren Baker Eames is driving with his wife Alice on State Highway 2 near Gardner, Massachusetts, when they see a large, silvery, disc-shaped object in the sky ahead, moving west. As they watch, its nearest edge dips down toward them and it accelerates in a sudden burst of speed to the west-northwest. (Bloecher, p. III-1)

1947, July 15 — Mack Brazel is returned home after an extensive interrogation at Roswell AAF, New Mexico. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell,* Evans, 1994, p. 173)

1947, July 15 — 12:15 p.m. Col. Frank A. Flynn is flying a Vultee BT-13 Valiant over Concord, California, when a group of 12–15 objects approaches and passes him. At first he takes them for birds, but he can see no necks or wings and they are moving in excess of 200 mph. They are moving in a see-saw fashion at three different altitudes about 200 feet apart, and they appear to be about 15 feet across, white on the top and gray and black on the bottom. At

their closest point, they are about one mile away. Flynn turns his plane around to pursue them, but they outdistance him quickly. (Bloecher, p. III-13)

1947, July 16 — An initial report on the Ernest Harmon AFB case in Newfoundland is written up by a base intelligence officer. (Michael David Hall and Wendy Ann Connors, "Alfred Loedding: New Insight on the Man behind Project Sign," *IUR* 23, no. 4 (Winter 1998): 8)

1947, July 19 — The antiaircraft command base of the Chinese Nationalist Government Air Force spots a UFO over Lanzhou City, Gansu, China. It is 50 feet long and has an apparent rudder and two jet pipes in the back. About 8:00 p.m., witnesses in Gansu province watch a red object cross the sky in 2 seconds. (Paul Dong, *The Four Major Mysteries of Mainland China*, Prentice-Hall, 1984, p. 3)

1947, July 21 — A more detailed report on the Ernest Harmon AFB incident is sent to the Pentagon. (Michael David Hall and Wendy Ann Connors, "Alfred Loedding: New Insight on the Man behind Project Sign," *IUR* 23, no. 4 (Winter 1998): 8)

1947, July 21 — *Life* magazine publishes a pictorial news story on the flying discs. ("Speaking of Pictures: A Rash of Flying Disks Breaks Out over the U.S.," *Life*, July 21, 1947, pp. 14–16)

1947, July 22 — Ray Palmer writes to Kenneth Arnold and tells him about the Maury Island, Washington, case, asking him to look into it. (Jason Colavito, ed., "Inquiry into Richard Shaver and Ray Palmer, Federal Bureau of Investigation, 1947"; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers*, Palmer, 1952, p. 21; Clark III 720; Clark IV 789)

1947, July 23 — Day. John H. Janssen, aviation editor of the *Morristown Daily Record*, is flying his Piper J-3 Cub at 6,000 feet near the Morristown Airport in New Jersey. He sees a flash of light, the engine gives out, and the plane seems to be motionless. Then he sees two UFOs (this time with portholes) and manages to get the propeller going again. This is one of the first cases of "vehicle interference" UFO cases involving an airplane. (NICAP, "07-10-1947 USA, New Jersey, Morristown"; John H. Janssen, "My Encounter with Flying Disks," *Fate* 2, no. 3 (September 1949): 12–16)

1947, July 23 — José C. Higgens and some assistants are surveying a field in Campina do Amoral in the Colônia Goio-Bang, located between Luiziana and Mamboré, Paraná, Brazil. On hearing a sharp sound, they see a grayish-white disc-shaped object about 100 feet in diameter, which soon lands and rests on curved metal feet. His assistants flee, but Higgens goes up to examine it. He sees a small glass window and two odd-looking beings observing him curiously from within. A door opens in the craft, and three other hairless beings dressed in transparent overalls emerge. They have large, round eyes with eyebrows and pronounced eyelashes. Their legs are disproportionately long and they are about 7 feet tall. One points a small tube at Higgens. They are speaking in an unknown, sonorous language. He walks toward the door and can see only a small cubicle, bordered by another door, and several portholes. Higgens by gestures asks where they are from and the leader draws a map in the dirt, indicating a seventh planet, presumably Uranus. He eludes them by pretending to look for his wife and goes into a hidden spot in the woods. After 30 minutes the beings climb into the object and take off. (Wikipedia, "Caso José Higgens"; Mark Cashman, "Behavioral Classification System for UFO Occupants," *IUR* 24, no. 1 (Spring 1999): 18; Clark III 576–577; Brazil 21–23; Clark IV 634–635)

1947, July 25 — Intelligence agents from the Fourth Air Force, Lt. Frank M. Brown and Capt. William L. Davidson, visit Kenneth Arnold in Boise, Idaho, and tell him to contact them if he runs across any interesting UFO evidence.

1947, July 25 — A memorandum over the signature of Maj. Lester M. Garrigues states that by order of Col. Blanchard, the nine men who had been assigned duties in the recovery of the Roswell, New Mexico, crash are relieved from duty on that project. However, it is now largely considered a forgery by Frank Kaufmann. Garrigues has assumed duties in China prior to this and is no longer in Roswell. (Kevin D. Randle, "Frank Kaufmann, Roswell Witness," *IUR* 27, no. 3 (Fall 2002): 8, 17–19; Mark Rodeghier, "Frank Kaufmann Exposed," *IUR* 27, no. 3 (Fall 2002): 9–11, 26)

1947, July 25 — Day. Leonard Robertson is riding his motorcycle northeast of Dumas, Texas, when he sees a flash of light to his left. An oval object like a bubble is floating over a field about one mile away. Suddenly the object explodes, so Robertson takes a side road to the field where he retrieves a piece of metal "lighter than aluminum foil" about 30 inches long and 24 inches wide. There are two small holes in it and the center seems to be burned. ("Perryton Man Displays Proof of Saucer Story," *Amarillo (Tex.) Daily News*, August 6, 1947, p. 1; "Salvage from Mystery Blast," *Amarillo (Tex.) Daily News*, August 9, 1947, p. 5; Curt Collins, "The Texas UFO Crash Debris Photo from July 1947," The Saucers That Time Forgot, May 21, 2020)

1947, July 26 — President Truman signs the National Security Act, a major restructuring of the military and intelligence agencies. It creates a unified National Military Establishment (Army and Navy) and an independent Department of the Air Force, both under the new Secretary of Defense. The Joint Research and Development Board becomes the R&D brain center. Each of the three service secretaries maintains quasi-cabinet status. It establishes the

National Security Council to advise the president and the Central Intelligence Agency, the first peacetime intelligence agency in the US. The CIA is prohibited from conducting domestic surveillance, but Allen Dulles ensures it can handle "other functions" affecting "national security" without scrutiny from Congress or (sometimes) the president. Much of the CIA's funding initially comes from wealthy Americans. The act creates the first black military and intelligence budget. (Wikipedia, "National Security Act of 1947"; Clark III 795; Clark IV 876)

1947, July 27 — Ray Palmer wires Kenneth Arnold $200 to investigate the Maury Island, Washington, case. (Kenneth Arnold and Ray Palmer, *The Coming of the Saucers*, 1952, Palmer, pp. 23–24; Clark III 720; Clark IV 789)

1947, July 27 — Capt. Davidson and Lt. Brown interview Richard Rankin. The FBI finds that the CIC agents have also interviewed Kenneth Arnold, Capt. Emil J. Smith, Flight Officer Ralph Stevens, and *Boise Stateman* Editor David N. Johnson about their UFO sightings. Leverett G. Richards, aviation editor of the *Portland Oregonian*, informs the FBI of this information. He also calls Lieut. Gen. Nathan Twining, who leaves "the impression that the AAF instituted this investigation to wash out the disc reports since they are definitely not of AAF origin." (Memo for FBI Director from Mr. D. M. Ladd, August 14, 1947)

1947, July 28 — After assessing the Ernest Harmon AFB, Newfoundland, report, Gen. Schulgen orders Col. Howard M. McCoy, deputy commander of T-2 intelligence at Wright Field, Ohio, to send a top-level assessment team (possibly Alfred Loedding or Col. William R. Clingerman Jr.) to Stephenville "immediately" and report directly to the Pentagon afterwards. McCoy suspects German or Russian technology. (Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 33–34; Swords 39)

1947, July 28 — 8:34 p.m. Capt. Charles F. Gibian and First Officer Jack Harvey are piloting United Air Lines Flight 105 and descending above Mountain Home, Idaho, in preparation for landing in Boise. Harvey sees an object that seems to be another aircraft ahead of them and to the south, but it rapidly moves to the northwest in a weaving fashion, diminishing in size and vanishing from view. ("United Air Lines Crew Reports Sighting Flying Saucer between Mountain Home and Boise," Boise *Idaho Daily Statesman,* July 29, 1947, pp. 1–2; Bloecher, pp. III-13–14)

1947, July 29 — A memo from FBI agent E. G. Fitch says that Special Agent Reynolds has met with Gen. Schulgen again, who assures him that "all discs recovered would be made available for the examination by the FBI agents." (ClearIntent, pp. 149–150)

1947, July 29 — 6:55 a.m. Kenneth Arnold is flying to Tacoma, Washington, to investigate the Maury Island mystery. As he is over Union, Oregon, preparing to land at La Grande to refuel, he sees a cluster of 25 small (24–30 inches) brass-colored discs with a spot in the middle moving at a terrific speed. They come within 1,200 feet of his aircraft before veering away. At La Grande, he phones aviation editor David N. Johnson about his sighting, then reaches Tacoma at dusk. He gets a room (502) at the Winthrop Hotel, where a room and a bath have already been mysteriously reserved for him. Harold A. Dahl visits Arnold that night, then takes him to Fred Crisman's place to see some Maury Island fragments. Arnold thinks it looks like lava. (Kenneth Arnold and Ray Palmer, *The Coming of the Saucers,* Palmer, 1952, pp. 25–38; Bloecher, pp. I-15–16, III-14; Clark III 720–721; Clark IV 789)

1947, July 29 — 2:50 p.m. Assistant Base Operations Officer Capt. William H. Ryherd and ex-AAF B-29 pilot 1Lt Ward Stewart see two round, shiny, white objects near Hamilton Army Airfield [now closed] in Novato, California. The objects are 15–25 feet in diameter and are flying at about 750 mph at an altitude of 6,000–10,000 feet heading south. One object flies straight and level; the other weaves from side-to-side like an escort fighter. (Sparks, p. 25; Bloecher, p. III-5)

1947, July 30 — Arnold calls United Airlines pilot Capt. Emil J. Smith and asks him to come listen to the Maury Island, Washington, story. Smith arrives in Tacoma in the afternoon and cross-examines Dahl and Crisman. Smith stays with Arnold at the Winthrop Hotel. Journalist Ted Morello of United Press calls Arnold and says that a crackpot has been calling him, explaining everything that is going on in the hotel room, including conversations with Smith when they are alone. They try but fail to locate a listening device in the room. (Kenneth Arnold and Ray Palmer, *The Coming of the Saucers,* Palmer, 1952, pp. 38–46; Clark III 721; Eghigian, *After*, pp. 54–55; Clark IV 789)

1947, July 30 — The FBI issues a policy statement on "Flying Discs," saying that sightings should be investigated to see whether an "individual might be desirous of seeking personal publicity, causing hysteria, or playing a prank." ("Flying Disks," Section B, *Bureau Bulletin* no. 42, Series 1947, in Black Vault FBI documents compilation, p. 48; ClearIntent, p. 150)

1947, July 30 — A memo with the subject line, "Recovery 'Flying Discs,'" purportedly written by Maj. Edwin D. Easley, acknowledges that the Roswell, New Mexico, crash could "represent an interplanetary craft of some kind." However, it is now largely considered a forgery by Frank Kaufmann. (Kevin D. Randle, "Frank Kaufmann, Roswell Witness," *IUR* 27, no. 3 (Fall 2002): 8, 17–19; Mark Rodeghier, "Frank Kaufmann Exposed," *IUR* 27, no. 3 (Fall 2002): 9–11, 26)

1947, July 30 — The Garrett Estimate, an Air Force Base Intelligence Report on "Flying Discs"—an informal estimate of the situation based on 16 reports selected by Collections Officer Lt. Col. George D. Garrett—says that the "flying saucer situation is not all imaginary or seeing too much in some natural phenomena. Something is really flying around." Also, "Lack of topside inquiries . . . give more than ordinary weight to the possibility that this is a domestic project, about which the President, etc., know." The study is passed up the line to Gen. George Schulgen and Hoover at the FBI for comment, subtly indicating that investigating a domestic project is a waste of time. (Air Force Base Intelligence Report, "Flying Discs," July 30, 1947; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 32–33, 57–61; Swords 39, 474–475; Kevin D. Randle, "Roswell, Nathan Twining, and the Mini-EOTS," A Different Perspective, October 6, 2014)

1947, July 31 — Crisman and Dahl bring heavy fragments and white metal from the Maury Island case to the Winthrop Hotel room in Tacoma, Washington. They cannot locate the photos. Arnold calls Brown and Davidson at Hamilton Army Airfield in Novato, California. They quickly depart for Tacoma. Morello calls Arnold and says his informant knows that Brown and Davidson are on their way in a B-25. They arrive in the late afternoon. The five men talk until 11:00 p.m., when Crisman offers to go home and get more Maury Island fragments. He returns with slightly different, more slag-like rock stuffed in a large cereal box, which is loaded into Brown's army vehicle. Brown and Davidson leave to go back to Hamilton for Air Force Day the next day. Morello calls again and says his informant told him everything about what has just taken place. (Kenneth Arnold and Ray Palmer, *The Coming of the Saucers,* Palmer, 1952, pp. 46–57; [FBI teletype, August 6, 1947], pp. 87–88; Clark III 721; Eghigian, *After,* p. 55; Clark IV 789–790)

1947, July 31 — Capt. Edward Ruppelt: "By the end of July 1947, the UFO security lid was down tight. The few members of the press who did inquire about what the Air Force was doing got the same treatment that you would get today if you inquired about the number of thermonuclear weapons stock-piled in the U.S.'s atomic arsenal. . . [At T-2 there was] confusion almost to the point of panic." (Ruppelt, p. 22)

1947, August — USAF fighter pilot W. Boyce sees a hovering disc above Media, Pennsylvania. (UFOEv, p. 33)

1947, August — T-2 Intelligence and Army Air Force Intelligence hold meetings over the next two months and prepare documents requesting an authorized project to investigate UFOs, per General LeMay's 1946 instructions.

1947, August — The Air Materiel Command headquarters replaces T-2 Intelligence with the Technical Intelligence Department, tasked with producing reports and estimates on foreign air weapons. It begins to develop a photoanalysis capability.

1947, August — The *Denver Post* runs a story that claims the military is building a secret base consisting of huge caverns for atomic weapons defense purposes. The article says the new base is in the Manzano Mountains southeast of Sandia Base, New Mexico. The military responds by issuing a statement that operations and construction near Sandia Base are top secret. In fact, however, the Armed Forces Special Weapons Project is building one of several bases around the country that will be used for nuclear weapons storage. The AFSWP code-names the base "Site Able." (Wikipedia, "Sandia Base")

1947, August — Bernard Solli is haymaking near Lake Djupsjøen near Røros, Trøndelag, Norway. He hears a loud noise and sees an aluminum-colored, shiny object that floats down toward an islet, turns at an abrupt angle, and splashes into the water. It floats, then sinks after a while. ("Water and Its Connection with UFOs," *UFO Afrinews,* no. 10 (August 1994): 39, 40; Dolan, USO1, 127–128)

1947, August 1 — Brown and Davidson make a stop at McChord Field near Tacoma, Washington, to speak with intelligence officer Maj. George Sander, then board the B-25 for Hamilton Army Airfield [now closed] in Novato, California. It explodes and crashes near Kelso, Washington, at 1:30 a.m., 20 minutes after taking off, when the left engine catches fire. An army hitchhiker and engineer parachute to safety. Brown and Davidson fail to signal distress or bail out. After hearing the news, Arnold calls Palmer and offers to return his money. Palmer says to just mail him some fragments. Arnold and Smith visit Morello and Dahl and Crisman. They talk to *Tacoma Times* reporter Paul Lantz in the hotel lobby, who writes the article "Sabotage Hinted in Crash of Army Bomber at Kelso." Debris from the crash is not discovered until 2007. ("Air Force Day Marred As B-26 Crashes Here," *Longview (Wash.) Daily News,* August 1, 1947, p. 1; "'Flying Saucers' Figure in Two Air Crash Deaths," *Galveston (Tex.) Daily News,* August 3, 1947, pp. 1, 5; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers,* Palmer, 1952, pp. 57–72; Leslie Slape, "Marker Placed near Kelso to Honor Pilots in '47 Crash," *Longview (Wash.) Daily News,* August 3, 2007, p. 9; Charlette LeFevre and Philip Lipson, "The Maury Island UFO Incident," February 2014; Clark III 721; Eghigian, *After,* p. 55; Clark IV 790)

1947, August 3 — Smith contacts Maj. Sander, who relieves Arnold and Smith of all their fragments. He shows them a smelting lot where he finds similar pieces of slag. Smith and Arnold check out of the Winthrop Hotel in Tacoma, Washington. (Kenneth Arnold and Ray Palmer, *The Coming of the Saucers,* Palmer, 1952, pp. 73–84)

1947, August 4 — Pilots Capt. Jack Peck and Vince Daly see a smooth UFO northwest of Bethel, Alaska, dead ahead as they are flying a DC-3 for Al Jones Flying Service. Peck hauls back on his controls to bring his plane up to safer altitude. Now 1,000 feet higher, the pilots glance downward and spot the UFO closer but on a changed course. Still dark against the sky, it looks to be as large as a C-54. Intrigued, Peck dives on the object as it pulls away, doing his best to get a better view, but it speeds up to an estimated 500 mph and is lost to view in four minutes. (NICAP, "Smooth Black Object Crosses Path of DC-3"; Sparks, p. 25; Harold D. Johnston, "Matters of National Interest," August 5, 1947)

1947, August 6 — An FBI memo from E. G. Fitch to D. Milton Ladd identifies either Brown or Davidson as a CIC agent on a top secret mission. (Jason Colavito, ed., "Inquiry into Richard Shaver and Ray Palmer, Federal Bureau of Investigation, 1947")

1947, August 7 — The Seattle, Washington, FBI office interrogates Crisman and Dahl and announces the Maury Island incident is a hoax. The FBI file notes that Dahl stated that "if questioned by the authorities he was going to say it was a hoax because he did not want any further trouble over the matter." Dahl's daughter Louise admits in 2007 that the whole story was made up, as did her brother Charles in the late 1960s, who called Crisman a "smooth-talking con artist." The affair had started as a joke and blossomed into something worse. Associated Press reporter Elmer Vogel says that Dahl's wife had compelled him to tell Vogel the truth. Morello also speaks to Crisman, who admits the story is baseless. (Kenneth Arnold and Ray Palmer, *The Coming of the Saucers*, Palmer, 1952, pp. 105–111; Jason Colavito, ed., "Inquiry into Richard Shaver and Ray Palmer, Federal Bureau of Investigation, 1947"; Kenn Thomas, *Maury Island UFO: The Crisman Conspiracy*, IllumiNet, 1999; Anthony Bragalia, "Maury Island No Longer a Mystery: A UFO Hoax Exposed!" UFO Digest, July 8, 2010; Brian J. Robb, "Conspiracy Central: The Life and Lies of Fred Lee Crisman," *Fortean Times* 355 (July 2017): 32–39; Clark III 721; Eghigian, *After*, pp. 55–56; Clark IV 790)

1947, August 8 — Lt. Col. Donald L. Springer, assistant chief of staff for army intelligence at the Fourth Air Force, who has just returned to Hamilton Army Airfield [now closed] in Novato, California, from Tacoma, Washington, says "there is not sufficient evidence or testimony available to this headquarters to conclude whether or not the reports of so-called flying disks in the Tacoma area or any other area have any basis of fact." He adds that the Maury Island crash "did not occur." ("Fourth Air Force Drops Disc Inquiry; Search Held Futile," *San Francisco Examiner*, August 9, 1947, p. 5)

1947, August 9 — John Derry, serving as acting general manager of the Atomic Energy Commission, proposes a set of guidelines that restate the proposition that secrecy can be based on reasons other than national security. The definition of Confidential that he proposes goes beyond the Army and Manhattan Project rules: "*CONFIDENTIAL:* Documents, information or material, the unauthorized disclosure of which, while not endangering the National security, would be prejudicial to the interests or prestige of the Nation or any Governmental activity, or individual, or would cause administrative embarrassment, or be of advantage to a foreign nation shall be classified CONFIDENTIAL." The Derry memo calls for review by a classification board assembled from the AEC's regional sites. In September, this board assembles in Oak Ridge, Tennessee. The available documentation does not show that Derry's proposed rules go into effect, but it does show that the Classification Board blesses the illustrations of matter that "should be graded" Secret or Confidential. The former category includes "certain selected human administration experiments performed under MED [Manhattan Engineer District]." (US Advisory Committee on Human Radiation Experiments, "Final Report," October 1995, chapter 13)

1947, August 13 — 1:00 p.m. Albert Clarence Urie and his two sons Billy and Kenneth see a straw hat–shaped, sky-blue object about 10 feet wide, 10 feet high, and 20 feet long. It has "pods" on the side emitting flames and is flying along the Snake River Canyon six miles west of Blue Lakes Ranch near Twin Falls, Idaho. The UFO is moving up and down towards them at 1,000 mph and an altitude of 75 feet about 1/2 mile away. Urie is about 300 feet from the object, which is about level with him and silhouetted against the canyon wall. It disappears behind a hill about one mile away. Hynek, for Project Blue Book, later identifies it as an "atmospheric eddy." (NICAP, "Snake River Case"; Sparks, p. 26; "Flying Saucer Reported Flashing Down Canyon at 1,000 Miles Per Hour; Two Others Seen," *Twin Falls (Idaho) Times-News*, August 15, 1947, pp. 1, 8; *Hynek UFO Report*, p. 34; Story, pp. 337–338; Patrick Gross, "Snake River, August 13, 1947"; Clark III 377; Clark IV 421)

1947, August 13 — The *San Francisco Examiner*'s Washington Bureau hears a rumor from a US intelligence source that Soviet agents have been ordered to solve the mystery of flying saucers. It reports that the Kremlin believes that the discs are connected with Army experiments in anti-radar weaponry. ("Russ Agents Here Ordered to Solve Flying Disc Mystery," *San Francisco (Calif.) Examiner*, August 14, 1947, p. 1)

1947, August 14 — The first Gallup poll on UFOs shows that 90% of Americans have heard of flying saucers; 33% don't know what they are, 39% consider them hoaxes or misidentifications, 16% consider them US or Russian secret

weapons. The ETH is not mentioned. (George Gallup, "9 Out of 10 Heard of Flying Saucers," *Boston Globe,* August 15, 1947, p. 15; Project 1947, "August 1947 Gallup Poll"; Robert J. Durant, "Evolution of Public Opinion on UFOs," *IUR* 18, no. 6 (Nov./Dec. 1993): 9–10)

1947, August 14 — Shortly after 9:00 a.m. Italian artist and author Luigi Rapuzzi (who uses the pseudonym L. R. Johannis) is hiking along the left bank of the Torrente Chiarzò near Raveo, Udine, Italy, when he sees a vivid red, metallic, domed disc on the riverbank about 165 feet ahead. It is about 33 feet wide and embedded in a cleft in the rock about 20 feet above the stream. Looking around, he sees two "boys" on the edge of a grove of trees. He shouts at them and points to the object, walking toward them, but notices they are actually odd-looking dwarfs who are approaching him stiffly. They are about 3 feet tall and wearing dark blue coveralls with red collars, cuffs, and belts. Their greenish heads are covered in tight-fitting, brownish caps. He looks at them in astonishment for 2–3 minutes, then waves his geologist's pick at them and asks where they come from. One of the entities raises its right hand to its belt, which emits a puff of smoke that knocks Rapuzzi to the ground as if from an electric shock. As he is lying there, one of them grabs his pick and he notices its green hand has 8 claws. They climb up the rock and into the disc, which soon shoots straight out and into the air, hovering briefly at an angle, then vanishes. Rapuzzi feels a blast of wind that blows him across the ground. His pick is missing. (NICAP, "Professor Encounters 'Lens' and Creatures"; "The Villa Santina Case," in Charles Bowen, ed., *The Humanoids*, special issue of *FSR*, Oct./Dec. 1966, p. 2; 1Pinotti 19–30)

1947, August 14 — 10:40 a.m. Three men of the 147th Airways and Air Communications Service Squadron at Harmon Field, Guam, see two small crescent-shaped objects zigzagging at 1,200 feet. They disappear in the clouds and another object emerges and proceeds west. (Lt. Col. Donald L. Springer, "Flying Disc," August 27, 1947; Sparks, p. 26)

1947, August 14 — The FBI concludes that the plane carrying Davidson and Brown was not sabotaged, nor was it carrying actual flying disc parts. (Memo for FBI Director from Mr. D. M. Ladd, August 14, 1947)

1947, August 15 — In response to the August 13 *San Francisco Examiner* report, FBI Director J. Edgar Hoover asks the agency to look into whether Soviet spies are looking into whether the flying discs are a secret US technology. Assistant Director of the Domestic Intelligence Division D. Milton "Mickey" Ladd at FBI headquarters assures FBI Deputy Director Edward Allen Tamm that he is unaware of any such effort. (Memo to Assistant FBI Director E. A. Tamm from Agent D. M. Ladd, August 15, 1947)

1947, August 15? — 9:30 p.m. Maj. Elmer H. Hammer of the 28th Bombardment Wing at Rapid City Army Air Base [now Ellsworth AFB] near Box Elder, South Dakota, sees 12 objects flying at 6,000–10,000 feet in a tight diamond formation at 300–400 mph. The objects level off at approximately 5,000 feet and make a gentle large-radius turn of about 110° to the right about 4 miles away. They start climbing at an angle of 30–40° and appear to accelerate rapidly in the climb. The objects are approximately 100 feet long and have a brilliant yellow-white luminous glow. (NICAP, "12 B-29-Sized Elliptical Objects Seen"; Sparks, p. 26; *Hynek UFO Report*, p. 40; Michael D. Swords, "The Lost Words of Edward Ruppelt," *IUR* 20, no. 2 (Mar./Apr. 1995): 14–15; Clark III 437; Clark IV 482)

1947, August 17 —A forest ranger at a fire lookout tower on Mt. Josephine, Skagit County, Washington, observes an object shaped like a huge clam that appears to fall tipped at an angle northeast of the fire tower. It slows to a stop, levels off, and floats "leisurely as if suspended by a cord" for a few minutes and finally moves off to the southeast with ever increasing speed. (Loren E. Gross, *UFOs, a History: Volume 1, 1947,* The Author, February 1991, p. 61)

1947, August 19 — FBI memo to D. M. Ladd from E. G. Fitch on "Flying Discs" mentions SAC Reynolds's conversation with Lt. Col. George Garrett, who strongly suspects the Army or Navy is testing some new technology, concluding that "there were objects seen which somebody in the Government knows all about." However Gen. Stephen Chamberlin and the War Department claim to have no involvement or knowledge of such programs. (Memorandum from E. G. Fitch, "Flying Discs," August 19, 1947)

1947, August 19 — 9:30 p.m. H. H. Hedstrom (executive director of the Twin Falls Housing Authority) and three policemen (Richard A. Frazier, H. E. Roundtree, and Richard Scott) in Twin Falls, Idaho, see a formation of 12 objects flying in diamond formation at terrific speed. (NICAP, "August 19, 1947, Twin Falls, Idaho"; Sparks, p. 26; *Hynek UFO Report*, p. 39)

1947, August 20 — An Anglo-American intelligence team releases a report on secret German weapons. Foo fighters are said to be caused by a rocket-propelled plane launched straight up from the ground, intercepting Allied bomber formations by firing a spray of rocket shells from the nose. The pilot then parachutes back to the ground, a chute opens on the rocket, and it is recovered for re-use. ("Ribbon Chute, Nazi War Device, May Become New Safety Aid," *Staten Island (N.Y.) Advance,* August 20, 1947, p. 5)

1947, August 22 — Col. Robert Taylor III, Collection Branch of Army Air Force Intelligence, summarizes the findings of Lt. Col. Garrett's investigations of UFOs in a letter to Gen. Curtis LeMay, Deputy Chief of Air Staff for Research and Development. Taylor requests any information on AAF projects that might give rise to such UFO reports. (Col. Robert Taylor 3rd to Deputy Chief of Air Staff for Research and Development, "Flying Saucer Phenomena," August 22, 1947; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 August 1st–December 31st, Supplemental Notes*, The Author, 2001, p. 27; Swords 39–40)

1947, August 24 — The name Joint Research and Development Board is changed to simply Research and Development Board. (Michael Hall and Wendy Connors, "The Research and Development Board: Unanswered Questions," *IUR* 26, no. 2 (Summer 2001): 8)

1947, August 25 — USMC Maj. Marion Eugene Carl attains a world airspeed record of 651 mph in a Douglas Skystreak at Muroc AFB [now Edwards AFB], California. (Wikipedia, "Marion Eugene Carl")

1947, August 28 — Microwave Early Warning radar on Shika Island off Fukuoka, Japan, picks up a target moving 450–478 mph at an altitude of 1,500 feet. It changes course, climbs, and is tracked to a distance of 62 miles. (NICAP, "Target Tracked in a Climb"; Sparks, p. 27)

1947, August 29 — Gen. LeMay answers Col. Taylor's August 22 request stating that there is no Air Force project that might give rise to flying disk reports. (Swords 41)

1947, Late August — Brig. Gen. George F. Schulgen passes the updated Garrett Estimate on to Air Materiel Command head Gen. Nathan Twining with a request for a statement on the discs so an authorized UFO project can be requested. Col. Howard M. McCoy asks for a meeting between Alfred Loedding (aeronautics engineer at T-3), Lt. Col. George Garrett (Collections), and Charles Carroll (a math and missiles expert who has been correlating UFO sightings with approaches of planetary bodies) "in order to set up a system for evaluating the information being received." These four will later form the core of the ETH-friendly faction at Project Sign. (Letter to T-2 from Executive Air Intelligence Requirement Division, September 3, 1947; Sparks, p. 13; RosRept, p. 13; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 33–35; Swords 42, 43; Clark III 937; Clark IV 1047)

1947, September — Astronomer Lincoln LaPaz arrives in Roswell, New Mexico, and rediscovers the area of blackened ground earlier found by two of Wilcox's deputies. He speaks to some witnesses and determines there might have been more than one object.

1947, September 3 — A memo from Col. R. H. Smith at Air Defense Command headquarters at Mitchel Field on Long Island, New York, states that the intent of USAF cooperation with the FBI was to "relieve the numbered Air Forces of the task of tracking down all the many instances which turned out to be ash-can covers, toilet seats, and whatnot." (R. H. Smith, "Cooperation of FBI with AAF on Investigations of 'Flying Disc' Incidents," September 3, 1947, via FBI UFO Files, p. 21; ClearIntent, p. 156; Michael Hesemann and Philip Mantle, *Beyond Roswell*, Marlowe, 1997, p. 66)

1947, September 3 — Dale Edwards and three friends are camping out in the Desolation Wilderness area west of Lake Tahoe, California, when one of them, Peter Thompson, spots a huge gray UFO accompanied by a rush of warm air. The next day they discover a circle, 40 feet in diameter, of recently burned grass and skunk cabbage. ("True Mystic Experiences," *Fate* 2, no. 3 (September 1949): 76–77)

1947, September 5 — In response to the Garrett Estimate, Gen. Curtis LeMay states in a memo, copied to the FBI, that "a complete survey of research activities discloses that the Army Air Force has no project with the characteristics similar to those which have been associated with the Flying Discs." (Loren E. Gross, *UFOs, a History: Volume 1, 1947*, The Author, February 1991, p. 53; Michael D. Hall and Wendy A. Connors, *Alfred Loedding and the Great Flying Saucer Wave of 1947*, Rose Press, 1998, p. 83)

1947, September 5 — In Washington, D.C., Alfred Loedding (as Wright Field T-2's liaison with the Pentagon) meets with Garrett and Carroll. Flying disk reports at the Pentagon are transferred to Wright Field, Ohio, shortly afterwards. (Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 34)

1947, Mid-September — Twining passes the Garrett Estimate on to Col. Howard M. McCoy, Maj. Gen. Alden Crawford (chief of T-3), Gen. Franklin O. Carroll (director of research and development), Col. C. K. Moore (aircraft laboratory chief), Col. Russell Minty (power-plant laboratory chief), and Brig. Gen. Edgar P. Sorenson (Air Institute of Technology commander). They each study Garrett's report and hold a conference on the discs. (Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 33)

1947, September 16 — An incoming radar target is picked up at Itazuke Air Base [now Fukuoka Airport], Fukuoka, Japan, moving 840–900 mph, then fading out. (Col. James F. Olive Jr., "Radar Pick-Ups of High-Speed Targets in the Far East," Memorandum for Assistant Chief of Air Staff, Washington, D.C., September 26, 1947)

1947, September 17 — The US Senate confirms James Forrestal as the first Secretary of Defense.

1947, September 18 — The reorganization of military and intelligence agencies under the National Security Act takes effect. The US Army Air Forces is disbanded and becomes the US Air Force.

1947, September 19 — FBI Special Agent Harry M. Kimball in San Francisco passes Col. R. H. Smith's September 3 memo up the chain to Hoover. (ClearIntent, p. 156)

1947, September 19 — A dubious document, allegedly written on this date by DCI Adm. Roscoe Hillenkoetter and titled "Examination of Unidentified Disc-Like Aircraft near Military Installations in the State of New Mexico: A Preliminary Report," has been circulated by Timothy S. Cooper. It purports to verify the "recovery of unidentified planform aircraft" in two locations on July 6. (R. H. Hillenkoetter, "Memorandum for the Military Assessment of the Joint Intelligence Committee," September 19, 1947; Good Need, p. 95)

1947, September 19 — 5:30 p.m. A geophysicist employed by the Humble Oil and Refining Company is testing a weather radar at Grand Isle, Louisiana, when the radar detects an object moving in a southwesterly direction at about 1,000 mph. It persists for about one minute, so he records it in his notebook and discusses the sighting with other scientists. No visual sighting is made. (*Houston Press*, March 24, 1950; Jan L. Aldrich, "Project 1947: A Progress Report," March/April 1996)

1947, September 21 — Arrangements are made to transfer UFO files from Garrett's office in the Pentagon to Alfred Loedding at AMC. (Swords 43)

1947, September 23 — Head of Air Materiel Command Gen. Nathan Twining responds to Schulgen's request for UFO information with a classified letter composed by Col. Howard M. McCoy with the assistance of Alfred Loedding, "AMC Opinion Concerning 'Flying Disks.'" Twining notes the discs are "real and not visionary or fictitious." Reports (based on the cases in the Garrett Estimate) include "extreme rates of climb, maneuverability (particularly in roll), and action which must be considered evasive." Twining gives three reasons to study the discs: They might represent a deep-black domestic project; to pick up physical evidence; and to find out if they are nuclear-propulsion devices from Russia or elsewhere. The letter lists common descriptions of the objects and recommends that USAF "issue a directive assigning a priority, security classification, and code name for a detailed study of the matter." This will ultimately result in Project Sign. Henceforth all disc reports are to be sent to the Army and Navy Research and Development Board, the USAF Scientific Advisory Group, the Atomic Energy Commission, the National Advisory Committee for Aeronautics, Project RAND, and the Nuclear Energy for the Propulsion of Aircraft project at Oak Ridge. Twining promises a detailed "Essential Elements of Information" (EEI) to be formulated immediately so that all agencies will have guidance. (Lt. Gen. Nathan Twining, "AMC Opinion Concerning 'Flying Disks,'" September 23, 1947; Ruppelt, pp. 15–16; Good Above, pp. 260–262, 476–478; RosRept, p. 14; Swords 42, 476–478; Clark III 934; Bryce Zabel, "The 1947 Twining UFO Memo Still Matters," Medium: Need to Know, June 1, 2021; Clark IV 998, 1014)

1947, September 24 — DCI Hillenkoetter, in a letter to AMC, designates T-2 and the Air Intelligence branch of the US Navy Bureau of Aeronautics as National Assets. He indicates that he does not plan to duplicate air technical intelligence assets within the CIA. (Jan Aldrich)

1947, September 24 — President Truman meets with Vannevar Bush, chairman of the Research and Development Board, at the White House. Secretary of Defense James Forrestal is also present. (Stanton T. Friedman, *Top Secret / MAJIC*, Marlowe, 1996, pp. 68–69)

1947, September 24 — A fake memo from President Truman to Secretary of Defense James Forrestal allegedly establishes a top-secret control group, Operation Majestic Twelve (MJ-12), to deal with the UFO problem. (Good Above, p. 551; Joe Nickell and John R. Fischer, "The Crashed-Saucer Forgeries," *IUR* 15, no. 2 (Mar./Apr. 1990): 4–20; Philip J. Klass, "New Evidence of MJ-12 Hoax," *Skeptical Inquirer* 14 (Winter 1990): 135–140; Ted R. Spickler, "The Truman MJ-12 Letter," *IUR* 16, no. 3 (May/June 1991): 12–13; Clark III 360; Clark IV 404)

1947, September 24— Col. Miles E. Goll, in a memo signed for Col. Howard M. McCoy, asks about a radar case in Japan that Charles Carroll had mentioned to Alfred Loedding in their meeting of September 5. (Dr. Carroll's UFO files; Jan Aldrich)

1947, September 25 — D. M. "Mickey" Ladd advises J. Edgar Hoover about the September 3 memo from Col. R. H. Smith on Air Force cooperation with the FBI that "indicates that the services of the FBI were enlisted in order to relieve the numbered Air Forces of the task of tracking down all the many instances which turned out to be 'ash can covers, toilet seats, and whatnot.'" He recommends discontinuing any cooperation with the Air Force. (D. M. Ladd to J. Edgar Hoover, "Flying Discs," September 25, 1947, via FBI UFO Files, p. 20)

1947, September 25 — A memorandum from Maj. Robert J. Thomas lists the names of nine military personnel in charge of events in the aftermath of the Roswell, New Mexico, recovery. However, it is now largely considered a forgery by Frank Kaufmann. (Kevin D. Randle, "Frank Kaufmann, Roswell Witness," *IUR* 27, no. 3 (Fall 2002): 8, 17–19; Mark Rodeghier, "Frank Kaufmann Exposed," *IUR* 27, no. 3 (Fall 2002): 9–11, 26)

1947, September 26 — A memorandum from Col. James F. Olive Jr., Chief of Air Intelligence Division, to the Assistant Chief of the Air Staff, A-2, summarizes three radar trackings of high-speed targets in Japan (Chitose Air Base, July 1; and MEW Radar Station, Fukuoka, August 28 and September 16). It concludes that there is insufficient information to state that they involved aircraft or missiles but supports the conclusion that they were not natural phenomena. The report is forwarded to T-2 on September 29. (Col. James F. Olive Jr., "Radar Pick-Ups of High-Speed Targets in the Far East," Memorandum for Assistant Chief of Air Staff, Washington, D.C., September 26, 1947).

1947, September 27 — Hoover notifies USAF Maj. Gen. George C. McDonald, assistant chief of air staff, that he is advising all FBI agents to discontinue all flying disc investigations. (Letter, J. Edgar Hoover to Gen. George C. McDonald, September 27, 1947; ClearIntent, p. 158; Michael Hesemann and Philip Mantle, *Beyond Roswell,* Marlowe, 1997, p. 67)

1947, September 30 — Vannevar Bush is appointed head of the new Research and Development Board in the National Military Establishment. (*Research and Development Board: History and Functions*, US National Military Establishment, June 1, 1948)

1947, Fall — Claude Degler, under the pseudonym John Chrisman, publishes a single issue of the first flying saucer fanzine, *Weird Unsolved Mysteries.* (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 August 1st–December 31st, Supplemental Notes*, The Author, 2001, pp. 56–69; Curt Collins, "Claude Degler, One of the Ufologists That Time Forgot," The Saucers That Time Forgot, July 15, 2021)

1947, Early October — Private pilot Selman E. Graves claims to have witnessed part of the recovery of a crashed UFO near Cave Creek, north of Paradise Valley, Arizona, on property owned by his friend, Walt Salyer. Graves says the federal government sponsored a state government project that relocated a nearby road and bulldozed the land to cover up the crash site. (Good Above, pp. 394–397)

1947, October 1 — *Bureau Bulletin* 59 ends all FBI cooperation with the Air Force on UFO investigation, although the FBI continues its own inquiries. (ClearIntent, p. 159)

1947, October 1 — A letter from Truman to Vannevar Bush appears to bear the original Truman signature used in the MJ-12 fake memo.

1947, October 7 — Capt. R. V. A. Therien of the Royal Swedish Navy states at USAF headquarters that some ghost rockets have been observed making 180° turns, and about 33 of the incidents are considered factual. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 August 1st–December 31st, Supplemental Notes*, The Author, 2001, p. 76)

1947, October 14 — Bernt Balchen, Norwegian Airline director and former USAF Colonel, gives USAF headquarters information about two radar locations and a rocket firing incident observed in the Petsamo region (Pechengsky District) of Finland, recently ceded to Russia. Gen. Alfred A. Kessler Jr., former US military attaché in Sweden, disputes Therien's information. He says only two ghost rocket sightings are possibly factual, but there is no evidence to authenticate them. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 August 1st–December 31st, Supplemental Notes*, The Author, 2001, p. 76)

1947, October 14 — Test pilot Chuck Yeager unofficially breaks the sound barrier (670 mph) for the first time in an experimental rocket-powered Bell X-1 at Muroc [now Edwards] AFB, California. (Wikipedia, "Chuck Yeager"; Chuck Yeager and Leo Janos, *Yeager: An Autobiography*, Century, 1985; Kaitlyn Crain Enriquez, "Captain Chuck Yeager: Breaking the Sound Barrier," The Unwritten Record, October 13, 2022; Bob van der Linden, "Breaking the Sound Barrier: Chuck Yeager and the Bell X-1," National Air and Space Museum, October 13, 2022; Graff 29–31)

1947, October 20 — A farmer named Britton sees two cigar-shaped UFOs traveling a straight course at high speed about one mile in height in trail formation near Dayton, Ohio. They leave a slight vapor trail then disappear suddenly. (NICAP, "Farmers Observes Two Cigars"; Sparks, p. 29; Keyhoe, FSTS, p. 89)

1947, October 21 — A preliminary EEI document, indicating that the radar detection of UFOs near Fukuoka, Japan, on September 16 has played a role in concerns about disc maneuverability, is circulated to the European Command by Lieut. Col. Malcolm D. Seashore, former acting chief of the Analysis Section at AMC under Col. Howard M. McCoy. It expresses concern about German/Russian technology and adds disc characteristics of hovering, disappearance, quick grouping, and sudden appearance. ("'Flying Disc' Information Request to European Command, October 1947"; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 35; Swords 43, 479–484)

1947, October 21 — The jet-propelled Northrop YB-49 makes its first test flight from Jack Northrop Field in Hawthorne, California, reaching Muroc AFB in 32 minutes. (Wikipedia, "Northrop YB-49")

1947, October 28 — Brig. Gen. George F. Schulgen, Chief of USAF Intelligence Requirements Division, writes a five-page report based on the characteristics listed in the September 23 Twining letter (though in greater detail) and the preliminary EEI of October 21. Titled "Intelligence Requirements on Flying Saucer Type Aircraft: Draft of Collection Memorandum," it lists things investigators should try to determine about UFO propulsion, control, construction, arrangement, landing gear, and power plant. It considers the objects "to be a manned aircraft, of Russian origin, and based on the perspective thinking and actual accomplishments of the Germans" (page 5, paragraph 4). [However, a *fake version* of this document has the phrase "it is the considered opinion of some elements that the object may in fact represent an interplanetary craft of some kind…. The presence of an unconventional or unusual type of propulsion system cannot be ruled out and should be considered of great interest." Other deletions and additions are present in the fake document.] (George F. Schulgen, "Intelligence Requirements on Flying Saucer Type Aircraft: Draft of Collection Memorandum," October 30, 1947 [PDF of real memo, pp. 1–6, PDF of fake memo, pp. 7–12]; Good Above, p. 262; RosRept, p. 35; Robert G. Todd, "Fake Air Force Memo Exposed," The Roswell Files; Robert G. Todd, "Fake Air Force Memo Exposed, Part 2," The Roswell Files; Robert G. Todd, "Fake Air Force Memo Exposed, Part 3," The Roswell Files; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 35–36)

1947, November — Former Messerschmidt test pilot Fritz Wendel tells US Army CIC that the Horten brothers were working on an advanced aircraft in Heiligenbeil, East Prussia [now Mamonovo, Russia] right after the war. The airplane is 33 feet long, shaped like a half-moon, and has no tail. It can fly to 12,000 feet. Wendel's story is corroborated by a German informant named Prof. George, who describes a later Horten craft as able to fly at 1,200 mph because it is propelled by rockets. (Jacobsen, *Area 51,* pp. 41–42)

1947, November 6 — Chuck Yeager again makes an unofficial airspeed record of 891 mph in a Bell X-1 at Muroc AFB, California. (Wikipedia, "Chuck Yeager")

1947, November 10 — Lt. Col. Walker sends a memo to his field commands in Germany in response to the September 23 Twining letter. It calls for a discreet canvass into finding German engineers who might know of similar technology. ("The Walker Memo," The Roswell Files)

1947, November 12 — Early morning. US Navy Second Officer Williamson on the tanker *Ticonderoga* 40 miles north or south of Cape Blanco, Oregon, sees two fireballs with fiery tails heading northwest at 700–900 mps. Possible meteors. (Sparks, p. 29; "Objects Seen by Sailor off Coast of Oregon," Portland *Oregon Daily Journal*, November 13, 1947, p. 13)

1947, November 18 — *Boise Idaho Statesman* Aviation Editor David N. Johnson, having heard of the USS *Ticonderoga* sighting, writes to Gen. George E. Stratemeyer at Mitchel Field, New York, for information and asking eight questions about the Army's investigation. Stratemeyer passes the query on to Garrett and Taylor. (Swords 43)

1947, December 8 — Pilots observe a reddish light moving at moderate speed over Las Vegas, Nevada. It emits a flash of green light and shoots upwards at a "tremendous speed." (UFOEv, p. 149)

1947, December 11 — Garrett and Taylor write a memorandum to the USAF Public Relations Office outlining the proper answers to questions such as Johnson has asked. (Swords 44)

1947, December 14 — 12:20 a.m. Six staff sergeants at Fort Bragg, North Carolina, watch a domed disc with a glowing green corona surrounding it moving slowly at a slightly tilted angle. It skims the treeline (causing the tops of the trees to wave slightly) and takes off to the northwest. They estimate it is 50–75 feet in diameter and flying at 200 feet altitude. (Project 1947 case file)

1947, December 16 — Army Lt. Col. Harry H. Pretty in Berlin writes a memo to the Deputy Director of Intelligence in Berlin stating that the Horten brothers (Reimer and Walter) have been located in Göttingen, Germany. He says they are eccentric and quarrelsome. Though they were responsible for the Horten Ho 299 (a prototype fighter/bomber flying wing design), his investigation concludes that no saucer design "ever existed nor was projected by any of the German air research institutions." (Lt. Col. Harry H. Pretty, "Horten Brothers (Flying Saucers)," December 16, 1947)

1947, December 17 — US Air Force Chief of Staff Gen. Carl Spaatz tells the *Idaho Statesman* he does not rule out the possibility of the flying disks being "foreign experimentation." He adds that the Air Force is still investigating and he still wants people to report their sightings. ("Spaatz Leaves Door Open on Chance 'Flying Discs' Are of Foreign Origin," *Boise Idaho Statesman,* December 17, 1947, p. 1)

1947, December 18 — Pentagon Col. James F. Olive Jr. (chief of AFOAI) and Lieut. Col. J. E. Thomas of the Offensive Air section (AFOAI-OA) respond to a request by deputy chief of Air Staff for Research and Development Gen. Curtis LeMay on the status of flying disc analysis. They complete their reanalysis of the earlier documents from the Pentagon and Wright-Patterson, rewrite a new EEI indicating a potentially serious but puzzling phenomenon,

and turn this over to Chief of Air Force Intelligence McDonald for his signature. ("Analysis of 'Flying Disc' Reports," December 18, 1947; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 36; Swords 43, 485–491)

1947, December 19 — The Research and Development Board has its first meeting.

1947, December 19 — Col. Howard M. McCoy at AMC reports that "Continued and recent reports from qualified observers concerning this phenomenon still makes this one of concern to Headquarters, Air Material Command." (H. M. McCoy to L. C. Craigie, "Flying Discs," December 19, 1947)

1947, December 22 — The final EEI, called "Analysis of Flying Disc Reports," is issued by Chief of USAF Intelligence George C. McDonald, who concurs with AMC's recommendation of September 23 and forwards it to director of USAF Research and Development Gen. Laurence Cardee Craigie for a reply. Gen. Charles Cabell, the new chief of AFOIR, signs off on this. ("Analysis of 'Flying Disc' Reports," December 18, 1947; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 36)

1947, December 26 — At the American Association for the Advancement of Science meeting in Chicago, Illinois, University of Iowa astronomer Charles C. Wylie proposes a coast-to-coast sky patrol to report on rockets, meteors, or flying saucers. He says that "mass hysteria" about saucers could have been prevented with a sky patrol in place. ("Sky Patrol Recommended by Scientist," *Richmond (Va.) Times Dispatch*, December 27, 1947, p. 8; Loren E. Gross, *UFOs, a History: Volume 1, 1947,* The Author, February 1991, p. 76)

1947, December — By now, ATIC has received 156 UFO reports. Aerodynamicists at ATIC and AMC agree that no German design can match UFO performance. The USAF Aeromedical Laboratory says that even if such a craft can be built, the human body cannot withstand the maneuvers, and USAF materials specialists say that no known material can withstand them either, as well as the heat of high speeds. Ruppelt later writes, "Why couldn't these people, whoever they might be, stand these horrible maneuver forces? Why judge them by earthly standards? I found a memo to this effect was in the old Project Sign files." (Ruppelt, p. 28)

1947, December 30 — Gen. Laurence C. Craigie, director of USAF R&D and successor to Gen. Curtis LeMay (who has returned to Europe), advises the AMC commanding general that USAF policy is not to ignore UFO reports, but to collect, evaluate, and act on the information. He establishes Project Sign (Project HT-304 under USAF Technical Instruction no. TI-2185) in a memo titled "Flying Discs." Alfred Loedding, who is convinced that the flying discs are extraterrestrial, may have come up with the "Sign" designation. It carries a 2A restricted classification. Craigie, after his retirement from the Air Force in 1955, indicates that he believes UFOs are a waste of time and has only approved Project Sign because of internal USAF politics. (Sparks, p. 11; Gen. Laurence C. Craigie, "Flying Discs," Memorandum to Commanding General, Air Materiel Command, December 30, 1947; "Report by the Director of Intelligence, USAF, to the Joint Intelligence Committee on Unidentified Aerial Objects," April 28, 1949, p. 2; Condon, p. 896; Michael David Hall and Wendy Ann Connors, "Alfred Loedding: New Insight on the Man behind Project Sign," *IUR* 23, no. 4 (Winter 1998): 24; Clark III 934; Clark IV 1044–1045)

1948

1948 — David T. Keating, an employee of the USAF Nuclear Energy for the Propulsion of Aircraft group, is flying with the 166th Fighter Squadron of the Ohio National Guard out of Lockbourne AFB [now Rickenbacker Air National Guard Base] in Lockbourne, Ohio. While executing a flip of his P-51 at 18,000 feet, he sees a silvery disc zoom above his plane. He goes in pursuit of it at 325 mph and closes to within 240 feet of it. It seems to be 40 feet in diameter and 6 feet thick, with a vertical stabilizer rudder on the end. He keeps flying after it even when he loses sight of it. "About 10 miles south of the Ohio River," he claims, "I spotted litter on a hillside and a path that had obviously been ripped up by a crashing plane." Short on fuel, he returns to Lockbourne. He persuades his major to fly over the crash scene, and they send a truck to retrieve the remains. (Helen Knox, "Ridge Newcomer Tells of Game of Tag with 'Saucer,'" *The Oak Ridger*, September 18, 1950; Clark III 325; Clark IV 361)

1948 — An airman stationed in Arizona is called out with a scientific team to examine a flying saucer that has crashed near Taos, New Mexico. When he arrives, the area is roped off and under military guard. The object is metallic with a flat circular airfoil. The cabin at the top center is too small for a normal-sized human. He is told by workers on the scene that bodies of "little men" have been removed from the craft. They discover that the ship is constructed of interlocking sections pinned together, but they cannot locate a power plant, except possibly some electromagnets below the cabin. (L. J[ames] Lorenzen, "Aimé Michel's Orthotenic Lines," *APRO Bulletin*, July 1958, pp. 6–7; Clark III 325; Clark IV 362)

1948 — British author and ex-MI5 operative Bernard Newman publishes a novel titled *The Flying Saucer*, the first book to use that phrase in its title. The story revolves around a group of scientists who create a fake Martian threat in

order to bring the world together. Plot elements include a trio of staged saucer crashes (in New Mexico, Russia, and the UK), propaganda, and even an alien autopsy. (Bernard Newman, *The Flying Saucer*, Gollancz, 1948; Andrew May, "The Flying Saucer," Retro-Forteana, June 30, 2013; Kremlin 43–45; Eghigian, *After*, p. 65)

1948? — Sylvia Hall, 11, wakes up at her home on the corner of Riggs Road and Lateral 1 Road south of Yakima, Washington, when her bedroom fills with bluish-white light pouring in through the closed west window. Some 100 feet above the ground is a huge bright cloud. Gliding down from it in groups of four on something like a ramp are tall people with bluish-silvery robes. She watches them for 10 minutes, then she has an overpowering desire to go back to bed. She tells no one about the experience until she is an adult. (Greg Long, "Strangeness at Yakima," *IUR* 19, no. 4 (July/Aug. 1994): 16–17)

1948, January 6 — 3:00 p.m. Bernice Zaikowski, 61, of Chehalis, Washington, hears a "sizzling and whizzing" sound and looks up to see a "birdman" hovering 200 feet above her barn. She watches "a man equipped with long silver wings fastened over the shoulders with a strap" ascend rapidly, hover, bank, then fly away. "He flew in an upright position and appeared to be manipulating controls strapped to his chest." The wings do not flap; instead they retract close to his body during ascent, and are extended to hover or proceed in horizontal flight. Zaikowski says five other adult witnesses and a number of children also see the birdman. ("'Flying Man' Is Chehalis Report," *Coos Bay (Oreg.) World*, January 21, 1948, p. 2; "Is It a Bird? A Plane? No! It's Birdman," *Portland Oregonian*, January 21, 1948, p. 10; "Woman Says No Mistake over Miracle," Portland *Oregon Journal*, January 21, 1948, p. 13; Lyle Zapato, "The Birdmen of Cascadia," ZPi blog, March 24, 2007; Loren Coleman, "1948 'Birdmen' Cases Revisited," Cryptomundo, May 12, 2008; Clark III 270, 777; Clark IV 310, 858)

1948, January 7 — 1:00 p.m. Kentucky State Police telephone Commanding Officer Col. Guy F. Hix's office at Godman Army Airfield in Fort Knox, Kentucky, reporting an unidentified object near Elizabethtown, Kentucky. Another call to Hix comes from state police at about 1:10 p.m. of an observation by a civilian in Madisonville, Kentucky, through a Finch telescope of a cone-shaped object about 100 feet tall by 43 feet wide, at an altitude of 4 miles and moving at 10 mph. This is apparently General Mills Skyhook balloon Flight B, which passes about 40 miles to the southwest of Madisonville. Other reports come in from Lexington and Mannsville, Kentucky. ("Spyglasses Search through the Southwest Sky but Great What-Was-It Keeps Out of Sight," *Louisville (Ky.) Courier-Journal*, January 9, 1948, p. 12; Sparks, p. 30)

1948, January 7 — 1:20–2:10 p.m. Army Flight Service reports to Godman Army Airfield control tower that the object is over Irvington then Owensboro, Kentucky. Godman Tower Operator Tech/Sgt Quinton A. Blackwell, Capt. James F. Duesler Jr., Base Air Inspector Lt. Col. E. Garrison Wood, and other USAF personnel see a round or ice-cream-cone-shaped white or silver object with a revolving red streamer toward the south beginning at 1:50 p.m. Many others see it as well after 2:07 p.m., such as Operations Officer Capt. Cary W. Carter and Col. Guy F. Hix. (Sparks, p. 30)

1948, January 7 — 1:45–3:50 p.m. A circular object is reported by civilians over Elizabethtown, Madisonville, Lexington, Maysville, Irvington, and Owensboro, Kentucky. In the Godman Army Airfield control tower at Fort Knox, Tech/Sgt. Quinton A. Blackwell and others spot an object shaped like an ice cream cone with a red light around the lower part in the southwest at 1:45 p.m. Base Commander Col. Guy Hix says it is about one-quarter the size of the full moon and white in color. The object maintains a constant angular position as seen from Godman as it apparently moves away at about 240–300 mph at an altitude of 50,000–60,000 feet. Capt. Thomas F. Mantell Jr., a 25-year-old Kentucky Air National Guard pilot, and three others are flying F-51D fighters to Louisville, Kentucky. After Mantell reports his position to Standiford Field in Louisville at 2:50 p.m., Blackwell breaks in over the radio to request Mantell to intercept and identify the object. Mantell and two other fighters (piloted by Lieuts. Albert William Clements and B. A. Hammond), not equipped with oxygen masks, begin pursuit. Flying at 300 mph and gradually climbing, Mantell gradually approaches the UFO from below. At about 3:10 p.m., in one of his last radio reports, Mantell says he is approaching 20,000 feet and the UFO "appears to be a metallic object or possibly reflection of sun from a metallic object, and it is of tremendous size" (although a later report corrects his transmission to "It's above me and I'm gaining on it"). Two other F-51Ds quit the chase, no longer able to see Mantell or the object. Mantell continues to perhaps 25,000 feet, blacks out, and crashes at 3:18 p.m. about 4 miles south-southwest of Franklin, Kentucky. The UFO disappears from view behind a cloud at Godman at 3:50 p.m. The Project Sign staff, still not yet formally organized, are under pressure to come up with some kind of answer, so they quickly float Venus (offhandedly suggested by Ohio State University astronomer J. Allen Hynek) as an explanation. This implausible explanation is not even believed by the Air Force, but it remains unchallenged for several years. In 1952, Ruppelt reopens the case and identifies the object as a secret Skyhook balloon, although he cannot confirm a launch that day. Army veteran Clifford Stone finds later that there have been no Skyhook launches since late December. However, Barry J. Greenwood and Robert Todd tentatively identify the balloon as

one launched from Camp Ripley near Little Falls, Minnesota, on January 6. Researchers Francis Ridge and Brad Sparks declared in 2010 that there was sufficient doubt about the balloon explanation and other details to place the case back into the unidentified slot. (Wikipedia, "Mantell UFO incident"; NICAP, "The Mantell Case"; Sparks, pp. 30–31; "Chase for Flying Disk Blamed in Crash Death," *Louisville (Ky.) Courier-Journal*, January 9, 1948, pp. 1, 12; "Flier Dies Chasing a 'Flying Saucer,'" *New York Times*, January 9, 1948, p. 11; "Did Airman Hit 'Saucer,' Fall to Death?" *Nashville Tennessean*, January 9, 1948, pp. 1, 4; Keyhoe 1950, pp. 15–21; *Flight Handbook, USAF Series F-51D Aircraft*, January 20, 1954; Harold T. Wilkins, *Flying Saucers on the Attack*, Citadel, 1954, pp. 89–92; Ruppelt, pp. 31–32; Donald H. Menzel and Lyle G. Boyd, *The World of Flying Saucers*, Doubleday, 1963, pp. 33–39; Loren E. Gross, *UFOs: A History, 1948*, The Author, 1988, pp. 2–8; Good Above, pp. 262–263; "The Mantell UFO: A Smoking Gun, Maybe!" *Just Cause*, no. 39 (March 1994): 9–10; "The Mantell UFO: A Smoking Gun, Maybe! Part Two" *Just Cause*, no. 40 (June 1994): 8–12; "UFO Confrontation: Kentucky" segment of *Sightings*, Season 3, Episode 18, February 12, 1995; "Mantell Re-Examined" segment of *Sightings*, Season 5, Episode 3, October 18, 1996; Christopher D. Allan, "The Mantell Case—50 Years Later," *IUR* 23, no. 1 (Spring 1998): 7–9, 31–32; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 37; Michael D. Swords, *GrassRoots UFOs: Case Reports from the Timmerman Files*, Fund for UFO Research, 2005, pp. 137–138; Good Need, pp. 104–105; Center for UFO Studies, [clippings and case materials on Mantell case]; The Black Vault, [Mantell documents and photos]; Francis Ridge, *The Mantell Incident: An Anatomy of a Re-Investigation*, The Author, 2010; Swords 51–52; Kevin D. Randle, "The Mantell Analyses," A Different Perspective, September 21, 2017; Clark III 706–710; "Captain Thomas F. Mantell's Plane Crashed after Chasing a UFO over Kentucky on January 7, 1948," Eyes on Cinema YouTube channel, November 30, 2023; Powell, *Keyhoe*, 61–63; Graff 37–39, 75–77; Eghigian, *After*, p. 49; Clark IV 424, 773–776)

1948, January 7 — 4:45–7:06 p.m. USAF 1Lt. Paul I. Orner tracks an unidentified white light with red coloration in a weather theodolite at Godman Army Airfield in Fort Knox, Kentucky, for more than 2 hours. (Sparks, p. 31)

1948, January 7 — 7:15 p.m. Air Traffic Controller and pilot Alex A. Boudreaux and VHF Direction-Finding (DF) Operator and amateur astronomer Frank M. Eisele, 103rd AACS Squadron, at Lockbourne AFB [now Rickenbacker Air National Guard Base] in Lockbourne, Ohio, spot a bright object to the southwest of the airfield that appears and disappears intermittently. Fighter pilot USAF Capt. Charles E. McGee sees the object on runway 23 landing approach when he is at about 1,800 feet. The light seems to be at about 3,000 feet to the southwest about 4–5 miles away, then later on the ground to the west about 6–7 miles away. USAF VHF DF Operator and pilot Albert R. Pickering, Detachment 733, 103rd AACS Squadron, is awakened by the sudden emergence of a lighted amber-colored round or oval object about the size of a C-47 or larger [60+ feet] dropping out of the overcast bank 10,000 feet overhead. Lockbourne Control Tower at the same time radios a report of the object, which then maneuvers over to Commercial Point about 3–5 miles away to the west-southwest, then makes three full 360° circles over one spot in 30-40 seconds per turn over the runway, at a speed of more than 500 mph, leaving a luminous, amber-colored trail or exhaust about 5 times its length. Then the UFO goes to another location and does more 360° turns. At one point, it disappears into the overcast for one minute, then reappears. Just before departing, it hovers or "appeared to touch down" on the grass extension past the end of the Lockbourne AFB runway for 10 seconds then leaves at 120° (ESE) heading into the overcast. It is also sighted by the pilot of a C-45 at 5,000 feet off the right wing at 7:53 p.m. (NICAP, "Object Circles Base at High Speed / Touches Down"; Sparks, p. 32)

1948, January 7 — 7:35 p.m. Base personnel at Clinton County AFB [now Wilmington Air Park] near Wilmington, Ohio, where Skyhooks are launched a couple years later, watch a quickly maneuvering object. It dances up and down and changes from red to green before speeding to the southwest. Sgt. LeRoy Ziegler thinks he can detect a faint exhaust trail. Project Sign calls it Venus, because it disappears about the time Venus does. (NICAP, "Object Circles Base at High Speed / Touches Down"; "Strange Phenomena Seen in Sky Here," *Wilmington (Ohio) News-Journal*, January 8, 1948, p. 1; "Ball of Red Fire Reported at Wilmington," *Dayton (Ohio) Herald*, January 9, 1948, p. 25; Francis Ridge, *The Mantell Incident: An Anatomy of a Re-Investigation*, The Author, 2010, part 2-11)

1948, January 9 — 11:30 p.m. Eastern Airlines pilot Hugh DuBose, flying a DC-3 aircraft at 3,000 feet altitude near Cartersville, Georgia, observes a circular object with a flat top cross his flight path at the same altitude and then turn earthward. The object is light sky-blue in color and is traveling at an estimated speed of 400 mph. (NICAP, "Object Passes DC-3, Turns"; Sparks, p. 32)

1948, January 21 — Col. Riley F. Ennis, chief of the Army Intelligence Division, in a memo reiterates the Schulgen Draft of Collection Memorandum and stresses the need to investigate Soviet development of a jet-propelled flying wing aircraft. (Department of the Army, "Unconventional Aircraft," Intelligence Collection Memorandum number 7, January 21, 1948)

1948, January 22 — Project Sign officially launches at Wright Field [now Wright-Patterson Air Force Base] near Dayton, Ohio. The primary investigators are Capt. Robert R. Sneider (project chief), Alfred Loedding (T-3 engineer), Lawrence Truettner (T-2 engineer), and Col. Albert Deyarmond (analyst in Intelligence Analysis Division). Also involved are Maj. Raymond Llewellyn (chief of special projects branch), Lt. Howard W. Smith, George W. Towles, and others as assigned. How much interest Col. Howard M. McCoy takes in the project is unknown. Its task is to collect, collate, evaluate, and distribute information on sightings in the atmosphere "which can be considered of concern to national security." Ruppelt later says that to be considered an "unknown," it has to come from a competent observer and contain a reasonable amount of data. (NICAP, "Project Sign Begins, 22 Jan 1948"; Sparks, p. 11; Ruppelt, p. 10; Michael David Hall and Wendy Ann Connors, "Alfred Loedding: New Insight on the Man behind Project Sign," *IUR* 23, no. 4 (Winter 1998): 24; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 36–37; Thomas Tulien, Project Sign, "History of the United States Air Force UFO Programs"; Clark III 934; Kate Dorsch, *Reliable Witnesses, Crackpot Science: UFO Investigations in Cold War America, 1947–1977*, dissertation, University of Pennsylvania, 2019, pp. 38–43; Graff 39–40; Clark IV 1045)

1948, January 23 — Col. William E. Clingerman, writing for Col. Howard M. McCoy at Wright Field, asks Lt. Col. George Garrett of Air Force Intelligence for all files on "Swedish incidents" in 1946 and 1947. He receives at least 44 documents, none of which have been released. (Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 13; Swords 30)

1948, January 26 — Project Sign becomes formally operational as Project HT-304. Lt. Col. James C. Beam becomes its first project director. (Sparks, p. 13; Clark III 937; Clark IV 1047)

1948, January 31 — The Research and Development Board dismisses flying saucers as "a mirage induced by mass self-hypnosis" in stories that appear in newspapers of this day. ("'Flying Discs' Book Declared Closed," *Pendleton East Oregonian*, January 31, 1948; Project 1947, "UFO Reports, 1948"; Swords 52–53; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1948, Supplemental Notes*, The Author, 2000, p. 15)

1948, February — 2:00 a.m. Glancing out his window while getting a drink of water, farmer C. Bruce Stevenson notices a bight orange-amber glow near his farm buildings a few miles from Circleville, Ohio. He expects to find the buildings on fire, but instead there is a large, domed flying saucer gliding silently over the roof of his pig house about 100 feet away. The UFO, about 60 feet in diameter, maintains a slow speed and low altitude until it disappears from sight. ("Bruce Stevenson Reveals Close-Up View of Saucer," *Circleville (Ohio) Herald,* August 2, 1952, pp. 1–2; "Bruce Stevenson Certain Saucer Wasn't Reflection," *Circleville (Ohio) Herald,* August 7, 1952, p. 1; Project 1947, "UFO Reports, 1948"; Pete Hartinger, "America's First Classic Close Encounter," *Pickaway Quarterly*, Fall 1996, pp. 11–13; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1948 Supplemental Notes*, The Author, 2000, pp. 15–17)

1948, February 4 — Capt. Richard W. Geuss, acting assistant adjutant general, writes a memo on behalf of Lieut. Gen. George E. Stratemeyer, to ADC and USAF commanding generals on "Investigation and Reporting of 'Flying Disc' Incidents." It specifies that Air Force commanders are charged with evaluating military UFO incidents, in cooperation with CIC personnel and local FBI offices. Even hoaxes are to be passed on to the FBI. (Capt. Richard W. Geuss, "Investigation and Reporting of 'Flying Disc' Incidents," February 4, 1948)

1948, February 12 —Brig. Gen. Charles P. Cabell, chief of the Air Intelligence Requirements Division, sends a secret memo to Maj. Gen. Samuel E. Anderson. director of Plans and Operations, stating that the Commanding General of AMC feels that the responsibility for collecting information on "flying disks" should be complemented by a requirement that all USAF installations "provide a minimum of one each aircraft, with necessary crews, on a continuous alert basis. These aircraft should be equipped with gun camera, and such armament as deemed advisable, in order to secure photographs necessary to the obtainment of all possible data on any reported and sighted unusual phenomena, of the 'flying disk' type, in the atmosphere." (Good Above, p. 263)

1948, February 18 — 5:00 p.m. A smoke trail begins over Nebraska and runs south. A bolide explodes over Norcatur, Kansas, and the concussion from the blast breaks windows and rocks buildings over a wide area of Kansas, Nebraska, and Oklahoma. A huge shower of meteoritic stones fall over a large area of Norton County, Kansas, and Furnas County, Nebraska. Two Army B-29 bombers circle the area until nightfall. A farmer near Stockton, Kansas, sees a hovering object that leaves a bare spot in the ground. Kenneth Arnold is persuaded that reports of the Norton County meteorite fall might actually have been UFO-related. Astronomer Lincoln LaPaz directs the recovery of the massive achondritic meteorite in 1948. More than 100 stones are recovered, including one weighing about one ton. (Wikipedia, "Norton County (meteorite)"; Loren E. Gross, *UFOs, a History: 1948*, The Author, 1988, pp. 15–16; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000):

37–40; Luna Meteorite Hunters, "Norton County, KS Fall 18FEB1948 More Than 60 Years Ago," February 26, 2009; "Norton County," Meteorite Recon, October 8, 2015)

1948, February 20 — 2:00 a.m. In Palm Beach, Florida, lawyer and writer Charles Francis Coe and his son Alan see a globe of light shooting across the sky to the northeast at terrific speed. Coe calls it a "ray or blob of light" and insists it is not a meteor. ("Mystery 'Globe' Seen by Editor," *Palm Beach (Fla.) Post*, February 21, 1948, p. 1; "True Mystic Experiences," *Fate* 1, no. 3 (Fall 1948): 105–113; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers*, Palmer, 1952, p. 139)

1948, February 20 — 1:15 p.m. Six surveyors, including Idaho Power Company surveyor E. G. Hall, see a small flat, heart-shaped UFO flying in the sky at Emmett, Idaho. Through his theodolite it looks fuzzy across its back edge as if "dipped in cream." He says it is about the size of a Piper Cub airplane and flying point first below the cloud level at between 2,000 and 4,000 feet. (*Emmett (Idaho) Messenger*, February 26, 1948; Kenneth Arnold, "Are Space Visitors Here?" *Fate* 1, no. 2 (Summer 1948): 13–14; Harold T. Wilkins, *Flying Saucers on the Attack*, Citadel, 1954, p. 98; Michel, *Truth About FS*, 67–68)

1948, February 25 — The London *Times* reports that rockets have recently been seen in Sweden, Norway, and Denmark, coming from the direction of Peenemünde, East Germany. The observations are almost invariably at 9:30 a.m., and the objects are traveling between 4,500 and 6,750 mph and ranging in altitude from tree-top level to 25,000 feet. They emit a bluish-green flame but leave no persistent trail. One is seen off Skagen, Denmark, by Capt. A. Harvedt, the pilot of a Norwegian Det Norske Luftfarsselskap airliner, who times it as it disappears over the horizon in 4 seconds. (London *Times*, February 25, 1948, p. 3; Loren E. Gross, *UFOs: A History, 1948*, The Author, 1988, p. 18; Clark III 530; Clark IV 579)

1948, March 3 — Maj. Gen. Samuel E. Anderson, USAF Director of Plans and Operations at the Pentagon, rejects a proposal by Col. Howard M. McCoy and Brig. Gen. Charles P. Cabell for stationing fighter aircraft at all bases on continuous alert for UFOs. It costs too much and proper interceptions are unlikely. He orders all bases to send UFO information to Wright-Patterson AFB in Ohio. (Maj. Gen. S. E. Anderson, "Flying Discs," March 3, 1948; Good Above, pp. 263–264)

1948, March 12 — Maj. Earl S. Browning Jr., in a memo to the European command of the 970th CIC, writes that the Horten brothers have been located and interrogated by US officials. Walter Horten has remained in Germany as an officer in the German Air Force. He thinks that sufficient types of flying wing prototypes existed when the Russians invaded Germany and may have served as models for flying discs. Reimar Horten had emigrated to Argentina when the war ended. (Jacobsen, *Area 51*, p. 43)

1948, March 17 — Memo on "Flying Discs" from Maj. Gen. George C. McDonald, director of USAF intelligence, to the AMC commander, considers Col. Howard M. McCoy's proposal to maintain fighters on alert for UFOs "unfeasible." (Maj. Gen. George C. McDonald, "Flying Discs," March 17, 1948)

1948, March 17–18 — The USAF Scientific Advisory Board meets in Room 3E-869 of the Pentagon, with physicist Theodore von Kármán presiding. Col. Howard M. McCoy is present and speaks briefly about Project Sign, saying it has over 300 reports, many of them from experienced observers: "I can't even tell you how much we would give to have one of those crash in an area so that we could recover whatever they are." (Howard McCoy, "Scientific Advisory Board Conference Held 17–18 March 1948, Room 3E-869, the Pentagon, Washington, D.C.")

1948, March 23 — RAF pilot John Cunningham reaches an altitude of 59,430 feet in a de Havilland Vampire turbojet. (Wikipedia, "John Cunningham (RAF officer)")

1948, March 25 — 5:00 a.m. According to writer Frank Scully, who hears the tale from a scientist he refers to as "Dr. Gee" and a Texas oilman, a UFO crashes on a rocky plateau off Hart Canyon Road 12 miles east of Aztec, New Mexico. When Air Force investigators and government scientists arrive on the scene, they crawl through a broken porthole and find the bodies of 16 small humanlike beings (3–3.5 feet tall) dressed in the "style of 1890." Their skin is charred a chocolate color, apparently as a result of the rush of terrestrial air through the shattered window. After a thorough study, the scientists conclude that the "vehicle probably flew on magnetic lines of force." Segments of the craft, as well as the bodies, are supposedly transported to Wright Field in Ohio. Dr. Gee, who claims to have been on the scene, said the UFO is likely from Venus, as Martians "would probably be three or four times as large as human beings." Soon afterward, a crash occurs in Arizona and 16 bodies are taken from the wreckage. A third spaceship goes down near Phoenix with 2 dead occupants. The story turns out to be a hoax dreamed up by two con men named Silas Newton and Leo GeBauer ("Dr. Gee," although Scully claims this was a composite character incorporating 8 informants, one of whom is said to be geophysicist Carl A. Heiland). The hoax is loosely based on a 1949 science fiction film titled *The Flying Saucer*. GeBauer and especially Newton are in later years involved in various swindles and fraudulent mining claims. In 1987, William S. Steinman and

Wendelle C. Stevens release *UFO Crash at Aztec*, which draws on speculation, rumor, unnamed informants, and paranoia to defend and embellish the original story. The latest to champion the Aztec crash is a North Carolina man named Scott Ramsey, who with his wife Suzanne has spent thousands of dollars looking for and interviewing witnesses and trying to prove it involves a real UFO crash and coverup in his 2015 book *The Aztec UFO Incident.* Ramsey thinks the object was tracked on radar by Air Force Station P-8 near El Vado Dam. (Wikipedia, "Aztec, New Mexico crashed saucer hoax"; Frank Scully, *Behind the Flying Saucers*, Holt, 1950; Frank Scully, "What I've Learned Since Writing 'Behind the Flying Saucers,'" *Pageant*, February 1951, pp. 76–81; J. P. Cahn, "The Flying Saucers and the Mysterious Little Men," *True*, September 1952, pp. 17–19, 102–112; Frank Scully, "Scully Breaks a Long Silence," *Nexus* 2, no. 3 (March 1955): 13–16; J. P. Cahn, "Flying Saucer Swindlers," *True*, August 1956, pp. 36–37, 69–72; William S. Steinman Jr. and Wendelle C. Stevens, *UFO Crash at Aztec*, UFO Photo Archives, 1986; Good Above, pp. 388–394; William E. Jones and Rebecca D. Minshall, "Aztec, New Mexico—A Crash Story Reexamined," *IUR* 16, no. 5 (Sept./Oct. 1991): 11–15, 23; Good Need, pp. 117–123; Jerome Clark, review of *The Aztec Incident*, in *Journal of Scientific Exploration* 26, no. 3 (2012): 709–716; Scott Ramsey, Suzanne Ramsey, and Frank Thayer, *The Aztec UFO Incident*, New Page, 2015; Curt Collins, "Operation Hush-Hush: The UFO Crash and ET Bodies Cover-Up," The Saucers That Time Forgot, February 9, 2018; Clark III 594–595, 1044–1047; Curt Collins, "Flying Saucer Swindlers: Silas Newton and the UFO Crash," The Saucers That Time Forgot, April 5, 2020; Robert Sheaffer, "The Frank Scully 'Crashed Saucer at Aztec' Hoax (1950)," The Debunker's Domain; Chris Root, "Of Flying Saucers and Fraud: The Silas M. Newton Story," Denver (Colo.) Public library Special Collections and Archives monthly newsletter, July 16, 2021; Coulthart 2023, pp. 156–157; "Frank Scully, Silas M. Newton, and the Case of the 1948 Aztec, New Mexico, UFO Crash," Eyes on Cinema YouTube channel, December 21, 2023; Clark IV 654–655, 1159–1162)

1948, Spring — Ray Palmer and *Flying* magazine editor Curtis Fuller publish the first issue of *Fate* magazine at Clark Publishing Company in Chicago, Illinois. It features a first-hand story and a 30-page UFO roundup by Kenneth Arnold, as well as a history of unconventional aircraft by Curtis Fuller. Palmer and Fuller use the shared pseudonym "Robert N. Webster." The issue sells a healthy 50,000 copies. It is still being published in 2024. (Kenneth Arnold, "I *Did* See the Flying Disks!" *Fate* 1, no. 1 (Spring 1948): 4–10; Kenneth Arnold, "The Mystery of the Flying Disks," *Fate* 1, no. 1 (Spring 1948): 18–48; Robert N. Webster [Curtis Fuller], "What Were the 'Doughnuts'?" *Fate* 1, no. 1 (Spring 1948): 12–17; Clark III 872; Clark IV 967)

1948, Spring — Kenneth Arnold visits the Landing Aids Experiment Station in Arcata, California, and interviews Kenneth W. Ehlers, a radar technician (and later physicist) working on airport operational systems, including radar. He has been accumulating information on unidentified radar targets (he calls them "gizmos") that cannot be seen with the naked eye and sending reports on their flight paths to Navy meteorologist Florence Van Straten and Luis Walter Alvarez, the inventor of Ground Control Approach System radar. In many cases, the target indicates a small solid target flying around 30 mph. The targets always fly in the same path from northwest to southeast, along the coast. Sometimes they come to a complete halt; at other times they split into two objects, merging later. Ehlers notes that the targets have been attributed to insects, but he is skeptical. Later, he suspects they might be plasmas occurring at the inversion layer, but that does not explain their behavior. (Wesley Price, "The Sky Is Haunted," *Saturday Evening Post* 220, no. 36 (March 6, 1948): 13; Ray Palmer, "New Report on the Flying Saucers," *Fate* 4, no. 1 (January 1951): 63–81; "Landing Aids Experiment Station," Transocean Air Lines; Greg Long, "In Search of Gizmos: A 1947 Radar Case," *IUR* 19, no. 6 (Nov./Dec. 1994): 15–20)

1948, Spring? — President Truman asks Col. Robert B. Landry, his USAF aide, to provide him with quarterly verbal reports on the state of UFO information and research. He does so to the end of 1952, with possibly 18 briefings in all. (James R. Fuchs, "Oral History Interview with Robert B. Landry," Harry S. Truman Library and Museum, February 28, 1974)

1948, April — Morning. US Weather Bureau meteorologist Walter A. Minozewski at the Richmond, Virginia, weather station and his staff catch sight of a bright metallic, elliptical disc while they are tracking a small ceiling balloon at 15,000 feet. He checks his observation through a theodolite telescope. The disc flies just below the balloon and remains in sight for 15 seconds, appearing much bigger than the balloon. It has a flat, level bottom and a dome on top. It remains on a westward heading at high speed, then vanishes off into the distance. (Ruppelt, p. 41; Bloecher, p. I-1)

1948, April 1 — 9:55 a.m. USAF 1stLt. Robert W. Meyers is leading a flight of four P-47s from the 67th Fighter Group about 9 miles southeast of Sorsogon City, Luzon, Philippines. At 1,500 feet, he notices an unusual silvery object about 3 miles to the east. Shaped like a flying wing or half-moon with a "turtle back," it resembles no military craft in use at the time. The object flies below the squadron at 200 mph and an altitude of about 1,000 feet. Meyers estimates it is about 30 feet wide and 20 feet long. When he attempts to contact the other three P-47s, he

realizes his radio is dead. As he makes a 270° left turn to get a closer look, the object makes a 90° left turn and moves away at tremendous speed. It is only visible for about 5 seconds. (NICAP, "P-47 Flight Encounters Half-Moon Object"; Sparks, p. 33; Powell, *Scientist*, 65)

1948, April 5 — Afternoon. At Holloman AFB, near Alamogordo, New Mexico, three highly trained balloon observers (Joseph Olson, Johnson, and Chance) are working on a secret project for the Air Force's Watson Laboratories. They see two objects. One observer follows one object, and the others follow the second as they diverge. All are certain that the objects aren't balloons. They are large, whitish, roundish, very high, faster than any aircraft, and perform rapid, erratic motions. One object is lost at a low altitude. The other goes up quickly and seems to just disappear. The observation lasts about 30 seconds. The case is deemed important enough to send Alfred Loedding and one of Clingerman's assistants, Lt. Col. James C. Beam (the head of Project Sign), to New Mexico to interview Project Mogul scientist James W. Peoples and the other witnesses. Unfortunately, they are gone when Sign arrives. (They are later interviewed at the USAF Watson Laboratory complex in Red Bank, New Jersey.) The witnesses are very sure of themselves and the case is classed as "Unidentified." While at Holloman, Loedding and Beam talk with Lt. Herbert G. Markley, who has worked with the Watson team. Markley remembers one of them speaking of unusual radar returns from their equipment, but later the Watson personnel say that these were probably just "angels" (spurious echoes due to atmospheric microstructures, insects, equipment malfunction, or other stimuli). Markley does report that UFOs are seen around Holloman often. He himself has seen a disc in late August 1947 and flat, round aeroforms on at least two further occasions. (NICAP, "Team Watches 35-Meter Disc"; Sparks, p. 33; Ruppelt, p. 71; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1948,* The Author, 1988, pp. 24–27; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 40–41; Project 1947, "Holloman AFB UFO Sightings")

1948, April 7 or 8 — 3:00 p.m. Viola Johnson and James Pittman see three "flying men" circling Longview, Washington, at 250–300 feet and going as fast as a freight train. She says they are "dressed in khaki-colored flying suits with helmets over their faces." (Jim Stuart, "3 'Flying Minute Men' Seen over Longview on Wednesday," *Longview (Wash.) Daily News,* April 9, 1948; "Heck, Them Discs Just Ain't in It; See What's Flying," *Spokane (Wash.) Chronicle,* April 9, 1948, p. 1; "Weird Things Enliven Skies Here and There," *Kitsap (Wash.) Sun,* April 9, 1948, p. 1; "Two Report Winged Men Circling above Longview," Portland *Oregonian,* April 10, 1948, Sec. 2, p. 4; "3 Men without Planes or Parachutes Reported Flying over Washington State," *San Francisco (Calif.) Examiner,* April 10, 1948, p. 4; "Reports of Birdmen Have Washington Folks Up in Air," *Fresno (Calif.) Bee,* April 11, 1948, p. 19; Clark III 777)

1948, April 15 — 6:17 a.m. The X-Ray nuclear device is detonated near Enewetak Atoll in the Marshall Islands. B-17 pilotless drone aircraft are flown through the cloud, and a drone light tank is used to recover soil samples from the crater. Unfortunately, it becomes bogged and must be towed out 10 days later. (Wikipedia, "Operation Sandstone")

1948, April 23 — A preliminary 25-page report, written by Project Sign's Col. Howard M. McCoy and Lt. Col. James C. Beam, summarizes UFO reports received through February 1, with attached memos and documents. It is addressed to Chief of Staff Hoyt Vandenberg and Director of Intelligence Charles P. Cabell. The Rhodes photos and 99 other cases are listed. A comment by chemist Irving Langmuir is appended, noting his doubts about the reality of flying discs. (Col. Howard M. McCoy, "Project Sign," April 23, 1948; Swords 54–55)

1948, April 27–28 — Physicist Joseph Kaplan, a member of the USAF Scientific Advisory Board, visits the Kirtland AFB Office of Special Investigations, AEC's Sandia Base, and Los Alamos in New Mexico, under orders from Theodore Von Kármán, chairman of the USAF Scientific Advisory Board, to review UFO reports and investigations from the area. Kaplan and Lincoln LaPaz meet with security personnel at Los Alamos. Kaplan reports that "these occurrences relate to the National Defense of the United States" and should be investigated scientifically." (Good Above, p. 266)

1948, May — An article on secret Skyhook balloons (without mentioning the project name) by Devon Francis is published in *Popular Science.* (Devon Francis, "New Balloons Explore Roof of the Airways," *Popular Science,* May 1948, pp. 98–104)

1948, Early May — An unknown shining object passes from the northwest over Adapazari, Sakarya province, Turkey, explodes in the air, and drops parts in a nearby village, killing a dog. The debris is confirmed as coming from a rocket, but the US Air Force asks the air attaché in Ankara to investigate a connection with "flying disc" experiments conducted by the Russians. (Project Blue Book file, 1948-05-9670225-Adapazari-Turkey-170)

1948, May 5 — An Efficiency Rating report is written up for Alfred Loedding from Miles E. Goll, which mentions his work as a monitor for Project Sign. (Miles E. Goll, "Efficiency Rating of Mr. Alfred C. Loedding," May 5, 1948)

1948, May 7 — Afternoon. Mr. and Mrs. Fordyce J. Kaiser and their housekeeper Jean Bray, at 251 W. Waldorf Avenue, Memphis, Tennessee, see 50–60 unusual objects, apparently moving very high and fast, traveling in straight lines with slight zigzagging. They are shiny like bright aluminum with silvery trails. Lt. Col. James C. Beam of Project Sign goes to investigate. On the way back, he consults with astronomer Paul Herget of the Cincinnati Observatory in Ohio, who thinks the objects are meteors and recommends Ohio State University astronomer J. Allen Hynek in Columbus as a project consultant. (NICAP, "May 7, 1948; Memphis, Tenn. (BBU)"; Sparks, p. 34; Loren E. Gross, *UFOs, a History: 1948*, The Author, 1988, pp. 28–29; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 41; Swords 55–56)

1948, May 12 — European Command HQ sends the director of intelligence at the US Forces in Austria a memo alleging that Walter Horten has admitted he has been in contact with the Russians. (Jacobsen, *Area 51*, p. 43)

1948, May 14 — The RAND Corporation is established as a nonprofit organization to offer research and analysis to the US military. It is financed by the US government, endowments, corporations, universities, and private individuals. On November 1, Douglas Aircraft's Project RAND contract is formally transferred to the RAND Corporation. (Wikipedia, "RAND Corporation")

1948, May 15 — During the Zebra nuclear detonation at Enewetak Atoll in the Marshall Islands, a manned aircraft accidentally flies through the mushroom cloud. Because the pilot and crew "suffered no ill effects," the Air Force decides that piloted aircraft could collect samples. The Los Alamos, New Mexico, personnel assigned to remove the filters from the B-17 drones have apparently carried out the same procedure on X-Ray and Yoke without problems, but this time three of them suffer radiation burns on their hands serious enough to be hospitalized and need skin grafting. One of the men who carries out the procedure for Yoke is then also found to have burns on his hands and is also hospitalized but is discharged on May 28. Once again, the drone tank gives trouble and bogs in the crater, but the soil samples are retrieved by the backup drone tank. Both tanks are subsequently dumped in the ocean. (Wikipedia, "Operation Sandstone"; Jacobsen, *Area 51*, p. 224)

1948, May 15 — A piston-driven YB-35 flying wing bomber makes its first and only flight at Edwards AFB in California. (Wikipedia, "Northrop YB-35")

1948, May 17 — Day. William A. Bonneville sees a bright white ball, three times as bright as a locomotive headlight, sail over the hills to the northwest between Plevna and Miles City, Montana. It moves south, then west, repeating these maneuvers for 20 minutes until it flies into a dark cloud. It is silent, and a long, bright light shoots out from beneath. (Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 41–44)

1948, Late May — 11:40 a.m. Sgt. T. G. Jones and three other officers and two crew are aboard a York transport aircraft, accompanied by a formation of six Meteor jets, cruising at 10,000 feet above the Oxford/Bicester area in England, bound for RAF Acklington. Visiting US Maj. Robin Olds is in one of the jets. They encounter a 100-foot oval object with three bumps or protrusions on the bottom, as Jones describes it through binoculars. Ground radar tracks the object, which is stationary and above 25,000 feet. Two jets go up to try to get a better look and get within a few thousand feet. The object departs vertically at a speed of 1,500 mph. (Jenny Randles, *UFO Conspiracy*, Cassell, 1987, pp. 92–93)

1948, May 28 — 3:00 p.m. USAF Reserve 1st Lt. Alexander Kokolonis is flying a C-47 at 6,000 feet six miles east of Monroe, Michigan, when he sees out of the navigator's window three discs 2 miles to the left. He estimates they are 300–400 feet in diameter, silvery-gold, and traveling well over 500 mph. They are seen for only 10–15 seconds. Shortly afterwards, Kokolonis sees two similar objects and he alerts M/Sgt Ernest Davis Jr., who also sees them. (NICAP, "Air Force Transport Buzzed by 3 UFOs"; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 45)

1948, May 31 — 1:20 p.m. A cigar-shaped object moves through the sky from the northwest at terrific speed over Wilmington, North Carolina. Mrs. H. D. Alspach, Mrs. Charles Colvin, and Mrs. Isabell Hufham see the object emit smoke. It appears about 3 feet long. It slows down over the Cape Fear River, veers off to the east, and then speeds away at a high altitude. (NICAP, "Cigar Slows Down Then Speeds Up"; Sparks, p. 34; "Flying Object Reported Seen in Wilmington," *Asheville (N.C.) Citizen-Times*, June 1, 1948, p. 10; Clark III 530; Clark IV 580)

1948, Summer — USAF Maj. Edwin A. Jerome reports that a high-speed radar target appears during an inspection visit at Goose Bay AFB [now CFB Goose Bay], Labrador. It is calculated at going 9,000 mph at an altitude of 60,000 feet. The commanders assume that the US equipment is faulty, but the Canadians have tracked the same target. The following day, an object hovers over the base at 45,000 feet and moving only 10 mph. (NICAP, "Edwin Jerome Radar Case"; UFOEv, pp. 83–84; Yurko Bondarchuk, *UFO Sightings, Landings, and Abductions*, Methuen, 1979, pp. 151–152; Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report*, Dundurn Press, 2006, pp. 51–52; Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, p. 264)

1948, Summer [possibly 1958] — Early afternoon. Aircraft instrumentation engineer Victor G. Didelot watches an elliptical UFO moving rapidly west to east roughly parallel to the shoreline of Lake Erie in Erie, Pennsylvania. It suddenly and silently ascends vertically at three times its horizontal speed and disappears. (UFOEv, pp. 55–56)

1948, Summer — Physicist Carl A. Mitchell sees three luminescent greenish discs, one second apart, passing across the sky above Easton, Pennsylvania, from north to south. (UFOEv, p. 49)

1948, June — Paul Solem has his first contact with a flying saucer when he, his wife Ada, and his brother-in-law see three round, glowing objects speeding toward them over a field on his ranch in Howe, Idaho. At a distance of 500 feet, two of the objects veer away to the north over Saddle Mountain, while the other hovers. Impulsively, Solem frames a mental question: Who are you? Where are you from?" A voice inside his head replies, "We are from another planet. You will hear from us later." (Clark III 1094; Clark IV 1210)

1948, June 5 — A jet-propelled Northrop YB-49 crashes north of Muroc [now Edwards] AFB in California after completing a number of maximum forward center-of-gravity tests, killing its pilot, Maj. Daniel Forbes (for whom Forbes AFB in Topeka, Kansas, is named), copilot Capt. Glen Edwards (for whom Edwards AFB is named), and three other crew members. The aircraft suffers structural failure, with both outer wing sections becoming detached from the center section. (Wikipedia, "Northrop YB-49")

1948, June 16 — Soviet test pilot Arkady Ivanovich Apraksin is flying at an altitude of 6.5 miles above a solid layer of clouds south of the Kapustin Yar site, Astrakhan Oblast, Russia. He sees an unconventional aircraft in the shape of a cucumber with cones of light radiating from it descending across his path. The base tells him it has tracked the object on radar and given it instructions to land, but it does not respond. Apraksin is ordered to intercept it and open fire if it refuses to land. When he closes to within 6 miles, the light beams open up like a fan and shine into his aircraft, blinding him. The plane's electrical systems malfunction. He glides the plane to a safe landing after the UFO disappears. Apraksin is interrogated heavily. (Joe Brill, "UFO's behind the Iron Curtain," *Skylook*, no. 87 (February 1975): 14–15; Good Above, p. 221)

1948, June 18 — The National Security Council issues Directive 10/2, calling for covert action against the USSR, and granting the authority to carry out covert operations against "hostile foreign states or groups" that could, if needed, be denied by the US government. To this end, the Office of Policy Coordination (OPC) is created inside the new CIA. Frank Wisner, the head of the OPC, answers not to the CIA director, but to the secretaries of defense, state, and the NSC, and the OPC's actions are a secret even from the head of the CIA. Most CIA stations have two station chiefs, one working for the OSO, and one working for the OPC. ("Note on U.S. Covert Actions," from *Foreign Relations of the United States, 1964–1968, Volume XII, Western Europe*, Office of the Historian, Foreign Service Institute, US Department of State)

1948, June 29 — ATIC's chief of operations, C. A. Griffith, writes to a military representative in Norway to send all UFO reports to Wright-Patterson AFB in Ohio. (Loren E. Gross, *UFOs, a History: 1948*, The Author, 1988, pp. 32–33)

1948, June 30 — A couple are driving near Hecla, South Dakota, when they see an unusual star. They stop the car and get out, but it is not moving. They drive on and stop again. A few pieces break off the original star and arrange themselves in a triangle formation. They all now look like polished aluminum; they rise to a great height and vanish. (Sparks, p. 35; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 45–46; Swords 57)

1948, July — 1:00 p.m. Former Air Force pilot Don Newman and three friends watch a disc-shaped, domed UFO, about 100 feet in diameter, maneuvering over Pasco, Washington. "The exterior finish appears to be spun or burnished aluminum." The object slows, then accelerates rapidly, dives, and climbs over the area. (NICAP, "Summary of letter from Witness to Major Keyhoe, dated March 10, 1958"; UFOEv, p. 38)

1948, July 1 — A Maj. Hammer is flying above Rapid City AFB [now Ellsworth AFB], South Dakota, when he sees 21 brilliant, yellow-white, oval-shaped objects. They are about 100 feet in diameter and flying in a tight diamond formation. They make a high-speed dive, level, make a perfect turn in formation, angle upwards at 30°–40°, and accelerate out of sight. He estimates their cruising speed at 500 mph. (Sparks, p. 35; Swords 57–58)

1948, July 4 — Day. Edward E. Thompson watches a brilliant spherical UFO for five minutes while sitting in Johnson Park in Camden, New Jersey, across from the Cooper Free Public Library. ("Report from the Readers," *Fate* 1, no. 4 (Winter 1949): 93–94)

1948, July 7 — A silver, disc-shaped object allegedly crashes some 30 miles south-southwest of Laredo, Texas. US servicemen are reportedly dispatched from a nearby military base to cordon off the UFO crash site until a special US retrieval team arrives to examine the wreckage and carry it away to a military base in San Antonio, Texas. Supposedly the badly burned body of a nonhuman entity is recovered from the crash site. Ufologist Leonard Stringfield hears rumors of the crash in 1977, but few further details emerge. Early in 1978, Stringfield describes the humanoid found at the crash site as "about 4 feet, 6 inches tall, completely hairless, with hands that had no

thumbs." That description seems to fit the body shown in two photographs that are mailed to Willard F. McIntyre in December 1978. The body depicted in the photos sent to McIntyre has come to be known as the "Tomato Man" due to its large, roundish head. Many UFO researchers, including Ron Schaffner and Kevin Randle, believe the body is that of a human pilot who is badly disfigured by intense heat following a plane crash. They argue that one of the photos shows a pair of eyeglasses, such as a human pilot would wear, near the body. (Leonard H. Stringfield, "Retrievals of the Third Kind, Part 1," *Flying Saucer Review* 25, no. 4 (July/Aug. 1979): 13, 15–16; Gray Barker, "Archives Reveal More Crashed UFOs," *Gray Barker's Newsletter* 14 (March 1982): 5–6; William S. Steinman and Wendelle C. Stevens, *UFO Crash at Aztec*, UFO Photo Archives, 1986, pp. 402–422; Good Above, pp. 397–398; Kevin D. Randle, *A History of UFO Crashes*, Avon, 1995, p. 188; Noe Torres and Ruben Uriarte, *The Other Roswell: UFO Crash on the Texas–Mexico Border*, Roswell Books, 2008; "Laredo 1948," Texas UFO Museum and Research Library, March 8, 2009; Clark III 324; Vicente-Juan Ballester Olmos, "The 'Tomato Man' in Retrospective," Academia.edu, 2022; Clark IV 360)

1948, July 9 — Caramia and Carpenter, two officers of the USAF 72nd Reconnaissance Group, are fishing at Fielding Lake, Alaska, when they hear a loud roar and notice about 20 gray discs or spheres moving at 500 mph in loose formation from west-northwest to east-southeast at about 5,000 feet. (Barry Greenwood, "The Estimate of the Situation: Well, Not Exactly!" *UFO Historical Revue*, no. 16 (July 2015): 5–10)

1948, July 9 — 9:47 p.m. While on the ground in Osborn, Ohio, the USAF Project Sign officer who had flown to investigate the Hecla case, sees a self-luminous, yellow-white object flying at 500–600 mph. It seems to pulse its lights at 3-second intervals as it moves away. (Sparks, p. 35; Swords 58)

1948, July 14 — Day. Charles W. Shangle Jr. watches two groups of about 16 UFOs maneuvering at 300–600 mph over Boise, Idaho. Two of the objects exhibit a "falling leaf" motion. (Charles W. Shangle Jr., [Letter], *Popular Science*, July 1948; "True Mystic Experiences," *Fate* 2, no. 1 (May 1949): 75–79)

1948, July 17 — 4:50 p.m. Two Kirtland AFB sergeants on a fishing trip with their families five miles south of San Acacia Diversion Dam, New Mexico, see a group of 7 aluminum-like, spherical objects approach from the south at 20,000 feet pass overhead at 1,500 mph. They first appear like snub-nosed jet fighters of an unknown type, shifting from V-formation to L-formation to circular formation to no regular formation. A regular pulsating flashing light appears in the group at 30° from zenith to the north, and at this oblique angle the objects do not appear circular. There is no noise or trail. (NICAP, "Two Military Families Report Seven Objects"; Swords 58)

1948, July 20 — The Netherlands government reports that a wingless, cigar-shaped object with two decks of windows is seen flying rapidly on four separate occasions by two Dutch citizens over The Hague (and/or Arnhem). (NICAP, "High V-2-Like Craft Observed"; Loren E. Gross, *UFOs, a History: 1948*, The Author, 1988, p. 86; Clark III 935; Clark IV 1045)

1948, July 21 — The USAF Research and Development division sends a formal letter to the RAND Corporation authorizing them to select scientists to evaluate the possibility that the flying discs might be human-built spaceships. RAND's reply is not known. (W. R. Clingerman to USAF Chief of Staff, "Request for Study by Rand Project," October 22, 1948; Swords 58)

1948, July 24 — 1:45 a.m. A bright object is seen at Robins AFB in Houston County, Georgia, by ground maintenance crewman Walter Massey, who sees a "stream of fire" in the north. As it moves overhead, it seems more cylindrical. It moves off to the west. (NICAP, "July 24, 1948, 0250E, Warner Robins AFB, Georgia")

1948, July 24 — 2:45 a.m. Capt. Clarence S. Chiles and copilot John B. Whitted are flying an Eastern Airlines DC-3 at 5,000 feet, 20 miles southwest of Montgomery, Alabama, when they see an object about 100 feet long moving rapidly toward them on their right. Torpedo-shaped and wingless, the object has flames jetting 50 feet from its rear. There are two rows of square windows through which a bright light is glowing. They only see it for 5–10 seconds. It is half a mile away and moving at about 700 mph. After it passes the plane it appears to swoop into a cloud bank at 6,000 feet. One passenger, Clarence L. McKelvie of Columbus, Ohio, also sees it. Many ufologists now consider the object to be a fireball meteor. Martin Shough writes: "There is nothing in this case that convincingly rules out a fragmenting fireball, and the 'airship effect' which causes the eye to see a line of glowing fragments as lighted windows in an elongated machine has been a widely known feature of such sightings at least since Hartmann made a pretty good study of it in the Condon Report. Other observers in neighboring states saw on their far western horizon an 'unusually bright meteor' that could have been the same fireball on a near-horizontal trajectory heading SW over the Alabama-Georgia border area. Chiles-Whitted saw it only for a few seconds going by above and to their right heading SW on a near reciprocal heading to them but miles higher and much faster then they thought. As it approached them, the angular rate of the object would rise geometrically in a hockey-stick curve which, interpreted in terms of an illusory near-miss with another 'aircraft,' could suggest the appearance of a climb and an avoiding veer." (Wikipedia, "Chiles-Whitted UFO Encounter"; NICAP, "Chiles-Whitted Case"; Sparks, p. 36; "Atlanta Pilots Report Wingless Sky Monster," *Atlanta (Ga.) Constitution*, July 25,

1948, pp. 1, 8; "'Sky Devil-Ship' Scares Pilots: Air Chief Wishes He Had One," *Atlanta (Ga.) Journal*, July 25, 1948, p. 1; "Mysterious 'Ball of Fire' Trailing Tail of Flame Sighted over Atlanta," *Atlanta (Ga.) Constitution*, July 27, 1948, pp. 1, 4; Kenneth Arnold and Ray Palmer, *The Coming of the Saucers*, Palmer, 1952, pp. 90–91; Ruppelt, pp. 40–41; UFOEv, p. 48; Dale Huffman, "UFOs Just Debris, Blue Book Staff Confirms," *Dayton (Ohio) Daily News*, July 16, 1968, p. 21; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 42–43; Loren E. Gross, *UFOs: A History, Vol. 1, July 1947–December 1948*, The Author, 1980, pp. 34–48; Good Above, pp. 264, 479; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 46–47; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs: a History: 1948, Supplemental Notes*, The Author, 2000, pp. 53–60; Joel Carpenter, "Watershed: The Chiles-Whitted 'Rocketship' Sighting," 2002; Martin Shough, "Analysis of the Chiles-Whitted Sightings, July 24, 1948," February 2011; Swords 58–60; Kevin D. Randle, "Chiles/Whitted and Skepticism," A Different Perspective, January 21, 2016; Clark III 234–236, 391; John Greenewald, "Project Blue Book: The Chiles-Whitted UFO Encounter, July 24, 1948, Montgomery, Alabama," The Black Vault, May 15, 2023; Graff 45; Eghigian, *After*, pp. 49–50, 58; Clark IV 274–276, 437)

1948, July 25 — Chief of Air Force Intelligence Gen. Charles Cabell phones Col. Howard M. McCoy's office at Wright-Patterson AFB in Ohio. Sign is ordered to get into the field immediately and investigate the Chiles-Whitted case. By that afternoon, Loedding, Deyarmond, and Llewellyn (now apparently director of Project Sign) are flown by Capt. Clarence Groseclose to Atlanta, Georgia. (Sparks, p. 13; Swords 60; Clark III 937; Clark IV 1047)

1948, July 26 — Loedding, Deyarmond, and Llewellyn interview Chiles and Whitted in the Henry Grady Hotel, Atlanta, Georgia. They are impressed with their account. Mulling the case through September, Project Sign is disturbed even more than the Mantell incident, according to Ruppelt. Capt. Sneider considers the shape aerodynamically feasible; consultant J. Allen Hynek says it might be a fireball but considers that "far-fetched." (Swords 60)

1948, July 26 — Aeronautical engineer Molt Taylor speculates to the Associated Press that "If we can build such craft, what is to prevent others from doing so, assuming that a similar order of intelligence exists on other planets? You and I may see the day when we will be united with Russia defending this planet against attack from space." ("It May Be Men from Mars, Expert Says of 'Saucers,'" *San Francisco Examiner*, July 28, 1948, p. 32; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1948, Supplemental Notes*, The Author, 2000, p. 65)

1948, July 27 — Air Intelligence Memorandum on "Pattern of Flying Saucers" requires that a study be made by the Air Intelligence Division to examine the pattern of tactics of reported UFOs and develop conclusions as to their probability. This leads to the EEI "Analysis of Flying Object Incidents in the United States" (100-203-79) of December 10. The JIC report gives the incorrect date as August 6. (Col. Brooke E. Allen, "Analysis of Flying Object Incidents in the U.S.," October 11, 1948; "Report by the Director of Intelligence, USAF, to the Joint Intelligence Committee on Unidentified Aerial Objects," April 28, 1949, p. 2; Jan L. Aldrich, "New Top Secret Document Revealed," Project 1947)

1948, July 29 — 9:18 a.m. James Toney and Robert Huggins, both employees of an Indianapolis, Indiana, rug cleaning firm, are in a truck headed west near the intersection of 56th Street and Fall Creek Boulevard when they see a shiny, propeller-shaped, aluminum object with 10–12 small cups protruding from either blade. It is 6–8 feet long and flying silently above the trees at 30 feet altitude some 300 feet away heading south. It approaches to about 100 feet at its closest. The object glides across the road at 25–30 mph in a slight descent then makes a 20° bank to the east and goes down in a wooded area. Toney and Huggins stop the truck and get out to look, but the object has disappeared behind trees. A later search finds no traces. (NICAP, "Close Encounter with 'Propeller-Shaped' Object"; Sparks, p. 36)

1948, July 31 — 8:25 a.m. Mr. and Mrs. Vernon Swigert of south-central Indianapolis, Indiana, see a cymbal-shaped or domed-disc object to the west of their home. It is about 20 feet across, 6–8 feet thick, white without any shine but shadowing on upper right. It flies straight and level from horizon to horizon, west to east heading 90°. They estimate its altitude as 2,000 feet covering a distance of 5 miles in 10 seconds. It shimmers in the sun as if spinning, is silent, and has no trail. (NICAP, "Cymbal-Shaped Object Observed by Couple"; Sparks, p. 37)

1948, August 5 — This date given by Edward Ruppelt for the lost "Estimate of the Situation," in which Project Sign concludes that UFOs are interplanetary, is probably too early. See September 30.

1948, August 11 — Between 12:00 and 12:15 p.m. Two boys playing outside near Hamel, Minnesota, see a round, dull gray or silver object 2 feet in diameter and 1 foot thick, like inverted plates approach them from the northwest. It drops down between the boys from a height of 12 feet and lands 8 feet away, like a balloon, with a metallic clinking sound and a train whistle noise. It spins once, shoots up 20 feet, makes a whistling noise again, hovers,

shoots up to a height of 30 feet. maneuvers to avoid phone lines and trees, then flies away to the northeast. CIC Special Agent Capt. Charles L. Victor finds an area 2 feet in diameter where the ground shows signs of extreme pressure. (Sparks, p. 37; Wilkins, *Attack*, pp. 104–105)

1948, August 15 — Morning. Future ufologist Walter H. Andrus Jr., his wife Genevieve, and son Donald see four UFOs flying in formation east to west over downtown, Phoenix, Arizona. They simply vanish in sequence, then the first three reappear one at a time in the northwest where they pass out of sight to the west. (Story, pp. 17–18)

1948, August 21 — A possible Russian rocket trail is seen over Katrineholm, Sweden, that remains visible for three hours "resembling a brilliant star surrounded by streamers of fire like the tentacles of an octopus." However, there is no known record of a launch on this date of a V-2 or R-1 missile from the Russian base at Kapustin Yar, Astrakhan Oblast, Russia. It may be the same object viewed by Swedish Armed Forces Supreme Commander Helge Jung of an "aerial explosion considered to be some form of guided missile originating from Estonian islands, possibly Dagö or Osel." ("'Sky Octopus' Seen above Swedish Town," *Richmond (Ind.) Palladium-Item*, August 23, 1948, p. 2; "Sky Octopus over Sweden," *Fate* 2, no. 1 (May 1949): 35; Jan Aldrich, "Investigating the Ghost Rockets," *IUR* 23, no. 4 (Winter 1998): 14)

1948, September — About this time Capt. Robert R. Sneider becomes a co-chief of Project Sign with Lt. Howard W. Smith. (Sparks, pp. 13–14; Clark III 937; Clark IV 1047)

1948, September 1 — The CIA Office of Policy Coordination is formally established with the responsibility to engage in "propaganda, economic warfare, preventive direct action, including sabotage, antisabotage, demolition and evacuation procedures; subversion against hostile states, including assistance to underground resistance groups, guerrillas and refugee liberation groups, and support of indigenous anti-communist elements in threatened countries of the free world." (Wikipedia, "Office of Policy Coordination")

1948, September 15 — USAF Maj. Dick Johnson reaches an official airspeed record of 671 mph (slightly more than Yeager's first record) in a North American F-86A-3 Sabre at Muroc [now Edwards] AFB, California. (Wikipedia, "North American F-86 Sabre")

1948, September 16 — Before dawn. Fred Scott, 63, is walking around Grassy Mountain, Malheur County, Oregon, when he looks up and sees two "flying persons" to the south. They are 150–250 feet up, one following the other at a distance of 8–10 feet. Their wings are narrow and rounded at the tip and do not flap. Their legs are unusually short. They remain visible while Scott walks for at least another mile. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 43; Clark III 270; Clark IV 310)

1948, September 23 — 9:40 a.m. At Los Alamos National Laboratory, New Mexico, a group of people are waiting for an airplane at the landing strip when one of them notices something glint in the sun. It is a flat, circular object, high in the northern sky. The appearance and relative size is the same as a dime held edgewise and slightly tipped, about 50 feet away. (NICAP, "Flat Dime On-Edge Observed by Lab Personnel"; Sparks, p. 38; Michael D. Swords, "The Lost Words of Edward Ruppelt," *IUR* 20, no. 2 (Mar./Apr. 1995): 14–15; Clark III

1948, September 26 — 2:00 p.m. P. L. Lewis sees a white object moving rapidly across the sky at Port Hope, Ontario, then disappear when it is nearly overhead. Other white objects follow at about 50 mph in a northeasterly direction, accompanied by strands of spider web. Lewis speculates that the objects are balls of spiders' threads, held together by thistledown. (P. R. Bishop, "Cobwebs or Flying Saucers?" *Weather* 4 (1949): 121–122; Philip J. Imbrogno, *Files from the Edge: A Paranormal Investigator's Explorations into High Strangeness*, Llewellyn, 2010, p. 54; Clark III 124; Clark IV 151)

1948, September 30? — Project Sign officer Capt. Robert R. Sneider has decided that the time has come to climax Project Sign's task and write the required "Estimate of the Situation." Every intelligence operation's task is ultimately to present such a best-guess summary, strongly backed with as much fact as possible. Using the July 24 Chiles-Whitted case as the core and collecting around it many cases from the summer of 1947 to September 1948, Sneider composes the document. The most recent case known to have been listed in the document is the September 23 Los Alamos National Laboratory sighting in New Mexico. Two prominent USAF intelligence officers (Edward J. Ruppelt and Dewey J. Fournet Jr.) see the document in 1952. "It was a rather thick document with a black cover and it was printed on legal-sized paper. Stamped across the front were the words TOP SECRET." Ruppelt says the Estimate concludes that the best evidence indicated an extraterrestrial origin for UFOs. Sneider is probably the primary author. Col. Albert Deyarmond, Alfred Loedding, and Lawrence Truettner almost certainly are part of the writing. Maj. Raymond Llewellyn certainly looks in. All these people, as well as higher-ups in Col. William Clingerman's and Col. Howard M. McCoy's offices, must approve it, at least in some sense. And an Estimate of UFOs as extraterrestrial is no small thing to assent to. The Estimate is probably addressed to Chief of Staff Gen. Hoyt Vandenberg, but it really is meant for Director of Intelligence Gen. Charles P. Cabell. It is probably sent near the end of September, just before the George Gorman "UFO dogfight" in Fargo,

North Dakota, on October 1. It probably lands in Col. George Garrett's Collections office and is hand-carried to Cabell. Cabell may or may not be shocked. With a pro-ETH Wright-Patterson intelligence group on one side, an anti-ETH Pentagon Intelligence Requirements Office on the other, and open-minded collections officers and the powerful Research and Development chief (Gen. Donald L. Putt) in between, Cabell doesn't want to decide this on his own. He hands the Estimate further upstairs to Vandenberg himself, who rejects it and bats it back to Cabell with a strong sense of disapproval. Ruppelt adds that some months later the Estimate is completely declassified and "all but a few copies" are destroyed. (Ruppelt, pp. 28, 41, 45; *Hynek UFO Report*, pp. 13–14; Kevin D. Randle, *The UFO Casebook*, Warner, 1989, pp. 28–31; Michael D. Swords, "The Lost Words of Edward Ruppelt," *IUR* 20, no. 2 (Mar./Apr. 1995): 14–15; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 48–51; Swords 62; Clark III 436–437, 935; Kate Dorsch, *Reliable Witnesses, Crackpot Science: UFO Investigations in Cold War America, 1947–1977*, dissertation, University of Pennsylvania, 2019, pp. 88–89; Graff 47–48; Clark IV 481–482, 1045)

1948, October — Vannevar Bush resigns as chairman of the Research and Development Board, passing the job on to Karl Taylor Compton. (Michael Hall and Wendy Connors, "The Research and Development Board: Unanswered Questions," *IUR* 26, no. 2 (Summer 2001): 9)

1948, October 1 — The first Joint Army-Navy-Air Force Publication (JANAP) 146, based on Bernard Baruch Jr.'s CIRES system, is issued. It consists of instructions for military and civilian personnel on how to report sightings of enemy aircraft, missiles, submarines, and surface vessels. This version does not include UFOs. It is tabled shortly afterward by Maj. Gen. Cabell. (Antonio F. Rullán, "Blue Book UFO Reports at Sea by Ships: Analysis of the Blue Book Ship Database," December 10, 2002, pp. 8–9; Swords 122)

1948, October 1 — 9:00 p.m. 2d Lieut. George F. Gorman of the North Dakota National Guard, flying an F-51 near Fargo, North Dakota, spots an object traveling east to west. He describes it as a light 6–8 inches in diameter displaying incredible movements. He repeatedly gives chase beginning at 9:07 p.m., but each time is outmaneuvered by the light, which moves up to 600 mph. On his first pass he gets as close as 500 feet from the light at about 5,000 feet altitude. Gorman climbs to 14,000 feet but stalled out, unable to intercept the light, which is at about 16,000 feet. The light makes evasive and aggressive maneuvers, such as seeming to try to ram the F-51. When it drops to 11,000 feet, Gorman attempts to dive at it, but the light pulls up, rises vertically, and disappears at high speed. The light is also seen by airport control tower operators Lloyd D. Jensen and Manuel E. Johnson, as well as others on the ground and pilot Arthur E. Cannon flying a Piper Cub at 1,600 feet. Jensen watches the dogfight through 6x30 binoculars, the UFO appearing perfectly round with sharp edges and no fuzzy outline. Project Sign personnel arrive within hours and interview the witnesses. Eventually they conclude the object was a balloon, with evasive maneuvers the product of Gorman's imagination, since ground observers do not see anything comparable. Some ufologists, among them Aimé Michel and James E. McDonald, have rejected the balloon explanation. (Wikipedia, "Gorman dogfight"; NICAP, "Gorman (Fargo) Case"; Sparks, p. 39; "Fargo Pilot Tells of Chasing 'Flying Disk,'" *Fargo (N.Dak.) Forum*, October 3, 1948, pp. 1–2; "Dogfight with Mysterious Flying Object Told by Pilot," *Decatur (Ill.) Daily Review*, October 3, 1948, p. 1; "Pilot Tells of Long Dogfight with Queer Flying Object," *St. Louis (Mo.) Globe-Democrat*, October 3, 1948, p. 10; "Flying Ball Plays Tag with Pilot," *Knoxville (Tenn.) Journal*, October 3, 1948, p. 4; "Pilot, 'Disk' Have Half Hour Tussle," Lincoln (Nebr.) *Sunday Journal and Star*, October 3, 1948, p. 1; "Wright Field Officers Probe 'Disk' Report," *Fargo (N.Dak.) Forum*, October 4, 1948, p. ; Keyhoe 1950, pp. 102–107; Ruppelt, pp. 41–43; Donald H. Menzel and Lyle G. Boyd, *The World of Flying Saucers*, Doubleday, 1963, pp. 80–82, 111–114; Story, pp. 151–152; Loren E. Gross, *UFOs: A History, 1948*, The Author, 1988, pp. 56–64; Michael D. Swords, *GrassRoots UFOs: Case Reports from the Timmerman Files*, Fund for UFO Research, 2005, p. 138; Clark III 536–537, 949; Tracy Briggs, "Fargo's Most Famous UFO Sighting Happened in the Skies above a Bison Football Game," *Fargo (N.Dak.) Forum*, December 15, 2020; Graff 49–50; Clark IV 424, 425, 586–596, 1063)

1948, October 7 — A document from Project Sign to Garrett and Cabell is an upbeat Sneider report on the initial investigation of the Gorman dogfight, making the object sound extremely unusual and intelligent in behavior. This is almost like a supplement to the Estimate. (Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 50)

1948, October 7 — A set of letters, composed not by Sneider but actually by Samuel Z. Hunnicutt, a member of T-2 and the Sign team, and approved by MCI heavyweights Howard M. McCoy, Clingerman, and Leland Money, goes out to the CIA, US Army Intelligence, and the Office of Naval Intelligence. The query: What domestic technological developments do you know of that might explain UFOs and help us differentiate them from inimical (Soviet) foreign developments? (Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 50)

1948, October 12 (or 22) — Project Sign's Col. William R. Clingerman writes a letter to USAF Chiefs of Staff requesting a study of UFOs by the RAND Corporation, similar to the one made by USAF R&D in July, especially the possibility that "some of the unidentified aerial objects that have been reported both in the United States and in foreign lands may have been experimental spaceships.... it is believed more likely that they represent the effort of a foreign nation, rather than a product from beyond the Earth." (Col. W. R. Clingerman, "Request for Study by Rand Project," October 12(?), 1948; Swords 58, 492–493)

1948, October 15 — 11:05 p.m. On night patrol, 1st Lt. Oliver "Bud" Hemphill Jr. of the 68th Fighter Squadron is flying a Northrup F-61 Black Widow some 50 miles northwest of Fukuoka, Japan, when the crew picks up an object on radar going 200 mph. As he closes to intercept, the object speeds up to 1,200 mph then slows down again. The plane tries closing in six times, but each time the object speeds away. On one pass the crew sees the object's silhouette, which looks like a "rifle bullet" 20–30 feet long. The object "seems cognizant of the whereabouts of the F-61 at all times." Radar operator Barton Halter thinks it is a "new type of aircraft." (NICAP, "F-61 'Black Widow' Radar Case"; Sparks, p. 40; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 69–70; *Hynek UFO Report*, pp. 134–137; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 3–4; Thomas Tulien, "Fukuoka (Kyushu) Japan, 15 October 1948: The Original 'Tic-Tac' UFO," Sign Oral History Project, 2024)

1948, October 20 — The US Air Force Security Service is activated at Arlington Hall in Washington, D.C., with the mission of cryptology and communications security. (Wikipedia, "United States Air Force Security Service")

1948, October 29 — Five US Air Force pilots observe a silvery object over Neubiberg Air Base [now closed] near Munich, Germany. The object disappears at a terrific speed after having remained over the air base more than 30 minutes. A similar object is seen days before by another group of American pilots. (Jan Aldrich, "Early Top Secret UFO Document Discovered," 2000)

Late 1948 — The search for a suitable US location for nuclear testing, codenamed "Project Nutmeg," commences under the direction of expert meteorologist and Navy Captain Howard B. Hutchinson. The government is looking for a place where nuclear tests would have little impact on the American people or the American economy. Five primary sites are considered: Dugway Proving Ground, Utah; Alamogordo–White Sands Guided Missile Range, New Mexico; an area in Nevada between Fallon and Eureka; the Tonopah–Las Vegas Bombing and Gunnery Range (the site finally chosen in 1950, now part of Nellis Air Force Base); and the Pamlico Sound area off the coast of North Carolina. ("Project Nutmeg: The Birth of the Nevada Test Site," National Nuclear Security Administration, June 2004; Philip Howard, "Project Nutmeg," Village Craftsmen, April 21, 2012; Diane Tennant, "How Outer Banks Almost Became a Nuclear Test Site," *Norfolk Virginian-Pilot*, January 27, 2013)

1948, November 1 — Radar operator M/Sgt Francis H. Mills at Goose Bay AFB [now CFB Goose Bay], Labrador, tracks an object too large for a bird, too small for a plane, flying at 60 mph. Not confirmed visually. (NICAP, "600 MPH Track at Goose Bay"; Sparks, p. 42; NICAP, "October 29, October 30, and November 1, 1948, Incident Nos. 188, 195, and 196: Goose Bay, Labrador," June 28, 2009)

1948, November 3 — Against most predictions, Harry S. Truman wins the US presidential election against Republican Thomas E. Dewey. Secretary of Defense James Forrestal, like everyone else, expects to have a new boss in January. His relationship with Air Force Secretary Stuart Symington has deteriorated, and he has not obtained a budget consensus from the Joint Chiefs. His mental health, physical condition, and authority are deteriorating. He is convinced that "foreign-looking men" are following him and that Symington is spying on him. Secret Service Chief Urbanus E. Baughman begins to think Forrestal is suffering from a "total psychotic breakdown."

1948, November 3 — Gen. Charles Cabell writes a firm letter to Wright Field in Ohio, asking Project Sign for another Estimate. It is possibly composed by Maj. Aaron "Jere" Boggs or Col. Edward H. Porter at the USAF Defensive Air Branch. While admitting that the objects seem real, it also cautions that they are not identified. (Read: You may not identify them as extraterrestrial craft.) (Maj. Gen. C. P. Cabell, "Flying Object Incidents in the United States," November 3, 1948; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 50–51, 62; Swords 62, 64)

1948, November 3 or 4 — 9:30 p.m. US Army Col. William P. Hayes is driving 10 miles east of Vaughn, New Mexico, on US Highway 60 when he sees a reddish-white ball of light, 1 foot in diameter, falling vertically and bursting about 100–200 feet from the ground, some 1,200 feet north of the road. (NICAP, "Another Object in Vertical Descent Explodes near Colonel")

1948, November 4 — A USAF Europe document transmits some information on the Swedish ghost rockets. "They have been reported by so many sources and from such a variety of places that we are convinced that they cannot be disregarded and must be explained on some basis which is perhaps slightly beyond the scope of our present intelligence thinking." One of the objects was observed crashing into a lake by Swedish Gen. Helge Jung and his party. A salvage operation was unsuccessful. USAF officers visit Swedish Air Intelligence officials who have reached the conclusion that "these phenomena are obviously the result of a high technical skill which cannot be credited to any presently known culture on earth." The document is distributed to the CIA (which in response to a FOIA request claims no record), Armament Intelligence Branch, and AMC. ("USAFE 14, TT 1524, Top Secret," November 4, 1948; Jan Aldrich, "Early Top Secret UFO Document Discovered," 2000; Good Need, p. 115; Swords 62–63)

1948, November 6 — Two UFOs, maneuvering like planes in a dogfight, are tracked on USAF radar over Wakkanai, Japan. (NICAP, "Target Circles Radar Site"; Sparks, p. 42; Keyhoe, *FS from OS*, p. 34)

1948, November 8 — A letter is sent with Col. Howard M. McCoy's signature to Gen. Cabell. Written by Sign operative Albert Deyarmond, it is overtly submissive but covertly rebellious. It contains several comments agreeing with Cabell that the UFO phenomenon is not identifiable and that no concrete physical proof exists to identify it. At the same time it drops all sorts of hints, doubtless the same arguments used in the original Estimate, that the objects really are extraterrestrial whether the Pentagon thinks so or not: It mentions the ETH; it mentions plotting waves against planetary approaches and finding a correlation; it mentions the books of Charles Fort as indicating that this has been going on for at least a century; it mentions that odd shapes (like the Chiles-Whitted case) can fly but require more advanced power plants than we have. (Col. H. M. McCoy, "Flying Object Incidents in the United States," November 8, 1948; Michael D. Swords, "The McCoy Letter," *IUR* 22, no. 1 (Spring 1997): 12–17, 27; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 51, 63–64; Swords 62, 65, 494–496)

1948, November 12 — Project Sign personnel travel to the National Bureau of Standards in Washington, D.C., to attempt to convince Cabell and Vandenberg on the ETH. It includes Sneider, and perhaps Deyarmond, Loedding, Truettner, and Howard M. McCoy. On the Pentagon side, Boggs and Cabell are there and perhaps Vandenberg, and they are having none of the ETH. Back at Wright-Patterson AFB in Ohio, Deyarmond and Truettner begin writing a sanitized Project Sign report. More scientific oversight is requested for Sign personnel. The Scientific Advisory Board and George Valley of MIT are to be made aware of all cases. So too are Boggs's office, ONI, and maybe even the NBS. Hynek is to be formally commissioned for an assessment, as well as Irving Langmuir and Project RAND. (Col. H. M. McCoy, "Transmittal of Project 'SIGN' Incident Summaries," November 12, 1948; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 51–52; Swords 65)

1948, Mid-November — Late afternoon. Clifford DeWitt Fife hears a whirring in the air near Nevada, Missouri. He looks up and sees a hovering, disc-like object. Two bright objects drop down out of the disc about 200–300 feet, then speed off to the southwest. The large object moves off to the northeast. (*Nevada (Mo.) Daily Mail*, November 30, 1948; Herbert S. Taylor, "Satellite Objects: A Further Look," *IUR* 29, no. 2 (Summer 2004): 7)

1948, November 18 — 10:00 p.m. USAF Reserve pilot Lt. Henry G. Combs is flying a T-6 Texas combat trainer when he sees an object flying west to east over Andrews AFB, Maryland. It has one continuously glowing white light. The sighting is corroborated by S/Sgt John Kushner, as well as other witnesses on the ground, who says it does "not look like an aircraft." Combs makes a pass to check on it, but it takes evasive action and he duels with it for 10 minutes. The object performs very tight curves and quick accelerations to more than 500 mph. Combs's copilots Lt. Kenwood Jackson and Lt. Glen L. Stalker, say the object "could climb vertically, then would drop behind" the aircraft and continue to circle the field. (NICAP, "The Lt. Combs / T-6 Encounter"; Sparks, p. 42; Richard H. Hall, *Uninvited Guests*, Aurora, 1988, pp. 236–237; Jazz Shaw, "Incident 207: A Tic Tac over Washington, DC, in 1948?" The DeBrief, March 10, 2023; Powell, *Scientist*, 7)

1948, November 23 — 9:30 p.m. US Army Col. William P. Hayes sees a bright white, round light "larger than a basketball" descend slowly as he is driving 10 miles west of Vaughan, New Mexico. It explodes without a sound some 100–200 feet above the ground. (NICAP, "Another Object in Vertical Descent Explodes near Colonel"; Sparks, p. 43; Clark III 539; Clark IV 598)

1948, November 23 — 10:20 p.m. The first documented ground radar–visual UFO case takes place at Fürstenfeldbruck Air Base [now closed] in Bavaria, Germany. A UFO is seen circling at 27,000 feet. An F-80 pilot sent to intercept it describes it as bright red. It climbs abruptly to 50,000 feet at 900 mph. A second F-80 pilot verifies the report. (NICAP, "Grnd Visual / Grnd Radar Track Object at 27,000′"; Sparks, p. 43; Ruppelt, p. 46)

1948, November 24 — Writer Sidney Shalett has asked for USAF cooperation in writing an article on UFOs for the *Saturday Evening Post*. In a "Memorandum for the Record," the USAF Directorate of Intelligence indicates that "publicity of this nature is undesirable but, if such articles are written, they will be less harmful to the national

interest if a degree of guidance in their preparation is exercised." Signed November 24 by Cabell, Director of Intelligence. ([Maj. Gen. Charles P. Cabell], "Memorandum for Record," November 24, 1948; Michael Hall and Wendy Connors, "Flying Saucers: Behind the Cold War Veil of Military Intelligence (Part II)," *European Journal of UFO and Abduction Studies* 3, no. 1 (March 2002): 2, 18–22; Clark III 932; Clark IV 1043)

1948, November 30 — Maj. Gen. Charles P. Cabell, in an Air Staff Summary Sheet, admits that he has tried to dissuade the press from publishing articles like Shalett's. Cabell has asked Secretary Forrestal for permission to feed Shalett some statistics, but the memo is apparently never sent. (Maj. Gen. C. P. Cabell, "Publicity on Flying Saucer Incidents," Air Staff Summary Sheet, November 30, 1948; "Memorandum for Mr. Forrestal" [unsent])

1948, November 30 — Letter from Col. Howard M. McCoy at AMC Dayton to Commanding General, Air Defense Command, Mitchel AFB [now closed], Long Island, New York. "It is requested that all reports of unusual sightings by radar stations of your command be made directly to this Headquarters by the most expeditious means." (NICAP, "1948 UFO Chronology")

1948, November 30 — An interim report by Project Sign, one that apparently takes seriously the possibility that UFOs represent interplanetary probes, is accidentally destroyed. USAF Intelligence later requests a replacement copy from TID at Wright-Patterson AFB in Ohio. A recent FOIA to the National Archives answers that such a document would be in Project Blue Book files, but it is not. (Jan Aldrich)

1948, December — A first-strike war plan (Sizzle) is developed to use 133 nuclear aerial bombs against 70 cities of the USSR. ("Nuclear 'Pincher': The START II Treaty, the American 'Escalation of Superiority' Strategy, and Russia's Strategic Nuclear Forces," from *Sovetskaya Rossiya,* April 8, 1995)

1948, December 3 — 8:15 p.m. Sgt. Bruce Earlin McFarland, control tower operator at Fairfield-Suisun AFB [now Travis AFB] at Fairfield, California, watches for 25 seconds a round, white light fly with variable speed (200–400 mph) and a bouncing motion, finally disappearing after a rapid, erratic climb to 20,000 feet. (NICAP, "Fairfield-Suisun AFB, Dec. 3, 1948, UFO Report"; Sparks, p. 43)

1948, December 5 — 2:00 a.m. A University of New Mexico student sees a brilliant green "meteor". (Clark III 539; Clark IV 598)

1948, December 5 —9:05 p.m. Pilot Capt. William R. Goade is flying a USAF C-47 from Denver to Phoenix. Just west of Las Vegas, New Mexico, he and his copilot Maj. Roger Carter spot a bright green flash. Some 22 minutes later, an identical flash rises from the east slope of Sandia Peak and follows a parabolic curve as the C-47 passes 20 miles northeast of Albuquerque. Capt. Ernest Van Lloyd and the crew of Pioneer Airlines Flight 63 also see the second object, described as first orange, then green. (NICAP, "AFOSI Case 8: AF C-47 Pilot Observes UFO Similar to Green Flare"; Sparks, p. 43; Clark III 539; Clark IV 597)

1948, December 5 — Night. A civilian driving on US Highway 160 near Blanca, Colorado, sees a bright green fireball traveling west on a horizontal course at great speed. (Clark III 539; Clark IV 597)

1948, December 6 —Lt. Col. Doyle Rees, commander of the Seventeenth District AFOSI at Kirtland AFB, New Mexico, orders an investigation into the previous night's green fireball. (Clark III 539; Clark IV 597)

1948, December 6 — Project Sign is ordered to send copies of all its future cases and analyses to Maj. Boggs of the Office of Defensive Air, the ONI, and the USAF Scientific Advisory Board. (Swords 65)

1948, December 6 — 10:55 p.m. Atomic Energy Security Service Officer Joseph Toulouse sees a greenish flare one-third the apparent size of the moon at Sandia Base outside Albuquerque, New Mexico. It is visible for 3 seconds before it arcs downward and vanishes. (NICAP, "AFOSI Case 10: AESS Observed Green Flare Directly over Sandia Base"; Sparks, p. 44; Clark III 539; Clark IV 598)

1948, December 8 — Two AFOSI officers, Capts. Melvin E. Neef and John J. Stahl Jr., interview every agency that might know something about green-flare operations but come up short. That evening, they are flying a T-7 out of Kirtland AFB, Albuquerque, New Mexico, at 5,000 feet when they see a brilliant green light, larger and more brilliant than a meteor or flare, traveling a flat trajectory 2,000 feet above them. They see it for 2 seconds before it burns out. (NICAP, "AFOSI Case 11: Agents in T-7 Observe Intense Green Fireball at 13,000′"; Sparks, p. 44; Clark III 539; Clark IV 597–598)

1948, December 9 — Capt. Neef informs Lincoln LaPaz, director of meteoritics at the University of New Mexico, about the green fireball sightings. He says they do not sound like any meteors he is familiar with. (Clark III 539; Clark IV 598)

1948, December 10 — The revised Project Sign report is issued, Air Intelligence Report Number 100-203-79, "Analysis of Flying Object Incidents in the U.S." (AIR 203) [Some copies are confusingly dated April 28, 1949.] This is the culmination of Sign's work since early August, augmented by ONI collaboration over the past two months. UFOs are not extraterrestrial (the idea is hardly noticed). UFOs are probably real, but if so, there is a small chance that they are Soviet and therefore dangerous. All in all, the word "Soviet" dominates the commentary. (US Air Force,

Directorate of Intelligence, *Analysis of Flying Object Incidents in the U.S.: Summary and Conclusions*, Air Intelligence Report 100-203-79, December 10, 1948; copy, dated April 28, 1949; Good Above, pp. 265, 480–481; Bruce Maccabee, "Hiding the Hardware," *IUR* 16, no. 5 (Sept./Oct. 1991): 7–8; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 52; Swords 65–66; John Greenewald, "The Somewhat Lost Top Secret 1948 UFO Report: A Glimpse into America's Early Encounter with the Unknown," The Black Vault, February 21, 2024)

1948, December 12 — 9:02 p.m. Lincoln LaPaz and two USAF officers (Sandia Base Intelligence Officer Lt. Allan B. Clark and Sandia's AF-Civil Air Patrol Liaison Officer Maj. Charles L. Phillips) see a green fireball near Bernal, New Mexico. He calculates that it is flying directly over Los Alamos National Laboratory, and it maintains its horizontal flight at the low altitude (for a meteor) of 8–10 miles. LaPaz arranges with the Atomic Energy Security Service to set up a patrol with Speed Graphic cameras to try to photograph the fireballs. (NICAP, "AFOSI Case 13: LaPaz, Captain, CAP Intel Officer Observed Green Fireball"; Sparks, p. 46; Good Above, p. 266; Joel Carpenter, "Green Fireball Chronology," October 6, 2011; Clark III 539–540; Clark IV 598)

1948, December 13 — Project Sign files are sent to the Navy by Col. William R. Clingerman. (NICAP, "Project 'SIGN' Files Sent Directly to the Navy," December 13, 1948)

1948, December 13 — Aeronautical engineer James E. Lipp writes an 8-page memo to Brig. Gen. Donald Putt on "Special Design and Performance Characteristics That Are Believed to Distinguish Spaceships." Rejecting out of hand any links between UFO sightings and space travelers, it later appears as an appendix in the Project Grudge report. (James E. Lipp, "Special Design and Performance Characteristics That Are Believed to Distinguish Spaceships," December 13, 1948)

1948, December 16 — Astronomer J. Allen Hynek is officially tasked by Project Sign with studying UFO cases for astronomical explanations. (AMC contract W33-038-1118). (O'Connell 44–46)

1948, December 16 — Brig. Gen. Donald Putt, Director of USAF Research and Development, orders that the code word Sign be changed to Grudge (since the Air Force bears a grudge against UFO reports, according to Ruppelt), effective in February. Morale plummets. (Sparks, p. 11; "Report by the Director of Intelligence, USAF, to the Joint Intelligence Committee on Unidentified Aerial Objects," April 28, 1949)

1948, December 20 — Sneider sends his summary of the Chiles-Whitted case, Air Intelligence Report number 102-122-79, to Cabell. It is later called "The Ghost of the Estimate" by some researchers. (Capt. Robert R. Sneider, [untitled memorandum], December 20, 1948; Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 52)

1948, December 20 — In a confidential memo to Lt. Col. Doyle Rees, LaPaz argues that the green fireball he saw on December 12 was no meteor he has ever studied. He writes that the object moved far too slowly to have been a meteor and left no "trail of sparks or dust cloud" as would be typical of meteors flying at low altitudes. Other anomalous characteristics were the intense lime-green color, low altitude of only 8–10 miles yet exhibiting no sound, flat rather than arced trajectory, and turning on and off like a light switch. The interest in green fireballs inspires the creation of an informal group, the Los Alamos Astrophysical Association, whose members, all scientists and engineers with security clearances, are permitted to examine some classified Project Sign reports. This is essentially the beginning of Project Twinkle. (World History Project, "Project Twinkle Established to Monitor Green Fireball Sightings"; Clark III 540; Clark IV 598)

1948, December 20 — 8:54 p.m. Shortly after they have packed up their Speed Graphic cameras provided by LaPaz to try to photograph the green fireballs, personnel (William D. Wilson, Buford G. Truett, Clifford E. Strang, and George S. Skipper) at an Atomic Energy Security Service post west of Los Alamos, New Mexico, spot a blue-white fireball moving in a nearly flat trajectory. Two objects separate from the main body and trail behind it. Thanks to an independent observation at another site, LaPaz is able to triangulate its flight path as 7–8 miles, west to east toward Los Alamos. (NICAP, "AFOSI Case 14: AESS OP Sighted Green Fireball with Triangulation"; Sparks, p. 46; Clark III 540; Clark IV 598)

1948, December 29 — The Fourth Army sums up the UFO situation in the southwest in a statement. In December 5–28, there were 23 reports of "flares or moving lights." All but two are in New Mexico and are an intense white or greenish-white light. (Clark III 540; Clark IV 598)

1949

1949? — Evening. USAF Brig. Gen. William M. Garland is stationed at Mather AFB [now Sacramento Mather Airport] in Sacramento, California. He and a few other people, including some command pilots, are sitting in their yard

when they see a "bright, silvery, round object" going too fast for an airplane. (Jan L. Aldrich, "Brigadier General William Madison Garland, USAF")

1949 — Estonian refugee and Los Angeles photographer Nicholas von Poppen confides to George Tyler that he was asked to photograph a large flying saucer at an unnamed military base in New Mexico. He takes photos for two days from every conceivable angle, including the four dead occupants, all strapped in swivel-back seats. The aliens are about 4 feet tall and albino-like. In the craft is a book with strange symbols and a device like a large electronic tube that beeps intermittently. However, the tale seems to be a fictional story written by Tyler and enhanced by Gray Barker. (Gray Barker, "Chasing the Flying Saucers," *Flying Saucers*, November 1960, pp. 22–28; Gray Barker, "Von Poppen Update," *Gray Barker's Newsletter,* no. 17 (December 1982): 8; William S. Steinman and Wendelle C. Stevens, *UFO Crash at Aztec*, UFO Photo Archives, 1986; "More about That 'Roswell Alien Photo,'" *Focus* 5, nos. 1–3 (March 31, 1991): 26–28; Clark III 330; Clark IV 366–367)

1949 — 1:00 a.m. A group of soldiers of the 2nd Armored Division stationed at Fort Hood, Texas, are tasked with standing guard over a plateau in a remote, fenced-off part of the base. After a few weeks, they see bright lights in the sky. They approach the plateau and descend slowly and silently. Suddenly, part of the plateau opens up and they can see light coming from inside. The lights descend into the opening, which closes over them. (Michael D. Swords, "Timmermania: A Step Too Far into the Timmerman Files?" *IUR* 27, no. 4 (Winter 2002–2003): 9; Michael D. Swords, *GrassRoots UFOs: Case Reports from the Timmerman Files*, Fund for UFO Research, 2005, p. 146)

1949 — Day. A student pilot is flying a two-seat Taylorcraft over Los Angeles, California. Just as he turns to a westerly flight heading, he sees an object speeding across the sky from north to south. Suddenly it stops abruptly, and the pilot heads toward the object climbing to within a few hundred feet. An intense flash of white comes from its tail and in less than a minute it is completely out of sight. ("Recently Reported," *CUFOS Associate Newsletter* 2, no. 10 (October 1981): 5)

1949, January — Project Sign personnel begin to be reassigned. Loedding disappears from project records. Deyarmond's attention goes elsewhere. Truettner makes one last serious attempt at interviewing about nuclear propulsion (at Oak Ridge, Tennessee) and is given a negative opinion on UFOs by Col. Ralph L. Wassell. He, too, disappears from the project. The civilian members are relieved of their duties and reassigned to other intelligence tasks within T-2. For Loedding in particular, his role and prestige are never the same. After a few further years of intelligence work, both he and Truettner leave AMC. For the higher military ranks (Llewelyn and Sneider), all we know is that they are soon no longer involved, perhaps not even assigned to the same base. Even Clingerman and Howard M. McCoy become less involved, perhaps because they have also heard that their tenures will soon be up and they will be sent to school and then transferred. The only persons left active on the project are two of the lower ranks: Lieut. Howard W. Smith and civilian George W. Towles. Their job is reduced basically to collection and filing. In this condition, or worse, the Air Force commitment to a UFO investigation project will remain until the summer of 1951. (Michael D. Swords, "Project Sign and the Estimate of the Situation," *JUFOS* 7 (2000): 52–53; Clark III 937; Clark IV 1047)

1949, January — Early morning. Sarah Elizabeth Lampe watches an odd, disc-like electrical discharge, about 3 feet in diameter, that persists for "fully two minutes" during the Big Snow, 8 miles from Beatty, Nevada. ("True Mystic Experiences," *Fate* 4, no. 2 (March 1951): 84–89)

1949, January 1 — The CIA Office of Scientific Intelligence is established. Willard Machle becomes assistant director for scientific intelligence. Problems almost immediately involve recruitment and filling positions with competent professionals. (Rear Adm. R. H. Hillenkoetter, "Scientific Intelligence," January 4, 1949)

1949, January 1 — 5:00 p.m. Pilot Thomas A. Rush and his wife are in a private plane with two passengers flying east of Jackson, Mississippi, into North Jackson Airpark. They see a cigar-shaped object, 60 feet long and 10 feet wide, cross their path at an altitude of 1,500–1,600 feet. It is only about 500 feet distant and seems to be either dark blue or black in color. It is shaped like a megaphone, tapering from a diameter of roughly 10 feet at the front end to four feet at the trailing end. Its speed is approximately 200 mph, and it accelerates to 400–500 mph. The object makes a 50° turn and is visible for 10–12 seconds. (NICAP, "Cigar-Shaped Object Encountered by Bush Pilot"; Sparks, p. 46; Loren E. Gross, *UFOs, a History: 1949, January–June*, The Author, 1988, pp. 1–2; Jazz Shaw, "From the Project Blue Book Archives: A Few Lesser-Known UFO Cases from Yesteryear," The Debrief, March 7, 2023)

1949, January 4 — 2:00 p.m. USAF pilot Capt. Paul R. Stoney, on the ground at Hickam Field [now part of Joint Base Pearl Harbor–Hickam] near Honolulu, Hawaii, sees a flat, white, elliptical object about the size of a T-6 aircraft, circle at about 3,000 feet while oscillating to the right and left. It is apparently several miles off the base and slowly circling. It is bright white on the underside and darker on top and possesses no other structures. It proceeds

for 15 minutes to make "rhythmical undulation" maneuvers in a cyclical manner. The "object seemed to maneuver under control at all times completing 360° turns and 90° turns." The object then "departed climbing (into the northeast) at accelerated speed out of sight." (NICAP, "Disc Circles, Maneuvers, Climbs into the NE"; Sparks, p. 47)

1949, January 5 — The USAF Technical Information Division at Wright-Patterson AFB near Dayton, Ohio, transmits Project Sign's list of UFO incidents to the Air Weather Service for analysis and recommendations. (Jan Aldrich)

1949, January 6 — 5:30 p.m. PFC Everitt sees a bright-white, diamond-shaped light in horizontal flight from southeast to northwest above the Ordnance section at Kirtland AFB, Albuquerque, New Mexico. It is about 1,500–2,000 feet altitude and flying faster than a jet. Possible meteor. (NICAP, "Diamond-Shaped Light"; Sparks, p. 47)

1949, January 7 — The Research and Development Board writes a memo to USAF Intelligence on the green fireballs. It is signed by David Z. Beckley, chief of the R&DB Technical Intelligence Branch. (Michael Hall and Wendy Connors, "The Research and Development Board: Unanswered Questions," *IUR* 26, no. 2 (Summer 2001): 10)

1949, January 10 — FBI special agent Charlton C. McSwain sends a memo to J. Edgar Hoover enumerating the views of an AMC resident engineer (identified only as "Mr. E") with the Nuclear Energy for the Propulsion of Aircraft project at Oak Ridge National Laboratories in Tennessee that the flying discs are human-made nuclear missiles originating in Russia. (Bruce S. Maccabee, "UFO Related Information from the FBI Files, Part [4]," *MUFON UFO Journal*, no. 123 (February 1978): 10–15; Loren E. Gross, *UFOs, a History: 1949, January–June*, The Author, 1988, pp. 6–10)

1949, January 11 — Angered over his opposition to defense economization policies and meeting secretly with Thomas Dewey's Republicans, Truman tells Forrestal that Louis A. Johnson will soon replace him as Secretary of Defense.

1949, January 13 — Col. Eustis L. Poland of US Army Intelligence (G-2) sends a memo on behalf of the Commander of Fourth Army at Fort Sam Houston in San Antonio, Texas, to the Director of Army Intelligence concerning the green fireballs. It recommends a scientific study because "these incidents are of such great importance, especially as they are occurring in the vicinity of sensitive installations." (Col. Eustis L. Poland, "Unconventional Aircraft," January 13, 1949; Good Above, pp. 265, 482)

1949, January 24 — An FBI memo from D. M. Ladd to Hoover documents speculation on a Soviet nuclear-powered disc by USAF Col. Clyde D. Gasser of the Nuclear Energy for the Propulsion of Aircraft (NEPA) project at Oak Ridge, Tennessee. Gasser reports rumors coming from Wright-Patterson AFB in Ohio that nuclear-powered disc-shaped planes might be making incursions into US airspace and returning to the USSR over the North Pole. (D. M. Ladd, "Flying Discs," January 24, 1949)

1949, January 27 — 10:20–11:20 p.m. Capt. Eckerman Sannes, acting chief of the Aircraft Branch at Eglin AFB near Valparaiso, Florida, and his wife are driving slowly on Cortez Road between Bradenton and Cortez, Florida, when they observe a "cucumber-shaped" object. The object, seen through binoculars, seems as long as two Pullman cars, with 7 lighted, square windows. It is throwing sparks and approximately 8–10 miles away. In the first sighting at 10:20 p.m., the object approaches from the south going north, moving from an altitude of 8,000 feet in a gradual descent until lost behind trees. In the second sighting at 11:20 p.m., the object is seen in the north, heading south and making a gradual turn to the west. It descends then climbs with a bouncing motion (up 4,000 feet, down 2,000 feet) at about 400–500 mph, resulting in an overall climb and loss to view at an altitude of around 40,000 feet. The bouncing appears to start after the final 270° course change to the west. (NICAP, "Two Sightings of Object with Lighted Windows"; Sparks, p. 49)

1949, January 30 — 5:54 p.m. Hundreds of people see a green meteor come out of the northwest and vanish southwest of Roswell, New Mexico. It is completely silent. (NICAP, "AFOSI Case 18: Green Fireball Event Witnessed in New Mexico"; Sparks, p. 49; Commanding Officer, Kirtland AFB, "Nr. OSI-1-90," January 31, 1949; Loren E. Gross, *UFOs, a History: 1949, January–June*, The Author, 1988, pp. 15–16; Clark III 540; Clark IV 598–599)

1949, January 31 — Kirtland AFB in New Mexico notifies the Pentagon that it will launch an immediate investigation of the green fireballs, noting that "local commanders [are] perturbed by implications of phenomena." LaPaz speaks to dozens of witnesses of the January 30 fireball and manages a rough triangulation of the fireball's 143-mile path from Amarillo to Lamesa, Texas. He estimates its speed at 25,000–50,000 mph, with a beginning altitude of 60,000 feet and a final altitude around 40,000 feet. LaPaz accompanies search teams to bring back any fragments. They end up in the area of Lamesa but give up after a few days of fruitless search. He later tells AFOSI agent Paul Ryan that the fireballs are artificial, perhaps radio-controlled missiles directed by enemy agents in the Southwest. (Commanding Officer, Kirtland AFB, "Nr. OSI-1-90," January 31, 1949; Clark III 540; Clark IV 599)

1949, January 31 — The FBI field office in San Antonio, Texas, issues a memo on UFOs, "Protection of Vital Installations." It is sent to Hoover, G-2, ONI, OSI, and mentions a meeting among these groups on UFOs, "considered top secret by intelligence officers of both the army and the air forces." (SAC, San Antonio,

"Protection of Vital Installations, Bureau File #65-58300," January 31, 1949; ClearIntent, p. 149; Good Above, pp. 267, 483)

1949, February — Chemist H. Marshall Chadwell, from the New York office of the Atomic Energy Commission, is appointed assistant director of scientific intelligence at the CIA. (Jan Aldrich)

1949, Early February — Writer Sidney Shalett is given a guided tour of AMC at Wright-Patterson AFB in Ohio, a glimpse of low-interest UFO cases, and a few conservative opinions by Air Force personnel. (Swords 73)

1949, February 1 — Col. Hanna (?), assistant chief of the Power Plant Laboratory (at Wright-Patterson?) and project engineer for Project Sign, meets with other Project Sign personnel and concludes that nuclear-powered UFOs are improbable. (Project Status Report on Project Sign, February 4, 1949; Jan Aldrich)

1949, February 8 — UCLA geophysicist Joseph Kaplan meets with LaPaz at the University of New Mexico in Albuquerque. He finds LaPaz's understanding of the green fireball reports unsettling. He discusses the matter with Capt. Melvin Neef and Maj. William Godsoe (Fourth Army Intelligence liaison officer at Sandia Base). He promises to alert Scientific Advisory Board chairman Von Kármán and urge an investigation. (Clark III 540; Clark IV 599)

1949, February 11 — Kaplan meets in Washington, D.C., with Von Kármán, who is impressed enough to write Gen. Charles P. Cabell that the green fireballs look like a serious issue that needs to be addressed, perhaps by LaPaz. (Swords 79, 497)

1949, February 11 — Project Sign releases a final sanitized report, "Unidentified Aerial Objects: Project 'Sign,'" Technical Report F-TR-2274-1A, authored by Lawrence Truettner and Albert B. Deyarmond and approved by Col. Clingerman (chief of USAF Technical Intelligence Division) and Col. Howard M. McCoy (chief of the Intelligence Department). 72 pages are visible in the NICAP copy and 1,537 pages (some illegible) are available on the Blue Book microfilm. Its conclusions, that 20% of the "incidents have been identified as conventional aerial objects," are based on 273 reports (243 US and 30 foreign) and it summarizes the characteristics of four types of UFOs: flying discs, cigar-shaped objects, spherical objects, and balls of light. It acknowledges the possibility that "these aerial objects are visitors from another planet" and refers to commentary in Appendix D by James Everett Lipp of the RAND Corporation (his December 13, 1948, letter to Brig. Gen. Donald Putt. "No definite and conclusive evidence is yet available that would prove or disprove the existence of these unidentified objects as real aircraft of unknown and unconventional configuration. It is unlikely that positive proof of their existence will be obtained without examination of the remains of crashed objects.... Evaluation of reports of unidentified objects is a necessary activity of military intelligence agencies. Such sightings are inevitable, and under wartime conditions rapid and convincing solutions of such occurrences are necessary to maintain morale of military and civilian personnel. In this respect, it is considered that the establishment of procedures and training of personnel is in itself worth the effort expended on this project." In Appendix C, physicist George E. Valley breaks down the characteristics and patterns of the most reliable sightings. Truettner and Deyarmond, in a between-the-lines rebuke of Cabell's order not to consider the ETH, recommend that if enough cases are examined and proven to have no security risks, then the project should be terminated. The report is distributed to AMC, USAF Intelligence Directorate, ONR, Cambridge Labs, Air Weather Services, Hynek at Ohio State University, the RAND Project, and the USAF Scientific Advisory Board. (Sparks, p. 12; L. H. Truettner and A. B. Deyarmond, *Unidentified Aerial Objects: Project "Sign,"* Air Materiel Command Technical Report no. F-TR-2274-IA, February 1949; Swords 72; Clark III 457, 935; Graff 51–54; Eghigian, *After*, p. 59; Clark IV 502–503, 1045)

1949, February 12 — Project Sign officially becomes Project Grudge. (Sparks, p. 12; Clark III 932; Eghigian, *After*, p. 59; Clark IV 1042)

1949, February 12 — Another realistic Spanish-language radio version of *The War of the Worlds* is broadcast in Quito, Ecuador, causing panic, a riot, and a major fire. (John Gosling, *Waging the War of the Worlds*, McFarland, 2009, pp. 102–113)

1949, February 15 — Maj. Gen. Cabell sets out a revised list of Air Intelligence reporting requirements for "unconventional aircraft." (Maj. Gen. C. P. Cabell, "Unconventional Aircraft," Air Intelligence Requirements Memorandum no. 5, February 15, 1949)

1949, February 16 — A Conference on Aerial Phenomena is held at Los Alamos Scientific Laboratory in New Mexico with military representatives—meteoriticist Lincoln LaPaz and physicists Norris E. Bradbury, Marshall Holloway, Frederick Reines, and Edward Teller—in attendance. Representatives from Project Grudge are noticeably absent. LaPaz tells the attendees that while most meteors are blue-green, the green fireballs are described as pale green or yellow-green. Normal meteors rarely move in long, horizontal paths with nearly constant velocities. He says there are 10 incidents that strongly fit the pattern and 20 others that might. The scientists agree to set up a series of instrument stations to photograph and analyze the fireballs. Teller thinks the

fireballs might be electrical-optical phenomena. Navy Commander Richard S. Mandelkorn, who is in attendance, writes in his report that "there is cause for concern of the continued occurrences of unexplainable phenomena of this nature in the vicinity of sensitive installations." (Cmdr. Richard S. Mandelkorn, *Report of a Trip to Los Alamos, New Mexico, 16 February 1949,* February 18, 1949; Lt. Col. Doyle Rees, [Minutes of February 16 Conference on Aerial Phenomena, Los Alamos], March 29, 1949; Loren E. Gross, *UFOs, a History: 1949, January–June*, The Author, 1988, pp. 23–53; Good Above, pp. 265–266; Swords 79–80; Clark IV 599)

1949, February 17 — 5:57 p.m. University of New Mexico Professor of Civil Engineering Marvin May sees a brilliant white object in the west at 6° elevation for less than 6 minutes in Albuquerque, New Mexico. The object is first round then shifts to an ellipse as it approaches, then it appears to be elongated like a bent pipe with corners, one full moon in length. It makes a slight climbing turn to the north, shifts to peach color as it makes a rapid sharp turning climb to the south, disappearing in cloudless sky by diminishing in size and brightness. At the same time, 100 guards at Sandia Base, New Mexico, including the officer of the guard, see a yellow-orange cigar-shaped object for seven minutes. (NICAP, "AFOSI Case 24: Vertical Climb, Then Leveled Off"; Sparks, p. 50)

1949, February 18 — Cabell writes von Kármán and says he has a transcript of the Los Alamos meeting and that Hynek is studying the green fireballs topic. He adds: "It seems unlikely that domestic incidents can be attributed to the activity of a foreign power or a science unknown to our specialists." (Loren E. Gross, *UFOs, a History: 1949, January–June*, The Author, 1988, pp. 12–13)

1949, February 18 — A Fourth Air Force letter quotes Project Sign's requirements for radar reporting, as stated by the Continental Air Command (NORAD's predecessor) on February 4. The USAF Air Defense Command is subordinate to ConAC at this time. The requirements admit that a "large number of targets appearing on radar screens remain unidentified." It refers to Col. Howard M. McCoy's November 30, 1948, letter on Sign's preference for radar tracks of aerial objects that show extremely fast or slow speeds, vertical or near vertical ascent or descent, extraordinary maneuverability, and extreme altitudes. (Clark III 810; Clark IV 903)

1949, February 23 — Col. Howard M. McCoy sends Capt. Roger Groseclose and Lt. Howard Smith to Kirtland AFB's Office of Special Investigations to discuss the green fireballs with LaPaz and Neef and to mollify them for not showing up at the February 16 conference. (Clark III 541; Clark IV 599)

1949, February 24 — Groseclose and Smith have an unpleasant exchange with Neef, LaPaz, Agent Jack Boling, and Army Maj. Godsoe, who says it's not worth AFOSI's time to conduct investigations for AMC. The AMC officers retort that the fireballs are not an Army concern. Groseclose and Smith say they are concerned with all anomalous aerial phenomena. Disgusted, Godsoe leaves the room. Groseclose and Smith then turn on LaPaz, criticizing him for only sending AMC raw data and not finished analyses. LaPaz says he is on leave as a volunteer and must go back to the University of New Mexico, unless he sees a contract. However, AMC agrees to set up a network of observation posts with cameras, transits, and trained personnel. (Loren E. Gross, *UFOs, a History: 1949, January–June*, The Author, 1988, pp. 11, 14–15; Clark III 541; Clark IV 599)

1949, February or March — 4:30 p.m. A representative of the International Petroleum Company, a subsidiary of Standard Oil of New Jersey, is driving north along the Pan-American Highway about 6 miles south of Lima, Peru, when he sees a metallic disc hovering low above the desert on his right. He walks over to it, and three mummy-like creatures about 5 feet tall emerge. They speak to him in both English and Spanish, explaining to him that they come from another star system, are concerned about our use of atomic energy, use solar power, no longer have sex, and reproduce by subdividing. They invite him inside the disc, which from the inside has transparent walls. He sees no instruments, only a padded ledge. (Lorenzen, *UFOs over the Americas,* Signet, 1968, pp. 122–148)

1949, March — Strategic Air Command head Gen. Curtis LeMay delivers the first SAC Emergency War Plan, which calls for dropping 133 atomic bombs on 70 cities in the USSR within 30 days. LeMay predicts that World War III will last no longer than 30 days. (Wikipedia, "Curtis LeMay")

1949, March 2 — Sidney Shalett provides the USAF Directorate of Intelligence a draft of his upcoming article for review. The Air Force is not pleased, objecting to Shalett stating an "official" USAF position, his claim that the Air Force is his sole source of information (although it is), a quote by Irving Langmuir criticizing Project Sign, and any inference that the Air Force and Navy are not cooperating. (Swords 73)

1949, March 6–7 — 8:30 p.m. Army Pvts. Martin Fensterman and Frank Luisi, on security patrol near Killeen Base [now West Fort Hood], Texas, a nuclear weapons storage site, see a flash of pale blue light in the sky to the northeast. At 8:55 p.m., a quarter mile away, Pvt. Harold Moore sees a white light with an orange trail flash across the western horizon. At 9:00 p.m., from inside the base boundary, Sgt. Hubert Vickery and Pfc. John Ransom notice a pale blue-white light streaking across the western sky low over the horizon. Between 1:15 and 2:00 a.m., four more security patrols report burst of lights like a flash bulb. (Sparks, pp. 50–51; SAC, San Antonio, "Protection of

Vital Installations, Bureau File 65-58300," March 22, 1949; "Fort Hood Sightings, 1949," Texas UFO Museum and Research Library, February 5, 2014; Clark III 541–542, 1053; Clark IV 600, 1168)

1949, March 8 — 1:03 a.m. Two infantrymen half a mile apart at Killeen Base, Texas, see apparently separate streaking bright lights (one white, the other yellowish red). The latter one covers 60° of sky, appearing and disappearing at about the same angle above the horizon. Cpl. Luke Sims is able to run 10 paces to a field telephone before it vanishes. All observers insist these are not meteors and are more like flares. (NICAP, "Killeen Base, Camp Hood, Texas, OSI Case 39"; Sparks, p. 52; SAC, San Antonio, "Protection of Vital Installations, Bureau File 65-58300," March 22, 1949; Clark III 542; Clark IV 600)

1949, March 13 — 9:53 p.m. Two MPs guarding the Technical Area at Sandia Base, New Mexico, see a silent, spherical object, bluish- or greenish-white, with a flaming blue tail twice as long as the body, which is apparently half the size of the full moon. (NICAP, "March 13, 1949, Sandia Base, NM, OSI Case 40"; Sparks, p. 52)

1949, March 15 —A memo on UFOs to Willard Machle by physicist Albert M. Stone from the CIA Office of Scientific Investigation dismisses the idea of UFOs as foreign aircraft and suggests they are misidentifications of other phenomena. ("Flying Saucers," letter from Dr. Machle to Dr. Stone, March 15, 1949; ClearIntent, p. 113)

1949, March 17 — Seven sightings of large, green, red, and white flares take place at Killeen Base, Texas, including the previously skeptical Capt. Horace McCulloch, assistant G-2 of the Second Armored Division at Camp Hood, who is driving between Camp Hood and Killeen Base to prepare a test firing of some flares to prove that recent sightings are not anomalous. McCulloch puts the entire base on alert. (Sparks, p. 52; Clark III 542; Clark IV 600)

1949, March 22 — SAC San Antonio, Texas, sends a memo to FBI headquarters regarding the January 31 communication on Protection of Vital Installations, emphasizing that USAF and the Army consider the matter "secret." Fourth Army Intelligence is now calling UFOs "unconventional aircraft" and ATIC's office is now Project Grudge. It also discusses green fireball cases. (SAC, San Antonio, "Protection of Vital Installations, Bureau File 65-58300," March 22, 1949)

1949, March 25 — J. Edgar Hoover sends a memo to a large number of FBI offices indicating that "flying discs are believed to be man-made missiles rather than natural phenomenon," probably made in Russia. (John Edgar Hoover, "Flying Discs," March 25, 1949; ClearIntent, p. 161)

1949, March 28 — James Forrestal leaves office in a formal ceremony. He rides back to the Pentagon with his opponent Stuart Symington, who talks to him about something troubling. Forrestal appears traumatized. Forrestal sits in his office, dazed and incoherent, repeating, "You are a loyal fellow."

1949, March 31 — Forrestal is flown to Hobe Beach, Florida, to stay with his friend Under Secretary of State Robert A. Lovett, where his wife is vacationing. He meets with psychiatrist William C. Menninger (who diagnoses "severe depression" of the type "seen in operational fatigue during the war") and psychologist Capt. George N. Raines from the Naval Hospital at Bethesda, Maryland. Forrestal has several hysterical episodes when they are there, ranting about Communists following him, and perhaps one suicide attempt.

1949, March 31 — CIA's H. L. Bowers writes a memo to Dr. Machle, "Notes and Comments on Unidentified Aerial Objects--Project Sign," stating that Deyarmond thinks UFOs will turn out to be another "sea serpent." Nonetheless, they must be investigated. (Document released to Brad Sparks but not in subsequent CIA FOIA releases; Good Above, p. 330)

1949, March 31 —11:50 p.m. Lieut. Frederick Davis, on patrol east of Killeen Base, Texas, sees a reddish-white ball of fire passing horizontally above the base airstrip. After 10–15 seconds it disappears without descending. He notes interference on the telephone line when he calls the report in. (NICAP, "Field Telephone Affected by BOL"; Sparks, p. 53; Clark III 542; Clark IV 600)

1949, April 2 — Menninger and Raines fly Forrestal to the National Naval Medical Center in Bethesda, Maryland, where he can be treated quietly. On the drive to the hospital from the airport, Forrestal attempts to jump out of the car but is restrained. Forrestal declares he does not expect to leave the hospital alive. He is admitted under the care of Raines, who diagnoses him with involutional melancholia and places him in a VIP suite on the 16th floor. Forrestal's personal diaries are removed from his old office and taken to the White House, where they remain for a year.

1949, April 3 — Broadcaster Walter Winchell announces on his radio program that the "flying saucers, never explained by anyone in authority are now definitely known to have been guided missiles shot all the way from Russia." (Michael David Hall and Wendy Ann Connors, *Captain Edward J. Ruppelt: Summer of the Saucers*, Rose Press International, 2000, p. 14; "Anatomy of a Hoax, Part Two," Saturday Night Uforia; Clark III 542; Clark IV 600)

1949, April 5 —10:00 p.m. A huge green fireball with a red afterglow is seen streaking approximately 300 feet above the southern slope of Fejarito Mountain, near Los Alamos, New Mexico. It disappears behind the mountain. Another fireball is seen at 11:00 p.m., and the next two nights. (NICAP, "1949 UFO Chronology"; Sparks, p. 54)

1949, April 8 — In response to Winchell's claim, the Air Force admits it is impossible to "deny categorically" that the flying saucers originate in Russia. A spokesman says that some unknown incidents are placed in a classified category, denied to everyone except authorized military personnel. ("Air Force Isn't Committing Self on Flying Disks," *Cedar Rapids (Iowa) Gazette,* April 8, 1949, p. 22)

1949, April 9 — Forrestal has been treated for one week at the National Naval Medical Center in Bethesda, Maryland, with narcosis through sodium amytal. For the next 30 days, he undergoes a regimen of insulin sub-shock combined with psycho-therapeutic interviews. Raines says the treatment occasionally throws Forrestal into a confused state with a great deal of agitation and confusion.

1949, April 14 — Col. Reid Lumsden, commander of the AFOSI district office at Kelly AFB [now Kelly Field Annex] in San Antonio, Texas, hands the Army reports of flares at Killeen Base to Col. William Carpenter, deputy director of special investigations at the Pentagon. Carpenter promises to investigate. (Clark III 542; Clark IV 600)

1949, April 16 and 18 — Mysterious flares are again observed at Killeen Base, Texas. (Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 10; Clark III 542; Clark IV 601)

1949, April 18 — The US Air Force Security Service moves its headquarters from Arlington Hall in Washington, D.C., to Brooks Air Force Base in San Antonio, Texas. (Wikipedia, "Air Force Intelligence, Surveillance and Reconnaissance Agency")

1949, April 19 — AFOSI at Kirtland AFB, New Mexico, sends to USAF headquarters a list of all green fireball reports it has investigated (39 in all) from December 5 to April 12. The common characteristics of most of the incidents are: "a. Green color, sometimes described as greenish-white, bright green, yellow-green, or blue green. b. Horizontal path, sometimes with minor variations. c. Speed less than that of a meteor, but more than any known type of aircraft. d. No sound associated with observation. e. No persistent trail or dust cloud. f. Period of visibility from one to five seconds." ("The Scientific Advisory Board to the Chief of Staff, United States Air Force, Conference," November 3, 1949; Swords 133–135; Clark III 541; Clark IV 599–600)

1949, April 22 — 9:05 a.m. A round, flat, thin, metallic disc is seen traveling west to east, dropping slowly, over Cliff, New Mexico. (Sparks, p. 55)

1949, April 24 — 10:30 a.m. General Mills meteorologist Charles B. Moore and four Navy Skyhook balloon launch crewmen (Navy Chief Fire Controlman William Akers, Davidson, Fitzsimmons, Moorman) see a white, round object, shadowed yellowish on one side, cross the sky from the south to the east, three miles north of Arrey, New Mexico. Joseph Gordon Vaeth is present as the Navy representative in charge of ground handling. Moore tracks it for 60 seconds on a theodolite. The distance is unknown, but assuming the object is 57 miles away, it would have a velocity of 18,000 mph, a width of 40 feet, and a length of 100 feet; but this is speculative. (NICAP, "White Sands Incident / C. B. Moore Case"; Sparks, pp. 56–57; R. B. McLaughlin, [Letter to J. A. VanAllen], May 12, 1949; Robert McLaughlin, "How Scientists Tracked a Flying Saucer," *True,* March 1950, pp. 25–27, 96–99; J. Gordon Vaeth, *200 Miles Up: The Conquest of the Upper Air,* Ronald Press, 1956 ed., pp. 114–116; UFOEv, pp. 2–3; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects,* Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 63–64; Hynek, *The UFO Experience,* Ballantine ed., 1974, pp. 72–73; ClearIntent, pp. 114–115; Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 8–9; Kevin D. Randle, "Charles Moore, New Mexico UFOs, and the Air Force," *IUR* 20, no. 5 (Winter 1995): 3–4; Michael D. Swords, "1952: Ruppelt's Big Year," *IUR* 28, no. 4 (Winter 2003–2004): 10; Michael D. Swords, "Balloons, Missiles, and UFOs," *IUR* 29, no. 1 (Spring 2004):16–17; Swords 84–85; "Arrey, NM Case of 4-24-1949 — Prof. Charles B. Moore," Ufology: A Primer in Audio, 1938–1959, November 21. 2013; Clark III 376, 541; Clark IV 420, 600)

1949, April 25 — 6:30 a.m. A man named Abreu and a friend are fishing at Springer Lake, northwest of Springer, New Mexico, when they hear a high-pitched whistle and see a number of silvery-white balls passing overhead quickly. They reappear repeatedly over the next hour. (NICAP, "Various Formations Observed"; Sparks, p. 57; Clark III 541; Clark IV 600)

1949, April 25 — Lt. Col. Doyle Rees wires AFOSI headquarters to ask if he can send two of his men to AMC to find out if Project Grudge plans to do anything about the green fireballs. Before Rees has a response, Joseph Kaplan arrives in Albuquerque, New Mexico, having been directed there by AF Intelligence Director Maj. Gen. Charles Cabell and Scientific Advisory Board Chairman Theodore von Kármán, who wants Kaplan to set up a field investigation. They emphasize that Grudge is not to be informed. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1949 January–June, Supplemental Notes,* The Author, 2000, p. 52; Clark III 542; Clark IV 600–601)

1949, April 27 — Rees, Kaplan, and LaPaz brief Armed Forces Special Weapons Project personnel at Sandia Base, New Mexico. LaPaz outlines plans for a network of visual, photographic, spectrographic, and radar observations covering Los Alamos, Sandia, and White Sands. Scientist William D. Crozier of the New Mexico School of

Mines offers to handle air sampling. Rees urges that the Killeen Base in Texas be included. Kaplan, who says the project is "of extreme importance" because "these occurrences relate to the National Defense of the United States," recommends LaPaz to handle the project. (Lt. Col. Doyle Rees, "Unknown (Aerial Phenomena)," May 12, 1949; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1949 January–June, Supplemental Notes*, The Author, 2000, pp. 60–62; Clark III 542, 916–917; Clark IV 601, 1027)

1949, April 27 — USAF Directorate of Intelligence briefs the USAF Deputy Chief of Staff for Operations on UFOs. "Investigations continue in an effort to find definite explanations for the many unidentified aerial objects which have been reported during the past two years." ("Unidentified Aerial Objects," Air Brief, Special Study Part Two, April 27, 1949)

1949, April 27 — A 22-page memorandum for the press (629-49) on "Project Saucer" is released by the Pentagon Office of Public Information, scheduled deliberately to coincide with part one of Shalett's article in the *Saturday Evening Post.* The writer is unknown, but it is more pro-ETH than the current Project Grudge mentality, listing several solid and dramatic cases. It concludes: "The 'saucers' are not a joke. Neither are they a cause for alarm to the population." The discrepancy between Shalett's mostly dismissive tone and the positivity of the Project Saucer statement causes Maj. Donald E. Keyhoe to wonder if there is a major disagreement about UFOs within the Air Force. (National Military Establishment, Office of Public Information, "Project 'Saucer,'" April 27, 1949; Jack Vincent, "AF Probe Proves 'Flying Saucers' Are Not a Joke," *Dayton (Ohio) Journal Herald*, April 27, 1949, pp. 1, 9; Swords 74–75; Eghigian, *After*, pp. 56–57)

1949, April 27 — 9:20 p.m. Two Army patrolmen southeast of Killeen Base, Texas, see a blinking violet light no more than 1.5 inches in diameter and only 10–12 feet from them, 6–7 feet above the ground. During the 60-second observation, the light passes through the branches of a tree. At 9:25 p.m., 2 miles away, four Army soldiers see a 4-inch light with a 2–4-inch metallic cone attached to the back. It silently approaches them in a level flight at 60–70 mph. It disappears to the southwest at a distance of 150 feet. At about 9:37 p.m., a 2-inch-wide purplish-white light appears 100 feet away to the northwest, flying in a zig-zag fashion in a level path 6–7 feet above the ground. When they attempt to approach it to investigate, it suddenly zooms away down the road at a high rate of speed before the light shuts off and the object disappears. A third light shows up at 9:39 p.m. in the west-southwest. (NICAP, "Close Encounters with Drones/Probes at Weapons Storage Site"; Sparks, pp. 57–58; Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 10; Clark III 542; Jazz Shaw, "From the Project Blue Book Archives: A Few Lesser-Known UFO Cases from Yesteryear," The Debrief, March 7, 2023; Clark IV 601)

1949, April 28 — USAF Director of Intelligence Charles Cabell sends a report on "Unidentified Aerial Objects" to the Joint Intelligence Committee. It summarizes the history of Project Sign up to its redesignation as Grudge and adds an appendix on "Unidentified Aerial Objects: Fact and Discussion," which is basically a short version of the sanitized February 11 Sign report, with some green fireball information added. It recommends sending reports of unidentified "light phenomena" to the scientific community and reports of "atomic powered craft of unusual design" to the AEC. It concludes that "There are numerous reports from reliable and competent observers for which a conclusive explanation has not been made" and that some "involve configurations and described performance which might conceivably represent an advanced aerodynamical development. A few unexplained incidents surpass these limits of credulity. It is unlikely that a foreign power would expose a superior aerial weapon by a prolonged ineffectual penetration of the United States." This essentially resurrects the ETH as a possibility, without clearly stating it. ("Report by the Director of Intelligence, USAF, to the Joint Intelligence Committee on Unidentified Aerial Objects," April 28, 1949; Jan Aldrich, "Top-Secret 1949 Document," *IUR* 23, no. 1 (Spring 1998): 3–6, 31; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1949 January–June, Supplemental Notes*, The Author, 2000, p. 64; Swords 76–77)

1949, April 28 — Some printed copies of Air Intelligence Report 100-203-79, "Analysis of Flying Object Incidents in the United States," bear this date, although it was originally released December 10, 1948. (US Air Force, Directorate of Intelligence, *Analysis of Flying Object Incidents in the U.S.: Summary and Conclusions*, Air Intelligence Report 100-203-79, December 10, 1948; copy, dated April 28, 1949)

1949, April 28 — Kaplan, LaPaz, Rees, and Neef meet with security officers at Los Alamos National Laboratory in New Mexico to discuss green fireball observations at that facility. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1949 January–June, Supplemental Notes*, The Author, 2000, pp. 62–63)

1949, April 28 — 8:00 a.m. Businessman and private pilot Leon A. Faber is flying at 3,000 feet near the Indiana State Prison in Michigan City, Indiana, when he sees a metallic disc moving east about 10,000 feet away. He is chatting with some ham radio operators on the ground during the 5 minutes the object is in sight before it disappears. (NICAP, "Flying Saucer Observed from Aircraft"; NICAP, [newsclips])

1949, April 28 — 5:45 p.m. W. Howard Hamm, John J. Huber, and H. C. "Tex" Keahey see a very large, bright, sausage-shaped object travel from northeast to southwest over the rim of the Catalina Mountains near Tucson, Arizona, over a period of 12 minutes. The object is shiny metallic and reflects the sun, apparently revolving as it moves like the "slow roll of an airplane." There is no noise, nor is there exhaust or a vapor trail. There are no wings or engines or "protuberances of any sort." It appears to be traveling at 300–600 mph. (NICAP, "Cigar-Shaped Object Observed in Daylight"; Clark III 541; Clark IV 600)

1949, April 28 — 8:30 p.m. Several security patrols at Killeen Base, Texas, report nine separate sightings of lights southeast of the base. Most change color from white to red to green. On one occasion, four lights appear together; on another, 8–10 show up in each other's company. No debris or evidence of flares are found. (Sparks, p. 58; Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 10; Clark III 543; Clark IV 601)

1949, April 29 — The April 30 issue of the *Saturday Evening Post* with part one of Sidney Shalett's "What You Can Believe about Flying Saucers" hits the newsstands. The USAF Public Relations Office has cooperated fully with journalist Shalett, who sets out a fairly even-handed introduction to the UFO phenomenon. (Sidney Shalett, "What You Can Believe about Flying Saucers, Part One," *Saturday Evening Post*, April 30, 1949, pp. 20–21, 136–139; Swords 73; Graff 55–56)

1949, April 30 — Hynek turns in his astronomical analysis of Project Sign's 237 cases. His contract with Sign is over. (J. Allen Hynek, *The UFO Experience*, Ballantine ed., 1974, pp. 199–200; *Hynek UFO Report*, p. 17; O'Connell 45; John Greenewald, "Report on Unidentified Aerial and Celestial Objects, Project 364, April 30, 1949, by Dr. J. Allen Hynek," The Black Vault, August 25, 2022)

1949, May 4 — The US Fourth Army creates an operational plan for a green fireball observation and tracking network at Killeen Base in Camp Hood, Texas. Although it lacks cameras, it has four six-man observation posts equipped with instruments to obtain directional bearings. One of the posts serves as the plotting center to coordinate and triangulate UFO sightings. Each day, a roving patrol gets new orders. (Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 10–12; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, pp. 43–44; Clark III 543, 1053; "1949-05-04: US Army Establishes UFO Tracking Net at Killeen Base," Tom Owens UAP YouTube channel, May 16, 2020; Clark IV 1168).

1949, May 5 — 10:00 a.m. The Fourth US Army has approached AFOSI in San Antonio to offer assistance in investigating green fireballs and the Killeen lights. They arrange a meeting with AFOSI, ONI, CIC, the FBI, and the Armed Forces Special Weapons Project at Camp Hood, Killeen, Texas, the first of several weekly meetings. Army and Navy officials agree that the fireballs remain unexplained. AFSWP personnel believe they are natural phenomena; AFOSI and FBI give no opinion. The Fourth Army urges AFOSI to create an observation system, even though it had just secretly created one of its own on May 4. (Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 10–11; Clark III 543)

1949, May 5 — 11:40 a.m. Army officers Maj. Charles D. May Jr., Maj. James N. Olhausen, and Capt. Molloy C. Vaughn on the Waco no. 4 firing range at Fort Bliss, Texas, watch for 30–50 seconds two oblong white discs pass through a field of fire. They are flying at about 200–250 mph at an altitude of 1,000 feet. The objects make a shallow turn. (NICAP, "May 5, 1949, 1140 MST, Fort Bliss, Texas"; Sparks, p. 59)

1949, May 6 — Soviet test pilot Arkady Ivanovich Apraksin takes a new airplane for a flight at the Kapustin Yar site, Astrakhan Oblast, Russia. At its maximum ceiling of 9.3 miles, he encounters a cucumber-shaped object, similar to the one he encountered on June 16, 1948, that directs cones of light at his aircraft from a distance of 6–7 miles. The lights cause his communications equipment to fail and damage part of his plexiglass cockpit canopy that results in a loss of air pressure. He manages to land on the banks of the Volga River 30 miles from Saratov. He wakes up in a hospital in Saratov. He again undergoes intense interrogation, psychotherapy, and medical procedures. (Joe Brill, "UFO's behind the Iron Curtain," *Skylook*, no. 87 (February 1975): 15; Good Above, pp. 221–223)

1949, May 6 — Col. Reid Lumsden of the San Antonio, Texas, AFOSI office informs headquarters that the "matter has reached a fairly serious stage and some positive action is necessary." He does not send this message to Project Grudge. Headquarters responds quickly and orders him to investigate all sightings but reminds him to inform AMC. (Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 11; Clark III 543)

1949, May 6 — Part two of Shalett's article on UFOs appears in the May 7 issue of the *Saturday Evening Post*, which takes a more skeptical tone than the first part, with the Gorman case receiving a particularly harsh thrashing. However, he treats Chiles-Whitted favorably and ends with some hints on how to make good observations.

Within a few days, the frequency of UFO reports hits an all-time high. USAF issues another long press release completely debunking UFOs, but it has no effect. (Sidney Shalett, "What You Can Believe about Flying Saucers, Part Two," *Saturday Evening Post*, May 7, 1949, pp. 36, 184–186; Ruppelt, p. 63; Swords 74)

1949, May 7 — 6:00 p.m. A Mr. and Mrs. Vaughn are sitting outside their home in St. Louis, Missouri, near the Mississippi River when they see a strange craft fly over their location. They describe it as being more triangular in shape than a "saucer." They both describe it as a ruddy brown or red color and it is shaped like a stingray, except without the typical stinging tail. It flies rapidly and seems to oscillate from side to side. They watch it for 45 seconds. Grudge investigators eventually write the sighting off as "probably" being an aircraft, despite the fact that no record is found of any commercial or military aircraft flying over their home at that time. (Sparks, p. 60; Jazz Shaw, "From the Project Blue Book Archives: A Few Lesser-Known UFO Cases from Yesteryear," The Debrief, March 7, 2023)

1949, May 9 — An article in *Time* magazine reports on the Air Force press release, remarking that "Spinners of yarns about flying saucers, including a score or so of Air Force pilots, stuck stoutly to their stories." ("Things That Go Whiz," *Time*, May 9, 1949; "Anatomy of a Hoax, Part Six," Saturday Night Uforia)

1949, May 9 — Editor Ken Purdy asks Maj. Donald E. Keyhoe to investigate the flying saucer mystery for *True* magazine, warning him to watch out for "fake tips" from the Pentagon. Keyhoe is initially skeptical, but after talking to his old friends Adm. Delmer S. Fahrney and Adm. Calvin M. Bolster, his opinion changes. (Keyhoe 1950, pp. 18–22, 41; Powell, *Keyhoe*, 64–67; Graff 57–58)

1949, May 9 — Naval Unit Commander Robert B. McLaughlin, with several other officers, witnesses a white object overhead during the launch of a WAC Corporal B rocket at White Sands Proving Ground, New Mexico. It disappears "in a blinding burst of speed to the west." (R. B. McLaughlin, [Letter to J. A. VanAllen], May 12, 1949; Sparks, p. 61)

1949, May 9 — 2:30 p.m. A professional flight engineer and former military pilot is relaxing in a lawn chair outside his home at 939 Benton Boulevard in Tucson, Arizona, when he sees two round objects pass directly overhead. Their shape could have been mistaken as balloons until they execute a turn in formation, banking in the process. At that point, he can clearly see that they are flat, and he estimates them to be roughly 25 feet in diameter. Also, he estimates that they are traveling between 750 and 1,000 miles per hour, faster than anything should have been flying at that time. They make another course correction and continue on until they pass out of sight over the nearby mountains. (Jazz Shaw, "From the Project Blue Book Archives: A Few Lesser-Known UFO Cases from Yesteryear," The Debrief, March 7, 2023)

1949, May 12 — Commander McLaughlin writes to his friend, atmospheric physicist James Van Allen, describing the Moore theodolite case and his own sighting a few days earlier. He thinks they must involve technology because they have been seen accelerating and maneuvering. (R. B. McLaughlin, [Letter to J. A. VanAllen], May 12, 1949)

1949, May 12 —9:30 p.m. Astronomer Donald H. Menzel leaves Holloman AFB on Highway 70 for Alamogordo, New Mexico. Shortly after noticing the star Antares, he sees another fuzzy object in the sky nearer to the horizon. A second object appears three degrees to the south. Determining that the objects are not Castor and Pollux or reflections, Menzel watches them another 4 minutes. Both objects vanish abruptly. (Sparks, p. 62; Donald H. Menzel, *Flying Saucers*, Harvard University, 1953, pp. 3–4, 99–100; J. Allen Hynek, "Vignettes of UFO History: Dr. Menzel Reports a UFO!" *IUR* 7, no. 6 (Nov./Dec. 1982): 11; Clark III 741–742; Clark IV 822–823)

1949, May 18 — George N. Raines leaves Washington, D.C., for four days to attend a meeting of the American Psychiatric Association. He says Forrestal seems "somewhat better," having regained 12 pounds.

1949, May 18 — Walter Winchell, in his "On Broadway" syndicated column, writes: "The *N.Y. World-Telegram* on Saturday [May 14] confirmed this reporter's exclusive report of several weeks before—which newspapermen have denied—about the Flying Saucers . . . Said the front-page piece in the *W-T*: 'Air Force people are convinced the flying disc is real. The clincher came when the air force got a picture recently of three discs flying formation over Stephenville, Newfoundland. [The July 10, 1947, hole-in-the-cloud case?] They outdistanced our fastest ships. Some air force men believe the discs are a new type flying machine utilizing gyroscopic principles' . . . At the time we added that the reality of the flying discs or saucers could not be denied truthfully." (Walter Winchell, "On Broadway," *Burlington (N.C.) Daily Times-News*, May 18, 1949, p. 4; "Anatomy of a Hoax, Part Two," Saturday Night Uforia)

1949, May 19 — Wright-Patterson Air Material Intelligence Commander Col. Howard M. McCoy forwards a copy of the Project Sign final report to the Research and Development Board, along with some appendices that later find their way into the Project Grudge final report. (Michael Hall and Wendy Connors, "The Research and Development Board: Unanswered Questions," *IUR* 26, no. 2 (Summer 2001): 10)

1949, May 19 — The Fourth Army's observation system near Killeen Base, Texas (without cameras, but with four 6-man observation posts equipped with instruments), is revealed to the intelligence community at one of its weekly

meetings. Two trucks serve as a roving Artillery Patrol observation post linked to the Killeen plotting center by radio. AFOSI Lt. Col. Doyle Rees has meanwhile set up a 24-hour visual observation post in the Sandia Mountains near Albuquerque, New Mexico. It is equipped with a wide-angle-lens camera fitted with a spectrographic grating. (Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 12; Loren E. Gross, *UFOs: A History: January–June 1949*, The Author, 1988, p. 86; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1949 January–June, Supplemental Notes*, The Author, 2000, pp. 86–87; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, pp. 43–44; Clark III 543; Clark IV 601)

1949, May 21 — 1:30 p.m. An F-82 is dispatched from Moses Lake AFB [now Grant County International Airport] in Washington State to intercept a UFO that is hovering in restricted air space over the Hanford Atomic Works at an altitude of 17,000–20,000 feet. The silvery disc is seen from the ground at Hanford and on radar. Before the F-82 can take off, the disc speeds away faster than a jet fighter. It disappears from ground radar and the F-82 cannot locate it. (NICAP, "Hanford AEC Plant / F-82/RV Case"; Sparks, p. 63; *Hynek UFO Report*, p. 141)

1949, May 22 — 1:45 a.m. At the National Naval Medical Center in Bethesda, Maryland, Forrestal is awake and refuses a sedative. Five minutes later, the Navy corpsman guarding him finds the room empty. Forrestal's body is found on a third-floor roof below the 16th-floor kitchen, No suicide note is found other than part of a translation of Sophocles's tragedy *Ajax* that he is copying. (Wikipedia, "James Forrestal"; J. C. Hawkins, *Betrayal at Bethesda: The Intertwined Fates of James Forrestal, Joseph McCarthy, and John F. Kennedy*, The Author, 2017; David Martin, *The Assassination of James Forrestal*, McCabe, 2019)

1949, May 24 — 5:00 p.m. Five witnesses (National Advisory Committee for Aeronautics' Ames Lab employees Don Heaphy, Gilbert Rivera and his wife, Mrs. Roy L. McBeth, and Mrs. William McBeth) on a fishing boat on the Rogue River, Oregon, near Elephant Rock, see a round, silvery object the size of a transport aircraft. It comes from the east, then turns southwest and leaves no exhaust trail. The disc appears flattened and has a wrinkled surface with a vertical stabilizer fin. The time of observation is less than 3 minutes. (NICAP, "The Rogue River Incident"; Sparks, p. 64; Bruce S. Maccabee, "Addendum: Sighting at Rogue River, Oregon, May 24, 1949," *Journal of UFO Studies*, orig. ser. 3 (1983): 45–52; Bruce Maccabee, *UFO FBI Connection*, Llewellyn, 2000, pp. 105–111; Bruce Maccabee, "An Assessment of the UFO Sighting at Rogue River, Oregon (May 24, 1949)," December 2009; Swords 83–84; Clark III 377; Clark IV 420)

1949, May 27 — 2:25 p.m. Pilot and businessman Joseph Shell, ferrying an SNJ trainer for North American Aviation from Red Bluff, California, to Burns, Oregon, sees 5–8 oval objects, twice as long as wide and one-fifth as thick, around Hart Mountain, Oregon. They fly in trail formation, with an interval equal to 3–4 times their length, except that the second and third are closer together. (NICAP, "Pilot Encounters 5–8 Egg-Shaped Metallic Objects"; Sparks, p. 65)

1949, May 31 — The Air Force Office of Special Investigations sends Project Grudge a copy of Rees's report on Kaplan's visit on April 28, the trip that USAF Intelligence had arranged to explore the possibility of a clandestine investigation separate from Grudge. Thus AMC learns of the conspiracy to keep it in the dark, but Rees fails to mention the involvement of USAF Intelligence. (Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 15)

1949, May 31 — The Navy review board, convened by Adm. Morton D. Willcutts, completes hearings on James Forrestal's death. The cause of death is remarkably inconclusive, and the investigation leaves many questions unanswered.

1949, Summer — The gouge is said to be still visible in the debris field near Corona, New Mexico. Mack Brazel, having found various scraps and bits for the past two years, mentions to someone in a bar in Corona that he has some material. The next day, a Capt. Armstrong and three others from Roswell Army Air Field supposedly confiscate the pieces.

1949, Summer — 4:00 p.m. The French Navy patrol boat *La Rusé* (formerly the USS *PC-472*) encounters a cigar-shaped bluish object about one mile away off Casablanca, Morocco. The crew watches it for 1 minute until it shoots toward the horizon and out of sight. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p, 36)

1949, Summer — 1:00 p.m. Rep. Albert J. Engel (R-Mich.) sees a UFO at Elsie, Michigan, with other witnesses, two of whom chase it in an airplane. The object speeds away. ("'Flying Saucer' Discussions Go On," *Reidsville (N.C.) Review*, April 5, 1950, p. 1)

1949, June 6 —9:05 p.m. Two observation posts at Killeen Base, Fort Hood, Texas, spot a hovering orange light. Lts. Virgil Williams and Marvin L. Jones are at one site and Lts. Bernard G. Raferty and Alfred H. Jones are at the other. When they triangulate its location, they find it is 3 miles south of one observation post and 4.5 miles south of the plotting center, hovering 5,280 feet in the air. It is 30–70 feet in diameter. Suddenly it starts moving in level

flight, then bursts into small particles. The duration is less than 3 minutes. This observation involves the first real-time triangulation of a UFO sighting. (Sparks, p. 66; Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 12; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, p. 43; Clark III 543, 1053; Clark IV 601, 1168)

1949, June 14 — 3:35 p.m. A crew of Navy engineers under Capt. Robert Bright McLaughlin is testing an Air Force V-2 rocket at White Sands Missile Range, New Mexico. When the V-2 attains a speed of 2,000 feet per second in its upward flight, it is joined by two smaller circular objects that pace it, one on each side. One then passes through the rocket's exhaust, joins the other, and together accelerate upwards leaving the V-2 behind. Five other missile observation crews also see the objects. (NICAP, "Two UFOs Pace V-2 Rocket"; Sparks, p. 66; Robert McLaughlin, "How Scientists Tracked a Flying Saucer," *True*, March 1950, pp. 25–27, 96–99; Swords 92–93)

1949, June 17 — An animator employed by the Lockheed Company sees a metallic disc approaching from the northeast in Glendale, California. It disappears to the northwest. (Keith Basterfield, "Which Aerospace Company Is Hiding a UAP Black Project?" Unidentified Anomalous Phenomena—Scientific Research, August 28, 2021)

1949, June 22 — Three women (one a schoolteacher, another a biologist working at Oak Ridge, Tennessee, and a third who is the wife of a member of the Security Division, AEC, Oak Ridge) observe an odd trio of "flying saucers" for about 15 minutes: "It was described as consisting of two identical rectangular-shaped objects which appeared to be coordinated in movement and which moved in wave-like motion. The third object was circular in shape and appeared to be in level flight between and above the two rectangular objects. The rectangular objects appeared to be bright metal on top but dark underneath, while the color of the circular object was the same as that of frosted glass. The 'flying saucer,' when last sighted, was in level flight and was flying in a northwesterly direction. The weather was clear with high cumulus clouds. The 'flying saucer' flew at speed of from 10 to 15 mph over an area just about the center of Oak Ridge." (Loren E. Gross, *UFOs, a History: 1949, January–June*, The Author, 1988, pp. 83–84)

1949, June 29 — 6:30 p.m. A former US Air Force tech sergeant observes three separate flights of three V-shaped or triangular objects from his front porch in Baltimore, Maryland. The objects veer sharply into a cloud at 2,500 feet altitude and then fly around it repeatedly. They have the ability to reverse their course 180° instantaneously. Through binoculars, they look like black, open boomerangs. More objects join them until there are 15–20, and he watches them for two hours. The formation moves from southeast to northeast and disappears. Fifteen other witness also see the display. (Marler 126–128)

1949, July 3 — 10:40 a.m. Aeronautical engineer Molt Taylor, airport manager at Longview, Washington, is preparing for an air show when someone points out an object in the sky to the northwest. He announces it over the PA system to the crowd of 150–200 observers, including pilots, who watch a metallic disc cross to the southeast with a falling-leaf motion. Estimated altitude is 30,000 feet at 300 mph, with the approximate size of 100 feet. A second object is seen at 10:49 a.m. for 2 minutes. A third sighting takes place at 11:25 a.m. An object approaches from the west at about the same altitude, oscillating at 48 per minute, and disappears into the sun. (NICAP, "Metallic Discus Object Observed by 150–200 Observers"; Sparks, p. 67; "Flying Discs Seen by Longview Flier," *Daily Olympian* (Wash.), July 1, 1949, p. 1; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 48–49; Loren E. Gross, *UFOs, a History: 1949, July–December*, The Author, 1988, p. 4; Loren E. Gross, *UFOs, a History: 1949, July–December: Supplemental Notes*, The Author, 2000, pp. 9–10; Swords 82–83)

1949, July 13 — Kaplan responds to a July 1 letter from Gen. Charles P. Cabell inquiring about his April visit to Los Alamos, New Mexico. He explains that he has deliberately waited two months to report because he wanted to have a cooling off period from the deep impression the New Mexico witnesses had on him. Moreover, he wants to see if the green fireballs are still reported (they are) before he recommends a full-scale instrumented program. He says that Norris Bradbury, the Los Alamos lab director, has urged that a classified scientific conference be held to discuss the phenomena. Kaplan suspects that the fireballs are an auroral phenomenon, but concedes that their horizontal motion and southern appearance are "difficult to explain." He recommends a photographic and spectrographic patrol that would stay on to look out for the fireballs. (Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 15; Clark III 544; Clark IV 602)

1949, July 14 — According to a dubious document acquired by Timothy S. Cooper, this is the date of an alleged meeting at Blair House, where President Truman proposes that the "know how" of any new technology acquired from crashed UFOs be shared with Canada and the UK. (CIA Office of Scientific Intelligence, "Information Report: Analysis of the Corona and Oscura Peak, NM Wreckage of Unidentified Lenticular Aerodyne Technology," October 30, 1950)

1949, July 24 — 12:03 p.m. Harry F. Clark, manager of a flying service, is flying a Piper PA-16 Clipper at 19,000 feet 10 miles northwest of Mountain Home, Idaho, when he sees a tight formation of 7 delta-shaped objects, 35–55 feet in diameter near his plane. They make a perfect and unbanked right turn 1,500 feet ahead of his plane, then they turn right again, passing the aircraft at about 450–500 mph. Clark's engine runs rough during the sighting, which lasts 10 minutes. After he lands, he finds all his spark plugs burned out. When the Air Force investigates the case, they request the spark plugs. (NICAP, "Piper Clipper Encounters Seven Delta-Shaped Objects"; Sparks, p. 68; Dave Johnson, "Pilot Spots Weird V-Shaped Objects Flying over Mountain Home Desert," Boise *Idaho Daily Statesman,* July 25, 1949, pp. 1–2; Curt Collins, "Triangular UFO Formation in Idaho, July 24, 1949," The Saucers That Time Forgot, October 12, 2023; Powell, *Scientist,* 84–85)

1949, July 24 — 8:30 p.m. An Air Force major and captain watch seven bluish-white lights pass over Fort Worth, Texas, in a V formation, moving rapidly from south to north. The distance between the lights does not vary during the 4–5 seconds they are visible. (Loren E. Gross, *UFOs, a History: 1949 July–December*, The Author, 1988, p. 13; Clark III 692; Clark IV 768)

1949, July 24 — A green fireball is seen falling close to Socorro, New Mexico. The next day, scientist William D. Crozier collects dust samples from the School of Mines campus at Socorro. The samples contain copper particles of unusually large size. (Sparks, p. 68; Clark III 543–544; Clark IV 601)

1949, August — George Adamski publishes *Pioneers of Space*, detailing his out-of-body visits to the Moon, Mars, and Venus. In private correspondence he later explains "how one may venture from one place to another, while his physical is in one place and he is in another. That is the way I have written this book. I actually have gone to the places I speak of." He writes that the inhabitants have embraced Cosmic Law and live in prosperity and peace. (George Adamski [ghost-written by Lucy McGinnis], *Pioneers of Space: A Trip to the Moon, Mars, and Venus,* Leonard-Freefield, 1949; "Palomar Mountain, 1940–1960: From Obscurity to World Fame," The Adamski Case, September 22, 2019; Eghigian, *After,* pp. 118–119)

1949, August — Actor, producer, and director Mikel Conrad, in promoting his soon-to-be-released film *The Flying Saucer,* claims that the movie contains actual footage of a spaceship recovered in Alaska by government agents. He produces a bogus FBI agent to "confirm" the story. The Air Force Office of Special Investigations interviews Conrad, who admits to perpetrating a publicity hoax. (Louella Parsons, "In Hollywood," *Washington (D.C.) Times-Herald,* September 21, 1949, p. 30; Jerome Clark, "A Catalog of Early Crash Claims," *IUR* 18, no. 4 (July/Aug. 1993): 16; Internet Movie Database, "The Flying Saucer"; Wade Williams III, "The Life and Times of Mikel Conrad, the Boy from Columbus Who Brought the First Flying Saucer to Hollywood," *Filmfax* 2, no. 2 (October 1987): 24–29, 48–51)

1949, August 8 — 11:30 p.m. Six airmen and tower operators at Medford Municipal Airport [now the Rogue Valley International–Medford Airport] in Oregon see 1–7 shiny objects traveling at variable speeds at an estimated altitude of 30,000 feet. They fly in formation for a while, then break off and return to formation again. Control tower operators using binoculars seem to distinguish wings on the objects. They remain visible until around 12:30 a.m. (NICAP, "Winged Objects Cavort over Airport")

1949, August 10 — USAF's Air Materiel Command issues a final 600-page report, "Unidentified Flying Objects—Project Grudge," Technical Report 102-AC-49/15-100, or "The Grudge Report," authored by Lt. Howard W. Smith and George W. Towles. Hynek's April analysis is included as an appendix. Based on 237 cases, Hynek finds that 32% can be explained astronomically. Others say 12% are balloons, 33% are other misidentifications, hoaxes, or insufficient information. That leaves 23% (55) classed as unknowns. Despite this, witnesses are mostly deluded, hysterical, lying, or crazy, and "further study along present lines would only confirm the findings presented herein." The report concludes there is little evidence to prove UFOs are real and do not represent a security threat. Sightings are explained as misinterpretations, "mild" mass hysteria, hoaxes, or psychopathology. It recommends that press releases be created to "aid in dispelling public apprehension." On the other hand, it suggests that military and government agencies interested in "psychological warfare" be informed of the findings. Appendix D is written by USAF Scientific Advisory Board member George E. Valley, who writes that extraterrestrial civilizations "might observe that on Earth we now have atomic bombs and are fast developing rockets. In view of the past history of mankind, they should be alarmed. We should, therefore, expect at this time above all to behold such visitations." Project Grudge enters a period of dormancy until July 1950. The report is classified Secret until August 1, 1952. (Sparks, p. 12; Lt. Howard W. Smith and George W. Towles, "Unidentified Flying Objects—Project Grudge," Air Materiel Command Technical Report 102-AC-49/15-100; *Hynek UFO Report,* p. 18; Clark II 932; Kate Dorsch, *Reliable Witnesses, Crackpot Science: UFO Investigations in Cold War America, 1947–1977,* dissertation, University of Pennsylvania, 2019, pp. 44–48; Graff 59–60; Eghigian, *After,* p. 60; Clark IV 1043

1949, August 10 — The National Military Establishment is renamed the Department of Defense to unify the Army, Navy, and Air Force under the Secretary of Defense. It establishes the Joint Chiefs of Staff. (Wikipedia, "United States Department of Defense")

1949, August 16 — A young girl in Wola Drzewiecka, Poland, sees a dark green object nearby like two bowls put together and about 5 feet in diameter. She walks right up to it and touches its metallic surface with her index finger, getting a mild electric vibration and making her fingertip turn red. The object begins rotating, then rises up and disappears to the south at an altitude of 50 feet. In the distance she sees another object that she says remained in the same spot for several days. (Poland 18–19)

1949, August 17 — Lincoln LaPaz submits the fifth of a series of reports on "anomalous luminous phenomena." He notes that "Many of the green fireballs now appearing descend in nearly vertical paths, whereas, in earlier months almost all of the green fireballs observed moved almost horizontally. There appears to be a concentration of New Mexico incidents near weekends, especially on Sunday and near the hour of 8:00." (Loren E. Gross, *UFOs, a History: 1949 July–December*, The Author, 1988, pp. 28–29; Clark III 544; Clark IV 602)

1949, August 17 — Due to a tip from Stewart Smith of Baltimore, Maryland, Air Force investigator Capt. Claudius Belk and the Maryland State Police discover some disc-shaped experimental aircraft in an abandoned tobacco barn in Glen Burnie, Maryland. At first, an Air Force spokesman states that they "could well be the prototype of what have been reported as flying saucers," but one day later that statement is retracted when they discover that the aircraft were built by inventor Jonathan E. Caldwell, who had abandoned the barn in 1941 and moved to Nevada. ("Air Force Disowns 'Flying Disk' Finds," *New York Times*, August 21, 1949, p. 39; Curt Collins, "The Other Air Force Captured Flying Saucer Retraction," The Saucers That Time Forgot, October 22, 2020)

1949, August 18 — LaPaz and USAF scientists meet with William D. Crozier to find out about his July 25 dust collection in Socorro, New Mexico. Crozier says he thinks the copper particles may have come from a campus building, although samples from the open country contain the same particles. LaPaz notes that copper is extremely rare in meteorites, although it might explain the yellow-green color of the fireballs. He suggests that further air and ground samples be taken in areas where the fireballs are seen. (Clark III 543–544; Clark IV 601–602)

1949, August 19 — Two prospectors, Buck Fitzgerald and Mase Garney, report that a flying saucer crashed near them in Death Valley, California. Two little men jump out and start running. The prospectors chase them over a sand dune, but lose them. ("'Little Men' in Flying Disc," *San Francisco Examiner*, August 20, 1949, p. 2; Patrick Gross, URECAT, August 22, 2006; Clark III 269; Clark IV 309)

1949, August 19 — 8:15–11:00 p.m. Rev. Gregory Miller, pastor of the St. Peter and Paul Church in Norwood, Ohio, has purchased from Army surplus an 8-million-candlepower searchlight for his church carnival. Sgt. Donald R. Berger, a ROTC student at the University of Cincinnati, is to operate it. During the festivities, Berger's sweeping searchlight suddenly flashes across a stationary circular object in the sky. Miller and others join in and observe. When Berger moves the searchlight away, the disc continues to glow. Hundreds of calls are received by *Cincinnati Post* and *Cincinnati Enquirer* offices regarding fireballs and comet-like objects all across the Cincinnati area this first night. The searchlight picks up the same or similar objects on nine further occasions, the last being on March 10, 1950. (NICAP, "The Ohio Searchlight Incident"; "Flying Saucer Reported Again," *Circleville (Ohio) Herald*, September 12, 1949, p. 1; "Soldier Reports 'Flying Saucer,'" *Logan (Ohio) Daily News*, September 12, 1949, p. 2; "Those Things Again," *Athens (Ohio) Messenger*, September 12, 1949, p. 1; "Oh, Look, Ma—That Thing's Here Again," *Lima (Ohio) News*, September 12, 1949, p. 1; Leo Hirtl, "The Seven Hills," *Cincinnati (Ohio) Post*, September 15, 1949, p. 8; "More Proof That 'Saucers' Exist," *CRIFO Orbit* 1, no. 5 (August 6, 1954): 1–2; Leonard H. Stringfield, *Inside Saucer Post…3-0 Blue*, The Author, 1957, pp. 73–78; Stringfield, *Situation Red*, Fawcett Crest, 1977, pp. 172–174; Patrick Gross, "The Norwood Searchlight Incident"; "The 1949 Norwood, Ohio, Searchlight UFO Incident," Eyes on Cinema YouTube channel, July 1, 2024)

1949, August 20 —10:45 p.m. Astronomer Clyde Tombaugh, his wife, and mother-in-law see a formation of rectangular bluish-green lights at Las Cruces, New Mexico, for about 3 seconds. (NICAP, "Tombaugh Observes UFO Formation"; Sparks, p. 70; H. B. Darrach Jr. and Robert Ginna, "Have We Visitors from Space?" *Life*, April 7, 1952, p. 89; Donald H. Menzel, *Flying Saucers*, 1953, pp. 36–38; "Dr. Clyde Tombaugh Provides Details on His Own Famous Sighting," *CSI News Letter*, no. 10 (December 15, 1957): 27; Donald Menzel and Lyle Boyd, *The World of Flying Saucers*, 1963, pp. 266–270; UFOEv, p. 53; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 59–60; Swords 81–82; "Las Cruces, NM Case of 4-20-1949 – Clyde Tombaugh," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; Clark III 1129–1130; Clark IV 1281–1282)

1949, August 29 — 7:00 a.m. The Soviet Union secretly conducts its first successful nuclear weapon test (First Lightning) at the Semipalatinsk Test Site in Kazakhstan. The design is very similar to the first US "Fat Man" plutonium bomb. The project is led by physicist Igor Kurchatov. (Wikipedia, "RDS-1")

1949, September 1 — Col. John M. Schweizer Jr., executive officer to the director of US Air Force intelligence, writes in a memo to the director, Maj. Gen. Millard Lewis: "reports that fall in the 'fireball' category will no longer be included in HQ Air Materiel Command and Directorate of Intelligence, HQ USAF, investigative activity on unidentified aerial incidents." AMC hands green fireball reports over to the USAF Cambridge Research Laboratory at Hanscom AFB in Bedford, Massachusetts. AFOIN rejects an Army request for further facilities to study the green fireballs from field locations. (Loren E. Gross, *UFOs, a History: 1949 July–December, Supplemental Notes*, The Author, 2000, pp. 30–31, 34–35; Clark III 543; Clark IV 601)

1949, September 14 — The Geophysical Sciences Branch of the Air Force Research and Development orders the new AMC commander Lt. Gen. Benjamin Chidlaw to have the Cambridge Research Laboratory in Massachusetts evaluate the New Mexico and Texas green fireball cases and consider the creation of an instrumented network. AMC is directed to send representatives from Boston to a meeting in New Mexico. (Lt. Col. John McK. Tucker, "Light Phenomena," September 14, 1949; Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 16; Clark III 544; Clark IV 602)

1949, September 14 — 9:30–10:00 p.m. Two residents of Lubbock, Texas, see 9 clusters of objects "similar to ducks flying in formation," bright silver and roughly round in shape. There are as many as 50 objects in all the formations except one. They seem to be traveling at 5,000 feet altitude, going north to south. Each light is visible for about 10 seconds, but it takes 30 minutes for all the objects to pass overhead. One witness is convinced the objects are ducks. (Clark III 692–693; Clark IV 768)

1949, September 26 — 6:30 p.m. Lester Wolfe and five others 5 miles southeast of Lexington, Nebraska, are threshing wheat when they see three objects coming from the general direction of the sun (southwest). As the objects move, they give off a dazzling brilliance. They maintain a level flight with two of the objects changing positions as they fly. The power of the illumination remains constant throughout the incident (no pulses or flashes). Once the objects reach a direction northwest of the observers, they make a smooth 90° turn straight upwards and climb rapidly out of sight. Dean Wolfe is a recent graduate of a two-year course in aeronautical design and thinks the objects look like domed discs when viewed face forward, but are more like stubby, wingless, tailless fuselages when seen from the side. About 5 miles away, Don, Minnie, Elmer and Irene Ballheim see two fast-moving objects flying in the distance at level flight before abruptly turning straight up and flying upward. This group of people does not know their distant neighbors. (NICAP, "90-Degree Turn Straight Up"; Swords 83–84)

1949, September 27 — 1:30 and 3:00 a.m. At least five observers at Sandia Base, New Mexico, see fireballs of various colors traveling either in an arc or in tangent to the Earth. (Sparks, p. 71; Francis Ridge, "The Nuclear Connection Project: The New Mexico Sightings," September 3, 2005)

1949, September or October — A Swiss Air Force officer sees a silvery disc 20 feet in diameter with jagged edges above Payerne, Vaud, Switzerland. He observes it flying at about 700 mph for 12 seconds. (Center for UFO Studies, [Payerne case file])

1949, Fall — A radar-tracking UFO case takes place at a key atomic base (probably Los Alamos, New Mexico). The base radar scope covers 200 miles of sky up to 100,000 feet. A legitimate radar contact tracks five apparently metallic objects at a great height moving south and crossing the radar scope in less than 4 minutes (an average of about 4,500 mph). (H. B. Darrach Jr. and Robert Ginna, "Have We Visitors from Space?" *Life*, April 7, 1952, p. 89)

1949, Fall — Night. Donald Bushnell and his wife Laura are traveling along a straight highway in New Mexico. Suddenly a disc about 50–60 feet across comes straight down the road toward them about 4 feet off the ground. It raises up a little before reaching the car and passes overhead. As it does so, his radio turns to static. (Jim Downing, "'Saucer' Unnerved Tulsan," *Tulsa (Okla.) Tribune*, December 10, 1957, p. 24; Schopick, p. 77)

1949, October — Alma Lawson of Los Angeles, California, claims she was a member of a scientific expedition that visited the crash site of a flying saucer in Mexico. A shepherd is said to have discovered the disk, which contained the burned bodies of six small men. Automobile dealer Ernest Gates claims he heard on the radio about a saucer crash with little men near Mexico City. Ray L. Dimmick of Los Angeles tells a similar story; at first he claims he inspected the craft himself on March 3, 1949, at a secret Mexico City military installation, but later says he was told the story. (Sam Petok, "Find Discs from Space in Mexico?" *Detroit (Mich.) Free Press*, October 31, 1949, pp. 1, 8; "Flying Saucer—with 2-Foot Pilot: That's Mr. Dimmick's Gimmick from Mexico," *Oakland (Calif.) Tribune*, March 10, 1950, p. 6; "Has the Air Force Secured 'Material Evidence'?" *Flying Saucer News-Service Research Bulletin*, no. 10 (September 20, 1955): 3–6)

1949, October 5 — Donald Keyhoe tells the press relations office at the Pentagon that he intends to publish an article in *True* that highlights the interplanetary hypothesis. They tell him that there are no security issues involved. (Powell, *Keyhoe*, 68)

1949, October 10 — 1:07 a.m. A bluish-green fireball is seen moving to the northeast at 45° above the horizon at Sandia Base, New Mexico. Duration is from 4 to 15 seconds. (Francis Ridge, "The Nuclear Connection Project: The New Mexico Sightings," September 3, 2005)

1949, October 11 — The Navy releases only a brief summary of its findings in the death of James Forrestal. The complete transcript is not released until 2004. (Ayn Rand Institute Watch, "The Willcutts Report on the Death of James Forrestal")

1949, October 11 — 10:45 a.m. USAF M/Sgt. Ralph M. Stevens, a tech aide in lower atmospheric research at Holloman AFB near Alamogordo, New Mexico, and Sgt. Marion H. Graves are at Ryan Site #4 tracking a balloon launch by theodolite when they spot a high-speed, round, white, dish-shaped object in the northwest. The object flies straight overhead and disappears at 60° elevation in the southeast. Its size is compared to that of a B-29 [141 feet long] at a range of 150,000 feet, or about 1/10 the size of the full moon. (NICAP, "High-Speed Dish-Shaped Object Tracked")

1949, October 12 — Columnist Frank Scully writes an article in *Variety* alleging that the US government has retrieved crashed spaceships in the southwestern desert. One that crashed in the Mojave Desert was 100 feet across and propelled by magnetism. The craft contained 16 small men, all dead and wearing clothes "similar to those of 1890" but of a "material unknown to us." (Frank Scully, "Scully's Scrapbook," *Variety*, October 12, 1949, p. 61; Clark III 595, 1044)

1949, October 12 — 11:15 a.m. S/Sgt Clifford B. Hart, a flight engineer, and two others at Holloman AFB near Alamogordo, New Mexico, observe a round, white, or aluminum-colored object moving across the sky from south to north. It then veers to the northeast where it disappears. Hart estimates the size of the object as comparable to a B-29 aircraft, with a speed of 1,500 mph at an estimated altitude of 35,000 feet. The object is in sight for 45–60 seconds. Other witnesses are aircraft mechanics S/Sgt J. D. Denning and S/Sgt Harry A. Boggs. (NICAP, "H. S. Object Observed by Flight Engineer and Mechanics")

1949, October 14 — At another conference in Los Alamos, New Mexico, attended by 16 representatives of AFOSI, AMC (Joseph Kaplan and Maj. Frederic C. E. Oder), Fourth Army, the FBI, AFSWP, and Los Alamos scientists (Edward Teller, George Gamow, and Stanislaw Ulam), the green fireballs are identified as probably atmospheric in origin, but more observational data is needed. LaPaz and Neef speak at length. Oder's Cambridge Research Laboratory at Hanscom AFB in Bedford, Massachusetts, is selected for a field project, under LaPaz's supervision. (Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 16; Good Above, pp. 266–267; Swords 81; Clark III 544; Clark IV 602)

1949, October 14 — 1:15 p.m. Harley C. Marshall, manager of public relations at Palomar Observatory in San Diego County, California, is driving away from the observatory when he sees a perfect "V of V's" formation of about 16–18 silver objects without tails or wings overhead traveling at high speed to the northwest and emitting a sound like jets. He stops and watches them disappear behind the cloud cover. Returning to the observatory, he phones electrician Benjamin B. Traxler, who at 1:20 p.m. sees one dark UFO traveling to the southwest. Marshall checks the Navy Electronics Laboratory Geiger counter on site and sees that the needle has jumped off the scale for several seconds. For the next 10 days, another 21 incidents of off-scale cosmic-ray detector incidents occur at scattered times, fitting a periodic 1.5-hour time schedule, a phenomenon not seen before or after, and unexplainable by equipment failure or radio interference from aircraft. Two representatives of the Office of Naval Research and two from the Naval Electronics Laboratory in Point Loma, California (Joseph P. Maxfield and Gene Luther Bloom), visit the observatory to investigate the readings, but not before they stop in at Alice Wells's Palomar Gardens Café on the way in. After George Adamski claims he has seen increased UFO activity in the area (including a sighting about the same time as another observation by Traxler on October 21), they ask him if he would send them any photos he might take with one of his telescopes. He gives them a copy of a telescopic photo he took in February 1949 with his 15-inch reflector. The Naval Electronics Lab later attributes the photo to "electric discharge which frequently occurs in cameras during film pulling in dry or cold climates." Several Navy aircraft of differing prop and jet types are flown near the observatory using radio, altimeter, and radars on October 21 and November 2 in an unsuccessful effort to trigger the Geiger counter. (NICAP, "Geiger Counters Detect UFO Presence"; Sparks, pp. 74–75; Maurice Weekley and George Adamski, "Flying Saucers As Astronomers See Them," *Fate* 3, no. 6 (September 1950): 56–59; Eric Herr, "George Adamski: An Historical Note," *Flying Saucer Review* 34, no. 3 (September 1989): 15; Colin Bennett, *Looking for Orthon*, Paraview, 2001, pp. 29–30; Swords 86–87; Clark III 38, 949–950; Clark IV 57, 1063–1064)

1949, October 23 — 7:15–10:45 p.m. Rev. Gregory Miller has set up his searchlight once again at St. Peter and Paul Church in Norwood, Ohio. Sgt. Berger turns on the light and picks up a large object in the beam. At about 10:00 p.m., the searchlight picks up two distinct groups of five triangular objects that seem to emerge from the main disc. They descend on the beam then turn out of it. The same performance is repeated 30 minutes later. About 50 persons, including newspaper reporters observe the objects. Miller takes several photographs and asks Sgt. Leo Davidson of the Norwood police department to film the display. He uses three rolls, 25 feet each, and a Hugo-Meyer F-19-3" camera with telephoto lens. Davidson also takes 10 still photographs of the large disc-shaped object that flies in and out of the searchlight beam, using a Speed-Graphic camera with a 14-inch Wallensach telephoto lens. Two of these are exceptional shots, showing both the parent object and the smaller group. These two pictures are last seen by Time-Life correspondent Harry Mayo, who has prepared a feature story for *Time*, which was to include them. But Mayo's story and Miller's photos were not used in *Time* or *Life* and, in spite of requests by Miller, these two photos are never returned. (Harry Mayo, "What Glows on Here? Norwood Muses," *Cincinnati Post*, April 6, 1950, p. 1; "More Proof That 'Saucers' Exist," *CRIFO Orbit* 1, no. 5 (August 6, 1954): 1–2; NICAP, "The Ohio Searchlight Incident"; Kenny Young, "Norwood and Project Grudge"; Patrick Gross, "The Norwood Searchlight Incident")

1949, November 3 — Joseph Kaplan brings the green fireball plan to the USAF Scientific Advisory Board at the Pentagon. By this time, he is convinced the fireballs are a rare type of meteor. But others are puzzled by the brightness, trajectories, and soundlessness, Kaplan says, "This high selectivity of direction seems to indicate that some group was trying to pinpoint Los Alamos with a new sort of weapon." (Clark III 544; Clark IV 602)

1949, November 3 — Karl Taylor Compton resigns as chairman of the Research and Development Board around the same time that Lawrence R. Hafstad succeeds Lloyd Berkner as executive secretary. (Michael Hall and Wendy Connors, "The Research and Development Board: Unanswered Questions," *IUR* 26, no. 2 (Summer 2001): 9)

1949, November 3 — 11:00 a.m. USAF Capt. William H. Donnelly is driving south about 2 miles north of Rosarito, Baja California, Mexico, with a friend when he sees four objects to the east at a high altitude. All are oval and a metallic white color. They are constantly changing formation, moving up and down, back and forth. The objects continue to fly south rapidly and move in a horizontal line and disappear from sight in 20–40 seconds. (Jan Aldrich)

1949, November 14 — 10:30 p.m. USNR Commander J. R. Bodler is in charge of a merchant vessel (possibly the USS *Hemminger*) in the Strait of Hormuz between the Persian Gulf and the Gulf of Oman. He observes a huge, pulsating submarine light wheel, some 1,000–1,500 feet in diameter, one mile from his ship. It is revolving around an ill-defined center with streaks of light like searchlight beams moving counterclockwise "like the spokes of a gigantic wheel." He thinks it is caused by natural phosphorescence, stimulated by some marine life. (J. R. Bodler, "An Unexplained Phenomenon of the Sea," *US Naval Institute Proceedings* 72 (January 1952): 66–67; Carl Feindt, "Report #63," waterufo.net; Dolan, USO1, 128–131)

1949, November 23 — Columnist Frank Scully writes a second column in *Variety* on a crashed saucer allegedly found in the Mojave Desert. Scientists supposedly retrieved a radio from it that "seemingly works on magnetic waves." Its dead crew are said to be from the planet Venus. (Frank Scully, "Scully's Scrapbook," *Variety*, November 23, 1949, p. 24)

1949, November 27 — 5:49 p.m. Civil Aeronautics Administration Chief Controller W. W. Jones watches a blue-white fireball moving 5°–7° per second over Kirtland Air Force Base, Albuquerque, New Mexico. (Francis Ridge, "The Nuclear Connection Project: The New Mexico Sightings," September 3, 2005)

1949, November 27 — 6:00 p.m. Kirtland AFB Deputy Base Commander Lt. Col. Charles E. Lancaster Jr. is driving near McIntosh, New Mexico, when he sees a green fireball descend near Albuquerque. (Sparks, p. 77)

1949, December — Capt. Bernard Baruch Jr. suggests to Gen. Hoyt Vandenberg that UFOs be added to JANAP 146 as required reporting subjects and that civilian pilots report UFO sightings according to military chains of command. (Swords 122)

1949, December 2–3 — The US government releases radioactive fission products at the Hanford Site plutonium production facility in eastern Washington in an operation called Green Run. The radioisotopes are supposed to be detected by US Air Force reconnaissance. Sources cite 5,500–12,000 curies of iodine-131 are released and an even greater amount of xenon-133. The radiation is distributed over 500,000 acres encompassing three small towns and causes the cessation of intentional radioactive releases at Hanford until 1962, when more experiments commence. There are some indications that many other tests are conducted in the 1940s prior to Green Run, although this is a particularly large test. Evidence suggests that filters to remove the iodine are disabled during the test. (Wikipedia, "Green Run")

1949, December 4 — 5:00 p.m. Mario Restier is returning home from his father's place in Volta Redonda, Rio de Janeiro, Brazil, when he notices a disc land about 32–50 feet from the road. He hears a voice telling him not to be afraid and asking if he wants to know what it's all about. Two beings about 5 feet 5 inches emerge from the UFO wearing togas and helmets. Restier asks them if they believe in God, and they answer, "God is one." Encouraged, he enters the craft where he is offered a trip, put in a tub filled with liquid, and taken on a trip to a city on another world. He is shown a screen that depicts human nature, ambitions, and violence. After about 6 hours, he is returned to the spot where he was abducted. Returning to his father's house, he finds it is April 14, 1950, and has lost nearly four months of earth time. (Brazil 23–24)

1949, December 20 — Following consideration by the Defense Department's Research and Development Board, Joseph Kaplan's green fireball project is approved by AMC. (Col. B. G. Holzman, "Light Phenomena," December 20, 1949; Brad Sparks and Jerome Clark, "The Southwestern Lights, Part Three," *IUR* 10, no. 5 (Sept./Oct. 1985): 16; Clark III 544; Clark IV 602)

1949, December 24 — The January 1950 issue of *True* magazine is published, with Donald Keyhoe's article, "The Flying Saucers Are Real." Keyhoe argues that the Air Force knows UFOs are real, alien, and covering up information from the public in order to avoid panic: "For the past 175 years, the planet Earth has been under systematic close-range examination by living, intelligent observers from another planet." The Air Force finds itself buried in letters, telegrams, and phone calls demanding information about flying saucers. ("Discs Called Craft of Another Planet," *St. Louis (Mo.) Post-Dispatch*, December 27, 1949, p. 10A; Donald E. Keyhoe, "The Flying Saucers Are Real," *True*, January 1950, pp. 11–13, 83–87; Clark III 458, 933; Powell, *Keyhoe*, 69–71; Graff 61–62; Clark IV 503, 1043)

1949, December 27 — USAF announces that Project Grudge is terminated. Its files are put into storage. The Grudge report is released again, reiterating that UFOs are the "result of (1) misinterpretations of various conventional objects; (2) a mild form of mass hysteria; or (3) hoaxes." (Clark III 932–933; Clark IV 1043)

1950

1950 — N. Meade Layne publishes *The Ether-Ship Mystery and Its Solution*, which identifies UFOs as emanating from the etheric world, which coexists with and interpenetrates ours. The etherians must lower their "vibrational" rate in order to enter our realm. UFOs are "thought-constructs" that can take many forms and densities. He considers the etherians benign. (Meade Layne, *The Ether-Ship Mystery and Its Solution*, Borderland Sciences Research Associates, 1950)

1950 — William Ortiz, a deaf-mute, claims to have the first of three close encounters (the others in 1969 and 1975) with large-eyed aliens in UFOs in Colombia. After the first two events, he finds his hearing temporarily restored. The entities communicate to him using hand signals. ("First Reported CEIII Alien Communicating with Deaf-Mute," *CUFOS Associate Newsletter* 3, no. 4 (Aug./Sept. 1982): 1, 3)

1950? — Sometime in the 1950s, a Soviet Navy officer serving at Sevastopol Naval Base on the Crimean Peninsula, Russia, observes and photographs a strange object ascending from behind a battle cruiser in the Black Sea. The officer later gives copy of the photo to his friend, Russian linguist Andrey Korsakov. (Paul Stonehill, "Amazing Soviet-Era UFO Sightings in and over Water Bodies," Rense.com, October 23, 2000; Dolan, USO1, 181–182)

1950, January — The Ground Observer Corps, an organization of civilians who watch the skies for enemy airplanes, is created by the US Air Defense Command. (Wikipedia, "Ground Observer Corps")

1950, January — On the Seattle, Washington, to Anchorage, Alaska, route, an air freighter is paced for five minutes by a UFO. When the pilots try to close in, the craft zooms away at terrific speed. Later, the airline head reports that intelligence officers quizzed the pilots for hours. "From their questions," he said, "I could tell they had a good idea of what the saucers are. One officer admitted they did, but he wouldn't say any more." (Keyhoe 1950, p. 9)

1950, January — Keyhoe meets with Gen. Sory Smith, director of public relations for the Air Force; Maj. Jesse E. Stay and Jack T. Shea, press officers; and Maj. Jere Boggs, Pentagon liaison to Project Grudge. Most of the interview involves questions for Boggs. Keyhoe is given two looseleaf notebooks with summaries of "Project Saucer" cases. His request to visit Wright-Patterson AFB in Ohio to look at the actual case files is turned down weeks later. (Keyhoe 1950, pp. 129–145; Powell, *Keyhoe*, 71–72)

1950, January 5 — Mikel Conrad's science-fiction film *The Flying Saucer* is released to US theaters. It is the first feature film to deal with UFOs, although it turns out that the saucers are the invention of an American scientist. (Wikipedia, "*The Flying Saucer*"; Internet Movie Database, "The Flying Saucer"; Bill Warren, *Keep Watching*

the Skies!, McFarland, 2010, pp. 292–293; "The Flying Saucer: Exclusive Full Sci-Fi Movie Premiere, English HD 2023," Watch Now: Sci-Fi & Fantasy YouTube channel, June 3, 2023)

1950, January 6 — Early morning. Manuel Zuniga blames a traffic accident on Kansas Avenue at 1st Street in Kansas City, Kansas, on a fireball or UFO that moves in front of his car, blinding him with its bright light. He is arrested for reckless driving and driving while intoxicated. ("Doubt over Crash Cause," *Kansas City (Mo.) Star*, January 6, 1950, p. 1)

1950, January 6 — Keyhoe appears on the radio program *We the People* with George F. Gorman, who has been pressured by the Air Force to only mention what is on his published report. (Keyhoe 1950, p. 168)

1950, January 7 — 10:15 p.m. The assistant maintenance officer at Holloman AFB is driving south of Corona, New Mexico, when he sees a green fireball. It descends at a 60° angle, then levels out and travels 10° east before dropping out of sight behind a mountain. When first seen, it is yellowish-white, changes to orange as it descends, then turns bright blue-green as it levels out and disappears. (NICAP, "January 7, 1950, Corona, NM, OSI Case 161"; Sparks, p. 78; Clark III 544; Clark IV 602)

1950, January 9 — *Time* magazine reports on rumors of crashed saucers and small humanoids in New Mexico. ("Visitors from Venus," *Time*, January 9, 1950)

1950, January 12 — The AF Directorate of Intelligence quietly cancels the special intelligence collection directives to various government agencies for reporting UFO incidents, though routine intelligence channels still require UFO reporting, per AFCIR-CC7, "Reporting of Information on Unconventional Aircraft." Cancellation is a follow-up to the widely announced closure of "Project Saucer." AFOIN Director Gen. Charles P. Cabell believes that in fact AMC is taking its UFO project underground by announcing the closure. Months later Cabell discovers that AMC Intelligence under Col. Harold E. Watson is not running a secret UFO investigation, and Cabell is forced to make up for AMC's negligence by conducting his own UFO investigations via his AF Intelligence staff. (Maj. Gen. C. P. Cabell, "Reporting of Information on Unconventional Aircraft," January 12, 1950; Swords 498)

1950, January 12 — 11:25 p.m. A B-29 aircraft is flying over the Gulf of Mexico (southwest of Florida) on a course of 260° when three objects are noted on the radar scope orbiting the B-29 from all quadrants. The objects are noticed by the radar operator, aircraft commander, navigator, and bombardier. One object is first sighted on a bearing of 330° traveling south. The objects travel across the scope in approximately 15–20 seconds on the 100-mile range setting. In a few minutes this object is joined by two others, which disappear in a few minutes. At short ranges the object is large and well-defined on the radar scope. The object goes off for about 100 miles, turns and comes in as if for an attack, passes through the center of the scope, and emerges on the other side. The estimated speed of the object is 2,500–3,000 mph. The one object remains on the radar scope for approximately 30 minutes, following the B-29 all the time. The radar operator switches ranges on the scope and picks up the object on the 20- and 50-mile settings. Twice the object comes to within 20 miles of the aircraft and then apparently has the ability to hover, because the movement on the radar scope ceases for 5–15 seconds. After altering course the object no longer appears, but the radar is jammed for approximately 10 minutes. The crew makes no visual sighting. (NICAP, "B-29 Radar Tracks Objects"; Sparks, p. 79; Clark III 58; Clark IV 78–79)

1950, January 16 — The AFOSI office at Offutt AFB in Omaha, Nebraska, sends a message that recounts stories from Denver, Colorado, about crashed saucers in the southwest. The metal allegedly "defied analysis." Bodies are said to be 3 feet tall. (Richard H. Hall, *Uninvited Guests*, Aurora, 1988, p. 74)

1950, January 16 — Tsuneo Saheki of the Osaka Planetarium in Japan sees an explosion on Mars, 60 miles high and 900 miles in diameter. Thomas Dobbins and William Sheehan investigate and find that this and other Martian flashes are likely caused by solar reflections on patches of ice crystals on the surface of Mars. ("'Terrific Explosion' on Mars Reported by Japanese Observers," *St. Louis Post-Dispatch*, January 27, 1950, p. 13; "Some Curious Objects: Meteoritic Perhaps," *The Strolling Astronomer* 4, no. 5 (May 1, 1950): 8–9; John J. O'Neill, "Mars Blast Puzzles Science," *Ottawa (Ont.) Citizen*, July 16, 1952, p. 30; Thomas Dobbins and William Sheehan, "Solving the Martian Flares Mystery," 2002)

1950, January 22 — 2:40 a.m. Navy patrol pilot Lieut. Smith makes a routine security flight out of Naval Air Station Kodiak [now Coast Guard Base Kodiak], Alaska. He obtains a radar reading on an object 20 miles north. It quickly vanishes. At 2:48, he tracks a similar object 10 miles southeast. Kodiak radar reports no known aircraft in the vicinity, but they are seeing the same track. At 3:00 a.m., the tug *USS Tillamook* is south of Kodiak when one of the men on deck sees a "very fast-moving red glow light, which appeared to be of exhaust nature." The object comes from the southeast, moves clockwise around Kodiak, and returns to the southeast. Another officer sees it for 30 seconds and describes it as a "large ball of orange fire." At 4:40 a.m., Lieut. Smith picks up another blip moving so fast that it leaves a trail on his screen. His crew sees the UFO close a five-mile gap in 10 seconds, an apparent speed of 1,800 mph. Witnesses report two orange lights that rotate around a common center. The object makes a sharp turn and heads directly towards Smith's plane. Smith considers this a threatening situation and

turns off his lights; the UFO flies by and disappears. At least 35 copies of Smith's report are sent to FBI, CIA, AFOSI, and the State Department. None are ever officially released or published. (NICAP, "USN P2V3 Patrol Plane and USS *Tillamook* Encounter"; Sparks, p. 80; ClearIntent, pp. 165–166; Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950,* The Author, 1983, pp. 11–13; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 4–12; Swords 90–91; Clark III 58, 997; Clark IV 79, 1110)

1950, January 24 —4:50 p.m. USAF Capt. G. B. Edwards and copilot Theron C. Fehrevach are flying a C-45 transport plane from Pope AFB [now Pope Field], Fayetteville, North Carolina, to Bolling AFB [now Joint Base Anacostia-Bolling], Washington, D.C. While at 5,000 feet near Blacksburg, Virginia, Fehrevach notices a dark, 200–250 foot in diameter, hemispherical parachute-shaped object above them about 5–10 miles away. A large black smoky region is below it, possibly obscuring the lower portion of a sphere. The UFO is darker than the 50% cloud cover and "easy to distinguish as not being cloud." The object moves smoothly without any noticeable turn radius. Edwards puts the C-45 into a climb to 7,000 feet so they are at the same altitude as the UFO and turns to head directly toward it. Army Courier Service passenger 1st Lt. John H. Van Santen is alerted by Fehrevach and also sees the object move right then left again, then they all see the object recede at high speed and disappear. About 90 seconds later the object reappears about 30°–45° to the right of their heading, then oscillates right to left. It moves horizontally to dead ahead again and disappears by receding in the distance at high speed. (NICAP, "C-25 Transport Crew Encounters Object"; Swords 91; Martin Shough and Wim van Utrecht, "Blackstone, Virginia, USA: January 24, 1950," September 30, 2015)

1950, Late January — 11:00 p.m. Romeo Ernesto Suarez is walking north between Rio Grande and San Sebastián, Tierra del Fuego, Argentina, on high ground about one-third of a mile from the ocean. Suddenly he hears a violent disturbance in the water. Several sheep nearby are startled and run away. A luminous oval object appears to emerge from the water a quarter-mile from shore, rises vertically, makes a 90° turn, and disappears toward the northwest. (Joseph M. Brill, "Are UFOs Operating from Underwater Bases off the Coast of Argentina?" *MUFON UFO Journal*, no. 130 (September 1979): 3, 4; Dolan, USO1, 137–138)

1950, Late January — Gen. Charles Cabell, possibly inspired by the Kodiak, Alaska, case, sends a letter to ATIC asking why Project Grudge has ended, because he never disbanded it. ATIC responds that Grudge is no longer a special project and that UFO reports will be processed through normal intelligence channels. (Ruppelt, pp. 69–70)

1950, January 26 — 4:00 p.m. Lt. Col. Lester F. Mathison, commanding officer of the 625th Aircraft and Warning Squadron at Elmendorf AFB [now Joint Base Elmendorf-Richardson], Anchorage, Alaska, notices three reddish objects above the cirrus cloud layer at 25,000–30,000 feet. They are moving to the north in a sightly curled trail fashion and disappear into some clouds. ("Extract: History of the 57th Fighter-Interceptor Wing, January 1–March 31, 1950 (Elmendorf AFB, Alaska)," *UFO Historical Revue*, no. 8 (February 2001): 7–8)

1950, January 31 — President Truman makes the decision to go forward with the development of a thermonuclear weapon that is orders of magnitude more destructive than the atomic bomb. (Wikipedia, "Thermonuclear weapon")

1950, February 1 — Truman issues Executive Order 10104 and creates the "Top Secret classification" designation. (US Office of the Federal Register, "Executive Order 10104")

1950, February 1 — A meteor-like object spewing smoke is seen by many people over Tucson, Arizona. The radio operator at Davis-Monthan AFB asks 1st Lieut. Roy L. Jones Jr. to investigate it in his B-29, but he cannot catch up with it. Edwin Francis Carpenter, head of the University of Arizona astronomy department, says he is certain the object is not a meteor. (Sparks, p. 81; Bob Campbell, "Flying Saucer over Tucson? B-29 Fails to Catch Object," *Tucson (Ariz.) Daily Citizen*, February 2, 1950, p. 1; Ace Bushnell, "Sky Mystery? Tucson People Differ Widely," *Tucson (Ariz.) Daily Citizen*, February 3, 1950, p. 1; Keyhoe 1950, pp. 10–12)

1950, February 2 — Lincoln LaPaz, citing the press of academic duties, withdraws from Project Twinkle. (Clark III 544; Clark IV 602)

1950, February 5 — 5:10 p.m. Four people at Falmouth Airport [now part of Frances Crane Wildlife Management Area north of Hatchville, Massachusetts] see two illuminated cylindrical objects in the western sky. The witnesses include Marvin R. Odom, owner of the airport, and Lt. Philip Foushee Jr. of Otis AFB [now Otis Air National Guard Base] near Mashpee. As the objects are maneuvering, a fireball drops from one. Five minutes later they both climb at high speed and disappear from view. (NICAP, "Feb. 5, 1950; Teaticket, Mass."; Sparks, p. 81; Hyannis (Mass.) *Cape Cod Standard Times*, February 6, 1950)

1950, February 8 — AFOSI Letter #85 is issued, directing Air Force personnel to relay UFO sightings to the Pentagon or AMC only if they are of "priority Counterintelligence interest." (Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950,* The Author, 1983, p. 18)

1950, mid-February — Romeo Ernesto Suarez again sees a UFO as he is walking between Rio Gallegos and Puerto Santa Cruz, Argentina. Four small luminous objects emerge vertically from the Atlantic Ocean, approach the coast in formation, then pass over toward the Andres Mountains. Joseph M. Brill, "Are UFOs Operating from Underwater Bases off the Coast of Argentina?" *MUFON UFO Journal*, no. 130 (September 1979): 3, 4; Dolan, USO1, 138)

1950, February 20 — LaPaz writes to Peter H. Wyckoff of the USAF Cambridge Research Laboratories in Massachusetts that a "fireball project" ought not be pursued because any objects that are not meteors are probably US test missiles. But he concedes he might be wrong and says in that case, "intensive, systematic investigation of these objects should not be delayed." (Clark III 544; Clark IV 602)

1950, February 21 — Project Twinkle, with the assistance of Land-Air, Inc., has set up its first operations post, manned by two observers who scan the sky over Holloman AFB, New Mexico, with theodolite, telescope, and camera. (Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, p. 45; Clark III 544, 1053; Clark IV 602, 1168)

1950, February 22 — Navy pilots and others see two glowing UFOs, confirmed by radar, above the Naval Air Station at Key West, Florida. A plane is sent to investigate but it is "hopelessly outdistanced." After hovering momentarily at a high altitude (50 miles?), they speed away. (Sparks, p. 81; Keyhoe 1950, p. 12)

1950, February 24 — 7:30 p.m. USAF Cpl. Lertis E. Stanfield and other Holloman AFB Photographic Branch project staff at an observation post at Datil, New Mexico, take five photos (using a Cineflex camera with 3-inch focal length lens) of a circular, luminous white object that changes to red and green. Its angular velocity is greater than 0.5°/min in azimuth calculated by Lincoln LaPaz. The object moves in a smooth straight-line motion from about 8:00–9:30 p.m. to the west, blinking red and green. It disappears at high altitude. (NICAP, "AFOSI Case 175; Datil Observation Post Photographs Object"; Sparks, p. 82)

1950, February 26 — 2:45 p.m. Three witnesses observe a bronze-colored object that looks like two cigarette ashtrays placed face to face over Vancouver, British Columbia. It slows down as it passes overhead and wobbles as it moves along. (Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, p. 64)

1950, February 27 — 7:00 a.m. A private pilot, Richard Lemmon, is flying a Fairchild PT-19 training aircraft at an altitude of 2,000 feet above Pinckneyville, Illinois, with his wife when he notices a strange object at 5,000 feet. He flies higher and sees a disk about 60 feet across and 10 feet thick. It tilts, turns, and moves away at about 150 mph. (NICAP, "Pilot Observes Discus from PT-19"; Sparks, p. 83; "Pilot Tells about Seeing Flying Disc," *DeKalb (Ill.) Daily Chronicle,* March 14, 1950, p. 2)

1950, March — James J. Rodgers is named a chief of Project Grudge. (Sparks, p. 14; Clark III 937; Clark IV 1047)

1950, March — Naval Commander Robert Bright McLaughlin, in charge of a team of Navy scientists at White Sands Proving Ground, New Mexico, writes about the Charles B. Moore sighting of April 24, 1949, in a *True* magazine article and speculates on saucer propulsion systems. McLaughlin writes that the saucers are indeed "spaceships from another planet, operated by animate, intelligent beings." The Navy, having gotten a preview of the article, removes him from White Sands and gives him an assignment at sea aboard the destroyer *USS Bristol.* (Robert B. McLaughlin, "How Scientists Tracked a Flying Saucer," *True,* March 1950, pp. 25–27, 96–99; Ruppelt, pp. 70–72; Swords 94–95; Powell, *Keyhoe,* 73; Graff 63)

1950, March — According to Karl T. Pflock, two CIA agents clandestinely visit Aztec, New Mexico, UFO crash storyteller Silas Newton and tell him that, although they know he is lying, they want him to continue spreading the tale as disinformation. The two agents later wind up involved in the Psychological Strategy Board created in 1951. (Kremlin 37–42)

1950, March 3 — At Selfridge AFB [now Selfridge Air National Guard Base] near Mount Clemens, Michigan, a lone UFO causes multiple radar trackings and is logged at speeds up to 1,500 mph. (NICAP, "Object Descends Vertically, Levels Out"; Sparks, p. 83; Patrick Gross, "Selfridge AFB, Michigan, March 3, 1950")

1950, March 8 — Mid-morning. TWA pilot Capt. W. H. Kerr reports to the CAA that he and two other TWA pilots (D. W. Miller and Malvern H. Rabeneck) are watching a UFO hovering at high altitude near Dayton, Ohio. The CAA has already received about 20 other reports about it from Vandalia, Ohio. ATIC control tower operators at Wright-Patterson AFB pick it up visually and on radar ("a good, solid target"). Four F-51 interceptors are sent up. They see it as a huge, round, metallic object, but clouds move in. The object climbs vertically out of sight at high speed. ATIC calls it the planet Venus, with radar returns from ice-laden clouds. (NICAP, "Three Aircraft Spot UFO / Radar Track at ATIC"; Ruppelt, pp. 72–75; UFOEv, p. 84; Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950,* The Author, 1983, pp. 32–37; Clark III 377; Clark IV 421)

1950, March 9 — Dusk. A publisher and others see a bright disc leaving a vapor trail near Orangeburg, South Carolina, for 15 minutes. It sinks out of sight. ("'Flying Saucer' Seen Here; Witnesses Say Real McCoy," *Orangeburg (S.C.) Times and Democrat,* March 10, 1950, p. 10; "Flying Objects Seen Again," *Florence (S.C.) Morning News*, March 10, 1950, p. 1; UFOEv, p. 149)

1950, March 9 — 7:45 p.m. A crew of three radar controllers at Selfridge Air Force Base [now Selfridge Air National Guard Base] near Mount Clemens, Michigan, is busy monitoring some F-80 Shooting Star jet aircraft of the 56th Fighter-Interceptor Group. 1st Lt. Francis E. Parker, 1st Lt. Frank K. Mattson, Sgt. McCarthy, and Cpl. Melton observe an intermittent target on the height range indicator (HRI) scope of the CPS-4 radar at 47,000 feet altitude and a distance of 70 miles. Further indications of what Parker describes as a well-defined, clear target like an aircraft are picked up with increasing regularity over the next 45–60 minutes. During this time, the target seems to stay in the area where the F-80s are flying, but 20,000 feet above them. The radar operators are monitoring two different systems—a CPS-5 radar operating on long-wave frequencies at 40,000 feet, and a CPS-4 radar operating on short-wave frequencies—and the target appears on both scopes simultaneously without fade. Despite being tasked to pay attention to the F-80s, the radar crew manages to record the range, azimuth, and altitude of the unidentified target for a solid 6 minutes. The speed varies from a hover in low-density air to nearly 1,500 mph, well in excess of the fastest operational jet at the time, and a climb rate of up to 7,000 feet per minute. After this, the target begins fading from the radarscope, although at a distance of 110 miles it appears to hover for two minutes before fading away. (NICAP, "The Selfridge AFB Incident"; Sparks, p. 84; *Hynek UFO Report*, pp. 123–125, 295–297; Martin L. Shough, "Radar and the UFO," *UFOs 1947–1987*, Fortean Tomes, 1987, pp. 215–217; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 12–20; Clark III 1047–1049; Clark IV 1162–1164)

1950, March 11 — 8:00 p.m. Constance Raguindin sees a "falling star" as she and her mother and two children are driving south of Salinas, California. When it comes closer and swoops toward the car at an altitude of 2,500 feet, she says it looks "like two dinner plates placed together." It performs a "loop the loop" maneuver and speeds away to the south. Hiram S. Don sees the object from a distance and describes it as egg-shaped. However, astronomer Olin J. Eggen at Lick Observatory says the object is probably a large meteor. ("Score Report Weird Saucer over Salinas," *Santa Ana (Calif.) Register*, March 12, 1950, pp. A1–A2; "Little Men Here Again, This Time over Salinas," *Los Angeles (Calif.) Times*, March 12, 1950, p. 2; "Astronomers Believe 'Flying Saucer' Was Meteor California Persons Saw," *Dunkirk (N.Y.) Evening Observer*, March 13, 1950, p. 14; "Scientist Says Flying Saucer Was Meteor," *St. Albans (Vt.) Daily Messenger*, March 13, 1950, p. 1; Project 1947, "UFO Reports, 1950")

1950, March 13 — Early morning. Army Signal Corps (Reserve) Maj. Taylor in Clarksburg, California, is sleeping when an odd droning noise wakes him up. Going outside, he notices the noise is coming from a brilliant light in the sky, one-half the size of the full moon. It sways for about 15 minutes, then moves away. (Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950,* The Author, 1983, p. 49)

1950, March 13 — Day. At the Central Airport in Mexico City, Mexico, Santiago Smith (weather observer for Mexicana de Aviación), J. de la Vega of the airport commander's office, and others see a total of four UFOs passing overhead. Smith observes one of them through a theodolite, describing it as the shape of a "half-moon." ("'Saucers' No Illusion: Hundreds See Shy Visitors," *Oakland (Calif.) Tribune*, March 14, 1950, p. 9; UFOEv, p. 44; Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950,* The Author, 1983, pp. 50–51)

1950, March 14 — The Atomic Energy Commission contacts the US Air Force to request files from Project Grudge during 1949. (Memorandum for Record, May 24, 1950)

1950, March 15 — An Air Force Captain Hall, flying in Guatemala, hears from other pilots at La Aurora Airport in Guatemala City that large, fast, and highly maneuverable objects have flown directly over the runway. The stories also appear in the local press. When Hall returns to Brookley Air Force Base [now Mobile Aeroplex at Brookley] in Mobile, Alabama, he is interrogated by a USAF intelligence officer and told: "Listen, there is no such thing as a flying saucer. You won't discuss them." (Swords 96)

1950, March 15 — 6:15 p.m. Craig Hunter, a medical doctor of Berkeley Springs, West Virginia, is stopped with car troubles on the side of the road between Clearfield and Penfield, Pennsylvania, when he hears a "hissing, whistling sound." He looks up and sees "a circular object" between 250 and 400 feet above him, traveling northwest. He says it is about 150 feet in circumference and composed of three concentric circles that are rotating, two of them apparently in opposite directions. At the center it is 15–20 feet thick and its speed is 60–70 mph. The noise suggests to him rocket propulsion. Suddenly it emits a fireball that is visible above the road for about 30 seconds. The object moves away to the west after he has it in sight for about 2.5 minutes. ("Doctor Sees Saucer,

Makes Rough Sketch," *Galveston (Tex.) Daily News*, March 18, 1950, pp. 1, 7; "Saucers or Imagination," *Galveston (Tex.) Daily News*, March 20, 1950, p. 4; "'Flying Saucer' Discussion Revives As Physician Retells Story of Seeing Object in Sky above Penfield Pike on March 15," *Clearfield (Pa.) Progress*, March 31, 1950, pp. 1, 3; Center for UFO Studies, HUMCAT Index 1950–1951, p. 6; Loren E. Gross, *UFOs: A History, Volume 5: January–March 1950*, The Author, 1983, pp 52–53)

1950, March 16 — The efforts of Kaplan and Maj. Oder to start a fireball research project come to fruition when the AF Geophysical Research Directorate headed by Oder issues a letter directive authorizing Project Twinkle. A $20,000 half-year contract is signed with Land-Air, Inc. which operates the phototheodolites at White Sands, New Mexico. Land-Air is to set up a 24-hour watch at a location in New Mexico to be specified by the Air Force, and the phototheodolite operators at White Sands are to film any unusual objects that happen to fly past. The official contract gives April 1 as the starting date.

1950, March 16 — Just before 12:00 noon. Chief Petty Officer Charles Lewis sees a flying disc streak across the sky at Naval Air Station Dallas [later Grand Prairie Armed Forces Reserve Complex] near Dallas, Texas. It buzzes a high-flying B-36. It hovers under the bomber for a moment, then flies off and disappears. NAS Commander Capt. Milton Adolphus Nation vouches for Lewis and says that the base tower operators had seen a UFO 10 days before. (NICAP, "Disc Buzzes B-36"; "'Flying Saucers' Sighted by Two," *Dallas Morning News*, March 18, 1950; Ruppelt, p. 75; Loren E. Gross, *UFOs: A History, Volume 5: January–March 1950*, The Author, 1983, pp 53–54)

1950, March 17 — 9:15 a.m.–noon. About a dozen shiny "saucer-like discs" appear above Farmington, New Mexico, zip around for 10 minutes then move off to the northeast. At 10:30 a.m., a red object is joined by three silvery discs and put on a "dogfight." At 11:15 a.m., a huge swarm comes into view. Former Army Engineer captain and *Farmington Times* business manager Clayton J. Boddy Jr. is walking on Broadway Avenue with two friends when he sees a large cluster of 50–100 objects moving at high speed. Private pilot John Eaton sees a red object at the center of the formation of silvery discs, which appear to be twice the size of a B-29 bomber. Some estimates say that the UFOs are seen by half the town's population, or about 3,000 people, for 20 minutes. Harold F. Thatcher, director of the Farmington branch of the US Soil Conservation Service, triangulates one disc's flight and calculates it is traveling at 1,000 mph. After maneuvering in formation, they speed away at a height of 15,000–20,000 feet. (NICAP, "The Farmington Invasion"; Sparks, p. 84; "Farmington 'Invaded' by Saucer Squadron," *Santa Fe New Mexican*, March 17, 1950, p. 1; "Huge 'Saucer' Armada Jolts Farmington," *Farmington (N.Mex.) Daily Times*, March 18, 1950, p. 1; "Hundreds at Farmington Report Large Force of Flying Saucers," *Albuquerque (N.Mex.) Journal*, March 18, pp. 1, 14; "Farmingtonites Crane to See More 'Saucers,'" *Santa Fe New Mexican*, March 19, 1950, p. 1; "Farmington Still Talks about Discs," *Albuquerque (N.Mex.) Journal*, March 19, 1950, p. 1; Ruppelt, pp. 75–76; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 47–48; Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950*, The Author, 1983, pp. 56–64; Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950: Supplemental Notes*, The Author, 2000, pp. 25–36; David Marler, "The Flying Saucer Invasion of 1950: Farmington, New Mexico and Beyond," David Marler, UFO Researcher, February 2018; Mike Easterling, "Farmington Reaches 70th Anniversary of Mass UFO Sighting," *Farmington (N.Mex.) Daily Times*, March 17, 2020; "The 1950 Farmington, New Mexico, UFO Armada Discussed by Eyewitnesses," Eyes on Cinema YouTube channel, December 5, 2023)

1950, March 18 — 8:40 a.m. Private pilot Robert Fisher, flying a Beechcraft Bonanza over Bradford, Illinois, encounters an oval object with a metallic sheen. He can still see the object when it flies behind some thin clouds. It moves away at an estimated speed of 600–1,000 mph. (UFOEv, p. 38)

1950, March 18 — The USAF publicly denies that UFOs are secret missiles or space-exploration devices. ("Air Force Issues Flat Denial That 'Flying Saucers' Exist," *Terre Haute (Ind.) Tribune*, March 18, 1950, p. 2; Keyhoe 1950, p. 13)

1950, March 18 — 6:30 p.m. At Lago Argentino, Santa Cruz, Argentina, rancher Wilfredo H. Arévalo watches a disc-shaped object land while a second object "like a gramophone record" hovers above. He walks to within 500 feet of the object, which is giving off a greenish-blue vapor and a smell of burning benzine. The disc has a cabin in the center in which he can see four tall men dressed in something like cellophane. They notice Arévalo and shine a searchlight at him. Flames shoot out from the base and the object rises with a faint hum, both objects disappearing to the west. Arévalo finds burnt grass. Possible newspaper hoax. (*La Razón* (Buenos Aires), April 13, 1950; *La Razón* (Buenos Aires), April 23, 1950; Cristián Vogt, *El misterio de los platos voladores*, Editorial La Mandrágora, 1956; Gordon Creighton, "The 'Humanoids' in Latin America," in Charles Bowen, ed., *The Humanoids*, special issue of *FSR*, Oct./Dec. 1966, pp. 30, 32; Roberto E. Banchs, *La fenomenología humanoide*

en la Argentina, Edition Especial of *UFO Press*, no. 4a (August 1977): 13; Roberto Banchs, "La peonza voladora de Lago Argentino," *Cuadernos de Ufologia*, ser. 2, no. 11 (1991): 14–18; Luis R. González, "Firsthumcat (Catálogo de los primeros casos de humanoides) 1° parte," *Cuadernos de Ufologia*, ser. 3, no. 31 (2005): 133–134; Clark III 267; Clark IV 307)

1950, March 20 — 9:26 p.m. Chicago and Southern Airlines Capt. Jack Adams and First Officer G. W. Anderson Jr., flying a DC-3 at 2,000 feet and heading west from Memphis, Tennessee, to Little Rock, Arkansas, see a circular disc 100 feet in diameter approximately over Hazen, Arkansas. In the top center of the object is an extremely bright light blinking at an estimated 3 flashes per second. The bottom of the object appears to have 9–12 symmetrical oval or circular portholes in a circle approximately 75% of the distance from the center to the outer edge. The object passes directly in front of the airliner at a distance of not more than 2,640 feet and approximately 1,000 feet higher than the airliner. They watch the object for 25–35 seconds. Adams estimates its speed is greater than 1,000 mph. (NICAP, "DC-3 Encounters 100′ Disc"; Sparks, p. 85; *Little Rock Arkansas Gazette*, July 24, 1955; Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950*, The Author, 1990, pp. 67–70; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1950 January–March, Supplemental Notes*, The Author, 2000, pp. 38–42; Tom Howell YouTube channel, "UFO from the 1950s," October 3, 2006; Swords 95–96)

1950, March 21 — 1:00–1:30 p.m. Sergeant Woods at Sandia Base, New Mexico, reports four round, silvery objects to the northeast. The objects appear to be more maneuverable than any known aircraft. The maneuvers are similar to those in dogfights involving two aircraft, but there seems to be no similarity to a conventional plane. They make right-angle turns and reverse direction instantaneously. The duration is about 30 minutes. Other witnesses at Sandia and Kirtland AFB report similar observations. (NICAP, "Base Personnel Sight Strange Objects"; Sparks, p. 85)

1950, March 22 — 11:00 a.m. Eleven sergeants in the 4925th Test Group watch a UFO northwest of Kirtland AFB, New Mexico. The shape is "similar to a flying wing air craft and tan in color, turning to brown around the edges." It first travels northwesterly at 25,000–30,000 feet, then turns north and disappears with a tremendous burst of speed. (NICAP, "Atomic Test Group Witnesses UFO in Broad Daylight"; Sparks, p. 85; Clark III 692; Clark IV 768)

1950, March 22 —FBI agent Guy L. Hottel writes to FBI headquarters about a rumor that three UFOs have crashed and are recovered in New Mexico. They are 50 feet in diameter and "each one was occupied by three bodies of human shape but only 3 feet tall, dressed in metallic cloth of a very fine texture. Each body was bandaged in a manner similar to the blackout suits used by speed flyers and test pilots." It goes on, "According to Mr. [redacted], informant, the saucers were found in New Mexico due to the fact that the Government had a very high-powered radar set-up in that area and it is believed the radar interferes with the controlling [sic] mechanism of the saucers." The original informant is probably Silas M. Newton or Leo GeBauer, or a newspaper source based on their claims. On March 25, 2013, the FBI issues a release saying that the Hottel memo was simply a second- or third-hand claim "that we never investigated. Some people believe the memo repeats a hoax that was circulating at that time, but the Bureau's files have no information to verify that theory." (Guy Hottel, "Flying Saucers, Information Concerning," March 22, 1950; Richard H. Hall, *Uninvited Guests*, Aurora, 1988, pp. 326–327; Good Above, p. 527; Jesse Emspak, "FBI Hottel Memo Reveals UFO Hoax," *International Business Times*, April 11, 2011; Robert L. Hastings, "The March 22, 1950 FBI Memo on Crashed Flying Saucers," UFOs & Nukes, April 18, 2011; Federal Bureau of Investigation, "UFOs and the Guy Hottel Memo," March 25, 2013; Eric Grundhauser, "The Most Viewed File in the FBI's Vault Has Nothing to Do with Roswell," Atlas Obscura, January 5, 2016; John Greenewald, "The 'Guy Hottel' Memo and the Crashed Flying Saucers of New Mexico, March 22, 1950," The Black Vault, August 8, 2022)

1950, March 26 — Vice-Admiral Louis Mountbatten, in a letter to his friend Charles Eade, editor of the London *Sunday Dispatch*, rejects the idea that flying saucers are secret weapons, admitting that "they do not come from our Earth…. Maybe it is the Shackletons or Scotts of Venus or Mars who are making their first exploration of our Earth." (UFOFiles2, p. 37)

1950, March 26 — Day. Bertram A. Totten, a clerk at the Library of Congress, is flying his plane at 5,000 feet over Fairfax County, Virginia, when he spots an aluminum-colored disc about 40 feet in diameter and 10 feet thick flying 1,000 feet below him. He dives toward it, but it speeds up into the overcast. It glints when the sun hits it, and he notices a vapor trail. (Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950*, The Author, 1983, pp. 79–80)

1950, March 26 — 4:00 p.m. Former First Lady Eleanor Roosevelt interviews airline pilots Jack Adams and G. W. Anderson about their March 20 UFO sighting on her NBC television program, *Today with Mrs. Roosevelt*. ("Anatomy of a Hoax, Part Five," Saturday Night Uforia)

1950, March 26 — 8:50 p.m. CAA Tower operator Marie Hislop Mathews and United Airlines employees Robert Higbee and Fred Hinkle see a brilliant light northeast of Hubbard Field [now Reno–Tahoe International Airport] outside Reno, Nevada. It hangs motionless for 5–6 minutes, then moves slowly across the sky with a green light on either side of it. It suddenly zooms upward into a cloud bank. ("Reno's Repute As Convention City May Be Interplanetary," *Reno Evening Gazette*, March 27, 1950, p. 11; UFOEv, pp. 44–45)

1950, March 27 — 10:30 a.m. USAF antiaircraft radar operator Cpl. Bolfango tracks a stationary target on radar over the Motobu Peninsula, Okinawa, Japan, at 18 miles range for 10 minutes at 13,000 feet. The object then moves on a 220° heading for 16.9 miles in 2 minutes (about 500 mph) to a point over a mountain, where it is lost. (NICAP, "Tracked Stationary Target at 18 Miles"; Sparks, p. 85)

1950, March 27 — Radio broadcaster Henry J. Taylor, on his syndicated radio program *Your Land and Mine*, announces the "wonderful news" that saucers are in fact US secret weapons, which will reassure the nation when the US Air Force confirms it. Within days, the story is twisted to specifically credit the Navy's alleged "top secret" project the Flying Flapjack Vought XF5U. The story is apparently disinformation planted by ex-Hollywood writers in the CIA Office of Policy Coordination's Political and Psychological Warfare staff headed by Joseph Bryan III, a future president and board chairman of NICAP. ("Radio Man Certain U.S. Is Owner of 'Flying Saucer' Missile Secret," *Miami (Fla.) News*, March 29, 1950, p. 9; "Flying Saucers: The Real Story: U.S. Built First One in 1942," *U.S. News and World Report*, April 7, 1950, pp. 13–15; NICAP, "1950 UFO Chronology"; Ruppelt, p. 22; Swords 97; Curt Collins, "1950 Disclosure: UFOs Are Made in the USA," The Saucers That Time Forgot, November 9, 2018)

1950, March 28 — In response to a request from J. Edgar Hoover to his aide D. Milton ("Mickey") Ladd on "just what are the facts re 'flying saucers,' agent S. Wesley Reynolds interviews Maj. Boggs and Lieut. Col. John V. Hearn Jr. of Air Force Intelligence, who tell him that most UFOs are misidentifications and weather balloons. (Loren E. Gross, *UFOs, a History: Volume 5, January–March 1950*, The Author, 1983, pp. 84–85; Swords 95)

1950, March 28 — Samuel Eaton Thompson is on his way home to Centralia, Washington, from Markham. He drives through a wooded area between Morton and Mineral and decides to stop to take a break. On foot, he comes upon a large, globe-shaped craft hovering above a clearing. Naked children with dark tans and blond hair are playing on steps that lead from an open door to the side of the UFO. Several naked adults—humanoid, attractive, and also deeply tanned—then appear at the ship's door. After realizing that Thompson means them no harm, they beckon him closer. The crew consists of 20 adults and 25 children, the latter from about 5–15 years of age. Thompson claims to have spent the next 40 hours with the humanoids. They are from Venus, he learns, and have stopped at Earth despite the fact that other Venusian saucers have been shot at by Earth-based military forces. The Venusians further claims that they are vegetarian and that they never grow ill. Thompson also claims the Venusians are naïve and childlike; they do not know who has built their flying saucers and seem to possess little to no curiosity. He goes back to get a camera and tries to take photos, but the object is too bright to appear on film. Thompson returns home on March 30. ("Centralian Tells Strange Tale of Visiting Venus Space Ship in Eastern Lewis County," *Centralia (Wash.) Daily Chronicle*, April 1, 1950; Elmer J. Olson, "Sam Thompson Saw 'Em—Saucer People," *Centralia (Wash.) Daily Chronicle*, March 25, 1967, p. 6; Jerome Clark, "The Coming of the Venusians," *Fate* 34, no. 1 (January 1981): 49–55; Nick Redfern, "A Sensational Saucer Saga!" Mysterious Universe, January 19, 2012; Clark III 1127–1129; Patrick Gross, URECAT, November 16, 2018; Clark IV 1275–1277)

1950, March 30–April 3 — Nine reports by fishermen and Coast Guard personnel of unidentified submarines off Eureka, California, spur the US Navy to send the USS *Colahan* on a five-day search to track down the source. ("Sub Search Ends," *Alameda (Calif.) Times Star*, April 3, 1950, pp. 1–2; "Submarines Contacted Off Shore, Officer Says," *Norfolk Virginian-Pilot*, April 4, 1950, pp. 1, 15; "Another Sub Sighted; Air Search Underway," *Riverside (Calif.) Daily Press*, April 11, 1950, p. 1; "Navy's 'Mysterious Object' Regarded As Possible Sub," *Escondido (Calif.) Daily Times-Advocate*, November 10, 1950, p. 1; Dolan, USO1, 136–137)

1950, March 31 — Syndicated columnist Drew Pearson publishes "Worried about Flying Saucers?" in which he sympathizes with the Air Force, which has to reply to groundless public excitement. His USAF contact has told him, "there ain't no such animal." Pentagon Public Relations Officer Maj. DeWitt Searles tells the press that all UFO cases are the result of misinterpretations, mass hysteria, and hoaxes: "As far as the Air Force goes, there's no such thing as a flying saucer." (Drew Pearson, "Worried about Flying Saucers?" *Honolulu Star-Bulletin*, March 31, 1950, p. 5; "Major Debunker of Flying Saucers, Keeps Saying, 'No, No, 1,000 Times No,'" *Rock Island (Ill.) Argus*, March 31, 1950, p. 18; Swords 96–99)

1950, Spring — Commander Augusto Vars Ortega of the Chilean Navy takes about 1,200 feet of color film of UFOs—one above the other, turning at tremendous speeds—in Antarctica. When NICAP asks the Chilean Embassy about

the film in 1956, it tells Keyhoe that the film is classified and not available. (Dan Lloyd, "Things Are Hotting Up in the Antarctic," *Flying Saucer Review* 11, no. 5 (Sept./Oct. 1965): 5)

1950, April — Daytime. While working on her lawn in Canby, Oregon, Ellen Jonerson glances over at her neighbor's yard and sees a 12-inch-tall man with his back turned to her. When he turns around, she sees that he has a heavily tanned face, is of stocky build, and wears overalls and a plaid shirt. There is a skullcap on his head. She dashes inside to call a friend, then runs outside again in time to see the figure "waddling" away. He walks under a parked car and disappears. Kenneth Arnold, who interviews her, is convinced of her sincerity. ("Some of Flying Saucers May Be Alive, Boise Flier Tells Science Fiction Fans," Portland *Oregonian*, September 6, 1950, p. 8; Center for UFO Studies, HUMCAT Index, 1950–1951, p. 2; Clark III 270; Clark IV 310)

1950, April 1 — Project Twinkle officially begins.

1950, April 4 — Presidential press secretary Charlie Ross states that Truman has conferred with his two top military advisers, Rear Adm. Robert Dennison and Brig. Gen. Robert B. Landry, and that they claim the US has no such technology. Furthermore, the Air Force study has concluded there are no such things as flying saucers. Caltech aeronautics professor Clark Blanchard Millikan agrees, saying: "If anyone should know about such a project, I should know—and I know of no development in the aircraft or guided missile field." ("Navy Flatly Denies Reports It Is Building Flying Saucers," *Oakland (Calif.) Tribune*, April 4, 1950, p. 9; "President Knows Nothing about 'Flying Saucers'," *Long Beach (Calif.) Press-Telegram*, April 4, 1950, p. B-7; "Truman, Top Brass Scoff at Wild Flying Saucer Rumors," *Los Angeles (Calif.) Daily News*, April 4, 1950, pp. 3, 41; "Deny 'Saucers' Are Secret Weapons," *Whittier (Calif.) News*, April 4, 1950, p. 1; "Two U.S. House Members Differ on Flying Saucer Situation," *Pomona (Calif.) Progress-Bulletin*, April 5, 1950, p. 2; "Reaction Claims Denied," *Whittier (Calif.) News*, April 7, 1950, p. 1; Swords 97–99)

1950, April 5 — Sen. Richard Russell Jr. (D-Ga.) states to the press that he is "completely baffled" by flying saucer reports that are made by many pilots who would not be fooled by hallucinations or clouds. Sen. Millard Tydings (D-Md.), chair of the Armed Services Committee, says he thinks saucers might be experimental US aircraft "in embryo stage." Rep. Albert J. Engel (R-Mich.) thinks the same. Sen. Kenneth S. Wherry (R-Nebr.) says the saucers are "like our foreign policy. It is in a state of confusion and no one seems to know what it is all about." ("Congress Split about Saucers," *Miami (Fla.) News*, April 5, 1950, pp. 1, 6; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, pp. 9–10; Swords 98)

1950, April 6 — 4:45 p.m. Lt. John J. Sevila, a pilot with the 131st Fighter Squadron, hears a sound like a flight of jet airplanes and rushes out of his house in Springfield, Massachusetts, to see them. Instead, he sees a perfectly circular object moving slowly westward at an altitude of 25,000 feet. He watches it for 5 minutes as it moves at a speed of 50–100 mph. When the sun hits it directly, it shines like a mirror. (*The Thunderbolt* 1, no. 12 (April 1950): 5; "Pilot Claims He Saw Flying Saucer in Maine," *Rutland (Vt.) Daily Herald*, April 14, 1950, p. 3; Loren E. Gross, *UFOs: A History, Volume 6, April–July 1950*, The Author, 1990, p. 9)

1950, April 7 — A CAA control tower operator at Logan Airport in Boston, Massachusetts, watches a blue light split into two lights that revolve around each other for 10 minutes. (Sparks, p. 86; *Hynek UFO Report*, pp. 65–68)

1950, April 7 — Newsman Edward R. Murrow produces the first extended TV commentary on UFOs, "The Case of the Flying Saucer" on CBS. He begins with the Kenneth Arnold case, mentions Muroc AFB cases and Mantell, and quotes both *True* magazine and Donald Menzel. Also on the show are Henry J. Taylor, engineer Charles H. Zimmerman, and Charlie Ross, as well as people on the street. ("Transcript of Ed Murrow–Kenneth Arnold Telephone Conversation," *CUFOS Associate Newsletter* 5, no. 1 (Feb./March 1984): 3; Edward R. Murrow, "The Case of the Flying Saucer [audio only]," Bryce Zabel YouTube channel, February 24, 2018)

1950, April 7 — *US News and World Report* comes out with a story on saucers that hints they are top-secret, jet-propelled Navy aircraft "that can outfly other planes." ("Flying Saucers—the Real Story: U.S. Built First One in 1942," *US News and World Report* 28, no. 14 (April 7, 1950): 13–15; Michael D. Swords, "Balloons, Missiles, and UFOs," *IUR* 29, no. 1 (Spring 2004): 18)

1950, April 7 — The National Security Council presents President Truman with Report 68 (NSC-68), a 56-page top secret policy paper that provides the "blueprint for the militarization of the Cold War." It advocates a large expansion in the military budget, the development of a hydrogen bomb, and increased military aid to US allies for the containment of Communist expansion. It essentially warns Truman that the US is losing the Cold War. Truman does not approve it until 1951. (Wikipedia, "NSC-68")

1950, April 8 — Paul Limerick, commander of the Veterans of Foreign Wars in Shelby, North Carolina, watches a round, aluminum-colored object with four other people for 2 minutes. It follows a horizontal course toward the southwest without making a sound, then shoots straight up and disappears. ("Shelby Folks Claim Flying Saucer Real," *Rocky Mount (N.C.) Telegram*, April 10, 1950, pp. 1, 6; Loren E. Gross, *UFOs, a History: Volume 6, April–July*

1950, The Author, 1990, p. 13; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, A History: 1950, April–July, Supplemental Notes*, The Author, 2000, p. 19)

1950, April 8 — 11:00 a.m. David Lightfoot, 12, and Charles Lightfoot, 9, are fishing in a creek northeast of Amarillo, Texas, when they see what looks like a balloon about 20° above the horizon, moving from the south. It passes only a few feet above them, circles slowly, and disappears over a small hill to the north. David runs after it and sees that it has landed and is a blue-gray disk about as large as an automobile tire and about 1.5 feet tall. The top of it is spinning quickly, but a central spindle is motionless. David follows after it and lunges at it, touching its hot and slick surface briefly, but it takes off straight up with a whistling noise, emitting a gas that turns the boy's arms red and raises some welts. Charles watches it take off from about 300 feet. David's arms heal up after some salve is applied. Possible hoax. ("So You Saw a Flying Disc? This Boy Touched One," *Amarillo (Tex.) Sunday News-Globe*, April 9, 1950, pp. 1, 27; Keyhoe, *FS from OS*, p. 114; C. W. Fitch, "Monitoring and Scanning Discs," *APRO Bulletin*, January 1963, p. 5; Olsen, sec. 3, pp. 3–4; Loren E. Gross, *UFOs, A History: Volume 6, April–July 1950*, The Author, 1990, p. 14; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, A History: 1950, April–July, Supplemental Notes*, The Author, 2000, pp. 20–25; "The Red Spray Case and Scientific Paradigms | Ufos # 3: April 21, 2024," Ufo Sunset Youtube channel, April 21, 2024)

1950, April 10 — 7:00 p.m. Several University of California, Berkeley, graduate students, including Garniss H. Curtis, Robert Scott Creely, and Louis I. Briggs, watch a bright light moving against the wind at about 10–15 mph at 1,500 feet altitude about 3–4 miles away from Berkeley, California, for two hours. It turns slowly to the south then turns around and heads slowly back. Four high school students in Monterey, California, see a gleaming object over San Francisco in the early afternoon. (NICAP case file; "Saucer Visits San Francisco, Schoolboys Say," *Los Angeles Times*, April 12, 1950, p. 17)

1950, April 12 — Nine transient dots of light in a line turn up on a photographic plate image in the Palomar Sky Survey. They are not seen on plates in the identical part of the sky 30 years later, 6 days later, or 30 minutes earlier. The dots are discovered in 2021 by Beatriz Villarroel, a postdoctoral researcher at the Nordic Institute of Theoretical Physics, in 2021. She rules out astrophysical explanations, passing airplanes, asteroids, and other known light sources as well as contamination caused by nuclear fallout. (Beatriz Villarroel, et al., "Exploring Nine Simultaneously Occurring Transients on April 12th 1950," *Scientific Reports* 11, no. 12794 (June 17, 2021); Beatriz Villarroel and Geoff Marcy, "A New Era of Optical SETI: The Search for Artificial Objects of Non-Human Origin," The Debrief, February 20, 2023; "Astronomical Transients," *Fortean Times* 442 (March 2024): 24–25)

1950, April 14 — RAND Corporation writer Jean M. Hungerford writes a 32-page research memorandum for the US Air Force titled "The Exploitation of Superstitions for Purposes of Psychological Warfare." She uses recent examples of religious miracles that were used in Western propaganda, as well as horoscopes, chain letters, and folklore. (Jean M. Hungerford, "The Exploitation of Superstitions for Purposes of Psychological Warfare," USAF Project Rand Research Memorandum, RM-35, April 14, 1950)

1950, April 17 — *Newsweek* publishes an article, "Flying Saucers Again," on crashed saucers. ("Flying Saucers Again," *Newsweek*, April 17, 1950, p. 29)

1950, April 17 — More than 15 people report seeing a UFO for 20 minutes at 2,000 feet on the eastern horizon at Los Alamos, New Mexico. One scientist watches the object through a telescope and says it looks flat, circular, metallic, and roughly 9 feet in diameter. It moves faster than any conventional aircraft. (Sparks, p. 86; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, p. 26)

1950, April 17 — 8:15 p.m. Two high school students, Joseph Dumas and Edward Brogan, are driving along Breckwood Boulevard in Springfield, Massachusetts, when they see a red object approach. Dumas pulls his car to the side to let it pass. It seems to be in two parts, and it is moving up and down and making a high-pitched whistling noise. It passes them at about 100 feet away, then goes straight up and disappears. ("Saucers Fly Tandem Now," *Springfield (Mass.) Morning Union*, April 18, 1950, p. 25; Project 1947, "UFO Reports, 1950")

1950, April 24 — 10:00 p.m. Bruno Facchini steps outside his house on the outskirts of Abbiate Guazzone, Varese, Italy, and notices something flashing near a power line. He goes to investigate and encounters a landed disc with an open door and steps leading down. Three or four men in diving suits and helmets are inside. One seems to be welding a pipe. Facchini speaks to them, but they respond with growling sounds. One points a small "camera" at him that emits a beam that knocks him over. Facchini lies still while the repairs are completed, and the UFO takes off. (Pino Carminati Ghidelli, "Un Diaco è Atterrato," *Notiziario UFO*, no. 37 (Jan./Feb. 1971): 19–22; Antonio Giudici, "The Case of Bruno Facchini," *Flying Saucer Review* 20, no. 6 (April 1975): 30–32; Ezio Barnardini, "Facchini: Un CE3 Rivisitato," *Notiziario UFO*, no. 104 (March 1985/Jan. 1986): 4–7; Clark III 267; Marcus Lowth, "Bruno Facchini's Extraterrestrial Encounter in Varese, Italy," UFO Insight, September 5, 2020; 1Pinotti 30–40; Clark IV 307; Patrick Gross, "Abbiate Guazzone, Italy, April 24, 1950")

1950, April 25 — Early morning. Military security patrols at the deactivated Dugway Proving Ground in western Utah view a series of unusual lights and objects moving above an ammunition storage area. One object is "surrounded by an aura of spears of light jutting diagonally from the main body." (Loren E. Gross, *UFOs, a History, Volume 6: April–July 1950*, The Author, 1990, p. 34)

1950, April 25 — 3:00 p.m. Enrique Hausmann Muller takes a film of a bright, circular UFO with rays of flame spinning off its edge in a pinwheel fashion in Montuïri, Majorca, Balearic Islands, Spain. Probable hoax. (UFOEv, p. 88; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, p. 32; Matías Morey Ripoll, "El Caso Hausmann: Una Aproximación desde Ibiza," UFO Fotocat Blog, September 20, 2019; Centro Ufologico Nazionale, [Hausmann photo])

1950, April 27 — While preparing for an MX-776A Shrike air-to-ground missile test at White Sands Proving Ground, New Mexico, Charles Riggs, a member of the Project Twinkle cinetheodolite camera crew supplied by Land-Air Inc., sees, tracks, and manages to film four high-flying objects streaking across the sky. Another station also tracks the objects. The photos show only a smudgy dark object, but the triangulation results in a calculation by mathematician Wilbur L. Mitchell and Capt. Perry Bryant of the objects' size as 30 feet in diameter and 150,000 feet in altitude. (NICAP, "Cinetheodolite Film Taken by Tracking Station"; Sparks, p. 88; Ruppelt, p. 88; Good Above, pp. 354–355; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, pp. 35–37; Bruce Maccabee, "The White Sands Films," *IUR* 21, no. 1 (Spring 1996): 22–25; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, p. 44; Clark III 544; Clark IV 602)

1950, April 27 — 8:25 p.m. TWA Flight 117 pilot Capt. Robert Adickes and Flight Officer Robert F. Manning are flying near Goshen, Indiana, when they see a bright-red disc-shaped UFO behind their DC-3. It overtakes the plane in about 2 minutes. Stewardess Gloria Henshaw and 11 passengers (including Boeing engineers C. H. Jenkins and Dean C. Bourland and executives E. J. Fitzgerald and S. N. Miller) also see the object. It veers off at 400 mph, drops down to 1,500 feet, and disappears. (NICAP, "Adickes TWA DC-3 Case"; Sparks, p. 89; "Two TWA Pilots See Flying Disc in Indiana," Denver *Rocky Mountain News,* April 29, 1950, p. 13; Donald E. Keyhoe, "Flight 117 and the Flying Saucer," *True,* August 1950, pp. 24–25, 75–79; Keyhoe, *FS from OS*, pp. 145–148; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects,* Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 46–47; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, pp. 36–38)

1950, May 5 — 11:30 p.m. Capt. Marcellus D. O'Sullivan, 1Lt. William J. Reisinger, and three enlisted men of the 625th Aircraft and Warning Squadron at Elmendorf AFB [now Joint Base Elmendorf-Richardson], Anchorage, Alaska, see a reddish-orange object hovering in the sky for 5 minutes. It puts on a burst of speed and disappears over the horizon. ("From History: 57th Fighter Interceptor Wing (Alaska), January–June 1950," *UFO Historical Revue,* no. 5 (July 1999): 8)

1950, May 11 —7:30 p.m. Evelyn Trent, who lives on a farm nine miles from McMinnville, Oregon [near Sheridan, Oregon], is walking back to her farmhouse after feeding rabbits. Before reaching the house, she sees a slow-moving, metallic disk-shaped object heading in her direction from the northeast. She yells for her husband Paul, who is inside the house; he comes out and also sees the object. After a short time, he goes back inside to get a camera and manages to take two photos of the object before it speeds away to the west. Paul Trent's father briefly sees the object before it flies away. The Trents assume they have seen some exotic military aircraft. They do not develop the film in the camera until they use it up and show the photos only to a few friends. Eventually it reaches the cover of *Life* magazine, but the Trents show no desire to make any money from the photos. Although the Colorado project initially thinks the photos seem genuine, three Interface Pilote pour l'Analyse de Clichés d'OVNIs researchers in 2013–2015 claim to find evidence of a model suspended from a string. Researcher Brad Sparks finds major mathematical and scientific errors in IPACO's work. (Wikipedia, "McMinnville UFO Photographs"; NICAP, "Trent / McMinnville Photos"; Sparks, p. 90; "At Long Last—Authentic Photographs of Flying Saucer?" *McMinnville (Oreg.) Telephone-Register,* June 8, 1950, p. 1; "'Disc Picture' published in McMinnville Paper," *Salem (Oreg.) Statesman Journal,* June 9, 1950, p. 1; "McMinnville Farmer, Wife See 'Saucer,' Display Photographs to Prove Claim," Portland *Oregonian,* June 10, 1950, p. 7; "Farmer Trent's Flying Saucer," *Life,* June 26, 1950, p. 29; Condon, pp. 396–407; Bruce S. McMinnville UFO and the Trent's Photos," Edge of Reality YouTube channel, December 7, 2024; Clark IV 799–803)

1950, May 15 — Afternoon. Architect Enrique Carotenuto Bossa is driving in an isolated region in Bahía Blanca Partido (possibly between Macachín and Estación Hidalgo Ferrocarril Sarmiento), La Pampa, Argentina, when he sees a metallic disc resting on the ground to the left of the highway. He stops the car to investigate, approaches it, and sees an open door in its side. He goes inside and sees a "curved divan with three seats, two of which were occupied by small beings covered from head to foot (except for an opening for the face (in a kind of tight-fitting overall of a brown color." The bodies are about 4 feet tall, and their faces seem charred or burnt. In front of them is a screen with "rays playing on it," and on top of the screen is a rotating globe. The engineer runs out and drives back to his hotel. He returns the next day with two companions and finds only an ash heap. But they look up and see three UFOs—one a cigar-shaped object and two discs, hovering above them at 1,800 feet. The discs merge with the cigar and speed away. (*El Universal* (Caracas, Venezuela), May 7, 1955; "Man Enters Grounded Disc," *APRO Bulletin*, August 1955, pp. 1–3; Willy Smith, "The Curious Case of the Argentine Crashed Saucer," *IUR* 11, no. 1 (Jan./Feb. 1986): 18–19; Roberto E. Banchs and Richard W. Heiden, "Crash Landing in the Pampas," *IUR* 24, no. 2 (Summer 1999): 4–10, 30; Richard W. Heiden, "Bossa Revisited," *IUR* 28, no. 3 (Fall 2003): 28; Roberto Banchs, "General Acha (LP): Un Accidentado Aterrizaje (Primera Parte)," Marcianitos Verdes, July 4, 2009; Clark III 327–328; Clark IV 364)

1950, May 20 — 12:15 p.m. Meteorologist Seymour L. Hess is strolling the grounds of Lowell Observatory in Flagstaff, Arizona, when he notices a round, gray-colored object approaching from the southeast at about 12,000 feet altitude. He follows it with a 4x spyglass as it passes in front of a small cumulus cloud. Hess estimates it is about 4 feet in diameter and moving about 100 mph. ("Astronomer, Pilots Catch Sight of Discs," Salem *Oregon Statesman*, May 23, 1950, p. 1; UFOEv, p. 3; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 61–62; Condon, pp. 245–248; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs: A History, 1950 April–July, Supplemental Notes*, The Author, 2000, p. 47; Clark III 376; Clark IV 420)

1950, May 21 — A second Gallup poll on UFOs is released, showing that 5% of respondents think "these flying saucers" are "comets, shooting stars, something from another planet." (Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, pp. 48–49; Robert J. Durant, "Evolution of Public Opinion on UFOs," *IUR* 18, no. 6 (Nov./Dec. 1993): 10–11)

1950, May 21 — 7:30 a.m. Felix Zanon, 60, of Montrose, Colorado, sees a huge round object flashing in the sun. As the object hovers, he summons his wife Pearl and his son Billy from the house to take a look with him. As the three watch, a second object approaches and joins next to the first object. After a while, both objects leave together heading north toward Cerro Summit before altering course and heading in an eastern direction before vanishing. Other witnesses claim to see the objects. ("See Huge Silver Discs," *Pottsville (Pa.) Republican and Herald*, May 22, 1950, p. 5; "Rancher Reports Seeing Flying Discs," *Lexington (Ky.) Herald*, May 22, 1950, p. 10; "Montrose," *Grand Junction (Colo.) Daily Sentinel*, May 23, 1950, p. 6; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, p. 48; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs: A History, 1950 April–July, Supplemental Notes*, The Author, 2000, p. 47)

1950, May 21 — During Armed Forces Day at Randolph Air Force Base near San Antonio, Texas, the loudspeakers blare out that the air show then in progress will have a "top secret finale." It is announced that "real flying saucers would make an appearance!" In an attempt at humor, 30,000 paper plates are dumped over the crowd from Air Force cargo planes during a final flyby. They are stamped with "Souvenir, Armed Forces Day. Flying Saucer. Randolph Air Force Base, May 21, 1950." ("'Flying Saucers' Cascade on Crowd at Air Show," *New York Times*, May 22, 1950, p. 8; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, p. 49; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, A History: 1950, April–July, Supplemental Notes*, The Author, 2000, p. 46)

1950, May 21 — 3:50 p.m. T/Sgt Edward Eles, Earl DuQuoin, and four other airmen of the 187th Fighter Squadron of the Wyoming National Guard are on the airfield at the Municipal Airport in Cheyenne, Wyoming, when they see a V-

shaped formation of four round, pure-white discs flying in a northerly direction. In a matter of seconds, the objects change formation and make a sharp right-angle turn, flying single file, and speed out of sight. (Cheyenne *Wyoming State Tribune,* May 22, 1950, p. 1; "Astronomer, Pilots Catch Sight of Discs," Salem *Oregon Statesman,* May 23, 1950, p. 1)

1950, May 24 — The request by the Atomic Energy Commission for Project Grudge records is referred to the US Air Force Headquarters and the final Grudge report is forwarded to AEC. (Memorandum for the Record, May 24, 1950)

1950, May 24 — During an MX-674 Tarzon controllable vertical bomb test at Holloman AFB, New Mexico, Floyd Fannon and other USAF crew members see eight unidentified objects. They separately track and film two of the objects down the North American Aviation missile firing range. Project Twinkle cinetheodolite station P-8 films one object to the northeast for 6 frames (1.0 sec) moving uniformly to the south. Cinetheodolite station P-10, located 5.7 miles down range to the north from P-8 and 7 feet higher, films another object, hence no triangulation is possible. Analysts estimate that the objects were higher than 40,000 feet, traveling more than 2,000 mph, and over 300 feet in diameter. (NICAP, "Cinetheodolite Film Taken by Tracking Station"; Sparks, p. 91; Ruppelt, p. 89; Good Above, pp. 354–355; Bruce Maccabee, "The White Sands Films," *IUR* 21, no. 1 (Spring 1996): 22–25; Bruce Maccabee, *UFO FBI Connection,* Llewellyn, 2000, pp. 143, 150–151; Clark III 544; Clark IV 602)

1950, May 25 — Lt. Col. Doyle Rees of the USAF Office of Special Investigations writes a confidential memo to Brig. Gen. Joseph F. Carroll, Director of Special Investigations. In part, it states: "In a liaison meeting with other military and government intelligence and investigative agencies in December 1948, it was determined that the frequency of unexplained aerial phenomena in the New Mexico area was such that an organized plan of reporting these observations should be undertaken. The organization and physical location of units of this District were most suitable for collecting these data, therefore, since December 1948, this District has assumed the responsibility for collecting and reporting basic information with respect to aerial phenomena in this general area." (NICAP, "Summary of Observations of Aerial Phenomena, New Mexico Area, Dec 1949 to May 1950")

1950, May 29 — 9:20 p.m. Capt. Willis T. Sperry, copilot Bill Gates, flight engineer Robert Arnholt, a stewardess, and several passengers on an American Airlines DC-6 airliner headed southwest out of Washington, D.C., en route to Nashville, Tennessee, are flying at 7,500 feet at 250 mph. About 7 miles west of Mount Vernon, Virginia, Gates alerts Sperry to a bright blue or bluish light ahead of them and increasing in size. Sperry makes an evasive 45° turn to the right and the object passes from 11 o'clock to 7 o'clock position to the left at a slightly higher altitude. The light very briefly passes between the aircraft and the upper part of the moon, revealing an object with a long silhouette (somewhat reminiscent of a submarine) without visible wings or empennage. The blue light is on the front of the object. Sperry turns left back onto his original course to get the object back in view, but it apparently stays stationary for about 30 seconds. Gates then notices the object circling around to the right side. Sperry banks right again, while the object paces the airliner about 20–30 seconds before it climbs to the east at a 30° angle at "fantastic" speed and disappears. (NICAP, "Capt. Willis Sperry Sighting"; Sparks, p. 91; "New Type of Saucer Is Reported—Like a Submarine with Lights," *Asheville (N.C.) Times,* May 30, 1950, p. 16; "Strange Craft Seen by Pilot near Capital," *Fort Worth (Tex.) Star-Telegram,* June 1, 1950, p. 8; Ruppelt, pp. 85–86; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, pp. 52–53; Project 1947, "UFO Reports 1950"; "American Airlines CE-II Case of 5-29-1950 – Capt. Willis Sperry," Ufology: A Primer in Audio, 1938–1959, November 21, 2013)

1950, Summer — Physicist Enrico Fermi first formulates the "Fermi Paradox" during a casual conversation (in Los Alamos, New Mexico) with fellow physicists Edward Teller, Herbert York, and Emil Konopinski. While walking to lunch, the men discuss recent UFO reports and the possibility of faster-than-light travel. The conversation moves on to other topics, until during lunch Fermi allegedly says suddenly, "But where is everybody?" (although the exact quote is uncertain). (Wikipedia, "Fermi paradox"; Eric M. Jones, *"Where Is Everybody?" An Account of Fermi's Question*, Los Alamos National Laboratory, March 1, 1985)

1950, Summer — Afternoon. Four Indigenous men are fishing in Lac Du Flambeau, Wisconsin, when they notice a disturbance in the water. It continues for 20 seconds, then a disk-shaped object rises up and hovers for 6–10 seconds, generating waves. It then accelerated and disappears from sight almost instantaneously. (National UFO Reporting Center, "NUFORC UFO Sighting," March 19, 2009; Dolan, USO1, 138–139)

1950, Summer — Evening. An 8- or 10-foot-disc lands in a field behind Mrs. Mason Vaughan's house in Beaverdam, Virginia. From an open cockpit a "man with unusual goggles or headpiece" looks out. Surprised, the disc takes off abruptly, breaking off a limb from an oak tree on the way up. (Center for UFO Studies, HUMCAT Index 1950–1951, p. 20; Clark III 267; Clark IV 307)

1950, June 1 — A pilot on patrol from RAF Tangmere in West Sussex, England, sights a "bright circular metallic object" that speeds past his Gloster Meteor jet fighter at 20,000 feet. As he undergoes a debriefing by squadron intelligence, he finds out that four RAF controllers at the radar station at RAF Wartling near Eastbourne have, at the same time, tracked an "unusual response" that vanishes from their screens, moving at terrific speed. (UK Flying Saucer Working Party, *Unidentified Flying Objects*, June 1951, pp. 2–3; David Clarke, "Flying Saucer Working Party," Dr. David Clarke Folklore and Journalism, January 3, 2015)

1950, June 5 — Donald Keyhoe's *True* article is expanded into a paperback book, *The Flying Saucers Are Real*, the first book specifically devoted to UFOs, which sells 500,000 copies. It brings many interested civilians and military people to accept UFO reality, government withholding of information, and the extraterrestrial hypothesis. (Wikipedia, "*The Flying Saucers Are Real*"; Donald E. Keyhoe, *The Flying Saucers Are Real*, Gold Medal, 1950; "Aim at 'Saucer' Book," *Kansas City (Mo.) Star*, May 25, 1950, p. 22; Clark III 458; Powell, *Keyhoe*, 73–74; Graff 63–64; Eghigian, *After*, pp. 61–62; Clark IV 503–504)

1950, June 6 — F-86 Sabre fighter aircraft assigned to the 654th Aircraft Control and Warning Squadron at Grenier Air Force Base [now Manchester–Boston Regional Airport] in Manchester, New Hampshire, are ordered to fly with "hot" guns for "certain missions involving interception of unidentified tracks." (Powell, *Scientist*, 112, 114)

1950, June 8 — Gen. Earle E. Partridge of the Fifth Air Force, responsible for the Korean Theatre, writes to Commanding Gen. George E. Stratemeyer, asking for an analysis of certain UFO cases. (Swords 100–101)

1950, June 12 — Eastern Airlines executive Eddie Rickenbacker tells the press that if flying saucers "do exist, you can rest assured that they are ours." (Swords 100)

1950, June 12 — 4:00 p.m. Working in a quarry somewhere in California, geologist John Zimmerman and civil engineer Charles Fisher are watching a jet aircraft speeding through the sky and leaving a vapor trail. Suddenly Zimmerman notices that the vapor trail has been cut. Looking more closely, he notices a metallic disc making vertical loops around the jet. Two other discs come into view and perform the same aerobatics. (Wells Alan Webb, *Mars, the New Frontier*, Fearon, 1956, p. 124; UFOEv, p. 50; Clark III 376; Clark IV 420

1950, June 17 — Oskar Linke and his 11-year-old daughter Gabriele are walking toward Haselbach, Thuringia, East Germany, in the twilight when she notices something about 420 feet away. It appears to be two men dressed in shiny metallic clothing who are stooped over and looking at something on the ground. Linke approaches to 30 feet away, looks over a small fence, and sees a large object about 40 feet in diameter that looks like a huge frying pan. It has two rows of holes in its periphery and a black conical tower about 9 feet high. The two men suddenly jump inside. The inside lights up, the object starts humming and rises slowly from the ground, rotating like a top. It rises from the ground with the aid of a central cylinder and is surrounded by flames, then takes off in the direction of Stockheim. Later he finds a circular depression in the ground at the spot. Linke resettles in West Berlin in 1951. He tells his story to a notary there on July 1, 1952, which is how it turns up in the Western press and explains a confusion in the date of the sighting. (NICAP, "CE III by Two Witnesses / Oskar Linke Case"; Sparks, p. 92; Central Intelligence Agency, "'Flying Saucers' in East Germany," July 9, 1952; Leonard G. Cramp, *Space, Gravity, and the Flying Saucer*, British Book Centre, 1955, pp. 158–161; Olsen, Sec. 3, pp. 8–9; *Hynek UFO Report*, pp. 203–206; Ted Bloecher, "Herr Linke and the Flying Warming Pan," *MUFON UFO Journal*, no. 153 (November 1980): 6–9; Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, pp. 32–34; Good Above, pp. 513–514; Martin S. Kottmeyer, "Missing Linke," *Magonia Supplement*, no. 48 (October 2003): 3–5; "East Germany 1950 Landing Case, Humanoid Pilots Seen," *Journal of UFO History* 2, no. 3 (July/Aug. 2005): 8–9; Andreas Müller, "Das Haselbach-UFO von 1950: Die Augenzeugin spricht," grenzWissenschaft-aktuell.de, January 26, 2016)

1950, June 21 — 1:35 a.m. Control tower operators Cpl. Roger G. Pryor and S/Sgt. Ellis R. Lorimer and airways communications staffer S/Sgt. Virgil Cappuro watch a flying disc speeding at 1,000–1,500 mph over Hamilton AFB [now closed] in Novato, California. The object shoots blue flame and makes a roar like thunder as it makes five passes over the base. They observe it through binoculars for 25 minutes. (NICAP, "Disc Makes Five Passes at Control Tower"; Sparks, p. 92; "Saucer's Roar 'Like Thunder,' Say Observers," *Long Beach (Calif.) Press-Telegram*, June 21, 1950, p. 1; "Disc, 'Roaring Like Thunder,' Is Reported at Hamilton Field," *Dayton (Ohio) Daily News*, June 21, 1950, p. 1; "GIs Report Seeing 'Saucer' at Air Base on West Coast," *Dayton (Ohio) Journal Herald*, June 22, 1950, p. 2)

1950, June 24 — A cigar-shaped UFO paces a United Airlines plane (Capt. E. L. Remlin, First Officer David Stewart, and observer Capt. Samuel B. Wiper) for 20 minutes near Daggett, California. The object is also seen by the crew of another airliner and a navy transport plane. The Navy pilot sees for 3 minutes a dark gray object with heat radiation at the tail end. He estimates altitude as 50,000–100,000 feet and a speed of 1,000–1,500 mph. The crews discuss the matter with two CAA ground stations. The object is also reported by hundreds of witnesses over a distance of 300–400 miles from southern California to Nevada and southeastern Utah and was covered in local

newspapers. (NICAP, "Three Aircraft Crews Observe UFO"; Sparks, p. 93; UFOEv, p. 31; David Rudiak, "1950 California–Nevada Cigar-Shaped UFO," Roswell Proof, 2005)

1950, June 25 — North Korea invades South Korea, overrunning Seoul and beginning the Korean War. (Wikipedia, "Korean War")

1950, June 27 — President Truman orders US air and sea forces to help South Korea. (Wikipedia, "Korean War")

1950, June 27 — 4:15 p.m. Al Hixenbaugh, a photographer for the *Louisville Times*, is at the corner of Longest and Everett avenues in Louisville, Kentucky, when he hears the sound of a DC-3 airplane overhead. He looks up and sees the plane as well as a large disc with a slight corona around it. He shoots 50 feet of film with his 16mm movie camera as the object remains motionless for 10 seconds before it starts getting smaller and disappears to the west. (Sparks, p. 93; *Louisville (Ky.) Times*, June 28, 1950, p. 1; "'Saucer' Filmed," *Lexington (Ky.) Herald*, June 29, 1950, p. 13; "How to Film UFO's," *Saucers* 6, no. 3 (August 1958): 3)

1950, June 29 — Afternoon. A brilliant white object is seen in the western sky by many residents of Phoenix, Arizona, for three hours. William A. Rhodes watches the object through an 80x telescope and estimates that it is 50–62 miles high and 225 miles west of Phoenix. American Airlines pilot Bob Rentz places it west of Wickenburg at 6:00 p.m. Weather bureau observers say it is round with a sharp cone projecting from its base and a round protuberance at its top. (Jim Blakeslee, "City Agog over Strange Object in Sky," Phoenix *Arizona Republic*, June 30, 1950, p. 1)

1950, June 30 — Midnight. Rev. Ross Vermillion, a former bomber pilot, and his wife are driving 9 miles west of Kingman, Kansas, when they see a bright red light hovering over US Hwy 54 near Cunningham, Kansas. They estimate it to be about 250 feet in diameter with a small canopy on top. The family of druggist Dwayne Mulnix of Meade, Kansas, also sees the object and they stop and watch it for about 20 minutes along the highway. They begin to drive closer, but it speeds away. As seen in the bright moonlight, the object looks made of bright metal and has an elliptical body "as big as the cross-section of a B-29" with a rotor turning counterclockwise around its body. (NICAP, "WWII Pilot Tells of Seeing Flying Saucer"; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, pp. 66–69)

1950, June 30 — 11:15 p.m. Two navy men (Petty Officer Carter and Able Seaman Connelly) at Royal Canadian Naval Air Station Shearwater, Dartmouth, Nova Scotia, are pulling duty on radar watch from dusk until dawn. They report four separate radar contacts bearing 160° at 5 miles over 90 minutes. Visual confirmation of two glowing objects is made by a chief petty officer in North Dartmouth. (NICAP, "Navy Men Report Radar Contact")

1950, July — USAF Director of Intelligence Maj. Gen. Charles P. Cabell orders secret UFO field investigations to be conducted by his staff Technical Capabilities Branch in the Evaluation Division under Maj. Milton D. Willis. These begin this month and last until October 1951 when Cabell is replaced by Gen. John A. Samford. (Clark III 936)

1950, July — Editor Curtis Fuller's article, "The Flying Saucers: Fact or Fiction?" appears in *Flying* magazine. (Curtis Fuller, "The Flying Saucers: Fact or Fiction?" *Flying* 47 (July 1950): 16–17, 59–61)

1950, July — Armed Forces Special Weapons Project concludes a top secret study, named Project Nutmeg, to search for an atomic weapons site in the continental US. AFSWP concludes that a site on the Air Force's Las Vegas Bombing and Gunnery Range in Nevada is the right place. President Truman approves the location, known as Frenchman Flat. (Wikipedia, "Sandia Base"; "Project Nutmeg: The Birth of the Nevada Test Site," National Nuclear Security Administration, June 2004)

1950, July — Mid-day. Electronics engineer Cliff Booth is having lunch in his office at a private contractor's building at Holloman AFB, New Mexico, when he gets a call that a UFO has been reported by one of the range stations. Booth and an Askania cinetheodolite operator are asked to drive to another range station with a manually operated Askania and look for the object. Through the finders on the theodolite the object presents a side view to the observers and appears to be cigar-shaped and metallic, with a straw-colored iridescent radiance or luster. It also has fins one-third of the way back from the front of the fuselage and a row of at least three oblong ports extending to the rear of the object and located above the center line of the fuselage. The ports are a dark smoky gray but not luminescent. The object hovers in an almost horizontal position, elevation 20°–25°, azimuth northeast. Shortly after the men focus the instrument on the object to take a film, it begins maneuvering. Turning toward the camera, the object moves in, and the men can see the front—a round shape with the fins extending out from the sides. It then drops abruptly, as though beginning to fall, but stops. It moves toward the camera, turns sideways, then drops as before, but this time it exposes the side view again. The operator leaves to report the coordinates to headquarters, and when he returns the object is gone. The men turn over their exposed film to the Data Reduction Division for development and analysis. A week or so later they are called in and questioned by a young first lieutenant unknown to them who asks them over and over again if they have taken pictures and to describe the object they had seen. Then they are asked if they can identify the film of the object they photographed. One of the

men becomes angry about the questioning, telling the officer he had seen what he reported, had photographed the object, and is convinced it is some sort of a vehicle from outer space. He is shown a film of 14 frames on a Recordak projector. The black-and-white presentation shows a blurred ellipsoid with a dark center, but no details. (Puzzled about the film, he later talks to a mathematician-analyst employed by Land-Air, Inc.; she conjectured the object had been oscillating in the air, preventing a stable image.) The men are then told by their superiors to forget the whole thing. (Lorenzen, *FS Hoax*, pp. 27–29; Project 1947, "APRO Files: Coral E. Lorenzen, Holloman Air Force Base UFO Sighting, July, 1950")

1950, July — 1:45 p.m. A Civil Aviation Authority flight engineer observes a "wingless, fuselage-shaped" object maneuvering over Cincinnati, Ohio. The object climbs at a steep angle to 16,000–18,000 feet, hesitates, dives, and speeds away to the west. (UFOEv, p. 45)

1950, July 1–3 — The Hydra Club, a group of science fiction authors and editors, holds a New York Science Fiction Conference, with 300 attendees. They discuss the "rumpus that rocked the world of science fiction—the Shaver hoax," and are skeptical of dianetics, Velikovsky, Atlantis, and reincarnation. However, Fletcher Pratt gives a talk on flying discs, arguing (perhaps facetiously) that they are from another planet. (Curt Collins, "Crashed Flying Saucers and the Hydra Club," The Saucers That Time Forgot, August 3, 2023)

1950, July 2 — Dusk. While picnicking on the shore of Sawbill Bay on Marmion Lake, western Ontario, an anonymous employee of the Steep Rock Iron Mine claims to have seen a UFO resting on the water's surface. A hatch opens and 10 figures, 3–4 feet tall, emerge, wearing shiny, metallic clothing. They seem to be drawing in lake water with a hose. The object soon rises and hovers, then swiftly takes off. The story appears in the mine's house newsletter, then gets picked up by some Canadian newspapers and *Fate* magazine in its February/March 1952 issue. However, Robert Badgley, a Scarborough, Ontario, member of APRO, finds in 1974 that Steep Rock employee Gordon Edwards had written the fictitious tale to entertain readers of the newsletter and to satirize saucer stories. ("'Flying Saucer' Lands on Lake Near Atikokan, 'Letter' Says," *Port Arthur (Ont.) News Chronicle*, September 18, 1950, pp. 1–2; "Steep Rock Flying Saucer," *Fate* 5, no. 2 (February–March 1952): 68–72; "1950 Steep Rock Lake, Ontario Case Possible Hoax," *APRO Bulletin* 26, no. 5 (November 1977): 5; John Robert Colombo, *Mysterious Canada*, Doubleday Canada, 1988, pp. 231–232; John Robert Columbo, *UFOs over Canada*, Hounslow, 1991, pp. 32–41; Patrick Gross, URECAT, January 31, 2007; Clark III 595; Hammerson Peters, "The Little Green Men of Steep Rock Lake," Mysteries of Canada, September 7, 2018; Clark IV 655)

1950, July 4 — Evening. Aerojet engineer Daniel Fry is alone during the holiday at White Sands Proving Ground, New Mexico, when a flying saucer appears and hovers just above the ground. Fry approaches and strokes its surface when a voice booms, "Better not touch the hull, pal, it's still hot." After some conversation with the disembodied extraterrestrial named Alan, he is invited on board the craft, which flies him to New York and back in 30 minutes. Alan is originally from Lemuria, but his people moved to Mars, and now they are back to help with scientific progress and end wars. Fry has further encounters and becomes a celebrity on the contactee circuit. He finally meets Alan in person in 1961. (Daniel Fry, *The White Sands Incident*, New Age, 1954; Daniel Fry, *Alan's Message: To Men of Earth*, New Age, 1954; Bryant and Helen Reeve, *Flying Saucer Pilgrimage*, Amherst Press, 1957, pp. 104–110; Clark III 518–520; Eghigian, *After*, pp. 132–133; Clark IV 567–569)

1950, July 6 — A memo by Lt. Col. F. D. McGarrachy, USAF chief of General Investigations Division, expresses strong interest to acquire motion pictures of UFOs taken by civilians, perhaps in cooperation with the FBI, but not in a way to arouse public suspicion of USAF interest. (*Hynek UFO Report*, pp. 54–56)

1950, July 7 — Gen. Cabell, through his aide Col. Barber, sends a notice to AMC Intelligence Chief Col. Harold E. Watson, that despite the official closing of Project Grudge, the Air Force still desires to receive UFO reports and take them seriously. Project Grudge begins to be reactivated as Project 10073. (Sparks, p. 12; Swords 101–102, 498–499)

1950, July 8 — 2:00 p.m. Three US Coast Guardsmen are in Peril Strait off Chichagof Island, Alaska, when they notice a white barbell-shaped object moving overhead to the west. It appears to be banking and climbing as it maintains its course. They estimate it is 100 feet long by 60 feet high and moving at 350 mph. They have it in sight for two and a half minutes. (Powell, *Scientist*, 50–51)

1950, July 11 — Two Navy aircraft crews from NAS Millington [now Naval Support Activity Mid-South] in Tennessee, across the Mississippi River from Osceola, Arkansas, see a domed disc pass in front of them. Airborne radar confirms it. The object first appears as a round ball; after it crosses their flight path, it appears like an upside-down shallow bowl. (NICAP, "Air, Radar/Visual over Arkansas"; Sparks, p. 93; "Millington Men Report Seeing 'Flying Saucer' and Tracing It," *Memphis (Tenn.) Commercial Appeal*, July 12, 1950, p. 1; "Navy Pilots Claim They Tracked 'Flying Saucer' On Radar Scope," *Anniston (Ala.) Star*, July 12, 1950, p. 2)

1950, July 18 — Bruce Bliven summarizes flying saucer news in a *Look* magazine article. (Bruce Bliven, "Flying Saucers: Myth or Menace?" *Look*, July 18, 1950, pp. 12–18)

1950, July 19 — A memo by Col. Bruno W. Feiling, chief of the USAF Technical Analysis Division, on "Investigation of Flying Saucer Reports" says that UFO investigation takes up too much time. (*Hynek UFO Report,* p. 57)

1950, August — Engineer Eric A. Walker becomes executive secretary of the Research and Development Board. He later refers to a real group called MJ-12 and admits attending meetings at Wright-Patterson AFB in Ohio concerning "recovered UFOs." (Michael Hall and Wendy Connors, "The Research and Development Board: Unanswered Questions," *IUR* 26, no. 2 (Summer 2001): 11)

1950, August — Keyhoe's article on the Adickes case of April 27, "Flight 117 and the Flying Saucer," appears in *True* magazine. (Donald E. Keyhoe, "Flight 117 and the Flying Saucer," *True,* August 1950, pp. 24–25, 75–79)

1950, August — 2:00 p.m. Hugh O'Neill views a cigar-shaped object hovering silently about 2–5 miles off the Big Sur coast at Anderson Creek, California, at an elevation of 500–1,000 feet. It moves swiftly away to the south, then returns less than 2 minutes later and slowly circles above the ocean twice for 90 seconds, disappearing again to the south. (Henry Miller, *Big Sur and the Oranges of Hieronymus Bosch,* New Directions, 1957, p. 75; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs a History: 1950 August–December, Supplemental Notes,* The Author, 2000, p. 3)

1950, August 4 — A memo from Army Maj. Ulysses Grant Carlan states that UFOs since July 30 have been seen at the Hanford Site in Washington State. They are above 15,000 feet. Jets attempting interception fail. The AEC says that the investigation is continuing. (Maj. U. G. Carlan, "Flying Discs," August 4, 1950; Good Above, pp. 267, 485; Nukes 46; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950,* The Author, 1990, p. 71)

1950, August 4 — The crew (Master Nils Lewring, Chief Mate Jacob Koelwyn) of the M/V *Marcala* in the North Atlantic between Nova Scotia and the US Eastern seaboard watch an aluminum-colored cylinder-shaped UFO, apparently 10 feet in diameter, 50–100 feet above the surface. It initially moves 25 mph, makes no noise, wobbles slightly, disappears over the horizon, then reappears. The ship's captain watches the object through binoculars for 90 seconds. One of the other witnesses describes the sighting as "one of the most frightening experiences I have ever had." (NICAP, "Object 100′ above Sea Observed by Ship MV *Marcala*"; Central Intelligence Agency, "Unidentified Airborne Object," August 4, 1950; "Ship Officers, Crew Report Seeing Flying Saucer in Area," *Wilmington (Del.) Journal–Every Evening,* August 7, 1950, p. 9; Loren E. Gross, *UFOs, a History: Volume 7, August–December 1950,* The Author, 1982, pp. 1–3; ClearIntent, pp. 115–116; Good Above, pp. 340–341; Dolan, USO1, 139–141)

1950, August 12 — 1:30 p.m. Mr. and Mrs. Bud Oliver are at the state forestry lookout tower on Round Top Mountain north of Medford, Oregon, when they see two UFOs, one disc-shaped, the other oblong. They are about 100 feet apart, and the oblong one is tumbling in the air end over end. ("Lookouts Report Seeing 'Saucers' North of Medford," *Medford (Oreg.) Mail-Tribune,* August 17, 1950, p. 9)

1950, August 14 — 11:27 a.m. Flight Lt. Stan J. Hubbard and two other officers at Farnborough Airfield, Hampshire, England, hear a humming noise. Hubbard looks up and sees a flat gray disc, about 100 feet in diameter, at an altitude of 700–1,000 feet. He watches it for 30 seconds as it flies at a speed of 800–1,000 mph and makes a series of S-turns, oscillating as it moves. The other two officers see nothing. (Good Need, pp. 149–151; David Clarke and Andy Roberts, *Out of the Shadows*, Piatkus, 2002, pp. 87–93; UFOFiles2, pp. 40–42; David Clarke, "Flying Saucer Working Party," Dr. David Clarke Folklore and Journalism, January 3, 2015; David Clarke, "Phantoms of the Sky," *Fortean Times* 445 (June 2024): 28, 30–31, 33)

1950, August 15 — 11:30 a.m. Nicholas Mariana and his secretary Virginia Raunig are inspecting the Great Falls, Montana, baseball stadium in preparation for a game. He walks up to the grandstand and notices two fast-moving bright lights "like two new dimes in the sky." He rushes to his car, parked 60 feet away, and gets his 16mm movie camera from the glove compartment. He films the objects passing behind a water tower, which provides a frame of reference for measuring distance, size, altitude, azimuth, and speed. In October he takes it to an Air Force officer for analysis. USAF notes that two jet interceptors were in the area and might be the objects on the film, but Mariana and Raunig had seen those too. Controversy soon arises when Mariana claims that the first 35 frames of his film—which he says most clearly show the UFOs as rotating disks—are missing. People in the Great Falls area who view Mariana's film support him. They claim that the missing frames clearly show the UFOs as spinning, metallic disks with a "notch or band" along their outer edges. USAF personnel deny this accusation and insist that they have removed only a single frame of film that was damaged in the analysis. In 1952, Blue Book reviews the film; so does Robert M. L. Baker Jr. in 1954, and the Colorado project in 1967. All studies of the film agree that it was not faked and that the objects appear to be disc-shaped. (Wikipedia, "Mariana UFO incident"; NICAP, "Nick Mariana / Montana UFO Color Film"; "Air Force Takes over Films of Flying Disks," *Spokane (Wash.) Chronicle,* October 5, 1950, p. 8; "Colored Films on Saucers to Be Shown," *Twin Falls (Idaho) Times-News,* October 19, 1950, p. 17; UFOs Yes, 81–108; Condon, pp. 407–415; Margaret Sachs, *The UFO*

Encyclopedia, Putnam, 1980, pp. 127–128); James R. Leming, "Montana Movie," *MUFON UFO Journal*, no. 223 (November 1986): 10–11, 17–18; Barry Greenwood, "On the Question of Tampering with the 1950 Great Falls UFO Film," *UFO Historical Revue*, no. 7 (September 2000): 1–8; Michael D. Swords, *GrassRoots UFOs: Case Reports from the Timmerman Files*, Fund for UFO Research, 2005, pp. 138–139; Michael D. Swords, "Can You Learn Anything from UFO Photos? Part Three," The Big Study, July 7, 2012; "Nick Mariana UFO Footage 1950 Great Falls Montana," parkerdonaldmusic YouTube channel, September 29, 2012; Clark III 767–769; Patrick Gross, "The Great Falls, Montana, UFO Color Film, August 15, 1950"; Clark IV 848–850)

1950, August 15 — A top secret meeting on UFOs takes place at the Metropole Building on Northumberland Avenue in London, England. It is chaired by Hugh Young, deputy director of intelligence, and attended by representatives of the Secret Intelligence Service and Wing Commander Myles Formby of the Air Ministry's technical intelligence branch. Young explains that Henry Tizard, chief scientific advisor to the Ministry of Defence, feels that reports of flying saucers should not be dismissed without investigation and has asked that a working party be set up to look into significant reports. RAF Fighter Command is advised that all future reports of aerial phenomena should go to the Flying Saucer Working Party. (David Clarke and Andy Roberts, *Out of the Shadows*, Piatkus, 2002, pp. 77–78; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: January 1, 1947–December 31, 1959, Supplemental Notes*, The Author, 2003, p. 35; David Clarke, "Flying Saucer Working Party," Dr. David Clarke Folklore and Journalism, January 3, 2015)

1950, August 20 — An FBI informant meets with George Adamski at Alice Wells's restaurant, the Palomar Gardens Café, south of Mount Palomar, California. In addition to the standard flying saucer tales, Adamski mentions that the Federal Communications Commission has established contact with people from other planets who apparently have a communist economic system. He also predicts that Russia will dominate the world for the next 1,000 years. (Kremlin 63–71)

1950, August 23 — FBI memo from Alan H. Belmont to D. Milton Ladd on green fireballs. The memo states that from 1948 to 1950, a variety of phenomena were witnessed more than 150 times by numerous individuals, many of whom were considered credible by government investigators, in the vicinity of Sandia and Los Alamos in New Mexico. The sightings included "flying discs" emitting "brilliant white light" as well as numerous sightings of "green fireballs" flying horizontally over the sensitive facilities. The memo also indicates that according to a "meteor expert" at the University of New Mexico—Lincoln LaPaz, director of the university's Institute of Meteoritics—"the phenomena do not appear to be of meteoric origin." LaPaz hypothesized that the strange sightings were probably a type of secret Soviet surveillance technology. (A. H. Belmont, "Summary of Aerial Phenomena in New Mexico, Miscellaneous—Information Concerning," August 23, 1950; ClearIntent, pp. 167–168)

1950, August 30 — 10:45 a.m. During a Bell Aircraft MX-776 Shrike missile test (for the later Rascal air-to-ground strategic missile) a USAF M/Sgt and eight Bell Aircraft employees at Holloman AFB, New Mexico, see two glaringly bright circular or elliptical objects maintaining relative position to each other following the B-50 Superfortress launch aircraft from above on both the dry run and hot run prior to missile release. The objects give a "strong glare at all times" (not reflected sunlight), maneuver at high estimated speeds up to 10 times the B-50 (roughly 2,500 mph) for short distances, leave no vapor trails, hover, accelerate rapidly, and make abrupt "square" turns with apparent size changing to indicate ascent and descent. (NICAP, "Two Objects Filmed during Shrike Missile Test"; Sparks, p. 98; Maj. R. G. Illing, "Aerial Phenomena," September 13, 1950; Swords 115; Clark III 544; Clark IV 602)

1950, August 31 — 10:00 a.m.–1:00 p.m. After V-2 missile launch no. 51 at Holloman AFB, New Mexico, Project Twinkle cinetheodolite crews track and film multiple objects sporadically several times from different directions at very high speeds over the course of 3 hours. Cinetheodolite station P-5 films an object using a one-frame-per-second 60 cm focal length camera with 35 mm color film. Frames 593 and 595 (2 seconds of nearly 10 minutes of film) show its elevation angle changing. An attempted interception by four F-86 jets from Kirtland AFB for one hour fails to locate the objects, which apparently return after the jets leave. Cinetheodolite observers note an object with definite shape and 3D depth but indistinct edges and no smoke or trail. The object seems to "rock or oscillate." It is lost when the observer looks away to get an angle reading. (NICAP, "Objects Filmed after V-2 Launch"; Sparks, p. 99; Clark III 544; Clark IV 602)

1950, September — 7:00 a.m. Three US Navy planes on a combat mission 100 miles south of the Yalu River in Korea are approached from below by two huge discs, at least 600–700 feet in diameter, traveling at 1,000–1,200 mph. The radar shows them as 1.5 miles away. Suddenly the objects halt, back up, and begin a jittering motion, keeping pace with them, circling above and below. When one pilot readies his guns, the aircraft radar goes haywire, apparently jammed. His radio transmitter is blocked by a buzzing noise. The discs are silvery and shaped like a

"coolie's hat, with oblong ports from which emanated a copper-green colored light which gradually shifted to pale pastel-colored lights." A shimmering red ring circles the top portion of the disc. The objects soon speed away in the direction from which they had come. (Lorenzen, *FS Hoax*, pp. 30–32; Haines, *Korea*, pp. 28–30; Powell, *Scientist*, 85)

1950, September — The first US Army large-scale aerosol vulnerability test occurs in the San Francisco Bay Area, California, using two types of bacteria (*Bacillus globigii* and *Serratia marcescens*) and fluorescent particles. Six simulated attacks are conducted, with the conclusion that it is feasible to attack a seaport city with biological aerosol agents from a ship offshore. The first open-air tests with biological simulants are conducted in 1950 in various locales, one of which is off the coast of Norfolk, Virginia. (Wikipedia, "United States biological weapons program"; David R. Franz, Cheryl D. Parrott, and Ernest T. Takafuji, "The U.S. Biological Warfare and Biological Defense Programs," in *Medical Aspects of Chemical and Biological Warfare*, Office of the US Surgeon General, 1997, chap. 19)

1950, September — George Adamski first receives national exposure as coauthor of an article in *Fate* on his fake UFO photographs. A follow-up article in July 1951 features even more dramatic photos. (Maurice Weekley and George Adamski, "Flying Saucers As Astronomers See Them," *Fate* 3, no. 6 (September 1950): 56–59; George Adamski, "I Photographed Space Ships," *Fate* 4, no. 5 (July 1951): 64–74; George Noory, "*Fate* Flashback: 'Flying Saucers' in the 1950's," Coast to Coast AM, August 18, 2016; Clark III 39; Clark IV 57)

1950, September 5 — 4:09 p.m. Flight Lt. Stan J. Hubbard is standing on the watchtower at Farnborough Airfield, Hampshire, England, with five other officers, one of whom is Wing Commander Frank Jolliffe. They all see, at a range of 10–15 miles, a light gray disc following a rectangular flight path, consisting of a "falling leaf, horizontal flight, an upward "falling leaf," then another horizontal stretch. The Working Party concludes they have imperfectly viewed some conventional aircraft. (David Clarke and Andy Roberts, *Out of the Shadows*, Piatkus, 2002, pp. 87–93; Good Need, pp. 150–151; UFOFiles2, p. 41; David Clarke, "Flying Saucer Working Party," Dr. David Clarke Folklore and Journalism, January 3, 2015)

1950, September 8 — Henry Holt publishes Frank Scully's *Behind the Flying Saucers*, the second book specifically devoted to UFOs. It sensationally claims that the US government has retrieved a crashed flying saucer and several dead pilots. Rep. Edward H. Jenison (R-Ill.) condemns the book as contributing to mass hysteria during a time of war in Korea. USAF Public Information Officer Clare Welch estimates that 3–4 million people have heard about saucers, thanks to the book. (Frank Scully, *Behind the Flying Saucers*, Holt, 1950; John L. Cotton, et al., "Flying Saucers and Frank Scully," in KNW 2333: The Scientific Method, Critical and Creative Thinking (Debunking Pseudoscience), Southern Methodist University; Robert Sheaffer, "The Frank Scully 'Crashed Saucer at Aztec' Hoax (1950)," The Debunker's Domain; Swords 103; Curt Collins, "Operation Hush-Hush: The UFO Crash and ET Bodies Cover-Up," The Saucers That Time Forgot, February 9, 2018; Clark III 458–459; Graff 64–65; Eghigian, *After*, pp. 62–65; Clark IV 504)

1950, September 8 — Air Force Intelligence Collection Division's Collection Control Branch (AFOIN-CC-1) at the Pentagon issues a new intelligence reporting directive requiring special handling and reporting of UFO incidents, "Reporting of Information on Unconventional Aircraft," thus reversing the cancellation directive of January 12, 1950. The action reflects the increasing interest by AFOIN Director Gen. Cabell and his dissatisfaction with AMC inaction on UFO study at Wright-Patterson AFB. (NICAP, "1950 UFO Chronology")

1950, September 13 — The Air Force responds to producer Howard Hawks's request for the use of military locations, personnel, and equipment for his upcoming film *The Thing from Another World* by refusing to participate and objecting to any display of USAF personnel or equipment on the grounds that "it is our policy not to participate in any proposal that will perpetuate this hoax." (Swords 103–104)

1950, September 15 — Afternoon. Jack Spencer and four other senior test flight personnel at Farnborough Airfield, Hampshire, England, are on the roof of the flight control building when they see a flat disc about 10 miles to the south. The object goes from a fluttering, hovering position to a slight dive at high speed. The sequence is repeated several times, with some changes in height. The disc follows a rectangular flight path, consisting of a "falling leaf" motion, fast horizontal motion, an upward falling leaf, and another horizontal stretch. Finally it speeds away toward the horizon and vanishes. (David Clarke, "Phantoms of the Sky," *Fortean Times* 445 (June 2024): 28, 33–34)

1950, September 15 — Canadian engineer Wilbert B. Smith attends a classified briefing with physicist Robert I. Sarbacher of the US Defense Dept.'s Research and Development Board. Smith asks if there is any truth to the Scully crash-and-retrieval story and Sarbacher replies, "The facts reported in the book are substantially correct." He says that UFOs are "classified two points higher even than the H-bomb." In 1983, Sarbacher confirms the comment to Stanton T. Friedman, although he clarifies that he was speaking about crashed UFOs in general. He tells UFO researcher William Steinman in November 1983 that he "was invited to participate in several

discussions associated with the reported recoveries" of UFOs, but is unable to attend the meetings. He claims Vannevar Bush, Eric A. Walker, and John von Neumann are "definitely involved" in the program and probably J. Robert Oppenheimer as well. (Wilbert B. Smith, [Sarbacher interview notes], September 15, 1950; Good Above, pp. 519–521; Northern Ontario UFO Research and Study, "Dr. Robert Sarbacher," March 1, 2010; Robert I. Sarbacher, [Letter to William Steinman], November 29, 1983; Dolan II 320; Clark III 322, 1029–1031, 1078; Clark IV 358–359, 1144–1147, 1194)

1950, September 21 — MIT research associate and Air National Guard Maj. Myron Herbert Ligda and Joseph V. Connelly are testing radar near Provincetown, Massachusetts, under contract to the US Signal Corps, when they track an unknown object on a converging course with two F-86s. The clear target passes the planes at a speed of at least 1,200 mph, makes a right turn, then passes directly over or under the F-86s. (NICAP, "SCR-615B Tracks UFO"; Sparks, p. 100; *Hynek UFO Report*, pp. 139–141; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 21–24; Swords 104)

1950, September 25 — JANAP 146(A) is issued: "Communications Instructions for Reporting Vital Intelligence Sightings from Aircraft," the start of CIRVIS reporting for commercial and military pilots. This adds UFOs to the list of sighting categories. All UFO reports are to be sent to the Air Defense Command at the Pentagon and to the Secretary of Defense. AMC at Wright-Patterson is not mentioned. (Antonio F. Rullán, "Blue Book UFO Reports at Sea by Ships: Analysis of the Blue Book Ship Database," December 10, 2002, pp. 8–9; Swords 123)

1950, September 25 — The Air Force Intelligence office, apparently at the request of Gen. Hoyt Vandenberg, orders all copies of the December 10, 1948, revised Project Sign report destroyed. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1950 August–December, Supplemental Notes*, The Author, 2000, pp. 35–36; Good Need, p. 114)

1950, September 26 — 10:00 p.m. Policemen John Collins and Joseph Keenan are patrolling on Vare Avenue near 26th Street in South Philadelphia, Pennsylvania, when they see something like a parachute drifting down ahead of them at treetop level. It is about 6 feet in diameter and settles in an open field. After summoning Sgt. Joseph Cook and Patrolman James Casper, they go into the field to investigate. When they turn their flashlights on it, it gives off a purplish glow, "almost a mist, that looked as though it contained crystals." Collins touches it and it dissolves in his hand, leaving an odorless, sticky residue. It completely evaporates in 25 minutes. This event inspires producer Jack H. Harris to ask his friend Irvine H. Millgate to come up with a story for what eventually becomes the 1958 horror film *The Blob.* ("Flying 'Saucer' Just Dissolves," *Philadelphia Inquirer,* September 27, 1950, pp. 1–2; "Sticky Purple Light," *Fate* 4, no. 8 (Nov./Dec. 1951): 35; Frank Edwards, *Strange World,* Ace, 1964, pp. 212–213; Vincent Gaddis, *Mysterious Fires and Lights,* David McKay, 1967, p. 42; Bruce S. Maccabee, "UFO Related Information from the FBI File, Part 7," *MUFON UFO Journal,* no. 132 (Nov./Dec. 1978): 11, 14–15; Rebekah McKendry, "The Supposedly True Story behind the Classic Film *The Blob!*" 13th Floor, October 21, 2015; Clark III 1102; Jake Rossen, "The Real-Life Creepy Blob That Inspired *The Blob*," Mental Floss, May 5, 2021; Clark IV 1228)

1950, October — J[ack?] L. Rohn is named a chief of Project Grudge. (Sparks, p. 14; Clark III 937; Clark IV 1047)

1950, October — The Flying Saucer Working Party is created in the UK by Ministry of Defence Chief Science Adviser Henry Tizard, assisted by Louis Mountbatten and Air Chief Marshal Hugh Dowding, both who have quietly concluded that flying saucers are real. It has five members, representing UK intelligence branches. Its charge is to study UFO reports. (Wikipedia, "Flying Saucer Working Party"; Mark Rodeghier, "Britain's Secret UFO Study," *IUR* 26, no. 4 (Winter 2001–2002): 21–23)

1950, October 3 — Geochemist J. D. Laudermilk watches a disc moving with a wobbling motion at 750 mph behind a mountain peak near Pomona, California. (UFOEv, p. 49)

1950, October 5 — A California Central Airlines plane, piloted by Capt. Cecil Hardin and Flight Officer Jack Conroy, is buzzed by a wing-like UFO with 8 bright lights between San Fernando and Van Nuys, California. Bands of blue light are visible across its width. (NICAP, "Mysterious Object Buzzes Airliner"; "Now Add This to Saucer Mysteries," *Los Angeles Daily News,* October 6, 1950, p. 2; UFOEv, p. 34)

1950, October 7 — Walter Bedell Smith takes over as director of central intelligence.

1950, October 9 — Agent D. Milton ("Mickey") Ladd writes to FBI Director J. Edgar Hoover, informing him that the Bureau liaison learned that investigations into aerial phenomena are being conducted by the US Air Force Office of Special Investigations at Wright-Patterson AFB in Ohio. The investigation has not found evidence that the sightings involve spaceships or missiles from other planets or countries. OSI also notes that the complaints they receive show no clear pattern of activity. They assure the Bureau that they are closely monitoring the situation and

will provide updates if any relevant information arises. (Memo from D. M. Ladd to [J. Edgar Hoover], "Flying Saucers, Flying Discs, Green Fireballs," October 9, 1950)

1950, October 12 — *The Oak Ridger* columnist Robert Sharon Allen reports that the Atomic Energy Commission Security Service has issued a questionnaire to be used when UFOs are reported at its installations. (Robert S. Allen, "AEC Wants Info on Flying Saucers Seen near A-Plants," *The Oak Ridger*, October 12, 1950; Project 1947, "Robert S. Allen Introduction")

1950, October 12–December 30 — Some 15 radar and visual sightings of UFOs take place over restricted airspace at Oak Ridge, Tennessee. After the observation on October 23, an unexplained increase in alpha-beta background radiation is detected; after the November 29 sighting, an alpha and gamma ray increase is correlated with unidentified radar targets in the area. (NICAP, "Huge Saucer over K-25 Area"; Sparks, pp. 100–102; Memo from Strategic Air Command Knoxville to Director of FBI, "'Flying Saucers' Observed over Oak Ridge Area," October 25, 1950; "Saucers Bob Up Again in Reports," *Knoxville (Tenn.) Journal*, October 26, 1950, pp. 1, 9; J. Edgar Hoover, [teletype in response], December 5, 1950; *Hynek UFO Report*, pp. 142–143; ClearIntent, pp. 171–173; Bruce S. Maccabee, "NCP-14: Saucers over Oak Ridge," from *UFO–FBI Connection*, Llewellyn, 2000, pp. 163–181; Francis Ridge, "The Oak Ridge Sightings including All the Tennessee Blue Book Unknowns," September 22, 2005; Swords 106–107; Clark III 950; Clark IV 1064)

1950, October 12 — 11:25 p.m. A military radar unit at Knoxville (Tenn.) Airport suddenly detects 11 "and possibly more" unidentified targets moving over the restricted flight zone at Oak Ridge. At 11:30, the radar station commander scrambles an F-82 fighter, which is airborne nine minutes later. The fighter is directed toward two targets, but the pilot sees nothing. Ground observations also fail to detect anything in the sky. (NICAP, "Military Radar at Knoxville Tracks Eleven Objects"; Memo from Strategic Air Command Knoxville to Director of FBI, "'Flying Saucers' Observed over Oak Ridge Area," October 25, 1950; Loren E. Gross, *UFOs, a History: Volume 7, August–December 1950*, The Author, 1982, p. 35)

1950, October 13 — J. Edgar Hoover sends a teletype message to the Special Agent in Charge in Los Angeles, California, asking him to determine whether Frank Scully is the same man who has been active in communist activities since the 1930s. (Anthony Bragalia, "J. Edgar Hoover's Saucer Crash Secrets," UFO Explorations, April 2011)

1950, October 15 — 4:20 p.m. After taking off from Raleigh, North Carolina, Miami Airlines DC-4 pilot Capt. George A. Woodward and copilot William Bardsley see four round, metallic objects descending slowly near Pope AFB [now Pope Field] at Fort Bragg. They look like two saucers fitted together and are about 100 feet in diameter, flying in a line about 25 feet apart. The pilots pursue the objects for about 3 minutes, but the objects recede then shoot away at tremendous speed. Around the same time, a similar object crosses the path of an Air Force jet near Pope AFB. (NICAP, "Pilots Report 100-Ft Round Objects"; NICAP, "Aluminum-Like Object Crosses Path of Jet")

1950, October 18 — USAF Brig. Gen. Ernest Moore writes a memo to Col. Harold E. Watson at Wright-Patterson AFB in Ohio, advising him of the standing policy of releasing no details about UFO case investigations. A form letter is to be used: "We have investigated and evaluated _____ incident and have found nothing of value and nothing which would change our previous estimates on this subject." (Swords 102–103, 500; Powell, *Scientist*, 112–113)

1950, October 23 — 4:30 p.m. Francis Miller, an employee at Oak Ridge National Laboratory in Oak Ridge, Tennessee, is driving along a road when he sees an object less than half a mile away and between 1,000 and 2,000 feet up. It appears as an "aluminum flash" traveling in a south-southeast direction. He only sees it for a few seconds. Later it is discovered that a Geiger counter in the vicinity has registered a burst of alpha and beta radiation, although there is no known leakage of radiation from the facility. An expert from the Health and Research Division analyzed the readings from the Geiger counter and pronounced them unexplained. (NICAP, "Lab Employee Sees 'the Flying Saucer' / Radiation Detected"; Clark III 950; Clark IV 1064)

1950, October 24 — 6:23 p.m. An unidentified target appears on radar at Knoxville (Tenn.) Airport, flying in restricted air space above Oak Ridge, Tennessee. A fighter jet is scrambled to the area but fails to see anything, and the target disappears at 7:20 p.m. At 6:30 p.m., a flying object appears at an altitude of 5,000 in approximately the same location in Oak Ridge, Tennessee, as the previous day's sighting. (NICAP, "Asst Security Chief UFO / Knoxville Tracks"; Clark III 950; Clark IV 1064)

1950, October 25 — Republic Studios releases a 12-part serial, *Flying Disc Man from Mars*, the first alien-invasion movie. Mota from Mars tells scientist Dr. Bryant: "Ever since you people started working with atomic power and explosives, we have been watching you closely. We keep large atomic-powered patrol ships permanently stationed just outside your field of gravity and we make our closer inspection in small flying discs such as the one I was flying when you had me shot down." (Internet Movie Database, "Flying Disc Man from Mars"; Curt Collins, "The First Flying Saucer Invasion Movie," The Saucers That Time Forgot, June 8, 2023)

1950, November 2 — 6:20 p.m. Harold T. Wilkins sees a yellow luminous ball moving silently in the south at an altitude of 2,500 feet on a level trajectory from a house in Bexleyheath, Kent, England. It disappears into a belt of cumulus clouds near the zenith. (Harold T. Wilkins, "The Strange Mystery of the Foo Fighters," *Fate* 4, no. 6 (Aug./Sept. 1951): 98–106)

1950, November 5 — Four Pan American Airways employees (Fred Wilkinson, Patrick Joseph Maloney, Fred Perrior, and E. Newman) see a bright object fly east to west over Heathrow Airport, London, at 1,000 mph. ("Was It a Flying Saucer over London?" London *Sunday Dispatch*, November 12, 1950, p. 1; "Saucers over England," *Fate* 4, no. 2 (March 1951): 18)

1950, November 7 — A military pilot flying a Douglas AD-4Q Skyraider near Lakehurst, New Jersey, engages in a dogfight with a steady white light that he at first mistakes for an aircraft. He gets on its tail, then the light reverses suddenly and passes 100–200 feet above his plane at incredible speed. He again tails it and the same thing happens. The light continues to "turn about me in wide, climbing turns, making about two orbits to my one." He abandons chase at 11,500 feet. (NICAP, "Light Makes 5–6 Head On Passes at Navy Plane"; Sparks, p. 102; *Hynek UFO Report*, pp. 68–70)

1950, November 9 — The destroyer USS *Blue*, based in San Diego, makes radar contact with an unidentified vessel, possibly a submarine, off the coast of southern California. ("Navy's 'Mysterious Object' Regarded As Possible Sub," *Escondido (Calif.) Daily Times-Advocate*, November 10, 1950, p. 1; Dolan, USO1, 136–137)

1950, November 10 — Col. Harold E. Watson at AMC brings in the press, including news columnist Bob Considine, for an in-depth interview on flying saucers. Watson says: "I've seen lots of flying saucers…and every single saucer turned out to be the sun shining off the wing or body of a distant DC-4, or jet, or a weather balloon, or it was a reflection off a water-tank or something else that is readily explainable." He characterizes witnesses as crackpots, religious fanatics, publicity hounds, or practical jokers. Considine asks him about airline pilot witnesses. Watson accuses them of being fooled by optical tricks and the power of suggestion. ("Flying Saucers Simply Don't Exist, Says Chief Air Force Investigator," *Honolulu (Hawaii) Star-Bulletin*, November 10, 1950, p. 18; Bob Considine, "Gagsters Keep Air Force Busy Trailing Their Tips," *Lima (Ohio) News*, November 16, 1950, p. 13; Swords 107–108)

1950, November 17 — Telenews Productions releases a 9½-minute short film, *The Flying Saucer Mystery*, apparently the first UFO documentary. The film's main focus is on the best new evidence of 1950, the alleged first authentic photographs and motion picture film of flying saucers, the two snapshots by farmer Paul Trent, and the film shot by *Louisville (Ky.) Times* photographer Al Hixenbaugh on June 27, 1950. It also features UFO witness Arthur Weisberger of Tucson, Arizona, describing his sighting, apparently the only record of the event, as well as Donald E. Keyhoe and Admiral Calvin M. Bolster. The film is apparently only shown for a few months and rotates among the Telenews Theaters across the nation. It is lost for decades until it resurfaces in the 1990s. ("Flying Saucer Mystery," historycomestolife YouTube channel, July 3, 2010; Curt Collins, "The First UFO Documentary: *The Flying Saucer Mystery*," The Saucers That Time Forgot, January 9, 2020; "The First UFO Documentary: *The Flying Saucer Mystery*," Eyes on Cinema YouTube channel, August 5, 2023)

1950, November 21 — Wilbert B. Smith writes a top secret memo to the Canadian Controller of Telecommunications claiming that he has talked to Canadian embassy staff in Washington, D.C., who tell him that the UFOs are the "most highly classified subject in the US government" (what Robert I. Sarbacher told him) and that a "concerted effort is being made by a small group headed by Dr. Vannevar Bush." Sarbacher later verifies the information, saying the small group existed within the Research and Development Board. (W. B. Smith, "Memorandum to the Controller of Telecommunications," November 21, 1950; NICAP, "The Smith Memo, November 21, 1950"; Good Above, pp. 183, 464–466; Grant Robert Cameron, "Smith/Sarbacher Clarifications," UFO UpDates, February 10, 1997; Michael Hall and Wendy Connors, "The Research and Development Board: Unanswered Questions," *IUR* 26, no. 2 (Summer 2001): 10–11; Grant Cameron and T. Scott Crain Jr., *UFOs, Area 51, and Government Informants*, Itsallconnected, 2021, chapter 2)

1950, November 26–27 —11:50 p.m. A "mysterious lighted object" flashing red, white, and green lights is seen above Huron (South Dakota) Regional Airport. Weather Bureau observer Gene Fowler, Winfield Henry of the Civil Aeronautics Administration, and Gordon Moore and Chet Fuqua, ground personnel at Western Airlines, go up to the roof of the airport administration building for a better look. Fowler is able to watch it through a theodolite used for weather balloons for 8 minutes. He says, "The azimuth reading changed from 147 degrees to 161 degrees during that period and went up seven degrees vertically." The Rapid City weather bureau and Aberdeen CAA in South Dakota estimate the object is 40–50 miles northwest of Bismarck, North Dakota. The object reappears at 1:30 a.m. and is visible, sometimes hovering, until 3:00 a.m. when it disappears to the northwest. In Aberdeen, CAA aircraft communicator William B. Hiller sees a star-like object at 2:00 a.m. and watches it for 90 minutes. It changes colors, glowing white, green, and red alternately. ("Mysterious Sight May Be 'Saucer,'" *Rapid City*

(S.Dak.) Journal, November 27, 1950, p. 3; Loren E. Gross, *UFOs, a History: Volume 7, August–December 1950*, The Author, 1982, pp. 59–60)

1950, November 27 — Bill Blair, a commercial pilot and flight instructor, watches six elliptical objects in loose echelon formation over Evansville, Wisconsin. They are making noises like a helicopter and are flying at 500 mph at 10,000 feet. (UFOEv, p. 34)

1950, November 29 — 5:55 p.m. Numerous unidentified targets appear on the radar scope at the 662nd AW Radar Detachment at McGhee Tyson Airport, Alcoa, Tennessee. The targets are above the restricted area at Oak Ridge, Tennessee. A fighter aircraft is scrambled, but reports no visual contact. Most of the targets are visible on the radar scope for 2–3 hours. At 7:00 p.m., the graph record of a Geiger counter at Oak Ridge indicates an unaccountable rise in alpha particles and a slight rise in gamma radiation at the same time. The AEC advises that there are no known "argon releases" at the facility. (NICAP, "Radar Tracks UFOs over Oak Ridge"; Clark III 950; Clark IV 1064)

1950, November 30 — 1:51 p.m. A single unidentified target appeared on Knoxville, Tennessee, radar scopes ranging 12–21 miles west to northwest of the station, disappearing at 2:05 p.m. At 5:30 p.m., numerous unaccountable targets appear on radar. They are so numerous they cannot be counted or plotted, and they remain visible until approximately 11:30 p.m. or 12:00 midnight. At least nine highly qualified persons witness the radar blips. (NICAP, "Radar Tracks UFOs over Oak Ridge"; Clark III 950; Clark IV 1064)

1950, December — The US seaplane tender USS *Gardiners Bay* is steaming up the channel from Incheon, South Korea, when the crew sees two mysterious, smoke-trailing objects that strike the water at tremendous speed. Two columns of water rise to 100 feet in height. No aircraft are sighted overhead. ("Sighting Flying Discs Again?" *Naval Aviation News* 32, no. 2 (February 1951): 26; Sanderson, InvRes, p. 43; Dolan, USO1, 141)

1950, December — Science writer Gerald Heard publishes *The Riddle of the Flying Saucers* in the UK, in which he speculates that with conditions on Mars being severe, the only intelligent beings that can exist there would be advanced insects. A US edition is published in April 1951 as *Is Another World Watching? The Riddle of the Flying Saucers.* (Gerald Heard, *The Riddle of the Flying Saucers*, Carroll and Nicholson, 1950; Lyle Zapato, "Of Bees and Men: *The Riddle of the Flying Saucers*," ZPi blog, January 27, 2015; Clark III 459; Graff 65; Clark IV 504–505)

1950, December 2 — Cmdr. Charles Peter Edwards, Canadian Deputy Minister of Transport for Air Services, approves Wilbert B. Smith's proposed plan to use the Department of Transport lab and field facilities during off-hours to gather quality UFO data. It is called Project Magnet. ("What Was the Truth about Project Magnet?" *Flying Saucer Review* 10, no. 4 (July/Aug. 1964): 29; Stuart Nixon, "W. B. Smith: The Man behind Project Magnet," *UFO Quarterly Review* 1, no. 1 (Jan./Mar. 1973): 2–17; Good Above, pp. 183–184; "Project Magnet – Wilbert B. Smith," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; Clark III 1029, 1078; Clark IV 1144, 1194)

1950, December 5 — Engineer Lt. Col. John R. Hood disperses radiation counters around the Oak Ridge, Tennessee, National Laboratory's restricted area. The intent is to map the presence of any unusual radiation, in the wake of numerous UFO reports over the facility. He also sets up a source of radioactive material to see if its presence has an effect on the air above it. If the air is unusually ionized, it might be the source of the anomalous radar targets. He also mentions using a magnetometer array, but there is no documentation of the result of this effort. (Loren E. Gross, *UFOs, a History: Volume 7, August–December 1950*, The Author, 1982, pp. 64–65; Swords 107)

1950, December 6 — 10:30–11:04 a.m. The ConAC Air Defense Controller notifies the HQ USAF that a number of unidentified aircraft are approaching the northeast area of the United States and that there is no reason to believe they are friendly. By radar contact it is determined that approximately 40 aircraft are in the flight at 32,000 feet on a course of 200° northeast of Limestone, Maine. The White House is notified at 10:31 a.m., and President Truman discusses the reports in a meeting with UK Prime Minister Clement Attlee. (NICAP, "Radar-Inspired National Alert"; Sparks, p. 103; Bruce Maccabee, "Immediate Saucer Alert! The Mystery of December 6, 1950," July 1999; Clark III 824; Clark IV 892)

1950, December 6 — While F-94s are being tested at Dyess AFB near Abilene, Texas, radar catches a UFO on a high-speed intercept course with the planes. Some personnel see the object shortly afterward. Col. Robert B. Willingham claims it is not a missile. It makes 90° turns at high speed. NORAD tracks it and the object is said to crash near the Mexican border near Del Rio, Texas. Willingham and a copilot take a light aircraft to the site but are escorted away. They do see part of the crash field and pick up a small piece of metal from the ground. Willingham takes it to a Marine Corps metallurgy lab in Hagerstown, Maryland, for analysis but never sees it again. Dubious MJ-12 documents apparently refer to this UFO crash as occurring on the Mexico side of the US border in the area between El Indio, Texas, and Guerrero, Coahuila, Mexico. (Leonard H. Stringfield, *UFO Crash*

Retrievals: Status Report II, The UFO Crash/Retrieval Syndrome: New Sources, New Data, The Author, January 1980, p. 58; Kevin D. Randle, *A History of UFO Crashes*, Avon, 1995, pp. 192–193; "Del Rio 1955," Texas UFO Museum and Research Library, March 22, 2010; Kevin D. Randle, "Del Rio UFO Crash and MJ-12," A Different Perspective, July 21, 2010; Kevin D. Randle, "MJ-12's Fatal Flaw and Robert Willingham," *IUR* 33, no. 4 (May 2011): 4–7; "El Indio 1950," Texas UFO Museum and Research Library, February 5, 2014; Clark III 338; "Dr. Eric Davis Confirms Del Rio, Texas, UFO Event Was a Successful Crash Retrieval," Silva Record, October 28, 2018; Kevin D. Randle, "UFO Crash Retrievals: Three with Explanations," A Different Perspective, January 15, 2024; "F-86 Sabre Pilot Robert Willingham Talks Witnessing a UFO Crash near the Texas-Mexico Border, 1955," Eyes On Cinema YouTube channel, July 8, 2024; Clark IV 374–375)

1950, December 6 — 5:00 p.m. Former aircraft purchasing agent Harry Lamp and four boys spot a 75-foot silver object hovering at 3,000 feet above the northern part of Fort Myers, Florida. Through 10x binoculars Lamp sees it is 3–4 feet thick at the edges and 14 feet thick in the center, which revolves as it hovers. The object has a red rim with two white and two orange jets along it. It flies away at high speed. (NICAP, "Large Object with Bubble on Top"; Sparks, p. 103)

1950, December 8 — The FBI office in Richmond, Virginia, sends a telegram to FBI headquarters saying that local Army Intelligence has been put "on immediate high alert for any data whatsoever concerning flying saucers." It adds, "CIC advises data strictly confidential and should not be disseminated." (Auerbach, [teletype memo], December 8, 1950; ClearIntent, p. 175)

1950, December 10 — 7:30 p.m. RAF Group-Captain B. S. Cartmel and two friends are at the Wilderness Golf Course near Sevenoaks, Kent, England, when they see a bright light moving east to west in complete silence. It maintains a steady height of 3,000 feet moving at 130–150 mph and is visible for 5 minutes. (Good Above, pp. 28–29)

1950, December 12 — The AFSWP's Project Nutmeg officially selects the Tonopah–Las Vegas Bombing and Gunnery Range, Nevada, for domestic nuclear testing. (Wikipedia, "Nevada Test and Training Range")

1950, December 13 — 4:55 p.m. J. G. F. Moult and his mother are sitting at their home in Kimberley, South Africa, when they observe a bright object "like a huge mirror in the sky," hovering, and moving laterally and up and down for about 3 minutes. It goes behind a cloud but can still be seen, appearing like a "piece of magnesium wire burning with a bright, purplish-white light." It dives through the clouds, turns sharply, and shoots out of sight. (David Marais, "The Outspan Magazine, January 1, 1954")

1950, Late December — USAF Capt. J. E. Broyles sees an aluminum-like oval object with a conical tail moving slowly in the sky near Cheyenne, Wyoming. (UFOEv, p. 20)

1950, December 26 — Harvard University historian William L. Langer, special assistant for intelligence analysis to US Secretary of State James F. Byrnes, organizes the CIA Office of National Estimates, a forerunner of the National Intelligence Council. (Central Intelligence Agency, "Staff Conference: Minutes of Meeting Held in Director's Conference Room, Administration Building, Tuesday, 26 December 1950, at 1100 Hours")

1950, December 27 — Sunset. A TWA flight, piloted by Capt. Art Shutts, is enroute from Chicago to Kansas City. Near Bradford, Illinois, Shutts notices a bright white light ahead of the plane, also flashing red and green occasionally. It begins to "wobble and swerve unsteadily," then streaks back and forth in a north-south line through an arc of 10–30°, changing direction abruptly. He notices that the horizon near the UFO appears to vibrate as if light is distorted, especially after the object puts on a burst of speed. It dims to a pinpoint and begins to slowly move south. Suddenly it lurches, accelerates rapidly, zooms upward at a 45° angle, makes a nearly square turn, plunges downward, and disappears below the horizon to the north. It is visible for 25 minutes. (William A. Dixon, "Saucers or Illusions?" *Air Facts* 14 (September 1951): 37–43; UFOEv, p. 40)

1951

1951 — While flying an F-86 Sabrejet over West Germany, USAF pilot Gordon Cooper sees several metallic discs flying at a high altitude. He claims to "have two days of observation of many flights of them, of different sizes, flying in fighter formation, generally from east to west over Europe." (Gordon Cooper and Bruce Henderson, *Leap of Faith: An Astronaut's Journey into the Unknown*, HarperCollins, 2000, pp. 80–81; "UFO Sightings by Astronauts," Syti.net, January 30, 2001; "Astronaut Gordon Cooper Talks about UFOs," Elhardt YouTube channel, December 27, 2007; James Oberg, "The Puzzle of Astronaut Gordon Cooper's UFO Stories," jamesoberg.com, 2014)

1951 — The intelligence unit of the 1st Marine Aircraft Wing puts out periodic intelligence reports through 1953 that cover ground and air operations, unusual incidents, and UFO reports in Korea. The UFO reports are in a different category from unidentified aircraft. Some of these reports do not appear in Project Blue Book. (Jan Aldrich)

1951 — The Atomic Energy Commission uses its parallel system of secret-keeping to conduct controversial research, development, and engineering on aircraft and pilot-related projects, entirely without oversight.

1951 — Marc Thirouin and Henri René "Jimmy" Guieu found the first French UFO group in Paris, the Commission Ouranos. It begins publishing *Ouranos* in June 1952. By 1954, its name changes to Commission Internationale d'Enquêtes sur les Soucoupes Volantes and it publishes 32 issues through 1966, reviving in 1972 after Thirouin's death with a new series that lasts until 1980. (*Ouranos*, no. 1; Eghigian, *After*, p. 108)

1951, January — Author and journalist Bob Considine's article appears in *Cosmopolitan*, debunking all UFO stories as delusions and hoaxes, and quoting a weary Air Force Col. Harold E. Watson, who has replaced Col. Howard M. McCoy in Project Grudge. It offends people so badly that many pilots afterward refuse to report UFO sightings to the Air Force. USAF Public Information Officer Clare Welch, who has set this interview up, believes the Air Force has better things to do and is out of step with Cabell's renewed interest. (Bob Considine, "The Disgraceful Flying Saucer Hoax!" *Cosmopolitan*, January 1951, pp. 32–33, 100–102; Swords 113–114; Clark III 933; Powell, *Keyhoe*, 75–76; Clark IV 1043

1951, January 1 — 7:00 a.m. Katie Sowell watches an object about 30–50 feet in diameter, like two "upside down saucers" revolving counterclockwise and darting low over her farmhouse near Oak Grove, Louisiana. It has rectangular, opaque windows. It is seen for 15–20 minutes at close range. It banks and disappears, going straight up. (*Huntsville (Ala.) Times*, February 5, 1974; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1951, Supplemental Notes*, The Author, 2000, pp. 1–2)

1951, January 1 — The Air Defense Command, inactivated since July 1, 1950, is reinstated as a major command at Mitchel AFB [now closed] in Long Island, New York. The HQ is moved to Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, a week later. (Wikipedia, "Aerospace Defense Command")

1951, January 16 — Raymond Dugan and Raymond E. Stiles, members of the General Mills Aeronautical Research Laboratory balloon project, observe a round disc near their Skyhook balloon over Artesia, New Mexico. The balloon is at a height of 112,000 feet. A short time later, Dugan, Stiles, and four civilian pilots at Artesia Airport see two similar objects circling the same balloon that then fly off to the northeast. (NICAP, "Two Discs Approach Skyhook"; Project Blue Book, [Artesia documents]; Sparks, p. 104; Ruppelt, p. 120; Jacques Vallée and Janine Vallée, *Challenge to Science: The UFO Enigma*, Regnery, 1966, pp. 1–3; Carl Sagan and Thornton Page, eds., *UFO's: A Scientific Debate,* Cornell University, 1972, pp. xxi–xxii; J. Allen Hynek, *The UFO Experience*, Ballantine ed., 1974, pp. 69–70; Swords 166)

1951, January 20 — 9:20 p.m. Sioux City, Iowa, CAA Control Tower operator John M. Williams sees an odd light in the west. Capt. Lawrence W. Vinther and copilot James F. Bachmeier of Mid-Continent Airlines Flight 9 takes off and Vinther is asked by the tower to look for the light. While still in a climbing turn at about 1,000 feet, the pilots spot the object to the north-northwest at about 8,000 feet and 4 miles away. It looks like a B-29 fuselage with wings but no engines and blinks some lights like running lights. The object comes towards the DC-3, flies across the nose within 200 feet, then suddenly reappears on the other side, paralleling them for 2–3 seconds. The object then flies under them and disappears to the northwest. This is one of the first reports to make it into the CIRVIS system specified by JANAP 146. (NICAP, "UFO Buzzes DC-3"; Sparks, p. 104; Lawrence W. Vinther, "Another Saucer Mystery," *Flying* 48 (June 1951): 23, 56, reprinted by Project 1947; H. B. Darrach Jr. and Robet Ginna, "Have We Visitors from Space?" *Life* 32, no. 14 (April 7, 1952): 90–91; Ruppelt, pp. 84–85; Jan Aldrich; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 43–44)

1951, January 21 — 4:20 p.m. A UFO that appears to be over the restricted area at Oak Ridge National Laboratory, Tennessee, is sighted on the radarscope of an F-82 fighter. The GCI gives the go-ahead to intercept the target. The radar set on the F-82 is locked on and the run begins. The interception is unsuccessful, and the fighter returns to base. In all, three passes are made at targets, all with radar indications, but they cannot be completed since the target is over the restricted area that includes the X-10 plant. (NICAP, "F-82 Attempts Intercept of UFO over AEC Plant / Radar"; Sparks, p. 104)

1951, January 22 — 11:00 a.m. USAF pilots Capt. Ernest W. Spradley Jr. of Aerial Photo Lab and Capt. James E. Cocker of All-Weather Flying Division (both based at Wright-Patterson AFB in Ohio), a General Mills Aeronautical lab project engineer named McAleese, and another airman are flying in a C-47 heading east about 50 miles southeast of Holloman AFB, New Mexico, at about 10,000–12,000 feet, tracking a Project Gopher plastic balloon at about 50,000–70,000 feet, when they see a bright star-like object adjacent to the pear-shaped balloon. As they approach and fly under the balloon, they notice the object descend to the balloon's level and grow larger in apparent size until about one-quarter to one-half the size of the 70-foot balloon. It appears to be round and flat like a dime, milky white or silvery in color, with a clear outline. Cocker and McAleese leave the cockpit and go to the

astrodome to observe the object. After 3 minutes they see the object separate from the balloon and head west at high speed. After about 1 minute it emits a series of 3 bright photoflashes at one-second intervals and disappears from sight. (NICAP, "C-47 Crew Encounter Object near 'Gopher'"; NICAP, "White Object Paces Balloon"; Sparks, p. 105; Swords 114–115)

1951, January 27 — An Air Force B-50D bomber drops the first atomic bomb, the Able blast, for testing in the US onto a dry lake bed known as Frenchman Flat, inside the Nevada Test Site. (Wikipedia, "Operation Ranger")

1951, January 28 — 9:26 p.m. A series of blue-green flashes of light in the sky are noticed by alarmed residents over a three-mile area on the east side of Detroit, Michigan. At the same time, radios and television sets flicker and house lights dim. The event last for 15 minutes. On January 30, Detroit Edison Company explains the lights were caused by a lightning arrester at Eight Mile and Mound Road that blew during testing, causing a power surge that caused lights to fail. ("Weird Flashes Play Havoc on East Side," *Detroit (Mich.) Free Press*, January 29, 1951, p. 1; "Power Test Causes Eerie Light Flashes," *Detroit (Mich.) Free Press*, January 30, 1951, p. 7)

1951, January 29 — USAF Lt. Col. Milton D. Willis replies to Robert B. Sibley, president of the Aero Club of New England, who has written Secretary of the Air Force Thomas K. Finletter asking that the UFO project be reinstated because pilots are indeed seeing something that could be extraterrestrial. Willis writes that, although the UFO project is disbanded, the Air Force still investigates incidents and sends them to AMC if necessary, and an officer (Willis himself, who has replaced Boggs) monitors all UFO reports. As an aside to his superiors, Willis in a memo notes that "there have been several incidents, during the last six months, which cannot be explained and further investigation may be necessary." (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1951, Supplemental Notes*, The Author, 2000, pp. 7 –8; Swords 113)

1951, February 9 — 9:55 p.m. The crew (including Lt. Fred W. Kingdon Jr. and US Naval Reserve Lt. Graham E. Bethune) and passengers of a US Navy R5D transport flying west from Keflavík, Iceland, at 10,000 feet about 212 miles northeast of Gander, Newfoundland, observe a large orange-rimmed UFO with a dark center. It is about 400 feet in diameter and first seen moving above the surface of the ocean. As the plane approaches, the object changes colors, executes a sudden 180° turn and disappears over the horizon. Over time, several attempts to disguise the participants (such as Lt. George Williams on February 21) have resulted in confusion over the date. (NICAP, "The Bethune Encounter"; NICAP, "Huge Object Rushes up from Ocean Surface"; Keyhoe, FSTS, pp. 9–26; "Casebook: February 8, 1951," *UFO Investigator*, September 1970, p. 3; "Casebook: February 8, 1951," *UFO Investigator*, October 1970, p. 3; "Unidentified Flying Object: A Provocative Tale," *Naval Aviation News*, June 1973, pp. 18–19, reprinted by Project 1947; Keyhoe, *Aliens from Space*, Signet ed., 1974, pp. 78–79; Loren E. Gross, *UFOs, A History: 1951*, The Author, 1983, pp. 10–11; Good Above, pp. 268, 486; Graham E. Bethune, "Lights on the Surface," 1999; Good Need, pp. 137–139; Kevin H. Knuth, Robert M. Powell, and Peter A. Reali, "Estimating Flight Characteristics of Anomalous Unidentified Aerial Vehicles," *Entropy*, September 25, 2019; Patrick Gross, "The Bethune Flight 124 Airmiss in 1951"; Dolan, USO1, 142–144)

1951, February 13 — William Webster, chair of the Defense Department's Research and Development Board, convenes a press briefing at the Pentagon and announces that "Careful studies have been made [referring to the upcoming article in *Look*]. I don't believe anyone who has the opportunity to be informed and to look into this thing believes there is a flying saucer as such. As far as I know there is nothing to the flying saucers." ("Take Issue with Statement about 'Saucers,'" *Mount Pleasant (Iowa) News*, February 14, 1951, p. 4; Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 13–14)

1951, February 19 — 7:20 a.m. Capt. Jack Bicknell and Radio Officer D. W. Merrifield are flying a Lockheed Model 18 Lodestar aircraft out of Nairobi, Kenya, when they see a bright object hanging motionless about 10,000 above Mount Kilimanjaro in Tanganyika [now Tanzania]. They watch it for 3 minutes, then tell the passengers about it. Bicknell observes it through binoculars and sees a "metallic, bullet-shaped object which must have been over 200 feet long." It has a vertical fin at one end, and at regular intervals along the fuselage are vertical dark bands. It remains completely stationary for 17 minutes. Two passengers take photos of it. Radio Officer Roy Overstreet, a passenger, shoots 30 feet of color film with a telescopic lens on his cine camera. Then it begins rising and moving eastward, disappearing at 40,000 feet. It leaves no vapor trail. A still from Overstreet's film, showing only a tiny dot of light, is published in the *Natal Mercury* on March 14, but the film is now considered lost and the other photos have never surfaced. (NICAP, "Lodestar Crew Sees Stationary Silver Elongated Object"; Sparks, p. 105; "The Flying Saucer: Captain Bicknell's Own Story," Nairobi (Kenya) *Sunday Post*, February 25, 1951, p. 15; "The Most Authentic Flying Saucer Story of Them All," *London Sunday Dispatch*, February 25, 1951, p. 1; "Pilot Made Sketch of 'Flying Saucer,'" *London Sunday Dispatch*, March 4, 1951, p. 1; "'Saucer' Flies on Ciné Film: Or Does It?" *Natal Mercury* (Durban, South Africa), March 14, 1951; "Two Classic Sightings," *Flying Saucer Review* 9, no. 3 (May/June 1963): 11–12; Center for UFO Studies, [case documents]; UFOEv, p. 124; Patrick

Gross, "February 19, 1951, Mount Kilimanjaro, Africa"; Barry Greenwood, "Mt. Kilimanjaro, Tanganyika, February 19, 1951: Photo Located," *UFO Historical Revue,* no. 16 (July 2015): 1–4)

1951, February 19 — *Aviation Week* praises the upcoming article in *Look* identifying UFOs as Skyhook balloons. (Robert H. Wood, "Saucers, Secrecy, and Security," *Aviation Week* 54 (February 19, 1951): 50, reprinted by Project 1947)

1951, February 20 — The *Air Intelligence Training Bulletin* publishes a facetious news item on how to recognize flying saucers, but implies they are all reflections. ("Recognition of Flying Saucers," *Air Intelligence Training Bulletin,* February 20, 1951)

1951, February 25 — Project Twinkle head and chemist Anthony O. Mirarchi at the USAF Cambridge Research Laboratory in Massachusetts tells the Associated Press that he thinks UFOs are not "just balloons" (in response to Liddel's upcoming article) and urges a full investigation of what could be experiments by a "potential enemy of the United States." He says that UFO reports show "maneuvered motion" that are not characteristic of a natural phenomenon. He says the "Navy report is erroneous. It lulls people into a false sense of security." He reminds the nation of the critical installations in New Mexico, including Los Alamos, and argues that they are a target of reconnaissance: "If they were launched by a foreign power, then they could lead to a worse Pearl Harbor than we have ever experienced." He blasts the US government for a policy of "suicide by secrecy." The FBI and Air Force mull prosecuting Mirarchi for violating AFR 205-1. ("A.F. Scientist Warns Saucers Major Threat," *Dayton (Ohio) Daily News*, February 26, 1951, p. 12; "Scientist Fears Flying Saucers Portend a Worse 'Pearl Harbor,'" *Oklahoma Daily Oklahoman*, February 26, 1951, p 1; Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 18–19; Swords 119–120)

1951, February 27 — Physicist Urner Liddel, Office of Naval Research, says in a *Look* magazine article that there is not a single reliable UFO report that is not attributable to the cosmic [Skyhook] balloons. The article is based on Liddel's study in ONR's *Research Reviews* in March. He claims to have studied "hundreds" of sightings in detail (probably from Project Grudge). As for UFOs sighted by Skyhook scientists themselves, he discounts them because these technicians are not aware of mirages and internal reflections in optical devices. However, Liddel later changes his mind about the balloons being the sole source in April 1953, saying that most reports are due to reflection, refraction, diffraction, and meteors. (Richard Wilson, "A Nuclear Physicist Exposes Flying Saucers," *Look*, February 27, 1951, pp. 60–64; Urner Liddel, "Bogies at Angels 100," *Research Reviews*, March 1951, pp. 1–6; Urner Liddel, "Phantasmagoria or Unusual Refractions in the Atmosphere," *Journal of the Optical Society of America* 43, no. 4 (April 1953): 314–317; Swords 117–118)

1951, March — A ghost light is seen in Suffolk County, Virginia, and investigated by Nansemond County Deputy Sheriff Hurley Jones, who sees the light three times. It looks like a car headlight 5 feet off the ground, three times. Jeston Reid said his father had seen the light in the 1870s. The location is apparently either Turlington Road or Jackson Road [they intersect] south of Suffolk, since locals say the old railroad along the Jackson and Whaleyville logging road used to run down that way, and the light has also been compared to a locomotive headlight. Some 200 people have been gathering along the road, hoping to catch a glimpse. ("Mystery Light Is a Puzzle in Nansemond," *Richmond (Va.) Times-Dispatch*, March 6, 1951, p. 2; "Nansemond's Mystery Light Is Nothing New to Old-Timers," *Richmond (Va.) Times-Dispatch*, March 7, 1951, p. 2; "Mysterious Suffolk Light Has Deputy Believing in Ghosts," *Statesville (N.C.) Daily Record*, March 8, 1951, p. 1)

1951, March — 11:30 p.m. Operations Officer Robert Wood is aboard the *USS Dyess* approximately 125 miles southeast of Cape May, New Jersey, when he picks up a radar target coming in from due east at a speed of 98–104 mph and an altitude of 3,000–4,000 feet. It stops and hovers about 30 miles away. Wood notifies the bridge, and the captain orders the ship to change course toward the object. About 30 minutes later, the UFO suddenly takes off toward the north at 3,000 mph, getting to within 35–40 miles south of Nantucket Island, Massachusetts, before it zooms straight up. Altitude-determining radar tracks the object to 100 miles altitude. ("March, 1951: Approximately 125 Miles SE of Cape May, N.J.," Project 1947)

1951, March 14 — A group of nine Bell Aircraft engineers are flying at 15,000 feet in a B-50 Superfortress near Holloman AFB, New Mexico, during a test of a secret Bell aircraft. They spot a group of unknown objects flying in a confusing "swirl" that breaks into a V-formation and back to a "swirl," then a V again. The objects are slightly higher than the aircraft and seem to be moving at high velocity. The engineers insist the objects are not geese, which actually can fly this high. (This may be the same incident as the August 30, 1950, case at Holloman.) (Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 21–22)

1951, March 15 — 10:20 a.m. George F. Floate, chief engineer of the Delhi Flying Club, and two assistants observe a swirly white cloud moving from north to south at about 4,000 feet altitude near the club's hanger in New Delhi, India. The cloud is about 700 feet in length. At the end of it a bullet-shaped object appears, approximately 100 feet long and as big around as a C-47 fuselage. The witnesses shout out, and 17–20 people rush out of the hanger

and see the object. It heads south for about 3 minutes where it makes an apparent loop, coming back over the field. At the top of the loop it is out of sight, but it is seen again in its dive. After recovering straight and level flight, the UFO proceeds to the southwest until it is lost to sight. Its speed is estimated at three times greater than the cruising speed of a British Vampire jet. The total duration is about 7 minutes. (NICAP, "20+ Top Shelf Witnesses / Metallic Cigar"; Sparks, p. 106)

1951, Early spring — Dusk. US Army Pfc. Francis P. Wall is on maneuvers with the 27th Infantry Regiment near Cheorwon, South Korea, when he sees an orange light like a jack-o-lantern coming down a mountain. Artillery airbursts do not seem to harm it. As it approaches, it turns into a brilliant blue-green disc pulsating with light. Wall asks permission to shoot and fires a round from his M-1 rifle at it. The object starts moving erratically from side to side, flashes on and off, and makes an engine-like noise. It sweeps the soldiers with a beam of light, and they feel a burning and tingling sensation. They retreat to their bunkers and continue to watch the object, which is still lighting up the area, and then it shoots away at a 45° angle. (Haines, *Korea*, pp. 18–27; Richard F. Haines, "GI Fires on UFO in Korea," *IUR* 15, no. 6 (Nov./Dec. 1990): 23–24)

1951, April 4 — The Truman administration forms the Psychological Strategy Board to coordinate and plan for psychological operations. The board is composed of the Under Secretary of State, the Deputy Secretary of Defense, and the Director of Central Intelligence, or their designated representatives. The board's first director is Gordon Gray, later National Security Advisor during the Eisenhower administration. The board is created in response to the growth of Office of Policy Coordination covert activities during the Korean War. The PSB is tasked with creating propaganda that will subconsciously turn people away from communism and toward democracy. It is abolished in 1953. (Wikipedia, "Psychological Strategy Board")

1951, April 7? — Night. New Zealand sailor Adrian Hayter is navigating his 32-foot yawl, *Sheila II*, into Djibouti on the Gulf of Tadjoura when he and his crewmate Mike notice a light to the southeast that seems to be drawing nearer. It appears similar to a lighthouse beam that is sweeping under the surface. It lights up the sails with a bright greenish light as it passes under the yawl, then moves to the western horizon. Another beam appears in the east, followed by four others at regular intervals and in complete silence. (Adrian Hayter, *Sheila in the Wind*, Hodder and Stoughton, 1959, p. 99; Dolan, USO1, 144–145)

1951, April 7 — Howard Hawks's film *The Thing from Another World* opens, starring Margaret Sheridan, Kenneth Tobey, and James Arness, about a crashed flying saucer found in the Arctic. It ends with the haunting lines by Douglas Spencer: "Watch the skies, everywhere! Keep looking. Watch the skies!" (Wikipedia, "*The Thing from Another World*"; Internet Movie Database, "The Thing from Another World"; Bill Warren, *Keep Watching the Skies!*, McFarland, 2010, pp. 768–775)

1951, April 11 — Air Defense Command issues a memo on "Unconventional Aircraft" to all USAF facilities, encouraging them to report sightings in a timely manner. (Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 25)

1951, April 17 — Project Grudge's Col. Harold E. Watson notes that JANAP 146 has no provision for UFO reports to be sent to Wright-Patterson AFB under the CIRVIS system. (Jan Aldrich)

1951, April 21 — Drones are again used in the series of thermonuclear tests designated Operation Greenhouse at Enewetak Atoll in the Marshall Islands. During the Easy detonation, two T-33 drones are lost. One receives heavy damage from the shock wave, loses control, and crashes; the other refuses to respond to control signals and crashes on uninhabited Bogullua Island. The Air Force concludes that unmanned samplers are unreliable. (M/Sgt Leland B. Taylor, *History of Air Force Atomic Cloud Sampling*, US Special Weapons Center, January 1963, pp. 34–37; Jacobsen, *Area 51*, p. 225)

1951, April 23 — Col. Harold E. Watson writes a memo to the USAF Director of Intelligence, explaining his view that "little if any results" have been obtained from Project Grudge other than the objects are not from a foreign power. But since there is still some doubt, all reports should be forwarded to AMC at Wright-Patterson AFB in Ohio. (Swords 121)

1951, May 15 — While serving with US occupation forces in Austria, a soldier meets a helmeted figure who paralyzes him with a pencil-like weapon and leads him into a saucer, which they enter through an opening in the top. The craft flies into space to a Mars-like planet where it lands on a platform in a field. The soldier sees similar beings in the parking lot as well as two other craft containing humans. The alien pilot returns the man the same spot on earth, in what may be an early abduction narrative. (Ron Powell, "Citizen Editor Talks to Man Who 'Visited Mars,'" *Prince George (B.C.) Citizen*, December 11, 1957, p. 1, 3; "Trip to Mars," *Space Craft Digest*, Fall 1958, pp. 13–16; Charles Bowen, "Fantasy or Truth? A New Look at an Old Contact Claim," *Flying Saucer Review* 13, no. 4 (July/Aug. 1967): 11–14; Clark III 272–273; Clark IV 312–313)

1951, May 21— Wright-Patterson's Technical Intelligence Department (T-2) becomes the Air Technical Intelligence Center (ATIC) and is assigned to the Directorate of Intelligence in the Pentagon. Project Grudge goes along with it. (Sparks, p. 12; Clark III 936; John Greenewald, "ATIC, the 1950s, and National Security Policy," The Black Vault, July 24, 2023)

1951, May 22 — 3:20 a.m. American Airlines pilot Capt. W. R. Hunt observes a blue-white, star-like object gyrating around the airplane at 21,000 feet for 20 minutes about 100 miles southwest of Dodge City, Kansas. It moves backward and forward, then up and down, then dives below the plane and speeds away. ("Mysterious Bright Light 'Plays Tag' with Airliner over Kansas," *Iola (Kan.) Register,* May 22, 1951, p. 1; Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, p. 26)

1951, Summer — Day. Army Lt. George Kinman is flying an F-51 over Augusta, Georgia at 250 mph when he notices an object ahead approaching him. Before he can take evasive action, a white disc twice as big as his plane dips and passes underneath, just missing his propellor. He swings the aircraft around, but the object is out of sight. After 15 seconds, it returns, coming straight toward him and dipping at the last minute. It repeats the performance several times for 5–10 minutes. On the last pass, it zooms above him, just missing his canopy. ("Flying Saucer 'Attack' Related by Army Flier," *Los Angeles (Calif.) Evening Citizen News*, July 30, 1952, p. 1; UFOEv, p. 23; Clark III 377; Clark IV 421)

1951, Summer — 2:00 a.m. A US Navy petty officer is on watch at NAS Quonset Point [now Quonset Point Air National Guard Station], Rhode Island, when a bright object, seemingly coming from the sea from the direction of Newport to the south, approaches and hovers directly overhead at an altitude of 200 feet. He becomes nervous and charges his carbine, but as soon as he loads it, the object disappears. (Carl Feindt, "Report #925," waterufo.net; Dolan, USO1, 148–149)

1951, Summer — A dubious story surfaces in 1956 that three UFOs had appeared above Mexico City International Airport at the same time as a visit by US Secretary of Defense George C. Marshall. (However, there is no record of a visit by Marshall at this time; apparently his first visit to Mexico was a vacation in Cuernavaca in February 1952.) According to the story, Marshall tells a "highly placed American" and "prominent medical scientist" that UFOs are interplanetary and friendly, but they have crashed accidentally on three occasions. In 1965, the American informant is revealed to be Rolf Alexander, who is in fact Allan Alexander Stirling, a New Zealand seaman who had jumped ship in 1920 and entered the US illegally. To support himself he promoted various dubious health cures while concocting a fictitious personal history. His activities were interrupted by prison sentences for mail fraud and embezzlement, and in 1954–1960 he claimed the ability to break up clouds with his psychokinetic abilities. (Ross Alexander [Curtis Fuller], "Rolf Alexander: The Man Who Smashes Clouds," *Fate* 8, no. 6 (June 1955): 42–45; "Report Tells of 'Top Brass' Attending Saucer Landing," *Flying Saucer News-Service Research Bulletin* 1, no. 9 (August 20, 1955): 3; "A Newsman's Saucer Experiences," *Flying Saucer Review* (US) 2, no. 1 (January 1956): 2–8; " Let's Talk Space: 'Flying Saucers' Are Real," *Flying Saucer Review* 2, no. 1 (Jan./Feb. 1956): 2–4; "Rolf Alexander, M.D.," *Flying Saucer Review* 11, no. 2 (Mar./Apr. 1965): 9; RosRept, p. 99; Clark III 332; Clark IV 368)

1951, June — Project Grudge only has one person on staff to investigate UFO reports, Lt. Jerry W. Cummings, who has replaced James J. Rodgers and J. L. Rohn. He reorganizes the system and uses a more open-minded approach. (Sparks, p. 14; Edward J. Ruppelt, "What Our Air Force Found Out about Flying Saucers," *True,* May 1954, p. 26; Jacobs, *UFO Controversy in America,* Signet ed., 1976, pp. 56–57; Swords 121; Clark III 933, 937; Clark IV 1043, 1047)

1951, June — The UK Flying Saucer Working Party produces its six-page final report for the Ministry of Defence's Directorate of Scientific Intelligence, DSI/JTIC Report number 7, *Unidentified Flying Objects,* classified Secret. The CIA's chief scientist, H. Marshall Chadwell, attends the meeting when the report is delivered. The report admits that no systematic investigation has been undertaken, but from the evidence examined, including reports by RAF pilots, explanations can probably be found for most reports. Copies are also submitted to Canada as well as US and UK officials. (Joe McGonagle, "Flying Saucer Working Party: Commentary," part 2, The Real UFO Project; Good Need, pp. 149–152; Mark Rodeghier, "Britain's Secret UFO Study," *IUR* 26, no. 4 (Winter 2001–2002): 21–23; UFOFiles2, pp. 38–40; David Clarke, "Flying Saucer Working Party," Dr. David Clarke Folklore and Journalism, January 3, 2015; Ian Ridpath, "Report of the UK Government's Flying Saucer Working Party (1951 June)," Ian Ridpath's UFO Skeptic Pages, January 2021)

1951, June 1 — 10:00 p.m. An ATIC official at Wright-Patterson AFB is driving west near Dayton, Ohio, when he sees a large, bluish-white light moving parallel to the car. It looks like a "stubby cigar." After 15–20 seconds, it makes a right-angle turn, becomes circular, and rapidly disappears. Its speed is "faster than an airplane, slower than a meteor." (UFOEv, p. 23)

1951, June 19 — Day. Mechanic Joseph Matiszewski hears a whistling sound as he is walking in Sønderborg, Denmark, and sees an object land in a nearby meadow. Approaching to within 150 feet of it, he finds himself paralyzed and notices that birds have stopped singing and cows seem frozen in place. Four men with brown skin and wearing black shiny suits and translucent helmets emerge from the object and send Matiszewski some telepathic messages. Eight smaller objects are ejected from the large one and float above it. Other figures inside the craft and on its deck appear to be making repairs. The objects ascend to about 300 feet and climb rapidly after that. The paralysis subsides. (Gordon Creighton, "A New FSR Catalogue, Part 2," *Flying Saucer Review* 16, no. 2 (March/April 1970): 29; Walter Webb, "UFOs and Paralysis," *Official UFO,* February 1976, p. 48; Willy Wegner, "UFO-bogen: Kapitel 19: Rumfolkene viser sig," Skeptica, September 1, 2004; Patrick Gross, URECAT, July 1, 2007)

1951, June 22 — *Life* magazine reporter Robert Emmett Ginna Jr. visits Air Technical Intelligence Center at Wright-Patterson AFB in Ohio for the first time to gather information on "Project Saucer" for an article. The visit is coordinated by Jack T. Shea, special assistant to the director of public relations. (Jan Aldrich; Michael D. Swords, "1952: Ruppelt's Big Year," *IUR* 28, no. 4 (Winter 2003–2004): 8)

1951, June 25 — The UK Flying Saucer Working Party is disbanded. (Good Need, p. 152)

1951, July — The radiation-counter network set up at Oak Ridge National Laboratory, Tennessee, in December 1950 by Lt. Col. John R. Hood hits paydirt when a UFO appears, sighted both visually and on radar over the facility. He finds that the radiation counters have detected a significant rise in some kind of emission. Hood wants to expand the equipment, adding a debris-catching pursuit plane. However, information is lacking on this case and any follow-up. (Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, p. 42)

1951, July 1 — 10:50 p.m. Four night pilots of the 1st Marine Aircraft Wing in different areas around Seoul, Korea, simultaneously report a large green ball, very bright and trailing streaks of red then blue, passing overhead at 10,000–15,000 feet. (Sparks, p. 106; Haines, *Korea*, p. 31)

1951, July 4? — 10:00 p.m. Future ufologist Irena Scott and her sister Sue are sleeping at their home in Galena, Ohio, when they wake to see a small glowing light circling their bedroom in a meandering movement, but never bumping into anything. It circles the room three times, maintaining the same shape, brightness, and size (less than one inch). After a few minutes, it moves in tight circles around the chandelier, then spirals downward, makes a noise, and emits tiny lights. Terrified, they rush out of the room and tell their father, who inspects the room but finds nothing. (Irena Scott, "Bedroom Light," *IUR* 13, no. 2 (March/April 1988): 14–15)

1951, July 9 — Day. USAF Lt. George H. Kinmon II, stationed at Lawson AFB [now Lawson Army Airfield] with the 117th Tactical Reconnaissance Wing, is flying an F-51 over Dearing, Georgia, when he sees a white disc "completely round and spinning in a clockwise direction." It makes a headlong pass at his aircraft. It travels at "tremendous speed" and leaves no vapor trail. (NICAP, "Aerial Encounter with Disc"; Sparks, p. 107; "Saucer Ahead!—Fire at Will," *Tucson (Ariz.) Daily Citizen,* July 30, 1952, p. 6; "Saucer Attacked Me, Pilot Declares," *Cleveland (Ohio) Press,* July 30, 1952, p. 1, reprinted in Saucer Attack, April 1998; "Pilot Says His Plane Was Attacked by Flying Saucer," *Lowell (Mass.) Sun,* July 30, 1952, p. 30; UFOEv, p. 23; Richard H. Hall, *Uninvited Guests,* Aurora, 1988, pp. 328–330)

1951, July 14 — Morning. During a guided missile launch, two radar operators at White Sands Missile Range, New Mexico, catch a fast-moving object on their scope. At the same time, a tracker watching a B-29 with binoculars sees a large UFO near the bomber. Another observer sights the UFO and, with a 35mm camera, shoots 200 feet of film. The UFO shows on the film as a round, bright spot. The film has never been released. (NICAP, "White Sands Radar/Visual"; Sparks, p. 107; Project 1947, "Radar and Visual UFO Sighting, White Sands Missile Range, New Mexico—July 14, 1951"; Good Above, pp. 354–355)

1951, July 25 — Personnel at Holloman AFB, New Mexico, write a report compiling the results of an organized skywatch of UFOs at the base. Several photos are taken. The report does not conclude what the objects are, but it does establish that some kind of objects have been seen. ("Status of Project Blue Book," T52-6888, [1952], p. 1)

1951, August — In an article in *Popular Science*, the editors ask UFO witnesses what they think the objects are. Some 52% believe they saw man-made aircraft while 4% think they saw a "visitor from afar." ("What Were the Flying Saucers? Eyewitnesses Believe They Saw Secret Aircraft," *Popular Science* 159 (August 1951): 74–75, 228)

1951, August 3 — 11:00 p.m. Walter N. Webb, nature counselor at Camp Big Silver on the shore of Silver Lake in southern Michigan, 3 miles south of Pinckney, is showing two boy campers some celestial objects through a reflecting telescope. He sees a glowing, yellowish light moving westward at a low elevation in an undulating path over hills to the south. It disappears behind the hills before he can train his telescope on it. (UFOEv, p. 50)

1951, August 11 — Former USAF pilot Robert O. Dodge watches three disc-like UFOs in formation over Portland, Oregon. (UFOEv, p. 34)

1951, August 15 — US test pilot Bill Bridgeman attains an unofficial altitude of 79,494 feet in a Douglas D-558-2 Skyrocket, an air-launched rocket plane powered by the XLR-11 liquid fuel rocket engine. (Wikipedia, "Bill Bridgeman")

1951, Mid-August — 10:30 a.m. Mining engineer Alfred Roos hears a swishing sound at his ranch 10 miles east of Silver City, New Mexico. He looks up and sees two lens-shaped UFOs swooping at tremendous speed then hovering. They go back and forth between his location and Fort Bayard, two miles to the northwest, where they finally disappear into a cloud. (UFOEv, p. 56)

1951, Mid-August — Midnight. A witness is on his porch in Waco, Texas, looking at the sky when he sees a V-shaped formation of 10–20 round, luminous objects silently pass over from west to east in a matter of seconds. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 41–42)

1951, August 17 — 11:30 a.m. Otto Bock, a German scientist with a specialty in optics who came to the US as part of Operation Paperclip, observes a high-altitude, metallic object through his 20x telescope for about 4 hours. He says the sighting is confirmed by four other persons. (Project 1947, "Letter to Donald Keyhoe: Otto Bock, August 22, 1951")

1951, August 20 — The CIA, approved by DCI Roscoe Hillenkoetter, starts Project Artichoke to study hypnosis, morphine addiction, and LSD to produce amnesia and other vulnerable states in subjects, as a way of exploring interrogation methods. (Wikipedia, "Project Artichoke"; [Central Intelligence Agency], "Project Artichoke," declassified(?), January 31, 1975)

1951, August 23 — Frank Wisner succeeds Allen Dulles as CIA Deputy Director of Plans in the Office of Policy Coordination, with Richard Helms as chief of operations. In this position, Wisner is instrumental in supporting pro-American forces that toppled Mohammed Mossadegh in Iran in 1953 and Jacobo Árbenz in Guatemala in 1954. Sometime this year he visits Richard M. Bissell Jr. and asks him to finance OPC operations by diverting some Marshall Plan funds, presumably for covert black ops. (Jacobsen, *Area 51*, pp. 45–46)

1951, August 25 — Evening. Joseph Bryant and his wife, at 407 West Powell Street, Brownfield, Texas, see a loose group of glowing lights heading north to south. They are a "little bigger than a star." A few minutes later a second group flies over, and then a third, which circles around the house. This time Bryant can hear them, and he identifies them as plovers. When he hears about the Lubbock lights, he is sure the professors are seeing plovers. (Clark III 691–692)

1951, August 25 — 9:10 p.m. Three Texas Technical College professors (geologist Wilbur Irvin Robinson, chemist Aaron Gustav "Gus" Oberg, and petroleum engineer William Lyon Ducker Jr.) are sitting in a backyard at Lubbock, Texas, when they see a fast-moving, semicircular formation of 20–30 lights, as intense as bright stars but larger. Blue-green and silent, they move across the sky in seconds. A second group appears and repeats the performance. Others, including Carl Hemminger at Texas Tech, report seeing the same objects the same night. J. Russell Heitman, head of the Texas Tech journalism department, says he had seen an identical group of lights several days earlier. The professors watch 10–12 such flights through November 1 (including on September 1 and 5), sometimes accompanied by colleagues Ellis Richard Heineman, E. F. George, Grayson Mead, and John Brand. Some researchers, including Ruppelt and Hynek, think the witnesses are seeing migrating plovers attracted to Lubbock's new vapor street lights, although Ruppelt changes his mind later. (Wikipedia, "Lubbock Lights"; NICAP, "The Lubbock Lights / Carl Hart Photos"; "Three Professors Witness 'Strings of Beads' in Sky," *Anniston (Ala.) Star*, August 27, 1951, p. 1; "Strange Lights in Skies Plagueing Night Observers in Lubbock Section," *Corsicana (Tex.) Daily Sun*, September 1, 1951, p. 1; Ruppelt, pp. 96–99; Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 45–55; "Lubbock 1951," Texas UFO Museum and Research Library, November 15, 1999; Swords 130–132; Clark III 688–690; Kevin D. Randle, "Coast-to-Coast AM: The Lubbock Lights," A Different Perspective, February 23, 2023; Clark IV 764–770)

1951, August 25 — Around 9:58 p.m. Hugh Young, a security guard at Sandia Base, and his wife Emily are in their trailer home in east Albuquerque, New Mexico, and watch a large object like a flying wing, but 1.5 times as large as a B-36, flying at 80 feet at about 300 mph. It has glowing white lights on the trailing edge of the wing and is completely silent. (NICAP, "Flying Wing over Sandia Base"; Sparks, p. 108; Ruppelt, pp. 96–98; Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 46–47; Clark III 691; Kevin D. Randle, "Coast-to-Coast AM: The Lubbock Lights," A Different Perspective, February 23, 2023; Clark IV 767)

1951, August 26 — 8:28 p.m. A radar station at Larson AFB [now Grant County International Airport], near Moses Lake, Washington, tracks a UFO at 13,000 feet going 950 mph on two different sets, AN/CPS-1 and AN/CPS-4, for about 6 minutes. An F-86 is scrambled, but radar contact is lost before the plane gets off the ground. An electronic signal is received from this object that appears to be a mode-one IFF response from an AN/APX-6 transponder. This response is received twice at approximately 115 miles and 80 miles from the radar station. (NICAP, "Two Radars Track 900 MPH Target; Sparks, p. 108; Ruppelt, pp. 96–98, 108–109; Clark III 692; Clark IV 767)

1951, August 27 — At a conference at Holloman AFB, New Mexico, on the green fireballs, Project Twinkle's Maj. Edward A. Doty expresses skepticism about the project. Meteorologist Bernard "Duke" Gildenberg tells those assembled that he has never seen anything out of the ordinary, nor has astronomer Clyde Tombaugh. The commanding officer at Holloman wants to cease allocating funds for the project. (Clark III 545; Clark IV 603)

1951, August 28 — Project Twinkle personnel talk to LaPaz about the green fireballs and he insists they are not meteors. (Clark III 545; Clark IV 603)

1951, August 30 — 11:30 p.m. A Texas Tech freshman named Carl Hart Jr. sees the same formation of 18–20 lights over Lubbock, Texas, and takes five photos. He gets the roll of film developed the next day and takes it to the *Lubbock Morning Avalanche,* which puts them out on the Associated Press wire. ATIC examines the photos and notes that the "two rows of spots behaved differently. One row only shows slight variation from a precise V formation throughout, whereas the other now appears to pass from above the first row, through it to a position below." Biologist James Cecil Cross looks at the Lubbock photos under a microscope and rules out the bird explanation. While investigating the Lubbock Lights, Ruppelt also learns that several people in and around Lubbock claim to have seen a "flying wing" moving over the city. Among the witnesses is the wife of Dr. Ducker, who reports that in August 1951 she observed a "huge, soundless flying wing" pass over her house. Ruppelt knows that USAF does possess a "flying wing" jet bomber, and he feels that at least some of the sightings are caused by the bomber, although he cannot explain why, according to the witnesses, the wing makes no sound as it flies overhead. Ruppelt says that in addition to Project Grudge investigators, another group of people who, "because of their association with the government, had complete access to our files" (scientists convinced of the ETH) were also looking into the Lubbock cases. In March 1955, Ducker sends Ruppelt a telegram indicating that he has figured out that the lights are a "natural phenomenon" and requests no further publicity in his book. However, Texas Tech mathematics professor Ralph Sylvester Underwood has also observed three flights and estimates the objects are at 2,000 feet altitude and flying at 700 mph—much too fast for birds. (NICAP, "The Lubbock Lights / Carl Hart Photos"; "Flying 'Whatsits' Seen Again," *Lubbock (Tex.) Morning Avalanche,* September 1, 1951, pp. 1, 10; "Opinion Divided over Reports of Objects Seen in Lubbock Skies," *Lubbock (Tex.) Avalanche-Journal,* September 2, 1951, pp. 1, 14; "'Flying Whatsits' Stir Dispute in Area," *Lubbock (Tex.) Randle, "Coast-to-Coast AM: The Lubbock Lights," A Different Perspective, February 23, 2023; Clark IV 764–770)

1951, August 31 — 12:45 p.m. Mrs. Tom Tilson and one or two other women are driving north on Hwy 70 near Matador, Texas, when they see to the west a pear-shaped object the length of a B-29 fuselage (100 feet). It is aluminum or silver-yellow with a port or some type of aperture on the side, and it moves with its smaller end forward, drifting slowly at about 150 feet altitude. It then shoots up in a circular fashion and out of sight after a few seconds. (Sparks, p. 109; Clark III 692; Clark IV 767)

1951, September — 9:00 p.m. Louise McDougall is sitting on the lawn outside her trailer park in Bloomington, California, when she has the feeling someone is watching her. She looks up and sees a flying saucer hovering some 20 feet up. It is lenticular, perhaps 100 feet in diameter, and dull silver metallic in appearance. There are tall, rectangular windows in its lower half, in which can be seen against an amber glow four men, in one-piece

"jump suits," with shoulder-length hair. She turns a spotlight on the saucer, whereupon it shoots off silently at incredible speed. About 15 minutes later it returns, hovering in the same spot, the figures still visible at the windows. After 6 or 7 minutes, it takes off again to the southeast. McDougall's husband and three other people also see it. (Patrick Gross, URECAT, September 15, 2006; Clark III 267; Clark IV 307)

1951, September 2 — The Air Force issues JANAP 146(B), "Communications Instructions for Reporting Vital Intelligence Sightings from Aircraft." All UFO reports are to go to the Air Defense Command in the Pentagon (which presumably will send them to AMC at Wright-Patterson AFB in Ohio), the Secretary of Defense, and to the nearest US military command. ("JANAP 146 ()"; Antonio F. Rullán, "Blue Book UFO Reports at Sea by Ships: Analysis of the Blue Book Ship Database," December 10, 2002, pp. 8–9; Swords 123)

1951, September 10 — 11:10 a.m. At the Army Signal Corps radar center at Fort Monmouth [now closed], New Jersey, a student operator demonstrating radar functions to a group of visiting officers picks up a target that is moving too fast to be tracked automatically. The object seems to be following the coastline. He follows it off and on for 3 minutes, after which it disappears to the northeast, flying at 700 mph. At 11:35 a.m., a T-33 jet trainer piloted by Lt. Wilbert S. Rogers, with Maj. Edward Ballard as passenger, spots a "silver-colored object about the size of a fighter plane" flying at 900 mph at 5,000–8,000 feet over Sandy Hook. It makes a 90° banking turn and disappears out to sea. At 3:15 p.m., a second radar tracking occurs, but this slower object turns out to be a balloon. (NICAP, "The Fort Monmouth Radar Incident"; NICAP, "The Sandy Hook / T-33 Incident"; Sparks, p. 110; "Air Force Pilots Report 'Object' Going 900 MPH," *Waukesha (Wis.) Daily Freeman,* September 11, 1951, p. 3; Edward J. Ruppelt, "What Our Air Force Found Out about Flying Saucers," *True*, May 1954, p. 26; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 66; Good Above, pp. 269, 487; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, pp. 45–46; Swords 124–127; Clark III 513–515; Covert 40–41; Clark IV 562–564)

1951, September 11 — 10:50 a.m. Two radars at Fort Monmouth, New Jersey, pick up another object moving at 1,000 mph. At 1:30 p.m., another radar target appears, apparently hovering. Overcast conditions prevent a visual sighting. The radar then shows it ascending at a rapid rate then streaking to the south at 700+ mph. (Clark III 514; Clark IV 563)

1951, September 12 — Fort Monmouth, New Jersey, officials send ATIC and USAF headquarters a three-foot-long teletype describing the sightings. ATIC's new chief, Col. Frank Dunn, gets a wire from Gen. Charles Cabell, who wants somebody from ATIC to find out what's going on. Dunn sends Lt. Jerry Cummings (head of Project Grudge) and Lt. Col. Nathan R. Rosengarten (chief of the ATIC Aircraft Performance Section). (Ruppelt, pp. 93–94; Good Need, pp. 164–165; Swords 126; Clark III 514–515; Clark IV 563–564)

1951, September 13 — 9:30 p.m. T/Sgt Warner B. Maupin and Cpl. John W. Green track two objects on radar at Goose Bay AFB [now CFB Goose Bay], Labrador, on a collision course. One of them tries to warn the supposed aircraft of an imminent collision and is surprised to watch one avoid danger by moving to the right. A third unidentified target joins the other two. The incident lasts more than 15 minutes. (Sparks, p. 110; Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report*, Dundurn Press, 2006, p. 53; Chris Rutkowski, *Canada's UFOs: Declassified*, August Night, 2022, p. 261)

1951, September 18 — *The Day the Earth Stood Still*, directed by Robert Wise and starring Michael Rennie and Patricia Neal, premieres in New York City. The ultimate flying saucer science-fiction movie, the plot revolves around an alien who lands in a UFO in Washington, D.C., and demands that atomic testing cease. Lock Martin, who is more than 7 feet tall, plays the robot Gort. (Wikipedia, "*The Day the Earth Stood Still*"; Internet Movie Database, "The Day the Earth Stood Still"; Bill Howard, *Keep Watching the Skies!*, McFarland, 2010, pp. 208–215)

1951, September 18 — 10:20 p.m. USAF B-36 radar operator Maj. Paul E. Gerhart and navigator Maj. Charles J. Cheever are flying northwest at 239 mph over the Hudson Strait in northern Canada when they pick up radar interference coming from an unidentified aircraft moving away from them to the east about 32 miles away. The anti-jamming device on their radar is turned on at 11:20 p.m. but does not affect the jamming on the radar scope. At 11:35 p.m., a UFO is seen visually on the right side of the B-36, which is flying at 18,000 feet over southwest Baffin Island, Nunavut. The object has all-white "unconventional running lights" and two white flashing tail lights, travels about 35 mph faster than the B-36, crosses the front from right to left heading toward the north-northwest, and is in view about 20 minutes. While the object is still visible at 11:50 p.m., the B-36 autopilot and APQ-24 radar set malfunction, the latter coming back a few minutes later when the object disappears. ECM operators S/Sgt. Donald E. Jenkins and S/Sgt. Doty T. Larimore on two B-36 flights over Labrador on September 19 detect carrier wave signals at several frequencies and some radar-like pulses at other frequencies, all below 1,000 MHz. (NICAP, "B-36 Radar Picks up Object Seen Visually"; Sparks, p. 111; Clark III 996; Clark IV 1109)

1951, September 23 —At March AFB [now March Air Reserve Base] near Long Beach, California, two F-86 jets try to intercept an object in controlled orbit at around 55,000 feet, but they run low on fuel and have to land. Two more F-86s are scrambled, with the same results. Three of the pilots report seeing a "silver airplane with highly swept-back wings," although one of them says the UFO looks round and silver. (NICAP, "Swept Wing Aircraft at above 50,000′ / Tracked by GCI"; Sparks, p. 112; Ruppelt, pp. 94–95, 111, 113–114)

1951, Fall — Navy pilot Lt. Cmdr. Marvin C. Davies is flying a plane off a CVE class aircraft carrier near Korea when the crew tracks a radar target 3 miles astern. The object has apparently been circling the fleet at an altitude of 5,000 feet and speeds of "slow" to 1,000 mph. The UFO has been tracked on 14 ship radars for 7 hours. It stops circling and takes up a position behind the plane's wingman, remaining there 5 minutes, then departing at high speed. (Project 1947, "UFO Reports, Korea"; UFOEv, p. 84)

1951, October — Per Sundh is appointed head of a unit at the Swedish Defence Staff responsible for investigating UFO reports. He remains in charge until October 1954. During that time the department handles 6,000 reports, of which 400 are investigated and 40 remain unexplained. Their astronomical consultant is Bertil Lindblad, an astronomer at Stockholm University, Sweden. Sundh says that his personnel always took even the weirdest observations seriously. (Swords 364–365)

1951, October 1 — 10:00 a.m. At the Pentagon, Cummings and Rosengarten brief Cabell, his staff, and a representative from Republic Aircraft Corporation who "supposedly represented a group of top US industrialists and scientists." The two-hour meeting is recorded with a wire recorder. Edward Ruppelt, later head of Project Blue Book, hears the recording before it is ordered destroyed and keeps detailed notes about the meeting. Cabell supposedly learns that Grudge is effectively dead and demands to know "who in hell has been giving me these reports that every decent flying saucer report is being investigated?" Cabell says there is a great deal of doubt in his mind as to what the saucers are and that the Grudge report is the "most poorly written, inconclusive piece of unscientific tripe" he had ever read. He orders Grudge to reactivate itself, and Cummings and Rosengarten go back to Wright-Patterson AFB in Ohio to do just that. (Ruppelt, pp. 93–94; Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 68–70; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1951, Supplemental Notes*, The Author, 2000, pp. 44–46; Michael Hall, "When UFOs Were Serious Business: Then and Today," *IUR* 28, no. 4 (Winter 2003–2004): 4; Swords 127–128, 501–502; Clark III 514–515; Graff 70; Powell, *Scientist*, 112; Clark IV 563–564)

1951, October 3 — 10:27 p.m. Three radar operators, Sgt. Melvin W. Watson, Pvt. Manuel M. Gonzales, and Senior Radar Mechanic Sgt. James E. Biscanto, north of Kadena AFB on Okinawa, Japan, track a large, sausage-shaped blip traveling at 2,400 to 4,800 mph from north-northeast to north-northwest at a distance of 60 miles. The radar site attempts to radio its report to Itasuke AFB, but it is blocked by heavy interference. (NICAP, "Large Sausage-Shaped Blip on Radar (BBU 984)"; Clark III 996–997; Clark IV 1109–1110)

1951, October 4 — 2:00 a.m. Two French aviation officers are camped out several miles northwest of the village of Tessalit, Mali. A luminous dark-yellow disc approaches slowly from the east, loses altitude, makes a 90° turn, accelerates, and ascends at high speed. (Patrick Gross, "Tessalit, Mali, October 4, 1951")

1951, October 9 — 1:42 p.m. A fast-moving, silvery UFO shaped like a "flattened tennis ball" is sighted by a Civil Aviation Administration Chief Aircraft Communicator Roy Messmore at Hulman Municipal Airport [now Terre Haute Regional Airport], five miles east of Terre Haute, Indiana. At 1:45 p.m., private pilot Charles Warren, flying at 5,000 feet east of Paris, Illinois, sees a silvery "flattened orange" object that appears stationary to his left rear. It picks up speed and heads to the northeast. Project Blue Book plots the sighting and concludes that both cases involve the same object. (NICAP, "October 9, 1951, Hulman CAA / Pilot Case"; NICAP, "Pilot Radios Terre Haute: Observes 'Flattened Orange'"; Sparks, p. 114; Swords 129)

1951, October 10 — 10:10 a.m. Engineer and pilot Joseph J. Kaliszewski, flying with copilot Jack Donaghue on a Skyhook balloon tracking mission for General Mills 10 miles east of St. Croix Falls, Wisconsin, notices a strange object crossing the sky from west to east, much higher and behind the balloon, which is at 20,000 feet. The UFO has a peculiar glow. It comes into sight at a slight dive, then levels off and slows down, makes a sharp left turn, climbs at an angle of 50–60° into the southeast with terrific acceleration, and disappears. It is seen for about 2 minutes. (NICAP, "The Kaliszewski Sightings"; Sparks, p. 114; UFOEv, p. 56)

1951, October 11 — 6:30 a.m. Joseph J. Kaliszewski and Dick Reilly are flying at 10,000 feet north of Minneapolis, Minnesota, observing a balloon when they see a brightly glowing object to the southeast of the University of Minnesota airport moving at high speed from west to east. It has a halo around it with a dark under surface. It crosses rapidly, slows down, and starts to climb slowly in lazy circles. Observers Doug Smith and Dick Dorion at the General Mills tracking station at the University of Minnesota watch the object through a theodolite. They watch another object 2 hours later. (NICAP, "The Kaliszewski Sightings"; Sparks, p. 114; UFOEv, p. 56; James

E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 44–45)

1951, October 16 — 11:01 a.m. Air Force pilots flying three F-94 fighters out of McChord AFB [now Joint Base Lewis-McChord] and naval ground personnel see a round, gray object flying soundlessly at high speed and high altitude west of Naval Air Station Whidbey Island in Oak Harbor, Washington. Photos taken from the F-94s show the object. After 50 minutes, the aircraft abandon the chase. The Air Force attributes the sighting to Venus. (NICAP, "3 F-94's Encounter Round Grey Object / Photos Taken"; Sparks, p. 115; Clark III 391–392; Clark IV 436–437)

1951, October 20 — Frank B. Jewett Jr., director of the Aeronautical Research Laboratory at General Mills Corporation, writes to Assistant Secretary of the Air Force Eugene M. Zuckert about UFOs seen by his personnel. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1951, Supplemental Notes*, The Author, 2000, p. 51)

1951, October 22 or 27 — Capt. Edward J. Ruppelt officially takes over a revitalized Project Grudge, relieving Lt. Jerry W. Cummings, with 2d Lt. Henry Metscher staying on as an assistant. The two reorganize all the files from Projects Sign and Grudge, improving their retrievability. Ruppelt learns from some scientists and engineers who visit ATIC frequently that "UFOs were being freely and seriously discussed in scientific circles." (Sparks, p. 14; Edward J. Ruppelt, "What Our Air Force Found Out about Flying Saucers," *True*, May 1954, p. 30; Ruppelt, pp. 114–115; Michael D. Hall and Wendy Connors, *Captain Edward J. Ruppelt: Summer of the Saucers, 1952*, Rose Press, 2000, p. 26; Clark III 933, 937; Clark IV 1043, 1047)

1951, October 22 — The Directorate of Intelligence provides answers to the problem that Col. Harold Watson identified with the CIRVIS reporting system. (Michael Hall and Wendy Connors, "Flying Saucers: Behind the Cold War Veil of Military Intelligence (Part II)," *European Journal of UFO and Abduction Studies* 3, no. 1 (March 2002): 32)

1951, October 30 — 6:40 a.m. A group of servicemen are preparing to observe the Buster Charlie atomic test at Area 7 of the Nevada Test Site. Just before the blast, they see at an altitude of a few thousand feet a formation of 18 silvery, rotating, disc-shaped objects, each with a dome, arranged in six groups of three stretched out in a horizontal row. They fly low over the test site, hover for 30–60 seconds, and depart at an angle, disappearing in seconds. (Nukes 68–71)

1951, November — Maj. Gen. Cabell is promoted to staff director for the Joint Chiefs of Staff. He is replaced as director of Air Force Intelligence by Maj. Gen. John A. Samford. (Clark III 936)

1951, November 1 — The Air Force issues a *Ground Observer's Guide* for use by members of the Ground Observer Corps, a WWII Civil Defense program reinstated during the Korean War to protect against enemy attack. (US Department of the Air Force, *Ground Observer's Guide*, AF Manual 50-12, November 1, 1951)

1951, November 2 — 7:15 a.m. The crew of an American Airlines DC-4 is flying east of Abilene, Texas, at 4,500 feet. They see a bright-green, projectile-shaped object, about the same size as their airliner, streak past at about same altitude and same easterly heading. The object leaves a trail then explodes, shooting red balls of fire in all directions. (Sparks, p. 115; Keyhoe, *FS Conspiracy*, pp. 92–93; Nukes 74–75)

1951, November 3 — 9:00 p.m. A green fireball is sighted in Arizona, New Mexico, Texas, and Oklahoma. Capitol Airways pilot H. R. DeHoney is flying at 11,000 feet about 20 miles south of Flagstaff, Arizona, and watches the object speed by as a bright blue-green ball that leaves a streak of brilliant red fire. ("Mystery Meteor Startles NM, Arizona," *Santa Fe New Mexican*, November 4, 1951, p. 13; H. B. Darrach Jr. and Robert Ginna, "Have We Visitors from Space?" *Life*, April 7, 1952, pp. 80, 92–94; Nukes 75–76)

1951, November 6 — Ruppelt flies to Reese AFB [now Reese Technology Center] in Lubbock, Texas, to begin his investigation of the Lubbock lights, accompanied by OSI agent Howard Bossert. (Clark III 691)

1951, November 7 — Evening. A steamship captain and crew watch an elongated orange object with six glowing "portholes" speed toward Ontario over Lake Superior. (UFOEv, p. 146)

1951, November 8 — Ruppelt and an officer from Reese AFB visit Brownfield, Texas, to investigate UFO sightings there. (Clark III 691)

1951, November 9 — Since October 30, seven green fireballs of exceptional size have been seen over a seven-state area in the American Southwest. Lincoln LaPaz, director of the University of New Mexico Institute of Meteoritics, says that frequency is exceptional: "In fact, there has never been a rate of meteorite fall in history that has been one fifth as high as the present fall. If that rate should continue, I would suspect the phenomenon is not natural." The fireballs travel in straight lines and are completely silent. ("Southwest's 7 Fireballs in 11 Days Called 'Without Parallel in History,'" *New York Times*, November 10, 1951, pp. 1, 14; Nukes 76–79)

1951, November 11 — 8:45 p.m. Thomas Bartis and his older brother Francis are driving through New Haven, Connecticut, when they see a huge yellow fireball with a greenish-blue tail streak through the sky. Probable bolide. ("Second Fireball Is Sighted," *Meriden (Conn.) Record-Journal*, November 12, 1951, pp. 1, 10)

1951, November 20 — 6:42 p.m. A vivid green fireball is reported from Dodge City, Kansas, and Lubbock and Big Springs, Texas. Two Air Force pilots landing at Kirtland AFB, Albuquerque, New Mexico, and a Trans World Airlines pilot also see the fireball. (Nukes 78)

1951, November 24 — 3:53 p.m. Air Force Capt. William Fairbrother is flying a P-51 over Mankato, Minnesota, at 25,000 feet when he sees a white object shaped like a flying wing. It hovers at first, then it passes 100 feet above and to the left of his aircraft. He immediately turns to follow but loses sight of it. (NICAP, "Wingshaped Object Hovers Then Passes P-51"; Sparks, p. 115)

1951, November 24 — 6:24 p.m. A Capital Airlines Flight 94 pilot and several control tower and other ground observers in four different locations in Michigan (Grand Rapids, Coopersville, Battle Creek, and Selfridge AFB near Mount Clemens) see a large round object flying west at 500–1,000 feet at about 1,000 mph. (NICAP, "Many Observers at Different Locations Observe Fast Object"; NICAP, "Capital Airlines Pilot Confirms Michigan Sightings"; NICAP, "Radar Rumor / Radar Ceases Operation & Antenna Moves"; Sparks, p. 116; Swords 130)

1951, November 27 — Geophysicist Louis Elterman releases the final report on Project Twinkle. Basically, it admits that the low frequency of occurrence of the fireballs does not justify the $50,000 a year required for a useful monitoring facility. It speculates that "the earth may be passing through a region in space of high meteoric population. Also, the sun-spot maxima in 1948 perhaps in some way may be a contributing factor." (Louis Elterman, *Project Twinkle Final Report*, Atmospheric Physics Laboratory, November 27, 1951; Clark III 544–545; Clark IV 602–603)

1951, November 30 — Project Grudge issues its first Status Report, classified "confidential." (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 1–19)

1951, November 30 — Night. A tanker ship, *MV British Premier*, is in the Gulf of Oman when it encounters a mass of "boomerang-shaped arcs of phosphorescent light" on the sea, gyrating in a clockwise direction to starboard and counter-clockwise to port, sweeping inwards toward the ship. The phenomenon is noticed shortly after the ship switches on its radar apparatus and lasts for 15 minutes. (F. G. Baker, "Phosphorescence," *Marine Observer* 22 (October 1952): 190; Dolan, USO1, 149–150)

1951, December — Ed J. Sullivan, a technical writer for North American Aviation, holds a meeting of engineers, scientists, and journalists in Los Angeles, California, who have been following the UFO phenomenon. They form Civilian Saucer Investigation to collect reports and forward them on to ATIC. Its most prominent member is Walther Riedel, German rocket scientist retrieved by Project Paperclip. (Jan L. Aldrich, "Civilian Saucer Investigation (Los Angeles)," Sign Historical Group; Michael D. Swords, *GrassRoots UFOs: Case Reports from the Timmerman Files*, Fund for UFO Research, 2005, pp. 139–140; Clark III 241–242; Clark IV 282–283)

1951, December 5 — Early morning. Swedish Prince Carl Bernadotte and a friend, Berl Gutenberg, are driving near Stockholm, Sweden, when they see a bright flash of light illuminate the sky. Bernadotte stops the car and opens the door to listen for sounds. They go immediately to the Stockholm Criminal Investigation Department, who reports the incident to the Security Police and the military UFO desk. The report is instantly classified, even though the object is probably a meteor. (Swords 366)

1951, December 11 — Project Twinkle closes down. (Clark III 544–545; Clark IV 602–603)

1951, December 12 — 3:50 p.m. USAF Capt. Donald "Deke" Slayton, flying a P-51 fighter at 10,000 feet, sees a whitish or gray object off his left wing about one mile away and 1,000 feet below his flight level about five miles southeast of Hastings, Minnesota. It looks like a kite at first, then like a weather balloon, then two rapidly revolving discs that overlap with centers about 1 foot apart. He attempts an intercept, but the UFO increases speed and disappears. (NICAP, "'Deke' Slayton / P-51 Encounter"; Sparks, p. 117; Donald K. Slayton and Michael Cassutt, *Deke! An Autobiography*, Macmillan, 1994, pp. 49–51)

1951, December 19 — Ruppelt travels to the Pentagon with ATIC Chief Col. Frank Dunn. They visit with Maj. Gen. John A. Samford, who has replaced Cabell as USAF director of intelligence and who seems "familiar with the general aspects of the problem." Samford's aide, Gen. William M. Garland, tells them that ATIC has the sole authorization to carry out UFO investigations for the entire US military (not exactly true), and they discuss security problems posed by UFOs at sensitive installations. Ruppelt reveals that his preliminary analysis of UFO sighting patterns has uncovered a disturbing correlation of unexplained sightings around nuclear weapons facilities and highly classified nuclear stockpile sites and some SAC strategic air bases. Gen. Samford orders ATIC to conduct an exhaustive statistical study to verify Ruppelt's findings, using the newly established ATIC Project WHITE STORK contract with the research think tank Battelle Memorial Institute in Columbus, Ohio

(which eventually spends $100,000 on the study, Subproject PPS-100, confirming Ruppelt's pattern). (Ruppelt, pp. 115–116)

1951, December 26–27 — Ruppelt and Col. Sanford H. Kirkland Jr. of ATIC meet with members of the Battelle Memorial Institute in Columbus, Ohio, and ask them to help out with the USAF evaluation of UFO reports: first, a study of witness perception and recall, then a statistical study of UFO reports. ("Seven Status Reports for Project Stork," CUFON; Clark III 918, 929; Clark IV 1028, 1039)

1951, December 28 — Project Grudge issues a Special Report #1 and its Status Report #2 three days later. (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 21–53; Clark III 933; Clark IV 1043)

1952

1952 — The Lawrence Livermore National Laboratory is established in Livermore, California, as an offshoot of the UC Radiation Laboratory at Berkeley. It is intended to spur innovation and provide competition to the nuclear weapon design laboratory at Los Alamos, New Mexico. Edward Teller and Ernest Lawrence, director of the Radiation Laboratory at Berkeley, are regarded as its cofounders. Los Alamos and Livermore soon establish a rivalry, fighting for weapons contracts and feasibility-study awards. (Wikipedia, "Lawrence Livermore National Laboratory")

1952 — José Manuel Rodríguez Delgado, a Spanish physiologist at Yale University, coauthors what he claims is the first peer-reviewed paper describing deep-brain stimulation of humans. Over the next two decades, he implants electrodes in some 25 subjects. Most are schizophrenics and epileptics at the now-defunct State Hospital for Mental Diseases in Howard, Rhode Island, where Delgado's occasional collaborator Hannibal Hamlin is a staff psychiatrist. Delgado is reticent discussing his experiments on humans. He is more enthusiastic recalling research on monkeys, chimpanzees, and gibbons, which he kept both at Yale and in open-air compounds in the Bahamas and New Mexico. He explores the effects of stimulation not only on individuals but also on groups. In one demonstration, he implants a stimoceiver (a tiny electrode able to receive and transmit signals over FM radio waves) in a macaque who terrorizes his cage-mates. Delgado installs a lever in the cage that, when pressed, activates the stimoceiver in the bully and pacifies him. A female in the cage soon figures out the lever's significance and yanks it often and with gusto. (John Horgan, "Tribute to Jose Delgado, Legendary and Slightly Scary Pioneer of Mind Control," Cross-Check, *Scientific American* blog, September 25, 2017)

1952 — World War II air intelligence records are transferred from the Pentagon to Maxwell AFB in Montgomery, Alabama. This shift is probably why Blue Book's Capt. Edward J. Ruppelt later cannot find anything about foo-fighters during his trips to USAF intelligence to locate reports not forwarded to ATIC. (Jan Aldrich)

1952 — Aircraft designer John Carver Meadows Frost establishes a Special Projects Group at Avro Canada in Toronto to develop a vertical takeoff and landing engine with a circular shape. Frost believes that the Coanda effect acting as a ground cushion can support a high-performance VTOL aircraft. His team produces a wooden mock-up of a "spade-shaped" fighter as Project Y. However, the Canadian government abandons the effort after two years. (Wikipedia, "John Carver Meadows Frost")

1952 — As equerry to Prince Philip, the Duke of Edinburgh, Wing Commander Peter Horsley arranges for RAF Fighter Command to send copies of the latest UFO reports made by air crews for examination at Buckingham Palace. Prince Philip gives him permission to read the reports, interview pilots, and keep him informed of the latest UFO news. (David Clarke, "Prince Philip: The Royal Flying Saucerer," Dr. David Clarke Folklore and Journalism, April 11, 2021)

1952 — The Argentine Navy establishes a temporary inquiry commission dedicated to the UFO phenomenon at its Port Belgrano Naval Base in Punta Alta, Argentina. (Milton Hourcade, "Argentina: UFO Declassification," U.A.P.S.G.–G.E.F.A.I., July 29, 2020)

1952? — An anonymous occupation soldier in Austria meets a diving suit–clad being who paralyzes him, pulls him inside a UFO, and flies him to an otherworldly place he takes to be Mars. He sees other humans who do not acknowledge him. Then he is returned to his base. (*Prince George (B.C.) Citizen*, December 11, 1957)

1952 — 6:30 a.m. A carpool of people on their way to work at United Airlines in San Mateo, California, observe five smaller objects merging with a much larger, diamond-shaped object. The big one is about 150–200 feet long, charcoal or gunmetal in color, and is hovering 50–75 feet above some salt flats. The UFOs are directly in front of them to the east, about 1,500–1,800 feet away. One of the witnesses, airplane mechanic Leonard L. Musel, says the smaller objects enter the large object through a "transparent tail or sleeve." After they are aboard, the bigger UFO turns edgewise and zooms off at a fantastic speed. (Herbert S. Taylor, "Satellite Objects: A Further Look," *IUR* 29, no. 2 (Summer 2004): 7)

1952 — Night. USAF Pvt. Sinclair Taylor is on guard duty at Camp Okubo in Uji, on the southern outskirts of Kyoto, Japan, when he hears flapping sounds and sees what seems to be an enormous bird. As it gets closer to him, Taylor sees that it is a winged man well over 7 feet tall with a wingspread of 7 feet. Taylor fires at it repeatedly with his rifle and thinks he hit it, but he can't find the body. (Sinclair Taylor, "The Bird Thing," *Fate* 13, no. 12 (December 1960): 53–54; Clark III 778; Clark IV 859)

1952, January — Civilian Saucer Intelligence in Los Angeles, California, obtains a post office box and invites UFO witnesses to write in and report their sightings. Within a few months the group is inundated with reports, which it turns over to "qualified engineers" to be logged and evaluated. Significant cases are turned over to USAF's Air Technical Intelligence Center at Wright-Patterson AFB. ("The Civilian Saucer Investigation," *Civilian Saucer Investigation Quarterly Review,* no. 1 (September 1952): 2; Richard W. Williams, "Summary of Findings in CSI's First 220 Sighting Reports," *Civilian Saucer Investigation Quarterly Review,* no. 1 (September 1952): 1)

1952, January — Jim and Coral Lorenzen found the Aerial Phenomena Research Organization in Sturgeon Bay, Wisconsin. Soon, a man claiming to have an intelligence background becomes an active supporter and tries to lead the Lorenzens into "metaphysical areas of research." Coral Lorenzen rebuffs these attempts. She discovers what seem to be the impressions of an intelligence report about her on one of his letters. In the summer, two suspicious men posing as building contractors seem to be lurking around her home as well as the homes of the APRO treasurer and secretary the same day. (Dick Ruhl, "A History of APRO," *Official UFO,* January 1976, p. 24; Lorenzen, *Encounters with UFO Occupants,* Berkley Medallion, 1976, pp. 1–2, 248–251; Clark III 49; Eghigian, *After,* pp. 99–101; Clark IV 67)

1952, January — Eldon L. White, working as a rigger for the US Air Force on Shemya, Aleutian Islands, Alaska, hears an odd whirring sound that causes him to look up. He sees a gray, bat-shaped object about 300 feet above him, falling leaf-like into the water. The leading edge of its wing has openings that emit a greenish-yellow glow, and it has a dome that is pulsating with red light. It is about 30 feet across and has a protruding rod on its base. It stops and hovers for several seconds about 75 feet above the sea, then enters the water at an angle and disappears. (Carl Feindt, "Report #817," waterufo.net; Dolan, USO1, 150–152)

1952, January — Some 74% of the CIA's money goes toward covert operations. It has already infiltrated many US labor, business, church, university, student, and cultural groups, usually channeling the money through foundations. This year it begins HTLINGUAL, a secret project to intercept mail destined for the USSR and China. It also targets domestic peace and civil rights activists. It lasts until 1973, photographing 2 million envelopes and opening 215,000 letters. (David Wise, *The American Police State: The Government Against the People,* Random House, 1976; Frank J. Donner, *The Age of Surveillance: The Aims and Methods of America's Political Intelligence System,* Knopf, 1980; Jim Keith, *Mind Control, World Control: The Encyclopedia of Mind Control,* Adventures Unlimited, 1997)

1952, January 1 —10:54 p.m. Warrant Officer W. J. Yeo (a master telecomm specialist) and Sgt. D. V. Crandell watch a silent, reddish-orange object circle and maneuver for nearly 9 minutes at RCAF Station North Bay, Ontario. It appears to be very large and travels at supersonic speed. ("'Saucers' Seen Here: 2 Sighted at RCAF Station," *North Bay (Ont.) Nugget,* April 15, 1952, pp. 1–2; Yurko Bondarchuk, *UFO Sightings, Landings, and Abductions,* Methuen, 1979, p. 92)

1952, January 3 — Brig. Gen. William M. Garland, Assistant for the Production of Intelligence, writes a secret memorandum for General John A. Samford that lays down the investigative shortcomings of Project Grudge and suggests policies and agendas for the immediate future. Garland mentions that the aircraft inventions and models by the Horten brothers had fallen into the hands of the Soviets at the end of World War II. (Brig. Gen. William M. Garland, "(Secret) Contemplated Action to Determine the Nature and Origin of the Phenomena Connected with the Reports of Unusual Flying Objects," January 3, 1952; Swords 141–143; Kremlin 34)

1952, January 6 — Contactee George Van Tassel, living at Giant Rock in the Mojave Desert near Landers, California, receives the first of many psychic messages from extraterrestrial starship commanders. This one is from "Lutbunn, senior in command of first wave, planet patrol, realms of Schare. We have your contact aboard 80,000 feet above this place." Other messages soon come from Elcar, Clota, Totalmon, Latamarx, Noma, Leektow, Luu, Oblow, Kerrull, Locktopar, Molca, Clatu, Hulda, Lata, Singba, and others. One of his contacts, Ashtar, will become a metaphysical superstar, and in the years ahead many contactees will channel communications from him. These aliens seek to raise humanity's "vibrationary attunement" so that earthlings will not threaten the wise and peace-loving space people. Van Tassel reprints many of these messages in a misleadingly titled book, *I Rode a Flying Saucer!* (George W. Van Tassel, *I Rode a Flying Saucer! The Mysteries of the Flying Saucers Revealed,* New Age, 1952; Kim Stringfellow, "Giant Rock, Space People, and the Integraton," KCET-TV, Los Angeles, May 15, 2018; Clark III 173, 1218–1219; Clark IV 200, 1395)

1952, January 8 — Battelle Memorial Institute in Columbus, Ohio, agrees to help out the Air Force with analyzing UFO reports. (Clark III 929; Clark IV 1039)

1952, January 20 — 7:20 p.m. Two master sergeants, both intelligence specialists, are walking down a street at Fairchild AFB near Spokane, Washington, when they notice a large, bluish-white, spherical object approaching from the east. It passes north of their position, traveling horizontally and silently, and disappears in the west. They notice it has a long blue tail. It travels underneath low cloud cover at 4,700 feet at 1,400 mph. (NICAP, "Large Sphere with Blue Tail at 500′"; Sparks, p. 118; Ruppelt, p. 12)

1952, January 21 — 9:50 a.m. A Navy pilot lieutenant commander in a TBM Avenger chases a white, dome-shaped object over Mitchel AFB [now closed] on Long Island, New York. It accelerates rapidly, makes a 180° turn, and heads out to sea. He estimates it is traveling at least at 300 mph. It looks like a parachute canopy and has a dark undersurface. Although there is a balloon in the area, its flight path is completely different. (NICAP, "TBM Chases Climbing and Accelerating Object"; Sparks, p. 118; Ruppelt, pp. 121–123)

1952, January 22 — 12:20 a.m. At a northern Alaska outpost, Murphy Dome Air Force Station, radar captures a UFO traveling 1,500 mph at 23,000 feet. When an F-94 is sent to intercept, the target stops, slows down, reverses course, and heads directly for the radar station. It comes within 30 miles, then disappears from the screen. The F-94 heads back to refuel, and a second fighter is scrambled. This pilot gets a strong radar return. At first, the object is almost stationary, but then it dives suddenly, at which point ground radar picks it up again. A third F-94 is sent up, also tracks the object on radar, and closes to within 900 feet. At this point, the pilot pulls away to avoid a collision, as the UFO is nearly immobile. Since none of the pilots obtained a visual sighting, the Air Force concludes that the radar returns are weather-related, although the pilots strongly dispute this. (NICAP, "Alaskan Radar Case"; Sparks, pp. 119–120; Ruppelt, pp. 123–127; US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 138–139; Carl Sagan and Thornton Page, eds., *UFO's: A Scientific Debate,* Cornell University, 1972, p. xxi)

1952, January 29 — On his trip to the Pentagon to brief Gen. William M. Garland, Ruppelt visits the AFOIN offices and discovers they have more complete files than ATIC in Dayton, Ohio, does. He arranges to have copies made of the missing files for him at Project Grudge (though multiple visits are required to obtain the copies and Ruppelt probably does not succeed in getting everything). The offices with UFO files include the Technical Capabilities Branch (TCB) of the Evaluation Division and the Collection Control Branch of the Collection Division. (NICAP, "The 1952 Sighting Wave")

1952, January 29 — Brig. Gen. William M. Garland, USAF Assistant for Production of Intelligence, and his staff are briefed at the Pentagon on the status of Project Grudge by Edward Ruppelt, who with his colleagues at ATIC has prepared sighting maps that show a concentration of cases at White Sands and Los Alamos, New Mexico; Killeen Base, Texas; Oak Ridge, Tennessee; and Dayton, Ohio (where Wright-Patterson AFB is situated). At this meeting, Garland introduces a new intelligence policy that emphasizes the use of instrumentation for intelligence collection, including the detection and tracking of UFOs (the basis for terminating the UFO project as an intelligence function). As an interim last-chance measure to prove whether anecdotal sightings have any value, Garland approves Ruppelt's publicity plan to draw in UFO reports from the public so that triangulations might be obtained. This leads to Garland secretly backing the *Life* magazine article. Apparently on the same day, Garland gives the welcoming address to the secret MIT Lincoln Laboratory (Ruppelt calls it the Beacon Hill group) in Cambridge, Massachusetts, where he tells the assembled scientists to study ways USAF intelligence methodology can be revolutionized through the use of technology. Later Garland sends Ruppelt to brief the Lincoln Lab scientists on UFOs on at least two other occasions. ("Status of Project Blue Book," T52-6888, [1952]; NICAP, "The 1952 Sighting Wave"; Loren E. Gross, *UFOs, a History: 1952, January–May*, The Author, 1993, p. 12; Swords 144; Clark III 813; Clark IV 906)

1952, January 29 — Evening. Violet M. Winstead and her husband are at an open-air movie theater on Guam when they and others at the theater see an orange light passing silently overhead. (Violet M. Winstead, Letter, *IUR* 9, no. 1 (Jan./Feb. 1984): 3)

1952, January 29 — Night. A bright orange, disc-shaped object, also described as a "huge ball of fire," paces two B-29s on the same night, 80 miles from each other over the towns of Wonsan and Sunchon, North Korea. (NICAP, "Rotating Light Seen by B-29 Crew"; NICAP, "B-29 Crew Followed by UFO"; Sparks, p. 121; "'Disks' Seen in Korea," *New York Times*, February 20, 1952, p. 3; Haines, *Korea*, pp. 33–37; Patrick Gross, "UFO US Military Reports, Korea, 1952")

1952, January 31 — Ruppelt releases Project Grudge Status Report #3, in which he reviews the geographic distribution of UFO reports, states the project's obstacles, and includes a list of 15 cases reported to ATIC in January. (Swords 144; US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 55–64)

1952, February 2 — 7:35 p.m. Radar operators aboard the aircraft carrier *USS Philippine Sea* pick up an unidentified target off the east coast of Korea. It is first detected at a distance of 25 miles; when it closes to 20 miles, it makes a wide turn to the east directly away from the carrier, accelerating from 600 to 1,800 mph at 52,000 feet altitude. It splits into two targets 5–12 miles apart on a slightly zigzag course to the north. They disappear about 110 miles away. Observers on the carrier see three exhaust flames. A USAF analyst estimates the speed of one track to be 767 mph and the speed of another track 1,257 mph. (NICAP, "USS *Philippine Sea* Tracks Approaching Target"; Sparks, p. 121; *Hynek UFO Report*, pp. 126–127; Jan L. Aldrich, "The USS *Philippine Sea*, February 2, 1952," Project 1947; Jan L. Aldrich, "U.S. Navy Documents Concerning the USS *Philippine Sea* Report from Dr. Hynek's Files," Project 1947; "USS *Philippine Sea* Operation Officer's Testimony," Project 1947; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 24–26)

1952, February 8 — Dewey Fournet, on the Pentagon's UFO desk, writes to Ruppelt at ATIC for help in interpreting the Korean sightings. Ruppelt has brought in an expert from Wright-Patterson AFB's Engineering Division, Peter A. Stranges of the Propulsion Branch Power Plant Group, to help with the analysis, which he passes on to Fournet and Garland. Stranges compares the Wonsan sighting to the foo fighters of World War II. (Loren E. Gross, *UFOs, a History: 1952, January–May*, The Author, 1993, pp. 15–16; Swords 144–145).

1952, February 20 — 3:00 p.m. Rev. Albert Baller is sitting in a train at the station in Greenfield, Massachusetts, when he sees a "sharp flash of light about 35° or more above the horizon." Looking upward, he sees three perfectly circular, silver objects approaching in a V-formation. They are moving at about the "speed of a second hand on a watch." They stop and hover for 10 seconds. The lead object reverses and pulls into a line with the other two between them. Then they depart in a direction at right angles to their approach. (UFOEv, p. 69)

1952, February 20 — Joseph and Stewart Alsop examine the January 29 Korean incidents in their syndicated column, "Problems of Scientific Developments." They suspect a Russian origin. (Joseph and Stewart Alsop, "Problems of Scientific Developments," *Buffalo (N.Y.) Courier Express*, February 20, 1952, p. 18; Swords 145–146)

1952, February 21 — Sen. Richard Russell Jr. (D-Ga.), chairman of the Senate Armed Services Committee, requests further information on the January 29 Korean UFO incidents in a letter to Secretary of the Air Force Thomas K. Finletter. (Project 1947, "UFO Documents, 1952, Korea")

1952, February 21 — Far East Air Forces Commander Lieut. Gen. Otto P. Weyland tells reporters that "no conclusive evaluation had been made at the present time" on the Wonsan/Sunchon, Korea, sightings of January 29–30. ("'Flying Saucer' Story Ignored by Congressmen," *Rock Island (Ill.) Argus*, February 21, 1952, p. 15; "Nothing Conclusive on Globes: Weyland," *Stars and Stripes*, Pacific edition, February 22, 1952; Project 1947, "UFO Documents, 1952, Korea")

1952, February 22 — The now-completed Site Able is renamed Manzano Base, New Mexico, and turned over to the operational control of the Air Force. What appear to be secure bunkers are visible to people (mostly military personnel) who go to a recreational camping area nearby known as Coyote Canyon. The military, however, never officially confirms the nature of the activities at Manzano Base [now part of Kirtland Air Force Base]. At one point, a military spokesman says that Manzano Base has nothing to do with Sandia Base. Manzano has since been identified as the first of six original National Stockpile Sites for nuclear weapons. The other original NSS installations similar to Manzano are: Site Baker at Killeen Base, adjacent to Gray AFB [now Robert Gray Army Airfield] at Fort Hood, Texas; Site Charlie at Campbell AFB [now Campbell Army Airfield] near Hopkinsville, Kentucky, and adjacent to Fort Campbell; Site Dog at Bossier Base, adjacent to Barksdale AFB near Bossier City, Louisiana; Lake Mead Base, adjacent to Nellis AFB, Nevada; and Medina Base, adjacent to Lackland AFB [now Joint Base San Antonio], Texas. (Wikipedia, "Sandia Base")

1952, February 23 or 24 — 11:15 p.m. The navigator on a B-29 bomber sees a pulsating bluish cylinder while the aircraft is evading antiaircraft fire near Sinuiju, North Korea. It arrives high and fast, makes several turns, and levels out underneath the aircraft. (Sparks, p. 122)

1952, February 25–27 — *Life* magazine reporter Robert Emmett Ginna Jr. visits USAF headquarters at the Pentagon to gather information for his UFO article. He talks with Brig. Gen. Joseph F. Carroll, Director of Special Investigations. Brig. Gen. William M. Garland tells him that he has considered firing a guided missile at a UFO to bring it down and requests that Ginna delay publishing an article until the Air Force has come to a more definite conclusion. Ginna also talks to Lt. Col. Doyle Rees of OSI. (Jan L. Aldrich, "Have We Visitors from Space?" Project 1947)

1952, February 29 — Project Grudge issues a secret Status Report #4, classified "secret." (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 65–78)

1952, March or April — 5:00 a.m. Two women cryptographers in the US Naval Reserve stationed at the US Naval Training Center at Port Deposit, Maryland, are out taking a walk outside the base on a dirt road. They notice a red light off to one side above the trees. It starts moving toward them and stops about 100 feet above the road in front of them, about 300 feet away. The object is a 250-foot black disc with two large red lights at each side, an illuminated dome, and smaller lights along the rim. A hole opens in the bottom and phosphorescent white sparks drop toward the ground and disintegrate when they hit the road. The two reservists sprint the quarter-mile back to the base. (NICAP case file)

1952, March 1 — The 4602nd Air Intelligence Service Squadron (AISS) is activated under ADC to collect air combat intelligence. (CUFON, "4602d AISS Unit History Sampler")

1952, March 3 — Robert Emmett Ginna Jr. of *Life* visits the Air Technical Intelligence Center at Wright-Patterson AFB in Dayton, Ohio, to obtain material for his UFO article. Walther Riedel, former German rocket scientist at Peenemünde, Germany, tells Ginna he has kept notes on UFO sightings from all over the world: "I am completely convinced that they have an out-of-world basis." He also meets with Air Force UFO spokesman Albert M. Chop. Air Materiel Command claims it is investigating every serious UFO report, but it can't find the files he requests. Ginna becomes suspicious. ("Status of Project Blue Book," T52-6888, [1952]; Jan L. Aldrich, "Have We Visitors from Space?" Project 1947; Michael D. Swords, "1952: Ruppelt's Big Year," *IUR* 28, no. 4 (Winter 2003–2004): 9; Swords 120–121)

1952, March 5 — The Air Force sends a letter, signed by Lieut. Gen. Nathan Twining, to Secretary Finletter in response to Sen. Russell's February 21 inquiry. It offers two possible explanations: aircraft exhaust from a Soviet Lavochkin La-9 or La-11 fighter aircraft, or spotlights carried on enemy aircraft that have intercepted US bombers. (Project 1947, "UFO Documents, 1952, Korea"; Swords 145)

1952, March 7 — Physicist Joseph Kaplan visits ATIC to discuss methods of obtaining more information on green fireballs using a special diffraction grid to be placed on patrol cameras that can be used as a field spectrometer. ("Status of Project Blue Book," T52-6888, [1952])

1952, March 10 — 6:45 a.m. Clarence K. Greenwood, inspector of engineering metals, sees two dark objects come from behind him at an altitude of 5,000–7,500 feet while he is waiting for a bus in Oakland, California. They pick up speed, one of them moving in a pendulum-like motion. He thinks they are about 45 feet long. (UFOEv, pp. 56–57)

1952, March 14 — Evening. US Secretary of the Navy Dan A. Kimball is flying to Hawaii when he sees two discs moving at 1,500 mph. The UFOs circle his plane twice, then move on 50 miles east to another Navy plane carrying Adm. Arthur W. Radford. The UFOs circle Radford's plane then zoom up out of sight. Kimball sends a report to the Air Force, but hears nothing back, despite USAF demanding reports from all Navy witnesses. Kimball threatens to initiate Naval reports on UFOs through ONR to be kept separate from Blue Book. Keyhoe hears about this from both Kimball and Chief of ONR Adm. Calvin M. Bolster. The report is never made public, but the story is mentioned in the *Boston Traveler* magazine. (NICAP, "Admiral Radford & Navy Sec. Kimball Planes Buzzed"; NICAP, "Navy Secy Dan Kimball's Pilot's Sighting, March 14, 1952"; Bill Schofield, "Have You Heard," *Boston Traveler,* May 5, 1952; Keyhoe, *FS from OS,* p. 50; Swords 165)

1952, March 15 — 10:45 p.m. Donald F. Stewart and George Tyler III are driving northbound on the Governor Ritchie Highway in Glen Burnie, Maryland. A 50-foot silvery domed disc with two portholes and an apparent hatch appears from the northeast and hovers above their car, causing the engine to fail, magnetizing the wiring, and cracking the paint. Stewart takes a sub-machine gun from the back of the car and debates whether to fire it at the object, which remains in view for 3 minutes before turning on its edge and speeding away to the southwest. Tyler changes his story later, denying he was involved. (NICAP, "E-M Effects on Car from Domed Disc"; Sparks, p. 124; "Missing 'Flying Saucer' Reported Sighted Here," *Baltimore (Md.) American,* March 16, 1952; *Hynek UFO Report,* pp. 196–198; Randle, *Levelland,* 2021, pp. 61–64, 229; Powell, *Scientific,* 86–87; Kevin D. Randle, "Car Stalling and a Bungled Project Blue Book Investigation," A Different Perspective, May 27, 2024)

1952, Mid-March — Brig. Gen. William M. Garland initiates a top-secret compartmented project (to be designed and built by USAF R&D) to establish a global instrumented UFO detection and tracking system that would remove the necessity of relying on anecdotal evidence. (Clark III 813; Francis Ridge, "The 1952 Top-Secret USAF Instrumented UFO Data Collection Plan," *The SCU Review* 4, no. 3 (August 21, 2023): 9–11; Clark IV 906)

1952, March 19 — Ruppelt and other representatives of ATIC meet with the commander of the Air Defense Command, Gen. Benjamin W. Chidlaw, and Gen. Grandison Gardner and his staff in Colorado Springs, Colorado, on getting radar scope camera films as UFOs are being tracked. "They agreed with it in principle and suggested that I work out the details with the Director of Intelligence for the ADC, Brigadier Gen. Woodbury M. Burgess." Chidlaw promises to issue a directive to all units explaining procedures in UFO situations, including the scrambling of interceptors. This is issued, apparently in April. Burgess assigns Maj. Vernon L. Sadowski of his staff to be

liaison to Project Grudge., and the Ground Observer Corps is brought into the UFO reporting net. (Ruppelt, pp. 128–129; "Status of Project Blue Book," T52-6888, [1952]; Clark III 916; Clark IV 1027)

1952, March 25 — Project Grudge becomes a separate organization under the title Aerial Phenomena Group and is renamed Project Blue Book, apparently at the suggestion of Lt. Col. Charles Cooke, editor of *Air Intelligence Digest,* which he thinks is "without overtones." Cooke, originally suggests Project Book, but someone at the Joint Chiefs of Staff level expands it to Blue Book. Ruppelt says it is based on the books provided for taking college tests at Iowa State University. (Sparks, p. 12; Ruppelt, p. 131; Charles Cooke, "Flying Saucers Again: Do You Believe in Them?" *Washington (D.C.) Sunday Star,* August 7, 1966; "Intelligence Colonel Disputes Official Answers," *UFO Investigator* 3, no. 9 (Aug./Sept. 1966): 5; Loren E. Gross, *UFOs, a History: 1952, January–May,* The Author, 1993, pp. 20–21; Clark III 813, 916; Clark IV 906, 1027)

1952, March 26 — Day. Henry C. Davis is looking out at the ocean through his second-floor window in Long Beach, California, and listening to the radio. He spots two yellow discs in the sky about one mile high and 2 miles away. He thinks they are 1,000 feet apart and moving southeast to northwest at 100 mph. As they pass, his radio goes to static twice. (Schopick, p. 78)

1952, March 26 — Ruppelt, along with Col. Sanford H. Kirkland Jr. of ATIC and Lt. Col. William A. Adams of AFOIN, meets with the MIT scientists he calls the Beacon Hill Group, which recommends that Blue Book use "sound detection apparatus" in areas of UFO activity. (Clark III 916; Clark IV 1027)

1952, March 26 — Five trials are conducted through April 21 by the US Army Chemical Corps under Operation Dew. The tests release zinc cadmium sulfide along a 100-to-150-nautical-mile line approximately 5–10 nautical miles off the coast of Georgia, North Carolina, and South Carolina. Two of the trials disperse clouds of zinc cadmium sulfide over large areas of all three states. The tests affect over 60,000 square miles of populated coastal region. The Dew I releases are from a Navy minesweeper, the USS *Tercel*. The conclusion is that long-range aerosol clouds can obtain hundreds of miles of travel and large-area coverage when disseminated from ground level under certain meteorological conditions. (Wikipedia, "Operation Dew")

1952, Late March? — Ruppelt meets with two RCAF officers and briefs them on the new procedures. (Ruppelt, p. 130)

1952, March 29 — 11:20 a.m. Near Misawa, Japan, USAF Lt. David Conant Brigham is flying a T-6 target plane on a practice intercept mission for two F-84s. The first F-84 overtakes him at 6,000 feet when the T-6 pilot notices a small disc gaining on the interceptor. The UFO curves toward the F-84, decelerates rapidly, then flips on edge in a 90° bank. It flies between the two aircraft, pulls away, flips again, passes the F-84, crosses in front, and accelerates out of sight in a near vertical climb. Both pilots notice the object, which comes within 30–50 feet of the T-6. At one point it is moving with a fluttering motion, rocking back and forth in 40° banks at one-second intervals. The pilot estimates it is only 8 inches in diameter. There is a ripple around the edge. (NICAP, "Brigham/T6 Case: UFO Makes Pass at F-84"; Sparks, p. 123; "Air Force Reveals Flying Disk 'Made Pass' at Jet Fighter-Bomber over Northern Japan," *Scranton (Pa.) Times,* January 28, 1953, p. 7; Keyhoe, *FS from OS*, p. 192; C. W. Fitch, "Monitoring and Scanning UFOs," *APRO Bulletin,* March 1963, p. 5; UFOEv, p. 5; Clark III 377; Powell, *Scientist,* 46; Clark IV 421)

1952, March 29 — Two fiery discs are sighted over the uranium mines in the southern part of the Belgian Congo near Elisabethville [modern Lubumbashi, Democratic Republic of the Congo]. With a diameter of approximately 36–45 feet, they travel in a precise and light manner, both vertically and horizontally. They emit hissing and buzzing sounds. Changes in elevation from 2,400 to 3,000 feet are accomplished in a few seconds. The discs often move down to within 60 feet of the treetops. A Commander Pierre of the Belgian Air Force sets out in pursuit in a fighter plane from the city airport. On his first approach he comes to within about 260 feet of one of the discs. Suddenly they hover in one spot then takes off in a unique zigzag flight to the northeast at an estimated speed of 930 mph. Pierre gives up his pursuit after about 15 minutes. (NICAP, "Two Discs over Uranium Mines / Jet in Pursuit"; Sparks, p. 123; Good Above, p. 512; Covert 41)

1952, March 29 — 6:40 p.m. Carl J. Henry, chairman of the Industrial Commission of Missouri, along with several others, watches a cylinder-shaped, silver UFO for 2 minutes almost directly overhead in Butler, Missouri. It is moving silently in a northwesterly direction leaving no trail or exhaust. He estimates its length at 100 feet. (UFOEv, p. 68)

1952, March 31 — Battelle begins its UFO study (referred to as P-47S and nicknamed Little Stork) under the supervision of William T. Reid, folding it into Project Stork, an initiative to examine the Soviet Union's technological warfare capabilities. Almost all of the UFO analysis involves compiling IBM punch cards based on data forwarded by Project Blue Book files. (Jennie Zeidman, "I Remember Blue Book," *IUR* 16, no. 2 (Mar./Apr. 1991): 7–8; Jennie Zeidman and Mark Rodeghier, "The Pentacle Letter and the Battelle UFO Project," *IUR* 18, no. 3 (May/June 1993): 4–12, 19–21; Michael Hall, "Was There a Second Estimate of the Situation?" *IUR* 27, no. 1 (Spring 2002): 12; Clark III 929, 931; Clark IV 1039, 1041)

1952, March 31 — ATIC Chief Frank Dunn writes to Gen. Garland requesting that Project Blue Book be entirely declassified in order to make it easier to encourage civilian pilots to send in reports. That is a bit too much openness for Garland, who compromises by reclassifying certain case investigations as "Restricted," a relatively low level. (Loren E. Gross, *UFOs, a History: 1952, January–May, Supplemental Notes*, The Author, 2001, pp. 25, 29; Swords 146)

1952, March 31 — Project Blue Book issues its Status Report #5. (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 81–94)

1952, Spring — Occultist George Hunt Williamson and his wife Betty move to Prescott, Arizona, and immerse themselves in UFO literature. (Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 21)

1952, April? — Amateur astronomer W. Gordon Graham sees a UFO "like a smoke ring, elliptical in shape, and having two bright pinpoints of light along its main axis" at London, Ontario. It sails overhead from west to east. (*London (Ont.) Free Press*, May 1, 1952; UFOEv, p. 49)

1952, April — Secretary of the Navy Dan Kimball, upset with the way the Air Force has treated his UFO sighting, sets up an independent Navy probe of UFOs under Lt. Commander Fred Lowell Thomas of the Office of Naval Research. The project lasts through 1952, but probably not much longer. (NICAP, "Navy Secy Dan Kimball's Pilot's Sighting, March 14, 1952")

1952, April — Ruppelt again meets with MIT Lincoln Laboratory scientists (the Beacon Hill group) in Cambridge, Massachusetts, to brief them on Blue Book's progress. Afterward, he asks them about the flashes seen on Mars in 1951, and a general discussion of life on other planets ensues. Michael D. Swords suspects that some of those present are physicist George Valley Jr., engineer Julius Adams Stratton, physicist Albert G. Hill, and chemical engineer Walter G. Whitman. (Edward J. Ruppelt, "Are There Men on Mars? Or Other Worlds?" *IUR* 23, no. 1 (Spring 1998): 10–12, 31)

1952, April — Albert K. Bender, a factory worker in Bridgeport, Connecticut, announces the formation of the International Flying Saucer Bureau. (Clark III 189, 623, 727; Clark IV 224, 683, 807)

1952, April 2 — On the eve of the release of the bombshell *Life* magazine article, Ruppelt and his boss, ATIC Technical Analysis Division Chief Col. Sanford H. Kirkland Jr., give an extraordinary briefing, technically unclassified but in fact quasi-classified, to a group of aerospace engineers and saucer buffs organized as Civilian Saucer Investigation of Los Angeles. These include aeronautical consultant Felix W. A. Knoll, technical writer Ed J. Sullivan, and North American Aviation project engineer Walther A. Riedel. The briefing takes place at the Mayfair Hotel in Los Angeles, California, along with national media reporters and the *Life* magazine reporters who give them advance copies of the Darrach/Ginna article in exchange. ("Minutes of Meeting of Civilian Saucer Investigations Held Wednesday, April 2, 1952, 8:00 PM in the Mayfair Hotel, Los Angeles, California," April 2, 1952, transcribed by Sign Historical Group; Ruppelt, p. 175; Willard D. Nelson, "When Blue Book Met the Ufologists," *IUR* 12, no. 5 (Sept./Oct. 1987): 21–24; Clark III 241; Clark IV 282)

1952, April 2 — 9:00 a.m. While on a fishing trip to Lake Mead, Nevada, with his wife and M/Sgt Lester Gossett, M/Sgt Sheldon Smith observes a large silver UFO at a high altitude. It looks like a B-36 without wings. Smith observes it right after a flight of F-86s overfly the area at about 15,000 feet. After watching the hovering object for about an hour at a much higher altitude than the vapor trails from the F-86s, it suddenly disappears. (NICAP, "B-36 without Wings"; Powell, *Scientist*, 40)

1952, April 3 — 8:23 a.m. Three civilian Air Force pilot instructors, Chauncey P. "Chick" Logan, C. M. Jasper, and Paul Wilkerson, and several others observe a bright-silver oval object above the airport in Benson, Arizona. Hovering at 55,000 feet, the object is in view for nearly an hour, during which time it stays in the same position in the sky. Logan flies a T-6 trainer aircraft up to 13,500 feet to better observe the object, but there is no change in apparent size. (NICAP, "Seven Pilots Observe Huge Object"; Ellsworth Moe, "Big Unknown Aerial Object Reported by Marana Pilots," Tucson *Arizona Daily Star*, April 4, 1952, pp. 1, 14; "Airmen See Big 'Saucer'," Flagstaff *Arizona Daily Sun*, April 4, 1954, p. 1; Sparks, p. 124; Powell, *Scientist*, 40)

1952, April 3 — The Air Force publicly announces that it has not stopped investigating and evaluating UFO reports.

1952, April 4 — Henry B. Darrach Jr. and Robert Ginna's article, "Have We Visitors from Space?" appears in *Life* and reports on the revitalized USAF project. It comes close to advocating the ETH, and its primary sources are high-ranking Air Force officers. It recaps Arnold's sighting, the death of Mantell, the Chiles-Whitted case, and the Lubbock lights. The authors conclude that UFOs are physical objects far beyond US or Soviet capabilities. It quotes physicist Maurice Anthony Biot: "The least improbable explanation is that these things are artificial and controlled. My opinion for some time has been that they have an extraterrestrial origin." (H. B. Darrach Jr. and Robert Ginna, "Have We Visitors from Space?" *Life*, April 7, 1952, pp. 80–96; NICAP, "Scholarly Commentary on LIFE Article of April 7, 1952"; Martin S. Kottmeyer, "Did *Life* Magazine Help Spawn the 1952 UFO Wave?"

Magonia Supplement, no. 48 (October 21, 2003): 1–3; Michael D. Swords, "1952: Ruppelt's Big Year," *IUR* 28, no. 4 (Winter 2003–2004): 8–9)

1952, April 4 — Brig. Gen. William M. Garland arranges for the Air Force–RAND Corporation satellite project to have a briefing on UFOs by Ruppelt during a visit to ATIC. Ruppelt meets and befriends RAND engineer Jim Thompson. ("Status of Project Blue Book," T52-10889)

1952, April 5 — 10:40 a.m. Four civilians—Mr. and Mrs. L. G. Ryan, R. L. Stokes, and D. Schook—see a large, dull-gray, circular object, followed by two similar ones, flying straight and level at high speed over Phoenix, Arizona. (Sparks, p. 124; Powell, *Scientist*, 40)

1952, April 5 — 9:15 p.m. Lewis E. Van Dercar, an amateur astronomer, and his 9-year-old son see four dark, circular objects with mostly fuzzy edges, cross the lower edge of the full moon from their home at N.E. 18th Street in Miami, Florida. (NICAP, [case file]; Sparks, p. 124; Powell, *Scientist*, 40)

1952, April 5 — Near 12:00 midnight. Four members of the 372nd Bomb Squadron stationed at Kadena Air Base in Okinawa, Japan—A/1C P. T. Burnett, T/Sgt S. Ball, A/1C J. W. Johnston, and A/1C J. C. Holder—watch a white, steady light flying an erratic course at about 20,000 feet from the north horizon to the base area. It moves over the base at high speed (faster than a jet), zig-zagging, stopping, and maneuvering again. After 10 minutes, it shoots straight up and disappears to the west. (NICAP, "Object Zig-Zags over Base"; Sparks, p. 124)

1952, April 6 — 2:59 p.m. Herman L. Russell is near Draughan-Miller AFB [now Draughan-Miller Central Texas Regional Airport] in Temple, Texas, when he sees 50–75 grayish-white, metallic spots in the north-northwest at an elevation of about 30°–40°. They are randomly arranged within a circular formation that is only one full moon in area. The spots flash in unison every 12–15 seconds for a period of 2 seconds, as if they are tilting on a horizontal axis. After two minutes, the cluster becomes less dense in the center and more dense at the outer rim. Russell estimates its distance at 15–25 miles at a height about 50,000 feet. They disappear by fading into the distance. (NICAP, "50–75 Discs in Formation"; Sparks, p. 125; Powell, *Scientist*, 40)

1952, April 7 — During war games taking place in the vicinity of Lampasas, Texas, nicknamed Operation Longhorn, the Air Force announces that a new "aerial light" attached to a B-26 aircraft is in use that makes an "attacking bomber look like a ball of fire in the sky." It is essentially a bright magnesium searchlight (dubbed a "Hell Roarer" flare) that can illuminate a battlefield for nighttime photography. USAF Public Information Officer Capt. Irving Rappaport implies it could be mistaken for a flying saucer. ("Light Makes Bomber Resemble Ball of Fire," *Chambersburg (Pa.) Public Opinion*, April 7, 1952, p. 3; "It's No Saucer! Strange Objects in the Sky Are Nothing New in Dayton," *Dayton (Ohio) Daily News*, November 9, 1952, magazine supplement, p. 7; Curt Collins, "UFOs: Confusing the Public," The Saucers That Time Forgot, January 27, 2022)

1952, April 12 — 8:30 p.m. W/O E. H. Rossell and Flight Sgt. Reginald McRae are driving on RCAF Station North Bay, Ontario, when they see a bright amber disc arrive from the southwest, move across the airfield, stop, and then take off in the opposite direction at an angle of 30° at terrific speed. (NICAP, "Amber Disc Stops, Reverses Direction"; "Flying Saucers Could Be Real Admit Top Canadian Scientists," *Ottawa (Ont.) Journal*, April 16, 1952, pp. 1, 16; "Flying Discs No Joke Now in Air Force," *Ottawa (Ont.) Journal*, April 16, 1952, p. 3; Yurko Bondarchuk, *UFO Sightings, Landings, and Abductions*, Methuen, 1979, pp. 92–94)

1952, April 16 — 10:58 p.m. Four high-altitude contrails heading east-southeast toward Alaska are seen by US defense observers at Nunivak Island, Alaska. Air Defense Command becomes frantic about a possible Soviet attack. (NICAP, "UFOs and Alert Scare, April 1952"; NICAP, "Another Radar-Inspired National Alert"; "3 Plane Vapors Cause Alert at Alaska Stations," *Long Beach (Calif.) Independent*, April 18, 1952, p. 18; "Radar Scare," *Miami (Fla.) Herald*, April 19, 1952, p. 23; Clark IV 892)

1952, April 17 — 5:10 a.m. Radar at Caswell Air Force Station [now closed] in Limestone, Maine, tracks five unknown targets headed southwest into the US. Three are later identified as off-course civilian airliners, while two remain unidentified. The Air Force Intelligence warns Brig. Gen. Woodbury Burgess, at ADC Headquarters, Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, that a classified source (possibly an electronic intercept) has provided an "indication" of ominous Soviet military activity. With the simultaneous appearance of two waves (including the earlier Alaskan contrails) of unidentified targets, there is no alternative. At 5:11 a.m., ADC Commander Gen. Frederic H. Smith Jr. orders America's first nationwide Air Defense Readiness alert. SAC is notified to prepare launching nuclear missiles. The alert is canceled at 7:40 a.m. after no further activity is reported. (NICAP, "Another Radar-Inspired National Alert"; Clark IV 892)

1952, April 17 — 12:05 p.m. Air Force T/S Orville Lawson, Rudy Toncer (sheet metal shop foreman), and sheet metal shop workers R. K. Van Houtin, Edward Gregory, and Charles Ruliffson at Nellis Air Force Base, near Las Vegas, see 18 circular objects flying an easterly course that carry them over or very close to the Nevada Test Site. They watch the objects for about 30 seconds. (NICAP, "April 17, 1952: Nellis AFB, Nevada Large Group of Circular UFOs"; "Work Crew Spots Flying Saucers over A-Test Site," *Salt Lake Tribune*, April 18, 1952, p. 1; "5

Say They Saw Flying Saucers," Las Vegas *Nevada Morning Star*, April 18, 1952; "Flying Saucers Reported near Atom Test Site," *Greensburg (Ind.) Daily News*, April 18, 1952, p. 9; Loren E. Gross, *UFOs, a History: 1952, January–May, Supplemental Notes*, The Author, 2001, pp. 61–62; Nukes 83)

1952, April 17 — Dewey Fournet Jr. responds to a reporter from the *Baltimore Sun* who has asked about details of the Blue Book investigation with a two-and-a-half-page memo, vagued up a bit, but essentially saying that "nothing detrimental to our national security has materialized from these incidents." (Swords 147)

1952, April 18 — 12:07 p.m. Detachment 21 of the 618th Aircraft and Warning Squadron, Japan Air Self-Defense Force, picks up a radar target over the Korea Strait north of Kyushu Island, Japan, moving at 2,700 mph. (NICAP, "Object Tracked at 2,700 MPH"; Sparks, p. 127)

1952, April 19 — 9:20 p.m. USAF Brig. Gen. Edwin M. Day is reclining on a patio in Dhahran, Saudi Arabia, when he sees an object traveling parallel to the ground at a constant altitude (between 10,000 and 20,000 feet) and moving in his direction. Its speed is greater than a jet's. It breaks into two parts at one point but maintains its constant course. He follows it visually for 5–6 seconds until it disappears to the north-northeast. ("When UFOs Were Serious Business: Then and Today," *IUR* 28, no. 4 (Winter 2003–2004): 5–6)

1952, April 20 — 9:15 p.m. Naval aviation student Edmund Kogut and his wife Shirley are at a drive-in movie theater in Flint, Michigan, when they see several groups of UFOs fly over. There are 2–9 objects in a group and about 20 groups, all flying in a straight line except for some changes in direction accomplished unlike any known aircraft. They are shaped like conventional aircraft but have an odd reddish glow surrounding them. (NICAP, [Flint, Michigan, case documents]; Sparks, p. 128)

1952, April 22 — The Canadian Defence Research Board establishes a UFO study group that meets for the first time today. Project Second Storey, formed by Omond M. Solandt, DRB chairman, meets at least five times. It is chaired by astrophysicist Peter M. Millman and includes Wilbert B. Smith and representatives from Naval Intelligence, Military Operations and Planning, and the Defence Research Board. At its April 24 meeting, it decides to meet with the US government on UFO matters. ("Project Second Storey Minutes, 1952.04.24"; Stuart Nixon, "W. B. Smith: The Man behind Project Magnet," *UFO Quarterly Review* 1, no. 1 (Jan./Mar. 1973): 2–17; Good Above, p. 186; Loren E. Gross, *UFOs, a History: 1952, January–May*, The Author, 1993, p. 53; Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report*, Dundurn Press, 2006, p. 225–226; Clark III 1078; Clark IV 1194)

1952, April 22 — Around 9:00 p.m. A B-29 combat crew on the ground at Naha Air Base on Okinawa, Japan, observes an elliptical-shaped object at an altitude of 1,000–1,500 feet flying east to west. One minute later, two more objects are observed flying the same course. Five minutes later, two more objects appear flying in the same direction. All five objects are elliptical in shape and apparently 2–3 feet in length. The objects have a brilliant white light that blinks at 1–2 second intervals as they perform erratic maneuvers. The estimated speed of the objects is 1,150 mph. (NICAP, [case file]; Sparks, p. 128; Powell, *Scientist*, 40)

1952, April 23 — 9:30 a.m. R. C. Munroe, engineering standards section head for Raytheon Manufacturing Company, notices an object near an AT-6 Texan trainer aircraft above Lexington, Massachusetts. He estimates its altitude at 40,000 feet. It decelerates abruptly and goes into a flat turn. He writes, "It is inconceivable to me that any human being could have withstood the deceleration or acceleration displayed by this aircraft." (UFOEv, p. 57)

1952, April 23 — 10:45 a.m. Engineers Carl Hawk and Marvin Harvey are at Sandia Base, Albuquerque, New Mexico, when they look up to watch a jet fighter as it shoots to the north above the Sandia Mountains. They also notice a soundless, flat, rectangular, wing-like object streaking through the sky from east to west above Tijeras Canyon. The object is completely black except for a distinct, bright yellow "V" on its bottom. Two slight points extend from its rear corners. Hawk estimates that it is passing overhead at 2,000 feet altitude at 200–400 mph and is roughly 60 feet wide by 20 feet long. They watch it for 10 seconds until it disappears in a cloud above downtown Albuquerque. ("What Soared Across Duke City Sky That Day in April, 1952?"*Albuquerque (N.Mex.) Tribune*, November 21, 1957, p. 8)

1952, April 24 — An Air Force Intelligence memorandum to Col. Frank Dunn, chief of ATIC, transmits nine reports (not released) of unidentified submarine objects reported to the Office of Naval Intelligence. (Good Need, pp. 141, 145)

1952, April 25 — 11:00 a.m. Biochemist Robert A. Whitmore and bacteriologist E. Stanley Yawger Jr. are driving to their office in San Jose, California, when they see a metallic-looking disc rotating around a vertical axis and wobbling. It is moving slowly over the office and is about 4–5 feet in diameter. It flies in a slow arc. Then they see a black object hovering at a high altitude under an overcast. This one is about 100 feet in diameter. Two identical objects come into view out of the clouds. The three objects "jittered about like boats in a stream." Then the small disc stops spinning, hovers, then shoots upwards, followed by one of the black objects. The remaining two objects linger another minute or so, then take off separately. The episode lasts 15 minutes. Whitmore calls Moffett Field

in Santa Clara County, but hangs up before reporting the sighting, which they describe as a "most disturbing experience." The object "utilized some propulsion method not in the physics books." (NICAP, "Scientist Sighting / Extraordinary Propulsion Implied"; Richard H. Hall, *Uninvited Guests*, Aurora, 1988, pp. 241–242; Loren E. Gross, *UFOs, a History: 1952, January–May, Supplemental Notes*, The Author, 2001, pp. 69–75)

1952, April 25 — Battelle releases its first status report on Project Stork, noting that it has selected a panel of consultants, initiated a news clipping service, and devised a coding scheme for UFO reports. ("Seven Status Reports for Project Stork," CUFON)

1952, April 29 — Secretary of the Air Force Thomas K. Finletter issues Air Force Letter 200-5, which directs intelligence officers at every base to report UFOs immediately to ATIC and all major USAF commands. It enables Project Blue Book staff to communicate directly with any Air Force base without going through the normal chain of command, and provides for wire transmission of reports to ATIC, followed with details via air mail. AFL 200-5 is modified by AFR 200-2 in 1953. (Department of the Air Force, "Unidentified Flying Objects Reporting," Air Force Letter 200-5, April 29, 1952; Ruppelt, pp. 132–133; Clark III 917; Clark IV 1027)

1952, April 29 — An Air Force memorandum written to justify a trip by Lt. Col. E. Sterling and Stefan Possony to Europe mentions that their work for USAF Intelligence's "Special Study Group" is to evaluate Soviet advanced aerial delivery systems, as well as to shed "some much needed light" on the "vexing 'flying saucer' problem." It adds that the "Air Force cannot assume that flying saucers are of non-terrestrial origin, and hence, they could be Soviet." (Michael D. Swords, "1952: Ruppelt's Big Year," *IUR* 28, no. 4 (Winter 2003–2004): 10; Swords 151)

1952, April 30 — Project Blue Book issues its Status Report #6. (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 95–112)

1952, April 30 — 6:00 p.m. Six members of the 3rd Platoon, Heavy Mortar Company, 180th Infantry Regiment at the front lines around Panmunjeom, Korea, see two silvery wingless objects, one behind the other, flying in a valley in a southeasterly direction. Pfc H. B. Webb thinks they are flying at 900–1,000 mph. Some slower northbound F-86 Sabre jets pass above them. They make a rumbling sound. (Haines, *Korea*, p. 63)

1952, May — Army radar specialist Jay Nogle is stationed near Washington, D.C., when he picks up an unknown target on his M33 scope at an altitude of 18,000 feet about 130 miles from the capital (which would put it over eastern Pennsylvania). Two other Army units also detect the object, which remains stationary for 30 minutes before moving. By the time the object reaches the edge of the radar scope, it is traveling at 1,000 mph. The report goes all the way to the Pentagon, where orders are given to fire on it if it returns. Nogle says that radar targets are frequently seen in May or June, and units have their antiaircraft guns loaded after the first incident. When 12 F-94 Starfire jets are scrambled from McGuire AFB [now part of Joint Base McGuire-Dix-Lakehurst] in Burlington County, New Jersey, the targets move speedily out of range. (Swords 153)

1952, Early May — Lt. Thomas A. Featherstone is operating Ground Control Approach radar at NAS Willow Grove [now NAS Joint Reserve Base Willow Grove] in Willow Grove, Pennsylvania, when it picks up a target in bad weather conditions near the center of the scope. By the next sweep (32 rpm) the target has moved almost five miles, indicating the object was moving approximately 3,600 mph. It is seen to move as the trace sweeps past it. By the fourth sweep, the target has moved off to the 10-mile limit of the GCA scope. The target is visible on two radar scopes, operating on two different frequencies. A similar object is tracked the following day under similar weather conditions. (NICAP, "Target Follows Sweep")

1952, Early May — 10:00 p.m. A senior CIA official is having a lawn party at his home near Alexandria, Virginia, for some VIPs. He and two others notice a light approaching silently from the west. It stops then climbs almost vertically, stops again, then levels out. Then it goes into a nearly vertical dive, levels out, and streaks off to the east. (Ruppelt, pp. 135–136; Swords 148)

1952, Early May — A meeting is held in the Pentagon office of Stefan Possony, acting chief of the Directorate of Intelligence Study Group under Maj. Gen. John A. Samford to hear Harvard University astronomer Donald Menzel express his views. Present are Possony, Capt. Edward J. Ruppelt, ATIC chief Col. Frank Dunn, Brig. Gen. William M. Garland, Possony's assistant Leslie Rosenzweig, and one other officer. Menzel announces that he has solved all UFO reports and claims to have helped out in the development of the cameras in Project Twinkle. His attitude irks everyone in the meeting. When he asks the Air Force to support his views in upcoming publications in *Time* and *Look*, Gen. Garland gets angry. Col. Dunn says that Blue Book would have put some money into more formal versions of his experiments, but he can only offer a statement that Menzel has told them of his theory. Now Menzel gets agitated, saying it is no theory. He refuses to leave them a copy of his book [perhaps a preliminary or manuscript copy, since it is not published until 1953] to pass on to Joseph Kaplan and J. Allen Hynek. In the evening, Possony speaks with astronomer Francis J. Heyden at Georgetown University, who tells him that Menzel's work is based on no more than a "couple of meaningless high school physics

experiments." (Michael D. Swords, "Strange Days, Part 2," *IUR* 32, no. 2 (December 2008): 9; Swords 152; Clark III 743; Clark IV 823–824)

1952, May 1 — 9:10 a.m. Air intelligence officer Maj. Rudolph Pestalozzi and an airman standing outside the Davis-Monthan AFB base hospital, Tucson, Arizona, watch two shiny, round objects overtake a B-36 flying above. The objects slow down to match the plane's speed and remain in formation with them for 20 seconds. Then they make a sharp, no-radius turn away from the B-36, moving away a bit. Then one of the objects stops and hovers. Both are silent, and the crew estimates they have a diameter of 20–25 feet and a thickness of 10–12 feet. (NICAP, "The Case of the Missing Report"; Sparks, p. 131; *Hynek UFO Report*, pp. 109–112, 292–294; UFOEv II 73–74; Good Need, pp. 166–167)

1952, May 1 — 10:50 a.m. At George AFB [now Southern California Logistics Airport] near Victorville, California, five independent witnesses in the base control tower see a group of five white discs moving in formation for about 30 seconds. The objects appear very maneuverable, seem to almost collide, then break away in a right-angle turn. They are traveling an estimated 900–1,200 mph and are 1,000–1,200 feet in diameter. Four miles away at Apple Valley, California, the base's wing director of personnel, playing on a golf course, sees one of the UFOs at the same time. (NICAP, "George AFB / Apple Valley, CA Radar Case"; Sparks, p. 131; *Hynek UFO Report*, pp. 107–109; Good Need, p. 166; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 10, 15; Swords 147–148; Clark III 376; Clark IV 420)

1952, May 1 — 1:45 p.m. *Albuquerque Journal* composing room employee Eugene Cline sees four silvery objects seemingly playing tag with a formation of 12 Air Force bombers—either B-29s or B-50s—flying west over Albuquerque, New Mexico. The round objects are keeping up with the planes at the same altitude, moving in a "tumbling or pitching manner." One object shoots straight up and takes off in a southerly direction. About the same time, workmen (one of them Howard Burgess) erecting an antenna at nearby Sandia Base watch three UFOs pass directly overhead. One comes from the west and moves south; another comes from the north and moves south; and a third, tan-colored rather than silver like the others, passes low overhead and looks like a "cylinder tumbling end over end." Burgess and the others are debriefed and sworn to secrecy about what they have witnessed. ("Flying Saucers Play Tag with Bombers over City," *Albuquerque (N.Mex.) Journal*, May 2, 1952, p. 2; Nukes 56–58)

1952, May 7 — 12:22 a.m. Mrs. Hanley Marks sees a light-green, ball-shaped object fall from the sky into the Sandia Mountains, New Mexico, from her home in the Bel-Air neighborhood of Albuquerque. ("Fireball Falls near Sandias Early Today," *Albuquerque Journal*, May 7, 1952, p. 1; "Green Fireball Falls in Southwest, Three Here Report," *Albuquerque Journal*, May 7, 1952, p. 9)

1952, May 7 — 12:15 p.m. A Captain Morris and three enlisted men at Keesler AFB, Biloxi, Mississippi, see one or two aluminum or silver cylindrical objects darting in and out of the clouds 10 times. ([Blue Book case report]"; Sparks, p. 131)

1952, May 7 — 4:30 p.m. Magazine writer Ed Keffel, in the company of João Martins, takes five photographs of a UFO over Barra da Tijuca, Rio de Janeiro, Brazil. In the first, the UFO resembles an airplane coming directly toward them over a large group of trees. The second shows the object as disc-shaped. The third photo is taken as the object tilts slightly, showing both the top with a slight dome and the now obvious disc shape. More trees, including a very tall palm, can be seen in the photograph. The fourth picture, taken as the object tilts the other way, shows a raised ring on the bottom. The final picture is taken as the object is nearly vertical, seen over part of the ocean and some distant hills. The UFO disappears shortly afterward. NICAP does not see any negatives and is skeptical. The Colorado project finds a "glaring internal inconsistency" in the illumination and dismisses the photos as hoaxes. Today, the best evidence seems to suggest the case is a hoax, perpetrated by two magazine writers who wanted an interesting story. (NICAP, "Barra da Tijuca Photos"; Olavo T. Fontes, "The Barra da Tijuca Disc," *APRO Special Report no. 1* (October 1961): 1–6; Condon, pp. 83, 415–418; Swords 460–461; Cláudio Tsuyoshi Suenaga, "Os 90 Anos do *O Cruzeiro*, a Revista que Inaugurou a Era Moderna dos Discos Voadores no Brasil," October 11, 2018; "O caso da Barra da Tijuca," Fenomenum, February 17, 2022)

1952, May 8 — 2:27 a.m. Pan American Airways pilot Clayton C. Gallagher and his copilot, flying a Lockheed Constellation aircraft at 8,000 feet en route from San Juan, Puerto Rico, to New York, see a light, 10 times the size of an airplane landing light, approach them over the Atlantic Ocean east of South Carolina. It streaks past their left wing about a quarter mile away, followed by two smaller orange balls of fire. Probable meteor. (NICAP, "Three UAO Sighted by Constellation Crew"; Sparks, p. 131; Ruppelt, pp. 133–135; "San Juan Puerto Rico Pan Am CE-II Case of 5-8-52 – Jay Glick," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; Tim Printy, "May 8, 1952: Atlantic Ocean off Jacksonville, Fla.," *SUNlite* 15, no. 3 (May/June 2023): 3–5)

1952, May 8 — Air Force Secretary Thomas Finletter and his staff (including his special assistant, covert CIA agent Joseph Bryan III) receive a secret one-hour briefing on UFOs from Ruppelt and Lt. Col. R. J. Taylor that covers

USAF investigations over the previous five years. Finletter asks questions about some specific sightings. (Ruppelt, p. 138; Michael David Hall and Wendy Ann Connors, *Captain Edward J. Ruppelt: Summer of the Saucers*, Rose Press, 2000, pp. 99–100)

1952, May 10 — 3:00 p.m. USAF Lt. Col. Maurice G. Bechtel and his wife are in the yard of their home in Albuquerque, New Mexico, when they see two silvery disc-shaped objects flying straight and level, one after the other, moving southwest to northeast at above 20,000 feet. The first object seems to waver on its axis, the second object follows a similar path but at a higher altitude. The first object is the size of a B-36 at high altitude. Bechtel alerts the radar station but it is unable to track the objects. (NICAP, "Two Discs Observed by Lt. Colonel and Wife"; Sparks, p. 132)

1952, May 10 — 8:30 p.m. A British scientist and others at Paphos, Cyprus, see a luminous circular object rise from the sea and waver back and forth before fading from sight directly overhead. (NICAP, "Paphos, SW Cyprus"; Sparks, p. 132; Good Above, p. 540; Covert 23; Dolan, USO1, 154–155)

1952, May 10 — 10:45 p.m. Four employees of DuPont Corporation at the AEC's Savannah River Laboratory near Jackson, South Carolina, see four disc-shaped objects approach, then two other discs pass high overhead from different directions. They are a luminous yellow-gold color and move at a high rate of speed. One of the discs approaches at such a low altitude that it must ascend to pass over some tall tanks at the facility. One witness says that the objects are weaving from left to right while continuing on a steady course. The case is investigated by the FBI and passed on to the Pentagon and the Atomic Energy Commission. Tim Printy thinks the objects may have been birds illuminated by ground lighting. (NICAP, "Objects Sighted near Vital Installation"; Sparks, p. 132; memo from J. Edgar Hoover to USAF Director of Special Investigations, "Flying Disks Reportedly Seen in Vicinity of Savannah River Plant Atomic Energy Commission," May 25, 1952, [p. 19]; Nukes 84; Tim Printy, "The 701 Club: Case #1198, Ellenton, South Carolina, May 10, 1952," *SUNlite* 15, no. 3 (May/June 2023): 5–6)

1952, May 12 — 8:45 p.m. A UFO is seen by Walker AFB T/Sgt. Raymond Bare in a car in downtown Roswell, New Mexico. The object is blue-green in color, and its estimated altitude above the terrain is 20,000–30,000 feet. It appears to be about 40–50 miles distant over some low mountains east of Ruidosa. The object travels three times over approximately the same south-to-north / east-to-west, swaying, triangular course. Rate of speed cannot be precisely estimated but is faster than that of a jet aircraft. Intensity of color brightness varies with the object's altitude. The Air Force explains it as the planet Venus, but Venus is on the other side of the earth at the time. (NICAP, "High-Speed Object Maneuvers over Mountains"; Sparks, p. 132; Clark III 390–391; Clark IV 436)

1952, May 13 — 8:55 p.m. Aeronautical engineer Donald R. Carr sees a meteor-like object descend over National City, California, flying a curving path to the northwest. At 9:25 p.m., Carr watches a similar object, seemingly returning from the north. (UFOEv, p. 4)

1952, May 13 — 10:33 p.m. James Richardson and three other amateur astronomers (among them Cyril Thomas Wyche and Harry B. Mooney), set up telescopes at Furman University in Greenville, South Carolina, when they see a diamond formation of 4 oval, reddish-yellow or reddish-brown luminous objects nearly overhead. They disappear after 3 seconds moving through a 12° arc. The apparent size is a half dollar at arms length. They wobble in flight. (NICAP, "Diamond Formation of 4 Objects Observed by Astronomers"; Sparks, p. 133; Willy Smith, "Blue Book Pearls: Greenville, S.C.," *IUR* 20, no. 3 (May/June 1995): 8–9, 24; Willy Smith, *On Pilots and UFOs*, UNICAT Project, 1997, pp. 31–42; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 10, 15)

1952, May 14 — RCAF personnel and members of the Defense Research Board of Canada visit Capt. Ruppelt at Wright-Patterson AFB near Dayton, Ohio, for a briefing on its operations and establish a channel for communication with Project Second Storey. (Stuart Nixon, "W. B. Smith: The Man behind Project Magnet," *UFO Quarterly Review* 1, no. 1 (Jan./Mar. 1973): 2–17)

1952, May 15 — USAF Intelligence Special Study Group Chief Lieut. Col. E. Sterling and Stefan Possony begin a five-week temporary duty trip to Europe to study Soviet missiles and aircraft. As a side project they study "flying saucers" that might be of Soviet origin. No documents have yet been found on this trip's results. (Swords 151)

1952, May 15 — 6:35 p.m. The pilot of an F-51 assigned to the 18th Fighter Bomber Group flying at 9,000 feet over North Korea encounters a silver object estimated to be 50 feet in diameter. It appears ahead of him to the right and begins climbing at 1,000 mph to the east, pauses, then descends into some haze. (Haines, *Korea*, pp. 39–40)

1952, May 15 — 8:00 p.m. Two F-86E pilots of the 61st Fighter-Interceptor Wing are on a mission in North Korea when they see a silvery disc larger than a MiG aircraft 20 miles away and below them at 8,000–10,000 feet. Seen for only 3–5 seconds, the object is traveling at 1,200–1,500 mph in a rolling maneuver. (Haines, *Korea*, p. 39)

1952, May 17 — 9:30 p.m. Mr. R. Baits is on the beach at Derna, Libya, with three companions when he notices a soft orange-yellow light traveling soundlessly toward them from inland at great speed and in a straight line. Suddenly, as it reaches a point overhead, it swerves to the east over the town, gaining height. After a few seconds it moves to the south and begins zigzagging until it fades away into the background of stars. ("Mystery Light's Erratic

Course," *Newcastle (UK) Evening Chronicle*, June 13, 1952, p. 13; [Letter], "It Was a Light," *Newcastle (UK) Evening Chronicle*, June 13, 1952, p. 3)

1952, Late May — 1:00–3:00 a.m. Royal Canadian Navy Commander George R. McFarlane is officer of the watch on the Canadian warship HMCS *Iroquois* in the Pacific Ocean between Hawaii and Guam en route to Korea. He sees many different lights, some single, others in formations of 3, 5, or 6, appearing and disappearing instantly. Suddenly one of the objects appears off the port bow at close range and low elevation. McFarlane and the signalman on watch see that the light is attached to a disc-shaped object with two dozen black windows running along its side. It hovers nearby for at least 15 minutes. (Good Need, pp. 142–143)

1952, May 23 — After 11:00 p.m. Lockheed worker Orfeo Angelucci is driving home on Victory Boulevard from his job in Burbank, California, when he senses a force and sees a red, glowing UFO. After a while he begins to follow it, and after he crosses the Los Angeles River and turns onto Forest Lawn Drive, he gets to within 30 feet of it when it hovers. Just before it streaks away, two smaller green globes, 3 feet in diameter, shoot out of it and approach him. He hears a voice saying, "Don't be afraid, Orfeo, we are friends." This begins his contact with benevolent beings from other planets. (Orfeo Angelucci and Paul M. Vest, "I Traveled in a Flying Saucer," *Mystic Magazine*, November 1953, pp. 55–61; Orfeo Angelucci, *The Secret of the Saucers*, Amherst Press, 1955, pp. 1–15; Bryant and Helen Reeve, *Flying Saucer Pilgrimage*, Amherst Press, 1957, pp. 222–232; Clark III 127–129; Håkan Blomqvist, "Orfeo Angelucci and the Esoteric Tradition," Håkan Blomqvist's Blog, December 14, 2019; "Orfeo Angelucci in a Rare Recording on Meeting Extraterrestrial Entities and *The Secret of the Saucers*," Eyes on Cinema YouTube channel, August 2, 2023; Eghigian, *After*, pp.134–135; Clark IV 154–157)

1952, May 25 — 9:27 a.m. An Air Force captain in charge of the navigation section of Combat Crew Training School at Randolph AFB near San Antonio, Texas, his wife, and another pilot see a group of about 12 orange-white, tear-drop shaped lights in 3 groups of 4 moving from west to east at 2,000 mph and 10,000 feet altitude. They hear deep, soft intermittent noise. (NICAP, "Randolph AFB, Texas, May 25, 1952, UFO Report"; Sparks, p. 134; Ruppelt, p. 140)

1952, May 26 — 3:20 a.m. Ground radar alerts the crew of an F-94 Starfire interceptor jet over North Korea that an unidentified target is on its tail. The jet turns, descends to 2,500 feet, and both the pilot, 1Lt John W. Martin, and radar operator, 1Lt. Edward A. Monard, see a brilliant white light above and straight ahead. They make one pass within 600 feet of the object, but due to its brilliance they cannot identify its shape. The pilot makes six more close passes, but still cannot identify it. Their aircraft radar does not pick up the object. After the last pass, the radar operator briefly thinks he sees something following them, and ground radar tells them there is an unknown target on their tail. The pilot banks to the right to get behind the target, and this time the aircraft radar locks onto the object, which is ahead of them. In less than a minute, the F-94 is within 3.4 miles of the target. The UFO then performs a steady climbing turn and accelerates away reaching a distance of nearly 15 miles from the jet in 12–15 seconds, breaking radar contact. Robert Powell estimates that the object is speeding away at 5,371 mph and sustaining 16.7 g-forces, which is roughly what USAF Brig. Gen. Charles Y. Banfill estimates shortly after the incident. (NICAP, "F-94 Has UFO on Its Tail, Radar Tracks"; Sparks, p. 135; Haines, *Korea*, pp. 40–44; Powell, *Scientist*, 70–72)

1952, May 28 — 1:45 p.m. Albuquerque, New Mexico, fire department employees Martin Romero and Don Atteberry see two circular objects, one shiny silver and the other orange or light brown, performing fast maneuvers on three different occasions over the course of an hour above the northeast part of the city. (NICAP, [Blue Book case documents]; Sparks, p. 135)

1952, May 28 — 8:30–8:40 p.m. A green fireball about one-third the size of the full moon is seen in Albuquerque, New Mexico, from eight ground points and five aircraft. Lincoln LaPaz pinpoints the fall near Santa Fe. Around the same time, the crew of a Flying Tiger Line C-46 near Otto, New Mexico, sees a green fireball rise up and drop steeply down. ("2 Green Fireballs Seen by Many, LaPaz Reports," *Albuquerque Journal*, May 29, 1952, p. 2)

1952, May 28–29 — During a night refueling mission at 8:10 p.m., the crews of five USAF B-29 bombers see green spherical objects. The primary sighting takes place near Albuquerque, New Mexico, and involves three B-29s flying at 15,000 feet. Another sighting takes place around 11:30 p.m. about 10 miles southwest of Tulsa, Oklahoma. That crew is flying at 25,000 feet. Three hours later the final sighting takes place near Enid, Oklahoma, also with a B-29 at 25,000 feet. The aircrews making these reports do not think the objects are meteorites. (NICAP, "Five B-29 Bomber Crews Observe Green Objects"; Sparks, p. 135)

1952, May 30 — USAF Maj. William D. Leet, copilot on a C-54 transport mission at 8,500 feet near Oshima, Japan, sees a dark object hovering in clouds for 7 minutes. It disappears, speeding away in seconds. (NICAP, "C-54 Crew Encounters Round Black Object"; Sparks, p. 136; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 January–May, Supplemental Notes*, The Author, 2000, pp. 82–83)

1952, May 31 — About 4:00 a.m. Over a ground radar site near Cheorwon, South Korea, several US soldiers see a bright UFO that looks like a falling star, except that it stops falling and begins to climb again. It then moves northeast at 150 mph, reverses course twice, moves in jerky motions, turns seemingly simultaneously, then climbs at a 45° angle and disappears from sight within 3–4 seconds. One guard hears a pulsating sound. An F-94 attempts to intercept the brilliant white object, which takes clearly evasive maneuvers with superior speed, maneuverability, and climbing ability. It pulls away at 30,000 feet. The object is tracked on the F-94's airborne radar. (NICAP, "Jerky Object Observed and Tracked on Radar"; Sparks, p. 136; *Hynek UFO Report*, pp. 87–90; Haines, *Korea*, pp. 63–64; Patrick Gross, "UFO US Military Reports, Korea, 1952"; Powell, *Scientist*, 65–66)

1952, May 31 — Project Blue Book issues its Status Report #7. (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 113–130)

1952, June — Ruppelt has four officers, two airmen, and two civilians on his permanent Blue Book staff (including Lt. Anderson G. Flues, Robert M. Olsson, and Kerry Rothstien), as well as a number of scientific consultants, including Hynek. In the Pentagon, Maj. Dewey Fournet Jr. is a full-time Blue Book liaison. This month Blue Book received 149 reports. (Ruppelt, p. 140–141)

1952, June — In the wake of mass public and governmental interest in UFOs kindled by the provocative *Life* magazine article, CIA intelligence experts Sidney N. Graybeal (Chief, Guided Missiles Branch, Weapons and Equipment Division, Office of Scientific Intelligence) and Irl D'Arcy Brent (Chief, Ground Branch, W&E Division, OSI) prepare a summary of the UFO subject for the CIA/OSI hierarchy based on the past several years of OSI intelligence (and OSI predecessor documents going back to ghost rockets of 1946) and mentioning sightings going back to the Bible. The possibility of swamp gas in Michigan as an explanation for UFOs is suggested by Brent (foreshadowing the Hynek swamp-gas fiasco in Michigan in 1966). This report has never been acknowledged or released by the CIA despite FOIA litigation. Its existence and contents are revealed in Brad Sparks's interviews with Brent and Graybeal and other OSI officials in 1975–1976. (NICAP, "The 1952 Sighting Wave")

1952, June — Jet pilots allegedly discover the wreck of a flying disc on Spitsbergen in the Svalbard archipelago, Norway. It is taken to Narvik, where it is identified as either a Russian or extraterrestrial device. Other variants of the legend claim it is a Nazi device or that it is actually discovered on Heligoland, Germany, in the North Sea. Nick Redfern suspects the story is planted by either Soviet or US intelligence. ("Auf Spitzbergen landete Fliegende Untertasse," *Saarbrücker Zeitung* [Saarbrücken, Germany], June 28, 1952; *Hessische Nachrichten* [Kassel, Germany], July 26, 1954; E. W. Grenfell, "First Report on the Captured Flying Saucer," *Sir!* September 1954, pp. 16–17, 56–57; *Le Lorrain*, October 15, 1954; *Verdens Gang* [Oslo, Norway], December 19, 1954; Edwards, *FS—Serious Business*, 1966, pp. 44–48; Condon, pp. 90–91; Loren E. Gross, *UFOs, a History: 1952, June–July 10th*, The Author, 1986, pp. 31–32; William Steinman and Wendelle C. Stevens, *UFO Crash at Aztec*, UFO Photo Archives, 1987, pp. 353–366; Pat Bontempo, "Incident at Heligoland," *UFO Universe* 5 (Spring 1989): 18–22; Ole Jonny Brænne, "Legend of the Spitsbergen Saucer," *IUR* 17, no. 6 (Nov./Dec. 1992): 14–20; Kremlin 45–46; Clark III 327; Kevin D. Randle, "Spitsbergen Crash/Retrieval and David Grusch," A Different Perspective, May 26, 2024; Clark IV 363)

1952, June? — 9:00 p.m. Francis Y. Kelson, a US Army soldier temporarily assigned to the US Navy, is on a landing ship, dock (LSD), possibly the USS *Donner*, as part of a Corps of Engineers operation called Operation SUNAC (Support and Supply for North Atlantic Construction). While in the North Atlantic Ocean en route from Norfolk, Virginia, to Cape Chidley, Newfoundland, he and another soldier are on deck when they hear an intense, high-pitched whining noise. They notice two dull-white lights in the water ahead, apparently 5 feet in diameter, 20 feet apart, and only 10 feet from the hull. A Navy bosun's mate comes on board and tells them they had been tracking the object on sonar for 2 hours and it had been pacing them from 2 miles off their stern. After 20 minutes, the whining noise increases in intensity and the lights pull forward and move toward land. The two soldiers are told not to reveal what they had seen. (Carl Feindt, "Report #1147," waterufo.net; Bernard Kessler, "Cape Chidley, Labrador: 1952, Operation SUNAC"; Dolan, USO1, 152–154)

1952, June — Sunset. In Tombstone, Arizona, Navy Lieut. Cmdr. John C. Williams, his wife Josephine, and a guest see a "huge circular object" flying toward them from the direction of Tucson. Suddenly it stops in mid-flight, hovers, then reverses direction and retraces its course. A few seconds later it returns, stops gain, and appears to oscillate and tilt from one side to the other. Again it reverses its course, repeating everything 2–3 more times. (UFOEv, p. 30)

1952, Early June — 9:00 or 10:00 p.m. Violet M. Winstead and her husband are driving in a narrow valley somewhere between Charleston and White Sulphur Springs, West Virginia, when they see a number of lights on a bridge

crossing the valley. They begin blinking off, one by one. When they get to the bridge, they see no street lights. (Violet M. Winstead, Letter, *IUR* 9, no.1 (Jan./Feb. 1984): 3)

1952, June 1 — 2:40 a.m. A cargo ship anchored at the wharf in Port-Gentil, Gabon, observes a mysterious object fly from behind the city, make a double loop, pass over the roadstead, and then dive toward the sea. (ClearIntent, p. 119)

1952, June 1 — Morning. The chief of a radar test section for Hughes Aircraft Company tracks an unidentified target coming across the San Gabriel Mountains north of Los Angeles, California. It is moving at 180 mph toward Santa Monica at an altitude of 11,000 feet. The object suddenly triples its speed to 550 mph, turns, and climbs over Los Angeles at 35,000 feet per minute. The target then levels out for a few seconds, goes into a high-speed dive, and levels out again at 55,000 feet. They lose the blip somewhere near Riverside. (NICAP, "Radar Tracks Object Which Suddenly Climbs to 55,000 Feet"; Ruppelt, pp. 141–143)

1952, June 4 — Air Force Secretary Finletter issues a press release about his May 8 UFO briefing, saying, "No concrete evidence has yet reached us either to prove or disprove the existence of the so-called flying saucers. There remain, however, a number of sightings that the Air Force investigators have been unable to explain. As long as this is true, the Air Force will continue to study flying saucer reports." (Keyhoe, *FS from OS*, p. 51)

1952, June 5 — Air Force Intelligence initiates a series of internal staff studies on UFOs, inspired by Brig. Gen. William M. Garland's new policy emphasizing instrumentation, that is circulated within AFOIN and ATIC. (Francis Ridge, "The 1952 Top-Secret USAF Instrumented UFO Data Collection Plan," *The SCU Review* 4, no. 3 (August 21, 2023): 9–11)

1952, June 6 — 8:42 a.m. Flight Sgt. Kenneth Dudley Smith from the 77th RAAF Squadron at Kimpo Air Base [now Gimpo International Airport] in Seoul, Korea, observes a dull silver object in the shape of a coin and about 50–60 feet long performing spinning and tumbling maneuvers for 4 minutes at 345 mph. Flight Sgt. Kenneth Fawner also sees the UFO for 30 seconds. ([Blue Book case documents]; Sparks, p. 137; Powell, *Scientist*, 48)

1952, June 6 — Battelle issues its second status report on Project Stork to ATIC. It describes a "tentative" data sheet for observers to fill out, a more detailed coding scheme, an example of an IBM punch card that will be used, and plans for statistical studies. ("Seven Status Reports for Project Stork," CUFON; "Seven Status Reports for Project Stork, Part 2," CUFON; Clark III 929)

1952, June 8 — 10:50 a.m. Four flat, round, shiny objects in a diamond formation are seen in Albuquerque, New Mexico, from the ground by Mr. and Mrs. J. D. Markland. The objects are approximately 15,000 feet in altitude and traveling 300 mph. There is no audible sound. They are first seen at about 60° above the horizon to the north and are traveling to the southwest at approximately 240°. (NICAP, "Diamond Formation of Flat Objects Observed"; Sparks, p. 138; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 10, 15)

1952, June 8 — During a launch of a pibal balloon at Calgary, Alberta, a silvery ellipse with a sharp outline reflecting sunlight and an aspect ratio of 8:1 crosses the field of vision of the observer's theodolite. (Arthur Bray, *The UFO Connection*, Jupiter Publishing, 1979, p. 186; Loren E. Gross, *UFOs, a History: 1952, June–July 20th, Supplemental Notes*, The Author, 2001, p. 14)

1952, June 9 — Astronomer Donald H. Menzel writes in *Time* magazine that most UFOs are light reflections caused by ice crystals, refractions, or temperature inversions. ("An Astronomer's Explanation: Those Flying Saucers," *Time*, June 9, 1952, pp. 54–56; Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, p. 9)

1952, June 9 — Robert Emmett Ginna Jr. publishes a follow-up essay in *Life* magazine about the deluge of mail he has received in reaction to his April 7 article, "Have We Visitors From Space?" Letters received mention a number of "provocative and plausible" theories. Ginna discusses the light-inversion hypothesis after consulting geographer Ronald L. Ives, an authority on mirages. Ives believes mirages, even of "the most remarkable nature," are not a plausible explanation for many sightings, due to the ideal conditions that would be necessary. The magazine encourages its readers to remain vigilant and report "the sighting of any strange aerial objects to the nearest Air Force representatives" and to "photograph any such object you see." (Robert E. Ginna Jr., "Saucer Reactions," *Life*, June 9, 1952, pp. 20–26)

1952, June 11 — 6:44 p.m. Two round objects, dark blue with gray centers, are seen moving southwest to northwest for 40 seconds at 500 mph and 6,000 feet altitude several miles east of O'Hare Airport in Chicago, Illinois. One passes the other before disappearing. (Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, pp. 10–11)

1952, June 13 — 1:00 a.m. M. Veillot and M. Damiens, air traffic control operators at Paris–Le Bourget Airport, France, watch a prominent orange-red light hover in the sky for about one hour. Eventually it begins moving and crosses the sky southwest of the airport, accelerating rapidly. The light is also seen by M. Navarri, the pilot of an approaching Air France plane. (Michel, *Truth About FS*, 165–166)

1952, June 15 — 8:32 a.m. A meteorological assistant on reserve army maneuvers sees a large silver disc in the sky southeast of Halifax, Nova Scotia. It moves southwest for 30 seconds at an altitude of 5,000–8,000 feet and then rises and merges in 2–5 seconds with altocumulus clouds at 11,000–12,000 feet. Its diameter is about 100 feet and speed at least 800 mph. (Good Above, p. 184)

1952, June 15 — The Beacon Hill Group at MIT's Lincoln Laboratory issues its 292-page report on ways that the US Air Force can improve its photographic reconnaissance and other intelligence gathering methods on the Soviet bloc. UFOs are not mentioned. (Massachusetts Institute of Technology, Project Lincoln, *Beacon Hill Report: Problems of Air Force Intelligence and Reconnaissance*, June 15, 1952)

1952, June 15 — 4:20 p.m. A round shiny object is seen over Gordonsville, Virginia. At 4:25 p.m., the crew of a commercial airliner reports a silver sphere over Richmond, Virginia. At 4:33 p.m., a Marine fighter jet is scrambled from Marine Corps Base Quantico in Prince William County, Virginia, and attempts to intercept a target south of Gordonsville but fails and returns to base. At 5:43 p.m., an Air Force fighter attempts to intercept the same shiny sphere but after reaching 35,000 feet turns back. At 7:35 p.m., a UFO emitting a golden glow is seen over Blackstone, Virginia. Fighter jets from Langley AFB in Hampton, Virginia, are scrambled, but the object is gone by the time they get there at 8:05 p.m. (Ruppelt, pp. 144–145)

1952, June 15 — 11:50 p.m. Edward Duke, a former Navy radar technician, sees an unidentified cigar-shaped object in the vicinity of Standiford Field [now Louisville International Airport], Louisville, Kentucky. It has a light on either side of the fuselage and a reddish hue on the trailing end. The object appears to be moving at about 400–500 mph and maneuvers around in several directions for 15 minutes, then descends and flies away to the northeast. ([Blue Book document]; Sparks, p. 138)

1952, June 16 — 8:30 p.m. USAF B-29 maintenance specialist S/Sgt. James C. Sparks, 6th Bomb Wing (Heavy), is walking between buildings #590 and T-588 at Walker Air Force Base [now closed] in Roswell, New Mexico. He sees first one object in the southeast about 1 mile distant resembling the shadow of a landing B-29 or B-50. As it passes overhead, he also notices 5–7 silverish-gray round objects, in a half-moon formation, flying at an estimated 500–600 mph at about 5,000 feet altitude in a line heading to the northwest. They disappear at about 1–2 miles. When nearly overhead, the object on the east breaks formation by 10° further to the right. Sparks can hear no engine noise. (NICAP, "5–7 Silver-Grey Round Objects Fly over Base"; Sparks, p. 138)

1952, June 17 — 1:28 a.m. A USAF F-94 pilot sees a light like a bright star cross the nose of his jet at blinding speed over Cape Cod, Massachusetts, for 15 seconds. (Sparks, p. 138)

1952, June 17 — Astronomer Donald Menzel writes in an article in *Look* magazine about how he creates temperature-inversion UFOs in his laboratory. (Donald H. Menzel, "The Truth about Flying Saucers," *Look* 16, no. 13 (June 17, 1952): 35–39; NICAP, "The Truth about Flying Saucers, *Look* Magazine")

1952, June 17 — 7:30–10:20 p.m. Many witnesses at McChord AFB [now Joint Base Lewis-McChord] south of Tacoma, Washington, see 5–6 yellowish discs, tracked by radar and theodolite. Several F-94s are scrambled. (NICAP, "1–5 Silver Yellow Objects Stop and Start"; Sparks, p. 138; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 11, 15)

1952, June 17 — 8:45 p.m.. Orville Foster, a US Weather Bureau observer at the Pueblo (Colorado) Memorial Airport, watches a UFO through the bureau's theodolite. It circles leisurely for 10 minutes, then disappears toward the northeast. ("'Flying Saucer' Sighted at Pueblo," *Leadville (Colo.) Herald-Democrat,* June 18, 1952; "Saucers Still with 'Em Colorado Way," Salt Lake City *Deseret News,* June 18, 1952, p. 3; "Weather Observer Reports Seeing a 'Flying Saucer,'" *Hastings (Nebr.) Daily Tribune,* June 18, 1952, p. 1; Project 1947, "UFO Reports, 1952")

1952, Mid-June — Ruppelt briefs Maj. Gen. John A. Samford and his staff, two Navy captains from ONI, and "some people I can't name." The meeting is contentious. One USAF colonel argues that Blue Book's investigation is biased against the ETH, which launches an emotional debate. Ruppelt is directed to "take further steps to obtain positive identification" of UFO reports. (Ruppelt, pp. 147–149)

1952, June 18 — 5:00 p.m. USAF Capt. Erie P. Ashton and 2nd Lt. Clifton Ashley, while flying a B-25 about 100 miles east of March AFB [now March Air Reserve Base] in southern California, sight a silver object at approximately 11,000 feet in altitude off their left wing. The object is longer than it is wide and is in sight for about 39 minutes. (NICAP, "UFO Paces B-25"; Sparks, p. 138; Ruppelt, p. 146)

1952, June 18 — According to Sgt. Richard Doty's 1980s disinformation, the living alien retrieved in 1949 (EBE-1) and kept at Los Alamos, New Mexico, dies of unknown causes. (Clark III 364; Clark IV 408)

1952, June 19 —2:37 a.m. At Goose Bay AFB [now CFB Goose Bay], Labrador, radar men pick up a UFO track. 2nd Lt. A'Gostino and others outside see a strange, red-lighted object come in over the field. The radar blip suddenly enlarges, as if the device has banked, exposing a larger surface to the radar beam. The watching airmen see the red light wobble or flutter. After a moment the light turns white and quickly disappears. Apparently, the unknown craft has gone into a steep climb. Keyhoe assumes the radar and visual sightings are simultaneous, but Blue Book

records indicate they are separate. (NICAP, "Target Suddenly Enlarges"; Sparks, p. 139; Keyhoe, *FS from OS*, p. 52; Ruppelt, p. 146; Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report*, Dundurn Press, 2006, pp. 55–56)

1952, June 19 — 1:30 p.m. Four silvery UFOs are seen by many witnesses in Tacoma, Washington, flying silently at a high altitude. Unofficial sources report that the objects are tracked on radar at McChord AFB [now Joint Base Lewis-McChord] in Tacoma and jets are scrambled. (*Tacoma (Wash.) Reporter*, June 20, 1952; Shoot 9; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 11, 15)

1952, June 19 — 6:00 p.m. Army Capt. Harold Hermann and his wife see a round, silver UFO speeding across the sky at Jersey Shore, Pennsylvania. ("'Flying Saucers' Sighted," *New York Times*, June 24, 1952, p. 26)

1952, June 19 — 9:50 p.m. A former Army Air Force ground crew member sees a UFO flying in a swirling motion over the backyard of his home in Trenton, New Jersey. (Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, p. 17)

1952, June 20 — 3:03 p.m. A flight of four US Marine Corps captains and pilots (Bobbie Foster, Richard Francisco, Teddy L. Pittman, and Ronnie A. McDonald) of F4U-4B Corsair fighters with the 7302nd Squadron over central Korea see a silvery-white object passing below them, banking into a left turn. As the object circles around, Foster dives toward the object, which appears to be 10–20 feet in diameter. It flies away at an estimated speed of 1,000 mph and disappears toward friendly lines. (NICAP, "F4U-4B Corsairs Encounter Circling UFO"; Sparks, p. 139)

1952, June 21 — 12:30 p.m. T/Sgt. Howard Davis, flight engineer of a B-29 bomber flying at 8,000 feet altitude near Kelly AFB [now Kelly Field] in San Antonio, Texas, sees a small, flat object with a sharply pointed front and rounded rear. It is white with a dark blue center and red rim and trails sparks as it dives past the B-29 at a distance of 500 feet in one second. (NICAP, "B-29 Encounters Flat Object with Pointed Front"; Sparks, p. 140)

1952, June 21 — 10:58 p.m. A Ground Observer Corps spotter at Oak Ridge, Tennessee, sees a small (6–8 inches in diameter), slow-moving UFO near the AEC plant. GCI radar obtains the target, but it fades from the scope. An F-97 on combat air patrol engages in a "dogfight" with the object, which makes "ramming attacks" at the aircraft. It blinks until it speeds away. (NICAP, "Radar Visual near AEC Plant"; Sparks, p. 139; Ruppelt, p. 43)

1952, June 22 — 10:45 p.m. Two US Marine sergeants see a 4-foot diameter orange object dive at a runway from the north, dropping from 800 to 100 feet altitude over the west end of the runway at Pyeongtaek military base, South Korea, shooting 2–5-foot red flames. It then heads west at about 300–450 mph for 2–3 seconds, hovers briefly over a hill, turns 180° in 45–60 seconds, flashes, heads east a half mile, flashes again, and blinks out. No sound. (Sparks, p. 140; *Hynek UFO Report*, pp. 82–83)

1952, June 23 — 1:30 a.m. USAF ADC radar operators Lt. A. N. Robinson Jr. and Airman Ray H. Foote, plus 5 other controllers, officers, and maintenance technicians at Kirksville Air Force Station in Missouri, track a hard target with a clear sharp return about the size of a B-29. It suddenly appears 85 miles north-northwest of the station, moving at a constant speed of about 3,600+ mph on a straight path for about 125 miles for 2 minutes. Then it vanishes. A second target appears at 1:35 a.m. (NICAP, "Seven ADC Men Track 3,600 MPH Target"; Sparks, p. 141; Michael D. Swords, "Case Missing," *IUR* 19, no. 6 (Nov./Dec. 1994): 20)

1952, June 23 — 3:30 a.m. Secretary Martha Milligan sees a bullet-shaped object emitting a burnt-orange exhaust fly straight and level over Oak Ridge, Tennessee. (NICAP, "June 23, 1952: Oak Ridge, Tenn."; Sparks, p. 141)

1952, June 23 — 10:00 a.m. National Guard Lt. Col. Oren Laramore Depp [Johnny Depp's grandfather] sees two objects looking like giant soap bubbles reflecting yellow and lavender colors flying in line over Owensboro, Kentucky. (Sparks, p. 141)

1952, June 23 — 4:05 p.m. Airport weather observer Rex Thompson sees a round disc with a metallic shine flash and flutter like a flipped coin for 5–7 minutes over Geiger Field [now Spokane International Airport], Spokane, Washington. (NICAP, "June 23, 1952: Spokane, Wash."; Sparks, p. 140)

1952, June 23 — 9:00 p.m. 2d Lt. K. Thompson sees a very large light flying straight and level for 10 minutes at McChord AFB [now Joint Base Lews-McChord] near Tacoma, Washington. (Sparks, p. 140; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 11, 15)

1952, June 24 — The first issue of *Ouranos* is published by the Commission Internationale d'Enquêtes sur les Soucoupes Volantes, in Paris. (*Ouranos*, no. 1)

1952, June 25 — Wilbert B. Smith writes an "Interim Report on Project Magnet," in which he states: "If, as appears evident, the flying saucers are emissaries from some other civilization, and actually do operate no magnetic principles, we have before us the fact that we have missed something in magnetic theory but have a good indication of the direction in which to look for the missing quantities." (Good Above, p. 185)

1952, June 25 — 8:30 p.m. Mrs. Daniel Norbury and Lawrence Matheis see a bright yellow-white, egg-shaped object, sometimes with a red tail, make seven circles over Chicago, Illinois. (NICAP, "June 25, 1952: Chicago, Illinois"; Sparks, p. 141)

1952, June 27–30 — Ruppelt visits McChord AFB in Tacoma, Washington, to look into recent sightings there. Capt. Harnnagy of the 4704 Air Defense Wing Intelligence tells him that the objects are always seen in the northern sky around 8:00 p.m. (Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, pp. 23–24)

1952, June 28 — 1:20 p.m. Two observers at the Cargo Air Service hangar at Kirtland AFB in Albuquerque, New Mexico, see two silvery discs high in the sky and moving to the south. They noiselessly climb nearly vertically at high speed, one going south-southeast, the other heading almost due east. The observation lasts 30 seconds. (Sparks, p. 142; J. Allen Hynek, *The UFO Experience*, Ballantine ed., 1974, pp. 68–69)

1952, June 29 — 5:45 p.m. Three Air Force police officers of the 83rd Air Base Squadron at O'Hare Airport in Chicago spot a flat, oval object as it hovers between two radio towers about 7 miles away. It is bright silver in color, encircled by white haze, and appears about 30 feet in diameter. During the next 45 minutes the object moves to the southwest and then back north. It accelerates instantaneously to a speed faster than a jet fighter. ([Blue Book documents]; Sparks, p. 143)

1952, June 30 — Ruppelt says that by this time there is a split in opinion in the military about what to do about UFOs. One group assumes that UFOs are interplanetary, and information must be withheld at a top-secret level. "The enthusiasm of this group took a firm hold in the Pentagon, at Air Defense Command headquarters, on the Research and Development Board, and many other agencies." (Ruppelt, pp. 152–153)

1952, Summer — Denis Plunkett and his son Capt. Edward L. Plunkett form a British branch of Albert K. Bender's International Flying Saucer Bureau in Bristol, England. ("Other Saucer Groups: Here and Abroad," *Flying Saucer News*, no. 2 (Summer 1953): 6)

1952, Summer — Night. Radar at MacDill AFB in Tampa, Florida, picks up a target at 40,000 feet flying at 460 mph. A nearby B-29 volunteers to investigate, searching until midnight. The pilot, a USAF colonel, finally reports a visual sighting of the UFO, flying at 40,000 feet and 250 mph and appearing as a glowing white light shaped like a football. The object changes course and disappears at high speed. (UFOEv, p. 25)

1952, July — Edgar Jarrold begins the Australian Flying Saucer Bureau in Sydney, New South Wales, Australia's first civilian UFO organization, following his personal observation of two fast-moving yellow lights in the sky over Fairfield, New South Wales. ("Saucers on His Mind," *Sydney (N.S.W.) Morning Gazette*, February 2, 1954, p. 7; Clark III 632; Bill Chalker, "The Early Days of the Public UFO Drama in Australia: Even an Atomic Connection of a Sort," The OzFiles, October 2, 2023; Clark IV 694, 1270)

1952, July — Afternoon. A man driving a car near Schenectady, New York, sees an oblong object hovering nearby. A gondola lowers from the object and a bunch of "Navy officers in white hats" rush to the windows. All are wearing huge dark glasses. The gondola goes back up, and three smaller UFOs appear and go inside the bigger one. (Center for UFO Studies, HUMCAT Index 1952–1953, p. 10; Clark III 267; Clark IV 307)

1952, July — The administration and faculty of Ohio Northern University, in Ada, Ohio, announce the formation of Project A: Investigation of Phenomena, saying that members of the engineering, pharmacy, law, and liberal arts colleges will examine the evidence for UFOs under the direction of Dean Warren L. Hickman. Project A personnel seek reports from the public and collect newspaper clippings. The project receives a disappointing 54 completed questionnaires, far lower than the 200 they would like for a scientific sampling. However, they do estimate that about 20% involve "unnatural phenomena." After unsuccessful attempts to obtain reports from Civilian Saucer Investigation in Los Angeles and other groups, the university closes the project down in mid-1954. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 3; Clark III 916; Curt Collins, "Project A: The Short Life of a UFO Study," September 21, 2018; Clark IV 1026)

1952, July — Project Blue Book receives nearly 500 UFO reports this month. (Ruppelt, p. 192)

1952, July 1 — J. Robert Moskin's article appears in *Look* magazine. It features Gen. Hoyt Vandenberg's declaration that "we cannot afford to be complacent" about UFOs. Keyhoe says that the article has upset the "silence group" in the Pentagon. (J. Robert Moskin, "Hunt for the Flying Saucer," *Look*, July 1, 1952, pp. 37–41; Keyhoe, *FS from OS*, pp. 52–53)

1952, July 1 — 7:25 a.m. A Ground Observer Corps spotter sees a UFO headed southwest across Boston, Massachusetts. Two F-94s are scrambled. Erwin W. Nelson and his wife at Lynn, Massachusetts, notice two vapor trails from the climbing jets, look around, and see in the west a bright silver "cigar shaped object about six times as long as it was wide" heading over Boston at a very high altitude. An identical UFO is following the first some distance back. No vapor trails are visible. The witnesses watch the F-94s search back and forth far below the UFOs. At 7:30, USAF Capt. Robert E. Metcalf, petroleum officer for the 6520th Test Support Wing, and USAF air policemen M/Sgt James Stiner and M/Sgt Joseph R. Bosh, 6520th Air Police Squadron, at Hanscom Field, Bedford, Massachusetts, see the two jets, look for what they are intercepting, and see to the east a 100-foot-long silvery ellipse "fatter than a cigar" traveling southwest. At two points, the object seems to hover, then continues at

about 40,000 feet. The object's path intersects contrails of the two jets heading southeast. Metcalf loses sight of the object on his way to the tower after a few minutes, then sees it again at about 7:40 a.m., noting it has increased distance "considerably," but finally loses sight of it at the tower. ([Blue Book document]; Sparks, p. 144; Ruppelt, pp. 150–151; UFOEv, p. 160)

1952, July 1 — 8:40–9:15 a.m. Two silvery objects move south along the East Coast and hover near Fort Monmouth, New Jersey, for about 5 minutes at 50,000 feet. As radar at Fort Monmouth detects the objects, they put on a burst of speed and head southwest toward Washington, D.C., confirmed visually. At about 12:00 noon, a physics professor at George Washington University in D.C. sees a grayish UFO hovering and arcing back and forth across the sky for about 8 minutes. He guesses about 500 people are watching the object. (NICAP, "Objects Tracked at 50,000′, G/V"; Sparks, p. 144; Ruppelt, pp. 151–152; Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, pp. 36–37; Clark III 377; Clark IV 421)

1952, July 2 — 11:10 a.m. As he is driving on a highway seven miles north of Tremonton, Utah, US Navy Chief Petty Officer Delbert C. Newhouse and his wife see a strange object in the sky. Newhouse pulls the car to the side of the road, gets out, and watches 12–14 UFOs at about 10,000 feet. Looking like "two pie pans, one inverted on top of the other," they are clustered in a loose formation, "milling around." He takes about 75 seconds worth of film through the telephoto lens of his 16mm movie camera, though the objects have receded a bit to shiny points of light. At one point a single object leaves the pack, heading east, and Newhouse holds the camera still so the UFO crosses the field of view. He repeats the procedure 3-4 times. Blue Book obtains the film and sends it to the USAF Photo-Reconnaissance Laboratory and the Navy's Photo Interpretation Laboratory. Both analyses eliminate the possibility of aircraft or birds. (NICAP, "The Tremonton, Utah / Newhouse Color Film"; Victor P. Keay, "Flying Saucers," memorandum to FBI Assistant Director Alan H. Belmont, October 27, 1952; Keyhoe, *FS from OS*, pp. 151–154; Ruppelt, pp. 220–222; UFOEv, pp. 88, 112; Condon, pp. 418–426; *Hynek UFO Report*, pp. 235–239; "Turner on Tremonton," *IUR* 3, no. 5 (May 1978): 6; Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, pp. 39–40; Loren E. Gross, *UFOs, a History: 1952, June–July 20th: Supplemental Notes*, The Author, 2001, pp. 32–39; Swords 149; "Delbert Newhouse UFO Footage, 1952, Tremonton, Utah," parkerdonaldmusic YouTube channel, September 29, 2012; Kevin D. Randle, "Newhouse's Tremonton, Utah Movie Revisited," A Different Perspective, December 12, 2013; Patrick Gross, "Tremonton, Utah, UFO Color Film of July 2, 1952"; "Tremonton, UT Photo Case of 7/2/1952 – CWO Delbert W. Newhouse," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; Clark III 1203–1204; Clark IV 1377–1379)

1952, July 3 — 4:15 a.m. A witness on the Manitou Beach Highway near Rome Center, Michigan, watches two circular lights about 20 feet in diameter flying horizontally at tremendous speed at only a few hundred feet altitude. (NICAP, "July 3, 1952: Selfridge AFB, Mich."; Sparks, p. 145)

1952, July 3 — 11:50 p.m. Mrs. J. D. Arbuckle sees two bright pastel-green discs fly straight and level very fast for 6 seconds over Chicago, Illinois. The next day the Air Force public information office at O'Hare Airport says it has received 16 reports of UFOs over Chicago in the past week. An Air Force spokesman says that jet patrols are on alert 24 hours a day. (Sparks, p. 145; "Deny Reports of 'Saucers' Alerts," *Waterloo (Iowa) Courier*, July 4, 1952, p. 1)

1952, July 5 — 6:00 a.m. Four commercial pilots flying at 9,000 feet above the Hanford atomic site in Washington State observe a disc just below a deck of wispy clouds directly above their C-46. The witnesses are Capt. John Baldwin, Capt. George Robertson, H. D. Shenkel, and Steven Summers. Baldwin says that the disc stands still at first and then seems to back away and change shape, becoming flat, gaining speed, and then disappearing. Robertson says "we couldn't pick it up on our radar. We reversed our course and went back, but we couldn't spot it again." (NICAP, "C-46 Crew Observe Disc over AEC Plant"; Sparks, p. 145; "Flyers Report Saucers near Atomic Plant," *Dayton (Ohio) Daily News*, July 6, 1952, p. 1; "Pilots See 'Saucer' over Atom Plant," Madison *Wisconsin State Journal*, July 6, 1952, p. 3; *Hynek UFO Report*, p. 53; Swords 149)

1952, July 5 — 7:58 p.m. Oklahoma State Patrolman Arthur Myers Hamilton is flying five miles south-southeast of Norman, Oklahoma, in a State Patrol airplane when he sees three dark discs 4–8 miles away at 6,000 feet hover for 15 seconds then fly away, silhouetted against a dark cloud. (NICAP, "Three Dark Discs Sighted from State Patrol Airplane"; Sparks, p. 145)

1952, July 7 — Battelle issues its third status report on Project Stork to ATIC. It mentions that Hynek has been consulted on the observer's data sheet, suggested some changes, and is in the process of interviewing astronomers about any potential sightings made by them. The group has studied and coded UFO reports from 1948. ("Seven Status Reports for Project Stork," CUFON)

1952, July 8 — A commissionaire on duty at an army depot in Ottawa, Ontario, sees a bright orange light about a quarter size of the full moon travel from south to north, turn, and travel south again. (Jan Aldrich; Project Magnet Case X)

1952, July 9 — 12:45 p.m. USAF Maj. Claude K. Griffin is driving one mile north of Colorado Springs, Colorado, when he sees a luminous white object shaped like an airfoil moving slowly and erratically like a corkscrew. He estimates its size at 100 feet, distance at 15–20 miles, and altitude at 30,000 feet, heading northwest. Griffin stops the car to watch for 12 minutes. USAF Maj. E. R. Hayden and his wife come out of their house and look at the object in a 4x rifle scope. He describes it as rectangular, silver on one side, and black on the other. It flutters as it moves slowly north-northwest above 20,000 feet 20 miles away. It gains altitude and gradually diminishes to a black dot, then accelerates to a high speed and disappears. ([Blue Book documents]; Sparks, p. 145)

1952, July 9 — 5:30 p.m. Farmer John Mittl watches an aluminum, oval-shaped object silently change direction and attitude above his farm 2 miles east of Kutztown, Pennsylvania, finally tipping on end and departing. He manages to take three photos. (Claude Falkstrom and Curt Collins, "John Mittl: From Unsolved UFOs to Astral Encounters," The Saucers That Time Forgot," July 13, 2018)

1952, July 9 — 10:00 p.m. Maryland State Police Lt. C. C. Serman and Trooper 1-c Robert Weir are on patrol on the extension of Church Street near US Highway 50 in Hebron, Maryland, when they see a glowing ball of yellow light approaching them. Believing it to be a car with one headlight out, the officers continue toward it. Fearing a collision, they swerve their cruiser into a ditch and stop. The light also stops 20 feet in front of them and hovers and bobs above the road. After a few minutes, the policemen drive slowly forward and the light retreats, keeping a distinct distance away. Finally, the policemen speed toward the light at 50 mph. The luminous ball retreats, staying just a few yards ahead of the cruiser before veering off the road and into a meadow, then vanishes. Troopers Robert W. Burckhardt and Edward Bracey are in another car and also see the maneuvering light. Burckhardt claims he has seen the light on several occasions and says it is about as big as a wash basin and dances around the wooded road and into the trees. ("Police Chase Mysterious Glow," *Salisbury (Md.) Daily Times*, July 10, 1952, p. 1; "Crowds Try to See Mysterious Light," *Salisbury (Md.) Daily Times*, July 11, 1952, p. 1; "Curious Miss Mystery Light," *Salisbury (Md.) Daily Times*, July 12, 1952, pp. 1–2; "Life Photographer Seeks 'Ghost Light,'" *Salisbury (Md.) Daily Times*, July 14, 1952, p. 1; "Professor Believes Ghost Light Is Gas," *Salisbury (Md.) Daily Times*, July 16, 1952, p. 1; C. Maxwell Cade and Delphine Davis, *The Taming of the Thunderbolts*, Abelard-Schuman, 1969, pp. 99–104)

1952, July 10 — 8:18 p.m. Capt. James E. Lundy and First Officer Leon Blanks are flying a National Airlines C-60 airplane 15 miles south of Quantico, Virginia, when they see an object resembling an aircraft landing light. The object becomes brighter as it approaches from the north. It then performs a climbing turn away from the aircraft and its appearance changes, resembling a light emitted by a red flare. Visible for 10 minutes, it is flying too fast for any known aircraft. (NICAP, "Light Maneuvers near C-60 Airliner"; Sparks, p. 146)

1952, July 10 — Night. A Marine pilot on night maneuvers near Marine Corps Base Quantico, Virginia, spots two green objects shoot straight across the sky at terrific speed at a high altitude. ("Radar Sees 'Saucers,' AF Investigating," *Miami (Fla.) News*, July 22, 1952, pp. 1A, 6A)

1952, July 10 — Night. Forty crew members of the Canadian destroyer HMCS *Crusader* off Korea see two shiny discs and track them on radar. The radar fix places them at 10,560 feet altitude and 7 miles distant. (NICAP, "Naval Destroyer Observes Two Discs / Tracks on Radar")

1952, July 11 — The Air Technical Liaison Office, Directorate of Intelligence for the Far East Air Force, prepares Intelligence Report #29-52, detailing Air Force, Navy, and Marine radar UFO reports for 1950–1952 in Korea and Japan. (Capt. Charles J. Malven, "FLYOBRPT: Japan/Korea Area," IR-29-52, July 11, 1952)

1952, July 12 — 8:42 p.m. O'Hare AFB weather observer Capt. W. J. Shea and a civilian, Jane Morrison, watch three lights, one main red light with smaller white lights on each side, traveling 500 mph at 40,000–50,000 feet over Montrose Beach, Chicago, Illinois, from the west-northwest. They accelerate to the south and make a 180° turn heading north-northwest, then disappear. The UFO is seen by 400+ people, with 14 others making reports to the 4706th Defense Wing located at O'Hare Airport. (Sparks, pp. 146–147; Ruppelt, p. 153)

1952, July 12 — 9:04 p.m. Two USAF F-86 Sabre jets with the 62nd Flight Squadron are flying at 22,000 feet on a routine training mission (or on a scramble mission) over Arlington Heights, Illinois. Capt. Robert W. Casey Jr., after coming out of a right turn, sees an oblong yellowish lighted object with an exhaust moving in a straight course about 15 miles away south of Elgin, Illinois, at 22,000 feet traveling at 800 mph. The F-86 pursues at maximum speed, but the object pulls away. Both pilots hear a strange radio transmission on their restricted communications channel during the pursuit saying the name of the pursuit pilot, Casey, in an ethereal "ghost-like" monotone. Apparently, this is a prank by Casey's fighter pilot buddies at the 62nd who are monitoring his channel, though this is later officially denied by the 62nd. (NICAP, "F-86 on Scramble Mission / Strange Radio Transmission"; Sparks, p. 147)

1952, July 13 — 4:00 a.m. Capt. William Bruen, piloting National Airline Flight 611 heading north from Jacksonville, Florida, sees a round ball of bluish-white light about 60 miles southwest of Washington, D.C., hovering to the

west then ascending to the airliner's altitude of 11,000 feet, then parallel course off left wing at about 2 miles distance. It takes off upwards at 1,000 mph when Bruen turns on all aircraft lights. (NICAP, "Light Ascends, Paces Aircraft, Takes Off Vertically"; Sparks, p. 148; *Hynek UFO Report*, pp. 90–91)

1952, July 14 — The Ground Observer Corps expands into Operation Skywatch, consisting of 750,000 volunteers aged 7 to 86 years old working around the clock in shifts at more than 16,000 posts and 73 filter centers to detect a sneak attack against the United States. The expansion follows an Army announcement from a few weeks earlier that antiaircraft guns and personnel are on continuous duty in key areas. (Radomes.org, "Ground Observer Corps," January 31, 2001; Shoot 21–22)

1952, July 14 — 9:12 p.m. Some 8,000 feet above the Chesapeake Bay in Maryland/Virginia, Capt. William B. Nash and copilot First Officer William H. Fortenberry, flying a Pan American Airways DC-4 from New York City to Miami, Florida, with an off-duty crew, see six crimson dots at 30°. The dots are streaking in their direction like tracer bullets. As they get closer, they resolve into reddish-orange circles, about 100 feet in diameter and 15 feet thick, with sharply defined edges. Nash says they are holding a "narrow echelon formation" at 2,000 feet, below the airplane's own altitude. When they are nearly underneath the aircraft, "they flipped on edge, the sides to the left of us going up and the glowing surfaces facing right. While all were in the edgewise position, the last five slid over and past the leader so that the echelon was now tail foremost." Then they all flip over again into a flat attitude. Two new, brighter UFOs join the formation, and the lights of all eight objects blink out then come on again. They all speed westward (Nash estimates 6,000–12,000 mph) and climb in a graceful 45° arc. The entire sighting lasts only 15 seconds. The crew in the passenger area does not see the objects. Possible corroboration comes from a sighting in Camden, New Jersey, although the date is uncertain. Intelligence agents in Miami promptly interview Nash and Fortenberry separately. (Wikipedia, "Nash-Fortenberry UFO sighting"; NICAP, "Nash / Fortenberry Case"; Sparks, p. 150; "Miami Pilots Spot 8 Saucers Flying in Formation," *Miami (Fla.) Herald*, July 16, 1952, pp. 1A, 8A; "Two Pilots Add to Flying Saucer Lore," *Washington (N.C.) Daily News*, July 16, 1952, p. 1; "Pilots Spot 8 Saucers Flying in Norfolk Area," *Washington (D.C.) Daily News*, July 16, 1952, p. 7; "Rockets, Tracers or Them Devilish Flying Saucers," Norfolk *Virginian-Pilot*, July 17, 1952, pp. 36, 30; The Witness, "A Precise Report on Flying Saucers—or Something," Norfolk *Virginian-Pilot*, July 20, 1952, p. 6; William B. Nash and William H. Fortenberry, "We Flew Above Flying Saucers," *True*, October 1952, pp. 65, 110–112; Keyhoe, *FS from OS*, pp. 57–58; William B. Nash, "Does the Air Force Have 'Hardware from Outer Space'?" *The Saucerian* 3, no. 1 (January 1955): 29–31; "An Airline Captain Speaks Out," *UFO Investigator* 2, no. 6 (Oct./Nov. 1962): 5–6; Donald H. Menzel and Lyle G. Boyd, *The World of Flying Saucers*, Doubleday, 1963, pp. 260–265; UFOEv, pp. 13, 38–39; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 47; Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, pp. 55–57; Good Above, pp. 269–270; "The Pilot's Tale," Saturday Night Uforia; Michael D. Swords, "Classic Cases from the APRO Files," *IUR* 24, no. 2 (Summer 1999): 21–22; Thomas Tulien, "The 1952 Nash/Fortenberry Sighting Revisited," *IUR* 27, no. 1 (Spring 2002): 20–23, 27–28, reprinted in Project 1947; Shoot 22–24; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 11, 15; Swords 149–150; Clark III 791; Powell, *Scientist*, 49; Clark IV 871–872)

1952, July 15 — The Lorenzens publish the first issue of the *APRO Bulletin*. (*APRO Bulletin* 1, no. 1 (July 1952))

1952, Mid-July — Ruppelt says that rumors persist that the Air Force is braced for an expected invasion by UFOs. "Had these rumormongers been at ATIC in mid-July they would have thought that the invasion was in full swing." He talks to a scientist "from an agency that I can't name" about the build-up of UFO reports. From his study of reports, the scientist predicts that "within the next few days they're going to blow up and you're going to have the granddaddy of all UFO sightings. The sighting will occur in Washington or New York, probably Washington." Brad Sparks identifies the scientist as Stefan T. Possony, acting chief of the AFOIN Special Study Group and adviser to Gen. John A. Samford. (Ruppelt, pp. 154–155, 157; NICAP, "The 1952 Sighting Wave")

1952, July 16 — 9:35 a.m. US Coast Guard photographer Seaman Shell R. Alpert sees several bright lights through a window screen (no glass) from his position inside the photo lab at Coast Guard Air Station Salem [now Winter Island Marine Park], Massachusetts, while cleaning a camera. He watches them for 5–6 seconds, calls out to Hospitalman 1st Class Thomas E. Flaherty from sick bay to see them. The objects dim then brighten suddenly. Alpert grabs a camera and films 4 roughly elliptical irregular blobs of light in formation through the screen, on Super XX cut film 4-by-5-inch format. The lights disappear suddenly in a flash. The photo is explained as showing reflections of light sources from inside the building, but this ignores the fact that the window is open, and the camera is not pointed through glass. (Sparks, p. 151; "Where Better to See," *Nexus*, no. 8 (February 1955): 3; UFOEv, p. 88; Joe Nyman and Barry Greenwood, "The July 1952 Coast Guard Photo Revisited," *IUR* 26, no. 4 (Winter 2001–2002): 3–5, 25–30; Michael D. Lampen, "Mystery Alpert Objects," *IUR* 27, no. 2 (Summer 2002):

27; "The Photographer's Tale," Saturday Night Uforia, December 3, 2012; Charlie Wiser, "Bright Lights of Salem, 1952," How Many Dollars, July 21, 2023)

1952, July 16 — 9:00 p.m. Paul R. Hill, an aeronautical research engineer, is watching the sky with his future wife, Frances Hoback, on Chesapeake Avenue (near LaSalle Avenue) in Hampton, Virginia, when he notices two amber-colored lights coming in over Hampton Roads from the south at 500 mph. They slow down and make a U turn, moving side by side until they revolve around each other at a high rate of speed in a tight circle 200–300 feet in diameter. A third UFO comes racing up from the direction of Virginia Beach and falls in several hundred feet below the other two, making a V formation. A fourth UFO comes in from up the James River and joins the group, which heads south at 500 mph. "Their ability to make tight circling turns was amazing." Around 9:03 p.m., the four UFOs have moved out of sight to the south. (NICAP, "Two Pairs of Objects Maneuver Overhead"; [Blue Book documents]; Sparks, p. 150; UFOEv, p. 57)

1952, July 17 — 6:30 p.m. A woman leaving Yarmouth Harbour, Nova Scotia, on the *SS Yarmouth* watches seven silvery objects in an inverted triangular formation for 2 minutes. They hover momentarily, descend slowly, and disappear. (Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, pp. 268–269)

1952, July 17 or 18 — 10:10 p.m. T/Sgt. Thurman C. Mahone and A/3c Gene A. Jennings at Lockbourne AFB [now Rickenbacker Air National Guard Base] in Lockbourne, Ohio, see an amber-colored, elliptical-shaped object with a small flame at the rear, periodically increasing in brightness. It moves swiftly, giving off a resonant beating sound. (NICAP, "July 18, 1952: Lockbourne, Ohio"; Sparks, p. 151)

1952, July 18 — Early morning. American Airlines pilot Capt. Paul L. Carpenter, First Officer George Fell, and Flight Engineer Quilici watch several dull-red objects with a "yellowish tinge" speeding around in the air at an altitude of 25,000–30,000 feet near Denver, Colorado, during a non-stop flight from Los Angeles to Chicago. A maximum of three objects are seen at one time over a 2-minute period. Carpenter says they seem to be about 100 miles away. The first object is moving south by southeast. One minute after it disappears, two more come into view going westward and another one eastward. "The two traveling westward disappeared about two seconds then reappeared traveling eastward." (Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, p. 60)

1952, July 18 — Capt. Edward Ruppelt tells the press in Dayton, Ohio, that ground radar has tracked UFOs at speeds of 1,500–2,000 mph, that jet fighters scrambled to intercept them have failed, and that "persons making these reports actually see something in the sky," but the Air Force does not know what they are. ("'Saucer' Sightings Spur AF's Drive to End Mystery," *Dayton (Ohio) Journal Herald*, July 18, 1952, pp. 1, 10; Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, p. 66)

1952, July 18 — 6:10 p.m. André Frégnale is hiking near Lac Chauvet, Puy-de-Dôme, France, when he sees a disc flying west to east in a straight line at constant speed. He immediately takes two photos when the object is at its largest apparent size, then two others when it is moving away to his left. It is in view for 50 seconds. ("Une soucoupe volante," *Le Méridional*, July 25, 1952, pp. 1, 8; Pierre Guérin, "A Scientific Analysis of Four Photographs of a Flying Disk near Lac Chauvet (France)," *Journal of Scientific Exploration* 8, no. 4 (1994): 447–469; Alain Delmon, "Les Cas Solides: Lac Chauvet, France, 1952," Les OVNIs: Intelligences non-humaines ou mythe moderne?, December 26, 2003)

1952, July 18 — 9:45 p.m. Three Air Force officers and four enlisted men at Patrick AFB, near Cocoa Beach, Florida, see a series of hovering and maneuvering red-orange lights moving in a variety of directions. (NICAP, "Hovering and Maneuvering Lights"; Sparks, p. 151)

1952, July 19 — 2:55 a.m. An experienced civilian pilot watches an elliptical-shaped object with a light fringe over Williston, North Dakota, for 5 minutes. It descends fast and makes a 360° then a 180° turn. (Sparks, p. 151)

1952, July 19 — 6:28 a.m. Carolyn Smith, a Ground Observer Corps volunteer in Baltimore, Maryland, sees two blue, round objects, each with an exhaust trail, flying northeast at 2,000 feet. Suddenly they shoot straight up and disappear. (NICAP, "July 19, 1952, 1128Z, Baltimore, Maryland, Report of Unconventional Aircraft"; Loren E. Gross, *UFOs, A History, 1952: June–July 20th*, The Author, 1986, p. 68; Clark III 1254; Clark IV 1434)

1952, July 19 — Lincoln LaPaz tells newspapermen in Albuquerque, New Mexico, that UFOs "can reverse directions and cruise back and forth; they travel at high speeds in wide sweeping circles…. They travel at high altitudes and can be followed as long as 3½ minutes." ("Luminous Objects Flooding Southwest Skies Not Shooting Stars or Meteorites, Says LaPaz," *Albuquerque (N.Mex.) Journal*, July 20, 1952, p. 1; Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, p. 67)

1952, July 19 — Three 15th magnitude point sources within 10 arcseconds of each other are detected in a red-sensitive photographic image taken by the Palomar Observatory Sky Survey at RA 21h18m10.4s, DEC +50°22′43.4″ within the constellation Cygnus. They exhibit no evidence of peculiar shapes or elongation that might occur with asteroids, meteorites, cosmic rays, photographic plate defects, or aircraft. The three light sources are absent in all

subsequent exposures of this region during the next 71 years, including a Palomar blue-sensitive image taken less than one hour later. (Enrique Solano, et al., "A Bright Triple Transient That Vanished within 50 Minutes," ArXiv, October 13, 2023; Beatriz Villarroel, "The Vanishing Star Enigma and the 1952 Washington D.C. UFO Wave," The Debrief, January 21, 2024; "Astronomical Transients," *Fortean Times* 442 (March 2024): 24–25)

1952, July 19 — 10:00 a.m. Engineer John A. Anderson and other technicians at the Savannah River Atomic Site near Aiken, South Carolina, watch a greenish glowing object dart back and forth silently and erratically at high speed above the plant. It is in view for 2 minutes, moving constantly and changing direction at sharp angles. The object disappears over the horizon at "tremendous velocity." (NICAP, "Multiple Witnesses Observe Strange Maneuvering Object"; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 51; Nukes 47–48)

1952, July 19 — 4:30 p.m. Agricultural engineer Pedro Bardi and others on a farm in the Madre de Dios region of Peru see a UFO flying at 325 feet shortly after their short-wave radio goes dead. Bardi says it is a bit smaller than a DC-3 and is making a buzzing sound. It shows up 4 minutes later at Puerto Maldonado, 75 miles away, and Customs Administrator Domingo Troncosco photographs it. The photo shows an elongated object trailing smoke, passing over the top of a tree and in front of a cumulus cloud. (Curt Collins, "The Case of the Smoking Saucer," In Honor of Jim Moseley, November 3, 2014; Curt Collins, "Jim Moseley: The Case of the Smoking Saucer," The Saucers That Time Forgot, August 18, 2018)

1952, July 19 — 10:00 p.m. Six luminous round objects are seen by a Chicago, Illinois, woman moving horizontally and vertically as they cavort around in the sky. The same night, a UFO is seen by three witnesses at the Ground Observer Corps post at the city hall in Elgin, Illinois. (Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, p. 68)

1952, July 19 — 11:35 p.m. USAF pilot Capt. Charles John Powley and his wife Janet see two star-like lights maneuver, hover, and speed up for 5–7 minutes over Elkins Park, Pennsylvania. (NICAP, "Three Groups of Witnesses See Strange Lights"; Sparks, p. 151; *Hynek UFO Report*, pp. 73–77; Loren E. Gross, *UFOs, A History, 1952: June–July 20th*, The Author, 1986, p. 69; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 12, 15; Clark III 1254; Clark IV 1434)

1952, July 19–20 — 11:40 p.m. Air traffic controller Edward Nugent at Washington National [now Ronald Reagan National] Airport's Air Route Traffic Control (ARTC) in D.C. picks up a formation of seven objects on his long-range radar. They are southeast of Andrews AFB [now Joint Base Andrews] in Prince George's County, Maryland, moving along at 100–130 mph. Two of the targets suddenly accelerate and vanish off the scope within seconds. One apparently reaches a speed of 7,000 mph. A second, shorter-range radar in the airport control tower (operated by Howard Cocklin and Joseph Zacko Jr.) and another at Andrews AFB has also tracked the objects. For 6 hours, between 8 and 10 UFOs are tracked on radar. Senior Air Traffic Controller Harry G. Barnes says that "They followed no set course, were not in any formation, and we only seemed to be able to track them for about three miles at a time…. I can safely deduce that they performed gyrations which no known aircraft could perform." Several Capitol Airlines pilots (one of them Capt. S. C. "Casey" Pierman) see the objects visually as white or orange lights in restricted air space over the White House and Capitol. Ground observers at Andrews (Capt. Harold C. May, Staff/Sgt Charles Davenport) watch red or orange lights. Radar and visual sightings are also taking place at Bolling AFB [now Joint Base Anaconda-Bolling] in Washington, D.C. By 3:00 a.m., the UFOs are all gone, just as two F-94 interceptors arrive belatedly from New Castle AFB [now New Castle Air National Guard Base] in Delaware, because the runways at both Andrews and Bolling are closed for repairs. The jets depart, and the UFOs return, observed by Capt. Howard Dermott, a Capitol Airlines pilot, and Sgt. Davenport at Andrews. Radar trackings continue, the last at 5:30 a.m. Civilian radio engineer E. W. Chambers sees five huge discs circling in a loose formation; they tilt upward and leave in a steep ascent. Blips appear on radar for at least another day, until the evening of July 20. (Wikipedia, "1952 Washington, D.C., UFO incident"; NICAP, "The Washington National Sightings"; NICAP, "Andrews Tower Radar Confirms Washington Target"; Sparks, p. 151; Harry G. Barnes to Chief, Facility Operations, "Unidentified Targets," July 20, 1952; "Flying Objects near Washington Spotted by Both Pilots and Radar," *New York Times*, July 22, 1952, p. 27; "Radar Spots Mysterious Sky Objects," *Birmingham (Ala.) News*, July 22, 1952, pp. 1–2; "Saucers Swarm over Capital: Radar Picks Up Scores in Early Hours," *Cedar Rapids (Iowa) Gazette*, July 29, 1952, p. 1; Harry G. Barnes, "Radar Man Tells How He Tracked Flying Saucers over Washington," *Kingsport (Tenn.) Times*, July 31, 1952, p. 18; "Washington's Blips: 'Somethings' over the Capital Are Traced on Radar," *Life*, August 4, 1952, pp. 39–40; Ruppelt, pp. 158–161; Donald H. Menzel and Lyle G. Boyd, *The World of Flying Saucers*, Doubleday, 1963, pp. 155–160; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp.

71–72; Condon, pp. 153–157, 862–867; Loren E. Gross, *UFOs, a History: 1952, June–July 20th*, The Author, 1986, pp. 69–72. 75–84; Kevin D. Randle, *Invasion Washington: UFOs over the Capitol*, HarperTorch, 2001, pp. 32–58; Peter Carlson, "50 Years Ago, Unidentified Flying Objects from Way Beyond the Beltway Seized the Capital's Imagination," *Washington Post*, July 21, 2002; Michael D. Swords, *GrassRoots UFOs: Case Reports from the Timmerman Files*, Fund for UFO Research, 2005, p. 139; Shoot 28–34; Swords 154–155; Clark III 1250–1252; Sianna Boschetti, "In the Early 1950s, D.C. Was Obsessed with UFOs: Here's Why," dcist, December 9, 2019; Powell, *Keyhoe*, 84–86; Graff 79–81; Eghigian, *After*, pp. 69–70; Clark IV 1430–1432)

1952, July 19 — 12:00 midnight. Associated Press reporter Saul Pett sees an intensely glowing, non-blinking orange ball of light moving steadily overhead in River Edge, New Jersey, from the northwest to the southeast for 1-2 minutes. He says it is moving too fast and steady to be a balloon. ("Flying Saucer Is Spotted by Newsman in River Edge," *Bergen (N.J.) Evening Record*, July 22, 1952, pp. 1–2)

1952, July 19 — 12:00 midnight. A part-time farmer named Constantine and a hired hand named Davis are curing tobacco when they see two cigar-shaped objects—one hovering, the other moving to the east—for 3–4 minutes near Centerville, Virginia. Both objects are translucent, lit from within, and emit an exhaust from one end. They both ascend until they disappear. (Sparks, p. 151)

1952, July 20 — 12:15 a.m. A chemistry professor in Lavallette, New Jersey, watches two orange-red lights performing maneuvers at a speed of about 100 mph. They are seen independently by six witnesses in a boat. (NICAP, "Three Groups of Witnesses See Strange Lights"; *Hynek UFO Report*, pp. 73–77; Loren E. Gross, *UFOs, A History, 1952: June–July 20th*, The Author, 1986, pp. 73–74; Clark III 1254; Clark IV 1434)

1952, July 21 — 10:00 a.m. Ruppelt first hears about the National Airport sightings in D.C. when he buys a newspaper in the Washington National Airport terminal. He has been to Andrews AFB in Maryland the day before with his boss Col. Donald L. Bower, and no one had said anything. At 1:00 p.m., Maj. Dewey Fournet calls Ruppelt to come to a briefing with Capt. Berkow, a USAF intelligence officer from Bolling AFB in D.C. Ruppelt hears that President Truman is personally interested and wants a full investigation, but Bower orders Ruppelt to return to Wright-Patterson AFB in Ohio. (Ruppelt, pp. 158–159; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, pp. 46–47)

1952, July 21 — 10:30 a.m. Radar used to measure wind velocity in the upper atmosphere at Dobbins Air Force Base, Marietta, Georgia, detects an unusual object flying at 50,000 feet. Observing the blip are four radar technicians who state that "it could have been an electromagnetic phenomenon but they did not believe it was." A second blip appears on the radar moving toward the wind-finding weather balloon and passing through it three separate times. USAF officials report "in private conversations" that the object moves at 1,200 mph, slows considerably for 3–5 minutes, then disappears. The Civilian Defense director in Atlanta, George M. "Pup" Phillips, receives a report of the object but has "no details." Col. Murray C. Woodbury, commander of the 35th Air Division at Dobbins, checks with "defense officials in Washington" before telling the press that such reports are sent to the Air Technical Intelligence Center (Project Blue Book) in Dayton, Ohio, for evaluation. Surprisingly, he admits, "We try to intercept such objects and identify them, but so far we have been unsuccessful." (NICAP, "Blip Makes Passes on Wind-Finding Target"; Sparks, p. 152; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 July 21st–31st, Supplemental Notes*, The Author, 2001, p. 3)

1952, July 21 — 6:30 p.m. USAF pilot Capt. Edward E. Dougher and WAF Lt. Josephine J. Stong, separated by one mile on the ground in Wiesbaden, Germany, see 4 bright yellowish lights. Dougher watches them separate, with two climbing and two flying away level in the opposite direction. His wife Barbara joins him as they fly away. Stong sees two reddish lights fly in opposite directions for 10–15 minutes. (NICAP, "Separated Witnesses Observe Maneuvering Lights"; Sparks, p. 152; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 12, 15)

1952, July 22 — At Wright-Patterson AFB, Ruppelt meets with ATIC electronics specialist Capt. Roy L. James (who harbors a "personal dislike for UFOs"). He tells Ruppelt that weather conditions caused the Washington radar returns.

1952, July 22 — Pikes Peak Broadcasting Company President Joseph H. Rohrer gives a lecture (one of a series) on flying saucers at a chamber of commerce meeting in Pueblo, Colorado. He mixes a few genuine cases with some crashed saucer fiction, claiming that 7 discs have been retrieved by the US government, three of them forced down in Montana. One occupant has survived, he says, a little man 3 feet tall who is later kept alive in a secret site in California. Rohrer claims he has been inside a 100-foot-diameter disc in 1942, but he has made up these stories for entertainment purposes. ("Flying Saucer Talk Startles Chamber Membership Meeting," *Pueblo (Colo.) Chieftain*, July 23, 1952, p. 3; Keyhoe, *FS from OS*, pp. 111–113; James W. Moseley and Karl T. Pflock, *Shockingly Close to the Truth! Confessions of a Grave-Robbing Ufologist*, Prometheus, 2002, pp. 90–92; Clark III 325; Patrick Gross, URECAT, August 6, 2018; Clark IV 362)

1952, July 22 — 12:00 noon. Two Air Force officers, Col. Bailey and Maj. Kemper, aboard a C-45 observe a shining oval object headed toward them above Stafford, Maryland. It moves in irregular starts and stops, turning so that it follows alongside the aircraft. (Loren E. Gross, *UFOs, A History: 1952, July 21st–July 31st*, The Author, 1986, p. 5; Clark III 1254; Clark IV 1434)

1952, July 22 — 9:50 p.m. Several residents of Pennington, New Jersey, see a large, dull yellow or orange light passing overhead, apparently in front of an aircraft. (Loren E. Gross, *UFOs, A History: 1952, July 21st–July 31st*, The Author, 1986, p. 6; Clark III 1254; Clark IV 1434)

1952, July 22 — 10:00 p.m. Eubert T. White and his wife see three silvery objects whizzing across the sky above Worcester, Massachusetts, "like planes in attack formation." One of the objects has a bluish glow in the front and a reddish tint behind it. ("Strange Objects in Worcester Sky," *Lawrence (Mass.) Eagle*, July 23, 1952; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 July 21st–31st, Supplemental Notes*, The Author, 2001, p. 14; Shoot 36)

1952, July 22 — 10:20 p.m. A bluish-green UFO is seen over Boston, Massachusetts, and a few minutes later it is picked up by GCI radar. When Ground Control vectors an F-94 toward the UFO, the pilot sees the UFO near Braintree and locks on to it with his own radar. But the object easily leaves the jet behind. (NICAP, "F-94B Chases Object / With Airborne Radar Tracking"; Sparks, pp. 154–155; Keyhoe, *FS from OS*, p. 67)

1952, July 22–23 — 10:30 p.m. An air traffic control tower operator at MacDill AFB in Tampa, Florida, watches for 30 minutes a red-greenish-blue object to the west-southwest at about 45° elevation with 2 other objects to the north of it, smaller and lower in elevation. He sights another object to the south-southeast about 30° elevation at 11:30 p.m. MacDill radar tracks an object at 12:03 a.m. 37 miles away at 41,200 feet altitude heading almost directly toward the base at 532 mph. It also tracks an object to the south-southeast at an altitude of 41,000 feet (reportedly Navy and CAA radars also track the object). At 12:08 a.m., the pilot and copilot of a B-29 bomber on landing approach are vectored by MacDill tower operator to investigate the UFO. They see a high-speed object at 40,000 feet heading towards MacDill and traveling faster than the B-29. The B-29 fire control radar locks onto the object and prepares to fire just as the UFO changes course and disappears at 4,600 mph. Four airmen at the MacDill radar site see an object as it passes nearly overhead. MacDill radar loses the object at about 12:15 a.m. Civilians in Tampa also see two yellowish-orange discs maneuvering around the air base. (Sparks, p. 156; "MacDill Mum on Saucers Spotted Here," *Tampa (Fla.) Daily Times*, July 23, 1952, p. 1)

1952, July 22–23 — 10:50 p.m.–3:47 a.m. Crews of several USAF F-94 jet interceptors from Dover AFB, Delaware, make 13 visual sightings and one radar tracking of blue-white lights around Trenton, New Jersey, continuing until 12:45 a.m. White, green, and blue lights are seen by ground observers and F-94 pilots moving in arcs and blinking out suddenly. One F-94 crew gets a radar lock-on from 30,000 feet away of an object the size of an F-94. At 9,000 feet distance, the object makes a sharp right turn, suddenly drops in height, and disappears. (NICAP, "One of Fourteen Sightings Corroborated by Radar"; Sparks, p. 156; Loren E. Gross, *UFOs, A History: 1952, July 21st–July 31st*, The Author, 1986, p. 10; Clark III 1254; Clark IV 1434)

1952, July 23 — 2:15 a.m. Seaman Henry J. Arnpriester is on watch at Nahant (Massachusetts) Coast Guard Station [now closed] when he sees two bluish lights approximately 5 feet in diameter. They appear as flat, disc-shaped objects having no aerodynamic features and move without sound or exhaust trail at a speed faster than a four-engine airliner at an altitude of 1,100 to 2,000 feet. When they are approximately 1.5 miles from the point of observation, they execute an extremely sharp turn similar to the path of a ball bouncing off a wall. (Sparks, p. 156; Lt. Col. Robert S. Jones, "Spot Intelligence Report," July 29, 1952)

1952, July 23 — 7:36 a.m. US Navy radar at Jamestown, Rhode Island, tracks a high-speed target heading north at 42,000 feet. It is confirmed by ADC radar at Camp Hero [now closed] at Montauk Point, New York. F-94s and F-86s are scrambled unsuccessfully from Westover AFB [now Westover Air National Guard Base] in Chicopee, Massachusetts. (NICAP, "Jets Scrambled / High Speed Object at 45,000′ Feet"; Sparks, p. 156)

1952, July 23 — 8:40 a.m. The crews of three USAF F-94 jet interceptors see a large silver object, shaped like a long pear with 2–3 squares beneath it, flying at 170–210 mph over Pottstown, Pennsylvania. A smaller object, delta-shaped or swept-back, flies around it at 1,150-1,720 mph. ([Blue Book document]; Sparks, p. 157)

1952, July 23 — 12:50 p.m. Crews of two USAF F-94 jet interceptors flying at 35,000–46,000 feet altitude near Altoona, Pennsylvania, see three cylindrical objects in a vertical-stack formation fly at an altitude of 50,000–80,000 feet for 20 minutes. (NICAP, "July 23, 1952: Altoona, Penna."; Sparks, p. 157)

1952, July 23 — 9:00 p.m. A county policeman, two airmen, and a civilian notice a red object southwest of Alexandria, Virginia. It hovers for 10 minutes, then disappears to the west in a burst of speed. (NICAP, "Alexandria, Virginia, UFO Report and The 'Fragment'"; Clark III 1254; Clark IV 1434)

1952, July 23 — 7:00–8:00 p.m. Owner Edwin C. Johnston and more than 20 employees of Aircraft Hydroforming at Culver City, California, see a bright silvery elliptical object that moves northwest over the Northrup aircraft plant

in nearby Hawthorne, then stops and hovers. Two small discs emerge and circle around the area before rejoining the mother ship. The object then climbs straight up out of sight at tremendous speed. ("Aircraft Co. Owner Sees 'Discs' Four Nights in Row," *Redlands (Calif.) Daily Facts*, July 24, 1952, p. 9)

1952, July 23 — 7:15 p.m. Many witnesses at Lockbourne AFB [now Rickenbacker Air National Guard Base] in Lockbourne, Ohio, including visiting Capt. Eugene E. McManus from Turner AFB [now Naval Air Station Albany] in Albany, Georgia, observe four round, fluorescent white objects hovering near the base at 75,000 feet. An Air force pilot named Capt. Swartz in Flight Service at Wright-Patterson AFB, Dayton, Ohio, radios in the report that the objects are balloons. Two F-84 jets are scrambled at 8:15 p.m. and identify them as a balloon cluster. The objects, seen over many other areas of central Ohio (Capt. Edward J. Ruppelt says he was called out to see it over Wright-Patterson), are probably USAF reconnaissance balloons sent up from Clinton County Airport in Wilmington, Ohio. (NICAP, "July 23, 1952, Lockbourne, Ohio, UFO Report"; Clark III 395–398; Clark IV 441–444)

1952, July 23 — 9:00 p.m. Fairfax County Patrolman James Murphy, A1c Mary Ann O'Connor, S/Sgt J. Sasser, and Simon Thacker see a red object south-southwest of Alexandria, Virginia. It hovers for 10–15 minutes, then disappears silently to the west at a high rate of speed. The same night, a supposed CIA agent and Navy Commander, Alvin E. Moore, reports finding a stone near Vienna, Virginia, that he thinks is connected to an alleged incident where a jet pilot shot at a UFO and knocks off some material. (NICAP, "July 23, 1952: Alexandria, Virginia, UFO Report and the 'Fragment'"; Keyhoe, *FS Conspiracy*, pp. 272–273; Ted Zachary [Todd Zechel], "The Case of the Missing Physical Evidence," *Saga UFO Report* 5, no. 3 (November 1977): 30–32, 52–54; Alvin E. Moore, *Mystery of the Skymen*, Saucerian, 1979; Alvin E. Moore, *The Secret UFO Diary of CIA Operative, Comm. Alvin E. Moore: Exposing the Existence of Alien Skymen*, Global Communications, 1997, pp. 45–47; Clark III 1254; Micah Hanks, "Fragmented Facts: AARO Report Unearths Odd Claims Involving U.S. Recovery of Material from 1952 UFO Incident," The Debrief, March 12, 2024; Jeff Knox, X thread on Alvin Moore case, March 12, 2024; Powell, *Keyhoe*, 364; Clark IV 1434)

1952, July 23 — Night. Contactee Orfeo Angelucci feels compelled to walk over the Glendale-Hyperion Bridge in Glendale, California. He feels an odd sensation and suddenly sees in front of him a soap-bubble-like object that turns into a metallic craft. He gets aboard and is taken on his first trip into outer space. (Orfeo Angelucci, *The Secret of the Saucers*, Amherst Press, 1955, pp. 18–36; Clark III 127–128; Clark IV 155–156)

1952, July 24 — 3:40 p.m. Two USAF pilots, Lt. Col. John L. McGinn and Lt. Col. John R. Barton, are flying a B-25 out of Hamilton AFB [now closed] in Novato, California, for Colorado Springs. They are over Carson Sink, Nevada, at 11,000 feet when they see three unknown objects make a left bank and fly to within 400–600 yards of the plane. They are three bright silver, delta-wing craft with no tails and no canopies. The pilots see a clean upper triangular wing with a definite ridge that runs from the nose to the tail. They estimate the speed as at least three times that of any conventional jet. (NICAP, "B-26 Crew Encounters 3 Triangular UFOs"; NICAP, "The Carson Sink Case"; Sparks, p. 157; Ruppelt, pp. 10–12; Michael Hall, "When UFOs Were Serious Business: Then and Today," *IUR* 28, no. 4 (Winter 2003–2004): 5; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 12, 15)

1952, July 25 (or April 25) — 3:00 a.m. Carlo Rossi is on his way to a fishing spot on the Serchio river near San Pietro a Vico, Lucca, Italy. He notices an odd light above the river and finds that it belongs to an enormous disc-shaped object with a transparent dome. It is about 82 feet in diameter and apparently taking up water through a long tube. The object is standing in the river on three legs and has a ladder reaching down next to the tube. Rossi thinks it is hovering by means of propellors. Suddenly a porthole opens, and a human figure looks out and notices him. Rossi begins to leave, but a green ray passes above his head and he feels an electric shock. The object takes off and disappears to the west. ("Le Nostre Analisi: Precisazioni sul Caso di S. Pietro e Vico (1952)," *Notiziario UFO*, no. 67 (July/Sept. 1975): 4–9; Patrick Gross, URECAT, September 12, 2006; 1Pinotti 42–46)

1952, July 25 — Capt. J. W. Titus of the 140th Wing Medical Group sees two oval-shaped objects flying in formation at 400–600 mph in Portales, New Mexico. They are silent and leave no vapor trail. At one point, they make an abrupt 80° turn and fly off to the north. (Nukes 85–86)

1952, July 26 — 12:15 a.m. Ground observers at Hampton, Virginia, see a luminous, alternately bright-silver, red, and green object hovering over the James River Bridge at about 1,500 ft for 30 minutes. It then ascends toward the east, where it is seen by the Langley AFB tower. USAF crews of two F-94s and ground observers see four round silver-bluish objects in V-formation that shoot straight up and disappear at 5,000 feet, one tracked by US Navy ground radar at Norfolk and by airborne radar. (NICAP, "Navy Ground Radar/ and Airborne Radars Track UFOs"; Clark III 1254; Clark IV 1434)

1952, July 26–27 — 8:15 p.m. Flying saucers return to the nation's capital, only one week after a massive number of radar-visual UFO sightings above restricted air space in Washington, D.C. At 8:15 p.m., pilot Capt. Berkow and a

stewardess of a National Airlines flight near Washington National Airport [now Ronald Reagan National] see several objects resembling the glow of a cigarette high above them. The lights move at around 100 mph. Soon, the airport and Andrews AFB in Maryland are tracking a dozen UFOs throughout much of the sky, all traveling 90–100 mph. By midnight, two F-94s are scrambled from New Castle AFB in Delaware to intercept them. National Airport staff hustle newspaper reporters away from the air traffic control tower, saying that interceptions are classified (but Project Blue Book chief Capt. Edward J. Ruppelt suspects that the Air Force does not want the press around when they finally get a good look at a saucer). The UFOs are seen on radar for 2 hours, but when the jets approach, the blips disappear. When the pilots return to base, they show up again. Reports are reaching Langley AFB about rotating objects that give off alternating colors over Newport News, Virginia. Another F-94 is scrambled, the pilot gets a radar lock, and the target speeds away. At National Airport, the objects reappear shortly before dawn, and two more F-94s are scrambled. The pilots obtain radar locks; again, the objects speed away. USAF press spokesman Albert M. Chop is in the airport radar tower and notes that everyone there believes the targets are "very probably caused by solid metallic objects." One F-94 pilot, Lieut. William Patterson, says, "I saw several bright lights. I was at my maximum speed, but even then I had no closing speed." A USAF air intelligence report later states that the radar crew is emphatic that the returns are solid and not temperature inversions. In 1969, however, Colorado project physicist Gordon David Thayer concludes that the radar events involved temperature inversions. He believes the visual sightings were caused by meteors and scintillating stars. University of Arizona atmospheric physicist James McDonald disagreed, arguing that Thayer's own data did not support his conclusion. Colorado project psychologist Michael Wertheimer interviewed many of the radar operators; nearly all disagree with the inversion explanation and maintain that all experienced radar operators have no trouble identifying such phenomena. (NICAP, "The Washington National Sightings"; Sparks, p. 158; Richard Hall, "The Washington Invasion, July 26/27, 1952"; Paul Sampson, "'Saucer' Outran Jet, Pilot Reveals," *Washington Post*, July 28, 1952, pp. 1, 4; "Jets on Guard for 'Saucers': Interceptors Chase Lights in D.C. Skies," *Washington (D.C.) Times Herald*, July 28, 1952, p. 1; John G. Norris, "Jets Poised for Pursuit; 'Saucer' Peril Discounted," *Washington Post*, July 29, 1952, pp. 1, 7; Ruppelt, pp. 163–167; Condon, pp. 157–158, 862–867; Loren E. Gross, *UFO's: A History 1952, July 21st–July 31st*, The Author, 1986, pp. 20–31; Good Above, pp. 270–272; Patrick Gross, "The Washington D.C. UFO Flap of 1952"; Thomas Tulien, "Oral History Interview with Albert M. Chop," November 1999, pp. 10–13; Kevin D. Randle, *Invasion Washington: UFOs over the Capitol*, HarperTorch, 2001, pp. 68–76, 127–148, 253–260; Shoot 42–47; G. David Thayer, "Inside the Colorado UFO Project," 2002; Swords 156–159; "Washington National Airport Case of 7-29-1952 – Albert M. Chop," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; "Washington National Airport Case of 7-29-1952 – James Ritchie of the CAA," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; Clark III 1252–1255; Graff 81–82; Clark IV 1432–1433)

1952, July 26 — 5:15 p.m. Air Defense Command radar detects a UFO over Williams, California. An F-94 jet interceptor is scrambled and locks onto the object with its radar. The crew sees a yellow-orange light. As confirmed by ground and airborne radar, the UFO plays tag with the F-94, alternately accelerating away when it gets close, then slowing down until it catches up again. (NICAP, "F-94 Intercept with ADC Detection"; Sparks, p. 158)

1952, July 26 — 11:00 p.m. Three women in Oran, Algeria, notice a large, orange-red, luminous patch in the sky. It travels from east to west, halts, then vanishes. It is one of many UFOs seen in the province of Oran over several weeks. (ClearIntent, pp. 120–121)

1952, July 27 — 10:40 a.m. Bowling Green State University biologist Charles H. Otis sees a "flotilla" of UFOs "seemingly floating along, making no sound" at 3724 Dexter Road, Ann Arbor, Michigan. He grabs a pair of 5x binoculars and studies them until they disappear. He counts 15 of them in a loose formation, moving slowly. One object leaves the formation and disappears in a burst of speed. The body of each seems to be elongated but split at the rear. A bright glow is visible in the front, and they have a bifurcated tail streaming out horizontally, never changing in length. (NICAP, "15 Objects Traveling South"; UFOEv, pp. 50–51)

1952, July 27 — 6:35 p.m. A group of eight pilots and engineers see a large, silvery object moving rapidly at a high altitude over Manhattan Beach, California. After it makes a turn, the UFO separates into 7 discs that form into groups, circle, and speed out of sight. Former Navy pilot and aircraft engineer J. E. Kempf says the formation looks like a "stack of coins." (NICAP, "Large Object Separates into 7 Discs"; Sparks, p. 159; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 13, 15)

1952, July 28 — Early morning. While napping between shifts as a heavy-equipment operator in the Nevada desert, Truman Bethurum is awakened by 8 small men who "seem to be of Latin extraction." They take him to a nearby flying saucer where he meets the captain, a "gorgeous woman, shorter than any of the men, neatly attired, and also having a Latin appearance: coal black hair and olive complexion. She appeared to be about 42 years old," although Bethurum learns that she is hundreds of years old. Her name is Aura Rhanes. Her ship is called a

"scow," and her crew is from the planet Clarion, a world that is always on the other side of the moon. He later tells this story and his later adventures in his 1954 book *Aboard a Flying Saucer*, ghostwritten by Mary Kay Tennison. (Truman Bethurum, "I Was Inside a Flying Saucer," *Saucers* 1, no. 2 (1953): 4–5; Truman Bethurum, *Aboard a Flying Saucer*, DeVorss, 1954; Bryant and Helen Reeve, *Flying Saucer Pilgrimage*, Amherst Press, 1957, pp. 17–22; Timothy Green Beckley, ed., *Messages from the People of the Planet Clarion: The True Experiences of Truman Bethurum*, Inner Light Publications, 1995, pp. 45–50; Clark III 192–194; Eghigian, *After*, pp. 124–126; Clark IV 228–229)

1952, July 28 — USAF Maj. Gen. John A. Samford secretly orders a deemphasis on or elimination of human anecdotal UFO reports. Instead, they would be "going on instruments," as worded in his briefing, so that he can close down Blue Book. Technological hurdles and budget limits greatly delay the plan, but Blue Book does transition into a propaganda debunking mission over the next 6 months. (Clark III 813, 1032; Clark IV 906, 1147)

1952, July 28 — Late afternoon. Ruppelt and Maj. Ed Gregory arrive in Washington, D.C., dodging newspaper reporters at the Roger Smith Hotel. Blue Book receives an astonishing total of 50 UFO reports in a single day. UFO inquiries are jamming the Pentagon telephones. Air Force and CIA officials concede that the Soviet Union might take advantage of the confusion. (Ruppelt, pp. 166–167)

1952, July 28 — According to the United Press, the Air Defense Command has alerted jet interceptor pilots to take off instantly in pursuit of any flying saucers. The International News Service amplifies this by quoting the Air Force that orders have been issued to shoot them down if they refuse to land. USAF Director of Operations Gen. Roger M. Ramey issues an ambiguous public denial that the interceptors have been ordered to shoot down any saucers. However, USAF Deputy Press Officer Lt. Col. Moncel A. Monts states that "jet pilots are, and have been, under orders to investigate unidentified objects and to shoot them down if they can't talk them down." ("Jets Ready to Chase Lights," *Washington (D.C.) Daily News*, July 28, 1952, p. 2; "Air Force Alerted for 'Discs': Sightings over Washington Put Jets at Ready," *Honolulu Star-Bulletin*, July 28, 1952, p. 1; "Jets on 24-Hour Alert to Shoot Down 'Saucers,'" *San Francisco Examiner*, July 29, 1952, p. 2; Shoot 49–50; David Rudiak, "1952 Flying Saucer 'Shoot Down' Stories," Roswell Proof; David Rudiak, "Background on Gen. Roger M. Ramey," June 4, 2013)

1952, July 28 — President Truman, resting in Kansas City, Missouri, after the Democratic Convention, calls CIA Director Walter Bedell Smith and asks him to investigate the Air Force's mishandling of the Washington National sightings. Smith later directs, through Deputy Director for Intelligence Loftus E. Becker, that a CIA/OSI group be put together to review the USAF UFO intelligence program at ATIC. Truman's involvement is meant to be kept Top Secret and is not revealed until 1992. (Clark III 1012; Clark IV 1126)

1952, July 28 — Canadian researcher Wilbert B. Smith allegedly shows Rear Admiral Herbert B. Knowles a metallic piece from a saucer that was shot down near Washington, D.C., by a US Navy jet. It is twice the size of a man's thumb and has been loaned to him by the Air Force, but he must return it to the CIA (or another secret agency). However, as researcher Jeff Knox points out, the material is supposedly from the Alvin E. Moore case of July 23, 1952, and Smith did not get the sample "until at least the end of 1954 (Moore gave it to Goodspeed on September 15, 1954, who gave it to Smith upon his return to Canada, it was returned to Moore by mid-1955). He could not have shown Knowles the sample before 1955." At some point in early 1953, the sample is analyzed at Battelle Memorial Institute in Columbus, Ohio, where Howard C. Cross, a senior staff member at Battelle, identifies the sample as a "very basic slag from an open-hearth furnace." (Letter from Howard C. Cross to Miles E. Goll, February 4, 1953; David Rudiak, "Wilbert B. Smith," Roswell Proof; Frank Edwards, *FS Serious Business*, Bantam ed., 1966, pp. 48–49; Condon, pp. 90–91; "Early Crashed Disc Data Uncovered," *Just Cause*, new ser. 7 (March 1986): 3–4; Good Above, p. 188; Micah Hanks, "Fragmented Facts: AARO Report Unearths Odd Claims Involving U.S. Recovery of Material from 1952 UFO Incident," The Debrief, March 12, 2024; Jeff Knox, X thread on Alvin Moore case, March 12, 2024)

1952, July 28 — UK Prime Minister Winston Churchill writes to William Sidney, Secretary of State for Air, and scientific adviser and friend Lord Cherwell, saying, "What does all this stuff about flying saucers amount to? What can it mean? What is the truth? Let me have a report at your convenience." The response, dated August 9, begins: "The various reports about unidentified flying objects, described by the Press as 'flying saucers,' were the subject of a full Intelligence study in 1951" [presumably the report by the Flying Saucer Working Party]. (Good Above, pp. 30, 448–449; UFOFiles2, pp. 43–44; "Records Show Winston Churchill's Interest in UFOs," The Cosmic Report, December 12, 2020; Jenny Randles, "Splicing the Mainbrace, Part Two," *Fortean Times* 426 (Christmas 2022): 27)

1952, July 29 — 1:30 a.m. An Air Defense Command radar outside of Osceola, Wisconsin, picks up some unidentified targets. Four F-51s from St. Paul, Minnesota, are scrambled, but the targets are moving around so quickly that it is impossible to vector in on a single target. The F-51 pilots see many lights; one pilot at 25,000 feet sees an object blaze across the nose of his airplane. Two other pilots vainly try to climb up to a hovering light that is in the same position as the radar targets. ATIC's Robert M. Olsson and Wendell Swanson explain the radar incident as a

temperature inversion and the visual sighting as a meteor. (NICAP, "Clusters of Small Targets and One Large Target"; Sparks, p. 161; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 July 21st–31st, Supplemental Notes*, The Author, 2001, pp. 80–85)

1952, July 29 — Early morning. CAA radar tracks 8–12 UFOs at a time traveling 100–120 mph in a 10-mile arc around Washington, D.C. When an Eastern Airlines pilot tries to check on the radar targets at the request of the CAA at 3:00 a.m., he sees nothing. The targets disappear from CAA radar when the airliner approaches then come back in behind him after he passes through the area. ("Air Force Debunks 'Saucers' As Just 'Natural Phenomena,'" *New York Times*, July 30, 1952, pp. 1, 10)

1952, July 29 — 10:00 a.m. President Truman tells his air force liaison, Robert B. Landry, to find out what is going on with UFOs. Landry calls ATIC and eventually reaches Ruppelt, who tells him that weather may have caused the radar targets, but there is no proof. He later learns that Truman is listening in. There is some evidence that Truman or Landry soon contact the National Security Council directly to find out how to proceed with the UFO problem. (Ruppelt, p. 167; Swords 170)

1952, July 29 — 10:00 a.m. Several employees of Los Alamos Scientific Labs, New Mexico (including Robert B. Leachman, W. Schafer, E. T. Jurney), see a white object moving east to west with a gyrating motion. Two jet interceptors from Kirtland AFB in Albuquerque arrive 5 minutes later. The object disappears but reappears in front of the jets, makes a 360° turn, comes around in back, follows for 2 minutes, then disappears. (NICAP, "Jets Scrambled from Kirtland"; Sparks, p. 161; *Hynek UFO Report*, pp. 61–64)

1952, July 29 — Four weather observers at Walker AFB [now closed] in Roswell, New Mexico, watch several high-speed discs through a theodolite. (Sparks, p. 161; *Hynek UFO Report*, pp. 114–115)

1952, July 29 — An FBI memo from Victor P. Keay on "Flying Saucers" discusses a classified briefing about UFOs by Cmdr. Randall Boyd Jr. of the Air Intelligence Estimates Division to Norman W. Philcox, an FBI liaison to the Air Force. The Air Force has "failed to arrive at any satisfactory conclusion" on UFOs. Reports are being received from all parts of the US and distant parts of the world. Boyd explains that USAF has made no progress in ascertaining the nature of UFOs, but it is filing them into three classifications: reports by civilians on the ground, reports by commercial or military pilots, and reports by pilots that are confirmed by radar or ground observations. He concludes by writing that it is "not entirely impossible that the objects sighted may possibly be ships from another planet such as Mars," but he adds that "air intelligence is fairly certain that these objects are not ships or missiles from another nation in this world." (ClearIntent, pp. 175–177; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 July 21st–31st, Supplemental Notes*, The Author, 2001, pp. 55–56)

1952, July 29 — Ralph L. Clark, acting assistant director of the CIA Office of Scientific Intelligence, sends a memo to OSI Deputy Director Robert Amory Jr., indicating that the agency will be looking into UFO matters a bit more thoroughly, even though it has been collecting cases for the past three years (since 1949): "a special study group has been formed to review the subject to date. D/CI [Walter Bedell Smith] will participate in this study with D/SI [H. Marshall Chadwell], and a report should be ready about 15 August." It alludes to his meeting with CIA rocket consultant Frederick C. Durant and others the previous day. (Ralph L. Clark, "Recent Sightings of Unexplained Objects," July 29, 1952, reprinted in "The CUFON 1952 CIA UFO-Related Document Sampler"; Good Above, pp. 330, 505)

1952, July 29 — Robert L. Farnsworth, president of the United States Rocket Society, urges President Truman and defense officials to restrain the US armed forces from shooting at UFOs. He says that hostile action might alienate us from "beings of far superior powers." (Robert L. Farnsworth, [Telegram to President Truman], July 28, 1952; "A Pro-Saucer Voice Heard," *New York Daily News*, July 29, 1952, p. 2; Curt Collins, "The Rocket Expert Who Stopped the War on UFOs," The Saucers That Time Forgot, July 20, 2023)

1952, July 29 — An orange, oblong stationary object is observed at the airport in Macdonald, Manitoba, in the south-southwestern sky for 2 minutes. It seems to change into a group of small round lights. They all disappear together. (Jan Aldrich; Project Second Storey)

1952, July 29 — 4:00 p.m. The Air Force holds its largest and longest press conference since the end of World War II. Maj. Gen. John A. Samford, director of USAF intelligence, leads it. He is accompanied by Eighth Air Force Maj. Gen. Roger M. Ramey, director of operations and commander of the Eighth Air Force; USAF Col. Donald L. Bower, Technical Analysis Division, Air Technical Intelligence Center (ATIC), Wright-Patterson AFB, Dayton, Ohio; Project Blue Book head Capt. Edward J. Ruppelt; USAF Capt. Roy L. James, ATIC radar specialist; and Burgoyne L. Griffing, electronics branch, ATIC. Samford says that the Air Force has been monitoring US air space since 1947. Approximately 20% of UFO reports come from "credible observers of relatively incredible things," which keeps the Air Force concerned. He explains that the Washington, D.C., sightings earlier in July were caused by "weather phenomena" that caused radar beams to bend and pick up objects on the ground. James offers more technical explanations about temperature inversions that cause radar echoes. Pro-UFO Maj. Dewey J.

Fournet Jr., USAF public relations officer Al Chop, and Navy radar specialist Lieut. John Holcomb are conspicuous by their absence. (NICAP, "General Samford's Press Conference," July 29, 1952; "AF Thinks 'Saucers' Friendly, Eager to Identify Them," *Washington (D.C.) Daily News*, July 30, 1952, p. 3; "The Air Force Makes a Pass at the Saucer Stories," *Life* 33, no. 6 (August 11, 1952): 35; Keyhoe, *FS from OS*, pp. 71–89, 90; Ruppelt, pp. 168–169; Don Berliner, with Marie Galbreath and Antonio Huneeus, *UFO Briefing Document: The Best Available Evidence*, Dell, 2000, pp. 60–63; "General Samford's UFO Press Conference, Pentagon, July 29, 1952," knightskross YouTube channel, August 3, 2010; Kevin D. Randle, *Invasion Washington: UFOs over the Capitol*, HarperTorch, 2001, pp. 77–126; Shoot 53–57; Swords 159–163; Clark III 1253; Powell, *Keyhoe*, 84–88; Clark IV 1433)

1952, July 29 — 9:15 p.m. Air Force Reserve Lt. Col. Robert G. LeCompte sees a flight of at least 10 luminous objects pass over Albuquerque, New Mexico. At first they appear overhead in no pattern, heading north, then shift to a V formation. They then shift into two rows. (NICAP, "AF Reserve Colonel Observes Rapid Ellipse"; Sparks, p. 163; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 13, 15)

1952, July 29 — 9:35 p.m. Marine Pfc Ralph C. Mayher, using 16 mm film exposed at 24 frames per second, obtains footage of a high-speed UFO over Miami Beach, Florida. Retaining a few frames for personal study, Mayher submits the main portion of the film to the Air Force for analysis. The film is never returned, and no analysis report is ever released. Enlargements of a few frames show a fiery looking, roughly circular object, symmetrical, with two small peaks or projection on opposite sides of the disc. The CIA examines the film in 1957 and returns it with no comment or analysis. The Mayher case features prominently in the subsequent lawsuit by Ground Saucer Watch against the CIA and is important because it is a confirmed case of direct interaction of the CIA with a witness, clearly indicating that there was CIA interest in the subject. (NICAP, "Ralph Mayer / Miami Film"; Ralph Mayer, "I Proved Flying Saucers Are Real," *Pic*, June 1954; Good Above, pp. 355–356)

1952, July 29 (or July 28) — 9:40 p.m. An Aircraft and Warning Station in Port Huron, Michigan, tracks an unidentified return on radar for 20 minutes. GCI asks Capt. Edward J. Slowinski flying an F-94B on a practice run to investigate. The pilot sees a bright, flashing, colored light in the location of the blip 29 miles west of Port Huron and follows it for 20 minutes. Slowinski is unable to close on the object. (NICAP, "Key Radar Case (CCL #17)"; Sparks, p. 160; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 72–73; Center for UFO Studies, [documents and case files])

1952, July 29 — 9:50 p.m. Scripps-Howard reporter Howard Doyle Kline sees a cluster of glowing white objects overhead in Albuquerque, New Mexico. The objects shift around into various patterns, including a perfect V at one point. Their shifts in position are incredibly swift and fantastically violent, he says. "They made" a flying saucer believer out of me." He reports the incident to Lincoln LaPaz, University of New Mexico meteoriticist, and Col. William A. Matheny, commander of the 34th Air Defense Division. The report, which is one probably used in Maj. Dewey Fournet's Motion Study, is missing from the Project Blue Book files. (Doyle Kline, "Flight of Luminous Objects Maneuvers over City," *Albuquerque (N.Mex.) Tribune*, July 30, 1952, p. 1; *New York World-Telegram*, August 2, 1952; UFOEv, pp. 69–70; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 July 21st–31st, Supplemental Notes*, The Author, 2001, p. 95; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 13, 15)

1952, July 30 — Flight Sgt. Roland Hughes of No. 20 Squadron RAF is on a training flight in a de Havilland Vampire FB-9 jet fighter and returning to base at RAF Oldenburg, Germany, when he sees a "gleaming silver, metallic disc" drop down from above and fly alongside his aircraft for several seconds before speeding off. The object is about 100 feet long. Its surface is shiny "like tinfoil," highly reflective, and "without a single crease or crinkle in it." On August 5, Hughes is ordered to fly to RAF Faßberg for further questioning. He arrives and finds a number of officers, including his commander and the UK Minister of Supply, Duncan Sandys (Winston Churchill's son-in-law), who asks Hughes how many beers he had before his saucer sighting. The Air Commanding Officer then reveals that the object had also been tracked on radar going faster than any known aircraft. This convinces Sandys that the case is a serious one, a view that he communicates to Lord Cherwell, the government's chief scientific adviser, in a letter, saying there is "ample evidence of some unfamiliar and unexplained phenomenon." (UFOFiles2, pp. 44–46; "The UFO Sighting That Convinced a Government Minister," *The Telegraph*, May 27, 2012)

1952, July 30 — Gen. Hoyt Vandenberg tells the press that, although he does not believe there are flying saucers, he dislikes the "mass hysteria" about them. He says the Air Force has had experts investigating them since the end of World War II and never found anything substantial. ("'Double Vision,' Vandenberg," *Santa Rosa (Calif.) Press-Democrat*, July 31, 1952, p. 6)

1952, July 30 — 1:10 p.m. Willie Vaught of Alexandria, Indiana, sees a strange looking cloud and calls her two teenage daughters (Laura and Patsy) and Laura Oliver to see it. While looking at it, they see six flat, aluminum-like objects streak across the cloud, merge, and disappear within a minute. ("Alexandria Family Reports Seeing 'Flying Saucers,'" *Alexandria (Ind.) Times-Tribune*, July 31, 1952, p. 1; Herbert S. Taylor, "Mystery Clouds and the UFO Connection," *IUR* 29, no. 4 (July 2005): 19)

1952, July 31 — Brig. Gen. Alfred R. Maxwell of the Research and Development Board prepares a memorandum that generally supports the official position that UFO reports contain no information of value, he writes: "The Air Force has made very little progress in learning what the phenomena or objects are." (Don Berliner and Stanton T. Friedman, *Crash at Corona*, Marlowe, 1994, pp. 30–31)

1952, July 31 — The Air Force announces that it has received 432 UFO reports so far in 1952, as well as numerous queries from the media and the public, enough that "regular intelligence work" has been affected. ("'Flying Saucer' Queries Hamper Air Force Work," *New York Times*, August 1, 1952, p. 19)

1952, August — UFO reports decline, with Project Blue Book receiving only 175 sightings, but this is still far above the normal average of 20–30 reports a month in January to May. (Ruppelt, p. 192)

1952, August — Hollywood producer Clarence Greene and a friend see a "sphere of light" in the sky over Los Angeles, California. Visible for 5 minutes, the object alternately hovers and turns before speeding off over the horizon. The next morning, Greene tells his business partner Russell Rouse about the sighting. As he reflects on the experience, he grows ever more irritated by the stigma attached to UFO sightings. (Clark III 1188; Clark IV 1362)

1952, August 1 — 10:00 a.m. Ground Observer Corps spotter Charlotte Blodgett sees some shiny discs with a "blister or round spot on the side" above Elmira, New York. Many others see the objects as well, including a newsman for the *Elmira Advertiser*, who sees three objects resembling pancakes. Many people in Afton, New York, watch a "flotilla" of objects in the vicinity of the sun for two hours. Some 300 employees of the Scintilla Magneto Plant in Sidney, New York, rush outside to watch some 60–75 spheres passing above. At Otego, a large crowd spots 5–6 bright discs over a period of about an hour. ("'Saucers' Dime a Dozen in State," *Syracuse (N.Y.) Herald-Journal*, August 2, 1952, pp. 1–2; Loren E. Gross, *UFOs: A History, August 1952*, The Author, 1986, p. 17)

1952, August 1 — 10:51 a.m. An Air Defense Command radar site on Campbell Hill at Bellefontaine, Ohio, tracks a target 20 miles NNW of Wright-Patterson AFB, traveling 500 mph against the wind. It vectors two F-86s piloted by Maj. James B. Smith and Lt. Donald J. Hemmer. They make visual contact but climb to 48,000 feet twice without reaching it. Smith gets a weak return on his radar gun sight and shoots a gun camera film of a white or silvery sphere estimated at 60,000 feet. They break off the intercept at 11:13 a.m. about 100 miles west-southwest of Dayton. The film reportedly shows a UFO in the upper right of the frames with noticeable motion to the lower left. Although Blue Book Capt. Edward J. Ruppelt's assistants Lt. Anderson G. Flues and Lt. Robert Olsson initially declare the case an "unknown," Ruppelt changes that evaluation a few weeks later after ATIC Technical Analysis Division Chief Col. Donald L. Bower transfers out, explaining it as two separate but coincidental IFOs—a weather balloon and a jet. Ruppelt goes to great lengths to debunk the case in his ADC briefings to the Robertson Panel. (NICAP, "Gun Camera R/V Case"; Center for UFO Studies, [Blue Book documents and files]; Sparks, p. 165; Condon, pp. 161–163; *Hynek UFO Report*, p. 21; Shoot 71–73; Patrick Gross, "The Bellefontaine, Ohio, Radar/Visual/Photographic Case, 1952"; Clark III 392–395; Clark IV 438–440)

1952, August 1 — Edward Tauss, acting chief of the Weapons and Equipment Division of the CIA's Office of Scientific Intelligence, writes a letter to OSI Deputy Assistant Director Ralph L. Clark, saying that less than 100 credible reports remain unexplainable. "interplanetary aspects and alien origin not being thoroughly excluded from consideration." He recommends the CIA continue to cooperate with ATIC, but "no indication of CIA interest or concern reach the press or public." (ClearIntent, p. 123)

1952, August 1 — 2:00 p.m. Harold Coffman and his wife see a brilliant, milk-white disc flying low above Sharonville, Ohio. It wobbles a bit and ascends at a 10° angle, making a slight crackling sound. It turns sharply left and disappears. ("G.E. Is Focal Point," *CRIFO Newsletter* 1, no. 2 (May 7, 1954): 2)

1952, August 1 — 4:00 p.m. Henry Staley, chief of fire and safety at the General Electric aviation plant in Cincinnati, Ohio, is watching a small plane flying south near the plant when he and three others notice a blinding light in the east. It is coming from an oval object as big as the Moon and looks "like burning magnesium." Soundless, it leaves a faint trail behind it. The object stops abruptly overhead for 30 seconds, pulsates, and changes to an elongated shape. Fire inspector George E. Kyle thinks the object is rotating, then slowly speeds up, "looking like an egg," then disappears into the horizon going 2–3 times a fast as a jet. ("G.E. Is Focal Point," *CRIFO Newsletter* 1, no. 2 (May 7, 1954): 2)

1952, August 1 — 8:30–9:00 p.m. *We, the People*, a 30-minute TV news show produced by *Life* magazine, devotes its airtime to the recent UFO sightings over Washington, D.C. WNBW-TV, which originates the program, rents a

DC-3 airliner, fills it with 20 newsmen, and has the plane circle over Washington, just in case the saucers return. On the ground in the radar room of Washington National Airport there are more newsmen and TV cameras. The show features editors and journalists Frank Blair, David Brinkley, Clay Blair, and various UFO witnesses. ("Can't Find Saucers," *Gettysburg (Pa.) Times,* August 2, 1952, p. 1; "NBC Saucer Hunt for TV Program Proves Fruitless," *Blytheville (Ark.) Courier,* August 2, 1952, p. 1; Loren E. Gross, *UFOs, a History: 1952, August,* The Author, 1986, pp. 18–19; Loren E. Gross, *UFOs, A History: 1952, August, Supplemental Notes,* The Author, 2002, p. 9; Curt Collins, "UFOs on TV: The 1952 Washington, DC Saucer Flap," The Saucers That Time Forgot, July 5, 2018)

1952, August 2 — 3:00 a.m. USAF 1st Lt. W. A. Theil and enlisted man Edwards see a red ball with a trail of blue flame fly straight and level over Lake Charles, Louisiana. (Sparks, p. 165)

1952, August 2 [or July 30] — George Hunt Williamson and his wife Betty are visited in Prescott, Arizona, by two other metaphysics enthusiasts, Alfred C. Bailey and his wife Betty of Winslow, Arizona. This evening, in the course of an automatic-writing experiment using a sort of Ouija board, they receive a message from an extraterrestrial in a spacecraft. In the days and weeks that follow, "Nah-9 of Solar X Group" and many other planetary and star people communicate with them. The space people call earth "Saras." Nah-9 says that the good men of Saras must unite with good space people to avert a calamity. More Ouija sessions take place through August 17. A message comes through that they will be contacted via radio with an International Morse Code message on August 22. Bailey approaches a coworker on the Santa Fe Railroad, a ham radio operator named Lyman Streeter, and asks for his help in picking up the space signals. (George Hunt Williamson and Alfred C. Bailey, *The Saucers Speak!* New Age, 1954; Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 21–22; Zirger and Martinelli, *The Incredible Life of George Hunt Williamson,* Verdechiari, 2016, pp. 178–181; Clark III 1283; Clark IV 1466)

1952, August 2 — 9:00–11:00 p.m. The *South Bend (Ind.) Tribune* sponsors "Operation Flying Saucer," essentially encouraging people to keep an eye out for UFOs. It is aided by the South Bend Ground Observer Corps Filter Center, an amateur astronomy club that sets up an array of telescopes in the Notre Dame football stadium, and volunteers from an amateur radio club. The newspaper receives hundreds of calls. Air Force officials monitoring the results state later that most of the reports are easily explained, although perhaps 120 are of interest. ("Area Girds for First Big Saucer Hunt," *South Bend (Ind.) Tribune,* August 2, 1952, p. 1; "100,000 Scan Sky; No Saucers," *South Bend (Ind.) Tribune,* August 3, 1952, pp. 1, 8; Loren E. Gross, *UFOs, a History: 1952, August,* The Author, 1986, pp. 17–18)

1952, August 2 — 9:30 p.m. Charles Rhodes sees a round, amber-colored object with a bright white light around its circumference flying above Ada, Oklahoma. It tilts on its side, and within minutes 10 other discs are observed by many people in town. (Loren E. Gross, *UFOs: A History, August 1952,* The Author, 1986, p. 19)

1952, August 3 — 3:00 p.m. An Air Force master sergeant on the ship *Santa Luisa* observes three round, flat, metallic objects hovering at 30,000–40,000 feet some 10 miles away from his position at the mouth of the Rio Guayas near Isla Puná, Ecuador. After 5 seconds, one object dives to the west then turns back northwest. They all disappear after another 5 seconds. (Project 1947, [case documents]; Project 1947, "UFO Reports, 1952")

1952, August 3 — 4:15 p.m. Two huge silvery discs are observed visually and tracked on radar for 1 hour and 15 minutes over Hamilton AFB [now closed] near Novato, California. The ground observers are pilots Capt. Leslie R. Hadley, Capt. Wayne T. Perske, and 2d Lt. Duane A. Swimley. They dive at each other and maneuver as if in a dogfight. After F-86s are dispatched to intercept, 6 more objects appear, take up a diamond formation, and accelerate out of sight. (NICAP, "Eight Huge Objects Observed by 8 Witnesses and Radar"; Sparks, p. 165; Project 1947, "Hamilton Air Force Base, Hamilton, California, August 3, 1952"; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 14, 15)

1952, August 3— 4:27 p.m. Observers near Fort Bragg, California, notice a flat object in the sky that they estimate is about 4 feet in diameter at 5,500 feet. (Loren E. Gross, *UFOs: A History, August 1952,* The Author, 1986, p. 20)

1952, August 3 — 10:20 p.m. Civilian engineer Paul L. Anderson sees 3 light-green cylindrical objects at Truth or Consequences, New Mexico. They are hovering at 45° elevation in an inverted-V formation, switching to echelon when one object moves with a rolling motion along its long axis. It disappears by rapidly rising vertically. The observation lasts 9 minutes. (NICAP, "Three Cylindrical Objects Observed by Engineers"; Sparks, p. 165; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 14, 15)

1952, August 5 — 12:25 a.m. A trio of brilliant white dots of indefinite shape, at an altitude of an estimated 5,000 feet, passes over Westover AFB [now Westover Reserve Air Base] in Chicopee, Massachusetts. The second object is half the size of the first, and the third is half the size of the second one. The first one resembles an automobile headlight. The appearance of other two is not given. The three are in a triangular formation. No jet activity is recorded over the airbase at the time and witnesses say the objects are moving "faster than jets." (Loren E. Gross, *UFOs, a History: 1952, August,* The Author, 1986, p. 23)

1952, August 5 — 5:13 a.m. Capt. Ray Sullivan and the crew of a Pan American–Grace Airways DC-3 flying between Lima and Huacho, Peru, see three discs in a V-formation maneuvering around their aircraft at an estimated speed of 93 mph. (NICAP, "DC-3 Crew Encounters Three Saucers in V-Formation")

1952, August 5 — Day. During a daylight observation of Venus, astronomer James C. Bartlett Jr. watches two discs fly overhead in a southerly direction at Baltimore, Maryland. They move away to the east, then two more objects with dome-like protrusions in the center fly past. ("Two Huge UFOs Sighted by Baltimore Astronomer," *UFO Investigator* 1, no. 5 (Aug./Sept. 1958): 1, 3)

1952, August 5 — 9:46–12:00 midnight. A visual sighting is made at 9:46 p.m. by an observer on the ground at Manassas, Virginia, who spots a brilliant oval flying south. About 10:50 p.m., Andrews AFB in Maryland picks up two unidentified blips moving slowly and steadily away from Washington, D.C., on a course toward Mount Vernon, Virginia. Minutes later the fluorescent screens at Andrews show two more UFOs to the east of the field moving for a short distance, stopping, and then moving again. The speed of the targets is a slow 60 mph. The height of the targets is unknown. Planes from both Andrews AFB and Bolling AFB are sent up to investigate but rainy weather forces them to turn back after they reach 15,000 feet altitude. Around 12:00 midnight yet another target appears on radar, and jets from New Castle AFB in Delaware are scrambled. The jets see no UFOs when they arrived over Washington; however, a spokesman for Andrews radar tells the press that "no radar sightings were made while the planes were overhead." ("Flock of 'Saucer' Objects Again Puzzles Wash. DC," *Visalia (Calif.) Times-Delta*, August 6, 1952, p. 1; Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, pp. 23–24)

1952, August 5 — 10:45 p.m. Eight residents of Camden, New Jersey, report a bright, round, orange object hovering or moving slowly in the western sky. ("8 City Residents Report 'Saucers' on Nocturnal Sweep through Sky," *Camden (N.J.) Courier-Post*, August 6, 1952, p. 16)

1952, August 5 — 11:45 p.m. A complex radar-visual sighting takes place at Haneda AFB [later Tokyo International Airport], Japan. Control tower operators watch a disc as it passes over Tokyo Bay at about 1,500 feet. It is a dark round shape surrounded by a bright light with a curved outer edge and smaller lights around it. While being tracked on radar, a scramble alert is issued at 11:55 p.m., and an F-94 Starfire jet from nearby Johnson Air Base [now Iruma Air Base] in Sayama, Saitama Prefecture, goes after the object. The interceptor, piloted by 1Lt. Wesley R. Holder and Radar Observer 1Lt. Aaron M. Jones Jr., chases the object, which speeds away while being tracked by onboard radar. During the next 30 minutes, the UFO disappears and reappears throughout the sky, vanishes when the jet closes in, performs intricate maneuvers, and at one point splits into three radar targets. The jet searches over Tokyo Bay until 12:33 a.m. when it is recalled. (NICAP, "F-94 Pilots Tracked Object for 90 Seconds"; Sparks, p. 166; Ruppelt, pp. 187–189; Condon, pp. 123–126; James E. McDonald, "Science in Default: Twenty-Two Years of Inadequate UFO Investigations," paper presented at the Symposium on UFOs, 134th Meeting, AAAS, Boston, December 27, 1969, pp. 20–34; Carl Sagan and Thornton Page, eds., *UFO's: A Scientific Debate*, Cornell University, 1972, p. xxiv; Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, pp. 24–27; Martin L. Shough, "Radar and the UFO," *UFOs 1947–1987*, Fortean Tomes, 1987, pp. 217–219; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 26–42; Patrick Gross, "The Haneda AFB Case, Japan, August 5, 1952")

1952, August 6 — Hynek sends Project Blue Book a report on his interviews with 45 astronomers about their opinions on UFOs at a June meeting of the American Astronomical Society and finds that five (11%) have seen a UFO, seven are indifferent to the subject, more express at least some interest, and a few are very interested but wary of publicity. (J. Allen Hynek, "Special Report on Conferences with Astronomers on Unidentified Aerial Objects," August 6, 1952; "Seven Status Reports for Project Stork, Part 2," CUFON; "Seven Status Reports for Project Stork, Part 3," CUFON; Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, pp. 83–85; Clark III 917; Clark IV 1028)

1952, August 6 — 9:00 p.m. James J. Allen sees a UFO 6 feet high, 8 feet long, and lighted inside strike the chimney of his home in West Lumberton, North Carolina. It crashes into his backyard. When he approaches it, the lights go off and he sees a man about 30 inches tall standing next to it. He asks if he is hurt, then the figure reenters the vehicle and it zooms away. ("West Lumberton Event Added to Growing 'Saucer' Reports," *Lumberton (N.C.) Robesonian*, August 7, 1952, pp. 1, 4; Clark III 326; Curt Collins, "James J. Allen's Alien Encounter Embarrassment: Aug. 6, 1952," The Saucers That Time Forgot, January 19, 2018; Clark IV 363)

1952, August 7 — 12:02 a.m. At Kerkrade, Netherlands, marine engineer Will Jansen watches a domed object swoop down to a low altitude, hover, zigzag, then speed away. He sees a similar object hovering further away. It finally tilts up vertically and shoots out of sight. (UFOEv, p. 122)

1952, August 7 — 9:08 a.m. Mrs. Susan Pzuhl (or Pfuhl) observes over San Antonio, Texas, four round UFOs that give off a color similar to white-hot metal. The objects appear to be approximately 18 inches in diameter and are observed one at a time at intervals of approximately 20 minutes. With the exception of one object that moves slowly, the speed must have been 3 times as fast as a propeller-driven aircraft. No sound can be heard. Their maneuvers consist of radical directional change by the first object, straight and level flight by the second object, a slight directional change by the third object, and a large circular maneuver by the fourth object. An aircraft passes under the fourth object with no apparent reaction by the plane or the object. It vanishes suddenly like an extinguished light. Duration is 70 minutes. (NICAP, "Four 18″ UFOs Observed"; Sparks, p. 166)

1952, August 7 — 3:00 p.m. Two Ground Observer Corps skywatchers in Silverton, Oregon, Ida Pfeifer and Dorothy Sthamann, see an aluminum-colored object 3 miles away that appears at first triangular, then more saucer shaped. Army and air observers in Portland confirm that jet interceptors are at that moment in pursuit of the object. Replacement skywatchers Sadie Barkhurst and Mrs. Olaf Teglund also see the object at 5:00 p.m. All agree that the UFO is headed east at a moderate speed, but darts "fiercely" toward the interceptor when it approaches. ("Flying Saucer at Silverton," *Salem (Oreg.) Capital Journal*, August 9, 1952, p. 14)

1952, August 7 — 9:00 p.m. A dazzling mass of colored light is seen in the sky above Youngstown, New York. US Coast Guard personnel at Shawnee Aircraft Control and Warning Base in Old Fort Niagara, New York, and Air Force personnel of the 136th Fighter Interceptor Squadron at Niagara Falls (N.Y.) Municipal Airport, all see the object, although Maj. Richard Barr at Shawnee declines to say whether it has turned up on radar. Marine sales businessman L. C. Pierce looks at it with a sextant and estimates its height as 70,000 feet. The object approaches the mouth of the Niagara River from the north, then moves west, where it stops and hovers above the Welland Canal in Ontario. It later disappears to the north. ("Saucers in This Area, Reported," *Niagara Falls (Ont.) Review*, August 9, 1952, p. 1)

1952, August 8 — A special CIA/Office of Scientific Intelligence team consisting of Philip Grandin Strong, Ransom L. Eng, and Frederick C. Durant visits Wright-Patterson AFB in Ohio for a comprehensive briefing about UFOs from Blue Book staff. This classified visit is in response to secret orders from President Truman to the CIA to investigate the Air Force's mishandling of UFOs during the Washington National Airport cases. (CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Swords 172–173; Clark III 397)

1952, August 9 — 1:45 a.m. A/3C Joseph F. Raley is walking to work at Lake Charles Air Force Station [now closed] in Lake Charles, Louisiana, when he observes a disc-like object from a distance away of 3,000–5,000 feet. The object is at an estimated altitude of 5,000 feet. It moves several hundred mph faster than any known jet aircraft. No sound is heard. The object is first seen moving north to south until it crosses the air station, where it stops and hovers for approximately 2 seconds, then takes off to the west. (NICAP, "Faster-Than-Jet Disc Stops, Hovers Two Seconds, Accelerates"; Sparks, p. 167)

1952, August 10 — 2:10 a.m. A pair of grayish-orange, oval-shaped objects are seen near Keesler Air Force Base in Biloxi, Mississippi. In view about 2 seconds, the objects make veering turns to the right and left before disappearing to the northeast. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 33)

1952, August 10 — 5:38 p.m. Roy E. Munson is resting in his hammock at 1231 Widergren Drive, Rockford, Illinois, when he sees a disc-shaped object moving west to east and streaking across the sky in 6 seconds. Within minutes, another appears on the same flight path. Some family members and neighbors join him to watch the objects, which keep appearing for the next 90 minutes by which time a total of 54 have gone by. Munson alerts the CAA operator at the Rockford airport, who calls O'Hare Airport in Chicago, which sends two USAF jet interceptors to the area. They appear just as the last of the discs, which seem surrounded by a haze, disappears. Of the 54 objects, 36 appear larger that the others and move faster. Fifty follow the straight west-to-east path out of sight. Three deviate from the path to the north, and one deviates to the south. (NICAP, "Rockford, Illinois, Monday, August 11, 1952")

1952, August 11 — A CIA memo refers to a meeting of the newly created study group on UFOs attended by eight operatives. (Central Intelligence Agency, "Minutes of Branch Chief's Meeting of 11 August 1952"; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Swords 173)

1952, August 12 — 1:43 a.m. An Air Force F-94B jet fighter from Dover AFB in Delaware is flying at 20,000 feet when both the pilot and his radar crewman sight a glowing object 45° to their left and at a lower altitude, with the waters of the Delaware Bay as a dark backdrop. Curious, the jet pilot adjusts his course and heads directly at the object, which is stationary. In an apparent reaction, the object loses some of its brilliance and diminishes in size, apparently moving away. The pilot determines that the object had halted above Cape May, New Jersey, where it again hovers. Without success, the pilot tries to raise the local CCI station on the radio on F channel to request a radar scan of the Cape May area. Low on fuel, the pilot cannot pursue the UFO any further, so he breaks off the

chase and heads for home. The UFO follows the jet, increasing in apparent size as it draws near and overtakes it. Eventually, the UFO loses interest and flies away to the south. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 36)

1952, August 13 — Around 7:00 p.m. Two civilians in the Tampa, Florida, area watch three UFOs. One object changes its course abruptly to the west, moving in excess of 600 mph. The same object hovers for about 5 minutes then moves at an excessive rate back to the east and resumes its course to the north and disappears. The two other objects do not alter course but disappear to the north. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 39)

1952, August 13 — 7:57 p.m. A group of seven strong, stationary targets becomes visible in an area about 15 miles north-northeast of the radar antenna at Washington National Airport [now Ronald Reagan Washington National Airport] in Arlington County, Virginia. During the next two or three antenna revolutions, the area on the scope between Washington and Baltimore becomes heavily sprinkled with stationary targets in a belt about 6 miles wide. A group of additional targets becomes visible in an area approximately 10–15 miles southeast of the radar antenna. For the next four and one-half hours, many unidentified targets are carefully plotted with a grease pencil on the face of the Type VG scope. The time for each is entered on these plots in order to calculate ground speeds. To secure a permanent record, time data and track plots are transferred from the scope face to a sheet of frosted acetate. The targets disappear at 12:30 a.m. The Civil Aeronautics Administration concludes that the targets are ground returns caused by temperature inversions in the lower atmosphere. Two similar radar cases featuring multiple targets in Indianapolis on November 4–5 also lead them to conclude that the episodes (and by extension the Washington, D.C., events in July) are "ground returns caused by reflection phenomena closely connected with the temperature inversions in the lower atmosphere." (NICAP, "Multiple Targets over Washington"; Richard C. Borden and Tirey K. Vickers, *A Preliminary Study of Unidentified Targets Observed on Air Traffic Control Radars*, Civil Aeronautics Administration, Technical Development and Evaluation Center, Technical Development Report, no. 180, May 1953)

1952, August 13 — Night. Pioneer Airlines pilot Capt. Max M. Jacoby sees a mystery light while on a routine test flight out of Dallas Love Field, Texas. He tries to intercept it, but the light evades him and disappears. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 39)

1952, August 13 — 9:10 p.m. A witness in Oakland, California, calls Hamilton AFB [now closed] in Novato to notify them he is watching "two balls of fire" making a 10-mile circle and leaving in the direction of Hamilton. When the report is made to Capt. Kenneth Broden, Hamilton AFB Airdrome Officer, he orders an F-94 jet scrambled to search the bay between Oakland and the air base. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 39)

1952, August 13 — 9:45 p.m. In Tokyo, Japan, US Marine Corps pilot Maj. James D. McGough sees an orange light fly a left orbit at 8,000 feet and 230 mph, then spiral down to no more than 1,500 feet, remain stationary for 2–3 minutes, and go out. An attempted interception is unsuccessful. (NICAP, "Orange Light Maneuvers Then Stops in Mid-Air"; Sparks, p. 167)

1952, August 13 — 11:10 p.m. USAF Reserve Capt. Stanley W. Thompson sees a formation of lighted objects flying rapidly over Tucson, Arizona. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 39)

1952, August 14 — Australian Minister for Air William McMahon states facetiously in Parliament that flying saucer reports are "probably based on flights of imagination," but indicates he will "cause a thorough investigation to be made." (Swords 376)

1952, August 14 — The CIA's special UFO study group meets for the first time and is given a summary (probably written by A. Ray Gordon, project officer of the CIA's Physics and Electronics Branch) of UFO history, an analysis of Project Blue Book, and a discussion of explained sightings and theories about unexplained sightings. (Central Intelligence Agency, "Flying Saucers," August 14, 1952; Good Above, pp. 331–333)

1952, August 14 — 12:00 noon. The chief test pilot for the Australian Government Aircraft Factories is flying a Vampire aircraft between 35,000 and 36,000 feet near Rockhampton, Queensland, when he looks east toward the coast and sees a large circular light at a lower altitude. The light is the color of an incandescent lightbulb. After about one minute, 6–10 smaller lights emerge from the larger object and surround it for 2 minutes before disappearing. After another 2 minutes, the large light also disappears. (Bill Chalker, "The Early Days of the Public UFO Drama in Australia: Even an Atomic Connection of a Sort," The OzFiles, October 2, 2023)

1952, August 14 — 7:20 p.m. People on the docks of Phillippeville [modern Skikda], Algeria, see an enormous red disc leaving behind a greenish trail. At 9:15 p.m., two people in Constantine, Algeria, watch a luminous object flying at high speed. It emits a bright light. (ClearIntent, p. 122)

1952, August 14 — 10:30 p.m. A yellow ball of light undulates up and down and from side to side over the Mathieson chemical plant in Lake Charles, Louisiana. It is also seen to shoot ahead abruptly and come to a halt in the same

manner. Witnesses estimate that the ball passes over at 5,000 feet, growing fainter and fainter as it moves away. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 43)

1952, Mid-August — 10:30 p.m. John D. Moorman, deputy sheriff of Starke County, is fishing in a boat with Surphin Casper on the Tippecanoe River about 3 miles northwest of Monterey, Indiana. Moorman looks up and sees 7–8 objects hovering. They watch for a few seconds until the objects move away to the west. About half of them return east momentarily, and all of them disappear by blinking out. (NICAP case file)

1952, Mid-August — With the help of USAF Col. William S. Boyd, Donald Keyhoe arranges a meeting with press officer Albert M. Chop for help in understanding the Air Force's reasons for debunking the Washington sightings. Chop offers to help him obtain UFO reports submitted to ATIC, and he comes through with some cases the following week. (Keyhoe, *FS from OS*, pp. 94–95; Thomas Tulien, "Oral History Interview with Albert M. Chop," November 1999, pp. 16–18; Antonio Huneeus, "Interview with Blue Book Liaison, Major Fournet," OpenMinds, July 21, 2010; Powell, *Keyhoe*, 91–92)

1952, August 15 — 4:20 a.m. Ground Observer Corps observers in Davis, California, see a rainbow-colored, round object hovering in the air. Soon they notice eight more objects of a strange appearance. At 5:30 a.m., two more UFOs are seen, one moving west while the other moves east. The Air Force scrambles a F-94 jet interceptor to search the area at altitudes of 10,000–20,000 feet. The military claims the pilot can see nothing unusual, although the GOC spotters say that the UFOs and the jet are both visible in the sky at the same time and possibly at the same altitude. At 5:00 a.m., in Napa, California, GOC post observer Diane Robinson sights a "cigar-shaped silver thing" traveling at tremendous speed at 10,000 feet toward the southwest. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 43)

1952, August 15 — CIA operative Frederick C. Durant [and/or Ransom L. En] writes a top-secret draft memo for DCI Walter Bedell Smith on the OSI teams visit to Wright-Patterson AFB and a summary of its findings. It offers an analytical description of UFOs going back to the 1946 Scandinavian ghost rockets. It rules out the possibility of Russian secret weapons and mentions the sightings at Los Alamos and Oak Ridge at a time when the "background radiation count had risen inexplicably. Here we run out of even 'blue yonder' explanations that might be tenable, and, we still are left with numbers of incredible reports from credible observers." Yet "even though we might admit that intelligent life may exist elsewhere and that space travel is possible, there is no shred of evidence to support this theory at present." (Central Intelligence Agency, "Flying Saucers," August 15, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Swords 172–173; Clark III 397)

1952, August 15 — RAAF Flight Lt. William H. Scott, chief test pilot of the Government Aircraft Factories, is flying a de Havilland Vampire jet between 35,000 and 36,000 feet near Rockhampton, Queensland. Looking east toward the coast, he sees a large, circular light at a lower elevation. It is the color of an ordinary incandescent light bulb. After about 60 seconds, 6–10 smaller lights break off from the main light, surrounding it for 2 minutes before disappearing. After another 2 minutes, the big light also disappears. (Swords 376)

1952, August 19 — The CIA/OSI study group prepares an internal 6-page document of its findings. It has made a study of the Soviet press that shows "not one report or comment" about UFOs, which indicates official censorship. It perceives a danger that the Russians might try to infiltrate civilian UFO groups (such as Civilian Saucer Investigation of Los Angeles) or add UFO disinformation during a nuclear attack: "We give Russia the capability of delivering an air attack against us, yet at any given moment now, there may be a dozen official unidentified sightings plus many unofficial." The group briefs CIA Director Walter Bedell Smith on August 20. (Central Intelligence Agency, "Flying Saucers," August 19, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Swords 174; Clark III 1013; Clark IV 1127)

1952, August 19 — 2:38 p.m. Ground Observer Corps observer Albert Lathrop sees two objects shaped like fat bullets flying straight, level, and fast over Red Bluff, California. (Sparks, p. 167)

1952, August 19 — 8:00 p.m. An oval disc is seen above Boron Air Force Station [now closed] in Boron, California. Two jet fighters are guided into the area by Capt. Ralph J. Borgerson at the base, but the object speeds away to the east as they close in. (Sparks, p. 167; Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 49)

1952, August 19 — About 10:00 p.m. Scoutmaster D[unham] S[anborn] "Sonny" DesVergers is driving with three scouts on the edge of the Everglades south of West Palm Beach, Florida, when he sees a light in a wild palmetto grove. The boys do not see it, so he drives on. Another boy admits he has seen a light in that direction too, so DesVergers returns to the spot and goes into the grove, telling the boys to stay in the car unless he is delayed. Soon all three boys see red lights flashing in the grove. This alarms them, and they go to a nearby house for help. They return to see DesVergers staggering out of the grove, incoherently saying he has been zapped into semiconsciousness by some kind of red flare coming from a hatch in a red ball of light. It burns his cap as well. An area of flattened and burned grass is found after the event. DesVergers has a reputation as a prankster and

hopes to monetize his story somehow, but the scouts do corroborate his story and there are physical traces. Grass samples from the site sent to the Air Force show root damage extending 4 inches or more into the soil, suggesting overheating, possibly by microwave radiation. Karl Pflock thinks it is a hoax, but Jerry Clark isn't 100% sure. (NICAP, "Florida Scoutmaster Case"; "Attack by Flying Saucer Described by Scoutmaster," *Miami (Fla.) Daily News*, August 24, 1952, pp. 1A, 4A; "'Line Forms at Left' for That Saucer Yarn," *Miami (Fla.) Daily News*, August 25, 1952, p. 1A; "Boy Scout Wants New Saucer Hunt," *Miami (Fla.) Daily News*, August 26, 1952, p. 2A; "'Saucer' Witnesses Talking," *Miami (Fla.) Daily News*, August 27, 1952, pp. 1A, 8A; Ruppelt, p. 176; Olsen, sec. 3, pp. 13–16; Story, pp. 128–131; Jenny Randles, *UFO Reality*, p. 143; Karl T. Pflock, "The Best Hoax in UFO History?" 1997; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 August, Supplemental Notes*, The Author, 2001, pp. 115–119; "The Scoutmaster's Tale," Saturday Night Uforia, March 27, 2013; Clark III 496–498; "Scoutmaster Sonny DesVergers Got Burned by a UFO: Encounter Remembered by Eyewitness Chuck Stevens," Eyes on Cinema YouTube channel, August 2023; Clark IV 545–546)

1952, August 20 — The CIA/OSI UFO study group briefs CIA Director Walter Bedell Smith, who then orders the preparation of a National Security Council Intelligence Directive for submission to the NSC stating the need for a UFO investigation. (H. Marshall Chadwell, "Unidentified Flying Objects," December 2, 1952)

1952, August 20 — Air Defense Command radar at Congaree AFB [now McEntire Joint National Guard Base], southeast of Columbia, South Carolina, tracks a target traveling more than 4,000 mph some 60 miles from the base. (NICAP, "ADC Tracks Object at 4,000 MPH"; UFOEv, p. 78)

1952, August 21 — USAF press officer Al Chop comes through and provides Donald Keyhoe with some Project Blue Book reports, including the Haneda AFB case, the Congaree AFB case, the three reports from late July. Chop assures him the reports have been cleared and he can write about them, on one condition—that he deny sensational reports that pilots are shooting at UFOs. (Keyhoe, *FS from OS*, pp. 94–99; Powell, *Keyhoe*, 92–93)

1952, August 21 — 10:10 p.m. Ground Observer Corps Supervisor D. C. Scott spots a yellowish-white light flying in the sky at 2,000 feet northeast of Elgin, Illinois. Several times it rises to 5,000 feet in three minutes, hovers, then descends again. Scott alerts Capt. Everett A. Turner at the Chicago Filter Center, who tells him to call again when the light settles down. After one hour and 23 minutes the light begins to hover, Scott calls Turner again, and Turner has at least one F-86 Sabre jet scrambled from O'Hare Airport in Chicago. The pilot makes four passes between 10,000 and 2,000 feet. On the fourth pass, it heads directly toward the light, which blinks out. ("Jets Pursue Mystery Light," *Carbondale Southern Illinoisan*, August 23, 1952, p. 1; UFOEv, p. 66; Shoot 102–103)

1952, August 22 — George G. Carey, CIA assistant director for operations, writes a memo to Chadwell on "USSR and Satellite Mentions of Flying Saucers" that reviews mentions of UFOs in the Soviet press during the past two years. ("USSR and Satellite Mentions of Flying Saucers," August 22, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996)

1952, August 22 — A. Ray Gordon, project officer of the CIA's Physics and Electronics Branch, provides a briefing document explaining the "Air Force Stand on 'Flying Saucers'" to CIA Director Walter Bedell Smith, who then briefs President Truman on the CIA UFO study group's reports at his regular Friday intelligence briefing. ("The Air Force Stand on 'Flying Saucers'," August 22, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Clark III 1013, 1016; Clark IV 1127, 1130)

1952, August 22–23 — Evening. Lyman Streeter sees unusual lights near Winslow, Arizona, and hears strange signals on his ham radio. Not long afterward, Lyman, his wife, and Alfred C. Bailey hear a mysterious code coming through the air itself. Eventually, at 2:00 a.m., a Morse Code-like message comes through the radio from Regga of Mars and Zo and Nah-9 from Neptune. Zo refers to Affa from Uranus, who thinks earth is too evil. He also warns them that the evil Orion Solar System is coming to earth in a "square star body." Williamson arrives from Prescott on August 23. (George Hunt Williamson and Alfred C. Bailey, *The Saucers Speak!* New Age, 1954; Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 22; Clark III 1283–1284; Clark IV 1466–1467)

1952, August 23 — Telenews Productions re-releases its 1950 UFO documentary short, *The Flying Saucer Mystery*, edited and expanded to 12½ minutes with new material. It features footage from the July 29, 1952, press conference given by Air Force Maj. Gen. John A. Samford, the UFO photo taken by Shell Alpert, a photo taken by August C. Roberts, German UFO occupant witnesses Oskar and Gabriele Linke, Frank Scully, and U.S. Army Engineers physicist Noel W. Scott. ("The Flying Saucer Mystery (Full) (1952)," TheUFOVideoChannel YouTube channel, September 1, 2010; Internet Movie Database, "The Flying Saucer Mystery"; Curt Collins, "*The Flying Saucer Mystery* and the 1952 UFO Flap," The Saucers That Time Forgot, January 9, 2020; "The First UFO Documentary: 'The Flying Saucer Mystery' ~ 1950 Original + 1952 Revised Edition," Eyes On Cinema YouTube channel, August 5, 2023)

1952, August 24 — 10:15 a.m. USAF Col. Gerald W. Johnson is flying an F-84G when he sees two silver balls in the vicinity of Hermanas (a ghost town), New Mexico. They seem to be 6 feet in diameter and 2 miles away. One seems to change into a long, gray object as it is turning to the right. After 3 minutes they disappear, then reappear 7 minutes later, by which time the F-84 is over El Paso, Texas. One after the other, the objects climb straight up 2,000–3,000 feet. (NICAP, "F-84 Encounters Two Silver Balls"; Sparks, p. 168; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 14, 15)

1952, August 24 — Williamson, Streeter, and Bailey receive coded radio messages indicating the saucer intelligences intend to land, inviting them to help. (George Hunt Williamson and Alfred C. Bailey, *The Saucers Speak!* New Age, 1954; Bryant and Helen Reeve, *Flying Saucer Pilgrimage,* Amherst Press, 1957, pp. 23–27; Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 22)

1952, August 25 — 3:40 p.m. At Holloman AFB, New Mexico, plant supervisor Fred Lee and foreman Lawrence A. Aguilar watch a round silver object for 5 minutes. It flies south, turns and flies north, makes a 360° turn, then flies away vertically. (NICAP, "Silver Sphere Maneuvers over Base"; Sparks, p. 168)

1952, August 25 — 5:50 a.m. William Squyres, a radio station musician at KOAM [now KKOW-AM] is driving from his home northeast of Frontenac, Kansas, to the station at Pittsburg. He is in his 1952 Jeep station wagon on a rough gravel road about a quarter of a mile from US Highway 160 when he sees a large, disc-shaped object hovering 10 feet in the air on the right side of the road 750 feet away. The UFO looks like two bowls placed together end to end, 75 feet long, 40 feet wide, and 15 feet high in the midsection. Through a window he can see the head and shoulders of a motionless human figure. Along its outer edge are a series of propellers 6–8 inches in diameter, spaced closely together and mounted on a bracket so they revolve "in a horizontal plane" along the edge of the object. He stops and gets out to watch it. As he is walking toward the object, it rises into the air and flies away at great speed. (Sparks, p. 168; "'Flying Saucer' with Men Inside Seen by Pittsburg Radio Employe," *Neosho (Mo.) Daily Democrat,* August 26, 1952, p. 1; Olsen, sec. 3, pp. 16–18; *Hynek UFO Report,* pp. 200–203; Patrick Gross, "Project Blue Book Unexplained Cases"; "Pittsburg, KS CE-III – William Squyres Interviewed by Frank Edwards," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; Clark III 378; Clark IV 422)

1952, August 25 — 9:25 p.m. Affa of Uranus contacts the Baileys, the Streeters, and the Williamsons (as well as two students named Ronald Tucker and Betty Bowen) by radio, using 405 or 450 kilocycles. Zo and Um of Neptune, Regga of Mars, and other aliens continue sending messages by both radio and telepathy. Streeter sees a dark spot in the sky that he claims is Affa. Williamson sees a blue light that he thinks is Zo. Everyone signs an affidavit that the events have truly taken place. (George Hunt Williamson and Alfred C. Bailey, *The Saucers Speak!* New Age, 1954; Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (August 2006): 22, 24; Clark III 1284; Clark IV 1467)

1952, August 26 — 1:18 a.m. Airman Richard Rains and two other airman at Ellington Air Force Base [now Ellington Field Joint Reserve Base] in Houston, Texas, watch a yellowish light pass swiftly overhead from south to north. It slows nearly to a stop when directly overhead, accelerates again, then slows again almost to a halt. The object then zig-zags off at a nearly perpendicular angle to its original course, though still northerly. It then ascends and blinks on and off at 2-second intervals, finally fading from sight. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 71)

1952, August 26 — Day. Marion Cranston [or Graston] sees two silver balls pass overhead noiselessly at her home in Watkins Glen, New York. Five minutes later, three carpenters (Ray Andrew, Alfred Sullivan, and Clayton Crout) working on a building at Glen Eldridge Point in the town of Hector, New York, see a silver object fall into Seneca Lake, throw up a 10-foot splash, then disappear underwater. Several witnesses in Trumansburg, New York, see five jet planes apparently in pursuit of a saucer ("State Police Told Flying Disk Dived into Seneca Lake," *Binghamton (N.Y.) Press,* August 26, 1952, p. 28; "Saucers Reported at Watkins Glen, Trumansburg," *Sayre (Pa.) Evening Times,* August 26, 1952, p. 10; Dolan, USO1, 155–156)

1952, August 27 — 4:45 a.m. Two meteorological officers at Macdonald Airport in Manitoba see a disc-shaped object with shadows on it. It makes two turns around the airfield. When the rotating airport beacon light strikes it, the object glints like shiny aluminum, speeds away to the northeast, and vanishes. (Good Above, pp. 184–185)

1952, August 28 — A family on the ground in Le Roy, New York, sees a disc making tight vertical circles around an airliner. (UFOEv, p. 10)

1952, August 28 — 9:30 p.m. Three civilians in Chickasaw, Alabama, report to Brookley AFB [now Mobile Downtown Airport] in Mobile, Alabama, their observation of multiple red stationary and maneuvering objects to the south, and another one moving from south to west, all in the direction of Brookley. AFOSI agent Charles A. Robinson arrives in Chickasaw at 9:50 p.m. to investigate and sees the same four objects to the south and southwest at an estimated 8–12 miles distance. One fiery red object is stationary for 15 minutes then drifts 15°–20° to the right after which it is stationary again. Radar operator A/2C Irl A. Whitaker visually spots a red-green object over Chickasaw to the north. USAF duty officer Capt. William A. Edwards and control tower operators see one object

to the southwest to the right and lower than the moon, and another object to the west at 10°–20° elevation. The latter is confirmed by radar as a stationary target at four miles range and 4,000 feet altitude. Robinson and others see one object explode, and another does a figure 8 maneuver. There are 4–6 objects larger than a star or planet varying from fiery red, red-blue, red-green, and sparkling diamond appearance. A civilian Air Force employee sees a flat oval shape. (NICAP, "GCA Paints Stationary Target"; Sparks, p. 169)

1952, August 29 — 10:50 a.m. Pilot LtJG William A. O'Flaherty and navigator LtJG R. S. Moore are flying a PB4Y-2 Privateer patrol plane west of Thule Air Base, near Qaanaaq, Greenland. They are following an 85-foot-diameter Skyhook balloon launched from an icebreaker, US Coast Guard Cutter *Eastwind*, when, upon release of the parachute instrument package from the balloon, they see 3 white discs or globes, about ½ to almost the full apparent size of the balloon, in triangle formation clustered to the right of the Skyhook instrument package at 74,000 feet for some 2–3 minutes. (NICAP, "Three Objects Shake Up Air Crew"; Sparks, p. 170; "Arctic Navy Pilot Reports Seeing Strange Phenomena," *Omaha (Nebr.) Evening World-Herald*, October 18, 1952, p. 4; Cmdr. Edward P. Stafford, "Cosmic Curiousity," *Naval History* 18, no. 5 (October 2004); "August–December 1952 Sighting Chronology," *Journal of UFO History* 2, no. 4 (Sept./Oct. 2005): 5, 8)

1952, August 29 — 8:35 p.m. Civil Air Patrol pilot Carlton A. Magruder sees three aluminum-colored objects with a red-yellow exhaust over Colorado Springs, Colorado. They are 50 feet in diameter and 10 feet high, flying in line at about 1,500 mph. (NICAP, "Pilot Reports Three Objects 50′ in Diameter"; Sparks, p. 169; Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 80)

1952, Late August — Albert and Betty Bailey go to the Palomar Gardens Café in California to visit George Adamski and tell him about their contacts and their friendship with George Hunt Williamson. (Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 22)

1952, Late summer — As a Signal Corps employee working the night shift, Vivian Walton handles decoded teletype messages inside a high-security building at the Defense Supply Center near Columbus, Ohio. She walks into the photo lab, where colleague Joe Sheehy is developing photos, one of which he says is a UFO that had landed in the "hill country" somewhere near Columbus. He says the object is 30 feet in diameter and unoccupied, with minimal damage. A few days later, an alert is sounded, allegedly because of danger of attack by UFOs. Walton claims the downed UFO has gone through the depot on the way to Wright-Patterson AFB in Dayton. (James W. Moseley, "The Wright Field Story, or Who's Lying?" *Nexus* 1, no. 3 (September 1954): 11–15; James W. Moseley, *The Wright Field Story*, Saucerian, 1971; Irena Scott and Pete Hartinger, "Defense Construction and Supply Company (DCSC)," *Ohio UFO Notebook*, no. 6 (July 1993): 27–29; Jerome Clark, "A Catalog of Early Crash Claims," *IUR* 18, no. 4 (July/Aug. 1993): 18; Irena Scott and William E. Jones, "Crash Claims," *IUR* 18, no. 5 (Sept./Oct. 1993): 21; Good Need, p. 159; Robert R. Young, "A Hoax Retold?" *IUR* 19, no. 3 (May/June 1994): 19; James W. Moseley and Karl Pflock, *Shockingly Close to the Truth! Confessions of a Grave-Robbing Ufologist*, Prometheus, 2002, pp. 111–114; Clark III 329; Clark IV 365–366)

1952, September — 10:00 a.m. A radar scope near Kirtland AFB in Albuquerque, New Mexico, picks up an unknown target approaching at 700 mph then slows down to 100 mph northeast of the airfield. Two F-86 Sabre jets are scrambled but at first cannot locate the target. The second pilot suddenly spots what seems to be a balloon but as he gets closer it looks more like a "doughnut without a hole." He gets as close as 1,500 feet before the object accelerates. When it is again at a range of 3,000 feet, the pilot begins firing at the object, but it pulls up in a climb and disappears in seconds. Capt. Ruppelt is given this report by an intelligence officer (probably Lt. Glen Parrish) at the base, who is about to forward the incident report to ATIC but the commanding officer (Brig. Gen. William A. Matheny) orders it destroyed. Parrish shows the last copy of the report to Ruppelt during a visit to Kirtland. (NICAP, "F-86 Shooting Incident / 700 MPH Target"; Ruppelt, pp. 1–5)

1952, September — Morning. Stewart Sanborn and his relatives, Gordon and Dorothy Sanborn, are waiting to catch the ferry across Okanagan Lake to Kelowna, British Columbia. They notice an odd white boat on the lake approaching them about one-half mile north. It looks like a round hard hat sitting on a platter. Suddenly its wake vanishes and they realize it is in the air. It stops and hovers 50 feet above the water and only 100 feet away from them. It seems to be about 30 feet in diameter and surrounded by a haze. It remains there for one minute, then starts moving back across the lake. It reaches the opposite shore in 5–6 minutes, then soars upward and disappears. ("UFO Startles Ferry Crowd," *Canadian UFO Report* 1, no. 4 (July/Aug. 1969): 5–8; Dolan, USO1, 157–159)

1952, September — UFO witness turned researcher Kenneth Arnold releases *The Coming of the Saucers*, coauthored by his friend and publisher, Raymond A. Palmer. As publicity, the story "Flying Saucer-y" is prepared by King Features Syndicate and carried in many newspapers as a full-page story. (Kenneth Arnold and Ray Palmer, *The*

Coming of the Saucers, Palmer, 1952; Curt Collins, "Kenneth Arnold's 1952 UFO Book Promotion," The Saucers That Time Forgot, September 28, 2018)

1952, September — Civilian Saucer Investigation in Los Angeles publishes the first of only four issues of its quarterly bulletin. The final issue appears in early 1954. (*Civilian Saucer Investigation Quarterly Review*, no. 1 (September 1952))

1952, September — John P. Cahn publishes an exposé of Frank Scully's *Behind the Flying Saucers* in *True* magazine. Scully's sources are an oil prospector named Silas M. Newton and a mysterious "Dr. Gee," later identified as Leo GeBauer, a con man with a long arrest record. The tale is a ploy to gain the attention of potential investors in a bogus oil detection scheme allegedly linked to alien technology retrieved from three UFO crashes, one east of Aztec, New Mexico, and the others in Arizona. Cahn manages to hoodwink the two into providing him with a sample of alien metal from the oil-detection device, but it turns out to be ordinary aluminum. Newton and GeBauer are convicted of fraud in 1953. Jerome Clark writes that Scully was himself a victim, not a perpetrator. (J. P. Cahn, "Flying Saucers and the Mysterious Little Men," *True*, September 1952, pp. 17–19, 102–112; Jesse Emspak, "FBI Hottel Memo Reveals UFO Hoax," *International Business Times*, April 11, 2011; Clark III 1044–1045; Eghigian, *After*, p. 64)

1952, September 1 — 8:23 p.m. Air Defense Command radar at Yaak Air Force Station in Montana picks up UFOs exhibiting changes of direction as many as five times a minute. Some course changes are 90° and speeds are measured at 1,400–1,600 mph. Six blips at one time appear on the FPS-3 radar scopes and the strange targets come within 10 miles of the GCI site. So close is the indicated range the radar personnel leave their windowless operations room to check the sky. Six objects can be seen an estimated 10 miles away. When first spotted, the UFOs are in an in-trail formation, and shortly thereafter that changes to an in-line abreast grouping. Finally, the UFOs switch to a vertical stack. S/Sgt. William Kelly remembers tracking the UFOs on the radar executing vertical climbs that exceed the limit of the site's height-finding equipment. (NICAP, "Radar/Visual at Air Force Radar Site"; Sparks, p. 170)

1952, September 1 — 10:30 p.m. An ex-artillery officer named Bowman and 24 others at Marietta, Georgia, see a red, white, and blue-green object that spins and shoots off sparks. An unidentified witness using binoculars sees two large objects shaped like spinning tops with red, blue, and green colors, flying side by side and leaving a sparkling trail for 30 minutes. At 10:50 p.m., a former Army Air Force B-25 gunner sees two large white disc-shaped objects with green vapor trails fly in trail formation, merge, and fly away quickly. (NICAP, "Two Discs in Trail Formation"; Sparks, p. 170)

1952, September 2 — 12:01 a.m. CAA radar controllers Robert L. Terneuzen (GCA), Ralph L. Frick, Dale E. Warner, Warren J. Weber, and Radar Maintenance Technician Gordon R. Copeland track as many as 30 targets simultaneously at Midway Airport in Chicago, flying in various directions with an average speed of 175 mph at about 2,000 feet. The 755th Aircraft Control and Weapons radar station in Elkhorn, Wisconsin, claims that the Midway Airport Tower supervisor has called them at 2:50 a.m., saying there are 40 targets plotted by airport radar flying from 3,000 to 6,000 feet at a speed of 120–150 mph. The targets are the size of blips from light planes or larger (the best target quality is in the 6–10-mile range) and move in no particular pattern—sometimes erratically and sometimes in straight lines up to 15 miles long. In at least one instance, the targets fly in formation with an aircraft. At 5:14 a.m., the Air Defense Command is alerted and authorizes the scramble of two jets from the 4706th Interceptor Wing at O'Hare Airport in Chicago. At 5:55 a.m., a pair of F-86 Sabre jets piloted by Capt. William W. Maitland and Lt. Beverly L. Dunjill, lift off and are vectored right through the targets as shown on radar, making passes at 800 and at 4,000 feet without making contact. The F-86s are evidently without airborne radar because they only mention visual descriptions. The Civil Aeronautics Administration controller at the airport guides them toward the targets in an attempt to ram whatever might be there. Maitland and Dunjill later tell the media: "We didn't see anything. We didn't hit anything. We went through the target showing on the scope and there was nothing there— not even a cloud." The jets break off their aerial search at 6:19 a.m. and return to base. By 7:00 a.m. all of the mysterious targets disappear off the scopes toward the south. The Midway radar crews are convinced the targets are returns from tangible bodies, but CAA chief Bob Zeigler overrules them and blames "peculiar atmospheric conditions." (NICAP, "40 Targets at Midway Airport"; Sparks, p. 171; "Sabre Jets Fly through 'Object,'" *Spokane (Wash.) Spokesman-Review*, September 3, 1952, p. 1; Clark IV 81–84)

1952, September 3 — 9:00 a.m. Instructor pilot Donald L. McCraven and N. D. Thomas observe a dark elliptical object reflecting sunlight 6 miles north of Tucson, Arizona. The object makes three well-coordinated turns with no perceptible sound. It moves at tremendous speed during a slight climb and is observed for approximately 90 seconds. (NICAP, "Dark Ellipse Makes Three Coordinated Turns"; Sparks, p. 172)

1952, September 3 — 12:30 p.m. Truman meets in the Cabinet Room with Gen. William M. Garland, Col. John Gordon Fowler, and three other USAF officers; Lawrence J. Henderson Jr. and Walter W. Niles from the RAND

Corporation; and Robert B. Landry and four others from the National Security Resources Board. The topic is the Washington UFO incident. (Frank Stalter, "The Real Majestic 12: Harry Truman's 1952 DC UFO Meeting," The UFO Partisan, 2009)

1952, September 6 — 10:10 a.m. Walter Borys and George McCracken, two guards at the Osborn Prison Farm [now Osborn Correctional Institute] in Somers, Connecticut, are with 13 inmates in the yard when they hear an odd motor noise and see a silvery object in the northern sky. It appears to be descending in a zigzag motion but stops and shoots upward at a right angle at terrific speed after releasing a puff of smoke. Other witnesses in the area think it is a jet aircraft. (*Hartford (Conn.) Courant*, September 7, 1952, p. 1; Audrey H. Hennis, "The 'Flying Saucer' Was from a Jet's After-Burner," *Hartford (Conn.) Courant*, September 19, 1952, p. 18; Loren E. Gross, *UFOs, a History: 1952, September–October*, The Author, 1986, pp. 11–12)

1952, September 6 — Contactee Truman Bethurum is getting his hair cut at a barbershop in Las Vegas, Nevada, when he sees a woman walk by outside whom he recognizes as the alien from the planet Clarion whom he had met aboard a saucer. He calls out to her, but she shakes her head as if not wanting to be recognized and disappears into a crowd. (Truman Bethurum, *Aboard a Flying Saucer*, DeVorss, 1954; Clark III 90; Clark IV 118)

1952, September 8 — Wilbert B. Smith and Department of Transport associates launch a large weather balloon with a magnesium flare over Ottawa, Ontario, but it does not inspire any UFO reports. (Loren E. Gross, *UFOs, a History: 1952, September–October*, The Author, 1986, pp. 17–18; Clark III 1078; Clark IV 1194–1195)

1952, September 9 — Several witnesses see a metallic sphere drop from an altitude of 2,600–3,300 feet to 1,600 feet above Lake Lugano, Switzerland. It bursts into pieces, then falls into the lake near Morcote. (Carl Feindt, "Report #87," waterufo.net; Dolan, USO1, 156–157)

1952, September 9 — 9:00 p.m. US Air Force civilian illustrator E. J. Colisimo sees a disc with lights along part of its circumference over Rabat, Morocco. It is flying twice as fast as a T-33 jet trainer in a slightly curved path. (NICAP, "Disc Twice As Fast As T-33"; Sparks, p. 172)

1952, September 10 — Battelle issues its fifth status report on Project Stork to ATIC. It says that 800 copies of its revised report questionnaire have been sent to the Air Force, many of which were passed on to military witnesses as a trial test. The group has now examined UFO reports from 1947–1949 and 1951. It decided to discontinue the news clipping service. ("Seven Status Reports for Project Stork, Part 3," CUFON)

1952, September 10 — 2:30 p.m. The wife of a civilian employee at Andrews AFB [now Joint Base Andrews] in Prince George's County, Maryland, sees a shiny, metallic, elliptical, silent object moving back and forth near the base. It is visible for 2–3 minutes. (Loren E. Gross, *UFOs, a History: 1952, September–October*, The Author, 1986, p. 25)

1952, September 11 [or 7 or 17] — CIA Office of Scientific Intelligence Director H. Marshall Chadwell writes a memorandum to Director of Central Intelligence Walter Bedell Smith that sets out two national security implications of UFOs for the government of the United States: the potential for psychological panic by citizens, and demonstrating the nation's vulnerability by air. It recommends that "A national policy should be established as to what should be told the public regarding the phenomena, in order to minimize risk of panic." (H. Marshall Chadwell, "Flying Saucers," September 11, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Good Above, p. 224; Swords 175–181, 503–507)

1952, September 11 — Williamson, Streeter, and Bailey receive a radio message saying, "I hope we might have a landing soon," and later, "We must make landing contact soon… If you believe us, you will act accordingly." (George Hunt Williamson and Alfred C. Bailey, *The Saucers Speak!* New Age, 1954; Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 22)

1952, September 12 — 1:30 a.m. Two oil well drillers, William Darling and Donald Davis, see a lighted object with windows on one side circling 150 feet above the ground silently for nearly 30 minutes at Bladensburg, Ohio. Suddenly it makes a noise like steam blowing and shoots out of sight. ("Report from the Readers," *Fate* 6, no. 2 (February 1953): 108)

1952, September 12 — Around 7:15 p.m., in Flatwoods, West Virginia, two brothers, Edward and Fred May, and their friend Tommy Hyer (ages 13, 12, and 10 respectively) witness a bright object cross the sky, coming to rest on land belonging to local farmer G. Bailey Fisher. The boys go to the home of the May brothers' mother, Kathleen May, where they tell the story of having seen a UFO crash land. From there, Mrs. May, accompanied by the three boys, local children Neil Nunley, 14, and Ronnie Shaver, 10, and West Virginia National Guardsman Eugene Lemon, 17, walk to the Fisher farm. At the top of a hill, they reportedly see a large pulsating "ball of fire" about 50 feet to their right. They also detect a pungent mist that makes their eyes and noses burn. Lemon then notices two small lights over to the left of the object, underneath a nearby oak tree and directs his flashlight towards them, revealing a creature, which May reports as bounding towards them. Other sources describe it as emitting a shrill hissing noise before gliding towards them, changing direction and then heading off towards the red light. The

group flees in panic. Sheriff Robert L. Carr and his deputy Burnell J. Long search the area separately, but find no trace of the encounter other than the smell. Early the next morning, A. Lee Stewart, co-owner of the *Braxton Democrat*, visits the site of the encounter for a second time and discovers two elongated tracks in the mud, as well as traces of a thick black liquid. It is later revealed that the tracks are likely those of a 1942 Chevrolet pickup truck driven by local Max Lockard, who had gone to the site to look for the creature some hours prior to Stewert's discovery. Ivan T. Sanderson interviews the witnesses several days later and concludes that a flight of "intelligently controlled objects flew over West Virginia." The Air Force concludes that people have seen a meteor and that the monster was only the glowing eyes of a barn owl. Joe Nickell also concludes in 2000 that the bright light in the sky reported by the witnesses on September 12 was most likely a meteor, that the pulsating red light is likely an aircraft navigation/hazard beacon, and that the creature described by witnesses closely resembles a barn owl. Nickell claims that the experience was distorted by the heightened state of anxiety felt by the witnesses after having observed the original meteor. However, Frank C. Feschino has done extensive research to support his hypothesis that the Flatwoods incident was only one small part of a major UFO display involving multiple objects (many of them reported as "meteors" or "balls of fire" or "flaming planes") passing in westerly and other directions across the eastern and southern United States between 6:50 and 7:25 p.m. The trajectory of one of these objects (moving first northwest then northeast then south) alone takes it over Baltimore, Catonsville, Frederick, Hagerstown, Cumberland, and Garrett County, Maryland; Preston County, Morgantown, Fairmont, Wheeling, Charleston, Parkersburg, Nitro, Ward, and Chelyan, West Virginia; Selma, Columbus, Zanesville, St. Clairsville, Ohio; it is last seen moving south around Bluefield, West Virginia. Another object is seen over Washington, D.C., heading due west towards West Virginia, apparently landing in Flatwoods. A third object travels southwest over Roanoke and Pulaski, Virginia, possibly landing near Arcadia, Tennessee. Feschino thinks that these three objects had been damaged by fire directed at them by Air Force interceptors. Five other objects are observed in North Carolina in that time period, and these Feschino suspects may have been attempting to look for and assist the damaged objects. He also speculates that the disappearance of an F-94 jet fighter out of Tyndall AFB in Panama City, Florida, piloted by 2Lt John A. Jones and radar operator 2Lt John S. DelCurto, might have involved a tragic UFO interception that began three hours earlier; the last known contact with the fighter is at 5:43 p.m. over the Gulf of Mexico 70 miles northwest of Tampa, the accident takes place under unusual circumstances, and the wreckage has never been found. Feschino thinks that a UFO damaged in dogfights with many interceptors over the Gulf might have triggered the second battle over the Atlantic seaboard around 7:00 p.m. Then a second wave of multiple objects is observed 8:00–8:10 p.m. in the Washington, Maryland, Virginia, Ohio, and West Virginia region that, according to Feschino, involves a search for a second downed UFO. Although Feschino jumps to many conclusions and his documentation for specific incidents and conditions is somewhat confusing, he may well have grasped more truth than the meteor-and-owl explanation of the skeptics. (Wikipedia, "Flatwoods Monster"; "Braxton Co. Residents Faint, Become Ill After Run-In With Weird 10-Foot Monster," *Charleston (W.Va.) Daily Mail,* September 14, 1952; "'Monster' Held Illusion Created by Meteor's Gas," *Charleston (W.Va.) Gazette,* September 23, 1952, p. 3; Gray Barker, "The Monster and the Saucer," *Fate* 6, no. 1 (January 1953): 12–17; Gray Barker, "W.Va. 1952, September 14 — 4:30 a.m. Fred J. Brown is preparing to milk the cows at the Everglades Experiment Station [now the Everglades Research and Education Center] in Belle Glade, Florida, when he spots a circular object about 35 feet in diameter hovering about 100 feet above the ground. It has a row of red and amber lights spaced around the outside rim and the underside. As it descends to about 40 feet, the 13 cows bolt as the object disappears to the west. As Brown is rounding up the cows, the object appears again, moving from south to north at a speed of 30 mph, making a high-voltage buzzing noise, and emitting an odor "like acid or ammonia" that makes Brown's eyes smart. The cows stampede once again. The object's glow illuminates the ground as it passes, and it gains altitude and disappears again. ("Cattle Stampeded Twice by Mysterious 'Object,'" *Palm Beach (Fla.) Times,* September 16, 1952, p. 1; Loren E. Gross, *UFOs, a History: 1952, September/October*, The Author, 1986, pp. 28-29)

1952, September 14 — Exercise Mainbrace begins in the North Sea. It is the first large-scale naval exercise undertaken by NATO and jointly commanded by Admiral Lynde D. McCormick and Gen. Matthew B. Ridgway. It involves the US Navy and the navies of Great Britain, France, Canada, Denmark, Norway, Portugal, Netherlands, and Belgium. Its objective is to convince Denmark and Norway that they can be defended against an attack from the USSR, and involves 80,000 men, 200 ships, and 1,000 aircraft. The operation lasts through September 25. (Wikipedia, "Exercise Mainbrace")

1952, September 14 — 10:13 p.m. The Danish destroyer *Willemoes*, during the Exercise Mainbrace maneuvers, is north of Bornholm island, Denmark, in the Baltic Sea. Lt.Cmdr. G. Schmidt-Jensen and several members of the crew see an unidentified object, triangular in shape, that moves at high speed toward the southeast. It emits a greenish glow and jets three rays of fire from its rear. Jensen estimates the speed at 930 mph. (NICAP, "Operation Mainbrace Sightings"; Ruppelt, pp. 195–196; Loren E. Gross, *UFOs, a History: 1952, September–October*, The Author, 1986, p. 28; Loren E. Gross, *UFOs, a History: 1952, September/October, Supplemental Notes*, The Author, 1986, p. 29; Marler 128–129, 265)

1952, September 19 — 10:53 a.m. During Exercise Mainbrace maneuvers, a silvery, spherical UFO appears near RAF Topcliffe in North Yorkshire, England, following an RAF Meteor jet (possibly piloted by Flight Lt. John W. Kilburn and Flight Lt. Marian Cybulski) about to land. It has been following about 5 miles behind the jet at15,000 feet, swinging like a "falling sycamore leaf" and descending. As the jet turns toward Dishforth, the object follows but begins rotating on its axis then suddenly accelerates and disappears. Several ground crew members of RAF 269 Squadron (Master Signaller Albert Thomson, Sgt. Flight Engineer Thomas Deweys, Flight Lt. R. Paris, and Leading Aircraftman George Grime) and civilians also see it. Prince Philip suggests to RAF Air Marshal Peter Horsley, who is serving as equerry to the duke, that he investigate credible reports of UFOs, especially those by fighter pilots who have seen them. He arranges for RAF Fighter Command to send copies of any reports for examination at Buckingham Palace and begins an informal study that lasts until 1955. (NICAP, "Swaying Silver Object Follows Jet"; Sparks, p. 173; "Check for 'Saucers' at Naval Maneuver," *El Paso (Tex.) Herald-Post*, September 20, 1952, p. 16; Ruppelt, pp. 195–196; Richard Hall, "Military Secrecy: Sailors, Soldiers, and Airmen," *MUFON UFO Journal,* no. 153 (November 1980): 4–5; Richard Hall, "Operation Mainbrace Sightings"; Good Above, pp. 31–32, 450; UFOFiles2, p. 47; Nick Redfern, "UFOs and NATO: The Mainbrace Affair," Mysterious Universe, April 22, 2014; Clark III 376; David Clarke, "The Prince and the Saucers," *Fortean Times* 406 (June 2021): 18–19; David Clarke, "Phantoms of the Sky," *Fortean Times* 445 (June 2024): 28, 35; Clark IV 420)

1952, September 20? — Sometime during Exercise Mainbrace, at the underground RAF Ash, near Woodnesborough, Kent, England, Senior Aircraftman William Maguire tracks on radar a huge UFO high above the English Channel for 18 minutes. Eventually it splits into three and speeds away, one object to the north, another toward France, and the third toward Eastern Europe. (Good Need, p. 152; Nick Redfern, "UFOs, NATO, and Military Encounters," Interesting and Curiosities, October 28, 2018)

1952, September 20 — Naval personnel on the US aircraft carrier USS *Franklin D. Roosevelt* in the North Sea observe a silvery sphere moving across the sky behind the fleet. Photographer Wallace Litwin takes three color photos that are developed and examined by naval intelligence officers. Ruppelt says they "turned out to be excellent … judging by the size of the object in each successive photo, one could see that it was moving rapidly." No balloon has been launched. (NICAP, "Object Photographed during Operation Mainbrace"; Ruppelt, pp. 195–196; UFOEv, p. 162; "In the News 1952," Saturday Night Uforia, 2013)

1952, September 20 — 7:30 p.m. At Air Base Karup in Jutland, Denmark, three Danish Air Force officers see a shiny, metallic UFO pass overhead and disappear in clouds to the east. (Aimé Michel, *The Truth about FS*, 133; UFOEv, p. 162)

1952, September 21 — Six RAF Meteor jets flying above the North Sea observe a shiny sphere approaching from the direction of the Mainbrace fleet. It eludes their pursuit and disappears. As they are returning, it reappears following one of the jets, but when he turns to chase it, it speeds away. Ruppelt says the Mainbrace sightings forced the RAF to "officially recognize the UFO." (NICAP, "Six RAF Jets Approached by Shiny Sphere"; Sparks, p. 173; Ruppelt, p. 196)

1952, September 22 — Night. A UFO hovers over the Army's Camp Drum [now Fort Drum] near Watertown, New York, for 30 minutes. Eight soldiers say the object is 200 feet across, trailing red-orange sparks. ("Mysterious, Gyrating Object Looks Down on Camp Drum," *Rochester (N.Y.) Democrat and Chronicle*, September 27, 1952, p. 1)

1952, September 24 — CIA Assistant Director of Scientific Intelligence H. Marshall Chadwell writes a 4-page memo to CIA Director Walter Bedell Smith, summarizing his earlier memo and stating that since 1947 unexplained sightings were running at 20% and in 1952 they rose to 28%. "I consider this problem to be of such importance that it should be brought to the attention of the National Security Council in order that a community-wide coordinated effort toward its solution may be initiated." His CIA scientific consultants (Julius Stratton, and perhaps Lloyd Berkner and Howard P. Robertson) think the answer will be found "on the margins of just beyond the frontiers of our present knowledge in the fields of atmospheric, ionospheric, and extraterrestrial phenomena, with the added possibility that the present dispersal of nuclear waste products might also be a factor." (H. Marshall Chadwell, "Flying Saucers," September 24, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Good Above, pp. 328–329, 506–507; Clark III 1254–1255; Clark IV 1434–1435)

1952, Late September — Ruppelt visits the headquarters of the Air Defense Command at Ent AFB [now the US Olympic Training Center] in Colorado to brief Gen. Benjamin W. Chidlaw and his staff on the past few months of UFO activity at a lunch at the officer's club. One of the attendees is Maj. Vernon L. Sadowski, the ADC Intelligence liaison to Blue Book, who says that "no one can understand why Intelligence is so hesitant to accept the fact that something we just don't know about is flying around in our skies, unless you are trying to cover up something big." (Ruppelt, pp. 194–197)

1952, September 26 — Syndicated aviation columnist Robert S. Allen writes in his column that the "Air Force has a breathtaking report" ready on UFOs. The study expresses the belief that some reports are genuine and originate from "sources outside of this planet." The supposed document also says that some sightings involve secret US military devices. The study is allegedly based on more than 1,800 sightings in the past 5 years. (Robert S. Allen, "Report on Flying Saucers," *Los Angeles Mirror News*, September 26, 1952, p. 43; Michael D. Hall and Wendy Connors, *Captain Edward J. Ruppelt: Summer of the Saucers—1952*, Rose Press, 2000, pp. 159–160; Michael Hall, "Was There a Second Estimate of the Situation?" *IUR* 27, no. 1 (Spring 2002): 10–11)

1952, September 26 — 11:16 p.m. The pilot and crew of a USAF C-124 see two distinct green lights to the right and slightly above the plane, about 400 miles north-northwest of the Azores Islands. At one point, they appear to turn toward the plane. They remain visible until the plane sights the islands. (NICAP, "Air Crews Observe Green Lights"; Sparks, p. 174)

1952, September 27 — 9:00 p.m. Five witnesses observe an illuminated, cigar-shaped object flying above the RAAF Woomera Range Complex in South Australia during an open-air movie screening. Warrant Officer E. J. V. Hanley watches a lighted object with a spurting light at the rear, traveling horizontally from west to east. Another officer describes it as "lit up like a neon light with a haze around it." It is whitish in color with the exhausts "yellowish or cream." The Black Vault, [Woomera case documents]; Coulthart 2023, pp. 42–43)

1952, September 27–28 — Throughout West Germany, Denmark, and southern Sweden, there are widespread UFO reports. A luminous object with a comet-like tail is seen moving irregularly near Hamburg and Kiel, Germany. Once, three satellite objects are reported moving around a larger object. A cigar-shaped UFO moving silently eastward is also seen. (UFOEv, p. 163)

1952, September 28 — 2:00 p.m. Williamson, Streeter, and Bailey attempt to meet the saucer intelligences for a landing somewhere in the Arizona desert, but apparently get lost. They return to Streeter's home, where the radio sends sinister-sounding messages about the radio being dangerous, a man coming, and Streeter having a deep secret (perhaps that Streeter has attempted psychic contact once before in 1950). (George Hunt Williamson and Alfred C. Bailey, *The Saucers Speak!* New Age, 1954; Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 22)

1952, September 28 — 8:35 p.m.–10:09 p.m. USAF radar operator A/3c Carlton L. Hall, stationed on the southwest coast of Tsushima Island, Japan, notices unusual targets on six separate occasions, each time for a duration of 2–4

sweeps. On two separate outbound tracks from Itazuke Air Base [now Fukuoka Airport], a series of targets appear directly behind aircraft when entering an azimuth of 50°–70° from nearby Tsutsusaki Lighthouse. The objects appear as normal aircraft but are rounder in shape, trailing about 2–3 miles to the rear of the aircraft. A/2c Warren D. Grovenstein also observes four of these anomalies with Hall. ([Blue Book report])

1952, September 29 — 6:30 p.m. Capt. Dursemaine, commanding officer of the Gendarmerie Maritime en Allemagne, watches a luminous, egg-shaped object with a black spot in its center flying at an altitude of 3.7 miles above his home 1.2 miles south of Mainz, Rhineland-Palatinate, Germany. It emits a low-pitched hum and white exhaust. (Jan Aldrich)

1952, September 30 — 10:30 a.m. A North American Aviation Company film crew, headed by Dick Beemer, is at Edwards AFB in southern California to film some tests. They are at Rogers Dry Lake when a B-29 passes overhead. Cameraman Carlos Garcia sees an unusual object moving near the plane. A second object appears. Soon the whole crew is looking up. Beemer says the objects are silent, leave no vapor trail, take turns maneuvering around each other, and look like "flattened spheres." They have a color motion picture camera with them, but the UFOs are too near the sun. (UFOEv, pp. 57–58)

1952, Fall — Evening. Paul Solem has his second contact with a flying saucer around the Lost River Sinks a few miles from his ranch in Howe, Idaho. After watching a metallic object land, Solem sees a man with long blond hair and dressed in a white uniform standing next to it. He tells Solem to call him "Paul 2." He says he is from Venus and tells Solem to work with Indians in North America in preparing for a postapocalyptic social order. This will be the first of many contacts for Solem. Over the next 17 years he wanders through the western states, speaking with Indians and contactees, gathers a small group of followers, and generally avoids the limelight. (Clark III 1094; Clark IV 1210–1211)

1952, October — The first number of Albert K. Bender's *Space Review* is published. (*Space Review* 1, no. 1 (October 1952); Clark III 189; Eghigian, *After*, p. 97; Clark IV 225)

1952, October — Opal Church is driving with her nephew in a car between Salem and Corvallis, Oregon, when they see an 8-foot, heavily built figure walking with "fluid movements" along the road. It is wearing an Arab-style headdress and a uniform, with gloves and boots, of fine metallic mesh. A ribbed belt surrounds the waist. Its face is pale and the huge round eyes, nearly 3 inches in diameter, glow. Inside them are reticulations "resembling the filament in old electric light bulbs." Church turns around immediately, but the figure is gone, even though the terrain is flat. (Center for UFO Studies, HUMCAT Index 1952–1953, p. 28; Clark III 267; Clark IV 307)

1952, October — Andrija Puharich, a medical doctor interested in parapsychology, discovers that a person's ESP abilities are enhanced when they are placed inside a Faraday cage. His experimental subject is none other than gifted psychic Eileen J. Garrett, whom he has tasked with clairvoyantly perceiving cosmic ray bursts of sufficient magnitude to trigger a signal in a detector. (Michael D. Swords, "Strange Days, Part 2," *IUR* 32, no. 2 (December 2008): 8)

1952, October — Stanley Glickman, an American artist living in Paris, France, joins a group of fellow Americans at a café, one of whom is CIA mind-control and poison specialist Sidney Gottlieb. A heated political debate ensues, and when Glickman decides to leave, he is offered a drink to soothe ill feelings. Gottlieb surreptitiously slips LSD into Glickman's drink and it derails his life. Glickman suffers a complete mental breakdown from which he never recovers. In 1977, he learns about Gottlieb and CIA's LSD experiments on unwitting involuntary subjects from the Kennedy congressional hearings. Glickman sues in 1981, but the trial is delayed 17 years on technical grounds, by which time Glickman has died in 1992. His sister, Gloria Kronisch, pursues the case in the US Court of Appeals, Second Circuit, as his executrix in 1998, but it is thrown out on July 9 because the statute of limitations has passed. (*Kronisch v. United States*, US Court of Appeals, 2d Circuit, July 9, 1998; H. P. Albarelli Jr., *A Terrible Mistake: The Murder of Frank Olson and the CIA's Cold War Experiments*, Trine Day, 2009)

1952, October — A survey conducted by the Netherlands Institute of Public Opinion (NIPO) shows that 92% of the Dutch public has heard of flying saucers, but 43% have no idea what they represent. ("Vliegende Schotels," *Het Neiews,* November 10, 1952, p. 3; Eghigian, *After*, p. 109)

1952, October — Evening. Aeronautical engineer and former Project Sign liaison Alfred Loedding and his wife Marion see an odd object while driving near Plainsboro, New Jersey. At first, they think it is an aircraft crashing, but the object levels off and flashes away at high speed, emitting a bluish-green light. He estimates it is 100 feet in diameter and 500–600 feet high, and it gives off a "weird light like looking at a firefly" while changing shape. Loedding says Rep. L. Gary Clemente (D-N.Y.) is also a witness. ("Flying Saucer Design Practical, WADC Aid Says; U.S. Interested," *Dayton (Ohio) Journal Herald,* August 9, 1957, p. 13)

1952, October 2? — Shortly before 7:00 a.m. One Thursday this month, Johannes Nordlien is waiting for coworkers when he hears a howling sound. A white, saucer-shaped object, 13 feet in diameter, comes in from the west at high

speed and passes him only 325 feet away. It falls with a violent splash into the river Lågen [Gudbrandsdalslågen?] in Norway. When his colleagues show up, the water is still roiling. (Ole Jonny Brænne, "Observations of Unidentified Submarine Objects in Norway," *IUR* 20, no. 1 (Jan./Feb. 1995): 12; Dolan, USO1, 159–160)

1952, October 2 — CIA Office of Scientific Intelligence Director H. Marshall Chadwell writes a memorandum to Director of Central Intelligence Walter Bedell Smith recommending he advise the National Security Council that more research is needed on UFOs to investigate their national security threat, both "mass psychological" aspects and the vulnerability of the US to an air attack. (H. Marshall Chadwell, "Flying Saucers," October 2, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Good Above, pp. 509–510)

1952, October 6 — 7:20 p.m. A couple driving along the Boulevard Guañajibo in Mayagüez, Puerto Rico, notice a bright white light above the ocean moving southwest. They continue south to Punta Guañajibo, where the object appears to be west of Cabo Rojo. It remains motionless for a few minutes, changing colors from white to red, then green, blue, and back to white. The man notes a reflection on the water from the object. After 5 minutes, it either disappears beyond the horizon or into the water, but a glow remains in the spot for about 20 minutes. The object reappears as a bright point of red light and moves northwest, low above the water, in a random and unstructured pattern, including zigzags. It disappears around 8:00 p.m. (Carl Feindt, "Report #1162," waterufo.net; Dolan, USO1, 160–161)

1952, October 9–11 — At the Optical Society of America meeting in Boston, Massachusetts, J. Allen Hynek presents a paper on "Unusual Aerial Phenomena," in which he expresses skepticism for most reports, except for nocturnal lights that do "not appear to be readily explainable on an astronomical basis, or by mirages, balloons, or by conventional aircraft." Astronomer Donald Menzel presents a dismissive paper on radar angels and mirages, while Urner Liddel presents "Phantasmagoria or Unusual Observations in the Atmosphere," dismissing UFO reports as mass hysteria, fear psychosis, and sensation-seeking. (J. A. Hynek, "Unusual Aerial Phenomena," *Journal of the Optical Society of America* 43 (1953): 311–314; Urner Liddel, "Phantasmagoria or Unusual Observations in the Atmosphere," *Journal of the Optical Society of America* 43 (1953): 314–317; Loren E. Gross, *UFOs, a History: 1952, September/October*, The Author, 1986, pp. 68–69; Graff 97–98)

1952, October 10 — Battelle issues its sixth status report on Project Stork. UFO reports through 1951 have been coded and put on IBM punch cards. About 60% of the reports have been evaluated. The panel has looked at two films and soil and vegetation samples from cases in Florida and Pittsburg, Kansas. The witness questionnaire is further refined and will become the basis for Project Blue Book's form. ("Seven Status Reports for Project Stork, Part 3," CUFON; "Seven Status Reports for Project Stork, Part 4," CUFON)

1952, October 11 — A Ground Observer Corps spotter sees a disc hovering in one spot for 20 minutes over Newport News, Virginia. When two interceptors arrive from Langley Air Force Base, the object tilts up, accelerates, and shoots away. (UFOEv, p. 150)

1952, October 12 — Harold H. Fulton founds Civilian Saucer Investigation (New Zealand) in Auckland. It begins publishing a quarterly newsletter, *Flying Saucers*, in May 1953, which continues until September 1959 with a name change in 1958 to *Space Probe*. (*Flying Saucers* 1, no. 1 (May 1953); *Space Probe*, Christmas 1958)

1952, October 13 — James Q. Reber, assistant director of CIA intelligence coordination, writes a memo to the CIA deputy director of intelligence, arguing that fundamental research into the question of positive identification is the responsibility of the Defense Department and that while investigating Soviet knowledge of UFO phenomena is a "primary concern" for the CIA, it "is far too early in view of the present state of our knowledge regarding Flying Saucers for psychological warfare planners to start planning how the United States might use U.S. Flying Saucers against the enemy." Reber goes on to recommend that when "intelligence has submitted the National Estimate on Flying Saucers there will be the time and basis for a public policy to reduce or restrain mass hysteria." (James Q. Reber, "Flying Saucers," October 13, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996)

1952, October 13 — 7:08 p.m. USAF pilot Maj. William D. Leet and his engineer, flying a C-54 troop carrier, watch an elliptical UFO hovering in clouds near Oshima, Japan. It speeds away after 7 minutes. (UFOEv, p. 24)

1952, October 14 — OSI Deputy Assistant Director Ralph L. Clark writes a memorandum for the record suggesting a meeting on October 20 or 21 to work out a research and intelligence program on UFOs. (Ralph J. Clark, "Flying Saucers Problem," October 14, 1952)

1952, October 16 — George Hunt Williamson is in a state of panic from the messages he and the Baileys have received from space people. He writes to an associate doing missionary work in Guatemala that disaster will strike the earth before December 1. He says radio contacts have stopped and that he has been told there will be a direct contact with a spaceman: "Professor George Adamski is in on this too." The Baileys have already met with Adamski (in August) and now the messages are urging another meeting with him. (Y. N. ibn Aharon [Yonah

Fortner], "Diagnosis: A Case of Chronic Fright," *Saucer News* 4, no. 5 (Aug./Sept. 1957): 3–6; Clark III 1284; Clark IV 1467)

1952, October 17 — The 4602d Air Intelligence Service Squadron is reorganized to increase its strength. (CUFON, "4602d AISS Unit History Sampler")

1952, October 17 — Early afternoon. Residents of Oloron-Sainte-Marie, Pyrénées-Atlantiques, France, see a large cigar-shaped structure in the blue sky, inclined at a 45° angle. The witnesses include the family of Yves Prigent, general superintendent of the local high school. A plume of white smoke is seen escaping from its upper end. At some distance in front of the cylinder, about 30 round, puffy objects with a central red spot are following the same trajectory. The smaller objects move in pairs following a broken, zig-zag path. They leave an abundant trail of a white substance (angel's hair) behind them, which slowly falls to the ground as it disperses. For several hours, clumps of it hang on the trees, on the telephone wires, and on the roofs of houses. ("Les Soucoupes Volantes vues à Oloron le 17 Octobre," *France-Dimanche,* October 26, 1952, in *The Spectrum of UFO Research,* CUFOS, 1988, p. 114; "Strange Craft Litters French Town with Thread-Like Substance," *Civilian Saucer Investigation Quarterly Bulletin*1, no. 2 (Winter 1953): 4–5; Jimmy Guieu, *Flying Saucers Come from Another World,* Hutchinson, 1956, pp. 87–92; Jacques Vallée and Janine Vallée, *Challenge to Science: The UFO Enigma,* Regnery, 1966, pp. 120–121; Patrick Gross, "Documents: Found in the Attic"; Loren E. Gross, *UFOs, a History: 1952, September–October*, The Author, 1986, pp. 73–74; Lotharson, "Unidentified Flying Spiders in Southern France?" Shards of Magonia, March 12, 2017; Clark III 123; Clark IV 150–151)

1952, October 18 — 9:44 p.m. Journalist Keith Hooper is returning home from an assignment for the *Adelaide Advertiser* when he sees a greenish-white, cigar-shaped object about the size of a Boeing 707 some 10 miles away over the Adelaide Hills, South Australia, moving southeast to northwest. The object makes a sharp, right-angle turn upward, recedes, then vanishes at tremendous speed. The duration is 5–7 seconds. (Keith Hooper, "My Flying Saucer," *Sydney (N.S.W.) Morning Herald,* March 13, 1965, p. 13)

1952, October 21 — Afternoon. Flight Lt. Michael Swiney and a student pilot, Royal Navy Lt. David Crofts, are flying a Meteor T.7 trainer out of RAF Little Rissington, Gloucester, England, for a high-altitude navigation exercise at 35,000 feet. Not long after breaking out of a cloud during a climb at 13,000–14,000 feet, they see three circular, white objects in front of them. As the aircraft get closer and turns to avoid them, the objects become visible as discs. They disappear quickly when the pilot looks away briefly. Two Meteor F.8 fighters are scrambled from RAF Tangmere [now closed] in West Sussex to chase three unknown radar targets moving at 3,000 mph but fail to intercept them. (Wikipedia, "Little Rissington UFO incident"; David Clarke and Andy Roberts, *Out of the Shadows,* Piatkus, 2002, pp. 98–102; UFOFiles2, pp. 47–49; David Clarke, "What on Earth Is Going On?" *Fortean Times* 445 (June 2024): 32)

1952, October 23 — Ruppelt holds a briefing on UFOs at Los Alamos Scientific Laboratory, New Mexico. Afterward Assistant Director for Scientific Personnel William H. Crew arranges a special meeting for Ruppelt and Col. Bower with seven people from the laboratory. Several of them have evidence that there is a possible correlation between sightings of UFOs and unusual radiation detection. (Edward J. Ruppelt, [Message referring to a December 1 telephone call], December 2, 1952)

1952, October 24 — President Truman signs National Security Council Directive 6, a 7-page document that eliminates the Armed Forces Security Agency formed in 1949 to unite all military signal intelligence operations and creates the National Security Agency. Since the memo is a classified document, the existence of the NSA is not known to the public. Due to its ultra-secrecy the US intelligence community refers to the NSA as "No Such Agency." The NSA is responsible for global monitoring, collection, and processing of information and data for foreign intelligence and counterintelligence purposes. NSA inherits Project Shamrock from the AFSA. It also inherits collection of UFO data, at least by 1958, but probably in 1953. (ClearIntent, p. 189; Thomas L. Burns, *The Origins of the National Security Agency, 1940–1952*, National Security Agency, 1990, pp. 97–99; Clark III 795; Clark IV 875)

1952, Late October — Night. Radioman Tom Kramer is serving aboard the USS *Curtiss*, the AEC flagship for Ivy Mike, the first detonation of a hydrogen bomb at Elugelab Atoll in the Marshall Islands. After an onboard movie, Kramer and other crewmen see a round, silent, bright white light that is motionless at first, then starts zigzagging for less than 10 seconds and takes off at high speed. (Nukes 100–101)

1952, Late October — 3:45 a.m. Seaman Abelardo Marquez, posted on the USS *Fletcher* near Eniwetak Atoll for the upcoming Ivy Mike thermonuclear test, is going on duty to the bridge when he notices that the ship is uncharacteristically moving at full speed. Other crew members tell him it is because of a round white light that has been moving above the ship. Marquez sees it descending, then it stops and hovers about 40°–45° above the horizon and perhaps one-half mile from the ship. Capt. Grover L. Rawlings is talking with other officers on the bridge, saying they do not know what the light is, and that is not tracked on radar. After about 4–5 minutes, the light takes off straight up at the same speed it had descended. (Nukes 101–105)

1952, October 27 — 2:03 a.m. Customs officer Gabriel Gachignard observes a cigar-shaped object land briefly on a runway of the airport at Marignane, Bouches-du-Rhône, France, 300 feet away, producing a dull sound. The object is dark with four lighted windows. It takes off with a "swish" and a shower of sparks when he runs toward it. (Jimmy Guieu, *Flying Saucers Come from Another World*, Hutchinson, 1956, p. 53; Michel, *The Truth about FS*, pp. 152–156; Jacques Vallee and Janine Vallee, *Challenge to Science: The UFO Enigma*, Regnery, 1966, pp. 6–11; Loren E. Gross, *UFOs, a History: 1952, September–October*, The Author, 1986, pp. 82–84; Clark III 243–244; Clark IV 283–284)

1952, October 27 — An FBI memorandum to Alan H. Belmont from Victor P. Keay reports that "Air Intelligence still feels that the so-called flying saucers are either optical illusions or atmospheric phenomena. He pointed out, however, that some Military officials are seriously considering the possibility of interplanetary ships." (V. P. Keay, "Flying Saucers," October 27, 1952)

1952, October 27 — 4:00 p.m. Residents of Gaillac, Tarn, France, see a formation of 16 disc-shaped UFOs ranged in twos. An elongated cylinder is in the center of the objects, all of which are discharging angel's hair like glass wool. (Aimé Michel, *The Truth about FS*, p. 148; Loren E. Gross, *UFOs, a History: 1952, September–October*, The Author, 1986, pp. 84–85; Lotharson, "Unidentified Flying Spiders in Southern France?" Shards of Magonia, March 12, 2017)

1952, October 29 — 5:10 a.m. Two USAF F-94 crews see a white luminous object maneuvering at high speed for 20 minutes above Hempstead, Long Island, New York. Lt. David H. Goodnough, with the cooperation of Lt. Doyle C. Williams, writes: "Based on my experience in fighter tactics ... it is my opinion that the object was controlled by something having visual contact with our aircraft. The power and acceleration abilities were beyond the capabilities of any known United States aircraft." (NICAP, "Two F-94's Encounter Controlled Object"; Sparks, p. 177)

1952, October 31 — 7:40 p.m. USAF Lieut. James E. Allen sees an orange, blimp-shaped object as he is driving 4 miles south of Fayetteville, Georgia. It appears in the north at treetop level about 600 feet away and is traveling toward him at 60–70 mph. He estimates it is about 80 feet long and 20 feet wide. As it passes over his car at an altitude of 500 feet, his radio fades out. He gets out of the car and watches it linger overhead about 20 seconds, tilt at a 45° angle, then shoot away to the east at high speed. (NICAP, "Close Encounter with Maneuvering 'Blimp,'"; Sparks, p. 177; *Hynek UFO Report*, pp. 191–192)

1952, November — Aladino Félix and a friend are climbing a hill near Angatuba, São Paulo, Brazil. When they get to the top, Félix claims they see numerous UFOs flying around. Félix comes back another day by himself; eventually a saucer lands and he is invited inside to meet its crew and examine the technology. Several months later, he is visited at his home in São Paulo by the saucer captain, who claims to come from one or two of the satellites of Jupiter. Félix, under the pseudonym of Dino Kraspedon, writes about his various conversations with the spaceman in *Meu Contato com os discos voadores* in 1957. He writes other mystical and religious tracts under the names Dunatos Menorá and Sábado Dinotos. In 1967–1968, Félix is operating a right-wing terrorism group that sets off bombs, steals arms and explosives, and robs a bank. He serves three years in prison. (Dino Kraspedon, *My Contact with Flying Saucers*, Neville Spearman, 1959; "Dino Kraspedon," *Flying Saucer Review* 15, no. 1 (Jan./Feb. 1969): 32; Zirger and Martinelli, *The Incredible Life of George Hunt Williamson*, Verdechiari, 2016, pp. 164–165; Clark III 661–662; Dom Phillips, "Brazil Cult Leader Who 'Contacted Aliens' Backed Dictatorship with Terror Attacks, Documents Show," *The Guardian* (UK), October 3, 2018; Eghigian, *After*, p, 137; Clark IV 737)

1952, November 1 — Nuclear test Ivy Mike is the first successful full-scale test of a multi-megaton thermonuclear weapon ("hydrogen bomb") using the Teller-Ulam design the size of an airplane hangar. Unlike later thermonuclear weapons, Mike uses deuterium as its fusion fuel, maintained as a liquid by an expensive and cumbersome cryogenic system. It is detonated on Elugelab in the Marshall Islands yielding 10.4 megatons, almost 500 times the yield of the bomb dropped on Nagasaki. The fireball is 3 miles wide and completely destroys the atoll. USAF Capt. Jimmy Priestly Robinson of the 561st Fighter-Day Squadron, is lost near the end of his mission to successfully pilot his F-84G through the mushroom cloud's stem to collect radiochemical air samples. After re-emerging from the cloud, both he and his wingman, pilot Captain Bob Hagan, encounter difficulties picking up navigational beacons due to "electromagnetic after effects" of the detonation. By the time they are successful in finding the signal four hours later, they are dangerously low on fuel, and before reaching the runway, both have depleted their reserves. While Hagan is able to glide to the runway and achieve a hard landing, Robinson is too far out to follow the same path and therefore attempts to land on water. Neither his plane nor his body has ever been found; his family only learned the truth in 2008 after repeated FOIA requests. (Wikipedia, "Ivy Mike")

1952, November 4 — Capt. Edward J. Ruppelt and Lt. Robert M. Olsson visit Col. John R. Hood Jr., AMC chief of the Nuclear Powered Aircraft Branch of Wright Air Development Center. Hood had contacted ATIC in December 1950 in regard to certain sightings of UFOs at Oak Ridge National Laboratory, Tennessee, in which he and a naval officer attempted to obtain correlation between sightings and peaks in radiation backgrounds. Now there are indications that there may be some correlation present between unknown radar pickups and rises in radiation, and he suggests that ATIC begin an instrumented radiation program. (Patrick W. Hayes, "Unconventional Aircraft," Spot Intelligence Report, December 1950; "Visit to WADC," November 4, 1952)

1952, November 4 — The National Security Agency is established in Fort Meade, Maryland, in a memo by Secretary of Defense Robert A. Lovett, making the new agency responsible for all communications intelligence. The existence of the NSA is not known to the public at this time. (Wikipedia, "National Security Agency")

1952, November 4–6 — The Baileys and Williamsons come up together for a visit to the Palomar Gardens Café. Adamski tells them he has been making special trips into the desert in hopes of meeting a saucer. Soon Adamski begins channeling space messages in the presence of the Williamsons and the Baileys. At one of these sessions, a space being declares that a face-to-face meeting will take place soon. Williamson and Bailey ask Adamski to call them before he attempts his next contact. (Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 23; Zirger and Martinelli, *The Incredible Life of George Hunt Williamson,* Verdechiari, 2016, p. 357)

1952, November 5 — Dwight D. Eisenhower is elected president.

1952, November 6 — Soviet Presidium member Mikhail Peruvkhin states during a speech at a meeting celebrating the 35th anniversary of the Revolution that Americans are fantasizing "flying saucers" and "green fireballs," which are inspired by their war-mongering "military psychosis." (*Pravda,* November 7, 1952; *Literaurnaya Gazeta,* Moscow, November 7, 1952; Mikhail Gershtein, "A Short History of UFO Research in the Former Soviet Union," UAP Check, July 6, 2024)

1952, November 10 — Battelle's Project Stork notes in its seventh status report that current UFO reports "are now in more detail and often consist of sightings of one object by more than one individual." 500 copies of a final version of the sighting questionnaire are delivered to ATIC at Wright-Patterson AFB in Ohio. It expects to have all UFO reports dated before June 15, 1952, processed and evaluated by December 10, ready for IBM analysis later. ("Seven Status Reports for Project Stork, Part 4," CUFON; Clark III 929; Clark IV 1039)

1952, November 16 —Around 5:00 p.m. An air traffic controller at Florence Airport, South Carolina, watches a huge, gleaming disc through binoculars and sees it tilt up sharply before climbing out of sight. About 6 minutes later, people see a group of round, glowing objects north of Landrum, South Carolina. David S. Bunch takes 40 minutes of film with an 8mm camera and telephoto lens before the UFOs disappear to the west. Keyhoe reviews the film along with some Air Force officers. It shows five glowing, oval-shaped objects. (Sparks, p. 180; [film], Project Blue Book, National Archives; Keyhoe, *FS from OS*, pp. 4–5; UFOEv, p. 89)

1952, November 18 — Date of the fake four-page "Briefing Document: Operation Majestic 12. Prepared for President-Elect Dwight D. Eisenhower: Eyes Only." It states that UFOs are the product of an extraterrestrial civilization, that several had crashed and came into the possession of the US government, and that the US had custody of an alien for some time before it died. It says that Truman established the MJ-12 group in 1947. Called Majestic-12, the group supposedly consists of CIA Director Roscoe Hillenkoetter, Vannevar Bush, Secretary of Defense James Forrestal (replaced by Gen. Walter Bedell Smith in 1950), Gen. Nathan Twining, Gen. Hoyt Vandenberg, Detlev Bronk, Jerome Clarke Hunsaker, Sidney Souers, Gordon Gray, Donald Menzel, Gen. Robert Miller Montague, and Lloyd Berkner. ("Briefing Document: Operation Majestic-12, Prepared for President-Elect Dwight D. Eisenhower (Eyes Only)," November 18, 1952; Stanton T. Friedman, "MJ 12: The Evidence So Far," *IUR* 12, no. 5 (Sept./Oct. 1987): 13–17; Good Above, pp. 257–260, 544–550; Joe Nickell and John R. Fischer, "The Crashed-Saucer Forgeries," *IUR* 15, no. 2 (Mar./Apr. 1990): 4–20)

1952, November 18 — President-Elect Eisenhower receives a 43-minute national security briefing on matters that are still classified. Gen. Nathan Twining, Gen. Omar Bradley, Adm. William Fechteler, Gen. J. Lawton Collins, Gen. Lemuel C. Shepherd Jr., and Secretary of Defense Robert A. Lovett are present. (Stanton T. Friedman, "MJ 12: The Evidence So Far," *IUR* 12, no. 5 (Sept./Oct. 1987): 16)

1952, November 18 — George Adamski telephones George Hunt Williamson and tells him that the space people have informed him a physical encounter will take place on November 20. (Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 23; Zirger and Martinelli, *The Incredible Life of George Hunt Williamson,* Verdechiari, 2016, p. 358; Clark III 1284; Clark 1467)

1952, November 19 — Pilot J. Slade Nash reaches 698.5 mph in a North American F-86D Sabre over the Salton Sea, California. (Bryan R. Swopes, "19 November 1952," This Day in Aviation, 2018)

1952, November 20 — Morning. George Adamski and two associates, Lucy McGinnis and Alice Wells, drive out from the Palomar Gardens Café. They meet the Williamsons and the Baileys at Blythe, California, at 8:00 a.m., and

they drive to Desert Center, California, taking Desert Center Rice Road 117 toward Coxcomb Mountain. (Zirger and Martinelli, *The Incredible Life of George Hunt Williamson,* Verdechiari, 2016, p. 358; Clark III 1284; Clark IV 1467–1468)

1952, November 20 — 1:00 p.m. Adamski's group picnics along the roadside. At 1:30 p.m., they see a cigar-shaped UFO that appears shortly after a US Air Force B-29 passes overhead going in the direction of Parker, Arizona. Adamski asks Lucy McGinnis, accompanied by Alfred Bailey, to drive him a bit more than half a mile away to a flatter area near the foot of Coxcomb Mountain where he can set up his telescope. The cigar-shaped UFO is allegedly following them. (Zirger and Martinelli, *The Incredible Life of George Hunt Williamson,* Verdechiari, 2016, pp. 54–56, 358–359)

1952, November 20 — 1:57 p.m. Adamski stays behind to set up his equipment as McGinnis and Bailey return to the rest of the group. At 2:04 p.m., another UFO, this time a "Scout ship," appears near Adamski, who takes seven photos through his telescope. The cigar-shaped UFO is still visible through binoculars. At 2:12 pm., Adamski takes three more photos of the Scout ship with a Kodak Brownie before it disappears behind a hill. Air Force jets circle the area at least twice. (Zirger and Martinelli, *The Incredible Life of George Hunt Williamson,* Verdechiari, 2016, pp. 359–360)

1952, November 20 — 2:15 p.m. As he is packing up his telescope, Adamski sees a man waving to him from about a quarter-mile away. He walks over to him and meets an entity named Orthon as his 6 companions watch from a distance. Adamski writes, "I fully realized I was in the presence of a man from space." Five-and-a-half feet tall, Orthon [could Adamski have thought of this name from Kodak Ortho film?] is a beautiful being with long blond hair and an extremely high forehead. Through gestures, sign language, a few words, and telepathy, Adamski learns that he is from Venus and the Venusians are visiting earth out of concern for nuclear weapons: "The presence of this inhabitant of Venus was like the warm embrace of great love and understanding wisdom." The conversation lasts about 45 minutes. Orthon declines to be photographed but asks Adamski to borrow one of his unexposed photos. After Orthon leaves in his Scout ship around 3:04 p.m., Adamski finds tracks in the desert floor. His companions rejoin him at the site. Around 3:45 p.m., Williamson takes casts with plaster of paris, either as instructed by Adamski or which he just happens to carry with him in case he runs into a stray bone. Each track contains within it a distinct set of symbols. After several hours of assessing the situation and waiting for the plaster to dry, the group returns to Desert Center, California. (Desmond Leslie and George Adamski, *Flying Saucers Have Landed,* British Book Centre, 1953, pp. 185–215; James W. Moseley, "Some New Facts about 'Flying Saucers Have Landed,'" *Nexus* 2, no. 1 (January 1955): 7–17; James W. Moseley, "Special Adamski Exposé Issue," *Saucer News*, no. 27 (October 1957); Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (August 2006): 23; Michael D. Swords, "Adamski in the Desert," *IUR* 31, no. 3 (October 2007): 22; Curt Collins, "Saucer News Presents: The George Adamski Exposé," In Honor of James Moseley, May 30, 2014; Adamski Foundation, "The Landing"; Zirger and Martinelli, *The Incredible Life of George Hunt Williamson,* Verdechiari, 2016, pp. 41–89, 360–362; Rene Erik Olsen, [George Adamski photo analysis], Adamski Foundation; Marc Hallet, *A Critical Appraisal of George Adamski: The Man Who Spoke to the Space Brothers,* The Author, 2016; Clark III 39–40, 1284; Eghigian, *After*, pp. 119–124; Clark IV 57–59, 1468)

1952, November 20 — 9:00 p.m. The Williamsons and the Baileys, with Adamski's permission, drive to Phoenix, Arizona, and tell the story of their contact to reporters at the *Phoenix Gazette.* (Zirger and Martinelli, *The Incredible Life of George Hunt Williamson,* Verdechiari, 2016, pp. 363)

1952, November 21–23 — An Air Force review panel meets at ATIC for three days and recommends that a "higher court" be formed to review UFOs. It schedules this tentatively for late December or early January. (Ruppelt, pp. 200–201)

1952, November 22 — 10:00 p.m. Fr. Carlos Maria, a Capuchin missionary, and five others are driving along the road to Bocaranga, Ubangi-Shari [now Central African Republic] when they notice a large disc speeding overhead. Later, they see four others, motionless. They watch the UFOs for 20 minutes, changing shape and color. (Aimé Michel, *The Truth about FS*; Jimmy Guieu [pseudonym of Henri René Guieu], *Les soucoupes volantes viennent d'un autre monde,* Fleuve Noir, 1954; ClearIntent, pp. 128–129)

1952, November 24 — Andrija Puharich, invited by an Army colonel friend who is chief of the Research Section of the Office of the Chief of Psychological Warfare, delivers a lecture on ESP to high-ranking Pentagon officers in the Army's Psychological Warfare Research Section and the Air Force's Office of Special Investigations. Col. Howard M. McCoy is probably present. (Michael D. Swords, "Strange Days, Part 2," *IUR* 32, no. 2 (December 2008): 8; Nick Redfern, *The Pyramids and the Pentagon,* New Page, 2012, pp. 118–119)

1952, November 24 — The first printed account of the encounter with Orthon appears in the *Phoenix (Ariz.) Gazette*. The newspaper publishes one of Adamski's photos as well as a photo of the Williamsons and the Baileys. Adamski becomes instantly famous, and Williamson moves to Palomar Gardens for several days. When he tells Adamski

he is planning to write a book about his channelings and contacts, Adamski warns him not to mention that the contacts have been largely psychic. Adamski discourages him and they have a falling out. Alfred C. Bailey later says he has seen neither spaceship nor spaceman and doubts that anyone else has either. ("Flying Saucer 'Passenger' Declares A-Bomb Blasts Reason for Visit," *Phoenix (Ariz.) Gazette*, November 24, 1952, p. 1; Zirger and Martinelli, *The Incredible Life of George Hunt Williamson*, Verdechiari, 2016, pp. 45–52, 99, 358–363; "Palomar Mountain, 1940–1960: From Obscurity to World Fame," The Adamski Case, September 22, 2019)

1952, November 25 — ATIC Col. Donald L. Bower and Maj. Dewey Fournet brief CIA consultants Frederick C. Durant and Edward Tauss on Blue Book's top three cases: the Tremonton UFO film of July 2; a dubious sighting of an object seen at Presque Isle and Limestone AFB [now Loring International Airport], Maine, on the night of October 10–11 (which Hynek has already explained as a theodolite miscalibration causing Jupiter and its 4 prominent moons to be visible); and the problematic Florida scoutmaster case of August 19. USAF wants the CIA to think these are good cases until they unravel at the proposed Robertson Panel meeting. (CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Clark III 1014; Clark 1128)

1952, November 25 — 6:05 p.m. Two objects traveling at an estimated speed of 275 mph are detected by radar attached to antiaircraft guns in the Panama Canal Zone. The objects remain over the Canal Zone until 11:42 p.m., maneuvering from 1,000 feet to 28,000 feet in altitude. Three Air Force bombers and a Navy patrol plane were sent up but were unable to catch the elusive objects. (NICAP, "Two Objects Tracked by A/A Gun Radar"; "Sky Objects Mystify Canal Zone," *Washington (D.C.) Post*, December 21, 1952; Condon, pp. 168–170)

1952, November 26 — 5:56 p.m. An F-94B from the USAF 59th Fighter-Interceptor Squadron at Goose Bay AFB [now CFB Goose Bay], Labrador, for 15 minutes chases a maneuverable object that changes color from white to red, heading south or southwest. The fighter gets a brief radar lock-on. (Sparks, p. 181; Loren E. Gross, *UFOs, a History: 1952, November–December*, The Author, 1986, p. 44)

1952, November 30 — 12:30 a.m. Numerous slow-moving 90–100 mph radar targets appear on the MEW VG-2 radar at Washington National Airport in Washington, D.C. Suggestive of anomalous propagation, but they are unlike the July 1952 cases since there is no visual confirmation, no other radars confirming, and no fighters scrambled. A pilot at 6,000 feet sees nothing. CAA Senior Airways Specialist Austin M. Stapf claims the same thing was observed at same time on November 29, and that the Andrews AFB watch supervisor could not visually confirm targets over Andrews displayed on the ARTCC radar scope. (Sparks, p. 181)

1952, December — Maj. Dewey Fournet completes a study of UFOs to assess whether their motions are random or ordered. He concludes that their reported movements show that UFOs are under intelligent control and demonstrate precision flying. He prepares a handout that will support his presentation to the Robertson Panel when it meets. The informal study is considered secret and only the handout survives. (Ruppelt, pp. 189–190; Michael D. Swords, "Intelligent Motions," *IUR* 33, no. 1 (March 2010): 8–15)

1952, December — *True* magazine publishes another article on UFOs by Donald Keyhoe that demolishes the temperature inversion theory for radar sightings publicized by astronomer Donald H. Menzel. (Donald E. Keyhoe, "What Radar Tells about Flying Saucers," *True*, December 1952, pp. 25–27, 94–99)

1952, December — Work on the planning phase of the Air Force's instrumentation program is completed. ATIC has considered everything from giving Ground Observer Corps spotters simple tracking devices to building special radars and cameras. The final plan calls for establishing visual spotting stations equipped with tracking devices that would record a UFO's azimuth and elevation angles all over northern New Mexico. The stations would be linked with a phone system and tied into the existing radar defense net in the Albuquerque–Los Alamos area. The plan would initially cost $250,000 using as much surplus equipment as possible and $25,000 a year to operate. ATIC approves the plan and sends it on to Washington. (Ruppelt, pp. 198–199; Clark III 918; Clark IV 1028)

1952, December 2 — CIA Office of Scientific Intelligence Director H. Marshall Chadwell writes another secret memo to Director Walter Bedell Smith on UFOs: "At this time, the reports of incidents convince us that there is something going on that must have immediate attention. The details of some of these incidents have been discussed by AD/SI with DDCI. Sightings of unexplained objects at great altitudes and traveling at high speeds in the vicinity of major U.S. defense installations are of such nature that they are not attributable to natural phenomena or known types of aerial vehicles." Physicist Julius Adams Stratton and economist Max Millikan tell Chadwell that scientists at the MIT Lincoln Laboratory would like to be a part of any scientific study of the UFO phenomenon, perhaps through Millikan's MIT Center for International Studies. Stratton indicates that Lab Director Albert G. Hill should organize the study. Attached is a draft of an intelligence directive by Chadwell on behalf of Smith to the National Security Council recommending that the CIA "formulate and carry out a program of intelligence and research activities required to solve the problem of instant positive identification of unidentified flying objects." But Smith refuses to approve or sign the directive because he is briefing the president directly. (H. Marshall

Chadwell, "Unidentified Flying Objects," December 2, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; *Hynek UFO Report*, pp. 20–21; Swords 175; Clark III 1013; Clark IV 12, 1127)

1952, December 3 — In another "Flying Saucer" memo, Chadwell admits the Air Force would be suspicious of any MIT Lincoln Laboratory involvement (the Beacon Hill Group), and that Princeton or Cal Tech would do, and that "it will be necessary to secure the full backing of the DCI in order that a scientific review of the problem may be laid on." However, he recommends that this "External Research Project Concerned with Unidentified Flying Objects" be administered by Max Millikan at the MIT Center for International Studies. (P. G. Strong, "Flying Saucers," December 3, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Swords 185–186)

1952, December 4 —The CIA Intelligence Advisory Committee recommends that "the Director of Central Intelligence will 'enlist the services of selected scientists to review and appraise the available evidence in the light of pertinent scientific theories.'" The meeting, chaired by Chadwell, is attended by Robert Amory Jr., Gen. John Samford, Rear Admiral Carl F. Espe, Gen. John M. Willems, William Park Armstrong, Walter F. Colby, Col. Edward R. Porter, and Col. Jere Boggs. This is to be done "immediately" through a National Security Council Intelligence Directive and is essentially the go-ahead for what will be the Robertson Panel. (Robert Amory Jr., "Intelligence Advisory Committee: Minutes of Meeting Held in Director's Conference Room, Administration Building, Central Intelligence Agency, on 4 December 1952," December 4, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; *Hynek UFO Report*, p. 20; Swords 184, 186–187; Clark III 1013; Clark IV 1127)

1952, December 4 — 8:46 p.m. USAF pilot Lt. Robert O. Arnold, 3640th Pilot Training Wing, Laredo AFB [now Laredo International Airport], Texas, is flying a T-28 trainer at 6,000 feet when he sees a bright bluish-white glowing object below him at about 1,500–2,000 feet and rapidly climbing to his level. It shows no navigation lights. He tightens his left turn to keep the object in view, but it suddenly climbs to 9,000 feet in several seconds and drops down to his altitude again, then stops and hovers. Arnold pursues but after 2 seconds the object suddenly heads towards him on a collision course at high speed at 8:53 p.m., wavering slightly at about 300 feet. He sees the object as a blurred reddish-bluish haze smaller than his T-28. It rapidly ascends to 15,000 feet then circles left as if positioning for another pass. In fear Arnold turns off his running lights, spirals down to 1,500 feet while keeping the object in sight as it continues to head towards him in a dive, then pulls up and climbs out of sight. A lighted weather balloon is launched at 8:53 p.m. from Laredo AFB but it is not observed near any aircraft. (NICAP, "The Laredo / 'Earl Fogle' Case"; Keyhoe, *FS from OS*, pp. 3–4, 17–18; Sparks, p. 182)

1952, December 6 — 5:24 a.m. The pilots of a USAF B-29 (1st Lt. Norman Karas and 1st Lt. William W. Naumann) over the Gulf of Mexico 100 miles south of Louisiana track five unidentified blips on the bomber's radar. They maneuver around the plane at a speed of 5,240 mph. The crew sees some flashes of light, but the targets are 20 miles or more away. The five UFOs merge with a huge blip that accelerates and vanishes at a speed of 9,000 mph. Additional crewmen involved are 1st Lt. William W. Naumann, Jr., Staff Sgt B. R. Purcell, Staff Sgt. William J. De Rause, 2nd Lt. Robert J. Eckert, and Staff Sgt. Harry D. Shogren. (NICAP, "B-29 Encounters High Speed Objects over Gulf"; Sparks, p. 183; Keyhoe, *FS from OS*, pp. 161–166; Condon, pp. 148–150; Patrick Gross, "B-29 Radar and Visual Multiple Witnesses Observations, Dec. 6, 1952")

1952, December 9 — Col. Donald L. Bower forbids Ruppelt from visiting the CIA to give its Office of Scientific Intelligence certain UFO cases in preparation for the Robertson Panel in January. CIA consultant Frederick C. Durant learns about this the same day in a phone call to Ruppelt. Shortly afterward, Ruppelt requests a transfer out of Project Blue Book, but agrees to stay on until the end of February so that a replacement can be obtained. (Frederick C. Durant, "Unidentified Flying Objects," December 9, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Ruppelt, p. 228; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, p. 47; Clark III 1014; Clark IV 1127–1128)

1952, December 10 — H. Marshall Chadwell writes to Walter Bedell Smith that OSI has been working with mathematician Howard P. Robertson of Cal Tech to establish a panel of scientists (including astronomer Thornton Leigh Page) and engineers to review the status of UFOs in January. Somewhere along the line, MIT's Lincoln Labs and CIS have been eliminated. (Thornton Page, [Letter], December 12, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; Swords 187–188)

1952, December 10 — 7:15 p.m. The pilot and radar observer of an F-94 patrolling from Moses Lake AFB [now the Grant County International Airport] spots a light over the Hanford nuclear plant near Richland, Washington, while flying at 26,000 feet. They contact the ground control station, which reports that they know of no planes in the area and that their ground radar shows nothing. They close in on the object, which is large, white, and round

and features a dim reddish light coming from two windows. They lose visual contact then get a lock-on from their ARC-33 airborne radar. As they attempt to close in, the object reverses direction and dives away. They attempt several more times to approach the light and have to alter course to avoid a collision that seems imminent. (NICAP, "F-94 R/V with Round Object"; Sparks, p. 185; Ruppelt, pp. 61–62; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 66; Condon, pp. 140–141; Center for UFO Studies, [case file]; Keyhoe, *Aliens from Space*, Signet ed., 1974, pp. 3–4; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 42–46; Patrick Gross, "Radar Visual Aircraft UFO Encounter near Hanford Nuclear Plant, December 10, 1952")

1952, December 12 — The CIA, having learned that ATIC is withholding significant case reports for the upcoming Robertson Panel, sends a three-man team to Wright-Patterson AFB in order to obtain relevant documents. The team includes Robertson himself, CIA Assistant Director H. Marshall Chadwell, and CIA rocket consultant Frederick C. Durant, a personal friend of Ruppelt who urges him to comply. At ATIC they meet with personnel from Battelle Memorial Institute in Columbus, Ohio, which has been studying the UFO data in great secrecy. Battelle requests the CIA to postpone the panel until March so they can finish the study. Robertson agrees to postpone the panel, but is later overruled by CIA Director Gen. Walter Bedell Smith. (H. Marshall Chadwell, "Unidentified Flying Objects," December 13, 1952; CUFON, "The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts," May 17, 1996; NICAP, "The 1952 Sighting Wave"; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, p. 47; Clark III 1013–1014; Clark IV 1127–1128)

1952, December 13 — Morning. George Adamski's scout ship makes a second appearance, this time at the Palomar Gardens Café in California, ostensibly so that Orthon can return the photo he borrowed. The film holder is pushed out of a porthole to the ground. One of the three Venusian photos taken by Adamski, though credited to Jerrold E. Baker, is taken secretly the day before by Adamski, probably of a model. Bill Moore claims in 1985 that the photos resemble the prototype space vehicle described in Mason Rose's *A Simplified Explanation of the Application of the Biefeld-Brown Effect to the Solution of the Problems of Space Navigation*, published in February 1952. Joel Carpenter suspects the Scout ship photo is actually a Sears and Roebuck catalog gas lantern lampshade. (Desmond Leslie and George Adamski, *Flying Saucers Have Landed*, British Book Centre, 1953, pp. 217–221; Paul E. Potter, "The Flying Saucer"; "Some New Facts about *Flying Saucers Have Landed*," *Nexus* 2, no. 1 (January 1955): 7, 13–17; James W. Moseley, "Special Adamski Exposé Issue," *Saucer News*, no. 27 (October 1957); George M. Eberhart, "Postcards with a UFO Theme," *IUR* 29, no. 2 (Summer 2004): 21; Curt Collins, "Saucer News Presents: The George Adamski Exposé," In Honor of James Moseley, May 30, 2014; Marc Hallet, *A Critical Appraisal of George Adamski: The Man Who Spoke to the Space Brothers*, The Author, 2016; Clark III 40, 594; Rene Erik Olsen, "The 13th December 1952 Photos of George Adamski Analysis," April 23, 2019; Rene Erik Olsen, [George Adamski photo analysis], Adamski Foundation; Clark IV 59, 654)

1952, December 15 — 7:15 p.m. Two Air Force pilots get a momentary lock on a strange object above Goose Bay, Labrador. A T-33 and an F-94B (piloted by Capt. E. T. Johnson and Radar Observer Lt. H. S. Norris) see a bright red and white light. (NICAP, "Momentary Lock On"; Sparks, p. 186; Condon, pp. 126–127; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 46–48)

1952, December 16 — Chadwell tells CIA Acting Deputy Director for Intelligence Robert Amory Jr. that he is unimpressed with the three Blue Book cases, especially since Presque Isle was identified as the planet Jupiter. (Clark III 1014; Clark IV 1128)

1952, December 18 — Chadwell prepares a memorandum on "British Activity in the Field of 'Unidentified Flying Objects'" that refers to a British "standing committee created about sixteen months ago on flying saucers." (David Clarke and Andy Roberts, *Out of the Shadows*, Piatkus, 2002, p. 111; Patrick Gross, "U-K Adopts the CIA Position on UFOs, 1951," June 18, 2002; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: January 1, 1947–December 31, 1959*, The Author, 2003, pp. 72–74)

1952, December 21 — Lyman Streeter and five other witnesses observe a large, cigar-shaped object over Winslow, Arizona. (Michael D. Swords, "Strange Days," *IUR* 30, no. 4 (Aug. 2006): 24)

1952, December 21 — Evening. J. E. Hawkey, civil commissioner of Fort Victoria [now Masvingo], Zimbabwe, is driving near Mvuma when he sees a bright red light crossing the road about 30 feet in the air, then hovering. Suddenly it shoots straight up and disappears. After a short while it descends some distance away and travels

straight down the road. Hawkey follows it at about 80 mph, after which it speeds up and disappears at three or more times the speed. He has the object in sight for about 20 minutes. (*Southern Rhodesia Newsletter*; Jan Aldrich)

1952, December 22 — Ruppelt finds out that the CIA Robertson Panel is back on again after being postponed on December 12. Apparently under pressure from the Air Force, which is setting a trap to embarrass the CIA with sensational IFO cases dressed up as "best" unknown UFO cases, CIA Director Gen. Walter Bedell Smith reverses the decision to postpone the panel meeting till March 1953 or later. Smith orders the Robertson Panel to be carried out immediately. A rush-to-judgment panel will have no time to reflect on the USAF trickery involved in the IFOs-as-UFOs deception and will just react in dismissive skepticism that there is no scientific evidence for UFO reality, and hence no reason for the CIA to intrude into USAF jurisdiction over air intelligence matters such as unidentified aerial threats (UFOs). Ruppelt calls ADC to say that he will not be able to conduct the ADC UFO briefing tour as previously scheduled due to the CIA meeting now tentatively set in early January 1953 (he confirms the call by teletype December 23). (Loren E. Gross, *UFOs, a History: 1952, November–December*, The Author, 1986, pp. 69, 71; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, p. 48; Loren E. Gross, *UFOs: A History, 1953, January–February, Supplemental Notes*, The Author, 2002, p. 9; Clark III 1014; Clark IV 1128)

1952, December 22 — 7:30 p.m. An instrument technician driving toward Larson AFB [now Grant County International Airport] near Moses Lake, Washington, stops his car to watch a hat-shaped glowing object rising vertically in odd spurts right and left, then level off at high speed. The object glows white with a red side when it is rotated. Halfway through a roll the light disappears, then it holds stationary in the sky with jumpy movements. Duration is about 15 minutes. (NICAP, "Hat-Shaped Object Observed by Technician"; Sparks, p. 186)

1952, December 29 — 7:48 p.m. Col. Donald J. M. Blakeslee, 27th Fighter Escort Wing, while flying near Misawa, northern Honshu, Japan, in an F-84G at 27,000 feet altitude, observes an object like a rotating cluster of lights colored white, green, and red. He reports that the object is "rotating slowly in a counterclockwise direction," or from east to west, and moving slowly west at aircraft speed. It is projecting three beams of light. Blakeslee climbs to 35,000 feet, at which point he is level with the unknown object. He attempts a pursuit, but the UFO disappears in 30 seconds. Four other aircraft in the vicinity of Chitose Air Force Base [now Chitose Air Base] on Hokkaido also see the object. Radar operators at Misawa Air Base on Honshu had notified their counterparts at Chitose of a radar target heading their way, but it disappears shortly afterward and is never correlated with the visual observation. (NICAP, "Col. Blakeslee / F-84 Incident"; Sparks, p. 187; "Blakeslee Flies Jet in 600 mph Chase after Mysterious Sky Balls," *Painesville (Ohio) Telegraph*, January 22, 1953 p. 1; "U.S. Jet Pilots Chase Light Clusters Flying at Blinding Speed over Northern Japan," *Washington (D.C.) Post*, January 22, 1953; "Strange 'Flying Ferris Wheels' Seen by Jet Pilots near Tsugaru Straights," *The Wingspread* (Misawa Air Base) 2, no. 8 (January 23, 1953): 1; Keyhoe, *FS from OS*, pp. 189–191; Keyhoe, *FS Conspiracy*, pp. 46–47; Swords 212–213)

1952, December 29 — 9:05 p.m. Capt. William T. Bowley and Capt. Herbert T. Lange, both of Perrin AFB [now North Texas Regional Airport] near Denison, Texas, are piloting a B-26 on a training flight headed west at 6,000 feet altitude and 300 mph when they see a large, intense, bluish-white light near Vega, Texas. It is about 350 feet long at their 11 o'clock position, paralleling their course at the same altitude and closing slightly. After 5 minutes, the object suddenly climbs vertically 7,000 feet in 5 seconds (about 2,000 mph) to disappear in thin clouds at 13,000 feet and causing the clouds to glow as if lit by a searchlight. Bowley radios the CAA controller in Tucumcari, New Mexico. Shortly after, the object reappears under the clouds and the CAA controller is told to look for it but he can't see it (possibly because he is told to look in the wring direction). After 2 minutes, it climbs to the west and disappears. (NICAP, "Object Closing on B-36 Suddenly Climbs"; Sparks, p. 187)

1952, December 31 — Project Blue Book issues its Status Report #8, classified "confidential." (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 131–154; Clark III 917; Clark IV 1028)

1953

1953 — During off-shore combat maneuvers, a squadron of carrier-based Navy AD-3 attack planes is approached by a rocket-shaped UFO that swoops down on the flight from above. The object levels off about 1,000 feet overhead, slows, and paces the aircraft. When the Squadron Commander leads his flight in pursuit of the UFO, it turns sharply so that its tail is pointed away and shoots upward out of sight in seconds. (Keyhoe, FSTS, pp. 266–267).

1953 — Midday. A member of the crew of a Shell tanker in Hong Kong harbor, China, watches, along with many others on shore and aboard the ship, a silver-white disc hovering at 6,000–7,000 feet. Within a second or so, it moves a full 45° arc to an area where there are some white clouds at about 5,000 fee. It shines through the cloud cover like

the moon through a mist. (J. Allen Hynek, "A Daylight Disc in Hong Kong Harbor," *IUR* 2, no. 8 (August 1977): wrap)

1953 — Evening. An Air Force pilot and a student are flying an F-84 Thunderjet on the home leg of a training flight over North Texas when the student notes an out-of-place light. At first the pilot thinks it's Venus, but they realize it is moving. The student steers the plane toward the light, but it zooms past them at high speed. The pilot takes the stick and turns the aircraft to follow it. The light, which now looks like a metallic domed disc with windows, passes them again. The pilot accelerates to more than 500 mph and pursues it; the disc roars past them again. The chase goes on for 10–15 minutes until a final pass when the object shines a bright light into the cockpit. The pilot takes an evasive measure and flies back to base. (CUFOS case file)

1953 — Frederick Phillip Stone founds the Australian Flying Saucer Club in Adelaide, South Australia. In 1955 it becomes the Australian Flying Saucer Research Society and publishes the *Australian Saucer Record* through 1963. From 1962 to 1971, it publishes *Panorama*. (*Australian Saucer Record* 1, no. 2 (2nd Quarter, 1955); *Panorama* 1, no. 1 (1962); Keith Basterfield, "The South Australian UFO Story," 2007; Eghigian, *After*, p. 104)

1953, January — Beams of microwaves, varying between 2.5 and 4 gigahertz, from Soviet sources aimed at the US embassy in Moscow are first detected, increasing in intensity by 1975. Detected by routine background radiation testing, the beams come from a source in a Soviet apartment building about 325 feet west of the embassy, affecting the west façade of the central building, with highest intensities between the third and eighth floors. The microwave transmissions are only five microwatts per square centimeter, well below the power level of microwave ovens and well below what would be needed to heat anything. Shielding is put in place by 1964, but the discovery is kept secret. (Wikipedia, "Moscow Signal"; J. Mark Elwood, "Microwaves in the Cold War: The Moscow Embassy Study and Its Interpretation," *Environmental Health* 11 (2012))

1953, January 1 — Physician Charles Laughead of East Lansing, Michigan, meets George Adamski during a trip to the Rose Bowl in Pasadena, California, and hears about his contact in the desert with Orthon, who left imprints in the sand displaying mysterious symbols. When he returns, he shows them to his wife Lillian who, after five months, deciphers them somehow. She thinks that the left imprint represents the sinking of Mu and Atlantis, and the right one signifies the reappearance of the lost continents in the future. (Clark III 717–718; Clark IV 786)

1953, January 1 — 8:45 p.m. While driving on Hwy 91 between Craig and Wolf Creek, Montana, Warner E. Anderson, manager of a photo shop with wartime air spotter experience; Mrs. Greta C. Wills, manager of women's apparel store; and teenager Marlene Wills see a saucer-shaped object above horizon about 5 miles away to the southwest. The object is an estimated 25–40 feet long and 6–8 or 18–25 feet thick and looks like two soup bowls joined at the rims. It has a red glowing bottom and portholes. The object dives low over the Missouri River to within 150–300 feet away then climbs fast horizontally at an estimated 3,600 mph to the northeast. (NICAP, "The 1953 UFO Chronology"; Sparks, p. 188)

1953, January 3 — The 4602d Air Intelligence Service Squadron (AISS) is reorganized at Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, by Air Defense Command Regulation AFR 24-4. Its primary mission is the collection of air combat intelligence, and it has detachments at numerous military bases nationwide. (CUFON, "4602d AISS Unit History Sampler"; Brian Skow and Terry Endres, "The 4602d Air Intelligence Service Squadron and UFOs," *IUR* 20, no. 5 (Winter 1995): 9)

1953, January 6 — 1:05 a.m. The 147th AC&W Squadron at Duncanville, Texas, is notified by the CAA at Meacham Field [now Fort Worth Meacham International Airport] about a UFO northeast of Dallas. Tinker AFB in Oklahoma City reports a radar target 20 miles southwest of Paris, Texas. An arrowhead-shaped UFO with green and white lights is seen by some witnesses in the Dallas area. (NICAP, "Arrow-Shaped Object Tracked at 600 Knots"; Sparks, p. 188; "'Flying Arrowhead' Seen over Dallas: 'Not a Star or a Plane,'" *St. Louis Post-Dispatch*, January 6, 1953, p. 1; Loren E. Gross, *UFOs: A History, 1953, January–February*, The Author, 1988, pp. 6–7)

1953, January 8 — 7:15–7:30 a.m. USAF ADC 82nd Fighter Interceptor Squadron personnel at Larson AFB [now Grant County International Airport], Moses Lake, Washington, all on the ground, see a green, disc-shaped object about the size of large weather balloon flying to the southwest. It has a vertical bobbing motion and makes sideways movements at about 8,000 feet below scattered clouds. It moves away against the wind until it disappears in the distance. The object is also observed by base personnel at Ephrata, Washington. An F-94 is scrambled at 7:43 a.m. and searches for 30 minutes, but the UFO is gone. (NICAP, "The 1953 UFO Chronology"; Sparks, p. 188; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 50–51)

1953, January 8 — 10:20 p.m. A triangular object with a brilliant reddish glow is seen for 10 minutes at Mosgiel, New Zealand. It fades, then reappears with a rising and falling motion, accompanied by a small white light. ("The New Zealand Sightings," *Flying Saucer News*, no. 1 (Spring 1953): 8)

1953, January 9 — Howard C. Cross, a senior staff member at Battelle, writes a letter to Col. Miles E. Goll of ATIC, arguing that "agreement between Project Stork [Battelle's study] and ATIC should be reached as to what can and what cannot be discussed at the meeting in Washington on January 14–16." Referring to the Air Force's plan for an instrumented study of UFO sightings, he suggests a "controlled experiment" be undertaken by USAF to obtain physical data. This would consist of "observation posts with complete visual skywatch, with radar and photographic coverage, plus all other instruments necessary or helpful in obtaining positive and reliable data on everything in the air over the area." The suggestion is that "Many different types of aerial activity should be secretly and purposefully scheduled within the area," meaning that the Air Force would release balloons to generate spurious UFO phenomena. The memo is a desperate effort to buy time for Battelle to finish its statistical analysis. Jacques Vallée speculates that this letter by Cross (to whom Vallée assigns the pseudonym "Pentacle") could have led to the military setting up artificial UFO waves and simulated cases in selected areas; however, this is clearly not the case, as Jennie Zeidman and Mark Rodeghier elaborately demonstrate in *IUR*. (H. C. Cross letter to Miles E. Goll, January 9, 1953; Hynek, *The UFO Experience*, Ballantine ed., 1974, p. 191; Jacobs, *The UFO Controversy*, Signet ed., 1976, p. 79; *The Hynek UFO Report*, p. 21; Jennie Zeidman, "I Remember Blue Book," *IUR* 16, no. 2 (Mar./Apr. 1991): 7–12, 23; Jacques Vallée, *Forbidden Science*, North Atlantic, 1992, p. 428; "The Pentacle Memo: How Important?" *Just Cause*, no. 35 (March 1993): 1–8; Jennie Zeidman and Mark Rodeghier, "The Pentacle Letter and the Battelle UFO Project," *IUR* 18, no. 3 (May/June 1993): 4–12, 19–21; NICAP, "The 'Pentacle Memorandum,' Including Text of Correspondence with Dr. Jacques Vallee," August 17, 1993; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, p. 48; Clark III 1014, 1214–1215; Francis Ridge, "The 1952 Top-Secret USAF Instrumented UFO Data Collection Plan," *The SCU Review* 4, no. 3 (August 21, 2023): 9–11; Clark IV 1128, 1390–1391)

1953, January 9 — The CIA/OSI attempts to get Walter Bedell Smith's approval for "two series" of scientific panels in January and February, which would buy some time, but the suggestion is rejected. (Clark III 1014)

1953, January 9 — Radio station KVET in Kerrville, Texas, blames a 75-second interruption in its operation on a red-orange oval object seen by four junior high school students over the city at the same time. Ivan Young, 13, and Edgar Rasmussen, 14, see the object fly in from the west, circle, and disappear to the north. They see two fins on its end shooting out red and green flames. It is making a buzzing noise. KVET engineer Britt Lamb says the radio interference is the weirdest he has ever seen—heavy static "with a roar that traveled up and down the scale." ("Fiery Object Jams Radio at Kerrville," *Fort Worth (Tex.) Star-Telegram*, January 10, 1953, p. 2; Schopick, pp. 78–79)

1953, January 9 — 6:50 p.m. An F-94, crewed by Lt. Melvin E. Conine and Lt. Walter D. Kowley, makes radar contact with a target at a range of about 13.5 miles over Misawa Air Base, Honshu, Japan. The radar locks on at 15,000 feet and contact is broken at a range of 600 feet. The object looks like a spinning object emitting colored lights. The radar observer reports unusual interference on the set throughout the mission, but the set appears to be operative both before and after. The radar contact lasts approximately 2 minutes. (NICAP, "F-94 Radar/Visual of Rotating UFO"; Sparks, p. 189; "Strange 'Flying Ferris Wheels' Seen by Jet Pilots near Tsugaru Straights," *The Wingspread* (Misawa Air Base) 2, no. 8 (January 23, 1953): 1)

1953, January 9 — 7:27 p.m. B-29 copilot 1st Lt. Charles C. Loveless sees a V-formation of bluish-white lights approaching his aircraft over Santa Ana, California. Pilot 1st Lt. Lowell D. Brandt turns to avoid them. (NICAP, "B-29 Bomber Crew Watch V-Formation"; UFOEv, p. 21)

1953, January 10 — 4:45 p.m. Retired Air Force Col. Robert McNab and a Mr. Hunter of the Federal Security Agency see a flat object to the northwest of their location 8 miles west of Sonoma, California. It is traveling about 2,400 mph and makes three 360° right turns in 2–3 seconds each in about 1/8 the radius required for jets (about 1/4 mile) and two abrupt 90° turns to the right and left, each turn 5 seconds apart. It almost stops, accelerates to its original high speed, almost stops again, speeds up again, and finally flies out of sight vertically. (NICAP, "Flat Object at 2,400 MPH"; Sparks, p. 189; *The Hynek UFO Report*, pp. 115–116)

1953, January 12 — 1:00 p.m. Maurício Ramos is driving on grassy terrain near Santana dos Montes, Minas Gerais, Brazil, when he sees a luminous, metallic disc smaller than a Volkswagen hovering 6 feet from the ground. He approaches to within 6 feet of it, and a door opens. Two entitles shorter than 5 feet tall, wearing lead-colored clothing with shiny balls fitted to the shoes, jump out. Ramos thinks they invite him aboard, but he does not answer because he is getting an increasingly severe headache as he watches. When the headache goes away, the disc and creatures have disappeared. ("Pesquisas sobre Tripulantes de DV," *Boletim SBEDV*, no. 55/59 (1967): 1–2, 8–9; Brazil 25–26)

1953, January 12 — At George Adamski's request, a young woman friend of his calls the FBI to alert them about a young associate of his, Karl Hunrath, who is staying at Palomar Gardens and appears unstable. Hunrath has a "magnetic machine" that he calls Bosco, after an alien who had visited his bedroom once, and he claims it can disrupt the

flight of flying saucers as well as airplane engines. An FBI agent shows up at the café the same day with an Air Force intelligence officer. Adamski tells them what he knows about Hunrath, then launches into an account of his space contacts and provides them with Venusian writings and spacecraft photos. (Loren E. Gross, *UFOs, a History: 1953, January–February*, The Author, 1988, pp. 5, 10)

1953, January 14 — 9:30 a.m. The opening meeting of the Robertson Panel convenes in the OSI conference room at CIA Building "M" in Washington, D.C. Present are scientists Howard P. Robertson, Samuel A. Goudsmit, Luis Walter Alvarez, and Thornton Leigh Page. CIA members Philip Grandin Strong, Lt. Col. Frederick C. E. Oder, David B. Stevenson, and Frederick C. Durant are also present. All are skeptical, if not openly hostile to UFO reports. Page later says that "H. P. Robertson told us in the first private (no outsiders) session that our job was to reduce public concern and show that UFO reports could be explained by conventional reasoning." The panel first reviews the CIA OSI study from August, the ATIC November 21 meeting, the December 4 IAC decision, the visit to ATIC by Chadwell and Robertson, and CIA concern over potential national security dangers. They watch the Montana and Utah films. Lt. Robert S. Neasham and Harry Woo of the Navy Photo Interpretation Laboratory report on their analyses of both films, which conclude that the objects are unidentified. Ruppelt speaks for 40 minutes on the Blue Book method of UFO investigation. It is possibly here that he first suggests using 4602nd AISS field units to conduct Blue Book field investigations. The meeting adjourns at 5:15 p.m. (Frederick C. Durant, "Report of Meetings of Scientific Advisory Panel on Unidentified Flying Objects, January 14–18, 1953," memorandum for Assistant Director for Scientific Intelligence, February 16, 1953; Good Above, pp. 335–339; "Letters Exchanged between CUFON and Dr. Thornton Page," October 3, 1992; Michael D. Swords, "Dr. Robertson Requests the Honor of Your Attendance," *IUR* 20, no. 4 (July/Aug. 1995): 16–20; Swords 188–192; Clark III 1014–1015; Clark IV 1128–1129)

1953, January 15 — The second day of the Robertson Panel. Ruppelt completes his presentation, then Hynek discusses Battelle's Project Stork. The CIA shows a film of seagulls in flight. Lt. Col. Oder gives a 40-minute presentation on Project Twinkle. In the afternoon, Gen. William M. Garland states his desire to increase the use of thoroughly briefed USAF intelligence officers to investigate UFO reports, declassify as many reports as possible, and enlarge Blue Book. Other USAF representatives discuss the difficulties of setting up instrument watches to monitor sightings. (Frederick C. Durant, "Report of Meetings of Scientific Advisory Panel on Unidentified Flying Objects, January 14–18, 1953," memorandum for Assistant Director for Scientific Intelligence, February 16, 1953; Michael D. Swords, "Dr. Robertson Requests the Honor of Your Attendance," *IUR* 20, no. 4 (July/Aug. 1995): 16–20; "Robertson Panel – Dr. J. Allen Hynek," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; O'Connell 87–89; Clark III 1015; Clark IV 1129)

1953, January 16 — The third day of the Robertson Panel. Hynek speaks again, followed by Maj. Dewey Fournet, who talks about his motion studies of UFOs that indicate controlled flight. Physicist Lloyd Berkner joins the panel in the afternoon. In the afternoon, panel members talk about conclusions they have reached, and Robertson agrees to draft a report for review (although it has already been written by Durant prior to the meetings, which Fournet has suspected). (Frederick C. Durant, "Report of Meetings of Scientific Advisory Panel on Unidentified Flying Objects, January 14–18, 1953," memorandum for Assistant Director for Scientific Intelligence, February 16, 1953; Michael D. Swords, "Dr. Robertson Requests the Honor of Your Attendance," *IUR* 20, no. 4 (July/Aug. 1995): 16–20; "Robertson Panel – Dr. Lloyd Berkner," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; O'Connell 87–89; Clark III 1015; Clark IV 1129)

1953, January 17 — The final day of the Robertson Panel. The panel reviews Robertson's draft report (Berkner has already seen it) and puts it into final form. (By 11:00 a.m., both CIA Director Walter Bedell Smith and Gen. John A. Samford have seen and approved the draft.) The scientists agree that since most sightings can be explained, the rest can be accounted for with further investigation, which is a "great waste of effort." They reject Fournet's UFO reports as "raw" and "unevaluated." The Montana film is said to depict aircraft. They reject the Navy analysis of the Utah film, calling the objects "high reflectivity of seagulls in bright sunlight." Because the "mass receipt of low-grade reports [tends] to overload channels of communication with material quite irrelevant to hostile objects that might some day appear" (a phony issue invented by Thornton Page), the Air Force should embark on a debunking campaign that would "result in reduction of public interest in flying saucers" with the help of scientific pronouncements (suggested by Hynek) and media, including Walt Disney Inc. animated cartoons. Blue Book should be expanded to 18 staff members (it has 5) so that it can educate and debunk effectively, but this never happens. Civilian UFO groups such as CSI and APRO should be watched "because of their potentially great influence on mass thinking if widespread sightings should occur. The apparent irresponsibility and the possible use of such groups for subversive purposes should be kept in mind." The panel and report are kept classified until a brief summary is declassified in 1958, and the CIA's involvement is kept secret until 1966. (Frederick C. Durant, "Report of Meetings of Scientific Advisory Panel on Unidentified Flying Objects, January 14–18, 1953,"

memorandum for Assistant Director for Scientific Intelligence, February 16, 1953; "CIA Evades, Then Denies Charge of Attempted UFO Censorship," *UFO Investigator* 1, no. 4 (June 1958): 4; "1953 CIA Report Debunks UFOs and the Public," *UFO Investigator* 3, no. 10 (Oct./Nov. 1966): 3; Michael D. Swords, "Dr. Robertson Requests the Honor of Your Attendance," *IUR* 20, no. 4 (July/Aug. 1995): 16–20; Swords 192–200; Clark III 1014–1016; John Greenewald, "The Robertson Panel, the Scientific Advisory Panel on Unidentified Flying Objects Convened by the CIA," The Black Vault, August 8, 2023; Graff 89–93; Eghigian, *After*, pp. 72–74; Clark IV 1129–1131)

1953, January 17 — 3:55 p.m. Geologist/salesman John Townsend Sackett is riding in a bus with about a dozen passengers near Guatemala City, Guatemala, when he observes a brilliant greenish-gold object, shaped like the Goodyear blimp. It is later described as being about twice the size of a DC-3. The object is traveling at about 400 mph straight and level in a northwesterly direction at about 6,500 feet. It almost stops in mid-flight then rises vertically about 1,500 feet, hovers for about 2 seconds, then immediately resumes flight at a new altitude. The object is lost to view because of intervening terrain. (NICAP, "Blimp-Like Object Sighted by Geologist"; Sparks, p. 189)

1953, January 18 — Upon Hynek's return to Ohio State University from the Robertson Panel, he and his new research assistant Jennie Zeidman come up with the name "Project Henry" to describe his consultancy with the Air Force. It is based on the Flit bug-spray advertisement that has a woman saying, "Quick, Henry, the Flit!" About once a week, a courier from Battelle arrives at Hynek's office with a manila envelope stuffed with teletype UFO reports for him to examine. Hynek travels to the Blue Book facility in Building 263 at Wright-Patterson about 2–3 times a month, with Zeidman sometimes accompanying him. (Jennie Zeidman, "I Remember Blue Book," *IUR* 16, no. 2 (Mar./Apr. 1991): 7–12, 23)

1953, January 20 — Robertson writes a letter to Chadwell, saying "perhaps that'll take care of the Forteans for a while" and mentions an upcoming meeting with the "NSA group" on February 5. (Letter from H. P. Robertson to H. Marshall Chadwell, January 20, 1953; Swords 189)

1953, January 20 — Dwight D. Eisenhower is sworn in as president. (Wikipedia, "First inauguration of Dwight D. Eisenhower")

1953, January 23 — Lockheed employee Nathan C. Price files a patent for a disc-shaped aircraft capable of landing or taking off vertically. It is never built, but it is designed for long-range flights at speeds up to Mach 4, with a ceiling around 100,000 feet. (Google Patents, "High Velocity High Altitude VTOL Aircraft")

1953, January 24 — Ruppelt travels to Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, to brief the 4602nd AISS on how they might help Blue Book investigate UFOs. He also requests to transfer to Air Defense Command here after his time at Blue Book is up. (Clark III 918; Clark IV 1028)

1953, January 26 — Air Force Press Officer Albert M. Chop writes a letter to Keyhoe's publisher Henry Holt & Co., declaring that all the sighting reports he is using for his upcoming *Flying Saucers from Outer Space* were cleared and made available to him from Air Technical Intelligence records. (Albert E. Chop, Letter to Henry Holt & Company, January 26, 1953; Good Above, p. 542)

1953, January 27 — CIA Assistant Director H. Marshall Chadwell writes a letter to MIT physicist Julius Adams Stratton, bringing him up to date on "the problem of 'unidentified flying objects'" and mentioning the Robertson panel, listing its charge, possible explanations, and a handout from Dewey Fournet illustrating his motion studies that indicate apparent intelligent control by UFOs in flight. (Letter from H. Marshall Chadwell to Julius A. Stratton, January 27, 1953)

1953, January 28 — 1:06 p.m. R. W. Love and a Mr. Ferrenti, while engaged in retrieving radio-controlled drones on a boat 1,100 yards offshore and south of Naval Air Station Point Mugu [now Naval Base Ventura County] near Oxnard, California, see a white, flat disc with fuzzy or shimmering edges rapidly approach from the northwest flying straight and level, overtake a jet aircraft, pass overhead, and disappear in the haze to the east. (NICAP, "Flat Disc Observed Overtaking Jet"; Sparks, p. 190)

1953, January 28 — A Maj. Geyer at Mitchel AFB [now closed] near Uniondale, New York, investigates reports of a UFO seen by both civilian and military witnesses. The UFO is an oval object glowing with different colors and having a tail or projection. He quickly concludes that it is a meteor and submits a report to Blue Book. However, one of the witnesses, author Marie Armstrong Essipoff (Ben Hecht's first wife), later writes to Keyhoe saying that she had told Geyer that the object wobbled and it had a turret on top. She draws a picture and Geyer says it looks like one of their flight simulators. But it's "still a meteor," he says. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs a History, 1953, January–February Supplemental Notes*, The Author, 2002, pp. 24–25; Swords 199–200)

1953, January 28 — 7:55 p.m. The control tower at Marine Corps Air Station El Toro [now closed], California, spots a large, luminous, red object and asks Maj. Harvey N. Patton to give chase. He pursues it from Newport Beach to

Long Beach and has it in sight for 3–4 minutes but is unable to gain on it. (NICAP, "Marine Fighter Asked to Check on Amber Object"; "'Saucers' over L.B. Outrace Jet," *Long Beach (Calif.) Press-Telegram*, January 29, 1953, pp. A1–A14; Harvey Patton, "Jet Pilot Tells of Weird Chase after 'Saucer,'" *Long Beach (Calif.) Press-Telegram*, January 29, 1953, pp. A1–A14)

1953, January 28 — 9:40 p.m. Maj. Hal W. Lamb, USAF senior pilot at Moody AFB in Valdosta, Georgia, apparently sees the setting planet Venus (although this is disputed) changing color and shape while flying a T-33 (or an F-86). It is also seen by Turner AFB [now Naval Air Station Albany] tower operators in Albany [not Dobbins Air Reserve Base in Marietta], Georgia (with time errors of about 10 minutes). About the same time, two GCA radar maintenance men at Turner AFB radar track three moving targets and a stationary target. At 10:10 p.m., the GCA reports two stationary targets at 17 and 27 miles, both 300° azimuth. No visual confirmation, though binoculars are used. (NICAP, "Several Radar Contacts"; Sparks, p. 191; Loren E. Gross, *UFOs, a History: 1953, January–March*, The Author, 1988, p. 66; Marler 129–130)

1953, January 29 — Ruppelt still thinks that the Robertson Panel has accepted Garland's recommendation to expand Blue Book (it hasn't) and that its education and debunking recommendation means that UFO information should be released to the public (it didn't). Fournet, Chop, and Col. Teabert (Kenneth E. Thiebaud?) of AFOIN-2 think the same. In Washington, Ruppelt hears that the press has heard rumors about the Utah film, and he decides to release it, focusing on the seagull explanation. (*The Hynek UFO Report*, p. 236)

1953, January 29 — A briefing of the Office of Naval Estimates Board by the CIA on UFOs includes the showing of the Utah and Montana films. (Frederick C. Durant, "Briefing of ONE Board on Unidentified Flying Objects," January 30, 1953)

1953, January 29 — 9:55 a.m. A small gray oval-shaped object is seen between Houlton and Chatham, Maine, by 2nd Lt. Fred T. Goetting Jr., pilot of an F-94B. Goetting points out the object to his radar observer, Lt. Howard C. Kelley. The object appears to be 10° above the F-94B, which is at 23,000 feet. Goetting attempts to intercept the object at a speed of 0.8 Mach. This chase continues for 8 minutes without the F-94 gaining, and the chase is broken off because of low fuel. The object is seen by at least two fighter aircraft from other squadrons. (NICAP, "Gray Oval Sighted by 3 Fighter Aircraft"; Sparks, p. 191; *The Hynek UFO Report*, p. 58)

1953, January 29 — 11:30 p.m. A farmer named Lloyd C. Booth just north of Conway, South Carolina, hears a commotion of animals, grabs his .22 revolver, and sees an oblong-shaped, lighted object 10 feet above the trees moving slowly or hovering, with a low humming sound. He shoots at the object twice. The first bullet bounces off with a metallic sound; at the second shot the object tilts slightly and ascends at a 65° angle to the west at 600–700 mph and disappears. One of his cows had died the previous evening. (NICAP, "Man Fires 0.22 at Hovering Object"; Sparks, p. 191; "SC. Man Tells of Studying Hovering 'Flying Saucer,' Shooting into It," *Columbia (S.C.) The State*, February 7, 1953, pp. 1, 3; "Says He Observed and Shot 'Flying Saucer,'" *Columbia (S.C.) The State*, February 8, 1953, p. 3-D; "CAA Man Says Booth Saw Navy Blimp," *Columbia (S.C.) The State*, February 16, 1953, p. 1; "Conway S.C. Man Shoots Saucer," *APRO Bulletin* 1, no. 5 (March 15, 1953): 1, 4–5; Donald E. Keyhoe and Gordon I. R. Lore Jr., *Strange Effects from UFOs*, NICAP, 1969, pp. 64–66)

1953, January 29 — 2:20 p.m. Northrup test pilot Rex Hardy Jr., test pilot Chester Mathews, and Northrup photographer Jim Wilkinson see four metallic, disc-shaped object the size of a B-36 flying in squadron formation over Malibu Beach, California. They estimate their height as 20,000 feet and speed as 1,200 mph. They watch for about 5 minutes. (NICAP, "Four B-36-Sized Discs Observed by 3-Man Crew"; "More Discs Sighted By Southland Fliers," *Long Beach (Calif.) Independent*, January 31, 1953, p. 12; Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 50; Loren E. Gross, *UFOs, a History: 1953, January–February*, The Author, 1988, pp. 66–69)

1953, January 31 — Project Blue Book issues its Status Report #9. (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 155–174)

1953, February — Albert K. Bender appoints Gray Barker as the International Flying Saucer Bureau's chief investigator. ("IFSB Forms Dept. of Investigation," *Space Review* 2, no. 2 (April 1953): 1; Clark III 189; Clark 225)

1953, February 1 — 9:30 p.m. A T-33 flying 10 miles west of Terre Haute, Indiana, sights a close group of moving lights changing color from red to blue, to green to yellow. The pilot estimates their altitude to range between 15,000 feet to 30,000 feet flying in a manner similar to conventional aircraft. Searchlights from the St. Louis, Missouri, area seem to be following the unidentified lights. (NICAP, "T-33 Pilot Observes Unidentified Lights")

1953, February 3 — 8:00 p.m. George Hunt Williamson and his wife Betty Jane watch two UFOs near the ground from their home on Brookside Boulevard in Prescott, Arizona. Another UFO passes over the house at 10:00 p.m. ("Personal Chat with Space Cadet Told by Professor," *Prescott (Ariz.) Evening Courier*, March 10, 1953, pp. 1, 3; Zirger and Martinelli, *The Incredible Life of George Hunt Williamson*, Verdechiari, 2016, pp. 363–364)

1953, February 4 — 1:50 p.m. US Weather Bureau observer Stanley H. Brown in Yuma, Arizona, tracks with a theodolite a white, oblong object. It is surrounded by a thin white mist and flies straight up and levels off. After 20 seconds, the object is joined by a second one that flies away twice and returns. Both are lost to sight behind clouds to the south-southwest. The sighting lasts 5 minutes. (NICAP, "Theodolite Tracking of Two Elliptical Objects"; Sparks, p. 191; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 62–63)

1953, February 6 — 1:34 a.m. A B-36 aircraft piloted by Maj. Leo J. Moffatt is over Rosalia, Washington, when he sees one round white omnidirectional light at an altitude of approximately 7,000 feet on a southeast course, circling and rising as it proceeds. It is observed visually for a period of 3–5 minutes. The B-36 makes a 180° descending turn toward the light, which is estimated to be moving at a speed of 170–230 mph. Blue Book explains it as a weather balloon launched from Geiger Field [now Spokane International Airport]. (NICAP, "B-36 Encounters Light at 7,000′"; Sparks, p. 192; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 67–68)

1953, February 6 — Journalist Donald Thomson and four other persons in Victoria, Australia, found the Australian Flying Saucer Investigation Committee. (Bill Chalker, "The Early Days of the Public UFO Drama in Australia: Even an Atomic Connection of a Sort," The OzFiles, October 2, 2023)

1953, February 7 — 9:22 p.m. A USAF F-94 crew and other witnesses near Nemuro, Hokkaido, Japan, see a bright orange object change color to red and green at intervals and disappear behind a cloud. It is also tracked by ground radar. (NICAP, "F-94 Crew in Air and Ground Radar Tracking"; Sparks, p. 192; Condon, p. 122)

1953, February 9 — Al Chop has written a press release on the Utah film with the approval of Capt. Harry B. Smith of AFOIN. They decide to also release the USAF (possible aircraft) and Navy (self-luminous or light sources) analyses, otherwise the press might suspect a cover-up. The release would state that, although no positive identification has been made, further analysis will result in an identification. Gen. Garland approves the release, which then goes on to the Pentagon, which "screamed 'No!'" Ruppelt is ordered into silence. Chop says the CIA "killed the whole program. We've been ordered to work up a national debunking campaign, planting articles in magazines and arranging broadcasts to make UFO reports seem like poppycock." Ruppelt tells Keyhoe that Blue Book must even discredit USAF pilots who report UFOs. "It's a raw deal, but we can't buck the CIA." (Ruppelt, p. 228; Keyhoe, *Aliens from Space*, Signet ed., 1974, pp. 70–71; *The Hynek UFO Report*, pp. 236–237)

1953, February 9 — CIA agent Hayden Channing writes a memo to the Domestic Contact Division describing a recent [late January?] public meeting of the Civilian Saucer Investigation group in Los Angeles, California. North American Aviation project engineer Walther A. Riedel is a member of the organization, and he describes the analyses of the UFO reports it receives. Only about 25 sightings are unidentified, and these they forward to Project Blue Book. Channing writes: "Apparently, an eye and interest are also directed to the USSR for reactions to sightings as reported in the PRAVDA." (Hayden Channing, "California Committee for Saucer Investigation," February 9, 1953)

1953, February 11 (or 19) — 10:00 p.m. At the Naval Auxiliary Air Station [now Northeastern Regional Airport] in Edenton, North Carolina, Marine 1st Lt. Edward Balocco is on intercept stand-by duty when the alert whistle goes off. Minutes later he is in his F9F Panther jet heading north to Virginia Beach, Virginia, while being vectored to an unknown target by the 2nd Marine Aircraft Wing at Marine Corps Air Station Cherry Point in Havelock, North Carolina. By the time he gets close to the target, it has disappeared from radar at Norfolk, Virginia. After searching the area for 15 minutes, he heads back for fuel. Flying south at 20,000 feet, he notices a light below him on the port side on or near the ocean. After turning his navigation lights back on, he notices that the light has risen to his altitude and is only 2,000 feet away. Closing in on it, he sees it is a disc with blinking red lights. At 350 feet away, his cockpit is bathed in blue-white light and everything seems motionless and silent. He looks at his gloved hand and he can see the bones in his hand like an X-ray. Suddenly there is a flash, and the UFO breaks away as sound and motion return. Balocco tries to pursue it again unsuccessfully. Captain Thomas Riggs, whose F9F Panther has also been scrambled, reports the UFO is moving south along the North Carolina coast. He is debriefed and told not to mention the incident. ("Cherry Point, N.C.," *APRO Bulletin* 1, no. 5 (March 15, 1953): 9–10; Good Need, pp. 183–184; Shoot 60–61)

1953, Mid-February — Weapons engineer Chester W. Lytle Sr., deputy director of operations for SAC's Eighth Air Force Headquarters, is visiting Eielson AFB near Moose Creek, Alaska, with Gen. William H. Blanchard when he finds out his wife is about to give birth in Chicago, Illinois. Blanchard offers to personally fly him in a bomber to an air force base in Illinois so he can get home quickly. During the long flight, their conversation turns to UFOs. Blanchard unexpectedly mentions the 1947 Roswell incident and that a crashed alien spacecraft had indeed been recovered. He tells Lytle that four dead humanoid beings had been aboard. (Nukes 478–481)

1953, February 23 — Project Stork's William T. Reid writes to Miles E. Goll at Wright-Patterson AFB in Ohio, saying that UFO reports have been processed through October 15, 1952, and evaluations completed for reports through July 31, 1952. ("Seven Status Reports for Project Stork, Part 4 of 4 Parts," CUFON)

1953, February 25 — Pentagon press officer Albert M. Chop writes to Maj. Donald E. Keyhoe and verifies that the files on 41 cases investigated by the Air Force for his upcoming book *Flying Saucers from Outer Space* were indeed cleared for release by ATIC. (Albert M. Chop, Letter to Donald E. Keyhoe, February 25, 1953; Keyhoe, *FS from OS*, pp. 253–259; NICAP, "The Chop Clearance List")

1953, February 25 (or March 9) — Project Second Storey meets for the last known time, chaired by astrophysicist Peter M. Millman of the Dominion Observatory in Ottawa, Ontario, and consisting of military and intelligence officers, as well as Wilbert B. Smith. It concludes that, because details of most sightings cannot be adequately confirmed, UFO reports do not lend themselves to a "scientific method of investigation." It determines that UFOs do not require a Canadian armed forces investigation, but reports should still be sent to the Directorate of Scientific Intelligence. ("Wilbert B. Smith" Northern Ontario UFO Research and Study; Story, p. 276; Good Above, p. 182; Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report*, Dundurn Press, 2006, p. 229; Clark III 1078; Clark IV 1194)

1953, Late February — ADC commander Benjamin Chidlaw at Ent AFB [now US Olympic Training Center] near Colorado Springs, Colorado, tells future UFO researcher Robert C. Gardner that he has "stacks of reports about flying saucers. We take them seriously when you consider we have lost many men and planes trying to intercept them." (Stringfield, *3-0 Blue*, p. 91; Stringfield, *Situation Red*, Fawcett Crest, 1977, pp. 137–138)

1953, February 27 — Project Blue Book issues its Status Report #10, classified "secret." (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 175–198)

1953, February 28 — Capt. Edward J. Ruppelt transfers out of Blue Book for a seven-month assignment in Denver, Colorado. He is replaced by Lt. Robert M. Olsson, who has one staff member. (Ruppelt, p. 228; Clark III 918, 937; Clark IV 1028, 1047)

1953, March — 10:00 a.m. Pilot Howard C. Strand is flying a routine patrol mission in a F-94B out of Selfridge AFB [now Selfridge Air National Guard Base] near Mount Clemens, Michigan, when he is asked to check out a radar target over downtown Detroit. He and his radar operator see tiny specks that seem to be a ragged formation of aircraft. As he approaches, he cannot see any wings or tails. Ground radar has the UFOs as "good, strong targets." Strand looks at his instruments briefly and when he looks up the objects are gone, though ground radar tracks them another 4 minutes. Gordon Thayer calls it an inferior mirage. (Condon, pp. 151–153; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1953 March–July, Supplemental Notes*, The Author, 2002, pp. 24–26)

1953, March — Harvard University astronomer Donald H. Menzel publishes *Flying Saucers*, in which he explains all UFO sightings as light reflections and refractions via mirages and temperature inversions. Kenneth Arnold was fooled by reflective layers of haze in 1947, and Thomas Mantell likely saw a mock sun in 1948, he writes. It is the first book-length argument against UFOs, one of the few published by an academic institution, and the first UFO book by a scientist. ATIC personnel are displeased that Menzel has used a few classified reports supplied to him for an examination of patterns, which he has never produced. However, he has an imaginative vision of what Venus looks like, with "warm seas" in which life teems. (Donald H. Menzel, *Flying Saucers*, Harvard University, 1953; Getty Images, "Dr. Donald H. Menzel, Harvard Professor and Native Denverite, Refers to His Book," March 13, 1953; Clark III 457–458, 742; Graff 96–97; Clark IV 503, 823)

1953, March — Gen. John A. Samford is interviewed in *See* magazine and provides straightforward, factual answers about Project Blue Book, UFOs, and the inadequacy of Menzel's theories. He claims the view of the Air Force is that "many credible people have seen incredible things." (Swords 210–211)

1953, March 3 — 1:25 p.m. USAF Capt. Roderick D. Thompson, 3600th Fighter Training Group out of Luke AFB near Glendale, Arizona, is an instructor pilot flying an F-84 at 25,000 feet over Blythe, California. He spots am object 300–500 feet wide leaving a contrail crossing his path from left to right at about 35,000–45,000 feet at about 400 mph. It is visible only by condensation vapor emitted from its manta-ray shaped flat surface. Student pilots flying two F-84s, Lt. Jack E. Brasher and Lt. Thomas W. Hale, also see the object but do not follow in pursuit. When Thompson turns to pursue it, the object makes a slight dipping turn to the northwest and begins climbing at about 20°. It appears to be very thin and immediately begins to form a heavy condensation trail behind it for roughly 1,000 feet and splits in two. Thompson reaches 30,000 feet and closes to within roughly 5–10 miles to a point over the Colorado River north of Parker Dam on the Arizona border. He takes 151 frames of gun camera film of the object with a 16mm N-9 camera, apparently at 16 fps 1/40 second exposure setting. (NICAP, "Three F-94 Pilots Encounter Manta-Ray, Gun Camera Shots"; Sparks, p. 194; Ruppelt, pp. 229–231; Barry J. Greenwood, "The Luke Air Force

Base UFO Sighting," *Flying Saucer Review* 24, no. 2 (August 1978): 11–15; Swords 213–214; "Luke AFB, Arizona, 03/03/1953," US National Archives YouTube channel, October 24, 2013)

1953, March 5 — Brig. Gen. Woodbury M. Burgess, commander at Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, sends a memo to Air Defense Command and the director of intelligence at Ent suggesting that field teams of 4602nd personnel interview UFO witnesses. (Maj. Robert C. Brown, "Utilisation of 4602nd AISS Personnel in Project Blue Book Field Investigations," March 5, 1953; Kevin D. Randle, "UFO Coverup: The Early Days," A Different Perspective, June 20, 2011)

1953, March 8 — Journalist Peter H. Wyden's interview with Ruppelt appears in the *St. Louis Post-Dispatch.* Ruppelt tells him that Project Blue Book "has no evidence of any of these objects being anything other than misinterpretations of known objects…. We can't say positively because our data isn't good enough. But we're not worried." The lengthy article provides a good overview of Blue Book's investigations and staff of seven, including Ruppelt's assistants Lt. Anderson G. Flues and Max Futch. (Peter Wyden, "They're Still Chasing Flying Saucers," *St. Louis Post-Dispatch*, March 8, 1953, p. 1G)

1953, March 8 — 9:02 p.m. Physics teacher Leigh Van Etten, two other teachers, and 10 students at Kents Hill School, Maine, watch a big red ball of fire moving west-northwest for 12 minutes before it disappears beyond the horizon. He estimates it is about 40–60 miles away. (Jennie Zeidman, "I Remember Blue Book," *IUR* 16, no. 2 (Mar./Apr. 1991): 10)

1953, March 14 — 11:43 p.m. Lt. Robert J. Wooten is flying a Navy P2V-5 antisubmarine plane over the Sea of Japan northwest of Nishinoshima, Japan, when he encounters an "electrifying display" of groups of 5–10 colored lights, totaling 90–100, slowly moving to the left side of the aircraft at a range of 3–7 miles and maintaining an extremely precise formation. Some of the objects are also tracked on radar. A 1955 RAND report falsely attributes this to an armada of 100 MiG-15 fighter aircraft (actually only 11) that menaced four US Navy Panther jets from the carrier *USS Oriskany*, but this earlier incident took place on November 18, 1952, resulting in damage to one of the MiGs. (NICAP, "Groups of Lights / IFF Signals"; Sparks, p. 195; Swords 214; Clark III 53–59; Clark IV 74–78)

1953, March 15 — The International Flying Saucer Bureau declares today World Contact Day and calls upon the UFO occupants to make a public appearance on earth. (Wikipedia, "World Contact Day"; Albert K. Bender, *FS and the Three Men*, Saucerian, 1962, pp. 82–86)

1953, March 17 — An FBI agent and two AFOSI officers interview George Adamski and ask him to draft a statement saying that neither the FBI nor Air Force has approved material used in his speeches. (Loren E. Gross, *UFOs, a History: 1953, March–July*, The Author, 1989, pp. 4–5; Clark III 44; Clark IV 63)

1953, March 18 — Ohio Northern University's Project A reports that UFOs are usually disc-shaped, silent, and fast-moving. "Our major conclusion to date is that no one explanation fits all sightings, and about 20% of all the sightings definitely fit the category of unnatural phenomena." (Loren E. Gross, *UFOs, a History: 1953, March–July*, The Author, 1989, pp. 15, 18)

1953, March 22 — 2:00 a.m. Sara Shaw and Jan Whitley [pseudonyms], who share an isolated one-bedroom cabin in the forest around Tujunga Canyon north of Burbank, California, wake up when an odd light shines through the window. An eerie silence falls over the cabin and neighboring forest. They get out of bed but feel paralyzed. Then suddenly and inexplicably, it is 4:20 a.m. Shaw, who was originally kneeling on the bed, is now sitting on it with her feet on the floor. The two women flee the cabin. As they run, they pass an apparition or "vaporous something" with the "head and shoulders of a long-haired" person. When they return to the cabin two days later, they feel a sense of dread. Shaw can remember nothing more and the two women move apart. In 1975 Shaw watches a UFO documentary that evokes some memories, and she contacts ufologist Ann Druffel. During three hypnotic regression sessions—December 5, 1975; February 26, 1976; and October 22, 1978—Shaw recalls her abduction by black-garbed aliens. She undergoes a physical examination and the aliens show her a cure for cancer. (Ann Druffel and D. Scott Rogo, *The Tujunga Canyon Contacts*, Prentice-Hall, 1980, updated in New American Library, 1989; Ann Druffel, "Alien Encounter at Tujunga," *Fate* 33, no. 4 (April 1980): 32–39; UFOEv II 525–526; Eghigian, *After*, p. 278)

1953, March 23 — Gen. Burgess's 4602nd AISS plan is approved. It is seen as aiding ATIC and giving AISS personnel valuable experience in field interrogations and cooperating with other agencies (Kevin D. Randle, "UFO Cover Up: The Early Days," A Different Perspective, June 20, 2011; Kevin D. Randle, *The Government UFO Files*, Visible Ink, 2014, p. 249)

1953, March 24 — The Upshot-Knothole Nancy nuclear test at Nevada Test Site Area 4 sends radioactive fallout on livestock across the region, including those grazing at Papoose Lake, Nevada. Sixteen horses and numerous cows belonging to local farmers, the Stewart brothers, die from acute radiation poisoning. The Army compensates them

for the horses, but claim the cows died from Vitamin A deficiency. (Wikipedia, "Operation Upshot–Knothole"; Jacobsen, *Area 51*, p. 102)

1953, Spring — After 12:00 noon. RAF Flight Lt. Cyril George Townsend-Withers is asked to test some new ECM radar equipment using an experimental English Electric Canberra aircraft. The jet has been stripped of all removable parts to make it as light as possible. With this modification, he is able to leave RAF Boscombe Down [now MoD Boscombe Down] in Wiltshire, England, and soar to 55,000 feet, then a record for the aircraft. Cruising over Salisbury Plain, Townsend-Withers picks up a blip on his screen. It shows an object traveling 5 miles behind him and maintaining a steady course. His immediate reaction is to curse the "anomalous propagation" effects that they have gone to so much trouble to avoid. However, he soon becomes aware that this was an image of something flying right behind them. The science officer goes up to the turret to take a look and sees, glinting in the sun or pouring out a fantastic amount of its own light, a round shape trailing in their wake. Townsend-Withers calls his pilot on the microphone and tells him that he can see an unknown and suggests trying to outpace it. They reach 260 mph but the thing cannot be shaken off, so the pilot executes a sweeping radius turn. As the Canberra comes around from its turn, the object comes into view dead ahead. For half a minute they are on a collision course, swiftly trying to calculate what to do next. The object is round like a thin disc, but with two small tailfins at the rear. It seems to be metallic and enormous, and it is simply sitting there waiting for them to fly right into it. Suddenly, it flips vertically into the air and climbs upwards at an astonishing rate. Leaving no vapor trail, wake, or detectable sound, the object vanishes within just a couple of seconds. (NICAP, "Canberra Crew Encounters UFO / Radar/Visual"; Jenny Randles, "Collision Course," *IUR* 27, no. 4 (Winter 2002–2003): 16–18; Jenny Randles, "Scramble, UFO! Part Three, The Team," *Fortean Times* 388 (January 2020): 31)

1953, Spring — A US Army radar specialist with secret security clearance at Fort Monmouth, New Jersey, claims that he and a small number of other radar technicians are summoned to view a special 16-millimeter film at the base theater. The 5-minute film first presents a desert scene dominated by a silver, disc-shaped object embedded in the sand with a domed section at the top. At the bottom is an open hatch. A subsequent scene shows 10–15 military personnel standing around the craft, which is 15–20 feet wide. The view switches to an apparent interior shot of the object, which has a panel with several levers. Another scene inside a tent shows two tables on which are three small dead bodies. Their heads are large with small noses, mouths, and eyes. The film ends abruptly. Two weeks later, he is approached by an intelligence officer who tells him to forget the movie because it was a hoax. (Leonard H. Stringfield, "Retrievals of the Third Kind, Part 1," *Flying Saucer Review* 25, no. 4 (July/Aug. 1979): 13, 17–18; Clark III 341; Clark IV 377)

1953, Spring — Richard Hughes's Flying Saucer Club in Hove, Sussex, England, begins publishing *Flying Saucer News.* (*Flying Saucer News*, no. 1 (Spring 1953))

1953, April — Wilbert B. Smith is drafting a report on Project Magnet for the Canadian Department of Transport. He writes Keyhoe that their conclusion will probably be that UFOs are alien vehicles. (Clark III 1078; Clark IV 1195)

1953, April–June — The US Army Chemical Corps' Dew II project involves the secret release of fluorescent particles (zinc cadmium sulfide) and plant spores (*Lycopodium*) from an aircraft over St. Louis, Missouri. (Minneapolis, Minnesota, was a previous target.) It only targets black ghetto sections of St. Louis and arranges for local police surveillance "to minimize the possibility of loss of equipment." The Army reports "much less curiosity and interference" than Minneapolis. Dew II is described in a 1953 Army report that remains classified at the time of a 1997 report by the US National Research Council concerning the zinc cadmium sulfide dispersion program. (Leonard A. Cole, *Clouds of Secrecy: The Army's Germ Warfare Tests over Populated Areas*, Rowman & Littlefield, 1988, pp. 63–65)

1953, April 12 — 4:10 p.m. Ten round, flat, metallic objects changing formation are observed traveling at a high rate of speed at an estimated altitude of 7,500 feet over Sweetwater, Nevada. No trail, sound, or exhaust are noted. The objects pass under the right nacelle of the observers' C-47 aircraft, which is en route to Stead AFB [now Reno Stead Airport]. The copilot takes control of the aircraft and turns to the right in a tight 300° turn for a better view. The objects are then picked up unassisted by two more members of the crew. The objects are seen in a right turn of a greater radius than that of the C-47 and at a lower altitude. They are observed for approximately 120° of their turn and disappear on a heading of 300°. Observers are unable to estimate the speed of the objects because of the distance and the large turn radius. (NICAP, "Ten Round Flat Objects Changing Formation"; Sparks, p. 197)

1953, April 13 — The MKUltra project is launched on the order of CIA Director Allen Dulles and under the direction of Sidney Gottlieb. Its aim is to develop mind-controlling drugs for use against the Soviet bloc, largely in response to alleged Soviet, Chinese, and North Korean use of mind-control techniques on US prisoners of war in Korea. The project attempts to produce a perfect truth drug for use in interrogating suspected Soviet spies, and generally to explore any other possibilities of mind control. Another MKUltra effort, Subproject 54, is the Navy's top secret

"Perfect Concussion" program, which uses subaural frequency blasts to erase memory. However, the program is never carried out. Because most MKUltra records are deliberately destroyed in 1973 by order of then–CIA director Richard Helms, it is difficult, if not impossible, for investigators to gain a complete understanding of the more than 150 individually funded research subprojects sponsored by MKUltra and related CIA programs. A cache of some 20,000 documents survive Helms's purge, as they are incorrectly stored in a financial-records building and discovered following a FOIA request in 1977. These documents are fully investigated during the Senate Hearings of 1977. (Wikipedia, "MKUltra"; US Senate Select Committee on Intelligence, *Project MKUltra, the CIA's Program of Research in Behavioral Modification*, 95th Congress, 1st Session, August 3, 1977; John D. Marks, *The Search for the "Manchurian Candidate": The CIA and Mind Control*, Times Books, 1978; Jon Ronson, *The Men Who Stare at Goats*, Simon & Schuster, 2004; "Project MK-Ultra: The CIA's Experiments with Mind Control," ZazenLife.com, December 2011; Stephen Kinzer, *Poisoner in Chief: Sidney Gottlieb and the CIA Search for Mind Control*, Henry Holt, 2019)

1953, April 14 — 9:23–11:50 p.m. A Navy P2V Neptune spy plane on an electronic intelligence (ELINT/ferret) mission over the Sea of Japan (about 200 miles southeast of Vladivostok, Russia) is paced and attacked by 10 agile and highly maneuverable UFOs. The encounter takes place with only 400 feet of distance between the aircraft and the sea. The objects make more than "70 aggressive non-firing passes" in "high-speed runs," many just a few hundred feet directly underneath the Navy aircraft for just over an hour. The UFOs transmit Morse Code light signals (the letter "D"), an unprecedented occurrence in UFO history. The objects are tracked on radar and by the Navy's ELINT systems (which pick up and analyze radar beams emitted from the objects) for almost two and a half hours. (NICAP, "Two Lights Flashing Morse Code Letter 'D'"; Sparks, p. 198; Clark III 53–59, 997; Clark IV 73–78, 1110)

1953, April 16 — 3:45 p.m. The crew of a commercial Maritime Central airliner flying at 9,000 feet above Chatham, New Brunswick, watches a metallic disc approach their plane and pass underneath. (Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, pp. 64–67)

1953, April 19 — 1:00 p.m. Four US Army reconnaissance observers (including pilot Lt. Julius T. Morgan, Lt. James O. Rymus, and Lt. Jack E. Myers) in two aircraft see a white, rounded, delta-shaped object 5–7 feet in diameter flying at 60–80 mph with a "vibrating" motion over Communist-held territory in Korea. An official G-2 Intelligence Report says the object is in the Old Baldy (Hill 266) and Pork Chop Hill areas. Radar supposedly tracks them also moving faster than sound (>767 mph). (Sparks, p. 199; "Small 'Delta-Shaped Object' Sighted over Commie Lines," *Eugene (Oreg.) Register-Guard,* April 20, 1953, p. 2; NICAP, [news clippings]; Jennie Zeidman, "I Remember Blue Book," *IUR* 16, no. 2 (Mar./Apr. 1991): 9)

1953, April 23 — Gen. Charles P. Cabell becomes deputy director of the CIA.

1953, April 23 — 3:00 p.m. Two witnesses in Iberville [now Saint-Jean-de-Richelieu], Quebec, see a disc the size of a car approach their house while they are eating dinner. It stops 250 feet above the Richelieu River a bit more than a half-mile away. The man runs outside for a better look and sees that it as a dome and is spinning as it hovers. After 15 seconds it flies to the southwest and disappears. (Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, pp. 65, 68–69, 151)

1953, May — A flawed CAA report states the July 1952 Washington National Airport radar returns were weather targets. (Civil Aviation Authority, *A Preliminary Study of Unidentified Targets Observed on Air Traffic Control*, Technical Development Report 180, May 1953)

1953, May — CIA Assistant Director H. Marshall Chadwell transfers chief responsibility for keeping abreast of UFOs to OSI's Physics and Electronic Division. Todos M. Odarenko, chief of the division, does not want to take on the problem, saying it requires too much analytic and clerical time. Given the Robertson Panel findings, he proposes to call the project "inactive" and devote only one part-time analyst and a file clerk to maintain a reference file of activities of USAF and other agencies on UFOs. (Gerald K. Haines, "CIA's Role in the Study of UFOs, 1947–90," *Studies in Intelligence,* 1997, p. 72)

1953, May — The Air Force publishes, under the signatures of Chief of Staff Gen. Hoyt S. Vandenberg and Air Adjutant General Col. Kenneth E. Thiebaud, Air Force Manual 200-3, titled *Handbook for Air Intelligence Officers.* It is classified Restricted. Intended as a general guide for air intelligence officers conducting any type of investigation, the 6-page manual's only illustration is of an Air Force plane accompanied by three flying saucers; the caption is "The Air Technical Intelligence center is responsible for the prevention of technological surprises." It is discovered by Keyhoe in 1961 because someone forgot to reclassify the manual as Confidential in November 1953 when the Restricted classification is retired. (Department of the Air Force, *Handbook for Air Intelligence Officers*, Air Force Manual 200-3, May 1953, chapter 9, pp. 9-1–9-6; Keyhoe, *Aliens from Space,* Signet ed., 1974, p. 80)

1953, May — The Australian Flying Saucer Bureau begins publishing the *Australian Flying Saucer Magazine.* It publishes six issues through May 1955. (Wikipedia, "Australian ufology"; Eghigian, *After*, p. 104; Clark IV 1270)

1953, May 1 — 11:35 p.m. USAF pilot Capt. R. L. Emberry and radar operator 1Lt J. R. Morin are flying an F-94 interceptor at 24,000 feet about 10 miles south of Goose Bay AFB [now CFB Goose Bay], Labrador. Both men and a control tower operator see a white light with a visible afterburner at 10,000 feet. The F-94 pursues it, both climbing to 40,000 feet, but the object climbs out of sight after 30 minutes. (NICAP, "Unidentified Evades Interception by F-94"; Sparks, p. 199; Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, p. 262)

1953, May 2 — BOAC Flight 783, a de Havilland Comet 1, crashes in a severe thundersquall six minutes after taking off from Calcutta-Dum Dum [now Netaji Subhash Chandra Bose International Airport], India, killing all 43 on board. Witnesses observe the wingless Comet on fire plunging into the village of Jagalgori. A British aviation investigator, J. H. Lett, announces that the plane "collided with a fairly heavy body" and UFO rumors persist for about a year. However, leading investigators suspect structural failure. (Wikipedia, "de Havilland Comet"; Stringfield, *Situation Red*, Fawcett Crest, 1977, p. 141)

1953, May 4 — 1:50 a.m. A witness sees a football-shaped, metallic object caught in the glare of a rotating beacon near Goose Bay AFB [now CFB Goose Bay], Labrador. It is traveling south at high speed and a low altitude, and disappears into low-hanging stratus clouds. She hears a sound "like tins striking together." (Sparks, p. 199; Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, p. 262)

1953, May 5 — 9:45 a.m. Chemist Wells Alan Webb is standing in a field near the Vacuum Cooling Company plant, not far from Spain Flying Field and about a mile north of Yuma AFB [now Marine Corps Air Station Yuma] near Yuma, Arizona, when he sees a fuzzy-white oblong object at an angle of 45° in the north. He observes it both with the naked eye and with Polaroid glasses with a greenish tint that he uses for cloud observations. It is about one-half the diameter of the full moon. After 5 minutes, the object moves to a position 30° eastward and suddenly becomes circular in appearance, becoming gradually smaller. Three concentric dark rings appear around the object, the largest about six times its diameter when viewed with Polaroid glasses. Webb thinks that the rings are the result of the rotation of polarized light scattered from the atmosphere (Faraday effect). (NICAP, "Polaroid Glasses Expose Concentric Circles around Disc"; Wells Alan Webb, *Mars, the New Frontier: Lowell's Hypothesis*, Fearon, 1956, pp. 126–127; "Book Reviews," *UFO Investigator* 1, no. 2 (Aug./Sept. 1957): 24; UFOEv, p. 51)

1953, May 10 — 6:08 p.m. Capt. B. L. Jones is flying an Australian National Airways DC-3 just south of Mackay, Queensland. He radios the local control tower that a "strange object like a lighted glass dome" is maneuvering around his plane. He and his copilot watch the object for about 5 minutes during which time it climbs and dives at a speed of 200–700 mph. Finally, it crosses the path of the aircraft and disappears swiftly to the west. A Mr. W. Overell, the officer in charge at Mackay tower, sees the light climbing from about 4,000–5,000 feet in the west at great speed, although the radar shows no other aircraft in the vicinity. ("'Flying Saucer' Buzzing My Plane," *Brisbane (Queensland) Sunday Mail*, May 17, 1953, p. 1; "Inquiry on 'Flying Saucer,'" *Sydney (N.S.W.) Daily Telegraph*, May 18, 1953, p. 7; Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 52; Swords 377–378)

1953, May 10 — 11:00 p.m. Capt. Bob Jackson is piloting an Australian National Airways DC-3 near Woronora Dam, New South Wales, when he sees an object with an orange-colored light at the tail flash past toward the east near Wollongong. The radar tower at Mascot shows no traffic in the area. About 2 minutes later, the object reappears, makes a complete circle around the airliner, and speeds away toward the coast. ("Fear of Ridicule, So Kept Quiet," *Adelaide (S.A.) News*, January 5, 1954, p. 5; Swords 378)

1953, May 11 — A declassified MKUltra document indicates hypnosis is a major focus. Experimental goals include: the creation of "hypnotically induced anxieties," "hypnotically increasing ability to learn and recall complex written matter," studying hypnosis and polygraph examinations, "hypnotically increasing ability to observe and recall complex arrangements of physical objects," and studying "relationship of personality to susceptibility to hypnosis." Experiments are conducted with drug-induced hypnosis and with anterograde and retrograde amnesia while under the influence of such drugs. (Wikipedia, "MKUltra")

1953, May 12 — 3:20 a.m. USAF F-94 pilot Lt. D. C. Rogers and radar operator Lt. J. A. Lane track a radar target about 39 miles northwest of Goose Bay AFB [now CFB Goose Bay], Labrador. Rogers attempts to intercept but cannot make visual contact. (Sparks, p. 199; Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, p. 262)

1953, May 16 — 8:15 p.m. Photographer Herman Charmanne is near Bouffioulx, Belgium, when he hears a strange metallic vibration. Looking up, he sees a long white trail in the wake of an object that shoots off at a great speed. The object, a luminous sphere, stops and hovers, allowing him to take two photos that depict a fried-egg-looking shape with a long tail. Recent analyses indicate that the photos are likely the result of a chemical reaction during

the developing process, perhaps a flammable fluid deliberately poured on the image carrier that is then ignited. (Vicente-Juan Ballester Olmos and Wim van Utrecht, *Belgium in UFO Photographs, Volume 1 (1950–1988)*, FOTOCAT Report no. 7, 2017, pp. 12–30)

1953, May 18 — 6:55 p.m. A bright, luminous object is seen over Abadan, Iran. It travels very fast and is visible for 20 minutes. It is also seen over oil fields in Khuzestan Province. (ClearIntent, pp. 129–130)

1953, May 20 — At the junction of Jordan and Marble Creeks in Plumas National Forest, northern California, titanium prospector John Q. Black sees a silvery object, 8 feet in diameter, land on a nearby sand bar. On June 20 the saucer returns, along with a barrel-chested "midget pilot" wearing a "forest-green outfit" and a "peak-billed cap with a cord" around it. The UFO is about 40 feet away, resting on a rock, and has tripod-like landing gear. The pilot fills a rubber-like pail with creek water and goes back inside the craft (which has one small window) after hearing Black step on a stick. The craft takes off at a 45° angle with a hissing sound. Black had seen the same object on March 20, for a total of seven times. Black is alone for each sighting, so his partner John Van Allen cannot corroborate the story. The UFO's expected return on July 20 does not occur, perhaps because scores of sightseers descend on the Brush Creek area (snack bars are set up so that no one goes hungry during the vigil). (Coral Lorenzen, "Saucer Men with Buckets!!" *APRO Bulletin* 2, no. 1 (July 15, 1953): 1, 5; "Miners and Friend with Camera Wait Return of Men from Mars," *Stockton (Calif.) Evening and Sunday Record*, July 20, 1953, p. 1; "Little Men in Flying Saucer Miss Brush Creek Rendezvous," *San Francisco (Calif.) Chronicle*, July 21, 1953, p. 3; "Recent Sightings," *APRO Bulletin* 2, no. 2 (September 15, 1953): 6; Gray Barker, "The Report on the Brush Creek Saucer," *The Saucerian* 1, no. 2 (November 1953): 12–20; Wallace Kunkel, "The Little Man Who Wasn't There," *Fate* 7, no. 5 (May 1954): 48–52; Harold T. Wilkins, *Flying Saucers on the Attack*, Citadel, 1954, pp. 261–262; Gray Barker, *They Knew Too Much about Flying Saucers*, University Books, 1956, pp. 36–58; Coral Lorenzen, "UFO Occupants in United States Reports," in Charles Bowen, ed., *The Humanoids*, special issue of *FSR*, Oct./Dec. 1966, pp. 52, 53; Lorenzen, *Occupants*, Signet, 1967, pp. 118–119; Patrick Gross, UFOCAT, December 15, 2006; Curt Collins, "Flying Saucer Ambush: Brush Creek, CA, 1953," The Saucers That Time Forgot, November 17, 2017; Clark III 269; Clark IV 309)

1953, May 21 — 10:00 a.m. Eight disc-like objects are observed maneuvering in the sky for an hour or so above Prescott, Arizona, by sportsmen's club president Bill Beers, post office employee Ray Temple, and O. Ed Olson. Two of the discs are stationary, while the other six discs participate in maneuvers similar to a dogfight. The six swoop around in formation, peel off, and shoot directly up and down in a maneuver that cannot be duplicated by a plane. When they move, they vary from very slow to speeds faster than a jet plane. ("Flying Saucers Return to Prescott," *Prescott (Ariz.) Evening Courier*, May 22, 1953, pp. 1–2; Nukes 87)

1953, May 21 — Date of an alleged UFO crash and retrieval near Kingman, Arizona. "Fritz Werner" [pseudonym of Arthur G. Stansel Jr.] claims to have worked as an Air Force engineer on the retrieval of a "teardrop-shaped cigar" made of a dull material. He catches a glimpse of a small alien body lying in a tent. An informant in 1977 tells Leonard Stringfield that he had seen three alien bodies in a crate at Wright-Patterson AFB in Ohio after a UFO crash in Arizona. (Raymond E. Fowler, "What about Crashed UFOs," *Official UFO*, April 1976, pp. 55–57; Stringfield, *Situation Red*, Fawcett Crest, 1977, pp. 171–185; Leonard H. Stringfield, "Retrievals of the Third Kind: Part 1," *Flying Saucer Review* 25, no. 4 (July/Aug. 1979): 13, 18–19; Leonard H. Stringfield, "Retrievals of the Third Kind: Part 2," *Flying Saucer Review* 25, no. 5 (Sept./Oct. 1979): 6–7; Raymond E. Fowler, *Casebook of a UFO Investigator*, Prentice-Hall, 1981, pp. 199–203; Harry Lebelson, "The Kingman, Arizona UFO Enigma: A Closer Look," *Pursuit* 19, no. 4 (Winter 1986): 162–165; Good Above, pp. 398–400; Kevin D. Randle, *A History of UFO Crashes*, Avon, 1995, pp. 57–68; Leonard H. Stringfield, *UFO Crash Retrievals: Status Report VII, Search for Proof in a Hall of Mirrors*, The Author, February 1994, pp. 3–5; Linda Moulton Howe, "Part 1: An Alleged 1953 UFO Crash and Burial near Garrison, Utah," Earthfiles, November 10, 2005; Kevin D. Randle, "Kingman UFO Crash…Really?" A Different Perspective, May 11, 2011; Clark III 335–338; George Knapp, "I-Team: Kingman UFO Incident in 1953 Followed Nevada Explosions; Radar Blamed," KLAS-TV, Las Vegas, Nevada, February 3, 2020; Kevin D. Randle, "Kingman UFO Crash," A Different Perspective, May 14, 2020; Kevin D. Randle, "Kingman Rises from the Dead?" A Different Perspective, March 3, 2021; Kevin D. Randle, "UFO Crash Retrievals: Three with Explanations," A Different Perspective, January 15, 2024; Adam Goldsack, "The Kingman UFO Incident (1953)," The Unidentified, June 8, 2024; David Rudiak, "Kingman UFO Crash Main Page," Roswell Proof, August 2024; Kevin D. Randle, "The Kingman UFO Crash Conundrum," A Different Perspective, August 14, 2024; Kevin D. Randle, "David Rudiak, Kingman UFO Crash, and Other Rabbit Holes," A Different Perspective, September 1, 2024; Kevin D. Randle, "Kingman UFO Crash and Michael Schratt," A Different Perspective, September 26, 2024; Clark IV 372–374; "Area 51 Whistleblower, an Eyewitness, and a Researcher Talk about the 1953 Crashed UFO in Kingman, AZ," Eyes On Cinema YouTube

channel, January 3, 2025; Kevin D. Randle, "Kingman UFO Crash Again," A Different Perspective, April 14, 2025)

1953, May 23 — Radar tracks a target over Cape Province, South Africa, that makes six passes at more than 1,250 mph at 5,000–15,000 feet altitude. (Aimé Michel, *The Truth about FS*, p. 123; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 70–71)

1953, May 26 — 5:10 a.m. D. Beyers, driving 80 miles south of Brandvlei in Northern Cape Province, South Africa, sees a bright yellowish-green light in the clouds, then emerges. The light has the appearance of "burning hydrogen" and emits three streaks that maintain a fixed position with regard to the main light. He watches it for 50 minutes. (ClearIntent, p. 130)

1953, May 30 — After a small, bright-blue object with a strange irregular motion passes overhead at Palmerston North, New Zealand, numerous filaments of a "substance resembling spider webs, white in color and ashy in texture" float to earth. ("Palmerston North, New Zealand," *APRO Bulletin* 2, no. 2 (September 15, 1953): 8; Charles A. Maney and Richard Hall, *The Challenge of Unidentified Flying Objects*, NICAP, 1961, pp. 59–60; Clark III 124; Clark IV 151)

1953, May 31 — Project Blue Book issues its Status Report #11. (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 199–214)

1953, Summer —Two F-94 jets are scrambled at Ernest Harmon Air Force Base [now Stephenville International Airport], near Stephenville, Newfoundland, after base radar picks up an unknown target. One of the pilots gets radar and visual confirmation, then radios that he is going into a steep climb to give chase. The jet crashes into a mountain. The base is supposedly placed on red alert. (Stringfield, *Situation Red*, Fawcett Crest, 1977, p. 142)

1953, Summer — 10:00 p.m. A family is returning home on Scenic Avenue in Central Point, Oregon, when they see three entities along the side of the road only 6 feet away. They stop the car, and the beings glide across the road and disappear into the woods. They are 4 feet high, white, with satiny fur, and resemble very large geese, but with no beaks or wings. ("No UFO Seen: Just Creatures," *CUFOS Associate Newsletter* 5, no. 2 (April/May 1984): 3)

1953, June — Night. An F-94C Starfire with classified electronic gear takes off from Otis AFB [now Otis Air National Guard Base] in western Cape Cod, Massachusetts. Piloted by Capt. Suggs and radar operator Lt. Robert Markhoff, the jet takes off in a westerly direction. Shortly after attaining 1,500 feet over the Base Rifle Range, the engine quits functioning and the electrical system fails. The jet's nose drops and Suggs signals Barkhoff to bail out. Suggs bails out and he and his parachute wind up in a homeowner's backyard. The jet should have crashed nearby, but neither Markhoff or the airplane can be located, despite months of searching. Although this account comes from M/Sgt Clarence O. Dargie, and investigator Raymond Fowler obtains the accident report from Norton AFB [now San Bernardino International Airport], California, there appears to be no open record of this incident. The F-94C models, especially at first, have fire-control problems and electrical short circuiting. (Raymond Fowler, *UFOs: Interplanetary Visitors*, Prentice-Hall, 1974, pp. 287–291; Bob Pratt, "Conversations with Major Donald Keyhoe," Mutual UFO Network; Good Need, pp. 189–191; Barry Greenwood, "Questions on a 1953 Cape Cod Mystery," *UFO Historical Revue*, no. 8 (February 2001): 1–3)

1953, June — Secretary of Defense Charles Erwin Wilson abolishes the Research and Development Board for the politically motivated reason that suspected communist sympathizer Robert Oppenheimer is a sitting member. (Michael Hall and Wendy Connors, "The Research and Development Board: Unanswered Questions," *IUR* 26, no. 2 (Summer 2001): 9)

1953, June — Lt. Robert M. Olsson and J. Allen Hynek visit Coral Lorenzen at the Hotel Schroeder in Milwaukee, Wisconsin, and try to convince her that it is in the national interest for her to reduce excitement about UFOs by publishing cases. (Lorenzen, *FS Hoax*, pp. 82–83; Swords 197; Powell, *Keyhoe*, 101–102)

1953, June — Max B. Miller publishes the first issue of *Saucers*, a digest-sized quarterly of Flying Saucers International in Los Angeles, California. It continues until the Fall 1959 issue. (*Saucers* 1, no. 1 (1953); Clark III 1033; Clark IV 1149)

1953, June 9 — Sidney Gottlieb approves Project MKUltra's "Subproject 8" on LSD. Experiments include administering LSD to mental patients, prisoners, drug addicts, and prostitutes—"people who could not fight back," as one agency officer puts it.

1953, June 17 — 7:30 a.m. Several witnesses in Galveston, Texas, see a large, cigar-shaped object silently flying in from the Gulf of Mexico. One estimates it to be about 300 feet long and no greater than 150 feet in the air. The object makes a cloud and disappears. ("NUFORC Sighting 17561," National UFO Reporting Center, August 5, 2001; Herbert S. Taylor, "Mystery Clouds and the UFO Connection," *IUR* 29, no. 4 (July 2005): 19)

1953, June 18 — 2:30 a.m. Hilda Walker, her husband Lloyd, and 14-year-old Judy Myers are sitting on the porch of a house on Third Street in Houston, Texas, when they notice the entire front yard falling into a shadow. A shadowy thing settles in a nearby tree, and they look up to see a winged "batman" balancing on a tree limb. It is about 6.5 feet tall, wearing a dark cape and skin-tight dark pants, and quarter-length boots. Fifteen minutes later, the figure melts away. Thet hear a swooshing noise across the street and see a rocket-shaped object moving upward and trailing smoke, and then they see a "flying paintbrush" with a fiery tail flying along the northeastern horizon. ("Rocket-Propelled 'Batman' Zooms across Houston Sky," *Austin (Tex.) American,* June 19, 1953, p. 1; William C. Thompson, "Houston Bat Man," *Fate* 6, no. 10 (October 1953): 26–27; Clark III 1106; Clark IV 1232)

1953, June 24 — 11:30 a.m. A weather observer stationed at remote Simiutaq island, western Greenland, is tracking a weather balloon with a theodolite. He notices a rotating red object flying from southeast to northwest and approaching the balloon, which is at 18,000 feet. The object collides with the balloon, disintegrating it. Afterward, it hovers in a circular motion for 15 seconds and departs into the wind. He watches it another 5 minutes until it is lost to view. (Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, pp. 69–70)

1953, June 24 — Night. A flight of US Navy F2H Banshee jets out of NAS Quonset Point [now Quonset Point Air National Guard Station] are on a night training mission over southern Rhode Island when two aircraft in the formation collide in mid-air. The crash occurs at 19,000 feet near or over the Exeter/West Greenwich town lines, and debris is scattered for several miles in all directions. The pilot of one Banshee, Lt. Jg. Jack Oliver Snipes, is killed. An emergency cable sent to the Director of Air Force Intelligence in the Pentagon indicates that "flying objects" are seen by the pilots prior to the accident. Its distribution list includes the fledgling National Security Agency. (Good Above, pp. 272–273, 488; "Exeter/West Greenwich, Rhode Island: June 24, 1953," New England Aviation History, October 2017)

1953, June 30 — 11:45 p.m. An orange-colored, oval object is seen for a period of 20 minutes in the northern sky moving to the southeast by at least 10 personnel of the US 912th Air Control and Warning Squadron stationed at Ramore Air Station radar site [now CFS Ramore], 3 miles west of Ramore, Ontario. The first person to see it is A/2c Dean McDonald who comes out of the maintenance room to inspect a power unit that has caused a minor breakdown of the search radar set. He calls two other airmen to witness it. One of the two thinks the object is the moon. The first airman gets hysterical and calls the Charge of Quarters at the Domestic Area three miles to the southwest. At least seven witnesses in that area see the object, and two of them report that the moon is visible and the UFO is distinct and separate. The object soon fades away slowly to the north. (NICAP, "Ramore, Ontario, Pinetree Line Radar Site, UFO Sighting, June 30, 1953"; [Project Blue Book file])

1953, July — The 4602nd AISS has taken over nearly all of Blue Book's field investigations. The unit then is supposed to send the reports to ATIC for evaluation or explanation, and ATIC would determine if a follow-up investigation is needed. In practice, the 4602d does much of the analysis. (Ruppelt, p. 232; Jacobs, *The UFO Controversy,* Signet ed., 1976, p. 119)

1953, July — Lt. Robert M. Olsson of Project Blue Book sends five supposedly unsolved UFO cases of 1953 to Cal Tech physicist Howard P. Robertson in an effort to see if any change in the Robertson Panel's conclusions is warranted. One of them is the Sea of Japan ELINT case of April 14. Apparently, Robertson's mind is not changed. He is now heading up the Robertson Committee of the newly formed National Security Agency, tasked with developing better use of intercepted communications and radars in order to provide strategic warning of a military attack by the Soviet Union. (Clark III 55)

1953, July 1 — 1:00 p.m. A cowherd, Maximo Munoz Olivares [or Hernáiz], 14, sees a "big balloon" on the ground behind him in Villares del Saz, Cuenca, Spain, after a faint whistling attracts his attention. Shaped like a water jug, the object is metallic. Through an opening come three dwarfs 2 feet tall, with yellow faces, narrow eyes, and oriental features. They speak in a language he cannot understand. They are dressed in blue and have a sort of flat hat with a visor in front and a metal sheet on their arms. One of them smacks the boy's face, then they reenter the machine, which glows very brightly, makes a soft whistling sound, and goes off "like a rocket." Footprints and four holes 2 inches deep, forming a perfect square 13 inches in size, are found by police. Possible hoax. (Antonio Ribera, "The Landing at Villares del Saz," in Charles Bowen, ed., *The Humanoids,* special issue of *FSR,* Oct./Dec. 1966, pp. 28–30; Vicente-Juan Ballester Olmos, *A Catalogue of 200 Type I UFO Events in Spain and Portugal*, Center for UFO Studies, 1976, p. 3; Loren E. Gross, *UFOs, a History: 1953, March–July*, The Author, 1989, pp. 92–93; Clark III 270; Eghigian, *After*, p. 144; Clark IV 310)

1953, July 7 — Evening. An Atlanta, Georgia, barber named Edward Watters buys a monkey from a pet shop, shaves and kills it, cuts off its tail, then takes it with two friends, Tom Wilson and Arnold Payne, to US Highway 78 near Leland, Georgia, and waits for the first car to stop. They tell the driver, who turns out to be Cobb County policeman Sherley Brown, that they had seen a flying saucer and accidentally killed one of its occupants. They

bring the dead animal to the *Atlanta Constitution* office, where reporter Thomas McRae notifies the FBI, which alerts the Air Force at Dobbins AFB [now Dobbins Air Reserve Base] in Marietta. The animal is taken to Emory University Hospital in Atlanta, where Anatomy Professor Marion Hines identifies it properly as a shaved Capuchin monkey. Watters admits the hoax and is fined $40 by a judge. (Wikipedia, "Martian Monkey"; Loren E. Gross, *UFOs, a History: 1953, March–July*, The Author, 1989, pp. 96–102; "Monkey from Mars Graces Ga. Crime Lab Display," NBC News, July 29, 2008; Clark III 593; "Project Blue Book Files Contain Records of Notorious 1953 Mableton UFO Hoax," *Cobb County (Ga.) Courier*, October 5, 2024; Clark IV 653)

1953, July 16 — Lt. Col. William F. Barns attains an official world airspeed record of 716 mph in a North American F-86D Sabre over the Salton Sea, California. (Wikipedia, "North American F-86D Sabre"; "16 July 1953," This Day in Aviation History, July 16, 2021)

1953, July 19 — 3:00 p.m. After an F-86 has been circling over a particular spot in Oak Ridge, Tennessee, a black object emerges from a high white cloud and takes up its position after the plane has left toward Knoxville. "This object was extremely black in color, having an appearance of a deep black metal exterior with a fine gloss. It did not leave a vapor trail or were there any lights of shine noticed. No sound was heard. The object flew east at a tremendous speed for what appeared to be approximately three miles where it stopped. The object was then joined by two more of these same objects. A formation similar to a spread V was formed and the objects, at a tremendous speed flew in an eastward direction." The report is made by the Atomic Energy Commission and addressed to Army Adjutant General William Edward Bergin in Washington, D.C. (NICAP, "Black Objects Maneuver over Area nr F-86"; "Air Space Violation at Oak Ridge, Tennessee," July 27, 1953)

1953, July 20 — Ed Ruppelt returns to Project Blue Book as either acting chief or consultant until August 31. (Sparks, p. 14; Clark III 55)

1953, July 25 — ATIC guide, *How to Make FLYOBRPTS*, a 68-page manual for officials required to make UFO reports, is published. (Air Technical Intelligence Center, *How to Make FLYOBRPTS*, July 26, 1953)

1953, July 26 — 9:39 p.m. At Perrin AFB [now North Texas Regional Airport] in Sherman, Texas, ground observers see 7 UFOs, each carrying a bright red light, hovering at 5,000–8,000 feet. They are in a formation of two groups of three, and one trailing, then come together to form the letter "Z." Then they circle, gain altitude, and fade from sight. Citizens in Sherman and Denison also see the objects. Total duration is 16 minutes. This is classified as a "Vital Intelligence Sighting" and sent to the Air Defense Command, the Secretary of Defense, and the CIA. (CIRVIS Report, July 26, 1953)

1953, July 30 — Science journalist John Joseph O'Neill observes through a telescope a feature on the western edge of the lunar Mare Crisium that he interprets as a giant natural bridge. The observation is prematurely confirmed by amateur Welsh astronomer Hugh Percy Wilkins. Although it turns out to be an illusion, the location is still known as O'Neill's bridge. When viewing conditions are poor or the telescope's aperture is small, the feature resembles a bridge joining the tips of the capes Promontorium Lavinium and Promontorium Olivium. If viewing conditions are good and the instrument is large enough, the feature is seen as two small, eroded crater pits. (The Moon Wiki, "O'Neill's Bridge"; Andrew May, "The Lost Ruins of the Moon," *Fortean Times* 358 (October 2017): 56–57)

1953, July 30–August 1 — A large UFO is seen for three nights over Sequoia and Kings Canyon National Parks in California. Park Superintendent Elvind T. Scoyen and his staff observe it once at close range. On August 1, a squadron of Air Force fighters sees the object streaking downward just before midnight. It stops abruptly then shoots upward. (Keyhoe, *Aliens from Space*, Signet ed., 1974, pp. 40–41)

1953, July 31 — Lt. Robert Olsson leaves Project Blue Book. He later tells Ruppelt his 5-month tenure "was like being president of Antarctica on a nonexpedition year." He is replaced by Airman 1C Max G. Futch. (Sparks, p. 14; Ruppelt, p. 228; Clark III 55, 937; Clark IV 75, 1047)

1953, July 31 — 7:00 p.m. Five Poles and two Germans see a disc-shaped object about 16 feet in diameter land in a field near a railroad track on Wolin Island, Poland. After several minutes it rises up and flies away at great speed. (Bronislaw Rzepecki, "UFOs and Ufologists in Poland," *IUR* 11, no. 2 (Mar./Apr. 1986): 15; Vallée, *Magonia*, p. 203)

1953, August — Wilbert B. Smith completes his classified report on Project Magnet for the Canadian Department of Transport, writing that it can be deduced that UFOs are 100 or more feet in diameter, they can travel at speeds of several thousand miles per hour, and can reach high altitudes. "It is difficult to reconcile this performance with the capabilities of our technology [and] we are forced to the conclusion that the vehicles are probably extraterrestrial, in spite of our prejudices to the contrary." The DOT agrees to his proposal to set up an electronic station for a "24-hour watch for flying saucers" in a hut at Shirley's Bay, off Lake Manitou, Ontario. Equipment includes an ionospheric reactor, electronic sound measurement devices, gamma-ray detector, gravimeter, magnetometer, and radio set. ("Canada Plans Flying Saucer Observatory," *Washington (D.C.) Times-Herald*, November 13, 1953, p.

27; "Flying Saucers Project Denied," *New York Times*, November 14, 1953, p. 3; Clark III 1078–1079; Clark IV 1195)

1953, August 1 — The US Air Force Security Service moves its headquarters from Brooks Air Force Base [now closed] to Kelly Air Force Base [now Kelly Field Annex], both in San Antonio, Texas. (Wikipedia, "Air Force Intelligence, Surveillance, and Reconnaissance Agency")

1953, August 5–6 — Around 8:00 p.m. Ground Observer Corps observer Phyllis Killian spots a UFO in Black Hawk, South Dakota. Soon after, radar at Ellsworth AFB near Rapid City tracks a "well-defined, solid, and bright" object. The base scrambles an F-84 and the pilot sees the UFO. Many witnesses see the object accelerate and climb. The F-84 pursues but can reach no closer than 3 miles. Now low on fuel, the F-84 returns, followed by the UFO. Immediately, another F-84 is sent up. Before long, the pilot receives strong radar returns of a target right in front of him. Fear prevails and he breaks off the chase. The UFO goes off the scope, traveling northeast. Reports soon come from Brunswick of a fast-moving, bright blue object, similar to the Rapid City object. It hovers near an air filter center, performing more maneuvers and disappearing after midnight. Before it leaves, three more UFOs are seen at 10,000 feet for three hours. Ruppelt personally investigates and calls it "the best" in the USAF files, Hynek writes that the "entire incident…has too much of an Alice-in-Wonderland flavor for comfort." Menzel blames the star Capella. The official file is several hundred pages long. (NICAP, "The Rapid City / Ellsworth AFB Incident (RV)"; Sparks, p. 203; Edward J. Ruppelt, "What Our Air Force Found Out about Flying Saucers," *True*, May 1954, pp. 19–20; Ruppelt, pp. 232–235; Condon, pp. 132–136; Loren E. Gross, *UFOs, a History: 1953, August–December*, The Author, 1990, pp. 2–3; Swords 215; Jan Aldrich; Patrick Gross, "The Ellsworth AFB Radar Multiple Visual Case, 1953"; Powell, *Keyhoe*, 137)

1953, August 6 — 5:00 p.m.–12:00 midnight. An estimated 75 objects with lights are seen by many witnesses on the ground around Naval Air Station Barbers Point [now Kalaeloa Airport], Hawaii, from the airport control tower and from the air. Many are also detected by radar. At 9:00 p.m., the crew of a Navy patrol aircraft reports three head-on passes. These close calls alarm the pilot so much he lands immediately. Jet fighters are scrambled and the same night an interceptor pilot sees a "glowing blob" rising rapidly toward him. It comes to a sudden stop just behind his aircraft then accelerates briefly until it is beside him for four more seconds before accelerating away out of sight at several times his own top speed. (Keyhoe, *FS Conspiracy*, p. 63; Loren E. Gross, *UFOs, a History: 1953, August–December*, The Author, 1990, p. 30)

1953, August 9 — 9:34 p.m. Supervisor Larry E. Towner and other Ground Observer Corps personnel report a glowing disc about 200 feet in diameter over Moscow, Idaho. At 10:10 p.m., the first of two F-86s is scrambled. The object lingers, with other lights seen, until around 5:00 a.m. (NICAP, "Three F-86's Chase Disc Spotted by GOC"; Loren E. Gross, *UFOs, a History: 1953, August–December*, The Author, 1990, pp. 3–4)

1953, August 10 — Wilbert B. Smith issues another report on Project Magnet, in which he concludes there is a "substantial probability of the real existence of extraterrestrial vehicles" that use a "technology considerably in advance of what we have." The report is eventually sent to Prime Minister Louis St. Laurent. (Good Above, pp. 185, 187)

1953, August 12 — The USSR tests its first thermonuclear device, RDS-6s or Joe 4, at the Semipalatinsk Test Site in Kazakhstan. A tenfold increase in explosive power is achieved by a combination of fusion energy and neutron-initiated fission. Scholars dispute the authenticity of RDS-6 as a true thermonuclear device, as it does not manage to produce a yield consistent with a true hydrogen bomb. (Wikipedia, "RDS-6s")

1953, August 13 — Paramount Pictures' *The War of the Worlds* premieres in New York City. It is a modern retelling of H. G. Wells's story of an invasion from Mars and features a Northrop YB-49 flying wing dropping an atomic bomb on the invading Martians. The color footage comes from a test flight. The film is produced by George Pal, directed by Byron Haskin, and stars Gene Barry and Ann Robinson. (Wikipedia, "*The War of the Worlds* (1953 film)"; Internet Movie Database, "The War of the Worlds"; Bill Warren, *Keep Watching the Skies!*, McFarland, 2010, pp. 876–887)

1953, August 16–18 — Flying Saucers International, directed by Max Miller, holds the first UFO conference at the Hollywood Hotel in Los Angeles, California, featuring contactee speakers Orfeo Angelucci, Truman Bethurum, George Van Tassel, and George Adamski, as well as Frank Scully, science-fiction illustrator Mel Hunter, and the Amazing Criswell. Some 1,500 people attend, and 2,000 are turned away at the door. On the final day, the attendees vote to petition the US government to release all UFO data that does not jeopardize national security, and someone manages to draft and sent a letter to President Eisenhower. (Jack Jones, "Flying Saucer Believers Hear Erstwhile Skeptic," *Los Angeles Daily News*, August 18, 1953, p. 8; Orfeo Angelucci, "A Release: On Flying Saucers First Convention," *Interplanetary News Digest* 1, no. 2 (October 1953): 1; Max Miller, "First Flying Saucer Convention," *Saucers* 1, no. 3 (December 1953): 2–4; Frank Scully, "Summary of Lecture Given at Convention," *Saucers* 1, no. 3 (December 1953): 3–4; Max Miller, "Editorial," *Saucers* 2, no. 3 (September

1954): 2–3; Story, p. 91; Loren E. Gross, *UFOs, a History: 1953 August–December*, The Author, 1990, pp. 7–8; James W. Moseley and Karl T. Pflock, *Shockingly Close to the Truth! Confessions of a Grave-Robbing Ufologist*, Prometheus, 2002, pp. 72–75; Clark III 1033; Clark IV 1149)

1953, August 17?— Lina Ivanova Kravets is in her garden in Shtanivka, Ukraine, when she sees a trio of intruders cutting branches off her apple, plum, and cherry trees. Approaching closer, she sees they are 11-foot-tall entities wearing dark overalls, helmets, and gloves. They claim to be extraterrestrials, converse with her about God and their peaceful home world that is prone to natural disasters and somehow affected by the earth's wars, and insist they are on a mission to rescue a missing scout team. They then point out a silvery sphere hovering just above the ground with similar tall being standing next to it. Before the lengthy encounter ends, the beings offer Kravets a piece of bread the size of a small coin. Breaking it open, she sees something dark and odorless inside, so she refuses it. The beings then walk to the sphere in a peculiar waddling manner, wave as they enter, and take off in the craft at terrific speed. (Peter Rogerson, "INTCAT 1953"; Joshua Cutchin, "The Great Alien Bake-Off," *Fortean Times* 332 (November 2015): 44)

1953, August 19 — 9:00 p.m. A small, fast-moving, ricocheting fireball rips a foot-wide hole through a metal billboard at Middlestone Avenue and Front Street in East New Haven, Connecticut. IFSB investigator August C. Roberts and Joseph Barbieri steal a piece of the sign during an investigation by Naval Ordnance personnel. IFSB sends the sample to Col. Robert B. Emerson, an Army physicist at Louisiana State University in Baton Rouge, who contacts friends at Oak Ridge Laboratory in Tennessee to have it analyzed, but nothing else is heard of this sample. APRO arranges for a separate analysis of the deposits on the sign performed by Anderson Laboratories in Milwaukee, Wisconsin, and the Chicago Spectrographic Service Laboratory. They determine that the fragments consist of copper and copper oxide and are not meteoritic. Michael D. Swords suggests that Roberts's retrieval of the metal fragments would have attracted the attention of federal officials. (NICAP, "New Haven Signboard Case"; "Mystery Blast Shatters Sign," *New Haven (Conn.) Journal-Courier*, August 20, 1953; "Blast Rips Sign in Conn.: W. Haven Object Pierces Steel," *APRO Bulletin* 2, no. 2 (September 15, 1953): 1, 4; "Metal Gives Evidence in Saucer Hunt," *Cedar Rapids (Iowa) Gazette*, October 21, 1953, p. 14; Keyhoe, *FS Conspiracy*, pp. 30, 233–234; Michael D. Swords, "Tales from the Barker Zone," *IUR* 17, no. 6 (Nov./Dec. 1992): 5–7; Clark III 728–729; Clark IV 809)

1953, August 20 — 9:05 p.m. The crew of a TB-29 sees a grayish oval object near Castle AFB [now Castle Airport Aviation and Development Center], northeast of Atwater, California. The UFO makes four passes at the plane, then dives vertically as if it consists of two objects. (NICAP, "TB-29 Crew Files CIRVIS Report"; Sparks, p. 203; Covert 23)

1953, August 21 — Test pilot Lt. Col. Marion Eugene Carl reaches an unofficial altitude of 83,235 feet in a Douglas D-558-2 Skyrocket. (Wikipedia, "Marion Eugene Carl")

1953, August 22 — Dusk. Mexico City taxi driver Salvador Villanueva Medina is chauffeuring some American tourists to do some shopping in Nuevo Laredo, but the car breaks down just north of Ciudad Valles. The tourists catch a ride back to town and leave Villanueva behind to try to fix their car. He is approached by a short man with a white face and wearing a one-piece garment who claims to be an aviator. He walks away after a short time but returns with a companion at night when Villanueva is trying to sleep in the car. He realizes that they are space people and accompanies them to their spacecraft, where they tell him about life on other planets. Later he claims to have visited their planet, which he assumes is Venus. Villanueva's tale is heavily influenced by George Adamski. (Desmond Leslie, "Mexican Taxi Driver Meets Saucer Crew?" *Flying Saucer Review* 2, no. 2 (Mar./Apr. 1956): 8–12; Bryant and Helen Reeve, *Flying Saucer Pilgrimage*, Amherst Press, 1957, pp. 55–70, 82–83; Salvador Villaneuva Medina, *Yo estuve en el planeta Venus*, The Author, 1958; Patrick Gross, "URECAT," June 26, 2007; Eghigian, *After*, pp. 128–130)

1953, August 23 — 12:00 noon. Tom P. Drury, deputy director of the Civilian Aviation Department at Port Moresby, Papua New Guinea, takes 24 frames of 8mm color film of a silvery object that emerges from a cloud and climbs quickly, leaving a vapor trail. The Royal Australian Air Force and USAF intelligence are said to have studied the film, which has since disappeared, with only a few third-generation stills of poor quality remaining. Later researchers suspect a daytime meteor. (NICAP, "Drury Film / Saucer-Like Object Climbing"; Sparks, p. 204; "'Missile' over N.G. Reported," *Warwick (Queensland) Daily News*, September 7, 1953, p. 2; "Flying Saucer Filmed," *Lithgow (N.S.W.) Mercury*, January 25, 1954, p. 2; "America Will Examine Our 'Saucer' Film," *Perth West Australian*, January 25, 1954, p. 1; Edgar Jarrold, "The Port Moresby Photos," *Australian Flying Saucer Magazine*, February 1955, pp. 2–3; "The Port Moresby Film: Does It Support Rev. Father Gill's Case?" *Australian Flying Saucer Review* 1, no. 1 (June 1960): 5; Norman Cruttwell, "The New Guinea Sightings," *APRO Bulletin*, July 1961, p. 6; Norman E. G. Cruttwell, "Flying Saucers over Papua," in Charles Bowen, ed., *UFOs in Two Worlds*, special issue of FSR, August 1971, pp. 3–38; Good Above, pp. 162–163; Bill Chalker, "The Drury

UFO Film Affair: A Study of a Celebrated Australian Case, Part 1," 2001; Bill Chalker, "The Drury UFO Film Affair: A Study of a Celebrated Australian Case, Part 2," 2001; Herbert S. Taylor, "Mystery Clouds and the UFO Connection," *IUR* 29, no. 4 (July 2005): 17–18; Keith Basterfield and Paul Dean, "Cold Case Review of the 23 August 1953, Port Moresby Visual Sighting and Colour Movie Film," April 2017; Clark III 416–417; Clark IV 461–463)

1953, August 24 — Contactee George Van Tassel gets to step, for the first time, inside a flying saucer, when an extraterrestrial named Solganda wakes him up and leads him to a waiting ship, giving him a tour of the interior and a technique for rejuvenating the human body before dropping him off and shooting back into space. (Jody Rosen, "Welcome to the Integratron," *New York Times Magazine,* August 20, 2014; Lesla Miller Schnur, "G. W. Van Tassel's Integraton," The Haunted Librarian, August 27, 2021)

1953, August 26 — USAF issues Air Force Regulation 200-2, which tightens UFO reporting and investigating procedures, further restricting the release of UFO information and superseding Air Force Letter 200-5. It directs that all confirmed UFO reports be sent electronically to air force intelligence. Tangible evidence must go to ATIC in Dayton. It also confines UFO investigations to three groups: USAF intelligence at the Pentagon, the 4602nd AISS, and ATIC (although ATIC only gets reports after they go to the 4602nd). Sightings are only to be discussed with "authorized personnel." Reports by USAF personnel no longer go to Project Blue Book, which is now only a PR front. Some good cases still go there, but far fewer unidentifieds. Only solved cases are to be discussed publicly; those still unidentified are to remain classified at the Restricted level. ("Unidentified Flying Objects Reporting," Air Force Regulation 200-2, August 26, 1953; Swords 198–199; Clark III 918; Clark IV 1028)

1953, August 27 — 9:45 p.m. A USAF pilot, M/Sgt, and others, all on the ground, see a meandering light for 50 minutes at Greenville AFB [now Mid-Delta Regional Airport], Mississippi. (Sparks, p. 204)

1953, August 28 — A Ground Observer Corps volunteer watches 14 cigar-shaped UFOs silently moving over San Rafael, California. One appears to be leading the formation at about 200 mph. They are first seen heading west through breaks in the clouds, then turn north and disappear behind clouds. (Good Above, p. 278)

1953, August 31 — Edward J. Ruppelt leaves Project Blue Book permanently to take up a job as senior engineer at Northrop Aircraft, leaving Max Futch in charge as acting chief through December. (Sparks, p. 14; Clark III 55; Powell, *Keyhoe,* 111)

1953, September — George Adamski's account (ghostwritten or at least heavily edited by Clara John) of his meeting in the desert with the Venusian named Orthon is appended to an already completed manuscript on modern and historical UFO reports by Irish occultist Desmond Leslie and published as *Flying Saucers Have Landed.* It begins appearing in bookstores in the US, UK, and Canada this month. Leslie asserts that the first spaceman (a Venusian) arrived on earth in 18,617,841 B.C. [in the early Miocene Epoch] and claims that early UFOs were called vimanas in Sanskrit epics like the *Ramayana.* He also argues that the Great Pyramid and megalithic structures were built with levitation techniques derived from space people. (Desmond Leslie and George Adamski, *Flying Saucers Have Landed,* British Book Centre, 1953; Arthur C. Clarke, "Reviews: *Flying Saucers Have Landed,*" *Journal of the British Interplanetary Society* 13, no. 2 (March 1954): 119–122; Clark III 40, 103; Curt Collins, "The Woman Who Made UFO News," The Saucers That Time Forgot, December 19, 2024; Clark IV 59, 131)

1953, September — Airline stewardess Gloria Lee of Westchester, California, begins to hear a voice in her head that identifies itself as "J.W.," a resident of Jupiter. Lee insists on a physical visit. Not long afterward, as she is hanging wash in her backyard, she hears the voice say, "Well, you've been wanting to see me." She looks up and sees "a saucer, big as life, flying toward Santa Monica." She has other experiences and founds the Cosmon Research Organization to publish and study J.W.'s teachings, much of which resemble philosophy in the 1882 book *Oahspe,* produced by automatic writing by John Ballou Newbrough. She goes on the contactee lecture circuit. (Gloria Lee, *Why We Are Here: By J.W., a Being from Jupiter through the Instrumentation of Gloria Lee,* Cosmon Research Foundation, 1959; Gloria Lee, *The Changing Conditions of Your World,* Cosmon Research Foundation, 1962; Clark III 682–683; Eghigian, *After,* p. 140; Clark IV 758)

1953, September — Genevieve A. Johnston begins publishing the contactee newsletter *Interplanetary News Digest* in Joshua Tree, California. It continues through spring 1955. (*Interplanetary News Digest* 1, no. 1 (September 1953))

1953, September — Gray Barker starts publishing *The Saucerian Bulletin* in Clarksburg, West Virginia, which covers UFO reports, monster yarns, contactee tales, and the latest rumors about Albert K. Bender. It continues through October 1962. (*Saucerian Bulletin* 1, no. 1 (September 1953); Clark III 178; Clark IV 214)

1953, September — Night. A witness, F. Campaña, near Santoña, Spain, sees a bright blue object rise at a 75° angle from the Cantabrian Sea about 2 miles away. It is visible for one minute before it passes out of sight. (Vicente-Juan

Ballester Olmos, *A Catalogue of 200 Type-I UFO Events in Spain and Portugal*, CUFOS, April 1976, p. 3; Dolan, USO1, 163)

1953, September 7 — British pilot Neville Duke reaches 728 mph in a Hawker Hunter Mk.3 at Littlehampton, England. (Wikipedia, "Neville Duke")

1953, September 7 — 6:30 p.m. Don P. Hollister, a technical writer for Goodyear Aircraft, notices a grayish-blue object heading north directly over his backyard in Cleveland, Ohio, at less than 3,000 feet altitude. It is shaped like an equilateral triangle, but rounded somewhat on the sides and angles. It is rotating on a central axis. The object disappears after 5 seconds. (UFOEv, p. 70)

1953, September 10 — Truck driver Gene Davis is traveling on State Highway 67 between Breckenridge and Graham, Texas, when he sees a triangular object cross the road in front of him at a height of about 6–7 feet. He estimates it is about 4 feet from one tip of the triangle to the next, about one foot thick, and appears to be made of shiny metal. Another driver headed in the opposite direction also sees the object. They both jump out of their vehicles, but by that time the object is hovering in a field about 200 feet away and some 9–10 feet off the ground. It takes off straight up. ("Driver Asserts Flying Saucer Crossed Path," *Freeport (Tex.) Daily Facts-Review*, September 11, 1953, p. 7)

1953, September 15–19 — Operation Top Hat, a "local field exercise," takes place at the Army Chemical School [now the US Army CBRN School] at Fort McClellan [now closed], Alabama. The experiments use Chemical Corps personnel to test decontamination methods for biological and chemical weapons, including sulfur mustard and nerve agents. The personnel are deliberately exposed to these contaminants, are not volunteers, and are not informed of the tests. In a 1975 Pentagon Inspector General's report, the military maintain that Operation Top Hat is not subject to the guidelines requiring approval because it is a line-of-duty exercise in the Chemical Corps. (Wikipedia, "Operation Top Hat")

1953, September 26 — British pilot Mike Lithgow attains an official world airspeed record of 736 mph in a Supermarine Swift F 4 at Castel Idris, Tripoli, Libya. (Wikipedia, "Mike Lithgow")

1953, September 28 — Albert K. Bender confides to Gray Barker and a few others that three menacing men dressed in black suits have called on him, told him the answer to the UFO mystery, and insisted that he will go to jail if he repeats it. The experience allegedly terrifies him, and he decides to close the International Flying Saucer Bureau. Barker immortalizes the episode in a 1956 book, *They Knew Too Much about Flying Saucers*, and Bender breaks his long silence in 1962 with *Flying Saucers and the Three Men*, in which he claims that the visitors are not government agents but monsters from the distant planet Kazik. Even Barker concedes privately that he cannot swallow Bender's fantastic tale of abduction to the South Pole by monstrous space beings. Bender does little to promote the book and soon moves to Los Angeles and secures an unlisted telephone number. However, the book does reveal Bender's long-time obsession with science fiction, horror movies, and the occult. ("Statement of Importance," *Space Review* 2, no. 4 (October 1953): 1; [Gray Barker], "Editorial: The I.F.S.B. Closing," *The Saucerian* 2, no. 1 (February 1954): 1–10; Gray Barker, *They Knew Too Much about Flying Saucers*, University Books, 1956; Albert K. Bender, *Flying Saucers and the Three Men*, Saucerian, 1962; Story, pp. 50–51; Michael D. Swords, "Tales from the Barker Zone," *IUR* 17, no. 6 (Nov./Dec. 1992): 6; "Men in Black – Albert K. Bender on MIB and International Flying Saucer Bureau," Ufology: A Primer in Audio 1938–1959, November 21, 2013; Clark III 189–192, 623, 728–729; Eghigian, *After*, pp. 97–98; Clark IV 224–227, 807–809)

1953, September 28 — 7:10 p.m. In Palmdale, California, a UFO appears on an F-94C radarscope for a period of 15 seconds. The object is traveling on a 60° course at an estimated speed of 2,300 mph. It is 4 miles away when first seen and compares with a C-47 in size on the radarscope. The F-94 was moving at 345 mph at 21,000 feet. The same or another object is observed visually from another F-94C for six seconds at 7:00 p.m. The object is described as round, orange in color, and traveling on the same course as the first object. (NICAP, "F-94C Tracks UFO at 200 Knots"; Sparks, p. 204)

1953, Late September — Night. Baltimore, Maryland, astronomer James C. Bartlett Jr. is observing a transit of the star Fomalhaut when he notices four large lights moving slowly in the sky. He looks at them through binoculars and sees that they are on the noses of two enormous cigar-shaped objects at about 3,000 feet altitude. He can also see an apparent cabin and portholes and he hears a sound like a piston engine. ("Two Huge UFOs Sighted by Baltimore Astronomer," *UFO Investigator* 1, no. 5 (Aug./Sept. 1958): 1, 3)

1953, September 30 — Project Blue Book issues its Status Report #12. (US Air Force, *Projects Grudge and Blue Book Reports 1–12*, NICAP, 1968, pp. 215–235)

1953, Autumn — Dusk. Cecil Tenney is driving near Dutton, Montana, when he sees a cigar-shaped object about 200 feet away. Apparently in trouble, it belches fire and smoke, and after a few minutes he hears an explosion. Balls of fire rain down from the sky. He tells the story to a highway patrol officer at a nearby bar before driving on to Conrad,

Montana. That evening a colonel from Great Falls AFB [now Malmstrom AFB] calls and tells him to show up at the base in the morning. He is interrogated there for 30 minutes, and on the way out sees soldiers carrying bags that he thinks might contain body parts. (Leonard H. Stringfield, "Retrievals of the Third Kind: A Case Study of Alleged UFOs and Occupants in Military Custody," *MUFON 1978 UFO Symposium Proceedings,* Mutual UFO Network, 1978, pp. 77–105; Clark III 342; Clark IV 378)

1953, October — The final issue of *Space Review* edited by Albert K. Bender states that UFOs are "no longer a mystery. The source is already known, but any information about this is being withheld by orders from a higher source." With the shut-down of Bender's IFSB, its English branch in Bristol becomes the British Flying Saucer Bureau, with Edward L. Plunkett as president. It affiliates with the Flying Saucer Club in Hove, Sussex. ("Statement of Importance," *Space Review* 2, no. 4 (October 1953): 1; "Strange News from America," *Flying Saucer News,* no. 3 (Autumn 1953): 6, 13; Clark III 189; Clark IV 225)

1953, October 1— Donald E. Keyhoe's *Flying Saucers from Outer Space* is published by Henry Holt. Excerpts appear in the October 20 issue of *Look.* His message is that aliens are here, the military knows it, and they are covering it up from the public to avoid panic. He has gotten clearance from Ruppelt and Chop to include 51 classified UFO reports from the Air Technical Intelligence Center, which runs Project Blue Book. The Air Force states that Keyhoe is misrepresenting their analyses, so he sends a telegram to USAF Secretary Harold E. Talbott and Gen. Sory Smith, saying that if he really misrepresented anything, as a Marine Corps officer he should be disciplined. The Air Force offers no comment. In the book, he takes note of a curious document (never published and now lost) prepared by USAF Col. William C. Odell titled "Planet Earth: Host to Extraterrestrial Life," in which he speculates on aliens crossing space in search of new planets to live on once their own fails. (Wikipedia, "*Flying Saucers from Outer Space*"; Donald E. Keyhoe, *Flying Saucers from Outer Space*, Holt, 1953; Douglas Larsen, "Saucer Scribe Believes Public Convinced Reports Are Authentic," *Hazelton (Pa.) Plain Speaker,* December 16, 1953, p. 5; Keyhoe, *FS Conspiracy*, p. 55; James W. Moseley and Karl T. Pflock, *Shockingly Close to the Truth! Confessions of a Grave-Robbing Ufologist*, Prometheus, 2002, pp. 44–45; Michael D. Swords, "Colonel Odell and the Invasion of Earth," *IUR* 30, no. 3 (May 2006): 3–6; Powell, *Keyhoe,* 130; Graff 99–100)

1953, October 3 — USN pilot James B. Verdin reaches 753 mph in a Douglas F4D Skyray over the Salton Sea, California. (Wikipedia, "Douglas F4D Skyray")

1953, October 9 — 3:50 p.m. A UFO is seen at Caulfield, Melbourne, Victoria, discharging a white trail described as "strange shiney filaments" that cover wires and trees. A sample turns out to be a "nylon-like amorphous mass with traces of magnesium, calcium, boron, and silicon." It shrinks from 3 inches to one-half inch in an air-tight container. ("Wispy Threads from Sky," *Australian Flying Saucer Review (UFOIC),* no. 9 (November 1966): 12; Keith Basterfield, "Angel Hair: An Australian Perspective," *IUR* 27, no. 1 (Spring 2002): 6; Brian Boldman, "Angel Hair Physical Analyses: A Review," *JUFOS* 9 (2006): 101)

1953, October 9 — 4:30 p.m. Three unidentified objects are tracked on radar at RAF Bawdsey [now Bawdsey Manor], Suffolk, England, at an altitude of 36,000 feet above the Netherlands. Soon they are tracked flying east to west over the Harwich area. Some jets at RAF Waterbeach [now Waterbeach Barracks], Cambridgeshire, are scrambled but can locate nothing. Airmen at Bawdsey can see nothing but four contrails heading north. The objects then reverse and move back across the English Channel at 32,000–34,000 feet. The apparent speed on the approach is 430 mph, increasing to 483 mph on the short leg over the UK and 564 mph on the return. (NICAP, "Three UFOs Flew over Area, Tracked on Radar"; "English Channel," *APRO Bulletin* 2, no. 6 (May 15, 1954): 12; "Sightings Continue at a Steady Pace during Last Half of 1953," *Civilian Saucer Investigation Quarterly Bulletin*, no. 4 (Winter 1954): 2, 3; Covert 24–25)

1953, October 15 — 10:10 a.m. During the tracking of a Project Grab Bag balloon launch, a 40-foot object leaving a brief vapor trail is seen by three General Mills Aeronautical Lab research engineers (James A. Winker, Fletcher L. Bartholomew, and Richard J. Reilly) near Minneapolis, Minnesota. It is traveling south in horizontal flight at 1,100 mph, moving 10° in nine seconds at about 40,000 ft altitude and 25° elevation. The object goes into a vertical dive for about 10-15 seconds, then glows or flashes in the sun two or three times for 1 second each. It is seen in the theodolite as a gray mass. It levels off and the vapor trail stops. (NICAP, "Project GRAB BAG Sighting"; Sparks, p. 205; Hynek, *The UFO Experience,* Ballantine eds., 1974, pp. 71–72; *Hynek UFO Report,* pp. 113–114)

1953, October 16 — Harvard astronomer Donald Menzel writes to USAF Director of Intelligence Gen. John A. Samford that he would like to meet with ATIC officers in Washington, D.C. (Good Above, p. 278)

1953, October 16 — 4:00–4:30 p.m. Emerson "Slim" F. Morris watches a large, cigar-shaped object as it approaches Brigantine, New Jersey, from over the Atlantic. It releases several smaller objects from both ends. The smaller discs are white, rotating counterclockwise, and rapidly speed away. Before the large object disappears, it emits a blinding ray of light toward the ground that hurts Morris's eyes. (Herbert S. Taylor, "Satellite Objects: A Further Look," *IUR* 29, no. 2 (Summer 2004): 7)

1953, October 19 — 12:10 a.m. Capt. J. L. Kidd is flying an American Airlines DC-6 between Philadelphia and Washington, D.C., when over the Conowingo Dam, Maryland, his copilot sees something gleaming in the moonlight dead ahead and closing rapidly. Kidd blinks on his landing lights and the UFO beams back a blinding light back at the DC-6. Kidd puts the plane into a steep dive. Caught unaware, the passengers are tossed about the cabin, many suffering injuries. Kidd radios Washington National Airport [now Ronald Reagan International Airport] to report a near collision and complain about air traffic. Air traffic control reports no known aircraft in his vicinity. (Keyhoe, *FS Conspiracy*, pp. 60–61; Good Above, p. 282; Loren E. Gross, *UFOs, a History: 1953, August–December*, The Author, 1990, pp. 34, 38)

1953, October 20 — The NSA Robertson Committee report is completed and classified top secret. It recommends better and faster use of electronic intelligence in radar activity that might indicate an imminent attack, noting that the Air Force is not cooperating with the Army or Navy on these matters. (Clark III 55–56)

1953, October 22 — Menzel meets with USAF headquarters personnel (including Col. George E. Perry) and ATIC at the Pentagon. (Good Above, p. 279)

1953, October 25 — 8:15–8:30 p.m. Air Force weather observers at Lubbock, Texas, notice a V formation of 5–7 dull white lights sweep north to south. In three seconds, the formation goes from a point overhead to 3° above the horizon where they disappear. Other groups of two or more lights follow at about 5-minute intervals. ("Lubbock Lights Repeat," *Civilian Saucer Investigations Quarterly Bulletin*, no. 4 (Winter 1954): 4–5; Loren E. Gross, *UFOs, a History: 1953, August–December*, The Author, 1990, pp. 35–36; Clark III 693; Clark IV 769)

1953, October 29 — USAF pilot Frank Kendall Everest Jr. reaches 755 mph in a North American F-100 Super Sabre over the Salton Sea, California. (Wikipedia, "Frank Kendall Everest Jr.")

1953, October 31 — 9:10 p.m. Air Force weather observers at Lubbock, Texas, again view a large V formation of lights passing directly overhead from northwest to east-southeast. They are seen again 5 minutes later on the western horizon. ("Lubbock Lights Repeat," *Civilian Saucer Investigations Quarterly Bulletin*, no. 4 (Winter 1954): 4–5; Loren E. Gross, *UFOs, a History: 1953, August–December*, The Author, 1990, pp. 35–36; Clark III 693–694; Clark IV 769)

1953, November — Capt. Charles A. Hardin takes charge of Project Blue Book. (Sparks, p. 14; Clark III 918, 937; Clark IV 1029, 1047)

1953, November — Terence M. Tibando, 5, is on a walk around RCAF Station St. Jean, Quebec, with his mother and baby brother James when they see a domed, disc-shaped, silvery object flying over the military buildings at an altitude of 300–500 feet. It hovers momentarily then flies off. A few nights later, three small luminous beings (similar to Casper the Friendly Ghost) float through his bedroom wall. Tibando becomes frightened and calls out to his mother several times, who inspects the room and finds nothing. However, they reappear after she leaves, and this happens once more. The beings walk around to the head of his bed and appear luminously white with small mouths and large, human-like eyes. He pulls the bedcovers over his head to hide, but soon falls asleep. From that time on, he begins drawing pictures of rockets, planets, and stars. (Nigel Watson, "UAPs and Luminous Ghosts," *Fortean Times* 415 (February 2022): 30–31)

1953, November — 6:30 p.m. Trygve Jansen and two other witnesses are driving north on the Gamle Mossevei road at the Gjersjøen bridge, Norway, when they see an object rise from behind a hill, swing out over the lake, and move back to the road, circling and following their car. Suddenly it stops and hovers above the road 30 feet in front of them, emitting a green light. Jansen stops, and all three witnesses experience mild electrical shocks until the object rises and disappears. When he returns home, Jansen's wife points out that the car's beige paint has turned a bright green. (Carl Olsen, "Chased by a Flying Saucer!" *Flying Saucer Review* 2, no. 5 (Sept./Oct. 1956): 16; K. Gösta Rehn, "Saucer Blocked Road in Norway," *APRO Bulletin*, March 1962, pp. 1, 3)

1953, November 3 — 10:00 a.m. An RAF NF.10 Vampire pilot (Flight Lt. Terry S. Johnson) and navigator (Flying Officer Geoffrey Smythe) flying at 30,000 feet near RAF West Malling [now closed], Kent, England, see a star-like light far above them. Suddenly it moves toward them at tremendous speed. They see it as circular and emitting a bright light around its periphery. The duration is 30 seconds. Air Minister George Ward calls it a "balloon"; when author Desmond Leslie calls him up to suggest this is incorrect, Ward tells him: "*I* know it wasn't a balloon. *You* know it wasn't a balloon. But until I've got a saucer on the ground in Hyde Park and can charge the public sixpence a go to enter, it must be balloons, otherwise the government would fall and I'd lose my job." It is possible that this object was a Skyhook balloon launched from Holloman AFB in New Mexico on October 27 that failed to drop into the Atlantic after a 12-hour flight. (Desmond Leslie, "Politicians and the UFO," *Flying Saucer Review* 9, no. 3 (May/June 1963): 8–9; Good Above, pp. 35, 53; Good Need, p. 154; UFOFiles2, pp. 57, 62–63; David Clarke, "The Prince and the Saucers," *Fortean Times* 406 (June 2021): 18)

1953, November 3 — 2:45 p.m. In Lee, southeast London, a solid target is tracked on radar by the 256th Heavy Anti-Aircraft Regiment moving slowly at a distance of 17 miles. Through a telescope it appears to be a circular white object. The target is tracked for 25 minutes by four aircraft technicians, including Sgt. H. Waller, who says it is about 350–450 feet in diameter and definitely not a balloon. The War Office claims the object is a radiosonde balloon. (NICAP, "Heavy Anti-Aircraft Regiment Tracks UFO"; "'Glowing' Object Only a Balloon," *Palm Beach (Fla.) Post*, November 20, 1953, p. 14; Keyhoe, *FS Conspiracy*, p. 79; Good Above, pp. 35–36)

1953, November 5 — President Eisenhower issues Executive Order 10501, abolishing the classification of "Restricted." UFO sightings are unaffected, as meaningful sightings are classified at higher levels. There are now explicit guidelines for the remaining three classification levels to prevent a systematic flood of classified documents coming from the Pentagon and other agencies. The Pentagon responds by creating its own "special access" labels to further insulate classified information from outside influence. ("Executive Order 10501")

1953, November 16 — A fluffy material streams out of a UFO over the San Fernando Valley, California, and falls to the ground mostly near the intersection of White Oak Avenue and Haynes Street in Reseda. A reporter who examines it describes it as "a fluffy blanket dead-white, almost ephemeral in its delicacy and apparently electrically charged." Mr. and Mrs. Louis D'Angelo of Reseda see a huge silvery ball flying up, down, and sideways; the substance seems to come out of its back end. Clinging bits of web-like material remain on trees and telephone lines for several months. She reports that it has static qualities. (Keyhoe, *FS Conspiracy*, pp. 227–228; Olsen, sec. 3, pp. 26–27; Clark III 124; Clark IV 151)

1953, November 16 — 9:00 p.m. Keyhoe debates *Time* magazine's science editor, Jonathan Norton Leonard, on ABC Radio's *America's Town Meeting on the Air* on "Flying Saucers: Fact or Illusion?" Leonard tries to refute Keyhoe's assertions of Air Force secrecy, while Keyhoe cites many cases and documents from his book that Leonard dismisses out of hand. ("Keyhoe/Leonard Debate – Town Meeting 11.16.1953," in Ufology: A Primer in Audio, 1939–1959, November 21, 2013)

1953, November 19 — Bacteriologist Frank Olson is a leading scientist at the army's Chemical Corps, Special Operations Division at Fort Detrick, Maryland. SOD supplies the CIA with an array of deadly microbes and chemicals that cannot be detected in an autopsy. It also supplies delivery methods for anthrax. The CIA pays SOD $200,000 a year for these services until 1969. Olson is duped into a meeting with MKUltra Director Sidney Gottlieb at a secluded cabin. Olson has a very bad trip and still hasn't recovered after several days. (H. P. Albarelli Jr., *A Terrible Mistake: The Murder of Frank Olson and the CIA's Cold War Experiments*, Trine Day, 2009; Stephen Kinzer, "The Secret History of Fort Detrick, the CIA's Base for Mind Control Experiments," Politico Magazine, September 15, 2019)

1953, November 20 — Australian Minister for Air William McMahon tells Parliament that all UFO reports "are still being investigated closely and recorded as an aid to further research," but the RAAF's approach is a bit more ad hoc. ("Flying Saucers Start World-wide Storm in a Teacup," *Launceston (Tas.) Examiner*, November 21, 1953, p. 4; Swords 377)

1953, November 20 — An American woman sends a registered letter to US Air Force Intelligence at Wright-Patterson AFB near Dayton, Ohio, that contains a recently channeled message from Ashtar, commandant of the Vela space fleet, containing a "friendly warning" that if Earth people do not abandon war, the space people will disrupt planetary production, transportation, and communications. (Harold T. Wilkins, *Flying Saucers Uncensored*, Citadel, 1955, pp. 75–76)

1953, November 22 — Navy Capt. Walter Karig, author of the 1947 novel *Zotz!*, writes "Operation UFO: The Official Truth about Flying Saucers" for *The American Weekly* newspaper insert. He covers Secretary of the Navy Kimball's 1952 UFO sighting and the ONR saucer probe. He emphasizes the Air Force's 20% unexplained rate and does not rule out the extraterrestrial hypothesis. (Walter Karig, "Operation UFO: The Official Truth about Flying Saucers," *American Weekly* insert, *San Francisco Examiner*, November 22, 1953, pp. 4–5; Swords 217)

1953, November 22 — 10:00 p.m. A man who works in the supply transport office of the RAAF Woomera Rocket Range near Woomera, South Australia, sees a green object like a saucer fly to the north between Woocalla and Birthday Siding. It is emitting blue exhaust. Another man driving the same route around 2:00 a.m. about 50 miles from Woomera sees a bluish-green circular object moving north. It is seen again by another man in the same area around 2:30 a.m. A fourth party sees two orange flares dropping from the sky near Pimba at 3:15 a.m. All of the objects are at an altitude of more than 5,000 feet. (Keith Basterfield, "Listing of Reports from Woomera, South Australia," 2008)

1953, November 23 — Evening. ADC radar detects an unknown object moving at 500 mph over Lake Superior. An F-89C Scorpion interceptor, piloted by Lt. Felix Moncla Jr., with radar observer Lt. Robert L. Wilson in the rear cockpit, is dispatched from Kinross AFB [now Chippewa County International Airport], south of Sault Ste. Marie, Michigan. The jet heads toward the target under radar guidance. At 8,000 feet, 160 miles northwest of the Soo

Locks, the blips of the F-89 and the UFO merge then fade from the screen. Nothing more is heard from the plane and no trace of it is found. Attempts are made to contact Moncla via radio, but without success. A search and rescue operation by both the USAF and the Royal Canadian Air Force is quickly mounted, but fails to find any trace of the plane or its pilots. Weather conditions are a factor in hampering the search. A Pentagon spokesman claims the UFO is an RCAF C-47 Dakota VC-912 that was never closer than 3-4 miles to the F-89, which has crashed for unknown reasons. In 2006, a group of divers claimed to have discovered the F-89 and taken photos on side-scan sonar, but the claim is a hoax. (NICAP, "UFO Intercept / Missing F-89 Case"; "Two More Truax Fliers Lost," *Wisconsin State Journal*, November 25, 1953, pp. 1–2; Keyhoe, *FS Conspiracy*, pp. 13–23; UFOEv, pp. 114–115; Keyhoe, *Aliens from Space*, Signet ed., 1974, pp. 166–167; Raymond E. Fowler, *UFOs: Interplanetary Visitors*, Exposition, 1974, pp. 291–293; Yurko Bondarchuk, *UFO Sightings, Landings, and Abductions*, Methuen, 1979, pp. 106–109; Good Above, p. 273; Andrew Griffin, "Missing! Avoyelles Parish Man's Disappearance Still a Mystery after 50 Years," *Alexandria (La.) Town Talk*, July 20, 2003, pp. E1, E3; Clark III 654–656; Clark IV 730–732)

1953, November 24 — The UK House of Commons discusses the November 3 Lee case and others. Nigel Birch, Parliamentary Secretary to the Ministry of Defence, explains the sightings as experimental weather balloons. MP George Isaacs asks, "Will the Minister agree that this story about flying saucers is all ballooney?" (Good Above, p. 36; Isaac Koi, "UFOs in Parliament (UK)," Isaac Koi—UFOs and Parliament, 2024)

1953, November 28 — Day. Francisco de Assis Teixeira and Pedro Serrate are duck hunting on a bay of the Rio Guaporé near Surpresa, Rondônia, Brazil. Teixeira sees an unusual aircraft pass above his head and silently land on the surface of the water about 150 feet away. Serrate, who is stationed in a tree, is even closer. The object is elongated, about 13 feet long, with a glass-like dome and a base made of blue metal. At the rear are two curved tubes and something like a rudder. Serrate can see six white people with red hair inside, all wearing dark blue clothing. The occupants apparently see him looking at them, and the object immediately takes off. (Lorenzen, *Encounters with UFO Occupants*, Berkley Medallion, 1976, pp. 371–372; Dolan, USO1, 163–166)

1953, November 28 — Frank Olson is depressed, incoherent, and uncommunicative after his LSD dose nine days earlier. His CIA contacts take him to a "doctor" in New York City, who prescribes him alcohol. He then plunges to his death from the 10th floor window of the Hotel Statler in New York City. The US government calls it a suicide, the Olson family alleges murder because, especially in the aftermath of his LSD experience, he has become a security risk who might divulge state secrets associated with highly classified CIA programs of which he has direct personal knowledge. A few days before his death, Olson quits his position as acting chief of the Special Operations Division at Camp Detrick [later Fort Detrick] in Frederick, Maryland, because of a severe moral crisis concerning the nature of his biological weapons research. Among Olson's concerns are the development of assassination materials used by the CIA. The CIA's use of biological warfare materials in covert operations, experimentation with biological weapons in populated areas, collaboration with former Nazi scientists under Operation Paperclip, LSD mind-control research, and the use of psychoactive drugs during "terminal" interrogations under a program code-named Project Artichoke. Later forensic evidence conflicts with the official version of events; when Olson's body is exhumed in 1994, cranial injuries indicate that Olson was knocked unconscious before he exited the window. The medical examiner terms Olson's death a "homicide." (Michael Ignatieff, "What Did the C.I.A. Do to His Father?" *New York Times Magazine*, April 1, 2001, pp. 56–61; H. P. Albarelli Jr., *A Terrible Mistake: The Murder of Frank Olson and the CIA's Cold War Experiments*, Trine Day, 2009; Stephen Kinzer, "The Secret History of Fort Detrick, the CIA's Base for Mind Control Experiments," Politico Magazine, September 15, 2019)

1953, December — Wilbert B. Smith sets up his Department of Transport observatory at Shirley's Bay, Ontario. His equipment includes an ionospheric reactor, electronic sound measurement devices, gamma-ray detector, gravimeter, magnetometer, and radio set. (Wikipedia, "Project Magnet (UFO)"; Good Above, pp. 185–186)

1953, December — Noall Brice Cornwell (who uses the pseudonyms Mel Noel and Guy Kirkwood) claims to have been stationed at Lowry AFB [now Wings Over the Rockies Air and Space Museum] in Denver, Colorado, and engaged in several dogfight-type maneuvers with UFOs involving gun-camera film. His stories are bogus, and later he runs phony investment scams and becomes a contactee who describes meeting pink-haired, platinum-skinned, fish-eating Martians said to be running a Mars-Earth transportation system. (Mel Noel, *The Mel Noel Story*, Saucerian, 1960; Good Above, pp. 273–277; Kevin D. Randle, "Mel Noel / Guy Kirkwood in the 1960s," A Different Perspective, December 20, 2010; Adam Gorightly, "Mel Noel's Phony Flying Saucer Trip to the Stars," Chasing UFOs, April 17, 2020; Richard Geldreich Jr., "'Mel Noel' aka 'Guy Kirkwood' aka 'Noall Brice Cornwell': Buried with Military Honors at Miramar National Cemetery," Medium, October 21, 2024)

1953, December — Australian UFO researcher Edgar Jarrold is visited four times by a mysterious man who swears him to secrecy. What the visitor tells him amazes him "beyond belief," but he never publicly reveals who the man is. However, it turns out that the man is Gordon Deller, a minor figure in Australian ufology who has some quaint and original theories about the saucers. He believes that UFOs are piloted by etherians from another dimension. He tells Jarrold this, along with some insights into a geological cataclysm and telepathic communication. Harold Fulton, a ufologist from New Zealand, suspects Deller is a nut. However, Jarrold's obsession with UFOs leads to the breakup of his family and the disintegration of his personal life by 1955. (Clark III 632–633, 729; Clark IV 694–695, 810)

1953, December 7 — 9:30 p.m. Pfc Alfred V. De Bonise and Sgt1C James Conley of the 89th Anti-Aircraft Battalion at Fort George G. Meade, Maryland, spot a white object, "shining like a star." It makes a noise like an artillery shell in flight. It moves erratically and eventually falls out of sight. (Good Above, p. 280; Loren E. Gross, *UFOs, a History: 1953, August–December*, The Author, 1990, p. 60)

1953, December 7 — Radio Moscow proclaims that saucers are "figments of the imagination of western warmongers." (Frank Edwards, *FS Serious Business,* Bantam ed., 1966, p. 156)

1953, December 8 — CIA Office of Scientific Intelligence Chief of Operations Staff Philip Grandin Strong writes a memo to the Assistant Director of Scientific Intelligence saying that Keyhoe's book *Flying Saucers from Outer Space* has been reviewed by "one of our consultants" for "possible security violations" related to the CIA's UFO involvement. It notes that Keyhoe suspects the Robertson panel meeting but has no solid knowledge of it. The memo suggests that no breach is involved and an investigation would only lend undue attention to Keyhoe's claims. (P. G. Strong, "Report on Book Entitled 'Flying Saucers from Outer Space,'" memo, December 8, 1953)

1953, December 8 — The US Air Force downplays its interest in UFOs, suggesting that most sightings are explainable by weather balloons, meteors, and Venus, with radar reports easily attributable to temperature inversions, "ionized clouds," and ground reflections. Project Blue Book is not even mentioned, although the Air Technical Information Center at Wright-Patterson Air Force Base is credited with "regular investigations of reports of flying saucers." Air Force spokesmen mention a plan to install, in airport control towers, special cameras covered by a diffraction grid that will act as a makeshift spectrometer and supposedly help identify unknown lights. The plan was first suggested by physicist Joseph Kaplan in 1952 to help in identifying the green fireballs. ("AF Studies, But No Longer Jumps at 'Saucer' Reports," *Baltimore (Md.) Sun,* December 8, 1953, p. 29; Jenny Randles, *UFO Conspiracy,* Cassell, 1987, p. 45; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1953 August–December*, The Author, 1990, pp. 60, 60-B)

1953, December 9 — 3:45 p.m. Charles Huaut sees a luminous, golden, round object poised motionless at a high altitude over Saint-Émilion, Gironde, France. After 10 minutes it noiselessly changes position and assumes the form of several horseshoes enveloped in smoke trails. Then it disappears. (Central Intelligence Agency, "Sightings of Unidentified Flying Objects," April 20, 1954, p. 2; ClearIntent, p. 130)

1953, December 15 — 2:37 p.m. While flying a Transair Sweden DC-3 in the vicinity of Hässleholm, Skåne, Sweden, pilot Ulf Christiernsson and flight mechanic Olle Johansson encounter an "unorthodox, metallic, symmetric, round object" closing in on their aircraft for about 10 seconds. It passes about 1,970 feet under the DC-3 at an altitude of 7,055 feet. Air Force Gen. Bengt Nordenskiöld calls in reports from all relevant Swedish radar stations to identify the object, and the Defence Research Institute spends many hours reconstructing the event. However, the owner of a local perfume company confessed in late December to releasing 300 hydrogen-filled balloons south of Hässleholm as an advertising promotion around 12:30 p.m. that day. (Swords 365)

1953, December 15 — James W. Moseley visits George Adamski at the Palomar Gardens café in California, where he tells his story about meeting a spaceman in the desert to numerous people. Adamski provides the skeptical Moseley with some details about Venusians who are passing as earth people, a six-hour film he had watched showing beings on another planet, and his use of telepathy during the interview. (James W. Moseley and Karl T, Pflock, *Shockingly Close to the Truth!,* Prometheus, 2002, pp. 64–69; Eghigian, *After,* p. 123)

1953, December 16 — The British Air Ministry sends orders to all RAF stations saying that UFO reports are to be classified "Restricted" and personnel must not communicate any sighting information to unauthorized persons. Reports must be sent to the air intelligence branch DDI (Tech) that is now responsible for UFO investigations. (UFOFiles2, pp. 57–60)

1953, December 16 — 4:58 p.m. Lockheed Skunk Works chief Clarence L. "Kelly" Johnson and his wife Althea (near Agoura, California) and a Lockheed crew (Rudy Thoren, Roy Wimmer, and 3 others) flying the WV-2 Warning Star aircraft near Long Beach, California, independently of each other observe a black flying-wing (or ellipse or crescent-shaped) object about 170–230 feet wide flying at about 15,000 ±2,000 feet altitude to the west, hovering about 30–60 miles away. At 5:04 p.m., after four minutes (to the Johnsons) and six minutes (to WV-2 crew) the UFO suddenly takes off in a shallow climb accelerating to approximately earth escape velocity (25,000 mph) to the west over the

Pacific. It disappears in 10–13 seconds (to WV-2 crew) or in 90 seconds (to Johnson using 8x binoculars) after reaching 90+ miles altitude. (NICAP, "The Lockheed UFO Case"; Sparks, p. 206; Joel Carpenter, "The Lockheed UFO Case, 1953," *IUR* 26, no. 3 (Fall 2001): 6–9, 33)

1953, December 17 — After the crew of a Swedish airliner reports a wingless circular UFO over Hässleholm, Sweden, the Swedish Armed Forces orders a full-scale investigation. Capt. Ulf Christiernsson says the object is an "entirely unorthodox, metallic, symmetrical, and circular object." Later reports claim it is a radiosonde balloon. (Sparks, p. 206; "Swedish Pilot Spots Mystery Object above Clouds; Called 'Russ Robot,'" *Long Beach (Calif.) Press-Telegram,* December 18, 1953, p. A-9; UFOEv, p. 121)

1953, December 17 — A memo from Todos M. Odarenko, chief of the CIA/OSI physics and electronics division, condescendingly reviews the status of various government UFO efforts. (Todos M. Odarenko, "Current Status of Unidentified Flying Objects (UFOB) Project," December 17, 1953)

1953, December 18 — Chemist Irving Langmuir gives a colloquium on "pathological science" at General Electric's Knolls Research Laboratory in Schenectady, New York. In one segment he talks about "flying saucers" and how the Air Force's Project Sign had asked him in 1948 to evaluate 30 or 40 of their best cases. He concludes that most of them are observations of "Venus seen in the evening through a murky atmosphere." (Irving Langmuir, "Pathological Science," December 18, 1953)

1953, December 23 — USAF Intelligence Col. George E. Perry writes to Gen. Woodbury M. Burgess, ADC Deputy for Intelligence at Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, recommending that when the 4602nd investigates a UFO sighting and it is *not* a conventional object, personnel should state "The information on this sighting will be analyzed by the Air Technical Intelligence Center at Dayton, Ohio," and leave it at that. (Col. George E. Perry, Letter to Brig. Gen. W. M. Burgess, December 23, 1953)

1953, December 24 — 8:04 a.m. US Navy Lts. J. B. Howard and L. D. Linhard, flying F9F-2 jet fighters, see 10 silver oval objects flying in formation at 450+ mph, straight and level, over El Cajon, California. (NICAP, "Navy Lts. Encounter 10 Oval Objects"; Sparks, p. 206)

1953, December 26 — The first of a series of articles in the *Washington (D.C.) Times-Herald* by Richard Reilly questions the Air Force's openness about UFOs. (Richard Reilly, "Air Force Baffled by Flying Discs," *Washington (D.C.) Times-Herald,* December 26, 1953; "Saucer Bandwagon," *APRO Bulletin* 2, no. 4 (January 15, 1954): 8; "The American Scene," *Flying Saucers* (Civilian Saucer Investigation (NZ)) 1, no. 4 (March 1954): 4–10; Dolan, p. 145)

1953, December 29 — Keyhoe has a confrontation with Delos Smith, the science editor of the United Press wire service, and a UP executive editor. Smith is preparing a three-part series debunking Keyhoe's claims because a "certain Air Force general *swears* your book is a complete fraud." Forewarned by Frank Edwards, Keyhoe counters his arguments with documentation. (Keyhoe, *FS Conspiracy*, pp. 85–88)

1953, December 30 — 9:05 p.m. Pfc Norman Viet, on guard duty at the tank park in Marine Corps Base Quantico, Virginia, watches a blinking red light about 18 inches in diameter moving slowly over a tree line about 200 feet away. It soon drops down out of sight. Fifteen minutes later it is seen again, rising up and floating toward the tank shed. Viet says it is completely soundless. At 10:15 p.m. it returns, also witnessed by Sgt. Francis R. Salinder, who alerts the base and a combat team searches the area. At midnight, a red light appears above the search area, spooking a guard. ("Marines Chase Flying Object with 'Copter," *Washington (D.C.) Post,* January 4, 1954; Evert Clark, "Are They Hiding Those Lights under a Bushel?" *Washington (D.C.) Daily News,* January 5, 1954, p. 3; "Attempted Landing at Quantico," *APRO Bulletin* 2, no. 4 (January 15, 1954): 1; John C. Ross, "The Lights That Failed," *Fate*, May 1954, p. 39; Wilkins, *FS Uncensored,* Citadel, 1955, p. 202; Keyhoe, *FS Conspiracy*, pp. 89–91; Loren E. Gross, *UFOs, a History: 1953, August–December*, The Author, 1990, p. 75; Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, pp. 1, 3)

1954

1954 — Jim and Coral Lorenzen move from Wisconsin to Alamogordo, New Mexico, to work as civilian employees at Holloman AFB. (Clark III 50; Clark IV 67)

1954 — Contactee George Van Tassel begins building the Integratron at Giant Rock, California, based on the rejuvenation techniques imparted to him by space aliens from Venus. (Wikipedia, "Integratron"; George W. Van Tassel, "A Brief History of Giant Rock Covering the Last 90 Years (1887–1977)," Integratron.com; Jody Rosen, "Welcome to the Integratron," *New York Times Magazine,* August 20, 2014; Lesla Miller Schnur, "G. W. Van Tassel's Integratron," The Haunted Librarian, August 27, 2021)

1954 — British author Harold T. Wilkins writes *Flying Saucers on the Moon* (retitled *Flying Saucers on the Attack* in the US). He considers some UFOs to be hostile, especially the cigar-shaped ones that release satellite discs, and that they deliberately disabled Thomas Mantell's aircraft in 1948. He also links UFOs to natural disasters, fires, and disappearances of humans. He follows up with another book, *Flying Saucers Uncensored*, in 1955. (Harold T. Wilkins, *Flying Saucers on the Attack*, Citadel, 1954; Harold T. Wilkins, *Flying Saucers Uncensored*, Citadel, 1955; Clark III 459–460; Clark IV 505)

1954 — An official in the UK Deputy Directorate of Intelligence (Technical) mentions to investigator Ronald N. Russell that the DDI has 15,000 reports on file since 1947 stored in nine drawers in three wooden filing cabinets with Yale locks, doubly secured by a hinged plate locked with a large padlock. (John Pitt, "'Tell Us Please, Mr. Birch,'" *Flying Saucer Review* 2, no. 5 (Sept./Oct. 1956): 10–13; Good Above, p. 33)

1954 — A promotional photo of a Martin B-57 Canberra bomber taken near Edwards Air Force Base in California shows a saucer-like object in the upper right portion of the frame. No one actually reports seeing the object, which seems to be trailing the B-57 in flight. NICAP photoanalyst Ralph Rankow points out that the object has dimension, does not appear to be a scratch or rub on the film, and has a pattern of light and shadow consistent with the rest of the photo. (Robert A. Schmidt, "The Strange Case of the B-57 Photographs," *Flying Saucer Review Case Histories*, no. 6 (August 1971): 1–2; Story, pp. 36–37)

1954 — The powerful Type 80 centimetric radars introduced in the UK this year are plagued by radar "angels" that become a hazard for air traffic controllers. A Fighter Command investigation concludes that most of them are caused by migrating seabirds, and others are the result of "anomalous propagation." Later computers filter out smaller echoes and increase the strength of those created by aircraft. (David Clarke, "Gremlins and Black Projects," *Fortean Times* 291 (August 2012): 26–27)

1954 — After RCAF pilots fail to intercept several UFOs in Canadian air space, the Defence Research Board sets up a restricted landing field near the Suffield Experimental Station [now CFB Suffield], Alberta. All RCAF planes and commercial aircraft are restricted from the area. However, the effort is abandoned after the government determines that UFOs are not a national security risk. The project is kept secret until July 1967 when it is revealed by Defence Minister Paul Hellyer. ("UFO Landing Site was 13-Year Secret," *Ottawa (Ont.) Journal*, July 20, 1967, p. 5)

1954 — Day. The aircraft carrier USS *Franklin D. Roosevelt* encounters two cigar-shaped objects and two round disks that emerge from the ocean at an unknown location. The ship attempts to activate its weapons to engage the objects, but the mechanism fails. The episode lasts for 26 minutes, with one of the cigar-shaped objects diving into the water. (Carl Feindt, "Report #1079," waterufo.net; Dolan, USO1, 166–170)

1954, January — Ed J. Sullivan's Civilian Saucer Investigation Los Angeles disbands because its subscription revenue is insufficient to be handled by part-time volunteers. It has concluded that UFOs are not experimental aircraft and may well be extraterrestrial. ("CSI Seeks Research Group to Carry On," *Civilian Saucer Investigation Quarterly Bulletin*, no. 4 (Winter 1954): 1; "CSI Conclusions," *Civilian Saucer Investigation Quarterly Bulletin*, no. 4 (Winter 1954): 7–9)

1954, January — 5:00 a.m. A strange object streaks across the sky over Harts Range, Northern Territory, Australia, seen and heard by four Native Australians. On the same day, an anonymous photographer is taking photos of Mount Gillen, Northern Territory, when suddenly an enormous (150 feet) round object appears from behind it. It moves high, then drops low. He takes a photo, then it shoots off at high speed to the west. The photo, reproduced in the newspaper, shows a dubious-looking round object on edge with six spokes. ("Flying Saucer at Harts Range?" *Alice Springs (N.T.) Centralian Advocate*, January 15, 1954, p. 1; "'Unknown' Claims Snapped Flying Saucer over Alice," *Alice Springs (N.T.) Centralian Advocate*, February 5, 1954, p. 1; Keith Basterfield, "Cold Case: The Mount Gillen Photograph, Alice Springs, 1954," Unidentified Aerial Phenomena–Scientific Research, January 12, 2012)

1954, January 1 — 10:15 a.m. Capt. Douglas Barker, a pilot with Australian National Airways, is at his home in Doncaster East, Melbourne, Victoria. He sees a "metallic, mushroom-shaped object" flying over the Yarra River valley toward the Templestowe brickworks in the northwest. He estimates it is traveling at 700 mph at a height of 2,000 feet. Its apparent size is four times that of a DC-4 aircraft. It is oscillating rapidly in and out of thick cloud. It is elliptical with a "long shaft about the same length as its body hanging below it." Total duration of the sighting is 12 seconds. (NICAP, "Mushroom Flying over Yarra Valley"; "'Flying Saucer' Pilot Reports," *Melbourne (Vic.) Herald*, January 1, 1954, p. 1; "'Flying Saucer' Reported by A.N.A. Captain," *Cairns (Tas.) Post*, January 2, 1954, p. 1; "Pilot Said He Saw a 'Flying Mushroom,'" *Sydney (N.S.W.) Daily Telegraph*, January 2, 1954, p. 9; "Air Pilot Sees Saucer in Victoria," *Barrier Miner* (Broken Hill, N.S.W.), January 2, 1954, p. 1; "First 'Saucer' of 1954," *Brisbane (Queens.) Courier-Mail*, January 4, 1954, p. 5)

1954, January 1–2 — 10:35 p.m.–12:05 a.m. Navy pilot Lt. JG George G. Morgan of Naval Air Station Lakehurst [now Joint Base McGuire–Dix–Lakehurst], Toms River, New Jersey, police chief Richard Clement, police officer Oliver G. Osborne, and other witnesses see 3–12 round white objects with fuzzy edges slightly smaller than the full moon hovering in the south for 90 minutes as 2 objects circled around another one. They then switch places. Some witnesses attempt to drive toward the objects to investigate. The objects suddenly depart to the southwest at extremely high speed, growing smaller until they disappear in 1–2 seconds. Multiple independent witnesses across a baseline of at least 12 miles allow for triangulation that locates the objects near Beach Haven, New Jersey, from distances of 15–40 miles. At least five witnesses use binoculars. Hynek calculates a departure speed of 90,000 mph, a hovering altitude of 4 miles, and a diameter of 1,500 feet. (NICAP, "Multiple-Witness Sightings Triangulate Location"; Sparks, p. 207; Swords 223–224)

1954, January 4 — Shortly after 9:00 p.m. A round luminous machine, coming from the south, lands at the Marignane Airfield [now Marseille Provence Airport], Bouches-du-Rhône, France. There is only one witness present, a fireman at the airport named Chesneau. The machine disappears while he is telephoning the control tower. Careful scrutiny of the runway the next morning turns up a few pieces of metallic debris. The story is confirmed by a Marseille resident who is driving from Arles to Marseille and sees a large, round, reddish fireball, but places the time at 10:45 p.m. (Jimmy Guieu, *Les soucoupes volantes viennent d'un autre monde*, Fleuve Noir, 1954; ClearIntent, p. 132; Patrick Gross, "The 1954 French Flap," March 15, 2003)

1954, January 6 — The *Cleveland Press* runs the headline "Brass Curtain Hides Flying Saucers" and reveals that ATIC will no longer allow reporters seeking UFO information into Wright-Patterson AFB in Ohio. Its reporter is given the runaround on the Utah film. ("Air Force Closes Brass Curtain," *Knoxville (Tenn.) News-Sentinel*, January 14, 1954, p. 3; UFOEv, p. 134)

1954, January 7 — 4:27 a.m. A fiery disk, followed by a luminous trail, is seen in Arras, Pas-de-Calais, France. The disc remains motionless in the sky for an instant, after which it flies away and disappears over the horizon. (ClearIntent, p. 133; Patrick Gross, "The 1954 French Flap," December 4, 2005)

1954, January 9 — Three residents of Lunéville, Meurthe-et-Moselle, France, see a round object flying from north to south. The object flies more slowly than a jet plane and leaves a luminous yellow trail. It flies noiselessly, although it appears to be at a low altitude. Several students of the College de Lunéville also see the object. (ClearIntent, p. 132; Patrick Gross, "The 1954 French Flap," December 28, 2004)

1954, January 10 — 5:25–5:40 p.m. James E. McDonald, two other University of Chicago meteorologists, and another passenger are driving on Hwy 83 north of Sonoita, Arizona, when McDonald spots a brilliant white stationary object in the southwest above the Santa Rita Mountains about 10 miles away. They lose sight of it as the car moves on. McDonald searches carefully for alternate explanations, but can find none, so he reports the sighting to the Air Force in a 4-page letter. (Sparks, p. 207; Ann Druffel, *Firestorm*, Wild Flower, 2003, pp. 19–20; Clark III 695; Clark IV 791–792)

1954, January 13 — Mutual Radio broadcaster Frank Edwards alleges on his show that the wreckage of a flying saucer is being held in a "West Coast military field." (Clark III 330–331)

1954, January 13–16 — Gen. Woodbury M. Burgess chairs a conference at Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, with 4602nd officers Capt. Joseph A. Cybulski and Capt. Bellovin and emphasizes that it is now the agency responsible to ATIC for investigating UFOs. Cybulski says that "We here in Headquarters will keep a complete file on all the sightings. That's why we want the information copied. We will file them under separate headings, such as the type of personnel involved, military or civilian, or air-lines. We will record it under the type of object it was eventually determined to be." Capt. Cybulski leaves for Dayton, Ohio, the next day to coordinate activities more closely. He reports that Hynek is "ready to quit" because he is "ridiculed by members of my profession for chasing these imaginary objects." But Burgess persuades him to stay. (CUFON, "4602d AISS Unit History Sampler, Part 3 of 7 Parts"; Brian Skow and Terry Endres, "The 4602d Air Intelligence Service Squadron and UFOs," *IUR* 20, no. 5 (Winter 1995): 9–10; Capt. Joseph A. Cybulski, "How the Air Force Investigated UFOs," *IUR* 20, no. 5 (Winter 1995): 11, 30–32)

1954, January 18 — Cosette Weiss of Las Cruces, New Mexico, is visiting the Kilbourne Hole, a maar volcanic crater in the Potrillo Volcanic Field of southern New Mexico, to collect gemstones with a companion, Mrs. Sanders. They discover 25–30 disc-shaped tracks in the sand. The largest are about 2 feet in diameter, perfectly round, and consist of four concentric rings. They find more fresh tracks on January 22. Sanders reports this to White Sands Proving Grounds. Two Army security agents, Capt. Ross Orcutt and CID agent Henry Herman, spend the night of February 6 at the location and report that the tracks are "nothing more than a combination of wind, sand, and roots." The mystery lights seen in the area by Weiss are labeled "vehicular traffic." ("Report from the Readers," *Fate* 7, no. 6 (June 1954): 109–129; Michael D. Swords, "Fun and Games in the Desert near Las Cruces," *IUR* 30, no. 3 (May 2006): 21)

1954, January 18 — 1:30 p.m. Many people in Saint-Arnaud [now El Eulma], Algeria, observe an object that leaves a double trail of white smoke, making an immense circle over the town. Several officers at Bordj de la Remonte fort (southwest of Magra) hear the object make a strange sound. It seems to arrive from the north. A meteorological station near Oued Hmimim (southeast of Constantine) observes a double trail of smoke at 2:00 p.m., but it concludes that the smoke comes from a plane flying at great altitude. At 2:30 p.m., inhabitants of Sétif see an object arrive from the east, emitting bluish smoke trails and moving relatively slowly. After circling above the town for several seconds, it suddenly heads back in the direction of Saint-Arnaud at great speed. Witnesses describe it as it being cigar-shaped and flying at high altitude. Finally, at 4:45 p.m., a large, luminous, rectangular-shaped object is seen over Ouled Djellal (125 miles southwest of Sétif) for over 30 minutes following a rectilinear course. The object comes from the east and disappears toward the west. (ClearIntent, p. 133)

1954, January 25 — The British Air Ministry and the British War Office order airmen and soldiers to tell the public nothing about UFOs. (Harold T. Wilkins, *Flying Saucers on the Attack*, Citadel, 1954, p. 318)

1954, January 25 — 10:00 p.m. A civilian employee and astronomer, Robert D. Schaldach in the Technical Service Unit at White Sands Proving Grounds, New Mexico, is setting up his ballistic camera to monitor a missile test. As he looks at the stars to calibrate his instrument, he notices a yellow-white light moving from northeast to southeast in a shallow arc. It pulses in brightness at regular intervals. At the same time, another observer 17 miles to the southeast also sees the object. They perform some triangulation measurements and determine that the object is about 12 miles distant and moving at 12,000 mph. Schaldach says it is not a meteor. Blue Book, no doubt Hynek, labels it as a meteor. (Michael D. Swords, "Fun and Games in the Desert near Las Cruces," *IUR* 30, no. 3 (May 2006): 20–21)

1954, January 27 — The US successfully launches a Redstone surface-to-surface missile that flies 55 miles from Cape Canaveral, Florida. (Wikipedia, "PGM-11 Redstone")

1954, January 28 — Australian Minister for External Affairs Richard Casey suggests there is a correlation between UFO sightings and "periods of intense meteorite activity." ("Flying Saucer Investigations," *Burnie (Tas.) Advocate*, February 1, 1954, p. 9; Swords 374)

1954, January 29 — Afternoon. Mr. and Mrs. J. A. Whitaker are driving 6 miles south of Santa Ana, California, when they see a round object emitting a blurry light-blue light moving off a hilly field. It passes over their car at an altitude of 25 feet. The radio goes blank and the motor coughs and continues to act roughly after the UFO had gone. Whitaker estimates it is 60 feet in diameter and traveling at 600 mph. It makes a vertical ascent and disappears. (Schopick, p. 5)

1954, February — Civilian Saucer Intelligence of New York is founded by Ted Bloecher, Isabel Davis, and Alexander Mebane. The group holds regular meetings, sponsors lecturers, and begins publishing a *CSI Newsletter* in February 1955. It disbands in 1959. (Wikipedia, "Civilian Saucer Intelligence"; *CSI Publication*, no. 0 (April 23, 1954); Clark III 241; Clark IV 281–282)

1954, February — Clara John begins publishing *The Little Listening Post* newsletter in Washington, D.C., although she claims that she began a form of it in 1948. It continues through August 1965. (*Little Listening Post*, February 9, 1954; Powell, *Keyhoe*, 146; Curt Collins, "The Woman Who Made UFO News," The Saucers That Time Forgot, December 19, 2024)

1954, February — Mr. and Mrs. Forster of Peekskill, New York, see a UFO on the ground with a woman close by. She holds a tube in one hand and a box in the other, wears luminous clothing and a hood over part of her head. Mrs. Forster has to be taken to the hospital in a state of shock. (Dominick C. Lucchesi, "They Saw a Saucer Woman," *The Saucerian* 2, no. 2 (September 1954): 12–17; Vallée, *Magonia*, p. 205; Clark III 267; Clark IV 307–308)

1954, February — Newlyweds Ernest L. Norman and Ruth E. Norman found a contactee group, the Unarius Academy of Science, in Los Angeles, California. Ernest, a spiritualist medium, wants the group to promote the interdimensional science of life expounded in the books he has written, all of them channeled psychically from extraterrestrial intelligences. Both claim impressive credentials from past lives. Ruth styles herself the Archangel Uriel and after the death of Ernest in 1971, she becomes the public face of Unarius. Before her death in 1993, she predicts a mass landing of flying saucers in 2001 on a piece of scrubland near the Unarius headquarters in El Cajon, California. (Wikipedia, "Unarius Academy of Science"; Douglas Curran, *In Advance of the Landing: Folk Concepts of Outer Space*, Abbeville, 1985, pp. 27–37; Clark III 1186–1187; Clark IV 1361)

1954, February 1 — 10:00 a.m. Mrs. W. J. Daily of La Puente, California, sees a silvery, bright, round object through binoculars. It tilts, revealing a fiery-red bottom. The UFO spins and drifts away with an odd-looking vapor trail. A large amount of cobwebby substance falls on her property. She takes three samples to the Mount Wilson Observatory. The material apparently falls over three city blocks, catching on trees, fences, and telephone wires. Mrs. Mel Barnes sees a similar white object spewing the material. ("Valley Mystery Craft Spins Web," *San*

Fernando Valley (Calif.) Times, February 15, 1954, p. 11; James C. McNamara, "Angel's Hair," *Pageant* 10 (November 1954): 52–56; R. DeWitt Miller, *Stranger Than Life*, Ace, 1955, pp. 95–101; Olsen, sec. 3, p. 27; Story, p. 19; Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, pp. 24–25; Michael D. Swords, "Angel Hair: Spindrift between Worlds," *IUR* 32, no. 1 (August 2008): 4–5)

1954, February 4 — 11:00 p.m. A target is detected by the Carswell AFB [now Naval Air Station Joint Reserve Base Fort Worth] Ground Control Approach radar, near Fort Worth, Texas, at a distance of 13–15 miles to the southwest. A "mystery aircraft" passes over Carswell tower at just over 3,000 feet. Seen through binoculars, the UFO has a long fuselage, elliptical wings, some kind of stabilizer, a bright light on its nose and tail, two yellowish lights on the bottom, and possible lights on each wing tip. It is silent. The report is sent directly to the Joint Chiefs of Staff, CIA, and NSA. (NICAP, "Radar/Visual with Two Radars"; Sparks, p. 208; Good Above, pp. 281–282, 495–496; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 48–51)

1954, February 13 — Jim G. Lucas of Scripps-Howard papers reports that representatives of major US airlines will meet in Los Angeles with Military Air Transport Service intelligence officers to discuss speeding up UFO reporting procedures. "Airline pilots are asked not to discuss their sightings publicly or give them to newspapers." ("Airline Pilots Sighting 5–10 'Saucers' Nightly," *Pittsburgh (Pa.) Press*, February 13, 1954, pp. 1, 3; Keyhoe, *FS Conspiracy*, p. 98–99; UFOEv, p. 134)

1954, February 13 — Astronomer Clyde Tombaugh gives a talk to the Astronomical Society of Las Cruces, New Mexico. He predicts an increase in UFO sightings and tells the audience to keep its eyes open and be ready to report sightings. (Keyhoe, *FS Conspiracy*, p. 99)

1954, February 15 — American syndicated columnist Dorothy Kilgallen writes: "Flying saucers are regarded as of such vital importance that they will be the subject of a special hush-hush meeting of world military heads next summer." (Dorothy Kilgallen, "Voice of Broadway" column, *Dover (Ohio) Daily Reporter*, February 15, 1954, p. 8)

1954, February 15 — *Aviation Week* publishes an article describing new Soviet jet bombers capable of carrying a nuclear bomb to the US. The aircraft is the Myasishchev M-4 Bison. The rumors are soon debated publicly in the press and Congress. The Air Force begins promoting its unfounded myth of a bomber gap, in which the Soviet Union has 500 bombers capable of delivering nuclear weapons. (Wikipedia, "Myasishchev M-4"; David A. Anderton, "Pictures Reveal Reds' New 'Sunday Punch,'" *Aviation Week*, February 15, 1954, pp. 12–13)

1954, February 15 — Morning. Stephen Darbishire, 13, and his cousin Adrian Meyer, 8, set off for an expedition to the Old Man of Coniston, a fell in the Lake District, England, armed with a Kodak box camera. Meyer notices an object above Dow Crag with a silvery, glassy appearance, shining like aluminum. It glides toward them and approaches within 1,200 feet, traveling at tremendous speed, and then stops suddenly and hovers noiselessly, in the sky. Darbishire takes two photos, which resemble those of scoutships taken by George Adamski in the US. A probable hoax, although Darbishire still refuses to say anything explicit about the original photos, which no longer exist. ("Coniston Puzzle," *Flying Saucer News*, no. 9 (Summer 1955): 19; Leonard G. Cramp, *Space, Gravity, and the Flying Saucer*, British Book Centre, 1955, pp. 13–17, 171–179; Good Above, p. 377; David Clarke and Andy Roberts, "UFO Hoaxing and the Story of Stephen Darbishire," *Magonia*, no. 75 (July 2001); Clark III 42; Clark IV 60)

1954, February 17 — Commercial airline representatives meet with Military Air Transport Service officers at the Roosevelt Hotel in Los Angeles, California, and are told that pilots are subject to JANAP 146 (CIRVIS) and must radio reports to the nearest airport and make no public statements or face a prison term of 10 years and/or a fine of $10,000. (Raymond E. Fowler, *Casebook of a UFO Investigator*, Prentice-Hall, 1981, pp. 182–183; Good Above, p. 283)

1954, February 19 — CIA agent Morris "Morse" Allen simulates the ultimate experiment in hypnosis: the creation of a "Manchurian Candidate," or programmed assassin. Allen's victim is a secretary whom he puts into a deep trance and tells to keep sleeping until he orders otherwise. He then hypnotizes a second secretary and tells her that if she cannot wake up her friend, "her rage would be so great that she would not hesitate to 'kill.'" Allen leaves a pistol nearby, which the secretary has no way of knowing is unloaded. Even though she has earlier expressed a fear of firearms of any kind, she picks up the gun and pulls the trigger on her sleeping friend. After Allen brings the "killer" out of her trance, she has apparent amnesia for the event, denying she could ever shoot anyone. (John D. Marks, *The Search for the "Manchurian Candidate": The CIA and Mind Control*, Times Books, 1978, pp. 182–186)

1954, February 20–21 — President Eisenhower is on a golf vacation at Smoke Tree Ranch in Palm Springs, California, when he breaks the porcelain cap of his "upper left central incisor" and has it repaired by Dr. Francis A. Purcell.

However, the incident is not reported in the press, and rumors start buzzing that he made a secret trip to Edwards Air Force Base to view the remains of aliens who had crashed at Roswell, New Mexico, in 1947. Later stories claim he actually visited with live aliens and conducted a treaty with them. The lack of any dental record from Purcell's office has fueled the rumors, but Ike's dental history is thoroughly covered in the November 1995 issue of the *Bulletin of the History of Dentistry*. ("'Object' Studied at Edwards Air Base as 'Brass Curtain' Falls around Saucer Data," *Flying Saucer News-Service Research Bulletin* 1, no. 9 (August 20, 1955): 3; Wilkins, *FS Uncensored*, Citadel, 1955, pp. 45–48; Riley Crabb, *Flying Saucers and the Coming Space Probes*, The Author, 1959; Michael D. Swords, "Tales from the Barker Zone," *IUR* 17, no. 6 (Nov./Dec. 1992): 4–10; Jerome Clark, "A Catalog of Early Crash Claims," *IUR* 18, no. 4 (July/Aug. 1993): 18, 24; James M. Mixson, "A History of Dwight D. Eisenhower's Oral Health," *Journal of the History of Dentistry* 43, no. 3 (November 1995): 93–103; Juan A. Lorenzo Rivas, "President Eisenhower's 'E.T.' Encounter: What *Really* Happened at Muroc Base?" *Flying Saucer Review* 44, no. 3 (Autumn 1999): 2–6; Gordon Creighton, "More on the 'Muroc' Story," *Flying Saucer Review* 44, no. 3 (Autumn 1999): 6–10; Michael E. Salla, "Eisenhower's 1954 Meeting with Extraterrestrials: The Fiftieth Anniversary of First Contact?" Research Study No. 8, Exopolitics, February 12, 2004; Peter Carlson, "Ike and the Alien Ambassadors," *Washington Post*, February 19, 2004; Good Need, pp. 208–209; John Joyce, "Ike's Space Alien Encounter," The Ike Blog, November 10, 2011; Clark III 330–331; Clark IV 367–368)

1954, February 23 — Scripps-Howard papers report that the "nation's 8,500 commercial airline pilots have been seeing a lot of unusual objects while flying at night, here and overseas." They confirm that plans for a detailed reporting system were agreed upon at the February 17 meeting in Los Angeles, California, so that the Air Force can investigate quickly. Each airline is to have an "internal security specialist" as a liaison with the military. ("Flying Saucers Reports System to Be Organized," *Albuquerque (N.Mex.) Tribune*, February 23, 1954, p. 10; UFOEv, p. 134)

1954, March? — Two Native Australians, employees of Arthur Pope, see a UFO at close range at Santa Teresa Mission 50 miles south [more like 20 miles southeast] of Alice Springs, Northern Territory. One named Sonny is riding up over a ridge when a spherical object flies directly toward him then veers away. Sonny feels a heavy wind when the UFO passes. Others see the object, which has a glassy appearance, with four trails of smoke coming from each side. ("Claims Natives Terrified by Flying Saucer 50 Miles from Alice," *Alice Springs (N.T.) Centralian Advocate*, April 2, 1954, p. 1; Keith Basterfield, "Alice Springs: 1954 Encounter," Unidentified Aerial Phenomena—Scientific Research, February 7, 2012)

1954, March — Cincinnati, Ohio, businessman Thomas B. Eickhoff informs Keyhoe that *Flying Saucers from Outer Space* was "not submitted to the air force for authentication prior to publication," although it contains official UFO reports. (Keyhoe, *FS Conspiracy*, p. 108)

1954, March 1 — 6:45 a.m. Castle Bravo is the most powerful nuclear device detonated by the US and its first lithium deuteride–fueled thermonuclear weapon. The test's yield is 15 megatons of TNT, 2.5 times the predicted 6.0 megatons (due to unforeseen additional reactions involving lithium-7), which leads to the unexpected radioactive contamination of areas to the east of Bikini Atoll in the Marshall Islands. At the time, it is the most powerful artificial explosion in history. Fallout, the heaviest of which in the form of pulverized surface coral from the detonation, falls on residents of Rongelap and Utirik atolls, while the more particulate and gaseous fallout spreads around the world. The inhabitants of the islands are not evacuated until three days later and suffer radiation sickness. Twenty-three crew members of the Japanese fishing vessel *Daigo Fukuryū Maru* are also contaminated by the heavy fallout, experiencing acute radiation syndrome. The blast incites international reaction over atmospheric thermonuclear testing. (Wikipedia, "Castle Bravo")

1954, March 1 — Morning. Airborne Radar Operator W/O Olin H. Hasty is aboard an RB-36 controller aircraft monitoring the Castle Bravo test at Bikini Atoll. Shortly after the detonation, the RB-36 is flying at 40,000 feet and Hasty picks up two or three unidentified targets operating above 60,000 feet. From the cockpit the pilot and copilot can see the objects, which are flying in holding patterns above the area of the blast. Task force headquarters advises them that the objects are Canberra aircraft flown by the Royal Australian Air Force on air-sampling missions. However, there is only one British Canberra in the area at the time. (Nukes 110–113)

1954, March 1 — An article in *American Aviation* planted by the Air Force attributes the latest wave of sightings to Keyhoe's 1953 book *Flying Saucers from Outer Space*. ("The Saucers Again," *American Aviation* 17 (March 1, 1954): 3; Keyhoe, *FS Conspiracy*, p. 104; Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, p. 49)

1954, March 1 — Numerous bathers at the beaches near Montevideo, Uruguay, observe a metallic disc emitting yellowish reflections. It remains stationary for 2 minutes at an altitude of several thousand feet. (Lorenzen, *The Whole Story*,

Signet, 1969; ClearIntent, p. 133; Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, p. 45; Loren E. Gross, *The Fifth Horseman of the Apocalypse*: *UFOs: A History, 1954 January–May, Supplemental Notes*, The Author, 2002, p. 19)

1954, March 1 — 2:30 p.m. Employees at Carrasco International Airport in Montevideo, Uruguay, watch a strange oval object above the northeast horizon. It changes shape and ejects a smaller body that moves below and behind. An operator named de Rizzardo in the control tower sees an oval object with protuberances, accompanied by a pair of smaller bodies. Chief Controller Pedro V. Ocamp is still fumbling with binoculars as the objects speed away. (Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, p. 45)

1954, March 5 — Evening. At Nouasseur Air Base [now closed] near Casablanca, Morocco, crews of USAF KC-97 aerial tanker planes and a C-54 transport see one or two white or amber objects or lights make passes at the aircraft on collision courses as they practice ground-controlled approach landings. At 7:15 p.m., KC-97 pilots Capt. G. E. Brown, 1st Lt. L. B. Gordon, and 1st Lt. J. P. Glover, 301st Air Refueling Squadron, 301st Bomb Wing, while flying a KC-97 to a practice landing at 1,500 feet about 5-8 miles southwest of the base, see two white lights to the right on an apparent collision course. The KC-97 takes evasive action. Later [at 8:20 p.m.? 9:20 p.m.?], after landing and takeoff, they see the same or similar two white lights on the same course from the south on a collision course and they made an evasive 360° turn. At 7:38 p.m., pilots Capt. Robert R. Zadnick, Lt. Paul R. Fisher, and Lt. George A. Kerr flying another KC-97 at 1,500 feet about 5 miles southwest of Nouasseur base see a light at about the same altitude and to the left, apparently headed west on a collision course. As it crosses, they see 2 lights like jets but with no aircraft running lights. One light passes over and one under the KC-97. At 9:55 p.m., senior pilot Capt. William M. Pond, copilot Lt. I. W. Gilchrist, and navigator Capt. James F. Pullen, while flying a C-54 at 2,000 feet at Nouasseur base see a white or amber light like an aircraft landing light at about the same altitude approaching on a collision course heading west 2–3 miles away. It then turns onto a direct head-on course, passing within 2 miles, then suddenly disappears like turning off a light. It then reappears 10–15 seconds later, hovers, descends to the ground, then rises and disappears behind the C-54 after completing its turn onto final landing approach. No radar or other visual contact is made. (NICAP, "Aircraft (2) Encounter Lights on Collision Course"; Sparks, p. 210)

1954, March 5 — A photo supposedly taken near Rouen, France, by a fighter pilot is actually a retouched photo showing the 1950 McMinnville, Oregon, UFO photo taken by Paul Trent. (NICAP, "RAF Flying Review Photo"; *RAF Flying Review*, July 1957, p. 15)

1954, March 8 — 11:07 p.m. A red disc-shaped UFO flies over Laredo AFB [now Laredo International Airport], Texas. It tilts to a vertical orientation and then shoots straight up into the sky. It is reported by a pilot. Ten to twenty nocturnal lights in a crescent formation—possibly a single crescent-shaped object—fly over San Antonio, Texas. They make no sound. (Keyhoe, *FS Conspiracy*, p. 110)

1954, March 9 — 3:57 a.m. John H. Stewart is driving north on Paddock Road in Cincinnati, Ohio. He sees a bright halo of pulsating, bluish-white light moving slowly toward the south. Inside the halo is a dark, ellipsoidal body, seemingly solid and soundless. The object hovers for 7–8 minutes above the General Electric plant. Stewart estimates its size as a half dollar held at arm's length and its altitude as 2,000–3,000 feet. The object starts moving to the east, changes color to yellow then red, and disappears straight up. ("Saucer Marginalia," *CRIFO Newsletter* 1, no. 1 (April 7, 1954): 4)

1954, March 10 — JANAP 146 (C), "Communications Instructions for Reporting Vital Intelligence Sightings from Aircraft and Waterborne Sources." This directive allows waterborne sources for CIRVIS and adds MERINT reports. Civilian pilots must also report UFOs to the Air Force and refrain from talking about it. (Joint Chiefs of Staff, Joint Communications–Electronics Committee, "JANAP 146(C) Communications Instructions for Reporting Vital Intelligence Sightings from Airborne and Waterborne Sources," March 10, 1954; Jacobs, *The UFO Controversy*, Indiana University, 1975, pp. 104–105; Good Above, p. 283; Antonio F. Rullán, "Blue Book UFO Reports at Sea by Ships: Analysis of the Blue Book Ship Database," December 10, 2002, pp. 8–9; Clark III 921; Clark IV 1031–1032)

1954, March 10 — Leonard H. Stringfield founds Civilian Research, Interplanetary Flying Objects (CRIFO) in Cincinnati, Ohio. (Clark III 1114; Eghigian, *After*, p. 96; Clark IV 1240)

1954, March 12 — 9:35 a.m. USAF 1st Lt. Robert Johnson, flying an F-86 over Nouasseur Air Base [now closed] near Casablanca, Morocco, chases an object at more than 530 mph for 30 seconds, but is unable to catch it. The object appears to be the size of a fighter plane but has neither tanks nor vapor trails. (NICAP, "F-86 Chases Object at 500 MPH"; Sparks, p. 210)

1954, March 15 — A memo about a recent Project Second Storey meeting show that experiments at Wilbert B. Smith's Shirley's Bay detecting station is running experiments correlating UFO reports with magnetic disturbances and

gamma radiation. It recommends looking into as yet undiscovered gravity waves. (Arthur Bray, *The UFO Connection*, Jupiter, 1979, pp. 70, 191; Good Above, pp. 187–188)

1954, Mid-March — Prince Philip, Duke of Edinburgh, invites probable UFO photo hoaxer Stephen Darbishire to Buckingham Palace in London, England, to relate his story to an aide. A full report of the interview is sent to the duke, who is in Australia. (Good Above, p. 39)

1954, March 18 — 4:25 p.m. Two conservation officers stationed on Hecla Island in Lake Winnipeg, Manitoba, are driving their snowmobile across the frozen lake when they see a slim silver object 100 feet long and only 8 feet thick. They watch the object as it changes orientation from vertical to horizontal and back again. They estimate it is 15,000 feet high and 10 miles away. (Chris Rutkowski, *Canada's UFOs: Declassified*, August Night, 2022, p. 69)

1954, March 23 — Capt. William B. Nash gives a talk at a Greater Miami (Florida) Aviation Association luncheon at the Seven Seas Restaurant and offers his assessment of the Air Force's handling of UFO investigations. He suspects that the Air Force has concluded that UFOs are a real phenomenon, but they fear creating a state of panic by admitting as much. ("Hunks of Flying Saucers Found? Huh-uh, Says AF," *Terre Haute (Ind.) Tribune*, March 23, 1954, p. 1; "Air Force Denies Flying Saucer Debris," *San Bernardino (Calif.) County Daily Sun*, March 24, 1954, p. 23; William B. Nash, "Are the Saucers Our Friends?" *Mystic* 1, no. 3 (March 1954): 6–14; Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, pp. 56–58; Michael Hall, "Was There a Second Estimate of the Situation?" *IUR* 27, no. 1 (Spring 2002): 11)

1954, March 24 — Night. Civil Defense Deputy Coordinator Adolph Wagner sees 13 sharply defined triangular objects moving west to east over Baltimore, Maryland, in a V formation. They are glowing a fluorescent blue. From the north, a larger object approaches and stations itself in front of the V. When a commercial airliner appears, the objects split formation. Six execute a sharp turn, the color shifts to purplish, and they head toward the airplane in single file. The other 8 objects continue flying east. ("Multiple Object Sightings by Creditable Observers Continue," *CRIFO Orbit* 1, no. 4 (July 2, 1954): 3; UFOEv, p. 66)

1954, March 25 — 3:20 p.m. USMC Capt. Dan C. Holland is flying one of three jets with the 3rd Marine Air Wing on an easterly heading at Fort Lauderdale, Florida, at about 26,000 feet and 400+ mph. He sees a gleaming white, ball-shaped object with a gold ring around the lower third, about 2 times size of his jet, descending vertically on a collision course. He takes evasive action and radios the other jet pilots to look. The object suddenly stops 3,000–4,000 feet above his jet. He banks toward it and activates the gun camera, but the UFO accelerates and disappears to the east at tremendous speed in about 15 seconds. The other two pilots flying ahead of him do not see the object. (NICAP, "Ball with Golden Rings Stops near F-9F"; Sparks, p. 211; "Pilot's Tale: 'Flying Saucer' Reported," *Miami (Fla.) News*, March 26, 1954, p. 2; "Saucer Skeptic Sees 'Object,'" *Stars and Stripes*, March 28, 1954, p. 3; Keyhoe, *FS Conspiracy*, pp. 115–116; Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, pp. 61–62)

1954, March 28 — 1:25 a.m. Capt. Sperry and his copilot on United Air Lines Flight 600, flying east at 19,000 feet 12 miles east of Cherokee (near Creston), Wyoming, spot a bright green glowing object at 12°–15° above the horizon coming downward at an angle of 30° to the left of vertical and disappearing behind a cloud bank. It is also seen by the pilot of a DC-3 west of Sinclair, Wyoming, at 13,000 feet. (Sparks, p. 211; Good Above, pp. 283–284)

1954, March 28 — Following the success of *Flying Saucers Have Landed*, George Adamski gives a talk to the Detroit Flying Saucer Club at the Masonic Temple in Detroit, Michigan, which draws 4,700 people. Chicago-area contactee John Otto meets Charles and Lilian Laughead at the talk and tells them about the space messages from Sananda channeled by Dorothy Martin of Oak Park, Illinois. (Bryant and Helen Reeve, *Flying Saucer Pilgrimage*, Amherst Press, 1957, pp. 14–16; Clark III 717; "Palomar Mountain, 1940–1960: From Obscurity to World Fame," The Adamski Case, September 22, 2019; Eghigian, *After*, pp. 120–121; Clark IV 786)

1954, Spring — The British Flying Saucer Bureau in Bristol takes over publication of the now quarterly *Flying Saucer News* from the Flying Saucer Club in Hove, Sussex. It continues until the Spring 1956 issue and publishes several issues of the *Flying Saucer News Bulletin* from February 1955 through 1957. (*Flying Saucer News*, no. 5 (Spring 1954); *Flying Saucer News Bulletin*, no. 1 (February 1955); Eghigian, *After*, p. 111)

1954, Late spring — Noon. A family living in a cottage on the outskirts of Norco, California, is sitting down for lunch when they hear a metallic droning sound. The mother and daughter go outside and see an object like a rowboat with a transparent dome, 20 feet long and 10 feet wide, pass slowly overhead, then stop and hover over a nearby tree. Inside the dome are five helmeted men staring at the witnesses. Their "rather long faces" are olive-colored, and their eyes and hair are dark. After a minute the droning sound resumes, and the object takes off slowly. (Donald B. Hanlon, "Occupants Observed at Norco," *Flying Saucer Review* 14, no. 3 (May/June 1968): 15–16; Clark III 267; Clark IV 308)

1954, April — 2:00 p.m. Two male witnesses watch through binoculars a vividly white object hovering high in the sky for 10 minutes above Kwajalein Atoll in the Marshall Islands. A cone-shaped mist appears on its leeward side, then the object shoots straight up and disappears. (Jessup, *The UFO Annual*, Citadel, 1956; Nukes 114)

1954, April — The Royal Australian Air Force issues its first statement of policy on UFOs, admitting that it does attempt to evaluate reports: "There is no doubt that reliable observers have reported sightings which today are inexplicable within the resources available to the RAAF." ("R.A.A.F. to Investigate 'Saucers,'" *Lismore (N.S.W.) Northern Star*, May 20, p. 3; Project 1947, "The Former Air Board / Department of Air / Current RAAF")

1954, April — Oak Park, Illinois, contactee Dorothy Martin has been channeling entities through automatic writing. One introduces himself as Sananda, who lives on the utopian planet Clarion. She begins typing up the messages in newsletters and distributing them to readers, including Charles and Lilian Loughead from Detroit, Michigan, whom she met in March. (Clark III 717; Clark IV 786)

1954, April 4 — Keyhoe meets with Ruppelt at the Hollywood Roosevelt Hotel in Los Angeles, California, and shares recent UFO reports. Ruppelt agrees to write a letter supporting the claim that Keyhoe has used genuine ATIC reports for his book. (Keyhoe, *FS Conspiracy*, pp. 116–120; Powell, *Keyhoe*, 137)

1954, April 4–5 — Contactee George Van Tassel holds the first Giant Rock Interplanetary Spacecraft Convention at Giant Rock, a huge boulder in the Mojave Desert near Landers, California. Speakers include Orfeo Angelucci, Truman Bethurum, Daniel Fry, and George Hunt Williamson. It draws a crowd variously estimated at 2,500 to 6,000. ("Interplanetary Spacecraft Convention Draws 6,000," *San Bernardino County (Calif.) Sun*, April 5, 1954, p. 9; "The Grapevine," *APRO Bulletin*, May 15, 1954, p. 3; Jacqueline Sanders, "The Van Tassel Saucer Meeting," *The Saucerian* 2, no. 2 (September 1954): 15–17; Clark III 531, 717; Clark IV 581, 785)

1954, April 5 — Keyhoe appears on *The Betty White Show* and asserts that, contrary to what the Air Force claims, some UFO reports are kept secret. ("Former Marine Corps Maj. Donald E. Keyhoe," *Belleville (Ill.) News-Democrat*, April 8, 1954, p. 17; Keyhoe, *FS Conspiracy*, pp. 117–118; "Betty White on UFOs with Don Keyhoe et al.," Tom Owens UAP YouTube channel, 2022; Powell, *Keyhoe*, 135–137, 140)

1954, April 7 — Leonard H. Stringfield publishes the first issue of *CRIFO Newsletter*. (*CRIFO Newsletter* 1, no. 1 (April 7, 1954; Clark III 1114; Clark IV 1240)

1954, April 7 — Publication date of the dubious Majestic-12 Group Special Operations Manual that surfaced on March 14, 1994, when ufologist Don Berliner received a roll of undeveloped 35-millimeter film that had been mailed from La Crosse, Wisconsin, by an anonymous source. When the film is developed, it shows photos of 21 pages from a 31+-page document titled *Extraterrestrial Entities and Technology Recovery and Disposal* and prominently labeled "Top Secret/MAJIC Eyes Only." The manual contains information on "determination, documentation, collection, and disposition of debris, devices, craft, and occupants" of crashed UFOs. It describes the characteristics of extraterrestrial craft, Extraterrestrial Biological Entities (EBEs), and extraterrestrial technology. Specific types of alien technology are supposedly to be shipped to either Area 51 S-4 at the Nevada Test and Training Range, the Blue Lab at Wright-Patterson AFB WP-61, Building 21 at Kirtland AFB KB-88, or OPNAC BBS-01 (unidentified). (*Extraterrestrial Entities and Technology Recovery and Disposal*, April 7, 1954; Stanton T. Friedman, *Top Secret/MAJIC*, Marlowe, 1996, pp. 161–184; Philip J. Klass, "'MJ-12 Special Operations Manual,' Which Surfaced in Early 1994, Also Is Endorsed by Dr. Wood Despite Its Many Flaws," *Skeptics UFO Newsletter*, no. 55 (January 1999): 4–6)

1954, April 7 — 11:05 p.m. US Navy sailors and Marines, as well as nuclear scientists from Los Alamos and Sandia Laboratories in New Mexico, are aboard the AEC flagship USS *Curtiss* cruising between Bikini and Enewetak atolls in the Marshall Islands just hours after the Castle Koon thermonuclear test on Bikini. An unidentified oval-shaped luminous object, yellowish-orange in color, passes silently over the ship from bow to stern, traveling at a high rate of speed and low altitude. Once it is clear of the ship, the object performs some zigzag maneuvers before racing away at high speed. (Nukes 107–109)

1954, April 8 — 4:30–5:00 p.m. Lelah H. Stoker of 3121 N. Sheridan Road, Chicago, Illinois, sees a brilliant white round-topped disc, parachute-shaped, with a humanoid suspended beneath it, skim back and forth over the water of Lake Michigan. Stoker calls the Coast Guard. A cutter appears after 10 minutes, then the UFO approaches the shore. Stoker sees a short human-like occupant in a green, tight, one-piece suit suspended below the object. It gets out in undergrowth along the shore then walks around. When the cutter gives up searching, the occupant returns to the object which moves back over the lake then takes off at high speed to the east. (NICAP, "Lady Observes Saucer / Small Entity Gets Out"; Sparks, p. 211; Ted Bloecher, "A Humanoid Report from Chicago, Illinois," *MUFON UFO Journal*, no. 159 (May 1981): 9–14; Clark III 270; Clark IV 310–311)

1954, April 11 — Ruppelt's letter to Keyhoe states that the request to clear classified UFO reports came from both AF Intelligence and the Office of Public Information, after which his superiors cleared them; Keyhoe has correctly quoted the ATIC material; the Utah film analysis is classified; a 1953 letter from Al Chop to Henry Holt & Co.

attacking the "silence group" is quoted accurately; and except in a very few cases, ATIC rejects Donald Menzel's explanations of halos, sundogs, and mirages for UFOs. (Keyhoe, *FS Conspiracy*, pp. 119–120, 307–308; Donald E. Keyhoe, "The Captain Ruppelt Letters," *UFO Investigator* 2, no. 2 (October 1961): 6; Powell, *Keyhoe*, 138)

1954, April 12 — Approximately 7:00 p.m. An anonymous source of Leonard H. Stringfield's claims he is stationed at Roswell AFB in New Mexico for special training in the Sikorsky H-19 helicopter when he and his other crew members are scrambled for a flight 35–40 miles to the north-northwest where a silvery UFO has crashed edgewise into the sand. Four small bodies are allegedly scattered outside the craft, clad in dark-blue, tight-fitting uniforms. The informant is ordered to take several photos from different angles while the helicopter hovers at 30 feet altitude. The helicopter then is ordered to land about 100 feet away from the object. Several ground vehicles arrive on the scene and 15–20 men emerge to surround the area. The informant reports an overpowering stench pervading the scene, which causes one man to throw up. He then takes more photos of the crashed UFO and alien bodies. One of the ground crew tells him there are more dead bodies inside the craft. After returning to Roswell AFB he and the others are debriefed by intelligence officers for three days in isolation. On April 15, the helicopter crew is flown to the site again, where it has been cleaned up as if nothing has happened. He hears a rumor that the UFO has been stored at Hangar 18 on the base. Another rumor goes around that a UFO has also crashed at Bandelier, New Mexico, on April 24. The informant has recurring nightmares about the event for the next 30+ years. (Leonard H. Stringfield, *UFO Crash Retrievals: Status Report III, Amassing the Evidence*, The Author, 1982, pp. 81–85)

1954, April 14 — Night. Capt. John M. Schidel of United Air Lines Flight 193 is forced to make a sharp climbing turn in order to avoid colliding with an unknown object over Long Beach, California. One passenger (Coles Barber) is thrown to the floor and suffers a knee fracture, and stewardess Naomi J. Penaat breaks an ankle. The object is only in sight for 2 seconds. ("Two Injured As Airliner Banks in Sudden Turn," *Los Angeles Times*, April 16, 1954, p. II-3; Keyhoe, *FS Conspiracy*, pp. 130–132)

1954, April 18 — Colin McCarthy and two other men are driving an Austin sedan in the Australian outback near the border of Western Australia and South Australia when a UFO begins pacing them. They snap some 200 photos and take some ciné film of the object. Shortly after they report the incident, a helicopter suddenly appears and lands in front of their car. An RAAF officer gets out, walks over to their car, and confiscates the photos and film. They are never returned. (Stan Seers and William Lasich, "North Queensland UFO Saga, 1966," *Flying Saucer Review* 29, no. 1 (October 1983): 20–21; Good Above, p. 163)

1954, April 18 — Airline pilot William B. Nash writes to his friend Capt. William Joseph Hull about the emphatic denials of UFO reality issued by the Air Force shortly after his March 23 speech. He reveals that in August 1952 he was participating in a TV panel in New York City when someone in the WJZ-TV studio said he had just gotten back from Washington, D.C., where he has been given the "whole story" about the National Airport sightings. He claims the Air Force had operated a radio found in a retrieved saucer and that had caused the flurry of sightings. Nash also admits hearing rumors, especially one from syndicated aviation columnist Robert S. Allen, about a pro-UFO report that USAF was going to release in the fall of 1952 but never did. (Michael Hall, "Was There a Second Estimate of the Situation?" *IUR* 27, no. 1 (Spring 2002): 11–12)

1954, April 22 — 2:00 p.m. USN Seaman Apprentice James B. Stephens Jr. and Seaman Bernard G. Klein Jr., are driving a vehicle on the Naval Outlying Field San Nicolas Island, California, when they see a 4–6-foot long, gray, cigar-shaped object with a pointed nose traveling just above the ground on a near-parallel course. The object suddenly hits the ground, sends up a cloud of dirt, and disappears from sight. They stop and search for 20+ minutes but find nothing. (NICAP, "April 22, 1954: San Nicholas Island, Calif."; Sparks, p. 212)

1954, April 22 — 10:30 p.m. Six workers from the Reynolds Metals plant in Jones Mills, Arkansas, are waiting on a carpool near Pearcy, Arkansas, to go to work when they see a gleaming white ball about 10 feet in diameter float 50 feet above a house. It appears alternately as a sphere and an oblong, and sometimes it circles and sometimes hovers above the house for a total of 20 minutes. One man claims it approaches him to within a few feet, causing him to duck behind a car. One of the vehicles has a spotlight that they try to point at the object, but it always avoids the beam. ("Flying Saucer! Flying Ball! 6 Swear They Saw the Thing," *Hot Springs (Ark.) Sentinel-Record*, April 23, 1954, pp. 1, 3; "Fire Ball Sighted in Arkansas Skies," *Montgomery Alabama Journal*, April 23, 1954, p. 11; Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, pp. 76–77; Loren E. Gross, *UFOs, a History: 1954, January–May, Supplemental Notes*, The Author, 2002, p. 35)

1954, Late April — Afternoon. Roger Mougeolle and Gilbert Doridant are logging in a clearing in a forest area near Bois-de-Champ, Vosges, France, when they hear a noise above them "like the sound of a train passing over a metal bridge." They then see three metallic, cigar-shaped objects silently approaching them from over a nearby hill. Two pass over them, but the third slowly descends above their clearing and stops only a few feet from the ground. It is over 600 feet long. Doridant flees, but Mougeolle walks toward it and touches it. The object is smooth, cold,

and hard like steel. He touches it with his woodsman's axe, and he is instantly thrown about 18 feet away toward the base of a large rock. He feels paralyzed for a few minutes, but the object ascends and disappears, and he can move again. (Joël Mesnard, "The 'Steel Airship' at Bois-de-Champ (April 1954)," *Flying Saucer Review* 32, no. 5 (August 1987): 16–19)

1954, April 29 — 10:11 p.m. An unidentified illuminated object is seen above the Second Army Radio Station, Fort George G. Meade, Maryland, by the supervisor radio operator and two coworkers, Cpl. Flath and Pfc. Hough. Described as round, the color of the sun, and 3–4 times the size of a star, the UFO appears in the southwest, blinking on and off. As it reaches the station, it stops blinking and disappears by going straight up. The sighting lasts 7 minutes. (Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, p. 86; Good Above, p. 281)

1954, April 30 — 5:00 p.m. Frances Swan of Eliot, Maine, has her first contact with extraterrestrials when she hears a whitling sound in her left ear and feels compelled to write, "We come will help keep peace on Eu do not be frightened." Another messages comes on May 3 from an alien named Affa, calling from an enormous spaceship that has arrived from Uranus. In the days that follow, Swan receives other messages from Affa, as well as from Ponnar of Pluto and Alomar of Mercury and other beings representing the Universal Association of Planets. (Randall Fitzgerald, "Messages: The Case History of a Contactee," *Second Look* 1, no. 12 (October 1979): 12–18, 28–29; Clark III 1118; Clark IV 1244)

1954, May — Ruppelt's article appears in *True* magazine. It features his investigations of the Lubbock Lights and the DesVergers case for Project Blue Book. (Edward J. Ruppelt, "What Our Air Force Found Out about Flying Saucers," *True*, May 1954, pp. 18–30, 124–134; Powell, *Keyhoe*, 138–140)

1954, May — Midnight. Capt. Uthai Lunayatjata is on a training flight with a student, flying out of the Korat Royal Thai Air Force Base near Nakhon Ratchasima, Thailand. While flying toward the city at an altitude of 3,000 feet, he sees an orange fireball about 6 feet in diameter approaching his T-6 Texan on a parallel course to his right. It passes them at 800–1,000 mph. The control tower reports no other aircraft in the area. Lunayatjata makes a 180° turn to the right to follow it, and he notices a smaller fireball, blue in color, that is apparently attached to the orange ball. Before he completes the turn, the fireball makes a fast half-circle and appears about 600 feet off his tail, reduces its speed, and paces them for a short distance at their speed of 140–160 mph. They notice that the center of the orange fireball is dark. After 20 seconds it increases speed, flies ahead, and makes a right-hand climbing turn. Lunayatjata chases it up to about 5,000 feet but cannot get close, and it disappears in the distance. ("Pilot of Royal Thai Air Force Describes Encounter with UFO over Korat," *CRIFO Orbit* 2, no. 7 (October 7, 1955): 3)

1954, May 1 — 11:55 p.m. A large explosion is heard, felt, and seen over an 8-mile area near Logan, Utah. The blast nearly upsets cars, throws open heavy doors, and sends an earthquake-like shock through the area. Some people report seeing a glowing ball before the explosion; other witnesses report a flash of light at ground level. Lincoln LaPaz investigates, along with J. Stewart Williams and Clyde T. Hardy at Utah State Agricultural College [now Utah State University]. LaPaz says it is either a falling object of an explosive nature or buried high explosives set off by pranksters. A crater 16 feet in diameter and at least 6 feet deep is found, but no debris, even though LaPaz digs down 25 feet for five days. Nearly 50 years later, Theron Blazzard admits to the *Logan Herald-Journal* that as a geology student at Utah State he had detonated some dynamite at the spot because he had to dispose of it in order to move out of state. ("Meteor Sought in Crater after Logan Explosion," *Salt Lake Tribune*, May 3, 1954, p. 21; Keyhoe, *FS Conspiracy*, pp. 138–139; Wilkins, *FS Uncensored*, Citadel, 1955, pp. 223–224; "Friday Finishers: When Meteor Mania Struck Cache Valley," *Logan (Utah) Herald-Journal*, November 30, 2018)

1954, May 5 — 4:45 p.m. Sydney Baker is at a radar post in the RAAF Woomera Range Complex in South Australia when he notices a gray, circular object at 60,000 feet maneuvering around an English Electric Canberra aircraft he is monitoring from about 35 miles away. It appears to be traveling three times as fast as the Canberra. He watches it for about 5 minutes before it shoots out of sight to the south at about 3,600 mph. The same object is apparently tracked on Woomera radar at approximately the same time. (NICAP, [case documents]; Bill Chalker, *The Oz Files: The Australian UFO Story*, Duffy and Snellgrove, 1996, p. 85; Swords 381–383; Coulthart 2023, pp. 42, 44; Bill Chalker, "'Tommy Leader': Tom Dalton-Morgan and the 3% UFO Solution," TheOzFiles, June 25, 2024)

1954, May 7 — Naval radar around Washington, D.C., tracks a huge object maneuvering at 90,000 feet and moving down to 15 miles altitude. (Keyhoe, *FS Conspiracy*, pp. 144–145)

1954, May 8 — George King is washing dishes in his flat in Maida Vale, London, England, when he receives a psychic message telling him that he has been chosen to be the voice of the Interplanetary Parliament. Several days later, while he is in a meditative trance, an Indian yoga master enters his flat and tells him he has been selected to act as the Primary Terrestrial Channel for messages from cosmic intelligences who are visiting Earth. (Douglas Curran,

In Advance of the Landing: Folk Concepts of Outer Space, Abbeville, 1985, p. 63; "Dr. George King's Initial Contact in May 1954," The Aetherius Society YouTube channel, April 15, 2010)

1954, May 12 — 12:45 a.m. Three USAF Air Policemen (A/1C Mason W. Augst, A/1C George F. Wright, and A/1C Elmer A. Cruver) are standing guard next to a hangar at National Airport in Washington, D.C. They see a formation of two UFOs fly over the Capitol building. The objects are glowing white. They appear just above the horizon to the northeast in a straight line, make a 90° turn, then move away to the south. The objects reappear twice more, at 1:15 a.m. and 2:10 a.m. Each pass takes 45 seconds. (Sparks, p. 212; Frank Edwards, *FS—Here and Now!*, Lyle Stuart, 1967, pp. 84–85; Loren E. Gross, *UFOs, a History: 1954, January–May*, The Author, 1990, p. 94)

1954, May 12 — 4:00 p.m. White, silky filaments fall in strands averaging 30 feet in length over Shepparton, Victoria, Australia. A witness gathers some and, although they become wrinkled, they do not disintegrate. An analysis indicates in is a "pure white, silky, odorless, warm on touch like cotton, and different from cobwebs." The threads are not sticky and stretch easily. It resembles raw silk or nylon, is not water soluble, and burns rapidly. (Keith Basterfield, "Angel Hair: An Australian Perspective," *IUR* 27, no. 1 (Spring 2002): 6–7; Brian Boldman, "Angel Hair Physical Analyses: A Review," *JUFOS* 9 (2006): 101)

1954, May 14 — Around 12 noon. A flight of Marine Reserve jets led by Maj. Charles Scarborough is headed north near Dallas, Texas. At a point 6 miles west of the city, Scarborough sights 16 unidentified objects in groups of four, dead ahead but at higher altitude, 15° above. He radios Capt. Roy L. Jorgensen, whose jet he has in sight by its contrail. Jorgensen, at a higher altitude, sees the UFOs below his left wing. Just as the two pilots try to box in the UFOs, Scarborough sees them fade from glowing white to orange and disappear, apparently speeding away due north. Triangulation shows that the UFOs were at about 32,000 feet. (NICAP, "Four Navy Fighters Encounter 16 UFOs"; Sparks, p. 213; "4 Jet Fighters Report Race with 'Saucers' over Dallas," *Dallas (Tex.) Times Herald*, May 18, 1954; "4 Pilots Report Flying Saucers over Dallas Area," *Abilene (Tex.) Reporter-News*, May 18, 1954, p. 8-B; UFOEv, p. 32)

1954, May 15 — Gen. Nathan F. Twining, USAF Chief of Staff, speaking at an Armed Forces Day dinner at Amarillo AFB [now Rick Husband Amarillo International Airport], Texas, says that the Air Force has the best brains in the country working on the "flying saucer problem." He adds that about 90% of the reports are pure imagination, with the rest unexplained. ("Air Force Looks into 'Saucers,'" *Miami (Fla.) Herald*, May 17, 1954, p. 38; Keyhoe, *FS Conspiracy*, pp. 145–146)

1954, May 18 — Frank Edwards mentions CRIFO on his radio program, and within a week Stringfield gets 6,000 letters. (Stringfield, *Situation Red*, Fawcett Crest, 1977, pp. 10–11)

1954, May 18 — Contactee Frances Swan receives a message from Affa, asking her to write a letter to the US Navy so they can receive the space people's radio communications. Instead, she thinks of her next-door neighbor, retired Rear Adm. Herbert B. Knowles and relates the story to him. Knowles and his wife Helen hear her out and note her sincerity but have reservations about the space contacts. She tells them that Affa has scheduled a personal appearance at her home on May 26. However, Affa does not appear, instead sending Swan a psychic message apologizing for being unable to get there. (Randall Fitzgerald, "Messages: The Case History of a Contactee," *Second Look* 1, no. 12 (October 1979): 12–18, 28–29; Clark III 1118; Clark IV 1244)

1954, May 20 — FBI officials recommend that Attorney General Herbert Brownell Jr. authorize FBI break-ins to install bugs during national security investigations. The FBI would seek the Attorney General's prior approval, as with wiretaps. Brownell concurs, but concludes that he "would be in a much better position to defend the Bureau in the event there should be a technical trespass if he had not heretofore approved it." His directive empowers the FBI to break into homes and offices and install surveillance microphones without having to notify him or obtain advance approval in each case. The FBI has carte blanche on this until 1965. (Bernie Horowitz, "Wiretapping and J. Edgar Hoover," Unredacted, December 20, 2010)

1954, May 24 — 12:25 p.m. While flying on a photographic mapping mission 10 miles west-northwest of Richmond, Indiana, in a B-17, USAF Maj. Leo N. Brubaker observes and photographs a bright object below the plane for 45 seconds. The aircraft is flying at an altitude of 18,500 feet at 253 mph. The speed of the object is estimated at 506 mph. The object travels six miles at that speed. The photos are taken with a USAF T-11 mapping camera. Brubaker denies the object is a sundog. (NICAP, "B-17 Photographic Mission Case"; Sparks, p. 213)

1954, May 26 — Contactee Frances Swan of Eliot, Maine, has managed to impress her next-door neighbor, retired Rear Adm. Herbert B. Knowles, sufficiently for him to write Rear Adm. Carl F. Espe, head of the Office of Naval Intelligence, about her contacts with the space people. He encloses some of Affa's transcribed messages and suggests that the Office of Naval Intelligence try to communicate with Affa through Band CMM-306, repeating the signal M4M4 AFFA. (Randall Fitzgerald, "Messages: The Case History of a Contactee," *Second Look* 1, no. 12 (October 1979): 12–18, 28–29; Clark III 1118; Clark IV 1244)

1954, May 28 — Test pilot Arthur W. Murray reaches an unofficial record altitude of 90,440 feet in a Bell X-1A. (Wikipedia, "Arthur W. Murray")

1954, May 29–31 — The first conference of European and North American political, business, finance, academic, and media leaders later to become known as the Bilderberg group, meets at the Hotel de Bilderberg in Oosterbeek, Netherlands. Its agenda, originally to prevent another world war, is now defined as bolstering a consensus around free market Western capitalism and its interests around the globe. The first meeting is initiated by several people, including Polish politician-in-exile Józef Retinger who, concerned about the growth of anti-Americanism in Western Europe, proposes an international conference at which leaders from European countries and the United States would be brought together with the aim of promoting Atlanticism. Retinger approaches Prince Bernhard of the Netherlands who agrees to promote the idea, together with former Belgian prime minister Paul van Zeeland and the then-head of Unilever, Paul Rykens. (Wikipedia, "Bilderberg meeting")

1954, May 30 — 12:25 a.m. David Reese, Christopher Muir, and four others are at the doorstep of a house in East Malvern, Victoria, Australia, when they see an orange, oval-shaped UFO appear in the sky at close range. The UFO maneuvers in a downward curve and then pulls up. A cloud of yellow smoke and flame is seen at the rear. Three of the witnesses see shapes that look like human-shaped shadows inside the craft. (Bill Chalker, *The Oz Files: The Australian UFO Story,* Duffy and Snellgrove, 1996, p. 79; UFO Evidence, "Human Figures Seen in Saucer"; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 January–May, Supplemental Notes,* The Author, 2002, pp. 46–50)

1954, June 1 — 9:30–9:40 a.m. TWA pilot Capt. Charles J. Kratovil, copilot W. R. Davis, and flight engineer Harold Raney, on a Paris to New York TWA Constellation heading southwest, spot near Boston, Massachusetts, "a large, white-colored disc-like object" overhead, occasionally losing it behind overlying clouds. Flying into west-southwest headwinds at 300 mph, they conclude it cannot be a balloon, and radio Boston airport control tower, which tells them jets are scrambled. They then see the object at about 10,000 feet higher than their 10,000 feet altitude but cannot close with the object. (NICAP, "TWA Crew Spot White Disc / Kratovil Case"; Sparks, p. 214; "Flying Saucer Seen by Pilots in Boston Area," *New York Daily News,* June 2, 1954, p. 42; "Pilot Sights a 'Flying Disk,'" *New York Daily News,* later ed., June 2, 1954, p. 5; "Saucer Sightings," *Flying Saucer News* 1, no. 1 (March 1955): 8; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects,* Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 68–69)

1954, June 1 — The Air Force announces that it only received 87 UFO sightings in January–April. ("Most 'Saucers' Explainable," *Traverse City (Mich.) Record-Eagle*, June 1, 1954, p. 5)

1954, June 1 — 9:00 p.m. The crew of a USAF B-47 jet bomber is flying at 34,000 feet some 400 miles south of Minneapolis, Minnesota, when they spot an unknown object with running lights moving 10,000 feet away. The UFO paces the aircraft for one hour and is seen both above and below (24,000-44,000 feet) the aircraft at various times. (NICAP, "Object with Running Lights Encountered by B-47"; Clark III 997; Clark IV 1110)

1954, June 5 — 6:23 p.m. Janette Brown, 16, is standing on Princes Highway (M1) at Dandenong, Victoria, Australia, when she hears a loud drumming noise. A large, dark cylinder, about 30 feet long and 15 feet high with a canopy and window on top and a window at each end, appears above a nearby factory. She shines a flashlight on it, and it whirrs toward her. It hovers about 60 feet away. Her friend, Jeanette Johnston, 13, arrives and watches it before it disappears behind trees. Janette's wristwatch stops, although it starts running again when it is demagnetized. The case is investigated for the RAAF by University of Melbourne physicist O. H. "Harry" Turner. ("'Saucer' Terrifies Two Schoolgirls," *Melbourne (Vic.) Argus,* June 9, 1954, p. 3; "'Saucers' Do Exist—And Why!" *Melbourne (Vic.) Argus,* June 26, 1954, p. 7; Bill Chalker, "UFOs: Sub Rosa* Down Under The Australian Military and Government Role in the UFO Controversy, Part 1)" (1996); UFO Evidence, "Teenage Girls See Saucer")

1954, June 7–8 — PIO Capt. Robert White at the Pentagon repeats the 87 reports statistic from June 1 and counters that reports are at a three-year-low because of less publicity. Stringfield's colleague, Cincinnati, Ohio, businessman Tom Eickhoff, storms into the office of ATIC Deputy Commander of Intelligence Col. John O'Mara and demands that ATIC press legal action against contactees Truman Bethurum, George Adamski, and George Hunt Williamson. O'Mara replies that these people are obvious hoaxers and need no special action. But he lets slip that USAF fighters regularly carry movie cameras to take photos of UFOs. Eickhoff says that is a big waste of money if there is nothing to UFOs. O'Mara then states to Stringfield the next day that the Air Force actually receives 700 UFO reports a week, the 87 figure only applies to cases under "special analysis," over 1,000 leading scientists are working on government UFO projects, the material used by Keyhoe in his book was not cleared through official channels, and the Utah film exists but only shows conventional objects. (Keyhoe, *FS Conspiracy*, pp. 157–160;

"700 'Saucer' Sightings Weekly Reported to Air Force," *CRIFO Newsletter* 1, no. 4 (July 2, 1954): 1; "Proof of Air Force Cover-Up," *CRIFO Newsletter* 1, no. 4 (July 2, 1954): 1–2; Frank Edwards, *FS Serious Business*, Bantam ed., 1966, pp. 137–138; Frank Edwards, *Flying Saucers—Here and Now!* Lyle Stuart, 1967, p. 86; Stringfield, *Situation Red*, Fawcett Crest, 1977, pp. 85, 167–168; Powell, *Keyhoe*, 142)

1954, June 8 — Two Office of Naval Intelligence officers, Captains John Bromley and Harry Baltazzi, visit contactee Frances Swan at her home in Eliot, Maine, and through her interview the spaceman Affa, who agrees to communicate with them by radio on June 10. When that does not happen, Rear Adm. Carl F. Espe, head of the Office of Naval Intelligence, writes to Rear Adm. Herbert B. Knowles on July 8 saying that ONI will pursue the matter no further. He turns the letters over to the Navy's Bureau of Aeronautics. (Randall Fitzgerald, "Messages: The Case History of a Contactee," *Second Look* 1, no. 12 (October 1979): 12–18, 28–29; Clark III 1118; "The Obscure Case of Contactee Frances Swan with Alien Contact through Automatic Writing and Channeling," Eyes on Cinema YouTube channel, June 27, 2023; Clark IV 1244)

1954, June 9 — Col. Frank Milani, director of Civil Defense in Baltimore, Maryland, demands that the Air Force ease its restrictions on UFO information and blasts its policy on Lou Corbin's radio show. ("Every Woman's Hour (WFBR Radio) with Helen Brooks and Lou Corbin, Special Broadcast, 'Unidentified Flying Objects,' Wednesday, June 9, 1954," transcribed in Project 1947; "That Was No Saucer the Air Force Tossed at Civil Defense," *Washington (D.C.) Daily News*, June 10, 1954, p. 10; "Opinions," *APRO Bulletin* 3, no. 1 (July 1954): 11–12; Keyhoe, *FS Conspiracy*, pp. 157–160; Frank Edwards, *FS Serious Business*, Bantam ed., 1966, pp. 137–138; Project 1947, "UFO Reports, 1954"; Loren E. Gross, *UFOs, a History: 1954, June–August*, The Author, 1990, pp. 11–12)

1954, June 12? — Keyhoe and Edwards find out about the O'Mara interview, and Edwards puts it on his radio broadcast, generating more press calls to ATIC. Capt. Charles A. Hardin, head of Blue Book, states that "Colonel O'Mara's words were misinterpreted. What he meant to say was that if all the sightings were reported to the Air Force, they would total about 700 a week." (Keyhoe, *FS Conspiracy*, pp. 157–160; Loren E. Gross, *UFOs, a History: 1954, June–August*, The Author, 1990, pp. 11–14)

1954, June 12 — 11:30 p.m. Walter L. Tatspaugh of Hyattsville, Maryland, observes a large bluish-green oval or round object circling and hovering in the sky for at least 45 minutes. The Baltimore GOC Filter Center allegedly tracks an object on radar over Wilmington, Delaware, for an hour. Two F-86D fighters are scrambled but cannot reach it. (NICAP, "Object Tracked / Jets Scrambled"; Keyhoe, *FS Conspiracy*, pp. 161–162; Loren E. Gross, *UFOs, A History: 1954 June–August*, The Author, 1990, p. 18)

1954, June 14 — A UFO is again tracked over Wilmington, Delaware, flying in a rectangular course at 75,000 feet for more than 2 hours. (Keyhoe, *FS Conspiracy*, pp. 161–162; UFOEv, p. 66)

1954, June 18 — 7:35 p.m. Monsignor Émile Élie Verhille, Apostolic Vicar of Fort-Rousset [modern Owando, Republic of the Congo], reports in the Brazzaville newspaper *La Semaine de L'akf* that he and others had seen a UFO over Laketi Mission in the Mossaka District. A luminous globe arrives from the north and heads towards Laketi. It suddenly stops, rises and falls, stops again, gyrates, and seems to shake. A noise like that of an airplane engine is heard until the moment when it also stops. Seen through binoculars, the object has a dark mass in the center with light rays of unequal length coming out of it alternately. It goes through its maneuvers for 15 minutes then shoots back over the northern horizon. (ClearIntent, p. 134)

1954, June 21 — 1:00 a.m. Near Ridgeway, Ontario, Guy and Valeria Baker see a hovering, domed disc about 40 feet in diameter with several rotating, flashing lights around the rim. They drive to get a closer look. The object crosses the road in front of them and lands in a field. The car stalls, and they watch as the lights move around the area. They find a large, brown, circular spot in the pasture where the disc has been resting. (Schopick, pp. 6–7; Valeria Baker, [Letter], *Canadian UFO Report* 4, no. 3 (Spring 1977): 22; Mark Rodeghier, *UFO Reports Involving Vehicle Interference*, CUFOS, 1981, p. 2; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 June–August, Supplemental Notes*, The Author, 2002, pp. 12–13; Clark III 377; Clark IV 421)

1954, June 22 — 8:14 p.m. An unidentified radar blip located over central Vancouver Island, British Columbia, responds to coded IFF Mode 1 signals from the Naselle Air Force Station radar site [now Fort Stevens Historic Site] in southwestern Washington State, and instantly transmits back the correct coded responses. The blip is tracked on 3 ground radars at both Naselle and McChord AFB [now Joint Base Lewis-McChord] in Tacoma. The UFO splits into two (or consists of two objects in close formation), separates, and outmaneuvers one of two F-86D jet interceptors, both of which also radar-tracked the UFOs. Possible visual sightings of the radar target are called in to sheriff's offices and news media. The case is forwarded to Project Blue Book, but it does not appear in its files. (NICAP, "Coded IFF Signal from UFO"; Sparks, p. 215)

1954, June 23 — 8:00 or 9:00 p.m. Pilot Capt. Harry Roe Jr., flying an Ohio Air National Guard F-51 Mustang fighter at 240 mph from Dayton to Columbus, Ohio, sees a round white object with no exhaust trailing him in the same

position a little above and behind at close range, possibly detected on airborne radar. Roe maneuvers to try to lose it or collide with it, but the UFO remains in relatively the same position until it departs to the southeast. S/Sgt Maynard Harris at Wright-Patterson AFB picks up the plane and the UFO on radar. He scrambles two F-86s in the Columbus area to check it out, but they see nothing. At 10:00 p.m., Maj. Frank J. Gshwandtner and 2nd Lt. Robert P. Lommori, flying in the Columbus area in an RB-47E aircraft, observe a white object the size of a baseball at 25,000 feet. The object is extremely fast and makes a gradual turn to begin a slight climb. It then flies out of sight. The duration is 30 seconds. (NICAP, "F-51 Trailed by Object / Lt. Roe Sighting"; NICAP, "Something Follows C-47 and Observed by RB-47 Crew"; Sparks, p. 216; Keyhoe, *FS Conspiracy*, pp. 167–168)

1954, Late June — Some 300 people in West Berlin, Germany, see three silvery UFOs on several occasions. Moving in a zigzag motion and accelerating at high speed. Rudolf Hermes, a director at Tempelhof Airport [now closed], says the witnesses describe the objects as "shiny." ("Triangle Saucers Reported Seen near Berlin," *Lancaster (Pa.) Sunday News*, July 4, 1954, p. 19)

1954, Late June — Contactee Dorothy Martin meets with Charles and Lillian Laughead at their home in East Lansing, Michigan. Convinced of their mutual mission, the three begin receiving psychic messages revealing that spaceships will begin picking up enlightened earthlings, hinting that this is to save them from an impending nuclear holocaust, although this later shifts to a geological disaster. Both alone and with the Laugheads, Martin is directed to meet physical space people at various spots. (Clark III 718; Clark IV 786)

1954, June 26 — Around 7:30 a.m. A metallic blob is seen high in the sky near Columbus, Ohio. According to a newspaper article, a crew of an airliner is asked to investigate; the crew circles under the object while the 60 passengers take a look. Zanesville Radio says at 5:55 a.m. a round, silvery object is detected on an azimuth of 80°. At 5:35 a.m., an Air Force charter flight, No. 46 AF 23-24 to Wilmington, Delaware, flying at 3,000 feet observes an object in the Zanesville, Ohio, area at approximately 18,000 to 20,000 feet. (NICAP, "Airliner Investigates Strange Object"; Keyhoe, *FS Conspiracy*, pp. 168–169)

1954, June 27 — The Obninsk Nuclear Power Plant, at the Institute of Physics and Power Engineering in Obninsk, Kaluga Oblast, Russia, becomes the first grid-connected nuclear power plant in the world. The plan achieves criticality on May 6 and now is set up to provide electrical power to Moscow. (Wikipedia, "Obninsk Nuclear Power Plant")

1954, June 28 — Keyhoe replies to a letter from Ruppelt asking him for business advice after his retirement from the Air Force. Keyhoe advises: "If you didn't have to travel out of your area, you would make some money. They'd want about a 30-minute talk, for noonday clubs; 45 minutes to an hour for evening talks. My trouble was that I was scheduled for isolated talks involving expensive travel—to Milwaukee, Kansas City, Buffalo, etc. Considering the lost time, plus expenses, I figure I barely broke even; however, I did it at first in order to get more people talking about my book. I learned later that one good TV program, on a network, is worth twenty such lectures, probably worth a hundred of them." (Curt Collins, "Donald E. Keyhoe: From Saucers to Swamp Gas," The Saucers That Time Forgot, September 14, 2023)

1954, June 29 — 5:03 p.m. A BOAC Stratocruiser leaves New York City bound for London, England. 30 minutes later, Capt. James R. Howard receives directions from Boston Air Traffic Center to hold his position over the Rhode Island coast. Howard circles for 10–12 minutes, after which Boston tells him to detour over Cape Cod, Massachusetts. Around 11:30 p.m. while crossing at 19,000 feet near Sept-Îles, Quebec, Howard, his copilot Lee Boyd, and navigator H. McDonnell see a large cigar-shaped object and six smaller black ovals moving the same speed as his airliner, 265 mph, on a parallel course. The small objects are strung out in a line, changing relative positions but always at the same level. The large object slowly and continually changes shape, "in a way that a swarm of bees might alter its appearance." They appear opaque, hard-edged, gray in color, with no lights or flames visible. Goose Bay AFB [now CFB Goose Bay], Labrador, orders an F-94 to vector toward the location. Just as Howard is giving the pilot his position, the small objects disappear. McDonnell says they enter the large object. As the F-94 approaches, the large object dwindles in size and disappears. Howard lands at Goose Bay and is questioned by RCAF and USAF officials (McConnell says they take the flight logs); when he lands in London, the Air Ministry does the same, telling the pilots they viewed a solar eclipse (which took place at 7:00 a.m. on June 30). Howard later hears that there are UFO sightings in Massachusetts while he is in a holding pattern, and he contests in the December 11 issue of *Everybody's Magazine* that what he saw was solid, not a mirage. Gordon Thayer of the Colorado project identifies the objects as superior mirages, reflections of the "dark terrain below seen against the bright, 'silvery' sky to the left of the setting sun," a "phenomenon so rare that it apparently has never been reported before or since." James McDonald disagrees. In 2010, ufologist Martin Shough reexamines the case and concludes that the object might well have been an unusual mirage. (NICAP, "BOAC Stratocruiser Case"; Sparks, p. 216; "Flying Saucer, 6 Butter Chips Chase British Airliner near U.S.," *Long Beach (Calif.) Independent*, July 2, 1954, p. 8; James Howard, "We Were Shadowed from Outer Space," *Everybody's Weekly*,

December 11, 1954; John Carnell, "BOAC's Flying Jellyfish," *Fate* 7, no. 11 (November 1954): 16–23; Leonard Cramp, "Mystery over Labrador," *Flying Saucer Review* 1, no. 1 (Spring 1955): 6–8; UFOEv, p. 126; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 46; Condon, pp. 139–140; "Are They 'Projections'?," *Flying Saucer Review* 27, no. 3 (November 1981): 1–2; "A Record Put Straight," *Flying Saucer Review* 27, no. 6 (June 1982): 1–2; James Howard, "The BOAC Labrador Sighting of 1954," *Flying Saucer Review* 27, no. 6 (June 1982): 2–3; Good Above, pp. 189–191; Phillip Robertson, "Some Considerations on the Seven Isles, Quebec, Canada, Case of June 29, 1954," May 31, 1991; "Captain James Howard Reflects on His Sighting of 1954 (BOAC)," nutsandbolts ufo YouTube channel, March 7, 2009; Martin Shough, "Study of an Unusual Phenomenon Observed by BOAC Aircrew over Labrador, Newfoundland, June 29, 1954," September 2009; "BOAC Pilot Case of 7-2-1954 – Capt. James Howard," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; "BOAC Pilot Case of 7-2-1954 – Stewardess Daphne Webster," Ufology: A Primer in Audio, 1938–1959, November 21, 2013; Martin Shough, "The BOAC Labrador Sighting of June 29, 1954," Caelestia, October 31, 2018; Clark III 195; Kevin D. Randle, "Coast to Coast AM: The Labrador Sighting from 1954," A Different Perspective, March 31, 2023; Covert 54–55; Clark IV 230–231)

1954, June 30 — 2:17 p.m. Johnny Björnulf and Raun Conradi are aboard one of three Scandinavian Airlines planes flying above the Lifjell plateau, Telemark, Norway, to observe a total solar eclipse. Conradi takes some footage through a window on the north (port) side of one airplane. When developed it shows two small light sources that are fairly obvious window reflections, but media coverage causes much confusion about the circumstances under which the film is shot. ("Pictures of Solar Eclipse Shows Saucer-Like Objects," *Hanford (Calif.) Sentinel*, July 7, 1954, p. 1; E. Graham, "Scandinavian Eclipse Expedition Films U.F.O.s," *Flying Saucer Review* 2, no. 1 (Jan./Feb. 1956): 6–7; UFOEv, p. 5; Clas Svahn, "The Björnulf Solar Eclipse Film," Clas Svahns Blogg, October 6, 2006)

1954, June 30 — 6:50 p.m. Four civilians and several military personnel at Brookley AFB [now Mobile Aeroplex at Brookley] in Mobile, Alabama, see a brilliant silver or white object with short stubby wings approach from the south, circle over Mobile, then depart to the northeast. A radar contact at 6:30 p.m. with a stationary object is evidently unrelated anomalous propagation. (NICAP, "Object with Short Stubby Wings Tracked on Radar"; Sparks, p. 216)

1954, Summer — George Hunt Williamson spends a few months in Noblesville, Indiana, working at Soulcraft Publications, run by mystic and fascist William Dudley Pelley. Mostly he contributes UFO news for the magazine, but some of Pelley's antisemitic attitudes creep into Williamson's later writings. (Zirger and Martinelli, *The Incredible Life of George Hunt Williamson*, Verdechiari, 2016, pp. 100–103; Clark III 1285; Jason Daley, "The Screenwriting Mystic Who Wanted to Be the American Führer," *Smithsonian Magazine*, October 3, 2018; Clark IV 1468)

1954, Summer — Late night. A young girl in Arbutus, Maryland, wakes up when a bright light shines into her bedroom window. Looking outside, she sees a triangle of brilliant white lights parallel to the ground, illuminating everything, hanging in the air, and pointing directly at her. All of a sudden they are gone. Fort the next two days, she has a fever that forces her to stay home from school. (Michael D. Swords, "Timmerman's Triangles," *IUR* 29, no. 2 (Summer 2004): 17)

1954, Summer (or Summer 1955) — Evening. Dianne Vezza and two other teen girls are sitting in a backyard in Marietta, Ohio, when they see a star-like light moving at great speed. Suddenly it comes to a dead stop and two other stars speed in and come to an abrupt stop. The three objects form a perfect triangle. An oval object then becomes visible as the starlike objects disappear. Two other oval objects take up the same triangular position with the first. They then begin a light display with wildly colored lights that continues for a few seconds. The lights go out, and each of the objects beams a bright white light to the center of the triangle. The beams meet in the center for a few seconds and then go out. The oval objects disappear and the starlike lights return, but they soon speed off in different directions faster than a jet. The display is completely soundless. (Michael D. Swords, "Another Type of UFO Display," *IUR* 30, no. 2 (January 2006): 11)

1954, July — A saucer-buff zine titled *Nexus* is first published by James W. Moseley in New Jersey. Although he states that "flying saucers exist and are probably interplanetary," he makes it clear that the newsletter will be "poking fun at our fellow saucer-enthusiasts." ("Greetings Fellow Saucer Fiends!" *Nexus* 1, no. 1 (July 1954): 1; Clark III 775, 1032; Curt Collins, "Saucer News Archives: The Historic UFO Magazine by Jim Moseley," The Saucers That Time Forgot, September 28, 2023; Clark IV 856, 1147)

1954, July 2 — 11:05 a.m. An F-94C Starfire takes off from Griffiss AFB [now Griffiss Business and Technology Park] in Rome, New York, on an operational training mission. It is only a few miles out when the Griffiss control tower

orders the plane diverted to intercept an unidentified aircraft. When Pilot Lt. William E. Atkins cannot find the aircraft, the controller tells him about a second unidentified aircraft, which Atkins identifies as an Air Force C-47. The control tower vectors him back to the first target. Atkins cannot see any aircraft above the cloud cover, so he descends below the clouds. During the descent, a furnace-like heat fills the cockpit and the engine plenum chamber fire warning light goes on. Atkins shuts the engine off, but the light remains on. Atkins and his radar man, Henry F. Coudon [or Condon], eject, landing without injury. At 11:27 a.m., the plane crashes into the town of Walesville, west of Utica, striking a building and an auto, killing 4 people, and injuring 5 others. Atkins tells reporters about the heat but clams up under Air Force pressure. The official investigation confirms the fire was caused by a malfunction of the fire detector circuit. There is no evidence of an in-flight fire. Kevin Randle suspects a balloon is responsible for one of the radar targets, because an apparent balloon is sighted later, from 6:00 to 10:00 p.m., in a 25-square-mile area from Rome to Frankfort, New York. (NICAP, "The Walesville Incident / F-94 Crash"; "'Balloon' Excites Utica," *New York Times*, July 3, 1954, p. 13; "Abandoned Jet Kills 3 in Car, 1 in House," *New York Times*, July 3, 1954, pp. 1, 6; "Jet Plane Crashes in Flames, Kills 3 in Auto, One in House," *Syracuse (N.Y.) Post-Standard*, July 3, 1954, pp. 1, 3; Keyhoe, *FS Conspiracy*, pp. 174–177; Condon, p. 161; Keyhoe, *Aliens from Space*, Signet ed., 1974, pp. 22–23; Kevin D. Randle, "Walesville Revisited," *IUR* 25, no. 3 (Fall 2000): 3–5; Frank J. Reid, "Keyhoe's Context," *IUR* 25, no. 3 (Fall 2000): 6–7, 28–29; Kevin D. Randle, "Walesville UFO Jet Chase," A Different Perspective, March 28, 2009)

1954, July 3 — Nine green spheres hover, speed away at 2,600 mph, and are tracked on radar at 24,000 feet 20 miles north of Albuquerque, New Mexico. (UFOEv, p. 85)

1954, July 3 — 8:15 a.m. The captain, officers, and 463 passengers of a Dutch ocean liner watch a "greenish-colored, saucer-shaped object about half the size of a full moon" speed across the sky and disappear in clouds. (Ruppelt, p. 237) [same as July 29 entry?]

1954, July 8 — 9:25 p.m. Amateur astronomer Harold Hill is at his observatory in Orrell, Greater Manchester, England, when he sees a bright star in the southern sky that he at first thinks is a supernova. Soon it resolves itself into a bright, metallic globe with a cluster of 15–20 smaller, dimmer objects moving around. Clouds intervene and when they clear, he sees two bright objects, gyrating and flashing and moving slowly around each other. The objects are at a great altitude, because even through binoculars they have "shown no sensible size." The total time of the observation is 25 minutes, after which clouds obscure the objects from view. ("Strange Sight Seen over…Wigan," *Flying Saucer News*, no. 6 (Summer 1954): 7; "An Unusual Sky Phenomenon," *Strolling Astronomer* 9 (1955): 48; "Through the Telescope: Lights on the Moon," *CRIFO Orbit* 2, no. 9 (December 2, 1955): 2–3; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: January 1, 1947–December 31, 1959*, The Author, 2003, pp. 80–81)

1954, July 9 — *Die Weltwoche* in Zürich, Switzerland, publishes two letters by psychologist Carl Jung, who says he has been interested in UFOs since 1946, but he has difficulty comprehending what they might be, since they seem to have both subjective and objective properties. ("Dr. Carl Jung on Unidentified Flying Objects," *Flying Saucer Review* 1, no. 2 (May/June 1955): 17–18; Clark III 636–637; Clark IV 700–701)

1954, July 11 — UK Air Chief Marshal Hugh Dowding states in an article in the London *Sunday Telegraph* that "I am convinced that these objects do exist and that they are not manufactured by any nation on earth. I can therefore see no alternative to accepting the theory that they come from some extraterrestrial source." ("I Believe In Flying Saucers," London *Sunday Dispatch*, July 11, 1954, p. 6; UFOEv, p. 122; Good Above, pp. 47–48)

1954, July 14 — A fake memo, supposedly written by or for Robert Cutler, special assistant to President Eisenhower, to Gen. Nathan Twining, indicates that an MJ-12 briefing should take place at the White House July 16. Cutler is in Europe at the time of the memo, although the memo could have been prepared by NSC Executive Secretary James S. Lay Jr. or his associate, J. Patrick Coyne. (Robert Cutler, "Memorandum for General Twining: NSC/MJ-12 Special Studies Project," July 14, 1954; Northern Ontario UFO Research and Study, "Majestic-12"; Stanton T. Friedman, "MJ-12: The Evidence So Far," *IUR* 12, no. 5 (Sept./Oct. 1987): 14–18; Stanton T. Friedman, *Top Secret / MAJIC*, Marlowe, 1996, pp. 86–102; "Majestic-12 or 'MJ-12' Reference Report," US National Archives, September 29, 2020)

1954, July 20 — Two men are chased in their car by a UFO near Oslo, Norway, and stop to observe it. Afterward, one of the witnesses' watches stops working and the car's paint changes color. (Vallée, *Magonia*, p. 207)

1954, July 20–21 — Ruppelt visits the Project Blue Book office at Wright-Patterson AFB in Ohio to gather information for his upcoming book. He is told that all UFO publicity is handled by a lieutenant colonel in Air Force intelligence. He writes in an August 3 letter to Keyhoe: "They claim to have gotten the unknowns down to about 10% but from what I saw this was just due to a more skeptical attitude. The reports are just as good as the ones we got and their analysis procedures are a hell of a lot worse." (Donald E. Keyhoe, "The Captain Ruppelt Letters," *UFO Investigator* 2, no. 2 (October 1961): 6; Clark III 1023; Clark IV 1137)

1954, July 23 —The US Navy issues a new directive that orders the immediate reporting of UFO sightings (FLYOBRPTs) to the director of AFOSI, ATIC, commanding officer of Eastern ADC, director of Naval Intelligence, commanding officer of the Eastern Sea Frontier, and the commandant of the Potomac River Naval Command. The directive cites JANAP 146, AFR 200-2, OPNAV 3820, and Directive 3820.2 and is intended to plug leaks coming from navy and marine personnel. It is unpublicized but unclassified, so it threatens disclosure of AFR 200-2, which is still classified. USAF begins work on a new version of AFR 200-2 without the "restricted" label. (Keyhoe, *FS Conspiracy*, pp. 188–189, 309–311)

1954, July 24–25 — A security officer at the Naval Bureau of Aeronautics develops a personal interest in the Frances Swan contact case and accepts Rear Adm. Knowles's invitation to Eliot, Maine, to visit with Swan. On his return, he gives the FBI a report on his visit. On July 29 an FBI agent interviews him, and on August 9 J. Edgar Hoover sends an account of the interview to Rear Adm. Carl F. Espe and to the Army's Assistant Chief of Staff, G-2. Hoover writes, "No further action is being taken in this matter by this Bureau." (Randall Fitzgerald, "Messages: The Case History of a Contactee," *Second Look* 1, no. 12 (October 1979): 12–18, 28–29; Clark III 1118; Clark IV 1244)

1954, July 25 — Policeman J. H. Flanagan and friends see 6 UFOs over Enkeldoorn [now Chivhu], Zimbabwe. Nearly stationary, they are visible for about 20 minutes and disappear when night falls. (ClearIntent, p. 134)

1954, July 28 — Wilbert B. Smith, at the invitation of retired Navy Rear Adm. Herbert B. Knowles, visits contactee Frances Swan in Eliot, Maine, his neighbor. Her two space friends, Affa and Alomar, direct Swan's hand to draw a series of circles demonstrating the use of magnetic fields in spacecraft propulsion. Smith asks the aliens to communicate by radio at an appointed time a few days later, but the message does not come through. Nevertheless, Smith attempts to decipher the alien charts in hopes of learning how to build a saucer for Canada. (Randall Fitzgerald, "Messages: The Case History of a Contactee," *Second Look* 1, no. 12 (October 1979): 12–18, 28–29; Clark III 1079–1080; Clark IV 1195–1196)

1954, July 28 — 8:00 p.m. Capt. Jan P. Boshoff and five officers of the Dutch ocean liner SS *Groote Beer* see a moon-like object rising out of the Atlantic Ocean 90 miles east of Cape Cod, Massachusetts. They watch it through a sextant, allowing them to estimate its rate of ascent at a half degree in 2 minutes, and a distance of 2.5 miles away from the ship. After 10 minutes it disappears behind some low clouds. ("Airliner [sic] Reports Flying Saucer 80 Miles off N.Y.," *New Rochelle (N.Y.) Standard-Star*, July 30, 1954, p. 18; "Kapitein van 'Grote Beer' zag vliegende schotel," *De Arubaanse Courant* (Aruba), August 16, 1954, p. 2; Jared Hamilton, "Saucers over Italy," *Fate* 8, no. 3 (March 1955): 14, 18; Loren E. Gross, *UFOs, a History: 1954, June–August*, The Author, 1990, p. 60; Remseey2907, "In 1954 Captain, Crew and Passengers," Reddit r/UFOs, 2020; Dolan, USO1, 170–171)

1954, July 31 — 12:40 a.m. The Atomic Energy Commission's National Reactor Testing Station near Idaho Falls, Idaho, is suddenly lit up by a blinding glow that explodes in the night sky. Kelly Brooks and A. L. Taylor say the source of the light remains motionless for a few seconds, then shoots upwards at a tremendous speed. ("AEC Workers Again See Strange Lights," Idaho Falls *Post Register*, August 2, 1954, pp. 1, 9; "Idaho AEC Workers Sight Mysterious Light in Sky," Nampa *Idaho Free Press*, August 3, 1954, p. 10; Keyhoe, *FS Conspiracy*, p. 168)

1954, August — 10:30 p.m. An astronomer sees a bright white disc, 20 times the apparent size of the moon, moving from west to northeast at a high rate of speed over Park Hills, Kentucky. The seemingly solid object is about 100 feet in diameter and flying at an altitude of 500 feet. It disappears abruptly after 3–4 seconds. ("Astronomers and UFO's: A Survey, Part 2, Sightings," *IUR* 2, no. 4 (April 1977): 3)

1954, August 1 — 11:15 p.m. Desmond O'Reilly and others at Templeogue Tennis Club in Dublin, Ireland, watch an object fly over the Dublin Mountains in the direction of Howth. Initially he thinks he is looking at a meteor because he can only see it when it passes by gaps in the clouds. He watches it split into two pieces. (*Irish Times*, August 5, 1954; Shane Cochrane, "Ireland vs. the Flying Saucers," *Fortean Times* 317 (September 2014): 54)

1954, August 1 — 11:30 p.m. P. D. McCormack sees a bluish-white object flying at 1,000 mph at an altitude of 5,000 feet above the Dublin Mountains, Ireland, to the south. The trails seem to "fall away from the object at each side." Two men fishing in the River Dargle near Powerscourt, County Wicklow, see a rocket-shaped object dropping balls of fire. At 11:35 p.m., on the North Beach in Rush, County Dublin, Mrs. W. Gray and others watch an object "like a bright electric bulb" fly overhead from the mountains and out to sea. Possible meteor. (*Irish Times*, August 3, 5, 1954; Shane Cochrane, "Ireland vs. the Flying Saucers," *Fortean Times* 317 (September 2014): 54)

1954, August 2 — The US Joint Chiefs of Staff direct the establishment of a Continental Air Defense Command. Secretary of Defense Charles Erwin Wilson announces the command's formation publicly later in the month to integrate "the air defense capabilities of the three military departments into an air defense system responsible to the control of one military commander." (Wikipedia, "Continental Air Defense Command")

1954, August 4 — 11:00 p.m.–12:00 midnight. Ten firemen and their chief observe two flying saucers over The Hague, Netherlands. The objects are seen in the clear night air at a high altitude. They move at incredible speed, at times remaining motionless for as long as 30 seconds. They are described as flat ovals with whitish-gray light. All agree that the objects are neither aircraft or balloons. (ClearIntent, p. 134)

1954, August 6 — A bright white ball shoots across the sky over Santa Fe, New Mexico, leaving a luminous trail that persists for 15 minutes. Meteorite expert Lincoln LaPaz says it is not a meteor. It apparently disrupts TV signals and aircraft transmissions, but not ham radio. (Wilkins, *FS Uncensored,* Citadel, 1955, p. 226)

1954, August 7–8 — One of the first UFO meetings in California is held on the slopes of Palomar Mountain, with lectures by George Adamski, Daniel Fry, Truman Bethurum, and Desmond Leslie. ("Palomar Mountain, 1940–1960: From Obscurity to World Fame," The Adamski Case, September 22, 2019)

1954, August 9 — 3:01 p.m. Project Magnet's only UFO incident of note occurs when the Shirley's Bay, Ontario, gravimeter indicates a greater deflection in the gravitational field than a conventional object would cause. Heavy clouds obstruct Wilbert B. Smith's view of the sky. ("Wilbert B. Smith," Northern Ontario UFO Research and Study; Stuart Nixon, "W. B. Smith: The Man behind Project Magnet," *UFO Quarterly Review* 1, no. 1 (Jan./Mar. 1973): 2–17; Good Above, p. 186; Clark III 1079; Clark IV 1195)

1954, August 10 — The Canadian Department of Transport officially folds Project Magnet but permits Wilbert B. Smith to continue using its facility on his own time at no expense to the government. Smith continues his work privately until his death in December 1962. (Story, p. 276)

1954, August 11 — Frank Edwards is fired by his sponsor at the Mutual Broadcasting Network, the American Federation of Labor. He had offered to resign on August 7, citing a conflict over the type of material he has been required to report on, including AFL interests and George Meany's personal outlook. His UFO reportage may or may not be an issue. (Frank Edwards, "The Plot to Silence Me," *Fate* 10, no. 6 (June 1957): 17–23; Clark III 435; Clark IV 480)

1954, August 11 — 8:54 p.m. A1C Chase E. Lewis, tower operator at Lawson AFB [now Lawson Army Airfield] in Fort Benning, Columbus, Georgia, sees a strange stationary object in the west. It varies in brightness, changing color from white to red to orange to white again, with seemingly high-speed motions. An Army helicopter piloted by WO R. T. Wade is sent to investigate; he locates the object 20 miles west of Lawson at 2,000 feet. Wade abandons the chase due to low fuel after 2 minutes. At 9:05 p.m., two additional tower operators (including A1C William N. Watson) view the object. A second Army helicopter, piloted by U. S. Tarma, is diverted to the object at 9:27 p.m. He sees it, but it disappears at 9:29 p.m. (NICAP, "Two Helicopters Encounter Venus (CIRVIS)"; Sparks, p. 219; Good Above, pp. 284–285; Loren E. Gross, *UFOs, a History: 1954, June–August*, The Author, 1990, pp. 77–80)

1954, August 11 — 8:55 p.m. P. L. Percharde, electrical engineer and assistant manager of the Moeller Shipwrecker Company, of Okinawa, sees a line of blue lights underneath a blue circle with a black center fly over the *SS Docteur Angier* off Yoron-Jima, Japan, and climb, illuminating and agitating the clouds. (Sparks, p. 219; Patrick Gross, "Disk Seen from SS Docteur Angier, August 11, 1954")

1954, August 12 — 2:29 a.m. Four military men on US Army helicopters at Maxwell AFB in Montgomery, Alabama, see a glowing red disc soar around the base tower. There are both ground and air witnesses, as well as radar-visual confirmation. (Good Above, pp. 284–285, 493–494)

1954, August 12 — An updated version of AFR 200-2 is issued by the Department of the Air Force and declassified by Air Force Chief of Staff Nathan Twining. The public can now know that the 4602nd Air Intelligence Service Squadron was brought in to assist ATIC (Blue Book) with preliminary and field UFO investigations, and that USAF considers UFOs to be "any airborne object which by performance, aerodynamic characteristics, or unusual features, does not conform to any presently known aircraft or missile type, or which cannot be positively identified as a familiar object." It lists the objectives of UFO reporting as: "First as a possible threat to the security of the United States and its forces, and secondly, to determine technical aspects involved." (Department of the Air Force, "Unidentified Flying Objects Reporting," Air Force Regulation 200-2, August 12, 1954; Good Above, pp. 489–492; Clark III 921; Clark IV 1031)

1954, August 16 — 5:00 p.m. A green ball is seen in the sky over Tananarive [now Antananarivo], Madagascar, and disappears behind a hill. It reappears a minute later and flies over the higher part of Tananarive. When the object flies in front of them, some witnesses see a lentil-shaped device with a silvery metallic aspect enveloped in electric luminous gas. According to Jean-Luc Bruneau, inspector general at the Commissariat à l'Energie Atomique, Gen. Charles de Gaulle is concerned about this sighting and quietly approves having a French study group involved with investigating UFO cases. (Gildas Bourdais, "From GEPAN to SEPRA: Official UFO Studies in France," *IUR* 25, no. 4 (Winter 2000–2001): 11; "1954, Tananarive, Madagascar: Multiple Witnesses to UFOs," UFO Casebook, July 30, 2008; Patrick Gross, "Tananarive, Madagascar, August 1954"; "Madagascar

Multiple Witness CE-II of 8-16-1954 – Edmond Carpraunac," Ufology: A Primer in Audio, 1938–1959, November 21, 2013)

1954, August 20 — Morning. Edith Jacobsen, 24, and Åsta Solvang, 32, are on a blueberry-picking trip to Øyfjellet, near Mosjøen, Norway, with their uncle, Halvdan Jacobsen. The two sisters wander off to a fen when suddenly they see a man in the distance. They approach him and he smiles and stretches out his hand, but he only brushes Edith's palm with it. He has long hair with a natural wave, a dark complexion, and a tight-fitting suit with a wide belt. He begins to talk but they can't understand him. It does not sound like Norwegian, English, German, Spanish, French, or Russian. He takes out a "little mirror" from a pocket and with something like a pencil draws circles, apparently representing planets. He finally indicates he wants the women to accompany him and he takes them to a landed disc in a clearing. It is gray-blue and looks like two giant pot lids put together. He makes a sign to not come too close, then he opens a hatch on the top, crawls in, and shuts the door. The sisters hear a faint humming and the UFO rises while rotating on its own axis. ("Flyvende tallarken med en mann landet ved Mosjøen!" *Harstad Tidende,* August 25, 1954, p. 1; "Spaceman Lands in Norway?" *Flying Saucer Review* 1, no. 4 (Sept./Oct. 1955): 6–7; Gordon Creighton, "Mosjøen: An Early Norwegian CE-III Case," *Flying Saucer Review* 34, no. 2 (June 1989): 1–7; Clark III 267–268; Clark IV 308)

1954, August 23 — 1:00 a.m. Businessman Bernard Miserey has just parked his car in a garage at Vernon, Eure, France, when he notices a sudden illumination. He sees an object like an enormous (300 feet long) cigar standing on end, hovering above the north bank of the Seine River about 1,000 feet away. Suddenly from the bottom of the object comes a horizontal disc that drops, slows, and suddenly dives horizontally across the river at him. It vanishes at a high rate of speed toward the southwest. Three other discs follow in sequence. A fifth disc drops much lower than the earlier ones and remains still for an instant, swaying slightly. During this time the cigar has faded and sinks into darkness. The spectacle has lasted 45 minutes. Two police officers and an Army engineer also see the display. (Sparks, pp. 85–86; Loren E. Gross, *UFOs, a History: 1954, June–August*, The Author, 1990, pp. 77–80; Herbert S. Taylor, "Satellite Objects and Cloud Cigars," *IUR* 29, no. 1 (Spring 2004): 4–5; Patrick Gross, "The 1954 French Flap," February 2, 2007; Clark III 293; Clark IV 333)

1954, August 26 — 9:35 p.m. Crowds of people in Bray, County Wicklow, Ireland. see an object traveling at great speed over Bray Head. It is a brilliant blue light, traveling at "2,000 miles an hour" toward the sea before changing direction and moving toward Wicklow. (*Irish Times,* August 27, 1954; Shane Cochrane, "Ireland vs. the Flying Saucers," *Fortean Times* 317 (September 2014): 54)

1954, August 28 — 8:30 p.m. Several USAF fighter pilots pursue a triangular formation of 15 objects near Tinker AFB, Oklahoma City, tracked by ground radar. As the jets approach, the formation breaks, changes to a semicircle, and the objects speed up and vanish to the west. (NICAP, "USAF Fighters Report Formation Tracked by Radar"; Sparks, p. 220; Keyhoe, *FS Conspiracy*, pp. 25–26)

1954, August 29 — A witness in Mérida, Venezuela, sees a large, intensely yellow, glowing object moving at great speed from west to east. When it reaches the Sierra Nevada de Mérida, it suddenly stops and two disc-shaped blue objects emerge from it. All three continue to the east and disappear behind buildings. (Lorenzen, *UFOs: The Whole Story,* Signet, 1969, p. 58)

1954, August 29 — 11:05 p.m. First Officer H. G. Gardner and Engineer J. V. D. Whitisy, flying on a Royal Dutch Airlines DC-4, see 3–4 dark, lens-shaped objects over Prins Christianssund radio and weather station, Greenland. They veer north and change position in formation. (NICAP, "Lens-Shaped Objects Veer North"; Sparks, p. 220)

1954, August 30 — The Atomic Energy Act goes into effect, covering the development, regulation, and disposal of nuclear materials and facilities in the US. It makes it possible for the government to allow private companies to gain technical information about nuclear energy production and the production of fissile materials. (Wikipedia, "Atomic Energy Act of 1954"; Dustin Slaughter, "UAP Disclosure Act Challenges Department of Energy Secrecy," The UAP Register, September 18, 2023)

1954, August 30 — Contactee Dorothy Martin of Oak Park, Illinois, and Charles and Lilian Laughead of Michigan send out a 7-page press release announcing that a geological disaster will cause great environmental changes in North America and Europe. It warns that December 20 will be the last available date for evacuation, as a great flood will strike on December 21. Martin and her followers hope to board a landed flying saucer before doom falls. ("The End of the World," *The Saucerian* 3, no. 2 (Spring 1955): 4–7, 55–60; Leon Festinger, Henry Riecken, and Stanley Schachter, *When Prophecy Fails*, University of Minnesota, 1956; Wikipedia, "*When Prophecy Fails*"; Julie Beck, "The Christmas the Aliens Didn't Come," *The Atlantic,* December 18, 2015; Clark III 718; Clark IV 786)

1954, August 31— 7:10 p.m. RAN Lieutenant J. A. "Shamus" O'Farrell is returning to HMAS *Albatross* Naval Air Station near Nowra, New South Wales, after a night cross-country in a Hawker Sea Fury aircraft. After contacting Nowra, O'Farrell sees a very bright light closing fast at one o'clock. It crosses in front of his aircraft, taking up

position on his port beam, where it appears to orbit. A second and similar light is observed at nine o'clock. It passes about a mile in front of the Sea Fury and then turns in the position where the first light was observed. According to O'Farrell, the apparent crossing speeds of the lights are the fastest he has ever encountered. He has been flying at 250 mph. O'Farrell contacts *Albatross,* which in turn confirms that it has two radar "paints" in company with him. Radar operator Petty Officer Keith Jessop confirms the presence of 2 objects near the Sea Fury on the GCI remote display. The two lights reform at nine o'clock and then disappear on a northeasterly heading. O'Farrell can only make out "a vague shape with the white light situated centrally on top." The Directorate of Naval Intelligence at the time writes that O'Farrell is "an entirely credible witness" and that he "was visibly shaken by his experience but remains adamant that he saw these objects." News of the incident leaks out in December, but the official RAN file remains classified until 1982. (NICAP, "'Sea Fury' Encounter"; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects,* Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 70; Good Above, p. 162; Bill Chalker, "The Australian Government and UFOs," *IUR* 22, no. 3 (Fall 1997): 18–19; "The Sea Fury Incident," Australian Disclosure Project, April 30, 2006; Swords 379–380; An Adelaide UFO Researcher, "The 'Sea Fury' Radar Incident Revisited," 2017)

1954, August 31 — Deputy Department of Transport Minister John Baldwin closes the Shirley's Bay, Ontario, UFO station to save money, although he says Smith can work on his own time. ("Saucer Station Closes," *The Saucerian,* no. 6 (Spring 1955): 12; Stuart Nixon, "W. B. Smith: The Man behind Project Magnet," *UFO Quarterly Review* 1, no. 1 (Jan./Mar. 1973): 2–17; Clark III 1079; Clark IV 1195)

1954, September 1 —The Continental Air Defense Command is established, primarily to defend the continental United States against air attack. It is also tasked to support US commanders in the Pacific, Atlantic, Caribbean, Alaska, Northeast, and of Strategic Air Command in their missions to the maximum extent consistent with its primary mission. ADC's commander, Gen. Benjamin W. Chidlaw, becomes the first CINCONAD, and USAF is designated as the executive agency. (Wikipedia, "Continental Air Defense Command")

1954, September 2 — Dusk. John Jacob Swaim, 12, is working on a tractor at his family's farm in Coldwater, Kansas, when he sees a small man about 3 feet tall with long, pointed ears and a pointed nose standing in a crouched position about 20 feet away. It is dressed in a shiny garment and has two cylinders strapped on its back. The being floats to a nearby UFO hovering 5 feet from the ground. The next day his father and Sheriff Floyd Hadley find pear-shaped footprints, wide at the toes and tapering to a narrow heel. ("'Pint-Sized Man with Pointed Ears Flees in Saucer' As Boy Approaches," *Wichita (Kan.) Beacon,* September 8, 1954, pp. 1A, 1C; "Lad Spots Weird Little Man Who Takes Off in a 'Cucumber Ship,'" *Hutchinson (Kan.) News,* September 15, 1954; "Footprints Found at 'Saucer' Scene," *Lincoln (Nebr.) Star,* September 24, 1954, p. 8; "Little Man in Kansas Wheat Field," *The Saucerian,* no. 6 (Spring 1955): 12–13; Clark III 270–271; Curt Collins, "A Flying Cucumber Comes to Kansas, Sept. 1954," The Saucers That Time Forgot, February 23, 2018; Clark IV 311)

1954, September 3 — 4:30 p.m. USAF Maj. Robert J. Waste and the 9-man crew of his B-47 bomber are flying at 25,000 feet in the vicinity of Dallas, Texas, on their way to Barksdale AFB in Bossier City, Louisiana. Carswell AFB [now Naval Air Station Joint Reserve Base Fort Worth] in Texas directs them to be on the lookout for unusual objects. The crew discovers they are being paced by a missile-shaped object only 100 feet overhead that is slightly larger and longer than their own fuselage. It has two rows of oval-shaped portholes along the sides and an orange exhaust. The bottom of the object seems to be glowing. After pacing the B-47 a short time, it shoots ahead and zooms upward at incredible speed. Carswell tells them to pursue, but they can't keep up. The UFO then descends to within 300 feet of the bomber and begins circling it. The UFO stays with the plane, pacing it above and below, and performing figure-eights and other maneuvers for over an hour. Two other B-47s in the squadron are behind the lead bomber and also view the object. The UFO finally shoots upward and disappears again. Waste takes 32 frames of 35mm color film of the UFO with his personal camera, but his film and that of his copilot is confiscated during a 3-day debriefing at Barksdale. (Paul Cerny, "Close Encounter at 25,000 Feet: Government Coverup," *IUR* 8, no. 5 (Sept./Oct. 1983): 6–7; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 September, Supplemental Notes,* The Author, 2002, pp. 1–2)

1954, September 7 — 12:30 a.m. Robert Chovel and two others are driving home from the theater in Hirson, Aisne, France, when they see a luminous red-orange disc flying above the railroad tracks. It stops suddenly across the road, 900–1,200 feet from the ground. When the car reaches the bridge at Buire, the object shoots away at great speed. (ClearIntent, p. 134; Patrick Gross, "The 1954 French Flap," May 12, 2003)

1954, September 7 — 7:15 a.m. Two bricklayers, Emile Renard, 27, and Yves de Gillaboz, 23, see a bluish-gray object floating less than 2 feet above a beet field as they are bicycling between Harponville and Contay, Somme, France. It looks like an unfinished haystack "with a plate turned upside down on top of it." It has a diameter of 33 feet,

and they notice it has a kind of door. Some black smoke appears to be issuing from a pipe in its base, which is oscillating. The observation lasts more than 3 minutes. They walk toward the object, but when they are about 500 feet away it rises rapidly about 50 feet, slows down, then heads northwest, disappearing in the fog. (Aimé Michel, *Straight-Line*, p. 35; Patrick Gross, "The 1954 French Flap," March 20, 2003; Clark III 377; Clark IV 421)

1954, September 8 — 11:00 p.m. Thomas Farquhar sees a "large oval-shaped disc," crackling and hissing, fly over Derryhubbert, County Tyrone, Northern Ireland. He thinks it is about 3 feet wide and flying at a height of 2,000 feet. Daniel McWilliam and James Bingham, in Carrickfergus, County Antrim, see a rocket soar into the sky and explode silently. Mr. L. Hauser is on a boat leaving Belfast when he sees a rocket come up out of the sea and explode when it reaches about 15,000 feet. (*Belfast Telegraph*, September 9–11, 1954; Shane Cochrane, "Ireland vs. the Flying Saucers," *Fortean Times* 317 (September 2014): 54)

1954, September 9 — 2:20 a.m. Mr. K. M. Gibbons of Nelson, New Zealand, gets out of bed and sees through the window three discs hovering above a mudflat 3 miles away in a V-formation. They radiate a blue-white light from their edges. He grabs a camera with a telephoto lens and takes a photo. After 5 minutes, the discs begin to wobble, tip on edge, then shoot vertically out of sight. Other reports come from the area that morning. The photo shows a blurry oval with a small dark area on top. ("Foreign Sightings and New Zealand's First Genuine Photos of Saucers," *CRIFO Newsletter* 1, no. 8 (November 5, 1954): 5–6; Wilkins, *FS Uncensored*, Citadel, 1955, opp. p. 96; UFOEv, pp. 89, 92)

1954, September 10 — 8:30 p.m. Antoine Mazaud is walking home from his fields at Mourieras, north of Bugeat, Corrèze, France, when he is confronted by a helmeted being of average height who makes friendly gestures. It shakes hands with him and embraces him while uttering unintelligible words. Then it goes back into the brush, enters a cigar-shaped object about 13 feet long, which takes off to the northwest. A few minutes later, witnesses in Limoges report a disc-shaped, red object leaving a bluish trail. (Mark Cashman, "Behavioral Classification System for UFO Occupants," *IUR* 24, no. 1 (Spring 1999): 18; Patrick Gross, "The 1954 French Flap," June 21, 2005)

1954, September 10 — Around 10:30 p.m. 34-year-old metal worker Marius Dewilde comes out of his house at Quarouble, Nord, France, to see why his dog is barking. He hears hurried footsteps on his right and with his flashlight sees two creatures just beyond his fence walking in single file toward a dark object sitting on the railroad tracks. The creatures are about 3.5 feet tall with wide shoulders, short legs, and helmets covering large heads. No faces or arms are visible. When he tries to cut them off and gets within 6 feet, he finds himself paralyzed as a powerful orange beam of light is projected at him from a square opening in the dark object. The creatures continue toward the railroad tracks, a door closes, the dark object rises to 100 feet, hovers, and speeds away. Five imprints on three wooden railroad ties are found, made by an object that an engineer estimates must have weighed 30 tons. French police and the French Air Force investigate the case. (Wikipedia, "Marius Dewilde"; "2 Little Armless Men 'Visit' Frenchman in Flying Saucer," *Minneapolis (Minn.) Morning Tribune*, September 14, 1954, p. 9; "In France, Rumors Are Flying… Or Maybe They Are Saucers," *Washington (D,C,) Evening Star*, October 18, 1954, p. 4; "Martians over France," *Time*, October 25, 1954; "Astral Adventurers: Frenchmen Report Meetings with Unlikely Creatures," *Life*, November 1, 1954, p. 29; Gray Barker, "Europe Invaded by Little Men," *The Saucerian* 3, no. 1 (January 1955): 15–17; Aimé Michel, *Straight-Line*, pp. 44–46; Marc Thirouin, "Marius Dewilde n'a pas menti," *Ouranos*, no. 24 (1959): 11–13; Marc Thirouin, "Marius Dewilde n'a pas menti," *Ouranos*, no. 25 (1960): 20–25; Vallée, *Magonia*, pp. 17–18, 209; Jean F. Gilles, "The Bankruptcy of the French UFO Research Body, GEPAN," *Flying Saucer Review* 28, no. 5 (June 1983): 15–16; Loren E. Gross, *UFOs: A History, 1954 September*, 1991, pp. 18–20; Mark Cashman, "Behavioral Classification System for UFO Occupants," *IUR* 24, no. 1 (Spring 1999): 18; Patrick Gross, "The 1954 French Flap," July 22, 2004; James Miller, "Seeing the Future of Civilization in the Skies of Quarouble: UFO Encounters and the Problem of Empire in Postwar France," in Alexander C. T. Geppert, ed., *Imagining Outer Space: European Astroculture in the Twentieth Century*, Palgrave Macmillan, 2012, pp. 245–264; Clark III 268–269; "1954 MF #UFOB [CASE] Marius Dewilde Saw a UFO Land, Two Beings Walking Around," UFOB | Your UAP Library YouTube channel, September 15, 2022; "Marius Dewilde 10 septembre 1954," Dailymotion [Pathé video and Temps X show]; Covert 27; Eghigian, *After*, pp. 144–146; Clark IV 309)

1954, September 12 or 13 — Late afternoon. A witness is driving a van in the vicinity of Quarouble, Nord, France, when he sees a domed disc descending vertically into a small thicket about 160 feet off the road and land. He can see a kind of gallery around the dome where human-like beings are standing. He stops the car, gets out, and walks toward the object, but when he gets closer the object shines a green ray at him. The disc immediately ascends vertically, then moves gently away. His paralysis ceases. A rush of air shakes him at the time it takes off. (Marc Thirouin, "Marius Dewilde n'a pas menti," *Ouranos*, no. 25 (1960): 25; Patrick Gross, "The 1954 French Flap," March 23, 2006)

1954, September 14 — 5:00 p.m. Farm worker Georges Fortin, 34, and more than 200 other witnesses in Saint-Prouant, Vendée, France, watch a cigar or carrot-shaped UFO as it emerges from a cloud, tilts toward the ground, hovers, and then elevates its front end quickly into a vertical position. It emits vapor from its lower end. Next, a metallic disc-shaped object flies out, spins around the cigar, and then reenters the vertical object. (Aimé Michel, *Straight-Line*, pp. 23–26; Loren E. Gross, *UFOs, a History: 1954 September, Supplemental Notes*, The Author, 2002, pp. 9–10; Patrick Gross, "The 1954 French Flap," July 2, 2004; Herbert S. Taylor, "Satellite Objects and Cloud Cigars," *IUR* 29, no. 1 (Spring 2004): 5; Herbert S. Taylor, "Cloud Cigars: A Further Look," *IUR* 30, no. 3 (May 2006): 10–12; Martin Shough and Wim van Utrecht, "'Cloud Cigar' over Saint-Prouant, France," June 13, 2011; Clark III 293; Clark IV 333)

1954, September 14 — Night. Several people see a circular UFO over Helsinki, Finland. Flying at 2,600 feet, it gives off an intense light and leaves a trail of reddish smoke about 3 times its diameter. It is visible 7 seconds. (ClearIntent, p. 134)

1954, September 15 — Ijapada Chatterjee, the manager of the Kadori mica mine, and hundreds of others watch a disc descend to an altitude of 500 feet over three adjoining villages (Kadori, Barshi, and Mangalda) in the Manbhum district, West Bengal, India. It hovers, then soars upwards at terrific speed, creating a tremendous gust of wind. The UFO is over a mine that supplies beryllium for the US Atomic Energy Commission. ("800 Biharis See Flying Saucer," *Times of India* (Bombay), October 3, 1954; "India," *CRIFO Newsletter* 1, no. 10 (January 7, 1955): 3–4; UFOEv, p. 124; Olsen, sec. 3, p. 33; Project 1947, "UFO Reports, 1954")

1954, September 16 — 6:00 a.m. The radio transmitter for WMEV in Marion, Virginia, fails as a round, shiny object, 10–15 feet in diameter, flies over the tower toward the east. ("Flying Saucers Are Sighted in Virginia," *Lancaster (Pa.) Intelligencer-Journal*, September 17, 1954, p. 44; Schopick, p. 79)

1954, September 17 — Around 4:45 p.m. Hundreds of people see a UFO over Rome, Italy, making staccato thunder sounds as it hovers. It makes a brief dive, returns to position, then zooms straight up, leaving a stream of white smoke behind. Around 5:45 p.m., Lt. Bruno Giustiniani and other personnel at a military unit at Ciampino Airport in Rome see it as a "half cigar" moving at 179 mph at 3,500 feet. Blue Book receives a teletype about the object, saying it is in the shape of a jellyfish when stationary but in the shape of a cigar when in motion. At 6:49 p.m., radar at Pratica di Mare Air Base south of Rome picks up a target for 20–45 minutes, plotting a slow course along the coast. (Michael Chinigo, "'Flying Cigar' in Rome's Sky," *San Francisco (Calif.) Examiner*, September 19, 1954, p. 16; "Case File Review," *CRIFO* Newsletter 1, no. 7 (October 1, 1954): 7, 8; Loren E. Gross, *UFOs, a History: 1954 September*, The Author, 1994, pp. 24–27; 1Pinotti 54–58)

1954, September 17 — 7:15 p.m. A widow named Mellé sees a luminous, orange-yellow, cigar-shaped object near her villa in Gelles, Puy-de-Dôme, France. Her neighbors also see it and watch for 5 minutes. Possible contrail. (Patrick Gross, "The 1954 French Flap," April 11, 2006)

1954, September 18 — 8:15 p.m. A M. Güitta is driving along the coastal road in Casablanca, Morocco, when he sees a gray disc diving toward him in his rear-view mirror. He ducks instinctively and the object passes him on the left at ground level and at a terrific speed. It is followed by a strong gust of cold air that blows the car to the left. The object disappears in the distance ahead of him. (Aimé Michel, *Straight-Line*, pp. 60–61)

1954, September 18 — 8:30 p.m. A round glowing UFO is seen approaching then hovering above Danané, Ivory Coast, by many people: a Catholic priest named Fr. Myard, the local chief of police, a Dr. Mariani, a businessman named Sory Diallo, and a group of women. The object moves again at 9:05 p.m., changes from a circle to an ellipse, then flies away. (Aimé Michel, *Straight-Line*, p. 61; Loren E. Gross, *UFOs, a History: 1954 September*, The Author, 1994, pp. 28–29)

1954, September 18 — 8:40 p.m. A huge green fireball streaks across Colorado and New Mexico. It zooms above Santa Fe, New Mexico, giving off a blinding glare and takes 30 seconds to cross the sky, disturbing TV and radio signals. Lincoln LaPaz remarks that it does not seem to be an ordinary meteor. (Sparks, p. 220; Keyhoe, *FS Conspiracy*, pp. 198–199; Ruppelt, p. 47)

1954, September 19 — 10:00 p.m. Yves David, 28, is riding his moped on the D-1 road south of Cenon-sur-Vienne, France, when his headlight begins malfunctioning and he feels a prickling sensation like electricity. He sees a 9-foot-long UFO in the road ahead and a small man in a diving suit coming toward him. It touches David on the shoulder, mutters something incomprehensible, and returns to the object. The object emits a green light that temporarily stuns David before it takes off. (Aimé Michel, *Straight-Line*, pp. 58–59; Patrick Gross, "The 1954 French Flap," March 20, 2003; Clark III 269; Clark IV 309)

1954, Late September — Night. Neil Deane is in a sailboat somewhere off the Georgia coast when a disturbance in the water causes the boat to slow down, despite the sails being full. He starts up an auxiliary motor and backs away. The water calms down and he notices a "ghost ship" where the disturbance had been, about 300–400 feet away. He backs away again to avoid a collision, but the object rises into the air, revealing running lights and a glow, and

disappears in the direction of the coast. He notices patches of foam in the water where the object had been. (Neil Deane, as told to George Earley, "Encounter in the Gulf Stream," *Beyond Reality*, no. 18 (January 1976); Carl Feindt, "Report #104," waterufo.net; Dolan, USO1, 172–173)

1954, September 20 — 11:00 p.m. Elie Cisterne, a worker at La Chassagne farm near Ussel, Corrèze, France, is returning home on his tractor when he sees a luminous object coming toward him. He jumps off the tractor and lies down, fearful, as the object stops a short distance above the road and hovers silently for several minutes. Cisterne runs away when the UFO starts moving again, flying over his tractor and into the distance. (Patrick Gross, "The 1954 French Flap," December 29, 2005)

1954, September 21 — 9:45 p.m. A guard at the Santa Maria Airport in Vila so Porto, Azores, sees a 10 x 5-foot, light metallic blue, pecan-shaped object with a clear glass or plastic nose and door, poles or aerials on its nose. It hums or whines as it hovers, then lands vertically 50 feet away. A blond man, 5 feet 10 inches tall, appears, speaks in a strange language, pats the guard on the shoulder, gets in the object, hooks up his harness, pushes a button, takes off with the object's nose pointed up, then levels off and climbs vertically. (NICAP, "Blond Humanoid Reported by Airport Guard"; Sparks, p. 220)

1954, September 21 — Leonard Stringfield has a private talk for 26 minutes with Lt. Col. John O'Mara, USAF Deputy Commander for Intelligence, who tells him that flying saucers do exist—three types, actually: a craft from outer space, a secret US aircraft, and unexplained natural phenomena. (Leonard Stringfield, "Private Talk with Lt. Colonel John O'Mara, Deputy Commander, Intelligence, Confirms the Existence of 'Flying Saucers,'" *CRIFO Newsletter* 1, no. 7 (October 1, 1954): 1; Powell, *Keyhoe*, 143)

1954, September 22 — Shortly after 8:00 p.m. Mme. Gamundi is driving on the N7 north of Fontainebleau, France, when she notices a light in the sky. She stops and gets out and sees a huge luminous ball hanging motionless. It is reddish and surrounded by a luminous, moving smoke. Suddenly, another bright ball emerges from the bottom, falls, slows, turns, and disappears at high speed. At least 4 other objects emerge. When an aircraft from Orly Airport approaches, the ball rises at high speed and disappears. (Patrick Gross, "The 1954 French Flap," April 9, 2006)

1954, September 22 — 11:00 p.m. Jean Besse, a draftsman for a power company in Tulle, Corrèze, France, watches a UFO through binoculars. It changes color three times in a few seconds. Probably astronomical. (Patrick Gross, "The 1954 French Flap," March 23, 2006)

1954, September 23 — Afternoon. Several residents of Bayonne, Pyrénées-Atlantiques, France, see three mysterious objects high in the sky. One witness, policeman M. Corrions, says they are arranged in the shape of a triangle. Possible helicopters. (Patrick Gross, "The 1954 French Flap," April 20, 2006)

1954, September 23 — 9:00 p.m. Irene Vrignolles sees a "flying cigar" that lands slowly in a meadow behind a rectory in Lencouacq, Landes, France. (Patrick Gross, "The 1954 French Flap," December 16, 2005)

1954, September 24 — Hoaxed story of an alleged sighting by Cesar Cardoso at Castelo Branco, Portugal, who sees two entities in shining metal suits emerge from a landed UFO and pick up flowers, shrubs, and twigs. (Crosby S. Noyes, "In France, Rumors Are Flying … Or Maybe They Are Saucers," *Washington (D.C.) Evening Star*, October 18, 1954, p. 4; Wilkins, *FS Uncensored*, Citadel, 1955, p. 58; Loren E. Gross, *UFOs, a History: 1954 September*, The Author, 1994, pp. 71–72; Mark Cashman, "Behavioral Classification System for UFO Occupants," *IUR* 24, no. 1 (Spring 1999): 18; Patrick Gross, URECAT, December 8, 2006)

1954, September 26 — 2:30 p.m. At Chabeuil, Drôme, France, Lucette Leboeuf is walking her dog when she sees a short being wearing a translucent helmet and diving suit. She can see large eyes looking at her through the helmet. The creature approaches her, hopping. The dog barks at it and she runs away and hides in a bush. About 15 feet away, she sees an object about 16 feet in diameter resembling a top with a flat top. It rises above the cornfield and takes off at tremendous speed. Other people notice a circular area about 10 feet in diameter where the ground and grass are tightly packed. Tree branches are broken from above. Shocked, she stays in bed for two days. (Patrick Gross, "The 1954 French Flap")

1954, September 27 — 8:30 p.m. 12-year-old Raymond Romand and two other children on an isolated farm near Prémanon, Jura, France, see a brilliant rectangular object. He sees two occupants and throws stones at them, but he is thrown to the ground by an "ice-cold invisible force." Raymond confesses 6 weeks later that he made up the whole story, including making some physical trace marks. (Patrick Gross, "The 1954 French Flap," March 7, 2003)

1954, September 28 — Around 12:00 midnight. Two witnesses at Rixheim, Haut-Rhin, France, watch an elongated luminous object through binoculars. Ten or more smaller luminous points are circling it in all directions. (Patrick Gross, "The 1954 French Flap," April 1, 2014)

1954, September 28 — 10:30 p.m. Vintner M. Mercier of Saint-Armand-Montrond, Cher, France, notices that someone has stolen grapes from his vineyard and decides to stay up late and catch the thief. He sees a luminous object

descend and three figures emerge. He is then paralyzed and loses consciousness. There is no sign of anything when he wakes up. Probable hoax. (Aimé Michel, *Straight-Line,* pp. 97–98; Patrick Gross, "The 1954 French Flap," April 5, 2007)

1954, September 30 — Gen. Jimmy Doolittle submits a 69-page classified report on clandestine operations directly to President Eisenhower. It negates the Second Hoover Commission's recommendation on intelligence oversight. It says: "We must develop effective espionage and counterespionage services and must learn to subvert, sabotage, and destroy our enemies by more clever, more sophisticated, and more effective methods than those used against us." (Richard A. Best Jr. and Herbert Andrew Boerstling, "Proposals for Intelligence Reorganization, 1949–1996," Report to the US House Select Committee on Intelligence, Congressional Research Service, February 28, 1996, p. 11)

1954, September 30 — Aviation pioneer Eugène Farnier watches an unknown object for 20 minutes above his property at Jouy-sue-Morin, Seine-et-Marne, France. It is swinging back and forth over an area of about 984 feet. Farnier thinks it looks similar to the cigar-shaped object seen at Marignane in October 1952. (Patrick Gross, "UFOs in the Daily Press")

1954, September 30 — Around 4:30 p.m. Georges Gatay and his team of construction workers at Marcilly-sur-Vienne, Indre-et-Loire, France, see a disc-shaped object on the ground with a small, helmeted being standing nearby. In his hand he holds an elongated object: "It could have been a pistol, or it could have been a metal rod." On his chest is a light projector. Gatay tries to run, but he finds himself helplessly nailed to the spot. He is thus "paralyzed" during the whole observation until the object leaves. So are his seven coworkers, in a unique case of collective physiological reaction. Almost certainly a hoax. (Vallée, *Magonia*, pp. 68–69; Loren E. Gross, *UFOs, a History: 1954 September*, The Author, 1994, pp. 79–81; Loren E. Gross, *UFOs, a History: 1954 September, Supplemental Notes*, The Author, 2002, p. 12; Patrick Gross, "The 1954 French Flap," November 8, 2006)

1954, September 30 — Night. A sailor at the helm of the tanker *Port-Lyautey* sees, about 1,600 feet away in the Bay of Biscay, a red, saucer-shaped object grazing the surface of the water and then quickly ascending vertically and disappearing, leaving a red flame. (Patrick Gross, "The 1954 French Flap," April 9, 2006; Dolan, USO1, 173–174)

1954, October — London publishing house Frederick Muller publishes a contactee book, *Flying Saucer from Mars,* allegedly written by one Cedric Allingham, who claims that while vacationing in Scotland in February 1954 he saw a saucer land and talked to its occupant, a human-looking Martian. In 1969, science writer Robert Chapman concludes that no such person as Allingham existed. Christopher Allan and Steuart Campbell allege in 1986 that the book was written by arch-skeptical astronomer Patrick Moore using a pseudonym. His motive was to spoof Adamski and embarrass ufologists, but Moore never admits to the hoax. The photo of "Cedric Allingham" is really Peter Davies, who posed for the photograph with Moore's reflecting telescope. Davies also edited the book to conceal Moore's distinctive style of writing. (Cedric Allingham, *Flying Saucer from Mars*, Frederick Muller, 1954; Robert Chapman, *Unidentified Flying Objects,* Barker, 1969, pp. 113–123; Christopher Allen and Steuart Campbell, "Flying Saucer from Moore's?" *Magonia* 23 (July 1986): 15–18; Curt Collins, "Contact! A Close Encounter of the Third Kind from 1954," The Saucers That Time Forgot, October 13, 2017; Clark III 98, 596; Clark IV 125–126, 656)

1954, October — Day. RAF pilot Michael Forrest, stationed at RAF Sek Kong [now Shek Kong Airfield] near Hong Kong is scrambled in a de Haviland Vampire ground attack fighter to intercept a target detected by ground radar approaching from China. The target appears to be the size of an aircraft and traveling at high speed with a continuous track. Ground control tells him that at times it is stationary, but it has the ability to change direction and height at fantastic speeds. Forrest and another pilot are vectored into the blip at 30,000 feet, but they can see nothing. Ground radar insists the blip is right there with them. After 15 minutes the aircraft break off and head home. On the base, he is told that the blip was caused by "anomalous propagation." ("'Scrambled for Bogies': An Incident at RAF Sek Kong," *Fortean Times* 403 (March 2021): 45)

1954, October 1 — The Swedish Defense Ministry allegedly requests a secret investigation into UFOs. (Keyhoe, *FS Conspiracy*, p. 27)

1954, October 1 — 9:20 a.m. An RCAF test pilot is flying at 30,000 feet over Montreal, Quebec, in an F-86 Sabre Mk 5 jet fighter when he notices a contrail high over the north end of Lake Champlain. He climbs to 51,000 feet at 540 mph but is unable to close on the object, which appears to him as a black dot. He turns to a different heading and sees that the contrail makes a similar turn about 10,000 feet above him. As he returns to Montreal, the contrail climbs at a 45° angle and disappears to the east. (Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, pp. 91–92)

1954, October 1 — 4:00 p.m. An anonymous man and his dog are paralyzed as a luminous white object dives toward them and climbs away again at Bry-sur-Marne, Val-de-Marne, France. (Patrick Gross, "The 1954 French Flap," March 25, 2003)

1954, October 1 — 6:45 p.m. Bernard Devoisin and René Condette are bicycling west of Ligescourt in the direction of Vron, Somme, France. They see a glowing orange object shaped like a beehive in the middle of the road. A small entity, about 3 feet tall and dressed in a "diving suit," is standing close to it. When they get to within 200 feet of it, the object takes off at great speed. (Aimé Michel, *Straight-Line*, pp. 118–119; Patrick Gross, "The 1954 French Flap," May 8, 2004)

1954, October 1 — 7:50 p.m. Mechanic Ernest Delattre, 19, is riding to his home in Croix d'Épine, Oise, France, on his motor scooter when a bright egg-shaped object lands on the left side of the road 45 feet away. He sees short, dark shapes "like potato bags" moving around the object. He speeds up and the UFO changes its color and takes off. (Patrick Gross, "The 1954 French Flap," March 27, 2003)

1954, October 1 — Around 10:00 p.m. Jean Defiz, a factory worker in Bergerac, Dordogne, France, is returning home on his bicycle when he sees a large shooting star. Later, he sees an intense light in his yard and rushes out to see a disc rise with a whistling sound. It becomes luminous and flies off. A neighbor also sees it and estimates it is 10 feet wide. (Patrick Gross, "The 1954 French Flap")

1954, October 2 — The French Air Ministry allegedly launches a UFO investigation after 267 citizens come forward to report UFOs. (Wilkins, *FS Uncensored*, Citadel, 1955, pp. 60–61)

1954, October 2 — 3:45 p.m. A teacher, Mlle. Jaillet, along with 23 schoolchildren, see an elongated object in the sky to the southeast at Les Rousses, Jura, France. It approaches rapidly and they see it is a "cloud cigar." It switches from horizontal to vertical and hovers. At one point, a gleaming yellow disc emerges from it and moves away. The long object switches to horizontal again and moves away to the northwest. The incident lasts 4–5 minutes. (Patrick Gross, "The 1954 French Flap," March 25, 2003)

1954, October 3 — Dawn. Stockyard employee Angelo Girardo is going to his job in Bressuire, Deux-Sèvres, France, when he sees a small being wearing a diving suit standing near a circular craft about 10 feet in diameter. It swiftly takes off. Hoax. (Patrick Gross, "The 1954 French Flap," August 3, 2007; Clark III 269; Clark IV 309)

1954, October 3 — 7:20 p.m. Villagers of Chéreng, Nord, France, are having their Ducasse festival meal when they see a fast, luminous object in the sky suddenly stop, give off sparks, and descend to ground level. As people run to the spot, it takes off again. (Patrick Gross, "The 1954 French Flap," January 9, 2009)

1954, October 3 — 11:15 p.m. Young farmer Jean Allary sees a circular object near Ronsenac, Charente, France, that seems to be gliding on or near the ground, has luminous spots, and lights up as it takes off. He finds flattened and scorched grass over an area 25 feet across. (Patrick Gross, "The 1954 French Flap," January 31, 2007)

1954, October 4 — 8:00 p.m. In Poncey-sur-l'Ignon, Côte-d'Or, France, Mme. Yvette (or Thérèse) Fourneret sees a luminous orange object about 10 feet wide land in a meadow on her farm. She runs to tell some men, who arrive at the spot with rifles but find nothing. Instead, they discover a strange quadrilateral hole from which soil appears to be sucked up. The roots of plants are not damaged. The French Air Force and local police investigate and learn there are other witnesses. (Patrick Gross, "The 1954 French Flap," March 10, 2003; Covert 27–28)

1954, October 5 — A spindle-shaped UFO is seen for 20 minutes by hundreds of people over El Mahalla El Kubra, Egypt. At Bahnay, aerial cylinders emit dark smoke. One explodes, knocking a farmer to the ground, and kills two cows, whose hides show burn marks. Lt. Tewrik takes a photo of a rotating UFO that emits smoke above El-Qantara el-Sharqîya on the western side of the Suez Canal. He sends it to the Egyptian Army and to Khedivial Astronomical Observatory in Helwan. Adm. Youssef Hammad, director of the Egyptian Ports and Lights Administration, alerts pilots and astronomers to keep watch for UFOs over Cairo. (Wilkins, *FS Uncensored*, Citadel, 1955, pp. 231–232; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 12)

1954, October 5 — 4:00 a.m. Pierre Lucas, a baker in Loctudy, Finistère, France, is getting water from his well when he sees a UFO hovering nearby. A small being comes out of the object; it has an oval head covered with hair and large eyes. The creature touches Lucas's shoulder and speaks to him in an unknown language. He calls for his boss, and the creature runs into the object and takes off. ("Science: Martians over France," *Time*, October 25, 1954, p. 71; "Astral Adventurers: Frenchmen Report Meetings with Unlikely Creatures," *Life*, November 1, 1954, p. 28; "France Abuzz over Saucers: Craze Matches Witch-Hunting," *Boston (Mass.) Globe*, December 12, 1954, p. 54; "Troubled European Skies," *The Saucerian* 3, no. 2 (Spring 1955): 20; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, pp. 10–11; Patrick Gross, "The 1954 French Flap," October 3, 2003)

1954, October 5 — 7:15 a.m. A road worker named Narcy sees an object near a road in Mertrud, Haute Marne, France. He also sees a hairy dwarf wearing an orange, tight-fitting jacket climb through a porthole on the UFO, which

consists of a cigar-shaped section under a flat disc. Tracks are found. Probable hoax. ("Science: Martians over France," *Time*, October 25, 1954, p. 71; "Astral Adventurers: Frenchmen Report Meetings with Unlikely Creatures," *Life*, November 1, 1954, p. 28; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, pp. 19, 22, 30; Patrick Gross, "The 1954 French Flap," March 25, 2003)

1954, October 5 — 3:45 p.m. In Beaumont, Puy-de-Dôme, France, witnesses Brun, Marfaron, Douti, and Marplat see a luminous ball moving west to east 1,500 feet away from them. It approaches to within 450 feet, and they feel paralyzed with faintness as a nitrobenzene odor spreads around them. (Patrick Gross, "The 1954 French Flap," March 24, 2006)

1954, October 6 — Around 6:00 a.m. Mechanic Joseph Roy is riding to work on his bicycle at Isles-sur-Suippe, Marne, France, and sees a dazzling light at low altitude. It blinks out. When he gets to the spot where it disappeared, he sees a large object like an artillery shell 9 feet long. A small, dark form is standing in front of it. Roy becomes frightened and races to the nearest gendarmerie. Probable confusion, helicopter, and military personnel. (Aimé Michel, *Straight-Line*, p. 142; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October, Supplemental Notes*, The Author, 2002, p. 19; Patrick Gross, "The 1954 French Flap," January 16, 2006)

1954, October 6 — 9:30 p.m. Two soldiers at the military barracks in La Fère, Aisne, France, watch a luminous craft in the shape of an artillery shell landed on the ground less than a quarter-mile away. As one soldier approaches it, he becomes paralyzed. (Patrick Gross, "The 1954 French Flap," April 9, 2006)

1954, October 7 — 6:20 a.m. A group of workers at the Renault manufacturing plant at Le Mans, Sarthe, France, are bicycling to work when they feel an unpleasant tickling at the same moment an intense greenish light is emitted from a luminous object hovering above the Route N23 road. They are almost paralyzed, then the UFO leaves, flying low over the fields. (Aimé Michel, *Straight-Line*, p. 143; Schopick, pp. 8–9; Patrick Gross, "The 1954 French Flap," October 22, 2004)

1954, October 7 — The Italian Air Ministry allegedly sets up UFO detection posts for 24/7 vigilance. (Wilkins, *FS Uncensored*, Citadel, 1955, p. 232)

1954, October 7 — 2:30 p.m. Farmer René Margaillon goes to work and notices a mysterious object about 300 feet away in a field between Monteux and Althen-des-Paluds, Vauclude, France. He approaches the object, which is about 8 feet tall and phosphorescent. Suddenly it disappears and he feels suffocated. (Patrick Gross, "The 1954 French Flap," April 5, 2003)

1954, October 7 — Night. Witnesses at Corbigny, Nièvre, France, see a luminous cylinder that appears orange when vertical and motionless, and white when moving forward horizontally. At one point, two small discs emerge from its lower part. (Patrick Gross, "The 1954 French Flap," September 12, 2005)

1954, October 8 — 7:30 p.m. Four children—Gilbert Calda, 12, Daniel Hirsch, 9, J. P. Hirsch, 5, and Robert Maguin, 16—are roller skating at Pournoy-la-Chétive, Moselle, France, when they see a luminous object near the cemetery. It is round, about 8 feet in diameter, and standing on three legs. A dwarf, about 4 feet tall, dressed in black, with a face covered in hair and large eyes, emerges and shines a blinding light at them. It says something in an unknown language. The children run away but look back in time to see the object flying away high in the sky. (Aimé Michel, *Straight-Line*, p. 154; Patrick Gross, "The 1954 French Flap," March 7, 2003; Clark III 269; Clark IV 309)

1954, October 9 — The US Air Force releases a press statement saying that after studying 3,500 reports, it has found "no authentic physical evidence" that UFOs are spaceships or weapons. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 22)

1954, October 9 — 4:00 p.m. Jean Bertrand is driving near Carcassonne, Aude, France, when he comes upon a metallic sphere in the road ahead. The top half seems to be transparent, and he sees two human-shaped figures inside. As he approaches, the object takes off at high speed. Probable helicopter. (Patrick Gross, "The 1954 French Flap," March 26, 2003)

1954, October 9 — Around 7:00 p.m. Roger Barrault, a worker in Lavoux, Vienne, France, is riding a bicycle when he is stopped on the road by a double beam of light coming from a 4-foot-tall figure that looks like a diver. It wears boots without heels and has brilliant eyes and a large moustache. Hoax. (Patrick Gross, "The 1954 French Flap," March 26, 2003)

1954, October 9 — 8:30 p.m. Jean-Pierre Mitto and his two cousins are driving on Road 631 from Toulouse to Briatexte, Tarn, France, at a crossroads known as "La Caiffe" when they see two small figures about the size of 11-year-old children cross the road. They enter a pasture where a convex disc rises vertically and shoots upwards rapidly. It is about 20 feet in diameter and orange. Brown, oily residue is found at the site. (Patrick Gross, "The 1954 French Flap," March 26, 2003)

1954, October 9 — 9:20 p.m. Mechanics André Bartoli and Jean-Jacques Lalevée see the sky light up with a yellow-orange glow in Cuisy, Seine-et-Marne, France. Bartoli's car motor and headlights fail, and they both see a yellow-orange cigar-shaped object moving to the southwest. (Aimé Michel, *Straight-Line*, pp. 150–152; Schopick, pp. 9–11; Patrick Gross, "The 1954 French Flap," August 26, 2004)

1954, October 9 — 10:15 p.m. Max Favell, a representative of a German firm in Beirut, Lebanon, sees a white flying object land. It takes off vertically, spinning, and is lost to sight. (Vallée, *Magonia*, pp. 222–223)

1954, October 9 — Evening. As he is driving home from his job as a movie projectionist in Rinkerode [now part of Drensteinfurt], North Rhine-Westphalia, West Germany, Willi Hoge sees a blue light to one side of the road. He looks closer and sees four small figures with big heads and chests and small, thin legs, apparently doing repair work on a spindle-shaped machine. All are dressed in one-piece elastic body suits. (Wilkins, *FS Uncensored*, Citadel, 1955, p. 233; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 24)

1954, October 10 — The Royal Observatory of Belgium in Uccle announces it will act as a clearinghouse for UFO reports. (Wilkins, *FS Uncensored*, Citadel, 1955, p. 233)

1954, October 10 — A cylindrical UFO with red and green lights is seen over Alexandria, Egypt. (Wilkins, *FS Uncensored*, Citadel, 1955, pp. 232–233)

1954, October 10 — 11:45 a.m. Marius Dewilde, along with his 3-year-old son, allegedly has a second encounter with a UFO occupant at Quarouble, Nord, France. He claims he can see beings moving around inside a landed saucer. One emerges, wearing a diving suit and helmet, and speaks to them in an unknown language. (Patrick Gross, "The 1954 French Flap," April 3, 2003)

1954, October 10 — Day. On the Greek island of Lesbos, off the coast of Turkey, a father and son are out hunting when they see a cigar-shaped object moving horizontally before separating in two. Two objects then appear to move vertically, at a steady distance from each other, until they are lost in the horizon. (Orestis Lazanakis, "UAP in Greece," UAP Check, July 27, 2024)

1954, October 10 — In a newspaper interview, Alfred Loedding alludes to the 1948 Estimate of the Situation without calling it that. Loedding shows a study of some 100+ UFO reports to one of the "country's leading scientists," who glances at it briefly, then declares that "flying saucers are a figment of the imagination." Shortly afterwards, the skeptics in Project Sign win out, and Loedding's efforts are ignored. (*Trenton (N.J.) Sunday Times-Advertiser*, October 10, 1954; Michael Hall, "Was There a Second Estimate of the Situation?" *IUR* 27, no. 1 (Spring 2002): 13, 32)

1954, October 10 — Night. M. Laugère, an SNCF railway employee, is near the railroad bridge over Le Cher in Montluçon, Allier, France, when he sees a torpedo-shaped metallic object resting on four legs either on or adjacent to an SNCF fuel tank. Next to it is a man covered in hair. Laugère asks him what he is doing and the man replies in an unintelligible language, although he hears the word "gasoil." Laugère leaves to alert his colleagues, but turning around he sees the object rise silently and disappear from view. An apparent prank by co-workers of the witness. (Patrick Gross, "The 1954 French Flap," October 24, 2004)

1954, October 11 — 4:15 a.m. Baptiste Jourdy is delivering milk near Fonfrède, Loire, France, when the truck engine dies and the headlights fail. He gets out to investigate and sees a glowing, multicolored object, moving at great speed, cross the road and disappear in the distance. The headlights return and he starts the truck again. (Aimé Michel, *Straight-Line*, p. 157; Schopick, pp. 11–12; Patrick Gross, "The 1954 French Flap," April 6, 2003)

1954, October 11 — 4:30 a.m. Two merchants, Henri Gallois and Louis Vigneron, are traveling to a fair in a van near Clamercy, Nièvre, France, when they both feel electrical shocks. The van motor dies, and the headlights go out. They become paralyzed and see on the ground, 150 feet away, a round object with three small figures around it. The figures go inside the object, which then leaves rapidly. The headlights come back on, the paralysis ends, and the engine can be restarted. Hoax. (Aimé Michel, *Straight-Line*, p. 158; Schopick, pp. 12–13; Patrick Gross, "The 1954 French Flap," April 7, 2003)

1954, October 11 — 6:00 a.m. Baptiste Potin of Méral, Mayenne, France, is riding a bicycle to his workplace when he spots a huge orange ball in the sky that seems to be above Saint-Poix. It apparently descends to the ground as he approaches, barring the road. After watching it 8–10 minutes, it rises slowly and disappears in the northwest. He finds when he arrives at a farm that he is covered in white fluff embedded in his clothes. Probably an observation of the moon, accompanied by plant seeds. (Patrick Gross, "The 1954 French Flap," April 14, 2003)

1954, October 11 — The Romanian magazine *Contemporanul* claims that UFOs are US propaganda designed to "stir up against Moscow a flying-saucer psychosis." ("Saucers Are Not!" *Cincinnati (Ohio) Enquirer*, October 12, 1954, p. 4; Ruppelt, p. 238)

1954, October 11 — 9:50 p.m. Julia Juste, Maria Barbereau, and Marion Tanneur are driving along D14 about 1 mile from Chateauneuf-sur-Charente, Charente, France. Two luminous globes, one smaller than the other, appear in the

sky ahead of them at low altitude, and their car stalls and the headlights go out. The larger one becomes brilliant white with a reddish halo. After 5 minutes, they move out of sight in the Charente valley. (Aimé Michel, *Straight-Line,* p. 160; Schopick, p. 13; Patrick Gross, "The 1954 French Flap," April 6, 2003)

1954, October 12 — Morning. A UFO supposedly lands in a populous district on the south side of Tehran, Iran. It is said to have tried to kidnap a terrified man, Ghasim Faili, who says that on waking up he sees the UFO within 60 feet of him. It emits a magnetic force to capture him, but he shouts and neighbors gather, forcing the apparatus to take off. Later sources add some dubious details. (Gordon Creighton, "Attempted Abduction by UFO Entity?" *Flying Saucer Review* 13, no. 2 (March/April 1967): 23–24; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, pp. 42, 50; Patrick Gross, URECAT, July 20, 2007)

1954, October 12 — Afternoon. A French engineer driving to Kenitra, Morocco, sees a small figure in a metallic suit climbing abroad a UFO that quickly lifts off and flies away. The location is said to be Mamora Forest, which could be modern Mehdya, on the coast. (Lorenzen, *Occupants,* Signet, 1967, p. 95)

1954, October 12 — Around 2:00 p.m. A math professor at Lisieux named Bon is in Saint-Germain-de-Livet, Calvados, France, when he sees a silvery disc with a diameter of 21–24 feet hovering over a wooden area off the road. It dives toward the ground, then rises suddenly and silently into the sky at tremendous speed. (Patrick Gross, "The 1954 French Flap," October 24, 2004)

1954, October 13 — 4:30 p.m. A Mr. Carcénac sees a white object at high altitude heading toward the northwest at Graulhet, Tarn, France, that he at first takes for an airplane. He retrieves some opera glasses, through which he makes out a disc shape that is swaying as it moves at a high speed. After a few seconds, it explodes. A smaller silvery object moves away from the explosion to the south and disappears. Fragments from the airburst fall gently to the ground. Others rush to the spot and see debris, some of it like silvery filaments, catching on trees and telephone wires. It wilts away when handled. Possible hoax. (Patrick Gross, "The 1954 French Flap," September 9, 2004)

1954, October 13 — 7:35 p.m. Three witnesses (Olivier, Perano, and a third man) see a reddish disc about 12 feet in diameter near Bourrasol, a suburb of Toulouse, France. A small being about 4 feet tall is standing nearby wearing a diver's suit. Its head is large, and it has enormous eyes. One witness approaches to within 60–70 feet and is paralyzed. The UFO soon takes off. Definite hoax. (Patrick Gross, "The 1954 French Flap," April 24, 2003)

1954, October 14 — 6:30 a.m. A resident of Shamsabad [which one?], Iran, sees a star-like object about 300 feet away from his house. Approaching to 60 feet, he sees a "short young man" who is standing on a circular piece of metal in the middle of the object and glancing around him. The man seems to be "laughing" at the witness. The UFO shoots up into the air and vanishes. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 42)

1954, October 14 — Keyhoe hears from an informant that the 4602nd AISS has a "crashed object" program. His contact Lou Corbin thinks the Air Force already has some recovered material. (Keyhoe, *FS Conspiracy*, pp. 214–215)

1954, October 14 — A farmer and his wife see a light green object traveling at tremendous speed, possibly 3,000 mph, in Kenya. (Wilkins, *FS Uncensored,* Citadel, 1955, p. 234)

1954, October 14 — 12:00 noon. Farmer Antonio Crepaldi is leading his cows to a pond near Ca' Pisani, Rovigo, Italy, when an egg-shaped object emitting intense heat swoop over his house at an altitude of 50 feet. The cows panic and run away, apparently suffering burns. Some haystacks catch fire. The sighting lats 2 minutes. (1Pinotti 59)

1954, October 14 — 4:15 p.m. Flight Lt. James R. Salandin of the 604th Fighter Squadron is flying a Gloster Meteor F.8 out of North Weald Airfield, Essex, England, at 16,000 feet. He sees three objects heading towards him. Two of them (one gold, one silver) veer off to his port side, while the third closes to within a few hundred yards before veering to his port side. It is saucer-shaped with "buns" on top and underneath, silvery and metallic, with no portholes or flames. The report is sent to the Air Ministry where it disappears. (NICAP, "Gloster 'Meteor' Encounters Disc / Salandin Case"; "Week-end Pilot in Near Collision with Flying Saucer," *Flying Saucer Review* 1, no. 1 (Spring 1955): 2; Geoffrey Norris, "Something in the Sky," *RAF Flying Review,* July 1957, pp. 14, 15; "The Famous Salandin Sighting," *Flying Saucer Review* 30, no. 2 (December 1984): 13–15; Good Above, pp. 36–38; Good Need, pp. 154–155; Patrick Gross, "October 14, 1954, North Weald, Essex, UFO Encounters RAF Meteor Jet")

1954, October 14 — 6:20 p.m. André Cognard is driving on the D60 road to the east of Gueugnon, Saône-et-Loire, France, when a brilliant reddish fireball passes near his car to the west at low altitude. It is so bright that he stops his car. Probable meteor. (Patrick Gross, "The 1954 French Flap," April 20, 2003)

1954, October 14 — Twilight. A witness is riding a moped on the road between Saint-Romain-sous-Gourdon and Les Brosses Tillots, Saône-et-Loire, France. Suddenly his motor fails and, as he gets off the cycle, a bright circular object bursts ahead of him. He walks back with his moped and is able to start it again. (Aimé Michel, *Straight-Line,* p. 175; Schopick, p. 14; Patrick Gross, "The 1954 French Flap," September 25, 2004)

1954, October 15 — Early in the morning. A large, luminous, red object streaks across the sky above Hungary. A teacher from Györ-Moson-Sopron county takes two photos of what is an apparent meteor. (Hobana and Weverbergh 199–201)

1954, October 15 — In Boaria Pisani, Padua, Italy, a farmer is leading his cows to a pond when he sees an object fly over his house. The cows panic and run away, knocking a girl to the ground, while the object emits a burst of light. The farmer runs to the house and then faints. Three other persons see the craft depart. It is dark in color but surrounded by short blue and yellow flames. The object is egg-shaped, flies at 50 feet above the ground, and emits intense heat. The little pond is found desiccated, and haystacks catch fire as it flies over while the cattle suffers burns. (Vallée, *Magonia*, pp. 229–230)

1954, October 15 — Afternoon. Farmers near the Po della Donzella river channel, Veneto, Italy, see a disc-shaped object land then take off vertically. At the site is a deep crater about 18 feet in diameter. Poplar trees are partially burned. (Aimé Michel, *Straight-Line*, p. 181)

1954, October 15 — 7:45 p.m. Veterinarian Henri Robert of Londinières in Normandy, France, is driving on route RN 314, near Baillolet, Seine-Maritime, France. He sees four orange objects flying one above the other at 1,000 feet. One floats down like a leaf, landing about 350 feet in front of his car. Robert feels an electric shock and his engine dies for 20 seconds and the object disappears. Robert continues driving. As he is going through the village of Bailleul-Neuville, he sees in his headlights a four-foot-tall bluish-gray figure with arms and legs spread. His headlights go off then on again. He then sees on his left a 27-foot-long cigar-shaped object at the edge of a slope. It takes off vertically and quickly moves toward the north. Possible hoax. (Aimé Michel, *Straight-Line*, pp. 184–185; Schopick, pp. 15–16; Patrick Gross, "The 1954 French Flap," April 7, 2004)

1954, October 15–25 — Thousands of witnesses in the former Yugoslavia report low-flying UFOs and high-flying cigar-shaped objects, especially around Ljubljana, Slovenia; Sarajevo, Bosnia; and Belgrade, Serbia. Yugoslavia announces on October 27 that it intends to launch an official investigation. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 61; Hobana and Weverbergh 90–91)

1954, October 17 — Around 9:30 a.m. Guy Puyfourcat is returning from the fields near Cier-de-Rivière, Haute-Garonne, France, with his mare on a halter. The horse suddenly becomes restless and jumpy. A gray object about 4 feet in diameter rises from one side of the road and passes over them. The mare rises about 9 feet into the air and Puyfourcat releases her, and the animal falls to the ground and is unable to move for 10 minutes. The UFO moves away at high speed. (François Lagarde, "Une jument s'envole au départ d'un M.O.C.," *Lumières dans la Nuit*, no. 109 (December 1970): 17–18; Patrick Gross, "The 1954 French Flap," October 16, 2007; Sébastien Marti, "Le mystère de l'Ovni de Cier," *La Dépêche*, December 24, 2008)

1954, October 17 — 2:30 p.m. Maxime Pignatelli, 65, is hunting with his dog on the banks of the Durance River near Corbières, Alpes-de-Hautes-Provence, France. He sees a gray object about 12 feet long and 3 feet high on the ground about 130 feet away. Two helmeted figures emerge from a dome. The man flees. His dog also retreats a bit later, walking awkwardly as if partly paralyzed. (Jacques Vallée, "Un siècle d'atterrissages," *Lumières dans la Nuit*, no. 103 (December 1969): 7; Francis Schaefer and Pierre Delval, "Un recit d'atterrissage inedit à Corbières," *Phénomènes Inconnus* 1, no. 14 (1971): 10–13; Patrick Gross, "The 1954 French Flap," May 20, 2003)

1954, October 17 — Around 8:30 p.m. Several motorists driving on route D10 toward Conflans-sur-Lanterne, Haute-Saône, France, notice a bright red, luminous object hovering above a field adjacent to the road. They stop at a nearby café and alert the owner, Mr. Beuclair, and a crossing guard. Beuclair and his daughter walk toward the object for a closer look, but it approaches them silently and rapidly, stopping about 60 feet away. The witnesses see the object is circular with a hemispherical section on top. Suddenly white and red rays burst from underneath the object. The Beuclairs retreat, but the object remains in view for several more minutes before flying away at high speed. (Aimé Michel, *Straight-Line*, p. 188; Patrick Gross, "The 1954 French Flap," December 4, 2005)

1954, October 18 — 5:30 p.m. A M. Bachelard is driving a light truck southeast of Gelles, Puy-de-Dôme, France. As he goes around a bend, he feels paralyzed and his truck slows down to less than 20 mph. In a nearby field he sees an elongated object about 5 feet high. A few minutes later he reaches the village of Coheix, which is off his normal route, and starts telling people about the event. Later ufologists suspect there may be some missing time involved. (Aimé Michel, *Straight-Line*, p. 198; Schopick, pp. 16–17; M. and Mme. Ameil, "Gelles (Puy-de-Dôme)," *Lumières dans la Nuit*, no. 97 (December 1968): 11; "The Landing at Gelles," *Flying Saucer Review Case Histories*, no. 5 (June 1971): iii; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, pp. 65–66; Patrick Gross, "The 1954 French Flap," March 20, 2003)

1954, October 18 — 6:00 p.m. Two farmers near Saint-Cirgues, Haute-Loire, France, watch two bright balls connected by a rod for 15 minutes. They disappear at a fast pace. (Patrick Gross, "The 1954 French Flap," December 21, 2006)

1954, October 18 — 9:00 p.m. M. and Mme. Labussière are driving on the N150 southwest of Saintes, Charente-Maritime, France, when they see a balance-shaped object in the sky. One side is red and the other orange, while the rod connecting them is a luminous green. The object pauses above a field near their car, which they pull over to watch more closely. The green rod soon dissipates, and the two balls settle in the field. In the dim light emitted by the objects, the Labussières see a small creature emerge from each, walk toward each other, pass without stopping, and enter the other object. (Patrick Gross, "The 1954 French Flap," December 29, 2003)

1954, October 19 — 8:00 p.m. A M. Fillonneau is driving in Criteuil-la-Madeleine, Charente, France, when he sees a bright fireball. His headlights go out and the engine stops, and he finds that his battery is completely dead and the headlight bulbs burned out. (Patrick Gross, "The 1954 French Flap," February 5, 2007)

1954, October 19 — Around 12:00 midnight. Renzo Pugina has just put his car in his garage at Parravicino, Como, Italy, when he sees a humanoid about 4 feet 3 inches tall in a scaly, luminous suit standing near a tree. The lower part of its body is like a cone. It aims a light beam at Pugina that paralyzes him briefly. He only manages to move some fingers, but with some concentration makes a clenching motion with his fist on the garage keys that he holds in his hand. Freed from the temporary paralysis, he runs to attack the intruder, who flees with a soft whirring sound. A police investigation finds a spot of oil at the location. (Vallée, *Magonia,* pp. 235–236; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 74; 1Pinotti 60)

1954, October 20 — 6:30 p.m. Jean Schonbrenner is driving a truck southbound near Turquestein-Blancrupt, Moselle, France, when he sees a bright glow ahead on route N393. He continues to drive but feels paralyzed, his hands glued to the wheel. At about 30 feet away, his engine stops and the yellow-orange glow rises slowly and heads northwest. He feels a sensation of warmth and sees that the glow contains a cone-shaped object. (Aimé Michel, *Straight-Line*, p. 203; Schopick, pp. 17–18; Patrick Gross, "The 1954 French Flap," April 21, 2003)

1954, October 20 — 9:15 p.m. Jean Lalle (or Jean Lasse) is riding a motorcycle between Biozat, Alliers, and Effiat, Puy-de-Dôme, France, when his engine dies suddenly. He sees an egg-shaped object with a bright trail climbing in the sky. The motorcycle restarts once the object has left. (Patrick Gross, "The 1954 French Flap," December 21, 2005)

1954, October 21 — 2:30 a.m. Construction worker Lazlo Ujvari is riding his bicycle to work from his farmhouse near Saint-Remy, Vosges, France, when he slows down and walks the bike to avoid a rough patch of road. He encounters a man wearing a helmet who is pointing a revolver at him and speaking to him in an unfamiliar language. Ujvari speaks to him in Russian, and the man asks him in Russian, "Where am I? In Spain or Italy?" Ujvari replies that he is in France, and the man asks how far it is to the German border. Ujvari says about 100 kilometers in a straight line. Then the unknown man asks him what time it is. Ujvari says it is about 2:30. The man switches the revolver to hos left hand, takes out a watch from his clothing and says, "You lie, it's four!" Then he asks the direction to Marseilles, and Ujvari gives him an estimate. The man tells him to "go, now" and Ujvari continues walking, followed by the man. Then he sees a gray domed disc, about 10 feet in diameter, landed in the road ahead. The man says goodbye and apparently gets on the UFO as Ujvari jumps on his bicycle. He hears a whistling sound and sees the object take off vertically, lit by a headlight on its dome, then levels off and speeds away to the southeast. (Vallée, *Magonia,* pp. 146–147; Patrick Gross, "The 1954 French Flap," May 14, 2003)

1954, October 21 — A young man hears a rustling sound and sees a landed UFO outside Melito di Napoli, Italy. It gives off a powerful bronze-green light. He then sees an occupant dressed in a diving suit emerge. A dog begins barking and the entity retreats inside and takes off. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 74; 1Pinotti 61)

1954, October 21 — 4:45 p.m. Jessie Roestenburg and her two children observe a disc-shaped, aluminum object hovering above their house in Ranton, Stafford, England. Through two transparent panels they see two men with white skin, having shoulder-length hair and high foreheads. They wear transparent helmets and turquoise-blue clothing resembling ski suits. The object hovers at a tilted angle while the two occupants look at the scene "sternly, not in an unkind fashion, but almost sadly, compassionately." (Charles Bowen, "Few and Far Between," in Charles Bowen, ed., *The Humanoids*, special issue of *FSR*, Oct./Dec. 1966, p. 4; Gordon Creighton, "The Roestenburg Story (1954)," *Flying Saucer Review* 38, no. 1 (Spring 1993): 6–9; Clark III 268; Curt Collins, "Jessie Roestenburg's 1954 UFO Encounter and Beyond," Blue Blurry Lines, October 19, 2018; Clark IV 308)

1954, October 21 — Evening. A motorist is driving on the D220 road with his 4-year-old son between Paillé and Pouzou, Charente-Maritime, France. He feels a tingling like electric shocks all over his body. The child cries, the engine stops, and the headlights go out as a luminous red body with a tail flashes briefly in front of them. (Aimé Michel, *Straight-Line*, p. 204; Schopick, pp. 18–19; Patrick Gross, "The 1954 French Flap," April 21, 2003)

1954, October 21 — 9:25 p.m. Three observers at the Woomera Test Range in South Australia see an erratic, dancing light adjacent to rocket Launcher Apron 1, Range B, approximately 500 feet away. The light alternates from deep

orange to yellow and is egg-shaped. Its apparent size is three times the magnitude of Venus. (NICAP, "Dancing Light Adjacent to Rocket Launcher")

1954, Mid-October — A merchant and his deliveryman are driving a van northeast of the village of Erquières, Pas-de-Calais, France, when they see a blinding light in front of them. As it passes over the van, the engine stalls and the headlights fail. Both men feel an electric shock. (Aimé Michel, *Straight-Line*, pp. 204–205; Schopick, p. 19; Patrick Gross, "The 1954 French Flap," March 12, 2005)

1954, October 22 — Afternoon. Roger Reveillé is walking in the Fôret de Lusigny, Aube, France, when he hears a rustling noise. He looks up and sees an oval-shaped object about 20 feet long at treetop level. At the same time he feels an intense heat that also seems to be creating a thick fog. After a few minutes the object disappears upward, but the heat continues. Although it is raining, the ground underneath where the object had been is dry. (Aimé Michel, *Straight-Line*, p. 204; Schopick, p. 18; Patrick Gross, "The 1954 French Flap," September 28, 2003)

1954, October 22 — 3:00 p.m. Principal Rodney Warrick and teacher Mrs. George Dittmar of Jerome, Ohio, Special School watch a large, silvery, cigar-shaped object hanging motionless in the sky. Soon it takes off, and in its wake it leaves a trail of whitish, web-like substance that floats down and begins to hang from wires along the road. It descends in both strands and balls for 45 minutes. Both adults get greenish stains on their hands from it. All of it dissipates, but the substance placed in closed jars dissipates more slowly. ("Jerome Teachers, Students Watch Strange Occurrence in the Sky," *Marysville (Ohio) Evening Journal-Tribune*, October 25, 1954, p. 1; "Strange 'Flying Cigar' Puzzles Union Countians," *Marion (Ohio) Star*, November 2, 1954, pp. 1, 10; "'Saucer' Trailing 'Angel's Hair' Seen in Ohio," *Dayton (Ohio) Journal-Herald*, November 2, 1954, p. 11; "Web-Spinning Saucer Visits Marysville, Ohio," *CRIFO Newsletter* 1, no. 9 (December 3, 1954): 5; "Jerome 'Object' Still Unexplained: Ex-Chief Recalls 1954 Sighting at School," *Marysville (Ohio) Journal Tribune*, July 22, 1958, p. 8; Charles A. Maney and Richard Hall, *The Challenge of Unidentified Flying Objects*, NICAP, 1961, pp. 40–42; Michael D. Swords, "Angel Hair: Spindrift between Worlds," *IUR* 32, no. 1 (August 2008): 3–4; Clark III 124; Clark IV 151)

1954, October 22 — 5:30 p.m. Casimir Starovski, a miner, meets a strange figure in Erchin Forest, near Lewarde, Nord, France. It has large, slanted, protruding eyes and a squat, furry body. Its nose is flat, it has thick lips, and it wears a skullcap on its oversized head. (Patrick Gross, "The 1954 French Flap," December 21, 2005; Clark III 269; Clark IV 309–310)

1954. October 22 — 11:00 p.m. A witness is walking along the jetty on the beach at Guéthary, Pyrénées-Atlantiques, France, when he sees a disk emitting four greenish lights rise up from the Bay of Biscay. It goes beneath the surface again, and the witness can see its glow underwater, moving away, until it reemerges and flies away at great speed. (Patrick Gross, "The 1954 French Flap," January 15, 2006; Dolan, USO1, 174)

1954, October 23 — 1:30 a.m. A woman in Cincinnati, Ohio, has fallen asleep listening to the radio. Suddenly it makes a harsh shrieking noise and the volume increases. Dogs begin barking in the neighborhood, so she looks outside and sees a large reddish-orange disc with a halo around it moving in a circle overhead. After a minute it moves off to the south. ("The Fort Wayne and Cincinnati Tie-In," *CRIFO Newsletter* 1, no. 9 (December 3, 1954): 5)

1954, October 23 — 3:00 a.m. A farmer named Carmelo Papotto near Tripoli, Libya, watches a UFO land 150 feet away with a sound like a compressor. It seems to be an oval machine with six wheels and complex machinery. The top half is transparent and flooded with bright light. Aboard are six men in yellowish overalls with human faces. When he touches part of the object, he gets an electric shock. One occupant warns him to stay away. For the next 20 minutes he watches them fiddle with instruments. The object then rises to 150 feet and takes off at a dizzying speed. (*The Sunday Ghibli* (Tripoli), October 31, 1954; Vallée, *Magonia*, p. 237; Mark Cashman, "Behavioral Classification System for UFO Occupants," *IUR* 24, no. 1 (Spring 1999): 17–18; 1Pinotti 61–62)

1954, October 24 — Rocket expert Hermann Oberth writes in the *American Weekly*: "It is my thesis that flying saucers are real and that they are space ships from another solar system. I think that they possibly are manned by intelligent observers who are members of a race that may have been investigating our Earth for centuries." He thinks UFOs might fly by "distorting the gravitational field." (Hermann Oberth, "Flying Saucers Come from a Distant World," *American Weekly*, October 24, 1954, in *Cincinnati Enquirer*; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 83; Hermann Oberth, "Lecture Notes for Lecture about Flying Saucers, 1954," *Australian UFO Bulletin*, September 1991, pp. 4–9)

1954, October 24 — A small man with strange glowing eyes is seen near Aïn El Turk, Algeria, along the coast. (Vallée, *Magonia*, p. 237)

1954, October 24 — 1:00–6:00 p.m. Officers and men at the Canoas Air Force Base near Porto Alegre, Brazil, watch a number of "circular silver-colored" objects moving at high speed. They are also seen by personnel of Varig airlines and some civilians. There are more than 100 witnesses. The chief military witness, jet pilot Lt. H. Ferraz de Almeida, sees a dull silver object moving apparently slowly above the base in a zigzag fashion. He estimates its altitude as 40,000–45,000 feet and suggests that its real speed must be tremendous. Maj. J. Magalhaes Mota is

watching the same object as another one rapidly approaches the first and stops next to it. The second object then moves rapidly, abruptly changes course, and flies off in an arc. When the object is in motion, it is surrounded by a misty halo, and when it stops the halo disappears. Their movements appear mechanical and intermittent. The report is forwarded to the Air Ministry in Rio de Janeiro with a request to investigate. Brazilian Air Force Chief of Intelligence Col. João Adil de Oliviera heads the investigation, which concludes on December 2 that the "saucers appear to be some kind of revolutionary aircraft" that are not "conventional phenomena or illusions." (Keyhoe, *FS Conspiracy,* p. 212; UFOEv, p. 119; Swords 461–462)

1954, October 25 — 6:15 a.m. Several UFOs, some described as spear-shaped and others as egg-shaped, speed over Belgrade, Yugoslavia [now Serbia], trailing bluish tails for about an hour. Witnesses include aeronautical engineer Vladimir Ajvas, AF Capt. Stjepan Djitkol, and staff at the nearby Zemun Polje Airport. Milorad B. Protić and other astronomers at Belgrade Observatory track the object and determine that it is not a meteor. After the launch of Sputnik in November 1957, Protić decides that the object must have been an experimental Soviet satellite. The event is a culmination of UFO sightings over Yugoslavia since October 15, few of which make the newspapers. (UFOEv, p. 123; Lorenzen, *UFOs: The Whole Story,* Signet, 1969, p. 68; Hobana and Weverbergh 90–91)

1954, October 25 — Lucien Jeune, mayor of Châteauneuf-du-Pape, Vaucluse, France, following numerous UFO sightings, issues a police order prohibiting "The overflight, landing, and take-off of aircraft, so-called flying saucers or flying cigars, on the communal territory." The announcement, which also threatens the confiscation of any craft and the arrest of occupants, is done as a publicity stunt. Claude Avril, the city mayor in 2016, refuses to rescind it. (Louis de Gouyon Matignon, "The French Anti-UFO Municipal Law of 1954," Space Legal Issues, May 29, 2019)

1954, October 25 — 7:30 p.m. Farmer Gilbert Hée is gathering pears on his farm at Les-Jonquerets-de-Livet [now Mesnil-en-Ouche], Eure, France, when he sees an elongated object about 7 feet long with a green and a red light at both ends resting in the pasture. Some cows have gathered around it. The object is moving slowly and stops at a barbed wire fence. Hée goes inside. At 11:00 p.m., his son-in-law René Marais and a friend, Jean Chéradame, arrive on a motorcycle. Chéradame agrees to ride into the field and take a look, but he only goes 300 feet along the road before the engine fails. He falls from the bike and sees two short creatures walking stiffly and wearing bright clothes. (Patrick Gross, "The 1954 French Flap," April 11, 2004)

1954, October 26 — 10:45 p.m. Aimé Bousard is returning on his bicycle from the town hall at Alleyrat, Creuse, France, to his residence at La Vaureille when he sees a figure crouching on the roadway. When he stops, the figure stands up and points two powerful light-blue lights at him. The entity is 5 feet 3 inches tall and dressed in a diver's suit. It has two green lights on either side of its head. Bousard is paralyzed for 10 minutes while the lights are aimed at him. Then the entity crosses the road and disappears and Bousard can move again. Gendarmes investigate and note that his right hand is swollen and he has difficulty writing. They find a 27-inch circle of disturbed earth at the site. (Patrick Gross, "The 1954 French Flap," September 6, 2007)

1954, October 27 — 1:30 p.m. More than 10,000 soccer fans witness two luminous discs during a game at Florence, Italy. A large amount of "white filaments" falls that clings to everything. Engineering student Alfredo Jacopozzi collects samples in a jar and takes it to Prof. Cozzi at the Institute of Chemistry at the University of Florence. The lab finds the samples have a "fibrous structure, with mechanical resistance to contraction and torsion, burns rapidly, leaving a transparent residue." It contains calcium, silicon, aluminum, magnesium, iron, and boron. ("Italy, Too!" *Flying Saucer News,* no. 7 (Winter 1954–1955): 6; Charles A. Maney, "The Phenomena of Angel Hair," *Flying Saucer Review* 2, no. 6 (Nov./Dec. 1956): pp. 16–18, 31; Stringfield, *3-0 Blue,* CRIFO, 1957, pp. 49–53; Charles A. Maney and Richard Hall, *The Challenge of Unidentified Flying Objects,* NICAP, 1961, pp. 58–63; Roberto Pinotti, "The Italian Scene," *Flying Saucer Review* 16, no. 3 (May/June 1970): pp. 7–9; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October,* The Author, 1991, pp. 86–87; Brian Boldman, "Angel Hair Physical Analyses: A Review," *JUFOS* 9 (2006): 101; Michael D. Swords, "Angel Hair: Spindrift between Worlds," *IUR* 32, no. 1 (August 2008): 5–6; Deirdre Pirro, "Unexpected Fans," The Florentine, June 17, 2010; Richard Padula, "The Day UFOs Stopped Play," BBC News, October 24, 2014; "Door 9: Football, Geothermal Energy and the 1954 Wave of UFOs," Geological Society of London Blog, December 9, 2014; 1Pinotti 63–64; Clark III 124; Max De Luca, "The Eye in the Tuscan Sky: The Day a UFO Sighting Stopped a Fiorentina Match," *These Football Times,* April 21, 2020; Clark IV 151)

1954, October 28 — Hoaxed report of a landed UFO and occupants at Tradate, Italy, near Milan. (Frank Edwards, *FS Serious Business,* Bantam ed., 1966, pp. 108–109; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October,* The Author, 1991, p. 89; 1Pinotti 64)

1954, October 28 — Three luminous UFOs soar over Rome, Italy, seen by Associated Press reporter Maurizio Andreolo and US Ambassador Clare Booth Luce. Some witnesses report "fine cotton or wool particles" falling from them.

(Keyhoe, *FS Conspiracy*, pp. 212–213; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 91; 1Pinotti 64)

1954, October 30 — 1:00 p.m. UFO researcher Alberto Perego is driving past the church of Santa Maria Maggiore in Rome, Italy, when he notices a crowd of about 100 people gazing up at the sky. He sees two "white dots" moving toward the south then vanish in opposite directions. Later, two other objects appear and move to the north at an altitude of about 6,500 feet. (Alberto Perego, "The Great 'Cross' above the Vatican," *Flying Saucer Review Case Histories*, no. 15 (June 1973): 3)

1954, Late October–early November — The UK War Office receives six reports of 40–50 unidentified radar targets that appear from nowhere, usually at midday, flying at a height of 12,000 feet. The targets first appear in a U-formation, then converge into two parallel lines and take up a Z-formation before disappearing. The location of the radar trackings is not revealed. (Good Above, pp. 38–39)

1954, November — Gen. John A. Samford summons Col. John O'Mara from Dayton and directs him to clear up any confusion about Keyhoe's use of USAF data. O'Mara writes Eickhoff and says he had misunderstood and that Keyhoe's book does contain officially released Air Force UFO reports. (Keyhoe, *FS Conspiracy*, p. 231; Powell, *Keyhoe*, 143–144)

1954, November — The Hungarian government gets an "expert" to state that UFOs do not exist because all reports "originate in bourgeois countries, where they are invented by the capitalist warmongers." (Ruppelt, p. 238)

1954, November 1 — 6:00 a.m. Jack Holloway sees a large, round object that leaves a vapor trail that sprays sparks and moves at high speed for a few seconds to the south of Salem, Oregon. (NICAP case file)

1954, November 1 — 6:30 a.m. Rosa Lotti Dainelli sets out for the church at the castle of Cennina, Arezzo, Italy. As she passes through a wooded area, she sees a spindle-shaped object standing upright next to a cypress tree. It has two portholes and a little door, through which she can see two chairs. Two little men come out from behind the object; they are dressed in gray suits, cloaks that come down to their waists, and red helmets. They speak in an unintelligible language and snatch flowers from her hands and throw them inside the UFO. Dainelli flees, glancing back only once. (*La Domenica del Corriere*, cover, November 14, 1954; "Calze e garofani attirano i marziani?" *Tutti*, November 14, 1954; "Now They're in Italy," *Life*, November 29, 1954, p. 133; "Caso Rosa Lotti in Dainelli," *Notiziario UFO*, no. 44 (March/Apr. 1972): 11–15; Sergio Conti, "The Cennina Landing of 1954," *Flying Saucer Review* 18, no. 5 (Sept./Oct. 1972): 11–15; "Dossier retrospettivo," *Notiziario UFO*, no. 77 (Jan./Mar. 1977): 10–15; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, pp. 1–5; Clark III 228–229; 1Pinotti 65–74; Northern Ontario UFO Research and Study, "The 1954 Cennina Landing and Encounter with Humanoids"; Società Cooperativa Dramatica Filarmonica di Ambra, "Incontro con umanoidi di Rosa Dainelli nei Lotti"; Eghigian, *After*, p. 146; Clark IV 269–270)

1954, November 1 — 10:40 p.m. Gonzalo Rubinos Ramos is driving at a spot called Curva del Obispo 42 kilometers from A Coruña, Galicia, Spain, when his engine stalls and the lights go out. He sees a large glowing red object near the road. After a while it moves upwards with a "soft explosion." At the same time, the radio-telegraph station in A Coruña is affected by severe interference and static. Probable meteor. (Antonio Ribera, "A UFO Survey of Spain: More Evidence," *Flying Saucer Review* 9, no. 1 (Jan./Feb. 1963): 16; Herbert S. Taylor, "An Update on Vehicle Interference Reports, Part Two," *IUR* 34, no. 1 (Sept. 2011): 18; Juan Carlos Victorio, "El 'platillo volante' de Órdenes (A Coruña)," Misterios del Aire, April 17, 2018)

1954, November 2 — 10:30 a.m. Taxi driver Maurilio Braga Godoi leaves the streetcar trailer at Santo Amaro, a suburb of São Paulo, Brazil, and starts to walk home. When he arrives at the corner of Rua Andaguara, he is startled to find a glowing, circular object landed in an empty lot. It is about 90–120 feet in diameter and surrounded in a violet glow. He approaches it hesitantly from 60 feet away, feeling like running but he is rooted to the spot and is unable to call for help. The anxiety dissipates, and he walks toward it again, noticing a sliding door on the object. He goes inside, entering a circular room illuminated by a soft light. On a table he sees some maps, including one of South America with mushroom-shaped marks on it. He looks up and sees three humanoids less than 5 feet tall with dark brown skin and dressed in a light gray coverall and a belt that holds what might be a weapon. They appear to be conversing in an unknown language. He tries talking to them, but they don't understand. He backs out of the object, dragging his feet. He jumps out of the door and runs away. Looking back at the object from 30 feet away, he sees it is hovering 30 feet above the ground then takes off swiftly and silently. Godoi is examined by psychiatrists, who find him neither neurotic nor psychotic. (Lorenzen, *Occupants*, Signet, 1967, pp. 198–199; Loren E. Gross, *The Fifth Horseman of the Apocalypse, UFOs: A History, 1954 November–December, Supplemental Notes*, The author, 2002, pp. 3–5)

1954, November 4 — A laborer named Jose Alves of Pontal, São Paulo, Brazil, is night fishing in the Rio Pardo in a deserted spot. He sees a silvery, glowing UFO like two washbowls placed on top of each other, closing in from a westerly direction and wobbling. It lands near him and three little men emerge from a window, 3 feet tall with dark brown skin. They are dressed in white clothes with tightly fitting skullcaps, and collect samples of grass, herbs, and leaves, as well as water, which they put into a metal tube. They jump back into the object, which takes off vertically. (Patrick Gross, URECAT, November 22, 2006)

1954, November 4 (or 7) — 3:15 p.m. A motorcyclist, Gianni Cambosu, sees a silvery, disc-shaped object about 50 feet in diameter land near the road at Monte Ortobene, Sardinia, Italy. He swerves sharply to avoid it and falls off his cycle. A taxi driver, Francesco Tanca, stops to observe the object, which is making a soft whirring sound before it takes off. (Wilkins, *FS Uncensored*, Citadel, 1955, pp. 237–238; 1Pinotti 76)

1954, November 5 — 10:09 a.m. A witness in La Roche-en-Brénil, Côte d'Or, France, sees an orange object making a noise like a generator land in a nearby pasture. He notices three men standing near it. One is holding a box that emits a beam of light and the other two hold objects that look like weapons. Physical traces are found at the landing site: a white substance and a circle 10 feet in diameter. ("Fouillez les archives: La Roche-en-Brénil," *Lumières dans la Nuit*, no. 125 (May 1973): 22–23; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, p. 10; Loren E. Gross, *The Fifth Horseman of the Apocalypse, UFOs: A History, 1954 November–December, Supplemental Notes*, The author, 2002, pp. 10–11; Patrick Gross, "The 1954 French Flap," April 16, 2003)

1954, November 6 — 11:00 a.m. Alberto Perego is in the Tuscolana district in Rome, Italy, when he sees dozens of small, white objects in the sky at a height of 4–5 miles. They are moving at variable speeds, as high as 750–850 mph. At first he calculates that there are about 50 of them, but later realizes there are 100. Sometimes they are single, other times in pairs, threes, fours, sevens, or twelves. Frequently they are in diamond formations of four or V-formations of seven. At 12:00 noon, a formation of 20 objects appears from the east, followed by another 20 moving from the west. The two V-formations converge until their vertices form a St. Andrews cross, with 10 objects to each bar. The convergence takes place over the Trastevere–Monte Mario district above Vatican City. The cross then performs a three-quarter turn on its axis, turning into an X-formation, then breaks off into two separate curves that take off in opposite directions. Another concentration of about 100 objects appears 10 minutes later and Perego notices shining filaments falling from the sky. He grabs a handful of the glassy substance, which evaporates in a few hours. (Alberto Perego, "The Great 'Cross' above the Vatican," *Flying Saucer Review Case Histories*, no. 15 (June 1973): 4–5; 1Pinotti 76–80)

1954, November 7 — 11:30 a.m. Alberto Perego is returning from the Tuscolana district of Rome, Italy, when he sees more formations of about 50 white objects that remain for about two-and-a-half hours. They arrive from different directions and always in formation. More filamentous material falls from the sky. (Alberto Perego, "The Great 'Cross' above the Vatican," *Flying Saucer Review Case Histories*, no. 15 (June 1973): 5; 1Pinotti 80)

1954, November 8 — 6:00 p.m. Witnesses near Voussac, Allier, France, in the Vacheresse Forest watch a luminous sphere land and then dim, fading to black. Investigators find an area 12–15 feet in diameter where there are no leaves and the ground seems excavated. (Patrick Gross, "The 1954 French Flap," April 18, 2003)

1954, November 8 — 7:30 p.m. Blacksmith André Chaillou is riding a moped one mile north of Loublande, Deux-Sèvres, France, when he notices a small blue light in front of him. His engine fails and he nearly falls off the bike. The blue dot is projecting a strong light and hovering about 6 feet in the air. He finds himself temporarily paralyzed with a tingling in his hands. The blue light goes out and he is able to move again and restart his moped, but the light reappears about 450 feet away, seemingly 18 feet long and cone-shaped. It takes off vertically with a whistling sound. (Patrick Gross, "The 1954 French Flap," October 22, 2006)

1954, November 10 — An agronomist and his family encounter a landed UFO along a road in Porto Alegre, Rio Grande do Sul, Brazil. Two men with long hair and one-piece suits emerge and approach them with raised arms. The witnesses speed away. (Lorenzen, *FS Hoax*, pp. 48–49; Clark III 268; Clark IV 308)

1954, November 11 (or 14) — 7:45 p.m. Near Isola, Spezia, Italy, Amerigo (or Americo) Lorenzini sees a cigar-shaped UFO land and a trio of small creatures wearing diving suits emerge. They walk over to Lorenzini's rabbit cages and stare at the animals, talking in a strange language. He runs inside to grab his gun and tries to pull the trigger as they are taking some rabbits to the UFO, but he becomes paralyzed. The UFO takes off, leaving a bright trail. ("Recent Sightings," *APRO Bulletin* 3, no. 3 (November 15, 1954): 5, 7; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, pp. 20–21; Peter Rogerson, "INTCAT 1954"; 1Pinotti 88; Clark III 269; Clark IV 309)

1954, November 12 — 11:30 a.m. Alberto Perego watches even more formations of white objects over Rome. He has contacted the Italian air defense office, which tells him that the objects would be out of radar range. This time the objects are also observed by Fr. Zilwes, a Brazilian priest at the Vatican Observatory in Castel Gandolfo, Italy.

(Alberto Perego, "The Great 'Cross' above the Vatican," *Flying Saucer Review Case Histories*, no. 15 (June 1973): 5–6; 1Pinotti 81–82)

1954, November 12 — 3:00–6:00 p.m. A white, motionless object appears over Louisville, Kentucky. A radar unit 30 miles southwest of Louisville tracks the object but loses sight about 12 miles northwest of Godman Army Airfield at Fort Knox. It is later sighted at Bedford, Indiana. Kentucky National Guard pilot Lt. Col. Lee J. Merkel notifies Wright-Patterson AFB near Dayton, Ohio, which sends an F-86 to investigate. The pilot sees nothing and returns to the base. Merkel and another National Guard pilot give chase in F-51 Mustangs, but they are also unsuccessful. Merkel says the object is moving into the wind, which is not likely for a balloon. Henry P. Julliard, deputy director of Standiford Field [now Louisville International Airport] follows the object for 45 minutes on the weather bureau's theodolite; he says the object has no more motion than a star and that after sundown the object turns amber. (NICAP, "Sphere Startles Thousands"; "That 'Thing' in the Sky Still 'Unidentified Object,'" *Louisville (Ky.) Courier-Journal*, November 13, 1954, pp. 1, 12; "Louisville Stops Work to Watch Saucer," *CRIFO Newsletter* 1, no. 9 (December 3, 1954): 3–4; UFOEv, p. 134; *Hynek UFO Report*, pp. 51–52)

1954, November 13 — 2:00 a.m. A witness is driving a 4 CV Renault auto in Buchy, Seine-Maritime, France, and sees a luminous object take off as he feels a mild electric shock and is paralyzed. His car engine slows but does not stall. The object leaves, the paralysis goes away, and the car returns to normal. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, p. 20; Patrick Gross, "The 1954 French Flap," October 22, 2006)

1954, November 13 — 3:30 a.m. Railroad worker José Rodrigues comes across three figures in tight-fitting suits inspecting the ground with the help of luminous objects near railroad tracks near Urai, Paraná, Brazil. They see him and run back into the UFO. (NICAP, "Railroad Men See 'Men' Inspecting Tracks"; "Vistos no norte do Paraná e nos céus de Pôrto Alegre," *Correio da Manhã* (Rio de Janeiro), November 14, 1954; "Recent Sightings," *APRO Bulletin* 3, no. 3 (November 15, 1954): 5, 7)

1954, November 14 — Two or three tractor drivers in Forli, Italy, watch a bright-red, luminous UFO approach them in a farm field. As it approaches, the engine that works by internal combustion fail, but the diesel engine still runs. The men run away; when they return, the UFO has departed. The engine that failed still causes some trouble after the sighting. ("Recent Sightings," *APRO Bulletin* 3, no. 3 (November 15, 1954): 5, 7; Aimé Michel, *Straight-Line*, p. 211; Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 62–63, 145; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, p. 21)

1954, November 17 — 4:10 p.m. Iden K. Zimmerman is standing just under the roof of a shed by the railing of gate number six of the Willamette Falls Locks in Oregon City, Oregon. His gloved hands are resting on the railing. He feels something like "icy rain" on his hands. The rain seems to penetrate his clothing and gloves as if his arms are bare. He feels the same thing on his legs, from the knees down. Looking up, he sees a bright orange object as large as the full moon flying in a straight line from west to east. It disappears over the Crown Zellerbach Paper Mill roof across the river. He can find no trace of rain on the wooden deck or cement walks, and the moisture disappears from his clothing. A few minutes later he begins to feel dizzy and has trouble maintaining his balance. The effect wears off in about one hour. (Donald E. Keyhoe and Gordon I. R. Lore Jr., *Strange Effects from UFOs*, NICAP, 1969, pp. 16–17)

1954, November 17–18 — Blue Book head Capt. Charles Hardin and Allen Hynek meet with Col. John M. White Jr., commander of the 4602nd AISS at Ent AFB [now the US Olympic Training Center] in order to help out with a guide for investigating and processing UFO reports. (Col. John M. White Jr., "Report of Visit of ATIC Representatives," November 23, 1954, in *History of 4602d Air Intelligence Service Squadron*, vol. 1, January 1–June 30, 1955, pp. 55–57)

1954, November 21 — 11:30 a.m. Copilot Cmdr. Armando Braulino, pilot Cmdr. Pedro Luiz Teixeira, steward, radio operator, and passengers of National Airlines Douglas PP-ANM airliner at 9,000 feet over Paraíbo do Sul, Rio de Janeiro, Brazil, see a UFO formation, described as disc-shaped with cupola or dome on top, like aluminum with a polished surface. The formation is coming from the northeast at 7,200 feet and passes below the airliner at high speed. The duration is 40–50 seconds. (NICAP, "Shiny Objects Encountered by Airliner"; "Why Flying Saucers Are Not All Earth-Made Devices," *CRIFO Newsletter* 1, no. 12 (March 4, 1955): 1, 3)

1954, November 22 — Charles Laughead is forced to resign his position at Michigan State College [now Michigan State University] in East Lansing, Michigan, because of his flying saucer activities. (Clark III 718; Clark IV 787)

1954, November 22 — Anor Ferreira da Silva, a bored telegraph operator in Caratinga, Minas Gerais, Brazil, transmits a Morse code message to his friend Geraldo Bastos in Belo Horizonte, claiming that a flying saucer has crashed in a nearby quarry. His messages continue for an hour, repeatedly asking the authorities to defend the city from Martian invaders. Bastos takes the messages seriously, and a friend looking over his shoulder runs out to the nearest newspaper office to relay the news. The telephone system of Caratinga shuts down from all the press

inquiries, and soon the Brazilian military investigates, finding nothing amiss in the city. (John Gosling, *Waging the War of the Worlds*, McFarland, 2009, pp. 114–119)

1954, November 22 — 9:45 p.m. At Santa Maria Air Force Base, Rio Grande do Sul, Brazil, radio operator Arquimedes Fernandez sees a strange cloud above the trees, like an upside-down washbowl. It is a solid body 160 feet across, oscillating with a small light on top. Fernandez radios a report to weather headquarters at Porto Alegre. The object remains in view until his duty shift ends at 1:15 a.m. (Lorenzen, *FS Hoax*, pp. 51–52; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, pp. 28–29)

1954, November 23 — Afternoon. A UFO follows three 10-year-old girls (Anne Storedal, Tora Storedal, and Tora Moy Haugo) returning home from school in Torpo, Viken County, Norway. It descends and hovers only 3 or 4 feet away from them. It is round, about 10 feet in diameter, and the bottom is black, trimmed with yellow spots which could have been lights, with a number of small "red jags." The upper part is a transparent dome; a man who is operating controls is visible inside. He wears black trousers, a black jacket, and immense red goggles over his eyes. He stares at one of the girls. When the craft ascends it collides with a high-tension power line making a shower of sparks, and the girls run away. They notice a smell "like fried sausages." A "streak" is found in the snow, apparently left by the craft having brushed the surface of the ground. (Oddvar J. Larsen, "Were the Flying Saucers in Norway Real?" *Sir* magazine, August 1956, pp. 49, 70–72 "Remarkable Norwegian Near-Landing Case of 1954 Now Published," *CSI News Letter*, no. 19 (May 1, 1957): 16; Center for UFO Studies, HUMCAT Index 1954, p. 160; Clark III 268; Clark IV 308)

1954, November 28 — A group of peasants at Palmarito, Mérida, Venezuela, see a strange craft land. Three small-statured beings emerge from it. (Patrick Gross, URECAT, November 5, 2006)

1954, November 28 — Night. A 37-year-old medical doctor is being driven by his chauffeur along Highway 54 south of Manila in the Philippines. As he looks out the window, he notices a bright orange glow in the south at an elevation of 30°. When it appears to approach them, he tells the driver to stop the car. The object is traveling due north and continues to approach soundlessly for about 3 minutes then stops at an elevation of 45° and a distance of 8,000 feet. It is circular with a dome-shaped top and a flat bottom. It appears to be 65–70 feet in diameter and 18–20 feet high, with four evenly spaced yellow spots along the side. The color is bright orange with red flecks. After standing still for one minute, it begins moving south, then reverses direction, continues north at a constant altitude, and disappears. (NICAP, "Domed Disc Stops, Reverses Course"; Sparks, p. 222; Olsen, sec. 3, p. 39)

1954, November 29 — 2:00 a.m. Meat merchants José Ponce and Gustavo Gonzáles are driving a panel truck along Calle Bella Vista in Petare, Caracas, Venezuela. They find their way blocked by a 10-foot-wide, glowing ball hovering 6 feet above the street. When they get out to investigate, they are confronted by a dwarfish creature covered with stiff, bristly hair. Gonzáles grabs it, but it tosses him to one side. Two more dwarfs, gathering dirt and rocks nearby, approach. Ponce sees them and runs to find a police station. Gonzáles recovers in time to see two of the entities climb through an opening in the UFO. The third comes toward him, claws extended, and Gonzáles tries to stab it in the shoulder with his knife, but the blade glances off. One of the dwarfs inside the UFO points a tube at Gonzáles that emits a brilliant beam of energy. He is paralyzed and temporarily blinded but manages to stagger to the police station. A doctor at the emergency room at Esquina de Sálas hospital treats an abrasion on Gonzáles's left side. Other witnesses to a UFO in the area come forward. ("Petare, Venezuela," *APRO Bulletin* 3, no. 3 (November 15, 1954): 11; Mary Louise Edgar, "Ex-Wacoan in Venezuela Relates Saucer Saga There," *Waco (Tex.) Tribune-Herald*, February 13, 1955, p. III-7; "US Press Reps Visit Caracas," *APRO Bulletin* 3, no. 5 (April 15, 1955, pp. 1–3; Keyhoe, *FS Conspiracy*, pp. 239–240; Lorenzen, *FS Hoax*, pp. 57–58; Frank Edwards, *FS Serious Business*, Bantam ed., 1966, pp. 100–102; Lorenzen, *Encounters with UFO Occupants*, Berkley Medallion, 1976, pp. 144–145; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, pp. 32–33; Michael D. Swords, "Classic Cases from the APRO Files," *IUR* 24, no. 2 (Summer 1999): 31; Patrick Gross, URECAT, November 4, 2006; Clark III 269; Clark IV 71–72, 310)

1954, December — Aviation inventor Bill Lear sees a flying disc giving off greenish light near Palm Springs, California. It hovers for 2 seconds then swiftly moves out of sight. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, p, 22)

1954, December — The US Air Force acknowledges that it is contemplating a "New type of jet aircraft, powered by a turbine larger than any now in use, [that] is expected to take off, land vertically, and be able to hover. It may cruise at 1,500 knots and have a range of 15,000 nautical miles." It speculates: "If the Soviets now have such an aircraft in operational use, would the United States air defense system be able to detect, identify, intercept and destroy a bomber or reconnaissance aircraft moving at a 1,500 knot clip at an altitude of 65,000 feet?" ("The Flying Disc," *Air Intelligence Digest* 7, no 12 (December 1954): 6+)

1954, December — Contactee Orfeo Angelucci, now working in Twentynine Palms, California, is at Tiny's Café when he meets someone named Adam, who claims to have read his book and gives him some kind of mind-altering pill. After taking the pill, Angelucci finds himself in an "exalted state" and talks freely with Adam about outer space and politics. Prior to this time, Angelucci has caught the attention of the FBI because he has been approached several times by a group of seeming left-wing agents. (Orfeo Angelucci, *The Son of the Sun*, DeVorss, 1959; Kremlin 100–107)

1954, December — Charles Laughead and his wife Lillian meet George Hunt Williamson at a lecture he is giving in Detroit, Michigan. (Zirger and Martinelli, *The Incredible Life of George Hunt Williamson*, Verdechiari, 2016, p. 103)

1954, December 1 — President Eisenhower approves the development of the Lockheed U-2 reconnaissance plane as a CIA project under the direction of Allen Dulles. (Wikipedia, "Lockheed U-2")

1954, December 2 — 2:10 p.m. A French military radar site at Ceita, Morocco, tracks a target that is also observed visually by the crew of a fighter in the air. The target is recorded for about one hour, with its altitude varying from 23.000 to 59,000 feet and speed from 6 to 137 mph. (Jacques Vallée and Janine Vallée, *Challenge to Science: The UFO Enigma*, Regnery, 1966, pp. 186–187; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 51–54)

1954, December 3 — Morning. Victoriano Maeso, Luis Brugeda, and Francisco Huertos are at Las Gastanas farm about 3 miles from Granja de Torrehermosa, Badajoz, Spain, when they hear an unusual noise and notice an object in the branches of an oak tree about 165 feet away. It is pyramid-shaped and about 8 feet high and 2 feet in diameter, with four fins and a box suspended from it by apparent ropes. They approach it, but the object rises and disappears toward the west. This observation is the first of about a dozen others reported over the next two weeks in Badajoz, Zaragoza, Teruel, Guipúzcoa, and Huelva provinces that seem to involve wayward balloons released in Germany by Radio Free Europe that carry leaflets intended to be dropped in the Soviet bloc. (Vicente-Juan Ballester Olmos and Juan Carlos Victorio Uranga, "Los ovnis de diciembre de 1954," Academia.edu)

1954, December 3 — 12:12 p.m. Sargent Prentiss Mellen, a flight instructor, and his wife Dottie are driving along Highway 49 in Gulfport, Mississippi, near the Mississippi Aluminum Company building. They see a round, flat object about 30–35 feet in diameter, hovering with an up-and-down motion, and rotating on its vertical axis at high speed. It ascends at a 10–20° angle, moving off to the east at an estimated speed of 500–600 mph. It appears to be shaped as though two plates were placed together. (NICAP, "Couple Observe Rotating Object"; Sparks, p. 222; Olsen, sec. 3, p. 39; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, pp. 44–45)

1954, December 5 — 8:15 a.m. Miguel Sevil is hunting in the Montes de Zuera north of Zaragoza, Spain, when he hears a prolonged whistle and sees a luminous, transparent object landed about 165 feet away. It has several rods protruding from it, each apparently with a propeller. Two men about 6 feet tall with blond hair and speaking an unintelligible language enter the UFO through a door on the side. It rises vertically at tremendous speed and disappears. Probable hoax. (Vicente-Juan Ballester Olmos and Juan Carlos Victorio Uranga, "Los ovnis de diciembre de 1954," Academia.edu)

1954, December 7 — A Project Blue Book memo acknowledges the many "Foreign Sightings" in Europe, but attributes the cause to an increase in "meteorite activity" and overseas translations of Keyhoe's book *Flying Saucers from Outer Space.* (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, pp. 49)

1954, December 7 — 1:15 p.m. R. H. Kleyweg, officer-in-charge of the meteorological station at Upington, Northern Cape, South Africa, is looking for a red balloon he has just released. He sees an object just east of the sun, moving slowly west, but when he begins tracking it with a theodolite, he realizes it is white, not red. It looks like a half circle with sunlight gleaming from its sloped top. He follows it for 3 minutes, but then it accelerates and he cannot keep it in sight. (UFOEv, p. 124; James E. McDonald, "Statement on Unidentified Flying Objects," in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 63)

1954, December 9 — Giovanni Aquilante, a farmer of Gricignano d'Aversa, Caserta, Italy, disappears after leaving home to work in the fields. His family and police fail to find him. On December 10, near 12:00 midnight, two of Aquilante's sons and a friend see two mysterious entities with luminous eyes in a field. They quickly vanish. Aquilante returns home on the morning of December 11, silent and shocked, and explains that he met two "dwarfs" in the field wearing multicolored suits. They float him in the air and take him to "unknown places."

They release him, but promise to come back for him later. Aquilante is terrified of being abducted again. (1Pinotti 89)

1954, December 9 — Evening. Farmer Olmiro de Costa e Rosa is feeding his animals at Linha Bela Vista, said to be 2.5 miles from Venâncio Aires, Rio Grande do Sul, Brazil, when he hears a sound like a sewing machine that causes some of his cows to run. An object shaped like an "enormous polished brass kettle" with a rectangular structure on top is hovering in the air with an oscillating motion. Two small humanoids "enveloped in a kind of yellow sack from head to toe" are standing in a nearby field. As he approaches, one runs toward him and the other raises its arm. The first one kneels down and plucks a tobacco plant from the field, then both jump into the craft, which vanishes within a few seconds. (Lorenzen, *FS Hoax*, pp. 52–53; Patrick Gross, URECAT, December 27, 2007; Clark III 268, 378; Clark IV 308, 422)

1954, December 9 — Night. Lorenzo Flores and Jésus Gómez are hunting rabbits near an unfindable town called Carera [or, alternatively, between the equally unfindable places Chico and Cerro de las Tres Torros] along the Transandean Highway in Venezuela. They run across a huge red UFO like two washbowls put together hovering above the road with flames spurting out. Four small hairy figures, 3 feet tall, scramble out and grab Gómez and try to drag him toward the craft. Flores strikes one with his gun butt, but it has no effect and feels like striking rock. The wooden rifle butt cracks from the impact. Gómez faints from fright, and both men are scratched and bruised. A passing motorist takes them to a police station, their clothes torn and skin abraded. When they tell their story to the police, it is obvious that their shirts have been shredded into ribbons. ("Hunters Clawed and Beaten," *APRO Bulletin* 3, no. 4 (January 15, 1955): 2; Lorenzen, *FS Hoax*, pp. 56–57; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, pp. 51–52; Mark Cashman, "Behavioral Classification System for UFO Occupants," *IUR* 24, no. 1 (Spring 1999): 18; Clark III 270; Clark IV 310)

1954, December 10 — An American petroleum engineer takes a photo of a formation of UFOs over El Tigre, Venezuela. ("Engineer Snaps Photo of Covey of Flying Saucers," *APRO Bulletin* 3, no. 4 (January 15, 1955): 4; Lorenzen, *FS Hoax*, p. 50; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, p. 52)

1954, December 10 — 6:30 p.m. A doctor is driving near Generalissimo Francisco de Miranda Air Base in Caracas, Venezuela, when he and his father see two little men running near the road and ducking into shrubbery. Moments later a UFO rises up from the same spot and zooms away. ("Doctor Sees Little Men, Disc," *APRO Bulletin* 3, no. 4 (January 15, 1955): 4; Lorenzen, *FS Hoax*, pp. 49–50; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, p. 52)

1954, December 14 — 11:00 a.m. Three bright lights appear in the sky above Curitiba, Paraná, Brazil. Around 12:00 noon, they descend to a lower altitude, and witnesses see they are metallic discs. The Brazilian Air Force scrambles some jets, but they fail to intercept any of the objects. By 1:00 p.m., several groups of witnesses around the city are watching when two of the objects take off to the south, while the third comes closer and approaches some buildings in the city center. Chief of Police Col. Carlos Assunção sees a "reddish and slightly bluish object" moving at incredible speed. Maxim Cicaida, a professional photographer for Foto Heisler, snaps a photo of the disc above a building. He sends the negatives to the Brazilian Naval School in Rio de Janeiro, but they are never returned, and no analysis is released. (Brazil 29–31)

1954, December 15 — A man is fishing in a river near Campo Grande, Mato Grosso do Sul, Brazil, when he sees an unusual object landing a few hundred feet away. His dog gets nervous and begins to howl. He uses his telescopic gunsight to get a closer look. He sees two spheres of different sizes, the smaller one revolving around the larger one, which is about 6 feet above the ground and has three balls attached to its underside. Soon he sees small beings come down from the large object, moving rapidly. One is holding a phosphorescent bucket, and another has a metallic tube that is cone-shaped at one end. They use these tools to collect calcareous soil from the riverbank. They take two buckets' worth inside the craft, which then takes off. The witness later finds square-shaped holes in the riverbank. Col. Adil de Oliveira of the Brazilian Air Force has the soil analyzed and it yields a composition of 61% silica, 19% aluminum oxide, 11% magnesium and iron, with other trace elements. (Lorenzen, *Flying Saucer Occupants*, Signet, 1967, pp. 195–196)

1954, December 15 — Asked about UFOs at a press conference, Eisenhower says that no reports have come to him, "either verbally or in written form," and it is "completely inaccurate to believe that they came from any outside planet or otherwise." Immediately after the press conference, Eisenhower asks for a full briefing on UFOs. ("The President's News Conference," December 15, 1954; "President Discounts 'Saucer' from Space," *New York Times*, December 16, 1954, pp. 1, 26; Keyhoe, *FS Conspiracy*, p. 238; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, p. 62)

1954, December 16 — Jésus Paz, Luis Mejia, and another young man are driving home after dinner at a restaurant in San Carlos, Venezuela, when Paz stops to relieve himself in a park. He claims he is jumped by a hairy dwarf from a flying disc (both of which his friends see when he screams). His friends rush the unconscious Paz to a hospital. ("In Venezuela: Hairy Dwarves!" *APRO Bulletin* 3, no. 4 (January 15, 1955): 1–2; "Little-Men Visited Venezuela," *Flying Saucers* (CSI NZ) 2, no. 4 (March 1955): 17; Keyhoe, *FS Conspiracy*, pp. 242–243; Lorenzen, *FS Hoax*, pp. 50–51; Gordon Creighton, "The Humanoids in Latin America," in Charles Bowen, ed., *The Humanoids*, special issue of *FSR*, Oct./Dec. 1966, p. 35; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, p. 60; Mark Cashman, "Behavioral Classification System for UFO Occupants," *IUR* 24, no. 1 (Spring 1999): 18)

1954, December 19 — 11:00 p.m. José Parra, an 18-year-old jockey, watches a disc-shaped UFO land in Valencia, Venezuela. Six 3-foot-tall humanoids disembark and set about collecting vegetation samples and loading stones into the disc. When he tries to approach them, he is paralyzed by a violet beam aimed at him by one of the creatures. All the short beings enter the craft and it takes off. The UFO leaves behind ground traces. ("'Little Men' Fail in Kidnap Attempt!!" *APRO Bulletin* 3, no. 4 (January 15, 1955): 3; Keyhoe, *FS Conspiracy*, p. 243; Gordon Creighton, "The Humanoids in Latin America," in Charles Bowen, ed., *The Humanoids*, Special Issue 1 of *FSR*, Oct./Nov. 1966, p. 35; Patrick Gross, UFOCAT, November 24, 2006; Clark III 270; Clark IV 310)

1954, December 20–21 — A group of Dorothy Martin's followers has gathered at her Oak Park, Illinois, home to await the midnight arrival of a flying saucer that is to rescue them from planetary disaster. Charles and Lillian Laughead are already there, having moved in recently. The followers have left jobs, college, and spouses, and given away money and possessions to prepare for their departure. When no spaceman arrives, the group sits in stunned silence. Martin begins to cry, and at 4:45 a.m. she receives a message by automatic writing saying that the God of Earth has decided to spare the planet from destruction. The cataclysm has been called off: "The little group, sitting all night long, had spread so much light that God had saved the world from destruction." The group begins an urgent campaign to spread its message to a broader audience. (Wikipedia, "*When Prophecy Fails*"; "Doctor Denies Predicting End of World; Only Expects Upheavals," *Danville (Pa.) Times*, December 17, 1954, p. 8; Robert Schultz, "Prophet Awaits Flood, Saucer Men Promised," *Binghamton (N.Y.) Press and Sun-Bulletin*, December 19, 1954, p. 6; Leon Festinger, Henry Riecken, and Stanley Schachter, *When Prophecy Fails*, University of Minnesota, 1956; Clark III 718–719; Eghigian, *After*, p. 182; Clark IV 787)

1954, December 26 — Australian physicist O. H. "Harry" Turner has been tasked with reviewing UFO reports in the RAAF files and writing an assessment for the Australian Directorate of Air Force Intelligence. Now in England, he sends the report to the Secretary, Department of Air, in Melbourne, Victoria. He writes: "If one assumes these Intelligence reports are authentic, then the evidence presented is such that it is difficult to assume any interpretation other than that unidentified flying objects are being observed…. Indeed, the superiority is such that it is highly improbable that such objects have a terrestrial origin… the evidence presented by the reports held by the RAAF tend to support the above conclusion—namely that certain strange aircraft have been observed to behave in a manner suggestive of an extra-terrestrial origin." Turner goes on to recommend appointing at least one full-time investigator; publicity to encourage more people to report sightings; a liaison with the USAF to exchange information and verify Keyhoe's claims; liaison with the RAF and the possibility of forming a panel to assist in analyzing reports. The Director of RAAF Intelligence checks with USAF on the reliability of Keyhoe's work, and they ultimately reject it as impractical and unjustified. (Project 1947, "The Former Air Board / Department of Air / Current RAAF"; Bill Chalker, "UFOs Sub Rosa, Down Under: The Australian Military and Government Role in the UFO Controversy," 1996; Bill Chalker, "Harry Turner and UFOs," The Oz Files, March 30, 2022; Coulthart 2023, pp. 43–44)

1954, December 26 — 8:30 p.m. Willis St.-Jean, a hoistman at the Agaunico Mine on the shore of Lake Timiskaming northeast of Cobalt, Ontario, sees a bright white light maneuvering in the sky. He calls John Hunt, a reporter at the *North Bay Nugget* office in Cobalt, to drive 3 miles to the mine to view it. The light is emanating from a large, rotating, slightly wedge-shaped disc. They watch the object for an hour after he arrives there. It circles, moves away, dances in the sky, disappears (apparently when it banks), and returns repeatedly, and at one point it flies over the lake, illuminating the surface. It disappears for good shortly after 10:15 p.m. (John Hunt, "Reporter Sees 'Saucer' over Cobalt Mine," *North Bay (Ont.) Nugget*, December 27, 1954, p. 1)

1954, December 27 — Elizabeth Klarer, having been alerted by her sister May that the local Zulu people are reporting appearances of a mythical lightning bird in the sky, travels from Johannesburg, South Africa, with her children to a hill southwest of Rosetta, KwaZulu Natal, that she later calls Flying Saucer Hill. There she claims to see a star ship descend and hover 8 feet above the ground, emitting a soft hum. Its hull is spinning, though its central dome remains stationary. The friendly extraterrestrial Akon, with whom she has been in telepathic contact, is clearly visible through one of three portholes, but a blast of heat emanating from the ship prevents her from approaching.

The UFO leaves by shooting high into the sky. (Elizabeth Klarer, *Beyond the Light Barrier*, Howard Timmins, 1980; Clark III 657; Clark IV 732)

1954, December 28 — The NSC 5412/2 Special Group, often referred simply as the Special Group, is an initially secret, but later public, subcommittee of the US National Security Council responsible for coordinating government covert operations. Presidential Directive NSC 5412/2 assigns responsibility for coordination of covert actions to representatives of the Secretary of State, the Secretary of Defense, and the President respectively. All proposals pass through the Special Group on the way to Richard Helms at the CIA, who is responsible for covert operations. It changes names several times to avoid public exposure. In 1964, it is known as the 303 Committee, and in 1970 it is renamed the 40 Committee. Within this organization—which includes such familiar names as Nelson Rockefeller, Robert McNamara, McGeorge Bundy, Gordon Gray, and Allen Dulles—is a subcommittee dealing with science and technology. It is here that the connection between the corporate and financial world and government-held technological secrets can be found. (Wikipedia, "Oversight of United States covert operations"; Gregory W. Pedlow and Donald E. Welzenbach, *The Central Intelligence Agency and Overhead Reconnaissance: The U-2 and OXCART Programs, 1954–1974*, CIA History Staff, 1992, p. 188)

1954, December 30 — Fifty residents of Lima, Peru, watch a flight of 5 iridescent silver UFOs for at least 5 minutes. (*La Nación* (Lima, Peru), December 31, 1954; "Flying Saucers," *Hartford (Conn.) Courant*, January 1, 1955, p. 1; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, p. 78)

1955

1955 — Project Rover, a US project to develop a nuclear-thermal rocket, is initiated at the Los Alamos Scientific Laboratory, New Mexico, and runs until January 1973. It begins as an Air Force project to develop a nuclear-powered upper stage for an intercontinental ballistic missile. The project is transferred to NASA in 1958 after the Sputnik crisis. It is managed by the Space Nuclear Propulsion Office, a joint agency of the Atomic Energy Commission and NASA. Project Rover becomes part of NASA's Nuclear Engine for Rocket Vehicle Application (NERVA) project and henceforth deals with the research into nuclear rocket reactor design, while NERVA involves the overall development and deployment of nuclear rocket engines and the planning for space missions. (Wikipedia, "Project Rover"; Wikipedia, "NERVA"; Jacobsen, *Area 51*, pp. 303–312)

1955 — The US nuclear stockpile totals 2,422 bombs. (Ryan Crierie, "U.S. Nuclear Stockpile, 1945–2009")

1955 — An informant of Charles Wilhelm claims that, while working at the Foreign Materials Division at Wright-Patterson AFB near Dayton, Ohio, she is assigned the duty of cataloging all incoming UFO material. She processes approximately 1,000 items, including objects from the interior of a recovered UFO brought to the base. All items are photographed and tagged. At the time, she also witnesses two dead humanoid bodies being conveyed by cart from one room to another. The bodies, preserved in chemicals, are 4–5 feet tall, large heads in relation to their bodies, and slanted eyes. (Leonard H. Stringfield, "Retrievals of the Third Kind, Part 2," *Flying Saucer Review* 25, no. 5 (Sept./Oct. 1979): 6, 8)

1955 — Otis T. Carr founds OTC Enterprises in Baltimore, Maryland, to advance and supply technology originating from ideas of Nikola Tesla. Carr claims he met Tesla while working as a night clerk in New York City's Hotel Pennsylvania, where Tesla was living in the late 1920s. Tesla befriended Carr and revealed to him secrets he was not ready to make public yet. Carr attracts the funding of local businessman Wilfred C. Gosnell. Soon he hires a promotions man named Norman Evans Colton and sends out regular information bulletins to investors. (Clark III 860; Clark IV 947)

1955 — After selling his share of *Fate* magazine to Curtis and Mary Margaret Stiehm Fuller, Ray Palmer founds a would-be competitor, *Mystic* (later *Search*) and several short-lived SF titles. *Other Worlds* evolves in 1957 into *Flying Saucers*, a more or less nonfiction magazine that features articles of widely varying credibility and a column of saucer fan-club news. (Clark III 873; Clark IV 967)

1955 — George Adamski's *Inside the Space Ships*, ghostwritten by Adamski follower Charlotte Blodget, is published by Abelard Schuman in the United States and Foster and Scott in Canada. Adamski claims that Orthon arranged for him to be taken on a trip to see the Solar System, including the planet Venus, the location where Orthon said the late Mary Adamski had been reincarnated. He claims that in another voyage he met the 1,000-year-old "elder philosopher of the space people," who is called "the Master." Adamski says he and the Master discussed philosophy, religion, and the "Earth's place in the universe." Adamski learns that he has been selected by Nordic aliens to bring their message of peace to Earth people and that other humans throughout history have also served as their messengers, including Jesus Christ. Adamski further claims that aliens are peacefully living on Earth, and

that he has met with them in bars and restaurants in Southern California. (George Adamski, *Inside the Space Ships*, Abelard-Schuman, 1955; David Stupple, "The Man Who Talked with Venusians," *Fate* 32, no. 1 (January 1979): 30–39; Lou Zinsstag and Timothy Good, *George Adamski: The Untold Story*, Ceti, 1983; Clark III 40; Clark IV 59)

1955 — Andrew P. Tomas makes the remnants of Edgar Jarrold's Australian Flying Saucer Bureau into a New South Wales branch of the Australian Flying Saucer Research Society in South Australia. (Clark IV 1270)

1955 — Siegfried Schöpfer, a science teacher in Esslingen am Neckar, Germany, writes a pamphlet on UFOs, dismissing all reports as hysteria and delusions. (Siegfried Schöpfer, *Fliegende Untertassen: Ja oder Nein?* Hädecke, 1955; Eghigian, *After*, p. 105)

Early 1955 — A secure test site is needed for the CIA Project Aquatone (the Lockheed U-2 spy plane). Lockheed test pilot Kelly Johnson sends project pilot Tony LeVier and Skunk Works chief foreman Dorsey Kammerer on a two-week survey mission to scout locations for a new base in an unmarked Beechcraft V-35 Bonanza. CIA official Richard M. Bissell Jr. reviews 50 potential sites with USAF liaison Col. Osmond J. Ritland. None seem to meet the stringent requirements of the program. They reject Johnson's proposed Site I (Mud Lake?) because it is too close to populated areas. Ritland recalls a "little X-shaped field" just off the eastern side of Groom Lake, Nevada, just outside the AEC nuclear proving ground at Yucca Flat. (Peter W. Merlin, "Area 51 Timeline," Secret Heroes, November 10, 2021)

1955, January — George King gives the first public demonstration of his contacts with the Cosmic Masters in Caxton Hall, London, England. After mounting the platform, he enters a trance, and Aetherius (the Cosmic Master from Venus) reveals a plan for human peace and enlightenment. (George King, *You Are Responsible!*, Aetherius, 1961; Douglas Curran, *In Advance of the Landing: Folk Concepts of Outer Space*, Abbeville, 1985, p. 63)

1955, Early January — Dorothy Martin leaves the Chicago area for Prescott, Arizona, home of the like-minded George Hunt Williamson, after being threatened with arrest and involuntary commitment. (Clark III 719; Clark IV 787)

1955, Early January — 2:30 a.m. Snowplow operators Manuel "Swede" Erickson and Barney Thompson are driving east along the Weston-Elgin Highway toward Tollgate, Oregon, when they see an unusually bright light directly in front of them. It approaches them and grows brighter, then begins to move up and down and sideways. The light is bright enough to cast a shadow over the truck. It moves to the right through some trees and returns to the highway behind them. They turn the truck around and attempt to follow it, but it recedes. They resume traveling east, and the light follows them. They have it in sight for about 2 hours, after which it takes off down the Umatilla Canyon, stopping occasionally. They see a similar bluish light about two weeks later at about 4:00 a.m. for two nights in a row. Other witnesses turn up. ("Strange Blue Lights Reported Bouncing over Blue Mountain Area," *La Grande (Oreg.) Evening Observer*, January 28, 1955, p. 1; Fred Schneiter, "Eerie Blue Light Said Live 'Thing,'" *La Grande (Oreg.) Evening Observer*, January 29, 1955, p. 1; "Strange Light Bobbing over Blue Mt. Area," *Eugene (Oreg.) Register-Guard*, January 30, 1955, p. 8; Fred Schneiter, "Blue Light Fails to Reappear," *La Grande (Oreg.) Evening Observer*, January 31, 1955, p. 2; "Recent Sightings," *APRO Bulletin* 3, no. 5 (April 15, 1955): 7, 8)

1955, January 3 — 4:00 p.m. Félix Galarraga and Gerardo Izuesta see a red balloon-like object about 7–10 feet in diameter land near Oiartzun, Spain. Galarraga rushes towards it, but the UFO rises and speeds away. From a separate location, brothers Miguel and Martín Arraspio also see the object descend. Possibly another Radio Free Europe balloon with leaflets. (*La Vanguardia Española* (Barcelona, Spain), January 7, 1955; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, p. 4; Vicente-Juan Ballester Olmos and Juan Carlos Vistorio Uranga, "Los ovnis de diciembre de 1954," Academia.edu)

1955, January 7 — The *Air Force Information Services Letter* warns that service members are talking too much about UFOs. (Ruppelt, p. 228)

1955, January 14 — 5:30 p.m. A luminous UFO drops from the sky near Idyllwild, California. Immediately afterwards, a B-47 pilot reports to March AFB [now March Air Reserve Base] near Riverside, California, that an "unknown object just hit our wing." The pilot guides the plane to a landing. No trace of a crashed object can be found. (Keyhoe, *FS Conspiracy*, pp. 247–248)

1955, January 24 — A message from the US Air Attaché in Afghanistan to ATIC at Wright-Patterson Air Force Base near Dayton, Ohio, mentions the "reported landing of a flying saucer" near the town of Takala [according to the coordinates, near the modern village of Bayram in Baghlan Province]. It is supposedly metallic, 49 feet in circumference, with small glass windows around the leading edge. (USAIRA Afghanistan to COMATIC WPAFB Ohio, [communication], January 26, 1955; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History, 1956, January–April*, The Author, 1993, pp. 17–19; Clark III 327; Clark IV 363–364)

1955, January 31 — 2:00 a.m. Peruvian Air Force Commander Guillermo Serpa and Col. Juan Rodriguez Cavero are returning to El Pata Air Force Base near Talara, Peru, by car through the Sechura Desert on the Pan-American Highway 1N when they see a bright light in the sky ahead. The object, a deep red domed disc, draws nearer and Serpa stops the car to observe it. It tilts slightly toward them, making occasional clicking sounds. Several minutes later it accelerates quickly in their direction, changing to a bright orange color then to a bright white as it shoots past them at terrific speed. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs a History: 1955, January–June, Supplemental Notes*, The Author, 2002, pp. 14–18)

1955, February 1 — 7:55 p.m. Instructor Capt. Delwyn F. Ritzdorf and aviation cadet Frederick W. Miller are flying a TB-25 bomber-trainer about 20 miles east of Cochise, Arizona, at 13,000 feet and 238 mph when they see a bright round object with red and white hues. It approaches them then hovers off the left wing for 5 minutes about 5° above the horizontal. Radio interference prevents Ritzdorf from reporting the sighting. The object climbs rapidly on a parallel flight track for 3 minutes before pulling away at 500–600 mph and disappearing. (NICAP, "Huge Metallic Disc Paces B-25")

1955, February 2 — Aviation inventor Bill Lear, during a press conference in Bogotá, Colombia, states his belief that "flying saucers came from outer space and are piloted by beings of superior intelligence." He suspects that they might use gravitational fields as propulsion. (Keyhoe, *FS Conspiracy*, pp. 250–251; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, p. 18)

1955, February 2 — 11:15 a.m. A Venezuelan Aeropostal airliner piloted by Captain Dario Celis is flying between Barquisimeto and Valera, Venezuela, at 7,500 feet. Celis and his copilot B. J. Cortes spot a strange, round "apparatus" flying swiftly toward the plane. Rotating counterclockwise, the object shines with a greenish light. Around its center is a red ring or band that emits flashes of brilliant light. Above and below this band are lighted portholes. Hurriedly the pilot cuts in his mike to call the Barquisimeto radio station. After reporting the UFO, he waits for an answer, but the receiver is dead. Later the radio operators state that just as the pilot began his report, communication is cut off. The copilot banks toward the rotating UFO. Instantly the object whirls downward, then levels off, and races away at tremendous speed. (NICAP, "Plane Encounters Saucer and Radio Goes Dead"; Keyhoe, *FS Conspiracy*, pp. 249–250)

1955, February 6 — Several witnesses in Greymouth, New Zealand, see a dazzling, silvery, cigar-shaped object moving inland at a high speed. Two observers see it consisting of two parts, with the leading part larger than the other. A loud explosion like a thunderclap is heard, causing the earth to tremble slightly. ("World Roundup," *Flying Saucer Review* 1, no. 2 (May/June 1955): 8)

1955, February 10 — 9:30 p.m. Many residents of Caracas, Venezuela, see a strange object crossing the sky silently from northeast to southwest. José Agustín Díaz in Altamira clocks its time as 6–8 minutes. It looks like a disc with two bright, pulsating, bluish lights on the underside. ("On February 10," *APRO Bulletin* 3, no. 5 (April 15, 1955): 9; Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 64; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, p. 23; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June, Supplemental Notes*, The Author, 2002, p. 27)

1955, February 13 — Midnight. A green fireball shoots across east Texas like a "huge electric arc," passing from Tyler towards Lufkin. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, p. 24)

1955, February 15 — ATIC sends a memo to Maj. Joseph A. Cybulski, commander of the 4602nd AISS at Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, complaining about the high number of unknowns. It suggests that AISS and ATIC "strive to reach as many case solutions as possible, thereby reducing the percentage of the unknowns to a bare minimum." As long as there is sufficient information, most cases "will fit to some extent one of the hypotheses." The Air Force changes its earlier classification (identified, insufficient data, unreliable, or unknown) by broadening the identified category to include probable and possible. In its final statistics, Blue Book lists these sightings as simply identified. (Maj. T. G. Connair Jr., "Evaluation of Unidentified Flying Objects," February 15, 1955, in CUFON, "4602d AISS Unit History Sampler, Part 7 of 7 Parts"; Jacobs, *The UFO Controversy*, Signet ed., 1976, p. 119; Clark III 918; Clark IV 1029)

1955, February 18 — The nuclear Teapot Wasp test takes place at the Nevada Test Site. Ground forces take part in Exercise Desert Rock VI, which includes an armored task force *Razor* moving to within 3,000 feet of ground zero, under the still-forming mushroom cloud. (Wikipedia, "Operation Teapot")

1955, February 21 — Early morning. "Cobwebby gray fibers" fall in Horseheads, New York, covering one-half square mile. Some "ragged sheets" are many feet in length. Chemist Charles B. Rutenber of Elmira College in Elmira, New York, describes it as "badly damaged, slightly radioactive cotton fiber" that might have come from a Nevada atomic test. He concludes it is a "short-staple cotton, possibly lint from waste cotton used in industrial plants."

John B. Diffenderfer, a chemist at a local Westinghouse laboratory, finds it is 30% carbon, with calcium, silica, aluminum, iron, and 10 other trace elements. He thinks it comes from powdered milk residue, perhaps from the Dairylea milk processing plant in Elmira. But milk plant chemists Louis R. Hermani and Robert L. Mix say the material is composed of "cotton and wool fibers with pieces of fine copper wire mixed in" and looks like it comes from a carpet sweeper bag. ("Further Tests Made of Fibers Collected in Horseheads Area," *Elmira (N.Y.) Star-Gazette*, February 23, 1955, p. 13; Brian Boldman, "Angel Hair Physical Analyses: A Review," *JUFOS* 9 (2006): 101–102)

1955, February 23 — 8:30 a.m. Frederick S. Briggs, a bricklayer and former army sergeant employed at Broadlands, Romsey, Hampshire, England, the manor then owned by Lord Mountbatten, Prince Philip's uncle, sees a large disc-shaped UFO over a nearby meadow as he is bicycling to work. The object is shaped like a spinning top, metallic, and about 20–30 feet in diameter with portholes around the center. Watching from less than 100 yards away, Briggs estimates that the object is 80 feet above the ground. He sees a humanoid figure dressed in what look like overalls and a helmet descend from the craft on some sort of column with a platform at the bottom. He is then dazzled by a bright blue light from the craft and falls over, unable to move, as if held by a strange force. The UFO then flies off at high speed. Mountbatten takes a personal interest in this incident, interviews Briggs, and searches the area of the meadow over which the UFO is seen. He subsequently has a statement prepared, detailing Briggs's claims. This story is written up by Desmond Leslie in *Flying Saucer Review* in 1981. Mountbatten's signed statement on the incident is held with many of his other private papers at the Broadlands Archive. (Desmond Leslie, "Did Flying Saucers Land at Broadlands?" *Flying Saucer Review* 26, no. 5 (January 1981): 2–4; Good Above, pp. 40–42, 451–454; Colin Bennett, *Looking for Orthon*, Paraview, pp. 162–164; Patrick Gross, URECAT, February 7, 2008)

1955, March — Technician and businessman Morris K. Jessup publishes *The Case for the UFO*, the first book to use the relatively new US Air Force term "UFO" instead of flying saucer. He engages in speculation about Fortean phenomena, ancient astronauts, levitating forces to explain megalithic structures, and experiments in ancient times with flight and even space flight. He identifies 1877–1887 as an "Incredible Decade," in which astronomers observe strange space objects, and meteorologists note strange falls from the sky. He speculates that mysterious disappearances of ship crews might constitute a curiosity among "our space friends" on "what has happened to us since they put us down here." (Morris K. Jessup, *The Case for the UFO*, Citadel, 1955; Story, p. 51; Clark III 463, 634; Clark IV 508, 696)

1955, March — James S. Rigberg, owner of the Flying Saucer Bookstore in New York City, begins publishing *Flying Saucer News* as the official publication of the Flying Saucer News Club of America, founded in 1953. It is published twice a year until at least May 1982. (*Flying Saucer News* 1, no. 1 (March 1955))

1955, March — The CIA obtains quantities of *Hemophilus pertussis*, whooping cough bacteria, from Fort Detrick in Frederick, Maryland. The agency field tests it covertly along Florida's Gulf Coast. The incidence of whooping cough triples this year, but the CIA's role remains unknown until 1979. (Bill Richards, "Report Suggests CIA Involvement in Fla. Illnesses," *Washington Post*, December 17, 1979)

1955, March 1 — The Douglas Aircraft Company is conducting a study of "Unconventional Propulsion Schemes/Systems" for the USAF Air Technical Information Center from 1954 to 1955, headed by Wolfgang Klemperer, who writes a memo to E. P. Wheaton that says: "Our studies of the possible merit or significance of occasionally appearing publications concerning Unconventional Propulsion Systems have been carefully continuing since the first memo (MTM-622) about the progress to mid-December 1954." Apparently the project examines some Project Blue Book UFO reports (including Willis Sperry's) and UFO books, concluding that the objects use multi-dimensional physics for propulsion. (Douglas Aircraft Company, "Unconventional Propulsion Schemes," MTM-622, March 1, 1955; Keith Basterfield, "Aerospace Companies and UFOs 3," Unidentified Aerial Phenomena—Scientific Research, January 23, 2010; Michael Salla, "Secret History of RAND Corporation in Reverse Engineering Antigravity UFOs, Part 1," Secret Space Programs, September 2016; Keith Basterfield, "Documents Located from that 1955 'Secret' UAP Study by Douglas Aircraft Company," Unidentified Aerial Phenomena—Scientific Research, January 11, 2019; Keith Basterfield, "Which Aerospace Company Is Hiding a UAP Black Project?" Unidentified Anomalous Phenomena—Scientific Research, August 28, 2021)

1955, March 11 — Douglas Clarke sees a circular object with a glowing rim over Bexleyheath, London, England. From his bedroom, he notices the object and steps onto a ledge to observe it. The object moves from the northwest toward Dartford to the southeast, then turns around and returns before disappearing in the north. He estimates it to be at 500 feet altitude. ("World Roundup," *Flying Saucer Review* 1, no. 2 (May/June 1955): 6, 7)

1955, March 11 — 7:50 p.m. Lawrence Grab and his son see a brilliant flash of light from their home at 714 West Lakeside Street in Madison, Wisconsin, then watch a phosphorescent object speed over the city from southwest to

northeast. ("Season's First Saucer Flies in at High Speed," Madison *Wisconsin State Journal*, March 12, 1955, p. 7)

1955, March 12–13 — George Van Tassel's second Giant Rock Interplanetary Spacecraft Convention in the Mojave Desert near Landers, California, attracts a smaller crowd than the first. This time George Adamski is in attendance, along with Charles Laughead, Dorothy Martin, George Hunt Williamson, Dana Howard, Daniel Fry, Truman Bethurum, and Dick Miller. Retired USAF Project Blue Book head Edward J. Ruppelt is in the audience and writes up a report. ("Six Claim Rides on Interplanetary Ships," *Los Angeles Times*, March 13, 1955, pp. 3, 4; Frank W. Scully, "Whoppers at Giant Rock," *Nexus* 2, no. 5 (May 1955): 9; Daniel W. Fry, "The Second Annual Spacecraft Convention," *Saucers* 3, no. 2 (June 1955): 6–8; Edward J. Ruppelt, "Among the Contactees," *IUR* 19, no. 4 (July/Aug. 1994): 3–6, 23–24; Clark III 531; Powell, *Keyhoe*, 157–158; Clark IV 581–582)

1955, March 15 — The 4602nd AISS guide to investigating UFOs is complete and gets distributed to appropriate personnel. The new methods of investigating and classifying cases results in a drop of the percentage of the unknowns from 60% in August 1954 to 5.9% in 1955 and 0.4% in 1956. (4602d AISS, "UFOB Guide," in *History of 4602d Air Intelligence Service Squadron*, vol. 1, January 1–June 30, 1955, reprinted in CUFON, "4602d AISS Unit History Sampler, Part 6 of 7 Parts"; Jacobs, *The UFO Controversy*, Signet ed., 1976, pp. 119–120)

1955, March 24 — 2:30 p.m. The pilot of a private Beechcraft plane is flying at 1,500 feet with a student in the Ryukyu Islands, Japan. They see a domed disc with three windows about 900 feet on their left that appears to change color from white to orange and back again. Over the next few minutes, the object flies over, in front of, and under the airplane. When the pilot puts the plane into a dive, the craft stays with it. The plane's instruments stop working. The pilot makes a steep right turn but the object still paces the plane. When the Beechcraft's engine begins to stall, the pilot calls Naha Airport on Okinawa, which alerts the US Kadena Air Base. Two jets are scrambled, but by the time they arrive the object is long gone. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 65–66)

1955, March 29? — Early morning. A bus driving past Wright-Patterson AFB near Dayton, Ohio, sees a silver, triangular object hovering above the base for 15 minutes. ("Sightings," *APRO Bulletin*, August 1955, p. 9)

1955, Spring — *Flying Saucer Review* is launched in London, England, as a small-circulation quarterly, with aviation journalist and former RAF pilot Derek Dempster as its first editor. (*Flying Saucer Review* 1, no. 1 (Spring 1955); Denis Montgomery, "How It All Began: Founding the *Flying Saucer Review*," May 5, 2004; Clark III 498; Eghigian, *After*, pp. 112–114; Clark IV 547)

1955, Early April — Pentagon press officer Capt. Robert White writes to Claude H. Marck Jr., an interested citizen in Colorado, that Dewey Fournet's motion studies project was a personal endeavor, that the probability of UFOs being spacecraft is "extremely remote," and that the Air Force does not try to influence public opinion on the matter. (Swords 209–210)

1955, April — U-2 project director Richard M. Bissell Jr. secures a presidential action adding the Groom Lake area in Nevada to the AEC proving grounds for CIA use. Kelly Johnson meets with CIA officials in Washington, D.C., and discusses progress on Project Aquatone, proposing to use the name "Paradise Ranch" for the new base. (Peter W. Merlin, "Area 51 Timeline," Secret Heroes, November 10, 2021)

1955, April 5 — 9:55–10:15 a.m. Three or four fireballs fall in various places in southern New Mexico. Air Force Sgt. Camilla Saenz is stationed on Sacramento Peak near Cloudcroft when she sees a yellow fireball with a red tail traveling fast from east to west on the south side of the peak. An airplane from Biggs Air Force Base [now Biggs Army Airfield] in El Paso, Texas, sees an apparent meteor strike near Weed, New Mexico, but USAF planes comb the area for 2 hours afterward without finding anything. Bill Watson sees a dark object smash into the earth near Oil Center, New Mexico, but he can find no fragments. Lincoln LaPaz reports that heavy shortwave and TV interference accompany the appearance of the fireballs. ("Fireballs Shower on State," *Alamogordo (N.Mex.) Daily News*, April 6, 1955, p. 1)

1955, April 5 — Producer Ivan Tors debuts *Science Fiction Theatre*, a science fiction anthology TV series that presents scientifically plausible stories in an unsensational manner. Many episodes deal with UFO or alien themes, including the season opener, "Beyond," in which a test pilot bails out and loses his plane because he thinks he's going to crash into a UFO. The program runs 78 episodes through 1957 and is hosted by veteran announcer Truman Bradley. Each episode opens with Bradley on a laboratory set, sometimes quoting from a recent *Scientific American* article, and he discusses and demonstrates a scientific principle that plays a role in the story he is introducing. (Internet Movie Database, "Science Fiction Theatre"; Charles Lee Jackson II, "Science Fiction Theatre," *Filmfax*, no. 17 (November 1989): 36–43, 85–87; Martin Grams Jr., *Science Fiction Theatre: A History of the Television Program, 1955–57*, McFarland, 2011; Curt Collins, "The UFO Message of *Science Fiction Theatre*," The Saucers That Time Forgot, January 18, 2019)

1955, April 6 — Night. Three unusual green fireballs pass over New Mexico. Radio and TV interference are reported over a wide area. ("Green Fireballs Strike: Target New Mexico! Alarmed Air Force Takes Action," *CRIFO Newsletter* 2, no. 2 (May 6, 1955): 1; Keyhoe, *FS Conspiracy*, pp. 264–265)

1955, April 8 — 9:30 a.m. Four members of the Ground Observer Corps in Rockford, Illinois, witness a UFO near their post and send in a report to the Filter Center in Chicago. Within minutes, jets are scrambled on an intercept mission and reportedly fire on the mysterious object, causing it to explode. Before the explosion, however, the GOC observers see a smaller round object shoot out of the side of the parent device. In horizontal flight it passes the jets, then turns on edge and disappears straight up into the sky. Civil Defense Director John C. Gregory in Rockford, reports the object is said to be a quarter-mile in diameter. (NICAP, "Silver Disc Shot Down over Rockford"; "U.S. Jets Fire on UFO," *CRIFO Newsletter* 2, no. 3 (June 3, 1955): 2–3; "The Rockford, Illinois Incident: More Evidence," *CRIFO Orbit* 2, no. 4 (July 1, 1955): 3; "Official Postscript to the Rockford Incident," *CRIFO Orbit* 2, no. 5 (August 5, 1955): 2; Lewis Barton, "If It Moves—Shoot," *Flying Saucer Review* 1, no. 3 (July/Aug. 1955): 11; "Readers' Questions," *UFO Investigator* 1, no. 8 (June 1959): 8)

1955, April 8 — 7:15 p.m. Dominic Sondy is looking west through his front door at Roseville, Michigan, when he sees a white bar in the sky that appears sharp, rigid, and frosted. The ends are square, and the length of the object is perfectly straight. It fails to disintegrate after 5 minutes, as a vapor trail would. The object starts to move from the northeast to the southwest, against the wind, while changing its apparent angle. He calls Frank Gallagher, who lived a short distance away, and Gallagher can also see the object. They watch it for about 20 minutes before it vanishes over the horizon. ("The Rockford, Illinois Incident: More Evidence," *CRIFO Orbit* 2, no. 4 (July 1, 1955): 3)

1955, April 8 — 9:25 p.m. Three residents of Albuquerque, New Mexico, watch a blue-green fireball streak west over the city. It appears to have a rose-orange tail. ("Fire Balls Again Seen over City," *Albuquerque Journal*, April 9, 1955, p. 1)

1955, April 22 — Morning. Bryant and Helen Reeve are in Joshua Tree, California, when they see a large, cigar-shaped, silvery-white object moving above some mountains to the north. They try to chase after it in their car, but it moves away. (Bryant and Helen Reeve, *Flying Saucer Pilgrimage*, Amherst Press, 1957, pp. 86–87)

1955, April 25 — 1:00–1:30 a.m. Residents and motorists see a brilliant fireball streak across the sky above Council Bluffs, Iowa. State Highway Patrolman John Ebert says the light was as bright as an arc welder. One resident sees the light burst into flame and drop to earth. Witnesses in Nebraska think the fireball descends abut 3 miles southeast of Waverly, Nebraska. ("Sky Lights Up," *Council Bluffs (Iowa) Nonpareil*, April 26, 1955, p. 1; "Meteor May Have Fallen near Waverly," *Norfolk (Nebr.) Daily News*, April 25, 1955, p. 1; "Travelers Sight Probable Meteor in Area Southwest of Lincoln," *Fairbury (Nebr.) Daily News*, April 25, 1955, p. 1; Nukes 93)

1955, April 29 — Dana Howard is attending a séance by medium Bertie Lillie Candler at the Church of Divine Light in Los Angeles, California, when an 8-foot-tall female figure materializes and identifies herself as Diane of Venus, the same entity who had appeared to Howard in June 1939 and other times. (Dana Howard, *My Flight to Venus*, Willing, 1954; Dana Howard, *Diane: She Came from Venus*, Regency, 1955; Dana Howard, *Over the Threshold*, Llewellyn, 1957; Mark Russell Bell, "The Remarkable Books of Dana Howard," Metaphysical Articles, April 5, 2022; Eghigian, *After*, p. 139)

1955, April 30 — A member of the Soviet Academy of Sciences tells a radio audience that UFOs do not exist. (Ruppelt, pp. 238–239)

1955, May — 15-year-old Jacques Vallée and his mother see a "gray, metallic disc with a clear bubble on top" hovering above a church in Pontoise, France. (Jacques Vallée, *Forbidden Science*, North Atlantic, 1992, pp. 15–16)

1955, May 4 — A survey team arrives at Groom Lake, Nevada, and lays out a 5,000-foot north to south runway on the southwest corner of the lakebed and designates a site for a base support facility. The "Ranch" initially consists of little more than a few shelters, workshops, and trailer homes in which to house its small team. In a little over three months, the base consists of a single paved runway, three hangars, a control tower, and rudimentary accommodations for test personnel. The few amenities include a movie theater and volleyball court. There is also a mess hall, several wells, and fuel storage tanks. (Wikipedia, "Area 51"; Peter W. Merlin, "Area 51 Timeline," Secret Heroes, November 10, 2021)

1955, May 4 — Afternoon. Lt. Col. Edward J. Stealy, commander of the 57th Fighter Interceptor Squadron at Keflavík Airfield, Iceland, and 1stLt. Joseph Burt see 10–15 flying objects, 60–70 feet in diameter, at about 25,000 feet. They fly in loose formation for about 4–5 seconds and are traveling at a tremendous rate of speed (perhaps 1,150 mph). (NICAP, "Air Force Officers Observe 10 Maneuvering Objects"; Sparks, p. 226; Olsen, sec. 3, p. 40; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, pp. 57–58; Clark III 376; Clark IV 420)

1955, May 4 — The UK Air Ministry announces that the report in March on a five-year investigation into UFOs by the RAF has been submitted to high-ranking officers, but the results cannot be released publicly for security reasons. MP Maj. Patrick Wall asks the Under-Secretary of State for Air George Ward to confirm whether or not he would publish a report. Ward replies that only 10% of UFO reports are unidentified and that is because of lack of data. (Derek Dempster, [Editorial], *Flying Saucer Review* 1, no. 2 (May/June 1955): 1; Good Above, p. 43; David Clarke and Andy Roberts, *Out of the Shadows*, Piatkus, 2002, pp. 121, 145; UFOFiles2, p. 60–61; Isaac Koi, "UFOs in Parliament (UK)," Isaac Koi—UFOs and Parliament, 2024)

1955, May 5 — ATIC declassifies Battelle Memorial Institute's 1951–1954 study of UFOs, completed in March 1954 (or later), as *Project Blue Book Special Report No. 14* but does not release it until October 25. (*Special Report No. 14: Analysis of Reports of Unidentified Aerial Objects*, US Air Force, 1955; Clark III 929–932; Clark IV 1039–1042)

1955, May 16 — Jonathan N. Leonard, science editor of *Time* magazine, debates UFOs on NBC's *Tonight Show* where he sides with Willy Ley against Donald Keyhoe and Morris K. Jessup. ("Saucers of Yesteryear: The Link to Credulity," *CRIFO Newsletter* 2, no. 3 (June 3, 1955): 3; Morris K. Jessup, *The UFO Annual*, Citadel, 1956, p. 170)

1955, May 22 — Journalist Dorothy Kilgallen writes in the *Los Angeles Examiner* that "British scientists and airmen" have examined the wreckage of a crashed flying saucer. Her informant is a "British official of Cabinet rank," who tells her that the "saucers were staffed by small men—probably under four feet tall." *Flying Saucer Review* editor Gordon Creighton later researches this story in detail and thinks Kilgallen's source is First Sea Lord Louis Mountbatten. Some suggest that Kilgallen picked the story up at a cocktail party hosted by Mountbatten. Her story is widely dismissed as a hoax, but other events put her claims in a new light. ("U.F.O. Crash in Britain?" *Flying Saucer Review* 1, no. 3 (July/Aug. 1955): 6; Good Above, pp. 43–44; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, p. 69; Clark III 327; "'Saucer Wreckage Examined': Journalist Dorothy Kilgallen Wrote in the 1950s about Crashed UFOs," Eyes on Cinema YouTube channel, August 8, 2023; Clark IV 364)

1955, May 23–26 — At the Fifth AISS Commander's Conference at Ent AFB [now the US Olympic Training Center], Colorado Springs, Colorado, an analysis of UFOs and science fiction is presented that notes: "General public not qualified to evaluate material propounded in science fiction. Absurd and fantastic theories given credence solely on the basis of ignorance." Also, "Abnormal predisposition to attach belief to the more fanciful aspects of UFOBs, e.g. 'Flying Saucers' would tend to negate the source's reliability as a factual observer." ("Report of Fifth Commander's Conference, 23 May to 26 May 1955," in *History of 4602d Air Intelligence Service Squadron*, vol. 2, January 1–June 30, 1955, reprinted in CUFON, "4602d AISS Unit History Sampler, Part 7 of 7 Parts")

1955, May 24 — 7:48 p.m. GOC spotter Charlotte Whitecotton and another woman at Loveland, Ohio, watch four UFOs in formation pass low over their enclosure, then zoom to the north. They report the incident to the Columbus Filter Center. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, p. 71; Isabel Davis and Ted Bloecher, *Close Encounter at Kelly and Others of 1955*, CUFOS, 1978, pp. 145–146)

1955, May 25 — Around 3:30 a.m. Robert Hunnicutt is driving along the Loveland-Madeira Road in the Branch Hill area of Loveland, Ohio. At the Hopewell Road intersection, his headlights illuminate three short figures kneeling next to the road. They are grayish humanoids with a wide slit for a mouth, an indistinct nose, and normal eyes without eyebrows. The heads are hairless with prominent wrinkles on the forehead. They are wearing one-piece grayish garments. One arm seems longer than the other and the upper torso is lopsided. One of the figures is holding a rod emitting blue-white sparks. Hunnicutt gets out of the car and walks towards them. They look towards him and there is a 3-minute standoff. Hunnicutt goes to the police station and returns with Police Chief John K. Fritz. No trace of anything is found. (Stringfield, *3-0 Blue*, CRIFO, 1957, pp. 66–68; Stringfield, *Situation Red*, Fawcett Crest, 1977, pp. 115–116; Isabel Davis and Ted Bloecher, *Close Encounter at Kelly and Others of 1955*, CUFOS, 1978, pp. 138–148; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, pp. 71–73; Rob Ryder, "On the Trail of the Loveland Frogman," *Fortean Times* 361 (Christmas 2017): 38–41; Clark III 270; Clark IV 310)

1955, May 25 — The crew of a Portuguese Air Lines airliner flying between Dunsfold and Epsom, England, see a long, wingless, silvery, cigar-shaped object approach from their port side and pass under their nose. ("Yet Another Airline Crew See Mysterious Flying Object!" *Flying Saucer News*, no. 9 (Summer 1955): 1, 5)

1955, Summer — 12:30 a.m. Dumitru Coca watches a strange object emitting a ring of white sparks at an altitude of 3,000 feet above Hârşeni, Romania. It is blue with white stripes and flying noiselessly at high speed. He watches it for 3 minutes. (Hobana and Weverbergh 229–230; Romania 11)

1955, June — James W. Moseley renames *Nexus* as *Saucer News* and it becomes a popular bimonthly UFO magazine. (*Saucer News* 2, no. 6 (June/July 1955); Clark III 775, 1032; Clark IV 856, 1148)

1955, June — Cincinnati, Ohio, businessman Thomas Eickhoff buys a copy of George Adamski's *Inside the Space Ships.* Upset with Adamski's statement that his space contacts can be corroborated, he takes steps to take him to federal court to make him prove his story or face fraud for using the US mail system to sell his book. Eickhoff's lawyer brings in a government adviser who advises them to drop the lawsuit. Eickhoff's efforts eventually bring a reply from a lawyer for CIA Director Allen Dulles, who says the problem is that Adamski could "prevent anyone from testifying in court concerning this book because maximum security exists concerning the subject of UFOs." The lawyer says he would be subject to a countersuit. (Stringfield, *Situation Red,* Fawcett Crest, 1977, pp. 169–170; Good Above, pp. 341–342)

1955, June 1 — 3:00 p.m. An eastbound Air Force Boeing RB-47 surveillance aircraft above Devon Island, Nunavut, picks up an unknown radar target for 20 minutes. Its ELINT system records the possible sweep of another radar nearby, indicating radar jamming signals at around 9000 MHz. On its return westbound flight at 6:00 p.m., the aircraft has a radar contact for 30 minutes at approximately 1.7 miles. (Tim Printy, "The RB-47 Contacts from 1955," *SUNlite* 4, no. 1 (Jan./Feb. 2012): 36; Clifford E. Stone, *UFOs Are Real,* SPI Books, 1997, pp. 73–76; Clark III 995–996; Clark IV 1108–1109)

1955, June 4 — 5:30 p.m. A Boeing RB-47 reconnaissance aircraft flying near Melville Sound, Nunavut, Canada, at 32,000 feet tracks an unknown object visually and by radar for 9 minutes. The crew chief describes it as "glistening silver metallic" and "obscured by contrails." The crew obtains gun camera film, but of poor quality. After staying low and to the rear of the aircraft at about 4 miles distance, the object speeds off to the north. (Sparks, p. 226; Good Above, p. 285; Clifford E. Stone, *UFOs Are Real,* SPI Books, 1997, pp. 73–76; Tim Printy, "The RB-47 Contacts from 1955," *SUNlite* 4, no. 1 (Jan./Feb. 2012): 36; Clark III 995–996; Clark IV 1108–1109)

1955, June 5 — 7:30 p.m. François-Gilbert Muyldermans is cycling on a deserted road near Saint-Marc, near Namur, Belgium, when he sees a bright disc moving at a high speed at an altitude of around 4,900 feet. He takes out his camera and snaps a photo. The object descends, then rises again emitting a cloud of white smoke. He takes two more photos. Anomalies in the blurred grain, inconsistencies in orientation, and the circumstances by which the story entered UFO lore suggest a deliberate hoax, perhaps with the help of a journalist. ("A 'Classic' from Belgium," *BUFORA Journal* 4, no. 12 (March/April 1976): 12–13; Vicente-Juan Ballester Olmos and Wim van Utrecht, *Belgium in UFO Photographs, Volume 1 (1950–1988)*, FOTOCAT Report no. 7, 2017, pp. 38–69)

1955, June 7 — 5:50 p.m. An RB-47 en route to Eielson AFB, Fairbanks, Alaska, registers an electronic contact southeast of Banks Island, Northwest Territories, Canada, at 10,500 feet range. The radar return is small and rectangular. (Sparks, p. 227; Good Above, p. 286; Clifford E. Stone, *UFOs Are Real,* SPI Books, 1997, pp. 73–76; Tim Printy, "The RB-47 Contacts from 1955," *SUNlite* 4, no. 1 (Jan./Feb. 2012): 36; Clark III 995–996; Clark IV 1108–1109)

1955, June 8 — 2:44 p.m. An RB-47 flying at 30,000 feet south of Bathurst Island, Nunavut, detects a UFO briefly on its gun-control radar and makes visual contact for 20 minutes with an object trailing 5–10 miles behind it. A second RB-47 some 80 miles behind the first spots the contrail left behind as the UFO disappears. (Clifford E. Stone, *UFOs Are Real,* SPI Books, 1997, pp. 73–76; Tim Printy, "The RB-47 Contacts from 1955," *SUNlite* 4, no. 1 (Jan./Feb. 2012): 36; Clark III 995–996; Clark IV 1108–1109)

1955, June 13 — Frank Edwards travels with a TV film producer to the Navy Department at the Pentagon and asks for some unclassified photos of rockets. When the Navy learns that Edwards wants to show them on TV during a panel discussion on UFOs, the office refuses to cooperate. (Keyhoe, *FS Conspiracy*, p. 269)

1955, June 23 — 12:15 p.m. A Mohawk Airlines DC-3 is cruising at 3,000 feet in good daylight visibility about 15 miles east of Utica, New York, on a heading to Albany. Both pilot and copilot see an object come over the top of the aircraft from behind, an estimated 500 feet above their altitude. They estimate the length of the object at about 150 feet. It is described as "light gray, almost round, with a center line .... Beneath the line there were several (at least four) windows which emitted a bright blue-green light. It was not rotating but went straight. [The lights] seemed to change color slightly from greenish to bluish or vice versa [as the object receded]. A few minutes after it went out of sight, two other aircraft (one, a Colonial DC-3, the other I did not catch the number) reported that they saw it and wondered if anyone else had seen it. The Albany control tower also reported that they had seen an object go by on Victor-2 [airway]. As we approached Albany, we overheard that Boston radar had also tracked an object along Victor-2, passing Boston." (NICAP, "150′ Object Passes over DC-3 Crew from Behind"; Condon, p. 143; Martin Shough, *RADCAT: Radar Catalogue: A Review of Twenty-One Ground and Airborne Radar UAP Contact Reports Generally Related to Aviation Safety for the Period October 15, 1948, to September 19, 1976*, National Aviation Reporting Center on Anomalous Phenomena, NARCAP Report TR-6, December 8, 2002, pp. 54–55)

1955, June 25 — 10:45 p.m. Two civilian and two military witnesses in Hillcrest Heights, Maryland, see a brilliant round object with a trail 4–5 times its own length approaching National Airport in Washington, D.C. Ceiling lights at the airport go out when the object approaches and return to operation when the UFO leaves. Searchlights are trained on the object, but when they catch it in their beams, the searchlights go out. The object appears to oscillate in the air, stop, and oscillate again. It travels nearly overhead and then is lost in the sky at a 45° elevation. It is visible for 7 minutes. A check with the Silver Hill Observatory in Hillcrest Heights determines that a small weather balloon carrying a magnesium flare was released about the same time as the visual sighting. (Aimé Michel, *Straight-Line*, p. 236; Schopick, p. 21; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955, January–June*, The Author, 1992, pp. 84–85; Michael D. Swords, "Air Force UFO Investigations in the Mid-1950s," *IUR* 29, no. 3 (Fall 2004): 8–10)

1955, June 26 — Several civilian and military witnesses in Holt, Florida, see a disc with blinking lights. (Sparks, p. 227; *Hynek UFO Report*, p. 45; Michael D. Swords, "Air Force UFO Investigations in the Mid-1950s," *IUR* 29, no. 3 (Fall 2004): 10;)

1955, June 29 — The Second Hoover Commission presents its final report to Congress on streamlining procedures in the executive branch. Gen. Mark W. Clark, heading the commission's task force on intelligence, notes the CIA's lack of accountability and recommends establishing an intelligence oversight committee. (Wikipedia, "Hoover Commission"; Richard A. Best Jr. and Herbert Andrew Boerstling, "Proposals for Intelligence Reorganization, 1949–1996," Report to the US House Select Committee on Intelligence, Congressional Research Service, February 28, 1996, pp. 9–10)

1955, June 30 — The 4602nd AISS reports that of its 194 preliminary UFO reports for 1955, it has made 23 field investigations and has 25 unsolved reports, or an unknown rate of 13%. Going back to August 12, 1954, and removing cases of insufficient evidence, the percentage of unknowns is lower: 23 unknowns from 306 reports, or about 7.5%. In reality, however, none of these numbers mean much; they reflect the creativity and audacity of the explainers at ADC and ATIC.

1955, Late June or early July — Early evening. A 19-year-old Civil Defense worker named Carlos Flannigan is driving a truck across a bridge over the Little Miami River near Loveland, Ohio, when he notices 4 small figures about 3 feet high on the riverbank. A terrible smell hangs over the area. He only watches them for about 10 seconds then immediately drives to police headquarters to report the incident. (Isabel Davis and Ted Bloecher, *Close Encounter at Kelly and Others of 1955*, CUFOS, 1978, pp. 129–132; Patrick Gross, URECAT, February 14, 2008; Clark III 269; Clark IV 309)

1955, July — Construction of the Groom Lake base in Nevada is completed and the CIA begins utilizing it, along with the US Air Force, for Project Aquatone, the development of the Lockheed U-2 strategic reconnaissance aircraft, the nation's first aerial espionage program. It consists of one paved runway, three hangars, a control tower, a makeshift mess hall, and rudimentary accommodations. A movie theater and volleyball court are added. CIA officer Richard Newton is assigned as base commander. Other key organizations are briefed on Area 51's existence—the National Advisory Committee for Aeronautics, the US Navy, the National Security Agency, and the Defense Intelligence Agency. A small group of four Lockheed test pilots, two dozen Lockheed mechanics and engineers, a handful of CIA officers who double as security guards, and some of Col. Ritland's staff take up residence. (Jacobsen, *Area 51*, pp. 5, 51–53; Peter W. Merlin, "Area 51 Timeline," Secret Heroes, November 10, 2021; "Pilots of the U-2," Secret Heroes, November 10, 2021)

1955, July — 2:00 p.m. Col. William T. Coleman is flying a B-25 out of Miami, Florida, with a copilot, flight engineer, a Lockheed test engineer, and a General Motors jet engine technician. As he is moving northward into southern Alabama, he spots at 2 o'clock high what he calls a "craze" in the windshield. He calls the others' attention to it. He gives chase to it at low altitude over farmland and sees its shadow on the ground, as well as two vortices coming out of the shiny metallic disc that kicks up dust on the ground. When he tries to cut it off at a maximum speed of 345 mph, the object is gone, leaving behind the vortices on the ground. Duration of the sighting is 10–11 minutes. (NICAP, "Col. Coleman Case / Chases UFO at Low Altitude")

1955, July — Around 8:15 p.m. Two families are on a beach on the shore of Lake Ontario north of Niagara Falls, New York, when they see a metallic, disk-shaped object suddenly rise out of the lake and hover 12–14 feet in the air. They run to their parked cars, but the object moves toward them and hovers only 30 feet away. It is about 100 feet across and has a dome. They attempt to start their cars, but the engines won't turn over. Four humanoid occupants, dressed in black with black hoods, are visible inside the object, which soon departs toward the lake with a humming noise. It then shoots straight up and disappears. (Carl Feindt, "Report #120," waterufo.net; Dolan, USO1, 178–179)

1955, July 1 — *CRIFO Newsletter* becomes *CRIFO Orbit.* This issue reviews several airplane crashes and disappearances that Stringfield thinks might be related to UFO activity. ("World's Air Forces, in Joint Operations, Challenge Incursion of UFO's," *CRIFO Orbit* 2, no. 4 (July 1, 1955): 1– 2; Clark III 460, 1114; Clark IV 505, 1240)

1955, July 3 —3:30 a.m. Margaret Symmonds is driving on US 129 seven miles south of Stockton, Georgia, when four small humanoid figures with caps and huge eyes are caught in the headlights. They seem to be digging a hole in the road with some sticks. She yells and swerves the car, driving past them. The figures seem oblivious. (Stringfield, *3-0 Blue*, CRIFO, 1957, pp. 63–64; Isabel Davis and Ted Bloecher, *Close Encounter at Kelly and Others of 1955*, CUFOS, 1978, pp. 149–160; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th*, The Author, 1992, pp. 2–3; Patrick Gross, UFOCAT, February 16, 2008; Clark III 270; Clark IV 310)

1955, July 5 — 3:00 a.m. USAF pilot Lt. Homer H. Speer Jr. and copilot Lt. Paul Daily, call sign Archie 29, and pilot Lt. Robert W. Schneck and copilot Lt. David Cueldner, call sign Archie 91, are flying Boeing KC-97 Stratofreighters at 20,000 feet on a refueling mission off the coast of Newfoundland. They see two bright objects at 20,000 feet, apparently stationary. Ground radar picks up several objects, some in a distant cluster flying erratically. Speer is able to maintain visual contact, calling direction change of the object to the radar site by radio. The objects are tracked on radar for 49 minutes. (NICAP, "Archie 29 KC-97 Radar Case"; Sparks, p. 228; Chris Rutkowski and Geoff Dittman, *The Canadian UFO Report,* Dundurn Press, 2006, pp. 296–297; Chris Rutkowski, *Canada's UFOs: Declassified,* August Night, 2022, pp. 263–264)

1955, July 22 — Witnesses watch a long, silvery object emerging from the Pacific Ocean near Santa Maria, California. ("The Question of Submerging UFO's," *UFO Investigator* 4, no. 5 (March 1968): 4, 5; Dolan, USO1, 177–178)

1955, July 22 — Around 6:00 p.m. Edward Mootz is mowing his lawn at 440 Boal Street in Cincinnati, Ohio, when he notices a dark-red, oily substance falling on him when he is next to a 6-feet-tall peach tree. He looks up and about 1,000 feet in the air he sees a cloud that is colored dark green, red, and pink. The substance seems to be falling from it. He begins to feel burning where the drops have touched him on his arms and hands. He goes into the house and washes the substance off. The next morning, he finds that his peach tree has died overnight, its leaves falling completely off. ("Cloud Brings Death," *Cincinnati (Ohio) Enquirer,* August 28, 1955, sec. 3, p. 1; Jim Kane, "UFO Kills Tree in Cincinnati," *Fate* 23, no. 11 (November 1970): 72–73; Isabel Davis and Ted Bloecher, *Close Encounter at Kelly and Others of 1955*, CUFOS, 1978, p. 179)

1955, Late July — A man, a female companion, and two children are picnicking on a Lake Ontario beach in St. Catharines, Ontario, when a silvery disc approaches them rapidly across the water, then hovers above them before heading to another family nearby. It swings back to the original group, "moving like a clock pendulum." The man flees to his car but finds it will not start. Through the windows of the UFO, just a few feet above the ground, the witnesses see the faces of four pale-faced men with black hoods covering their ears and heads, sitting straight and rigid. The object shoots over the lake, ascends rapidly, and disappears. (Clark III 268; Clark IV 308)

1955, July 24 — The Groom Lake "Ranch" in Nevada receives its first delivery of U-2s from Burbank, California, in a C-124 Globemaster II cargo plane, accompanied by Lockheed technicians on a Douglas DC-3. Regular Military Air Transport Service flights are set up between Area 51 and Lockheed's offices in Burbank. To preserve secrecy, personnel fly to Nevada on Monday mornings and return to California on Friday evenings. (Wikipedia, "Area 51")

1955, July 26 — A brilliant round object with a trail 4–5 times its own length approaches National Airport [now Ronald Reagan Washington National Airport] in Washington, D.C., stops, oscillates, and moves off at high speed. Ceiling lights at the airport go out when the object approaches and returns to operation when the UFO departs. (UFOEv, p. 135)

1955, July 29 — President Eisenhower announces a program to launch a scientific satellite during the International Geophysical Year. The program will be run by the National Science Foundation and the National Academy of Sciences, with advice coming from the Department of Defense. (Amy Shira Teitel, "How the Stage Was Set for the Satellite Race," *Popular Science,* January 3, 2016; Amy Shira Teitel, *Breaking the Chains of Gravity: The Story of Spaceflight before NASA,* Bloomsbury Sigma, 2017)

1955, July 29 — 8:30–9:30 p.m. An aircraft engineer and four others notice a "2nd magnitude star" in the vicinity of Saturn at Lake Ronkonkoma on Long Island, New York. The star moves in a perfect circle around Saturn, heads east until it gets to the Moon, where it executes a half-circle pass and disappears. The object then appears 120° away and moves horizontally until it takes an abrupt turn vertically. It disappears again at about 70° above the horizon. Then it reappears in a straight dive-like descent until it reacquires its original 30° elevation. It proceeds horizontally again, makes an abrupt angular shift again downwards, and is lost in the trees. Through binoculars the object looks spherical and yellowish. (Michael D. Swords, "We Know Where You Live," *IUR* 30, no. 2 (January 2006): 8–9; Swords 227)

1955, August — Hundreds of people gather each night at the Black Arch, on the Antrim Coast Road near Larne, County Antrim, Northern Ireland, to watch a mysterious display of lights at sea. The light flashes three or four times in quick succession, then flashes again about 6 minutes later. The Larne police suspect that the lights are flares dropped from aircraft. (*Larne Times,* August 18, 1955; Shane Cochrane, "Ireland vs. the Flying Saucers," *Fortean Times* 317 (September 2014): 54–55)

1955, August — Police from Luzern, Switzerland, investigate a sighting of a shiny metallic disc seen at Waldibrücke and Eschenbach. ("Forscher findet verschollene UFO-Akten der Schweiz," Grenzwissenschaft-Aktuell, July 8, 2013; "The Swiss X-Files," *Fortean Times* 312 (April 2014): 24)

1955, August 1 — The first test flight of the Lockheed U-2 takes place at Groom Lake, Nevada. During a high-speed-taxi test in the first U-2, Lockheed's chief test pilot, Tony LeVier, inadvertently becomes airborne after accelerating the U-2 to 70 knots. He is unable to land the U-2 on his first attempt, and it bounces back into the air, but he manages to successfully bring it down on a second try. Damage to the prototype U-2 is very minor. (Wikipedia, "Lockheed U-2"; "Area 51 and the Accidental Test Flight," Central Intelligence Agency, August 6, 2015)

1955, August 1 — 8:45 p.m. William M. Sheneman, the owner of a radio/TV store in Willoughby, Ohio, pulls into his driveway and walks across the street to check his mailbox. He sees a red light about 1,000 feet away coming at him at a right angle. He thinks it is a plane about to crash. Then the ground is illuminated with two brilliant lights aimed directly from the object. He runs back into the house as the UFO moves over his garage about 50–100 feet in the air. He sees a big red light at the front and a green light at the rear. Then all the lights turn off and the object moves away over the woods. He and his wife can now see the outline of a dome lit up with tiny lights inside. It hovers there for 5 minutes then moves away. (UFOEv, p. 114; Olsen, sec. 3, pp. 40–41; Isabel Davis and Ted Bloecher, *Close Encounter at Kelly and Others of 1955*, CUFOS, 1978, p. 180; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th*, The Author, 1992, pp. 31–32; Clark III 244–245; Clark IV 284–285)

1955, August 2 — Frederick C. Durant informs the Sixth Congress of the International Astronautical Federation in Copenhagen, Denmark, that President Eisenhower has decided to back the launch of a US scientific satellite during the upcoming International Geophysical Year. Not to be outdone, Soviet delegate Leonid I. Sedov calls a press conference and announces that Russia can launch an artificial satellite within the next 2 years that will be more sophisticated than the Americans' efforts. (Amy Shira Teitel, "How the Stage Was Set for the Satellite Race," *Popular Science,* January 3, 2016; Amy Shira Teitel, *Breaking the Chains of Gravity: The Story of Spaceflight before NASA,* Bloomsbury Sigma, 2017)

1955, August 8 — The CIA's Todos Odarenko writes an office memorandum recommending that the CIA should maintain a file of UFO sightings but deny that all investigations are inactive, and separate explainable UFOs from unidentifiable reports. (Jacobsen, *Area 51*, pp. 75–76)

1955, August 11 — 9:30 p.m. A witness in Cairo, Illinois, sees a triangular-shaped UFO low on the horizon above the trees, heading silently north and slightly west. Its front end is dark, its middle section bluish green, and its end very bright. ("Sightings," *APRO Bulletin,* August 1955, p. 9)

1955, August 16 — Early morning. Truck driver Ernest Suddard and his 13-year-old son are returning home to Bradford, West Yorks, England, when their headlights light up a small figure in the street. It is 4 feet tall, dressed in skin-tight black clothes, and is hopping forward in a series of jerky movements. A circular, silvery object, perforated with holes, appears on the figure's chest just below its throat. It approaches the truck then turns away abruptly into a passage. Suddard alerts the police, but they find nothing. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th*, The Author, 1992, p. 50; Patrick Gross, URECAT, February 19, 2008)

1955, August 16 — 3:55 p.m. Mechanic Hugh Saunders sees a silver object above a white cloudbank above Cave Hill in Belfast, Northern Ireland. It is flat and moves swiftly. (*Belfast Telegraph,* August 17, 1955; Shane Cochrane, "Ireland vs. the Flying Saucers," *Fortean Times* 317 (September 2014): 55)

1955, August 19 — 2:00 p.m. A "shining, glittering ball" zigzags across the sky over Lisburn, Northern Ireland. It is seen by many people for about 10 minutes. Jeffrey Moore, 17, says it looks like a steel ball at first, then as it gets closer it appears "cross-shaped." It moves in a variety of directions before disappearing into the clouds. (*Belfast Telegraph,* August 20, 1955; Shane Cochrane, "Ireland vs. the Flying Saucers," *Fortean Times* 317 (September 2014): 55)

1955, August 19 — Dusk. A large UFO and 5–6 smaller objects appear in a V-formation over the city of Pisa, Italy. The smaller objects form the arms of the V in the leading position, with the larger object at the vertex in the back. ("Fleet over Midlands," *Flying Saucer Review* 1, no. 4 (Sept./Oct. 1955): 3; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th,* The Author, 1992, p. 52)

1955, August 20 — Pilot Horace A. Hanes attains an airspeed record of 822 mph in a North American F-100C Super Sabre at Palmdale, California. (Wikipedia, "North American F-100 Super Sabre")

1955, August 20 — 10:45 p.m. The president of a small Canadian air service and his nightwatchman are checking their seaplanes in their dock at Kenora, Ontario, when they see an object "shaped like two saucers with their open tops touching, one above the other" streaking toward them from the west. It is silvery-white in color and sending out rays from its surface or sparkling "as if some electric force or very hot air was flowing from all the surfaces." It tilts on its side about 600 feet from them, then straightens out with the flat side parallel with the ground and hovers about 225 feet from them and 40 feet above the surface of the lake. It is completely silent and looks to be only 4–5 feet across. (J. Allen Hynek, *The UFO Experience,* Ballantine ed., 1974, pp. 111–112)

1955, August 21–22 — About 7:00 p.m. Billy Ray Taylor goes into the backyard of the Elmer "Lucky" Sutton farmhouse 7 miles north of Hopkinsville, Kentucky, and sees a bright object come from the south-southwest, pass over, and descend into a gully about 500 feet north and about 35-40 feet lower elevation. Glennie Lankford and 6 other adults (Elmer Sutton, Vera Sutton, John Charley Sutton, Alene Sutton, June Taylor, O. P. Baker) plus 3 children (Charlton, Lonnie, and Mary Lankford), see several gremlin-like creatures float down from trees and approach the house from the dark. They are about 3 feet high with roundish heads, elephantine ears, slit-like mouths extending ear to ear, huge and wide-set eyes, no visible necks, and long arms ending in clawed hands. They wear glowing silver clothing. When they run, they drop on all fours. When one of them approaches the house, Sutton and Taylor fire shotguns through the window screen, scoring a direct hit. The creature is knocked over, but gets up and scuttles off. Taylor walks out the door and one of the creatures grabs at his head. This activity continues the greater part of the night and includes heavy gunfire at times. Sutton fires point blank at it, knocking it from the roof, but it just "floats down." At about 11:00 p.m. they run out of ammunition, and the entire group flees in terror in two cars and drives at high speed into Hopkinsville to report the incident to the police. A state patrolman leaves the Shady Oaks restaurant 3 miles north of Hopkinsville in a car to respond to the call and sees several meteor-like objects streaking over him sounding like artillery fire. He sees two in a series looking like meteors coming from the southwest, headed towards Kelly from the direction of Fort Campbell, a US Army installation. City, county, state, and military police and reporters drive out to the Sutton farm to investigate from 11:30 p.m. to 2:00 a.m. The UFO entities return at about 2:30 a.m. Glennie Lankford is trying to get to sleep when she sees one outside her window stretching its claw-like hands up to the screen. Elmer Sutton again shoots at them without effect. The last one is seen at about 5:15 a.m. Clark writes that investigations by "police, Air Force officers from nearby Fort Campbell, and civilian ufologists found no evidence of a hoax"; however, Brian Dunning reports that "the claim that Air Force investigators showed up the next day at Mrs. Lankford's house has been published a number of times by later authors, but I could find no corroborating evidence of this." Dunning also observes that "the four military police who accompanied the police officers on the night of the event were from an Army base [Fort Campbell], not an Air Force base." Skeptic Joe Nickell notes that the family could have misidentified great horned owls, which are nocturnal, fly silently, have yellow eyes, and aggressively defend their nests. He thinks Taylor and Sutton were drinking heavily. Meteor sightings also occurred at the time that could explain Billy Ray Taylor's claim that he saw "a bright light streak across the sky and disappear beyond a tree line some distance from the house." (Wikipedia, "Kelly–Hopkinsville encounter"; NICAP, "Sutton (Kelly / Hopkinsville) Encounter"; Sparks, p. 230; "Story of Space-Ship, 12 Little Men Probed Today," Hopkinsville *Kentucky New Era,* August 22, 1955, p. 1; "Little Green Men Harass Kentucky Farm Family," *Waco (Tex.) 1955, August 23–24 — 11:50 p.m. Personnel at the Ground Observer Corps tower in Hamilton County, Ohio, notice three white spheres between Columbus and Cincinnati. Tracking the UFOs on radar, they notify SAC at Lockbourne AFB [now Rickenbacker Air National Guard Base], which scrambles jets to investigate. The UFO approaches the tower and hovers in pendulum-like motions directly above it. The interceptors give chase, but the UFO disappears at an incredible speed. The Greater Cincinnati Airport also tracks unidentified blips on radar. To his surprise, Stringfield obtains clearance to write about these sightings in *CRIFO Orbit.* But when he tries to interest the Cincinnati newspapers, they are not interested. A Wright-Patterson AFB spokesperson denies the incident to the press and claims to know nothing about Stringfield's relationship with ADC. (Sparks, p. 230; Stringfield, *Situation Red*, Fawcett Crest, 1977, pp. 12–14; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th*, The Author, 1992, p. 75)

1955, August 25 — 8:30 p.m. Mrs. Lloyd Wright and Mrs. Lester Parsons of Bedford, Indiana, see a huge white object with a black streak down the center. The object seems to expand and contract regularly as it hovers over Mrs. Parsons's home. The houselights appear to dim and pulsate in rhythm with the object. (Schopick, p. 114)

1955, August 29 — RAF pilot Walter Gibb reaches an official record altitude of 65,876 feet in an English Electric Canberra B.2 turbojet. (Wikipedia, "Walter Gibb")

1955, August 29 — 2:00 p.m. A group of children is playing in the garden of Mr. and Mrs. Douglas in Riverside, California, when they observe a hovering object that disappears and reappears as a spinning disk with curved lines radiating from it. Other objects, silvery and semi-transparent, soon appear and are seen by all the children. They emit musical sounds as they vanish and reappear. One of the objects lands, and a creature the size of a 4-year-old child, transparent and wearing a belt with a bright disk, appears nearby. Another creature emerges and speaks to one of the boys. All the children experience visions of the object and the creatures, as well as "arms" that seem to beckon to them. ("Squadron of Flying Saucers Causes Neighborhood Riot," *Riverside (Calif.) Daily Press*, August 30, 1955; "Recent News Reports," *Saucer News* 2, no. 8 (Oct./Nov. 1955): 8; "Children's Day at Casa Blanca, A Strange Story: Etheric Entities?" *Uranus* 2, no. 4 (February 1956): 67–71; Gordon Creighton, "The Extraordinary Happenings at Casa Blanca," *Flying Saucer Review* 13, no. 5 (Sept./Oct. 1967): 16–18; Isabel Davis and Ted Bloecher, *Close Encounter at Kelly and Others of 1955*, CUFOS, 1978, pp. 186–189; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th*, The Author, 1992, pp. 78–81)

1955, August 30 — 9:30 a.m. Pedro Navarro, 25, takes a photograph of some swirling storm clouds over Dudignac, Buenos Aires province, Argentina. When he develops them, he notes that the disturbance looks more like a giant disc. The newspapers reproduce enhanced versions of the photo, but it is never critically analyzed until several decades later. The best guess is that the photo shows a round cloud. (Vicente-Juan Ballester-Olmos, "Exigesis of the Dudignac Saucer of 1955," UFO FOTOCAT Blog, December 26, 2021; Vicente-Juan Ballester Olmos, "Exegesis of the Dudignac Saucer of 1955," January 2022)

1955, September — Austrian Countess Zoe Wassilko von Serecki writes an article for *American Astrology* in which she conceives of UFOs as living animals that inhabit the ionosphere and are attracted to electrical sources. (Zoë Wassilko-Serecki, "Startling Theory on Flying Saucers," *American Astrology* 23 (September 1955): 2–5; Clark III 1099–1100; Clark IV 1225–1226)

1955, September — Day. Several witnesses see four silver discs flying in formation over Lima, Ohio. (Michael D. Swords, "The Timmerman Files," *IUR* 26, no. 4 (Winter 2001–2002): 13)

1955, September 2–4 — 9:05 p.m. Eddy Geddes notices a fireball as he is driving to Kalispell, Montana, from Whitefish. He stops at a Ground Observer post and notifies the women stationed there. Jets are scrambled from Malmstrom AFB in Great Falls and arrive shortly after midnight, long after the object is gone, but another fireball is apparently seen later. The same scenario occurs on September 4 when five F-94C Starfire jets (as well as other aircraft from Great Falls and Spokane, Washington, are sent to the Kalispell area. ("Air Force Jets Called in Search for 'Fireball' over Kalispell," *The Missoulian*, September 5, 1955, p. 7; "Recent Sightings," *APRO Bulletin*, September 15, 1956, p. 19)

1955, September 3 — 9:30 p.m. A grocery store clerk and Ground Observer Corps member in Bellingham, Washington, named Saunders sees an unusual light moving approximately 30° across the Big Dipper. It moves in varying speeds, the intensity of its light growing when it moves faster. Saunders watches the light for 15 minutes. (Sparks, p. 230; Olsen, sec. 3, pp. 41–42)

1955, September 8 — Test pilot Ray J. Goudey reaches an altitude of 65,000 feet in a Lockheed U-2 at Groom Lake, Nevada, a feat not revealed until declassification in 1998. "From where I was up above Nevada I could see the Pacific Ocean, which was 300 miles away." (Wikipedia, "Lockheed U-2")

1955, September 9 — Capt. Hugh McKenzie of the Air Defense Command in Columbus, Ohio, contacts UFO researcher Leonard Stringfield in Cincinnati and asks for CRIFO's cooperation in providing them with new UFO reports. He also says that Ground Observer Corps in southwestern Ohio is to report UFO activity to CRIFO for screening. Screened reports are then to be forwarded to the ADC filter center using the code "Fox Trot Kilo 3-0 Blue." All expenses will be reimbursed by the Air Force. (Stringfield, *Situation Red,* Fawcett Crest, 1977, p. 11; Clark III 1114; Clark IV 1240)

1955, September 17 — 1:30 a.m. Frank and Eileen Bordes are night fishing in a small cove on the north side of Titicus Reservoir near North Salem, New York. Eileen sees a rose-colored, luminous sphere about the size of a basketball rise out of the nearby water on the shoreward side of the rowboat, then fall back with a loud splash. She begins rowing to the shore, then Frank sees something floating on the surface about 600 feet to the southeast of them. It has two parallel bluish-white lights like two wavy, fluorescent tubes about 30 feet in length. Above them is a round yellowish light, somewhat dimmer, apparently attached to a dim, gray object that is apparently rotating. Frank rows his wife to shore, then returns to investigate; the lights at first move off to the east, but then move closer to his boat. Frank decides to pick up Eileen and return to the mooring about a mile away, the lights following along. Finally, they move away to the east again. They are still visible in the water as the Bordes drive away. (Paul Gray, "The Mystery of Titicus Reservoir," *Flying Saucer Review* 1, no. 5 (Nov./Dec. 1955): 21; "The Titicus Reservoir Incident," *Civilian Saucer Intelligence News Letter,* no. 20 (July 25, 1957): 21–22; Dolan, USO1, 179–180)

1955, September 20 — In response to a September 13 letter from Rep. Gordon H. Scherer (R-Ohio) about the contactee claims of George Adamski, CIA Director Allen Dulles replies that the "CIA shall have no police, subpoena, law-enforcement powers, or internal-security functions" over mail fraud related to UFOs. (Allen W. Dulles, Letter to Gordon H. Scherer, September 20, 1955)

1955, September 22 — Murray Shockett and H. Charles Robinson organize the Civilian Research Society of Maryland in Baltimore, with Gladys Rose Hackett as secretary. It publishes two issues of the *Maryland Saucer Mag* in 1955. (*Maryland Saucer Mag* 1, no. 1 (October 1955); Powell, *Keyhoe,* 150–151)

1955, October — President Eisenhower gives the CIA control over the U-2 spy plane program and Area 51. (Jacobsen, *Area 51,* p. 58)

1955, October — 8:00 p.m. A student at St. Joseph's Minor Seminary in Peterborough, New Hampshire, sees four glowing, bluish-white objects to the southwest. One appears to be on the ground with 3–4 figures beside it. He goes into the recreation room to find more witnesses. When they go outside, the objects are slowly moving above the school building toward the northeast. ("New Hampshire," *CUFOS Associate Newsletter* 6, no. 2 (April/May 1985): 4–5)

1955, October 3 — A B-47 from Davis-Monthan AFB in Tucson, Arizona, crashes northwest of Lovington, New Mexico. The lone survivor, 2nd Lt. William Daniel Borggen, says the plane is flying at 15,000 feet when three instruments go out after it breaks away from a refueling plane in a pre-dawn flight. The crew drops 5,000 feet, then the bomber hits something and crashes. ("B-47 Crash Is Probed," *Clovis (N.Mex.) News-Journal,* October 3, 1955, pp. 1-2)

1955, October 4 — 7:10 p.m. Senator Richard B. Russell Jr. (D-Ga.), chairman of the Armed Services Committee, on a trip to the USSR, is on a Soviet train near Baku, Azerbaijan, when he spots a disc-shaped craft taking off near the tracks. Russell sees the "first flying disc ascend and pass over the train" and goes "rushing in to get Mr. Efron [Reuben Efron, his interpreter] and Col. Hathaway [Col. E. U. Hathaway, his aide] to see it," the report says. "Col. Hathaway stated that he got to the window with the Senator in time to see the first [UFO], while Mr. Efron said that he got only a short glimpse of the first. However, all three saw the second disc and all agreed that they saw the same round, disc-shaped craft…as the first." A fourth witness is unidentified. "One disc ascended almost vertically, at a relatively slow speed, with its outer surface revolving slowly to the right, to an altitude of about 6,000 feet, where its speed then increased sharply as it headed north," the report states. "The second flying disc was seen performing the same actions about one minute later. The take-off area was about 1–2 miles south of the rail line." The Air Force report is written by Lieut. Col. Thomas Ryan, who interviews Russell's companions in Prague, Czechoslovakia [now Czech Republic], on October 13, after they arrive there from Russia shortly after the sighting. The report remains Top Secret until April 30, 1959, and Secret until March 1985 when Stanton Friedman manages to get it declassified following a FOIA request. (NICAP, "Senator Russell Observes UFO from Train"; Sparks, p. 231; "Reported Sighting of Unusual Aircraft in USSR," CIA *Current Intelligence*

Bulletin, October 15, 1955, pp. 3–4; Tom Towers, "About 'Saucers' and Sen. Russell's Letter," *Los Angeles Examiner*, January 20, 1957; Tom Towers, "Flying Saucers and Senator Russell," *Saucers* 5, no. 1 (Spring 1957): 2–3; "The Senator Russell Letter Revealed," *APRO Bulletin*, January 1957, p. 1; Dan Schwartz, "Top U.S. Senator Saw Two UFOs," *National Enquirer*, February 11, 1986, via *APCIC Clipping Service* 11, no. 2 (February 1986): 22–23; Good Above, pp. 224–226; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 September 16th–December 31st*, The Author, 1993, pp. 19–24; Joel Carpenter, "The Senator, the Saucer, and *Special Report* 14," *IUR* 25, no. 1 (Spring 2000): 3–7; Swords 227–228; Clark III 1049–1050; John Greenewald, "Declassified Top Secret CIA Memo Reveals Senator's 'Saucer-Like' Craft Sighting in 1955," The Black Vault, July 11, 2023; Clark IV 1164–1165)

1955, October 7 — Retired Gen. Douglas MacArthur tells Achille Lauro, the mayor of Naples, that he does not think there will be a war with the Soviet bloc, but that "because of the developments of science all countries on earth will have to survive and to make a common front against attack by people from other planets." The meeting takes place in the Waldorf-Astoria Hotel in New York City. ("M'Arthur Greets Mayor of Naples," *New York Times*, October 8, 1955, p. 7; "Space War Possible Is MacArthur Hint," *CRIFO Orbit* 2, no. 8 (November 4, 1955): 1; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 September 15th–December 31st*, The Author, 1993, pp. 15–17; Clark III 460; Clark IV 505)

1955, October 10 — The Air Force releases a statement from Fort Worth, Texas, saying that anyone reporting flashing lights for the next two months across the US is seeing wind-driven experimental plastic balloons that might travel as fast as 110 mph. (Keyhoe, *FS Conspiracy*, p. 206; Keyhoe, FSTS, p. 43)

1955, October 18 — CIA Director Allen Dulles informs the joint Intelligence Advisory Committee about Senator Russell's sighting. (Joel Carpenter, "The Senator, the Saucer, and *Special Report* 14," *IUR* 25, no. 1 (Spring 2000): 7)

1955, October 19 — Wilton E. Lexow, head of the CIA Applied Science Division, notes the similarity of the objects seen by Sen. Russell to the Avro Canada Project Y-2 (Silver Bug), a proposed vertical take-off gyroplane now under development by the US Air Force. (Wikipedia, "Avro Canada"; Wikipedia, "Avro Canada VZ-9 Avrocar"; Air Technical Intelligence Center, *Joint ATIC-WADC Report on Project Silver Bug*, Project no. 9961, Technical Report TR-AC-47, February 15, 1955; Joel Carpenter, "The Senator, the Saucer, and *Special Report* 14," *IUR* 25, no. 1 (Spring 2000): 8)

1955, October 25 — *Project Blue Book Special Report No. 14* is released, months after it is completed by analysts at Battelle Memorial Institute in Columbus, Ohio, using cases supplied by the Air Force and tabulated on IBM punch cards. The original report by Battelle is about 300 pages, but the Air Force distills this down to 100. It is accompanied by a press release in which Secretary of the Air Force Donald A. Quarles states: "On the basis of this study we believe that no objects such as those popularly described as flying saucers have overflown the United States." (At the same time, Quarles states that the Air Force is working on radical new aircraft that "are sure to be mistaken for flying saucers.") Only 100 copies are printed initially, but scientist Leon Davidson prints and sells copies of it beginning in 1956, along with his analysis and commentary. The report includes 3,201 reported UFO sightings. Battelle employs four scientific analysts, who divide cases into knowns, unknowns, and a third category of insufficient information. They also break down knowns and unknowns into four categories of quality, from excellent to poor. For a case to be called identified, two analysts must independently agree on a solution; for a case to be called unidentified, all four analysts must agree. A report classified as unidentified is defined as: "Those reports of sightings wherein the description of the object and its maneuvers could not be fitted to the pattern of any known object or phenomenon." Out of 3,201 cases, 69% are judged to be identified, 22% are unidentified, and 9% have insufficient information to make a determination. The report further breaks these results down based on whether the identification is considered certain or merely doubtful. For example, in both the astronomical and aircraft IFO categories, 12% are considered certain and 9% are doubtful. Overall, of the 69% listed as IFOs, 42% are thought to be solved with certainty, while 27% are still considered doubtful. In addition, if a case is lacking in adequate data, it is placed in the insufficient information category, separate from both IFOs and UFOs. A key feature is to statistically compare IFOs and UFOs by six characteristics: color, number of objects, shape, duration, speed, and brightness. If there are no significant differences, the two classes are probably the same, the UFOs then representing merely a failure to properly identify prosaic phenomena that can already account for IFOs. On the other hand, if the differences are statistically significant, this suggests IFOs and UFOs are indeed distinctly different phenomena. In the initial results, all characteristics except brightness test significant at less or much less than 1% (brightness is greater than 5%). By removing astronomical sightings from the knowns and redoing the test, just two categories, number and speed, are significant at less than 1%, the remainder having results between 3% and 5%. This indicates that there is a statistically significant difference between the characteristics ascribed to UFOs and IFOs, but perhaps not as significant as the initial results suggested. For two

characteristics, brightness and speed, the significance actually increases with the revised test. Hynek later calls the Battelle report a "shamefully biased interpretation of statistics to support a preconceived notion." Keyhoe asks Ruppelt what he thinks. Ruppelt says the report "was a shock to me. I was the one that had the IBM system tried out. It didn't prove a thing, and I had written it off as worthless before I left the project… also this report was drawn up in 1953, yet the Air Force released it as the latest hot dope in October, 1955." The Air Force releases a second edition, with a new preface and an addendum that brings the subject up to date, in July 1957. In the 1990s, after interviewing three men (Art Westerman, Perry Rieppel, and William T. Reid) who had participated in the Battelle project, Mark Rodeghier and Jennie Zeidman of the Center for UFO Studies conclude that the engineering mindset at Battelle had caused a disconnect between its data and its conclusions. Because the project cannot reverse engineer a UFO from the reports (because of faulty witness testimony, multicausal UFOs, etc.), the engineers conclude that a structured craft does not exist. (Wikipedia, "Identification studies of UFOs"; Wikipedia, "Project Blue Book"; US Air Force Air Technical Intelligence Center, *Special Report No. 14; Analysis of Reports of Unidentified Flying Objects*, May 5, 1955; Leon Davidson, *Flying Saucers: An Analysis of Project Blue Book Special Report No. 14*, [1956], 3d ed., Ramsey-Wallace, 1966; "Plan Radical New Aircraft," *Franklin (Pa.) News-Herald*, October 26, 1955, p. 1; Keyhoe, FSTS, p. 770; Jacobs, *UFO Controversy in America*, Signet ed., 1976, pp. 123–126; Jennie Zeidman, "I Remember Blue Book," *IUR* 16, no. 2 (Mar./Apr. 1991): 7–8; Jennie Zeidman and Mark Rodeghier, "The Pentacle Letter and the Battelle UFO Project," *IUR* 18, no. 3 (May/June 1993): 4–12, 19–21; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 September 15th–December 31st*, The Author, 1993, pp. 30–63; Joel Carpenter, "The Senator, the Saucer, and *Special Report* 14," *IUR* 25, no. 1 (Spring 2000): 3, 9; Swords 220–224, 239–241; Clark III 918–919, 929–932; Clark IV 998, 1029, 1039–1042)

1955, October 27 — Afternoon. Hosea D. Lambeth, principal of Whitsett Elementary School, North Carolina, and about 100 students watch 10 objects like "steel balls" dart through the sky for 25 minutes. Light-colored wispy material in 2–3-inch strips falls from the sky at the same time. Nearby Burlington Industries tests a sample and declares it not a synthetic material. No spiders are found in the strands. ("'Flying Saucer' Story Gets Horse Laugh Here," *High Point (N.C.) Enterprise*, October 28, 1955; Guy Munger, "'Angel Hair' Falls at Whitsett with 'Flying Saucers' Overhead," *Greensboro (N.C.) Daily News*, October 28, 1955, pp. 1, 4; Guy Munger, "Whitsett's 'Angel Hair' Is Puzzling Technicians," *Greensboro (N.C.) Daily News*, October 29, 1955, pp. 1–2; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 September 15th–December 31st*, The Author, 1993, pp. 72–75; Clark III 124; Clark IV 151)

1955, November — An unnamed CIA source receives a letter from his niece in Budapest, Hungary, that says reports of UFOs or "rockets" in formation reaching speeds exceeding 7,400 mph have been keeping "scientific groups very busy." (John Greenewald, "CIA Document Talks about 'Flying Saucers' Traveling 7,400+ mph in 1955; More Information Discovered Yet Withheld by Agency," The Black Vault, March 12, 2024)

1955, November — J. Heinrich Ragaz begins publishing *Weltraumbote* in Zürich, Switzerland. A contactee newsletter, it considers UFOs to be made of spiritual "ether" and continues through June 1961. Ragaz believes the space people behind UFOs offer hope for an enlightened future. (*Weltraumbote*, no. 1 (November 1955); Eghigian, *After*, pp. 104–105)

1955, November 1 — 8:06 p.m. A flying light paces New Zealand National Airways DC-3 Flight 108 west of Waitara, New Zealand, at 8,000 feet for about 5 minutes. Capt. Wiliam T. Rainbow and Copilot Stanley G. Trounce spot the object behind them flying along the coast on a parallel course. Changing color from white to yellow to gold to red, it overtakes the aircraft and flies alongside it for 15 miles, then picks up speed and disappears into the distance ahead. Rainbow estimates it is traveling at 850 mph. (UFOEv, p. 125; "1955: 'Flying Light' Seen by NAC Captain and Crew," Ufocus.nz, June 15, 2021)

1955, November 2 — 10:15 p.m. Police officer Corrie F. Bell is parked in downtown Williston, Florida, when he sees six lighted objects approaching slowly in formation from the south. Occasionally, one of the objects is left behind and puts on a burst of speed to catch up. After the objects pass over the city, one of them turns in a gradual bank and begins losing altitude. Bell drives about a mile and a half north to a point where the object appears to be headed. He gets out of his car and the object passes directly over him. He has the object in close view for about 7 minutes. The light is so bright that it lights up an area 50–70 feet in diameter. Bell judges the object is about 150 feet away and 3 feet wide, silent, shaped like a washtub, and pure white in color with no marks or windows. The heat from the object gives him a stinging sensation and his clothes become hot. It then moves off to the east and disappears from view. ([Blue Book case file]; "Saucer Numbs Policeman," *CRIFO Orbit* 2, no. 12 (March 2, 1956): 6)

1955, November 3 — 9:30 p.m. Sam Verones is approaching the porch of his home in Williston, Florida, when the ground lights up around him. The light is coming from an object that is shining through a tree and moving across the

railroad tracks. Another witness sees the light from his car. ("Saucer Numbs Policeman," *CRIFO Orbit* 2, no. 12 (March 2, 1956): 6)

1955, November 5 — 6:00 p.m. Rev. and Mrs. Kenneth R. Hoffman are driving south on Lee Road in Cleveland, Ohio. When they cross Fairmount Boulevard, they see a row of bright lights in the sky approach them and stop. They continue to watch as they drive, but they stop and get out of the car on the south side of Shaker Boulevard. The lights are coming from a huge oval-shaped object like two saucers placed together. Around the perimeter are eight large windows, which are where the light is coming from. The light rays are so bright, they can see the air dust in them. The object seems to be hovering at about 500 feet, and they estimate it is 100 feet in diameter. Mrs. Hoffman describes the object as a pearly aluminum color. They continue watching for 10 minutes, then they start the car again and drive south, hoping to get underneath it, but when they reach Fernway Road, it moves toward the west slowly and silently, disappearing from view. (UFOEv, p. 69)

1955, November 17 — 6:10 a.m. J. A. Mapes and his wife in St. Louis, Missouri, see 12 round, flat objects, silver on top and dark on the bottom, flying in formation three abreast and four deep. They are tipped at an angle and fly silently. The duration is 45 seconds. (Project Blue Book case file; Sparks, p. 231)

1955, November 20 — Aviation journalist Ansel E. Talbert writes an article in the *New York Herald Tribune* that discusses antigravity research taking place at Princeton University, the University of Indiana, Purdue University, the Massachusetts Institute of Technology, the University of North Carolina at Chapel Hill, and the Gravity Research Foundation at New Boston, New Hampshire. (Ansel E. Talbert, "Conquest of Gravity Aim of Top Scientists in U.S.," *New York Herald Tribune,* November 20, 1955, p. 1; Brett Tingley, "The Truth Is the Military Has Been Researching 'Anti-Gravity' for Nearly 70 Years," The War Zone, December 1, 2019)

1955, November 20 — 5:20 p.m. Operations Officer Capt. Edward G. Denkler Jr. and 5 men of the USAF 663rd AC&W Squadron see two oblong, bright orange, semi-transparent objects fly erratically at terrific speed toward and away from each other, over Lake City [now Rocky Top], Tennessee. The investigating AISS commander determines it is likely Venus, but Project Blue Book apparently disagrees and labels it Unknown. Researcher Brad Sparks believes the case is poorly investigated and fits with Venus or atmospheric distortion of stars and planets low on the horizon. (NICAP, "Seven Witnesses Observe Maneuvering Objects near Oak Ridge Plant"; Sparks, p. 232)

1955, November 22 — The first Soviet test of a true thermonuclear bomb takes place at the Semipalatinsk Test Site in Kazakhstan. (Wikipedia, "RDS-37")

1955, November 25 — 10:30 a.m. Colorado State Senator Samuel Tesitor Taylor sees an unusual cigar-shaped object near La Veta, Colorado. It is greenish-blue in color, appears luminous, and is completely silent. He estimates it is flying at 7,000–8,000 feet, traveling about 10 miles in 5 seconds, and suddenly disappears from view over Mount Mestas to the northeast. (NICAP, "Senator Sees Dirigible")

1955, November 30 and December 2 — The *Miami Herald* publishes two articles by aviation journalist Ansel Talbert in which he lists the names of aerospace firms conducting gravity-control propulsion research, including Glenn L. Martin Company, Convair, Bell Aircraft, Lear Inc., Clarke Electronics, and Sperry Gyroscope Division. The Gravity Research Group indicates these companies have constructed "rigs" to improve the performance of Thomas Townsend Brown's gravitators through attempts to develop materials with high dielectric constants. Articles about the gravity propulsion research by the aerospace firms cease after 1974. Follow-up studies on Brown's work and other claims are conducted by R. L. Talley in 1990 and 2013 US Air Force studies, NASA scientist Jonathan W. Campbell in a 2003 experiment, and Martin Tajmar in a 2004 paper. They find that no thrust can be observed in a vacuum and that Brown's and other ion-lifter devices produce thrust along their axis regardless of the direction of gravity—consistent with electrohydrodynamic effects. (Wikipedia, "United States gravity control propulsion research"; Wikipedia, "Anti-gravity"; Ansel E. Talbert, "Scientists Begin Work to Break Gravity Barrier," *Miami Herald,* November 30, 1955, pp. 1–2; Ansel E. Talbert, "Future Planes May Defy Gravity and Air Lift in Space Travels," *Miami Herald,* December 2, 1955, p. 8)
